INTRODUCTION TO THE THIRD EDITION

SINCE THE PUBLICATION of the second edition of the book in 1950, the growth of labour and industrial legislations in India has been continuous and in the present volume, the work has been thoroughly revised, recast and re-arranged and where necessary re-written to bring it up-to-date. The second edition was sold out quicker than was anticipated and there has been a persistent demand for an early third edition. The work, however, could not be taken in hand earlier due to several factors, the main being the author's desire to include all labour laws of the Central Government as contemplated in the Five Year Labour Programme of the Ministry of Labour and the First Five Year Plan of the Planning Commission in one comprehensive volume as a Reference Book for all concerned with labour laws. Parliament is now being prorogued for the general elections and this is the opportune time to place the new edition before the people interested in labour to enable them to know and study the labour laws undertaken by the Government of India from 1850 to 1956.

After the second edition was published in 1950, several new labour laws have been placed on the Statute Book and several important Amending Acts have also been passed by the Parliament. All these laws have been incorporated in the present volume. Several legislations which were not included in the previous editions have been included and all legislations have been divided subjectwise. Some of these are mentioned hereunder. Under Factory and Establishment Legislation, Safety Provisions of the Factories Act, 1948; Occupational Diseases and Indian Boilers Act, 1923, have been added. Under Mining Legislation, Mineral Legislation has also been included. Under Transport Legislation, apart from railway and dock labour, maritime labour, port labour, road transport labour and air transport labour have been added. Indebtedness Legislation, Fair Wage Clause and C. P. W. D. Contractor's Labour Regulations have been added in Wages Legislation. Under Social Security Legislation, provident fund legislations undertaken prior to the enactment of the Employees' Provident Funds Act of 1952 have been incorporated. Legislation relating to Superannuation Funds and Rules for creation of Gratuity Fund have also been included under this heading as also extracts from the Indian Trusts Act and the Estate Duty Act about investment of the trust money under the former Act and trustees' liability under the latter Act. Industrial Housing Legislation is a new one. Under Miscellaneous Legislation, several important legislations, though not strictly pertaining to labour, have been included.

Many new important matters which have not yet been published in any single volume and which were not included in the previous editions have been given in the Appendix to make it more useful for all those who are interested in labour problems and labour legislations. Another new feature is the Index to Statutory Definitions which includes expressions defined in the different Acts, Ordinances, Rules and Regulations of the Government of India to enable the reader to know the different definitions of expressions like "wages", "workman", "worker", "workshop", "employee", "employer", "factory", "child", etc.

Many valuable suggestions have been received from people from different walks of life who had occasions to use the first two editions and most of their suggestions

have been given effect to in this edition. I express my grateful thanks to Sir Walter Monckton, former Minister of Labour and National Service, United Kingdom, and also to the Controller of H. M. Stationery Office, London, for permission to reproduce the Model Constitution and Functions of a Joint Industrial Council, Suggested Constitution and Functions of Works Committee and Constitution of Joint Production Consultative and Advisory Committees from "Industrial Relations Handbook". My thanks are also due to the managements of the different Companies and Unions for their permission to reproduce their respective Collective Agreements in the book. I am grateful to the Secretaries of the World Federation of Trade Unions, Paris and International Confederation of Free Trade Unions, Brussels, for their permission to reproduce the Aims and Objects of their respective Organisations as well as the authorities of the four Central Trade Union Organisations in India, viz., A.I.T.U.C., I.N.T.U.C., H.M.S., and U.T.U.C., for their allowing me to publish their Aims and Objects in this edition.

My thanks are also due to the different Ministries of the Government of India, specially the Ministry of Labour and Ministry of Law for valuable and up-to-date information and the Ministry of Railways for permission to publish the Railway Permanent Negotiating Machinery. Sri T. S. Swaminathan, Secretary, Employers' Federation of India, Bombay, and the International Labour Office, Indian Branch, New Delhi have been of great help to me in supplying all up-to-date information asked for within the shortest possible time. I cannot close without acknowledging the goodwill and encouragement of numerous friends and colleagues in various parts of the country for their constructive criticisms and various suggestions. Lastly, I shall be failing in my duty if I do not express my deep sense of gratitude to the management of the Bata Shoe Company Private Limited, Calcutta, for their constant encouragement and help in my endeavour.

I hope that this edition will be found useful to all who are connected with the administration of labour laws as well as those who are interested in labour matters. In conclusion, I will welcome any suggestion or criticism of my introductory notes and comments which are my own and for which I am solely responsible.

S. N. BOSE

INTRODUCTION TO THE FIRST EDITION

THE subject of industrial labour and industrial welfare has to-day assumed greater importance in an independent India. Although the origin of labour legislation can be traced back to the early part of the last century and although India has undertaken several legislative measures in connection with some specified classes of industries, the progress was rather very slow until the inauguration of the International Labour Conference in 1919. The work of the International Labour Office and the annual session of the International Labour Conference had a very great influence on the public opinion in India towards the labour problems and it can not be denied that the chief impetus for most of the progressive labour legislations in India has been derived from the Conventions or Recommendations of the International Labour Conference. Though there are at present 86 Conventions, India has ratified only 16 Conventions and the progress so far achieved is not very much encouraging. The defect was due to lack of proper development of an uniform national labour policy on account of our political subjection. As a result labour legislation in India lacks uniformity in principle and co-ordination in development and the distribution of legislative and administrative powers between the Centre and Provinces under the Government of India Act, 1935, is also responsible for this lack of uniformity. In the pre-Autonomy period, labour legislation was the exclusive jurisdiction of the Central Government although the Provincial Governments could undertake labour measures for local purposes with the consent of the Governor-General. Under the Government of India Act, 1935, legislative powers relating to labour have been divided into three categories, viz., (i) Federal, (ii) Provincial and (iii) Concurrent; but a majority of labour questions have been relegated to the Concurrent List, (Part II of List III). According to the Rege Committee, "this scheme of distribution of powers has resulted in a complete lack of uniformity, both in regard to policy and action." The Whitley Commission recommended in 1931, the setting up of an Industrial Council consisting of the representatives of the Provincial Governments and Indian States for formulation of an uniform Labour Code for India. Though no action was taken on this recommendation, the establishment of a permanent Tripartite Labour Organisation in 1942 consisting of the representatives of Central, Provincial and State Governments and employers and workers on the model of the International Labour Organisation, was an important step forward in promotion of an uniformity in labour legislation and discussion of all matters of all-India importance concerning employers and employees. This Organisation consists of the Labour Conference which meets once a year and the Standing Labour Committee which meets not less than twice a year. For the sake of uniformity in labour legislation, the jurisdiction of the future Indian Parliament should be extended not only to enactment of labour legislation on all-India basis but also to their administration for ensuring maximum compliance with the provisions of law. The States (Provinces and Indian States) should concentrate in legislative and administrative measures which will not be tackled by the Union Government. The labour problems should always be considered in a broad national basis like food, planning, tariff, etc. An important step taken in this direction is the annual

Conference of the Provincial and State Labour Ministers under the Chairmanship of the Labour Minister of the Government of India where labour problems are discussed thoroughly and line of action is recommended. But the Draft Constitution of India proposed by the Drafting Committee of the Constituent Assembly has followed the old plan of legislative distribution, though under Article 217 (4), the Indian Parliament¹ will have power to make laws for the States and Territories of India notwithstanding such matter is a matter enumerated in the State List.

The most important step in the development of a national labour policy has been undertaken by the Indian National Congress beginning with the Karachi Resolution on Fundamental Rights in 1931, Faizpur Resolution on Agrarian Reforms in 1937, Election Manifestos of 1937 and 1947, the famous Quit India Resolution of 1942, the Meerut Resolution of 1946, organisation of Indian National Trade Union Congress in 1947 and ending with the Economic Programme embodied in the Report of the Economic Programme Committee of A. I. C. C. in 1948. The Congress after assuming charge of seven out of eleven Provinces after the Provincial Autonomy in April 1937, tried to give effect to the declared Congress Policy and implemented a part of this Policy inspite of several handicaps. The Interim Congress Government at the Centre also drew up a Five Year Labour Programme in 1946 for undertaking legislative and administrative measures for amelioration of labour conditions in India with a view to remove the chief defects revealed by the Royal Commission on Labour in India in 1931 and the Labour Investigation Committee in 1946. This Programme aims at a uniform co-ordinated labour policy for the entire country to promote social security and industrial peace, ensure fair wages and satisfactory conditions of work and embraces not only workers in organised industries but also workers in agriculture, commercial undertakings and unorganised industries and to implement the International Labour Conventions as far as possible. Within a short span of one year, the present Congress Government at the Centre was able to give effect to some of the important items in the Programme and put on the Statute Book, Industrial Disputes Act, 1947, Coal Mines Labour Welfare Fund Act, 1947, Indian Trade Unions (Amendment) Act, 1947, Dock Workers (Regulation of Employment) Act, 1948, Minimum Wages Act, 1948 and Employees' State Insurance Act, 1948. Apart from these enactments, a Bill containing several important provisions regarding welfare and safety of factory workers and covering unregulated factories also, was introduced on 3rd December, 1947 for a thorough overhaul and repeal of the existing Factories Act, 1934. Actions were also taken in the constitution of Labour Bureau, Industrial Committees on Coal Mining, Cotton Textiles and Plantations on tripartite basis on the model of I.L.O. The question of making the existing Employment Exchanges permanent and enlarging their scope is also being considered.

Though political freedom has been attained, economic and social freedom have yet to be achieved and for their speedy attainment, the Government is putting more and more emphasis on the industrial development and production of national wealth with the motto: "Produce or Perish". The problem of production of national wealth has a vital bearing upon the removal of poverty and illiteracy. Sir William Beveridge's Five Giants, viz., Want, Disease, Ignorance, Squalor and Unemployment flourish unabatedly in India than in anywhere else and these Giants should be systematically attacked on a road to reconstruction. A Conference consisting of the representatives of Central, Provincial and State Governments and Employers and Workers was convened by the

¹ Government of India (Amendment) Act, 1949 passed by the Constituent Assembly of India has empowered the Central Government to legislate exclusively over some items in Part II of the Concurrent List.

Government of India in December 1947 to discuss some urgent problems relating to the industrial development in India and to assist the Government in arriving at decisions for immediate increase of production and execution of short-term plans for the industrial development of the country. Several important Resolutions were unanimously passed including one relating to Industrial Truce for three years. The Government of India has accepted this Resolution and is taking necessary steps for its implementation. Under their recently announced Industrial Policy, the Government is proposing to establish machinery for advising on fair wages, fair remuneration to capital and conditions of labour and to associate labour in all matters concerning industrial production. The Government is appointing a Special Officer for quick decisions on matters arising out of the Truce Resolution. It is high time that we should take stock of things and compare our achievements in the domain of labour legislation with other countries of the world, with particular reference to the International Labour Code and Philadelphia Charter. The Philadelphia Charter should always be our guiding principle in the matter of enunciation of a national labour policy and enactment of future labour legislation. The recent enactment of minimum wage legislation and social insurance legislation is a forward step in this direction. After the attainment of freedom, the responsibility rests on the educated public who were not so long very much interested on the subject, to mould the public opinion in a new approach to the entire problem of labour legislation and its administration.

The industrial worker in India has a very vague idea about his general position in law in relation to his employer and his employment and much of existing bitterness and misunderstanding between labour and capital is due to a certain extent to his ignorance of his rights and duties under the existing law. The employer also is not always abreast of the laws in all particulars and specially his duties and responsibilities under the existing law. The respect for industrial laws by employers and employees will be of greatest help in bringing up the general standard of compliance. The need for a comprehensive and consolidated book containing all the existing labour and welfare legislations has long been felt in India. Mr. H. M. Trivedi's book on "Factory and Labour Legislation in India" published in 1945 was the first and solitary attempt for a comprehensive compilation of all legislative measures relating to labour and factory enacted by the Central and Bombay Governments with a nice Introduction. Several important legislations have been undertaken after the publication of this volume. The publication of a consolidated volume containing all the labour laws as amended up-to-date will serve as a handy guide not only to the employers and employees but also to every one who is interested in promoting the cause of industrial labour.

In the present book I have included all the existing labour, factory and labour welfare laws of the Government of India with rules, regulations and relevant notifications, with introductory notes and comments, within the limit of a single volume, for easy reference for lawyers, legislators, industrialists, trade unionists, employers, employees, social workers and people in every walk of life. The Appendix contains several useful information, viz., the Philadelphia Charter, International Labour Conventions, I.L.O. Resolution on Freedom of Association, Five Year Labour Programme and Industrial Policy of the Government of India and Resolution of the Industries Conference including Resolution on Industrial Truce and machinery for its implementation. The notes and comments made in the book represent my views and error or lack of clarity in the book, if any, may be attributed solely to me. My original ambition was to bring out an annotated edition of the existing labour laws in a single volume incorporating therein the decisions of reported cases of High Courts and I was working on that line;

but at the request of several of my friends in the Bar and the Bench for early publication of the volume, I am bringing out the book with introductory notes on each subject of labour legislation. I intend to incorporate the rulings of decided cases of different High Courts and Industrial Tribunals in the next edition. I have also undertaken to publish a second volume of this book with all the labour laws enacted and rules made on Central Acts by the Provincial Governments. Any suggestion and criticism for improvement will be duly considered and thankfully acknowledged.

I owe a deep debt of gratitude to Hon'ble Sri Jagjiwan Ram, Labour Minister of the Government of India for having taken the trouble of going through the book and writing a Foreword. My thanks are also due to my friends Mr. G. C. Bose, Managing Director, Bookland Ltd. and Mr. P. C. Bhattacharjee, Managing Director, World Press Ltd., for their assistance and co-operation in the printing and publication of this volume. My wife has considerably helped me in reading through the proofs and preparation of the Index and she has foregone many a pleasure that this book is written.

JAI HIND.

FACTORY & ESTABLISHMENT
LEGISLATION

FACTORY LEGISLATION

The most important labour legislation in India relates to the factories. The need for regulation of hours of work and conditions of employment of industrial workers was recognised in India from the middle of the last century. But there was no state regulation of factory labour prior to 1881.

Indian Factories Act, 1881 (XV of 1881)

The first comprehensive legislation for regulating labour in factories was passed in 1881. Indian Factories Act, 1881 applied to manufacturing establishments using mechanical power and employing 100 or more persons, plantation industries being exempted. The Act prohibited the employment of children under seven years of age and prescribed the minimum and maximum ages for employment at seven and twelve, 9 hours working every day with an interval of rest for one hour and a weekly holiday for children only.

Indian Factories Act, 1891 (XI of 1891)

The influence of the first International Labour Conference held in Berlin in 1890 and the pressure from Manchester led to the appointment of a Commission by the Government of India on 25th September, 1890. Mainly on the basis of its recommendation, a new Act was passed in 1891 and came into force on 1st January, 1892. This Act was an advance on the previous Act. The Act applied to all factories employing 50 persons and using power. The lower and upper limits of age of children were fixed at 9 and 14 respectively and their hours of work were limited to 7 hours a day, with a rest interval of half an hour. The Act prescribed an 11 hour day with a rest interval of $1\frac{1}{2}$ hours for women and restricted the employment of women and children. Men were to enjoy an interval of $\frac{1}{2}$ hour rest and one holiday every week. The Provincial Governments were given power to make rules regarding measures of sanitation and comfort.

Indian Factories Act, 1911 (XII of 1911)

The Act of 1911 regulated, for the first time, the hours of work of adult male industrial workers and covered seasonal factories which work for less than 4 months in a year. The Act limited the hours of work of adult male workers to 12 a day and of children to 6 a day in textile factories, with a rest interval of half an hour. The Act contained extensive provisions regarding health and safety and effective inspection of the administration of the factories.

Indian Factories (Amendment) Act, 1922 (II of 1922)

Partly as a result of the International Labour Conference and partly as a result of growing social consciousness of the people, the Factories Act was amended in 1922 making some important changes in the provisions. The amending Act was extended to include all industrial undertakings using mechanical power and employing 20 or more persons. The hours of work for all adult workers, both male and female, were fixed at 11 hours a day and 60 hours a week. A 60 hour a week was introduced in pursuance of a special provision relating to India in

¹ For historical study, see (1) Factory Labour in India and Factory Legislation in India by Dr. Rajani Kanta Das, (2) Indian Factory Legislation: A Historical Survey and Indian Factory Law Administration by A. G. Clow, (3) Factory Labour in India by Dr. Ahmed Mukhtar and (4) Reports of the Royal Commission on Labour in India, 1931 and Labour Investigation Committee, Main Report, 1946.

Washington Hours Convention of 1919 (8 hours a day and 48 hours a week). All workers were granted a period of one hour rest for work exceeding six hours, a weekly holiday and no worker should go without a holiday for more than 10 days at a time. The minimum age of children was raised to 12 and a child was defined as a person under 15 years of age and their hours of work limited to 6 a day. In case of overtime, workers should receive at least $1\frac{1}{4}$ times the normal rate of pay. The employment of women and children under 18 in certain dangerous processes was prohibited.

Indian Factories (Amendment) Acts, 1923, 1926, 1931 (IX of 1923, XXVII of 1926, XII of 1931)

The Indian Factories Act of 1911 was amended in 1923 with a view to effecting some minor changes for administrative purposes and also in 1926 for providing the infliction of penalties on parents or guardians for allowing children to work in two factories on the same day. It was amended again in 1931 empowering Provincial Governments to make rules for providing for precautions against fire inside factories.

Factories Act, 1934 (XXV of 1891)

The Royal Commission on Labour in their Report published in 1931 made several important recommendations for amendment of Indian Factories Act, 1911. The Factories Act, 1934 is a comprehensive measure amending and consolidating all the previous factory legislations of 1881, 1891 and 1911 as amended by Acts of 1922, 1923, 1926 and 1931. The main objects of the Act are (1) reduction of hours of work, (2) improvement of working conditions within the factory and (3) provisions for adequate inspection and strict observance of the Act.

Main Provisions of the Factories Act, 1934

The most important provisions of the Act are following:—(1) It covers all manufacturing establishments employing 20 or more persons and using mechanical power. (2) A distinction has been made between seasonal and perennial factories, the former working for 180 days or less in a year. Different sets of regulations have been prescribed in respect of hours of work. The Act lays down a 54-hour week and 10-hour day for all adult workers in perennial factories and 56 hours a week or 10 hours a day in case of continuous work, but retains a 60-hour week and 11-hour day in seasonal factories. (3) The hours of work of children (persons between the ages of 12 and 15) are reduced from 6 to 5 a day and those of women from 11 to 10 a day both in seasonal and perennial factories. (4) Adolescents who are a new category of young persons between 15 and 17 years of age, may not be employed as adults without a medical certificate of physical fitness. (5) No child is allowed to work in a factory unless he secures a certificate of fitness, from the Certifying Surgeon, and carries with him a token giving reference to such certificate, while at work. The double employment of children in two factories on the same day is prohibited. (6) The period over which a working day may be spread over is fixed at 13 hours a day inclusive of rest intervals in case of adults (male or female) and $7\frac{1}{2}$ in case of children. Women and children should not be employed before 6 a.m. or after 7 p.m., but the Provincial Government may, by notification in the official Gazette, vary these limits so as to make the working day fall within any span of 13 hours between 5 a.m. and 7-30 p.m. (7) Every adult worker is entitled to a compulsory interval of rest and it is provided that no adult worker shall work for a period of 6 hours, 5 hours and $8\frac{1}{2}$ hours, without having a rest interval of 1 hour, half an hour or two intervals of half an hour respectively. (8) All factory workers are entitled to a weekly holiday on

Sunday. Exception can be given to adult workers under certain conditions, provided no worker is required to work, for more than 10 days, consecutively, without a holiday, for a whole day. No exemption is allowed in case of children. (9) A worker is entitled to a payment of overtime at the rate of $1\frac{1}{4}$ times the ordinary rate of pay for work exceeding 54 to 60 hours a week in perennial factory and at the rate of $1\frac{1}{2}$ times the ordinary rate of pay for work exceeding 10 hours a day in a perennial factory and exceeding 60 hours a week in either a seasonal or perennial factory. (10) The provisions for health and safety have been amplified and made more stringent. Every factory has to ensure cleanliness, proper ventilation, prescribed standard of coolness, regulation of overcrowding of space and adequate lighting arrangements within the factory. Each factory is required to have adequate supply of pure drinking water, proper sanitary arrangements, sufficient supply of water for washing purposes and fencing of dangerous machinery. (11) Provincial Governments have been empowered to make rules (a) requiring a factory employing more than 150 workers to provide adequate rest shelters, (b) requiring any factory employing more than 50 women, to provide creches for their children below 6 and (c) requiring a factory to keep first aid medical appliances and stores under proper custody. (12) The Act provides for a penalty which may extend to Rs. 500/- for contravention of any of its major provisions and enhanced penalty for repeated breach.

Factories (Amendment) Act, 1935 (XI of 1935)

The Act was amended in 1935 entirely prohibiting night work of women in factories in any capacity whatsoever.

Repealing and Amending Act, 1937 (XX of 1937)

The Act repealed Section 82 and the Schedule of the Factories Act, 1934.

Factories (Amendment) Act, 1940 (XVII of 1940)

The Act was amended in 1940 and imposed statutory obligation upon Provincial Governments to extend the provisions of the Act, concerning health, safety, hours of work and conditions of children and adolescents, to power factory employing 10 to 19 persons defined as "small factory". It also empowers the Provincial Governments to declare any premises to be a "small factory" notwithstanding that less than 10 workers are employed in it.

Factories (Amendment) Act, 1941 (XVI of 1941)

The Act was amended again 1941 to remedy administrative defects and empowered the Provincial Governments to declare the provisions of the Act to any specified class of employments wherein a manufacturing process is being carried on with or without the use of power, employing 10 or more persons.

Factories (Amendment) Act, 1944 (XIV of 1944)

The Act was amended in 1944 with a view to remedy certain defects and meet some difficulties in the working of the Act and for providing some minor changes regarding health and safety and also temporarily amending the provisions restraining the employment of women and children during night till the termination of hostilities.

Factories (Amendment) Act, 1945 (III of 1945)

The amended Act introduced substantial change and important provision regarding paid holidays. Annual holidays with pay are the subject of Convention

No. 52 adopted by the International Labour Conference in 1936² whereby workers in industrial and commercial undertakings are entitled to an annual paid holiday of at least six working days after one year of service. The Factories Act, 1934 was amended in April 1945 to include a special section dealing with annual paid holidays in respect of all perennial factories registered under the Factories Act. The amendment ensures compensatory holidays to workers deprived of the weekly rest by an exemption of the provisions of section 35 of the Act and enforces an annual paid holidays of 10 days for adults and 14 days for children after one year of service with the possibility of accumulating the holidays for a period of two years. These periods exceeds the minima laid down in the International Labour Code. The holidays under the amended Act can be accumulated for a period of 2 years while there is no provision for such accumulation in the Code. The wages during leave will be calculated according to the definition of the term in the Payment of Wages Act. Half of the wages for holidays will be paid before the worker proceeds on leave and the balance on his return. If the worker entitled to holidays is discharged by his employer before he has been allowed holidays, or if, having applied for and having been refused the holidays he quits his employment before he has been allowed the holidays, the employer has to pay him the amount payable in respect of holidays.

Factories (Amendment) Act, 1946 (X of 1946)

Though the Washington Convention prescribed a limit of 48 hours a week in industrial undertakings, allowing 60 hours for India, the Factories Act, 1934 prescribes maximum weekly hours of 54 on the basis of the recommendation of the Whitley Commission. The International Labour Conference adopted a Convention No. 47³ for 40 hours a week in 1935 and some progressive countries like U.S.A., France and Belgium introduced 40-hour week in certain industries. The Factories Act was amended in 1946 reducing the weekly working hours from 54 to 48 in perennial factories and from 60 to 50 in seasonal factories. The daily hour of work is reduced from 10 to 9 in a perennial factory and from 11 to 10 in a seasonal factory. The original Bill⁴ provided for payment for overtime at a uniform rate of one and half times the ordinary rate. But the Select Committee⁴ unanimously agreed to double the payment for overtime. The amending Act, thus, provides for overtime at the rate of twice the ordinary rate of pay of the workers. The overtime should equitably be on a uniform basis and work in excess of 9 hours a day should be remunerated alike whether in a perennial or seasonal factory, though no overtime payment was previously provided for working over 11 hours a day in a seasonal factory. Provincial Governments have been empowered to permit factories to work beyond the fixed limits in the public interest.

Factories (Amendment) Act, 1947 (V of 1947)

The Act was amended in 1947 to enable the Provincial Governments to make rules requiring specified factories employing more than 250 persons, to set up canteens in conformity with prescribed standards and conditions. Canteens in industrial establishments are of inestimable value to workers as well as to managements, as by providing inexpensive wholesome food to the workers, they promote their health and well-being upon which the productive efficiency and the welfare of trade in which they are engaged largely depend. The subject was discussed at the Seventh Labour Conference in 1945 which decided in favour of such legislation.

² For detailed descriptions of the Conventions and Recommendations adopted by the International Labour Conference, see International Labour Code, 1951.

³ For Statement of Objects and Reasons, see Gazette of India, Part V, 23rd Feb., 1946.

⁴ For Report of the Select Committee, see *Ibid.*, Part V, 23rd March, 1946.

A Bill⁵ was accordingly introduced in the Legislative Assembly on the 28th October 1946 and was passed (V of 1947). The Act also rectified an omission in the Factories (Amendment) Act, 1946 by deleting "non-seasonal" in the proviso to section 34 of the Act.

Five-Year Labour Programme of the Government of India

The Government of India, during the Interim Congress regime, drew up a Five-year Programme⁶ of legislative and administrative measures for amelioration of labour conditions in India after the same was discussed and approved at Conferences with Provincial Labour Ministers, of State Ministers and of representatives of employers' and workers' organisations. Under this Programme the Government undertook a thorough revision of the Factories Act, 1934 extending its scope virtually to all work places where work or manufacturing progress is carried on with a view to sale or profit and incorporating provisions regarding health of the workers such as those relating to cleanliness, ventilation, temperature, dangerous dusts and fumes, lighting, control of glare and so forth and also laying down standard for welfare measures such as washing facilities, first aid, canteens, shelter rooms and creches. The U. K. Factories Act, 1937 is being taken as a useful guide for the purpose of the revision of the Factories Act as the former is the most up-to-date and comprehensive piece of legislation and incorporates most of the provisions of I. L. O. Code of Industrial Hygiene.

Factory Reform

Measures to bring the working conditions of factory labour in India up to the standards prevailing in the leading industrial countries of the world are being taken up by a special organisation set up by the Government of India under the Chief Adviser, Factories. The services of Sir Wilfrid Garret, Chief Inspector of Factories and two senior Inspectors of Factories, United Kingdom, were obtained on contract to place the Chief Adviser, Factories Organisation on a sound footing. This Organisation will offer advice to the Central Government, Provincial Governments, States and employers on conditions necessary to ensure the safety and health of the workers and will be available for consultation for all matters relating to design and lay-out of factories and on the standards of housing, factory construction, conditions of work, health and safety precautions, control of dust, etc. It organises training and refresher courses for Factory Inspectors and others interested in the administration of the Factories Act and thus functions as a centre of technical information and advice and as a venue for discussion among Factory Inspectors. It publishes leaflets, pamphlets and bulletins for education of workers and employers in safety, sanitation and welfare works. A Museum of Industrial Safety, Health and Welfare is being set up to serve as a centre of demonstration and a permanent exhibition of methods, arrangements and appliances for promoting safety, health and welfare of industrial workers.

Proposal for Overhaul of the Factories Act, 1934

Under the Factories Act, 1934, factory inspection in the Provinces has been entrusted to Provincial authorities. The Labour Investigation Committee⁷ appointed by the Government of India early 1944, in pursuance of a Resolution passed by the Tripartite Labour Conference in September 1943, admitted in their Main Report published in 1946 that the enforcement of labour laws has not been up to

⁵ For Statement of Objects and Reasons, see Gazette of India, Part V, 2nd November, 1946, p. 241.

⁶ For a short resume of the Programme, see Indian Labour Gazette, March and June, 1947 and International Labour Review, May 1947.

⁷ Labour Investigation Committee, Main Report (Delhi, 1946).

the mark, the standards of inspection in most Provinces are poor and even the strength of the Inspectorate is miserably small. The existing provisions for ensuring the safety follow the out-of-date U. K. Act of 1889 and are quite inadequate and unsuitable for modern industrial conditions. The U. K. Factories Act, 1937⁸ (1 Edw. 8 & 1 Geo. 6, Ch. 67) introduced extensive changes in the sphere of safety which should go to lessen the toll of accidents in industry and local sanitary authorities were entrusted with the enforcing of the sanitary and health provisions of the Act.

Factories Act, 1948 (LXIII of 1948)

A comprehensive Bill⁹ to consolidate and amend the law relating to factory labour was prepared by the Government on the general lines approved in the Ninth Meeting of the Standing Labour Committee and in the light of discussions held with the Provincial Chief Inspectors of Factories and was introduced in the Dominion Assembly on the 3rd December, 1947. The Bill extends the scope to all industrial establishments employing ten or more workers where power is used and twenty or more workers in all other cases and lays down all essential measures, relating to cleanliness, ventilation, lighting, sanitary arrangements, health, safety and welfare of the workers and places the responsibility on the factory owner for taking safety measures in the factory. Plans and specifications for new factories or extension of the existing factories have to be submitted to the Provincial Government and proper arrangement should be made for disposal of wastes and effluents. The Bill was circulated under executive orders for eliciting public opinion and Provincial Governments were asked to forward the comments received from the various bodies with their own views. The Bill was referred to the Select Committee¹⁰ on the 30th January, 1948 which submitted Report on the 9th August 1948. In his speech before the Constituent Assembly (Legislative) on the 30th January, 1948 while moving that the Bill be referred to the Select Committee, the Labour Minister Hon'ble Sri Jagjiwan Ram¹¹ explained some of the main changes proposed in the existing law and gave an admirable summary of the new Bill.

"The object of the Bill is not only to consolidate the law relating to working conditions in factories but also to introduce certain important new features.

The existing law applies to industrial establishments where manufacturing process is carried on with the aid of power and where twenty or more persons are working. There is an enabling provision authorising Provincial Governments to extend the provisions of the Act to establishments using power and employing ten or more persons. A few Provinces have enacted legislation to regulate factories where power is not used. But even such legislation is applicable only to establishments where 50 or more workers are employed.

It is now proposed that the law relating to factories should be made applicable to all industrial establishments employing ten or more workers where power is used and twenty or more workers in all other cases. As a result of this change the number of establishments subject to control is likely to be trebled. The number of workers to whom the provisions of the Factories Act will extend will increase immediately from twenty-five to thirty-five lakhs. The country is now setting upon an era of industrial expansion. We are all agreed that as far as possible this industrial expansion should not take the form of a limited number of big

⁸ Factory Law by H. Samuels (London, 1951) and Redgrave's Factories, Truck and Shops Acts (London, 1949).

⁹ For Statement of Objects and Reasons, see Gazette of India, 1947, Part V, pp. 580-585.

¹⁰ For Report of the Select Committee, see *Ibid.*, pp. 551 to 590.

¹¹ Constituent Assembly of India (Legislative) Debates, 30-1-48 (Vol. I—No. 2, p. 77).

factories but rather of a large number of small industrial establishments dotted all over the country. It therefore becomes necessary that our law relating to factories should be made applicable to the smaller establishments also. It is with this view that the definition has been widened.

The present Act makes a distinction between seasonal and perennial factories. Because the seasonal factories work for only a part of the year there is a tendency to be somewhat lenient in the enforcement of standards relating to safety and health. This is not a satisfactory state of affairs. Whether a factory works for part of the year or for the whole year provisions relating to safety, health and welfare should be equally applicable. We have therefore done away with the distinction between perennial and seasonal factories.

Even with these changes the new definition will not cover all workers. I feel and I am sure the Hon'ble Members will agree with me that regulations relating to cleanliness, ventilation, lighting, supply of drinking water, the provision of sanitary conveniences, fencing machinery, hours of work, weekly day of rest, prohibition of the employment of children, reduced hours of work for adolescents should be applied to all work places, irrespective of the number of people employed. The difficulty in extending these essential provisions is mainly an administrative one. As I have said the new definition of factories will treble the number of establishments subject to control. The Inspectorate will need considerable strengthening. Provincial Governments should be given some time to organise a bigger Inspection service. As soon as satisfactory arrangements are made to secure a proper enforcement of the Act to establishments covered by it, Provincial Governments will be in a position to extend the essential provisions relating to health, safety, welfare, hours of work, age of entry into employment to other work places. To enable them to do so, a provision (S. 86) has been added giving power to Provincial Governments to apply these provisions to any premises where a manufacturing process is carried on with or without the aid of power, except where work is done by the worker solely with the aid of his family.

The elaboration of the provisions relating to health, safety and welfare deserve attention. The existing Act leaves far too many things to be covered by rules or to be done at the discretion of the Inspector. The rules are not always uniform and the discretion cannot be exercised in an uniform way with the result that there are considerable variations in the standards applied to different factories and in different parts of the country. Another serious defect in the existing legislation is that it leaves many matters to be attended to only at the instance of the Inspector. There is no obligation on the factory owner installing new machines, not specifically covered by the rules or notified by the Inspector as dangerous to take any measures for the safety of their workers. With the rapid technological advancements that are taking place installation of new types of machinery and the introduction of new processes will be of frequent occurrence. The adoption of safety measures cannot be postponed till provision is made for them in the rules. The only satisfactory method is to lay on the factory owner a clear and definite responsibility for taking all measures necessary to secure the safety of workers in his factory. If we are to lay this responsibility on the owner the precautions to be taken and the standards to be observed in regard to health and safety means should be clearly prescribed in the Act itself. This is precisely what has been attempted in the Bill. An additional and no less important advantage of this procedure will be the enforcement of a definite and uniform standard in all industrial establishments and throughout the country. Sections relating to the casing of new machinery, hoists and lifts, cranes and other lifting machinery, pressure plant, precautions to be taken against dangerous fumes, explosive or inflammable gases are all new. The obligation relating to the casing of new machinery has been imposed not only on the owner of the factory, but on the manufacturer of the machinery or

his selling agents as well. In the chapter dealing with the disposal of wastes and effluents, the specific provisions relating to ventilation and temperature are new. Similarly the section relating to provision of cool drinking water during hot weather, the employment of cleaners to keep the water closets clean, the obligation to provide sanitary water closets in all establishments are new provisions. In the chapter relating to welfare we have made provision that in every factory when workers are obliged to work in a standing position suitable arrangements for seating should be provided so that they may rest whenever they get an opportunity. Where a worker can work efficiently in a sitting position, the seating arrangement should be provided for him. The sections relating to facilities for storing and drying clothing is also a new one. If the arrangements for the welfare of the workers are to be successfully managed it is essential that workers must realise their responsibilities in the matter and should be actively associated in their management. Section 50 of the Bill provides for such association. An enabling provision has also been made under which the owner of any factory employing 500 or more workers may be required to appoint a suitable Welfare Officer whose specific duty it will be to look after the welfare of the workers. To ensure that the right type of people are appointed and to give them a measure of security and independence Provincial Governments have been given power to prescribe the duties, qualifications and conditions of service of these Officers.

Another important provision to which I would like to invite attention of the House is the one embodied in Section 7 providing for the scrutiny of the places and specifications of factory building and their lay-out by the Factories Inspectorate. We have therefore introduced a section so that before the buildings are erected, the plans and specifications are examined with a view to seeing whether the provisions of law relating to matters of health, welfare and safety have been complied with and proper arrangements will be made to dispose of the waste and effluents.

In regard to employment of workers we have raised the age of entry from 12 to 13. Young persons who have not attained the age of 18 years instead of the present limit of 17 years will be considered as adolescents.

The Chapter dealing with holidays with pay has been revised to provide for the grant of holidays to workers who have done six months' service. This is a new provision. The definition of authorised leave has also been revised to provide for unauthorised absence up to a limit of 20 days in a year. In regard to casual absence due to illness or other reasonable cause it would be sufficient if the worker gives the reasons for his absence within three days from the commencement of such absence. These provisions will remove a source of dispute between employers and workers.

Information in this country regarding occupational diseases is somewhat scanty. The factory owner and the Medical Practitioner attending upon factory employees are the persons who can give useful information. Provision has been made requiring these people to give information regarding accidents in factories causing death or serious injury or of diseases treated. These provisions which are anew, are designed not only to obtain a knowledge of occupational diseases, but also to arrange for such remedial measures as can be taken to prevent their occurrence or reduce their incidence.

Changes have been made in the Penalties Chapter also. The existing law only provides for a fine for contravention of the provisions of the Act. To an employer, a fine is no deterrent, we have therefore provided for imprisonment as well.

These briefly are the main changes that have been introduced in the Bill. We have tried to implement as many of the provisions of the International Labour Organisation Code of Industrial Hygiene as are practicable under Indian condi-

tions. The provisions relating to periodical medical examination of young persons and the submission of plans of factory buildings are also from I.L.O. Conventions. We have also freely drawn upon the British Factories Act, one of the most comprehensive pieces of legislation on this subject. When the Bill is passed into law we would have placed on the Statute Book a Factory Law which, if properly enforced, will secure a marked and distinct improvement in working conditions of labourers."

The Select Committee made certain important changes adding materially to the usefulness of the Bill. The Bill was passed on the 28th August, 1948, received the assent of the Governor-General on the 23rd September 1948 and came into force from 1st April, 1949.

The new Act codifies for the first time, the old international principle that none should employ any worker on any manufacturing process without ensuring his health, safety and welfare. Opinions with regard to the measures to modify the old factory law was divergent, some complained that the Government was going rather too fast in the matter of labour legislation, some felt that these measures were not far reaching enough, while others regarded the new Act as the Charter of the Workers' Rights. The Labour Minister Sri Jagjiwan Ram in his broadcast appeal to the workers and employers from All-India Radio, Delhi on 5th September, 1948 summed up the Government reaction to these criticism as follows, "This enactment is nothing beyond an earnest attempt to secure for factory workers, their elementary rights and basic comforts—simple things which unfortunately have, in many cases, been so blatantly denied to them."¹²

Important features of the New Act

Scope

The Act extends to all the Provinces¹³ in India and to every Acceding State to the extent to which the Dominion Parliament may make laws for that State with respect to the matters dealt with in the Act. The scope of the Act has been considerably widened to include unregulated factories also. The Act covers all industrial establishments employing 10 or more workers where manufacturing process is carried on with the aid of power, or 20 or more workers in all other cases. The Provincial Government is now authorised to extend the provisions of the Act to any premises where manufacturing process is carried on with lesser number of workers, viz., less than 10 workers if power is used or less than 20 workers if power is not used, except where the work is done by the owner solely with the aid of his family. The distinction between seasonal and perennial factories has been done with. The Act applies to the Central and Provincial Government factories unless otherwise exempted.

Approval, Licencing and Registration of Factories

As the designs and lay-out of most of the factory buildings and machineries have been found unsatisfactory, a new provision has been introduced enabling the Provincial Government to frame rules regarding approval, licencing and registration of factories for exercising control over compliance with the law in matters relating to health, safety and welfare. Permission has to be obtained from the Provincial Government or the Chief Inspector of Factories for approval of the site on which the factory is to be situated and for its construction and extension after submission of plans and specifications. The registration and licencing of

¹² Indian Labour Gazette, September, 1948, p. 140.

¹³ Part B States (Laws) Act, 1951 (III of 1951) has extended the Act to the whole of India except the State of Jammu and Kashmir with effect from the 1st April, 1951.

factories will be made on payment of prescribed fees which are also payable in connection with renewals thereof.

Inspecting Staff

Provincial Government is authorised to appoint persons possessing prescribed qualifications as Inspectors. Some changes have been made in the duties of Certifying Surgeons in connection with examination and certification of young persons and of persons engaged in dangerous occupations or processes and the exercise of medical supervision in any factory where occurrence of occupational diseases has been noticed or is suspected or where there is a likelihood of injury to health owing to adoption of a new manufacturing process or use of a new substance.

Health

The existing chapter on Health and Safety has been split up into three separate chapters each dealing with Health, Safety and Welfare and the sections were re-drafted and amplified prescribing the minimum standards required and introducing several new provisions. New health provisions include measures relating to particular method of cleanliness, disposal of waste and effluents, standard of ventilation and reasonable temperature, dust and fume, lighting, supply of cold and wholesome drinking water, provision of sufficient spittoons of prescribed type in convenient places and sanitary water closets. A minimum working space of 350 cubic feet for each worker in the existing factories should be provided and 500 cubic feet in factories built after the commencement of the Act.

Safety

Detailed new safety measures have been provided ensuring the safety of worker working amidst machinery, to bring the safety requirements up to the accepted standards of industrially advanced countries. The Act places the onus of compliance with the occupier and manager of the factory and non-compliance is liable to heavy punishments. New provisions relate to the fencing of new machinery and measures to be taken in connection with the hoists, lifts, cranes and other lifting machinery, revolving machinery and pressure plant, prohibition of lifting, carrying or moving excessive weights, precautions against dangerous fumes, explosives or inflammable gas, dust, etc., and protection of eyes. Sale or hire of machinery not protected as required is also prohibited.

Welfare

Majority of welfare provisions introduced in the Act are new. In every factory adequate, suitable and clean washing facilities should be provided with separate and screened provisions for male and female workers and also sitting facilities for workers obliged to work in a standing position so that they may take advantage of any opportunity of rest which may occur. The Inspector may direct the occupier to provide seating facilities for worker when he is able to work efficiently in a sitting position. The Provincial Government may make rules for facilities for storing and drying of wet clothing of the workers. First-aid boxes or cupboards in charge of a trained person must be provided and maintained in every factory to the number of one to 150 workers and should be readily accessible during all working hours. An ambulance room containing prescribed equipment and in charge of such medical nursing staff as may be prescribed, must be installed in every factory with more than 500 workers. Provincial Government may make rules requiring factories employing more than 250 workers to provide an adequate canteen prescribing date, standards of con-

struction, accommodation, furniture and other equipment, quality of foodstuff with their charges and constitution of Managing Committee with workers' representatives. The last item is the only change over the Amending Act, of 1947 about provision of canteen. The Act also provides for maintenance in a cool and clean condition by every factory employing over 150 workers, of sufficiently lighted and ventilated, adequate shelters, rest rooms and suitable lunch room with provision for drinking water where workers can eat meals brought by them. Factory employing more than 50 women workers must maintain adequately lighted and ventilated rooms in a clean and sanitary condition for use of their children under 6 years of age. Provincial Government may prescribe rules for location and standards of such rooms including facilities for washing and changing the clothing, supply of free milk or refreshment and feeding of children at necessary intervals by their mothers. Factory employing 500 or more workers must employ such number of Welfare Officers as may be prescribed and Provincial Governments have been authorised to prescribe the duties, qualifications and conditions of service of such Officers for ensuring the appointment of right type of people. Provincial Government may make rules requiring representatives of workers in a factory to be associated with the management of welfare arrangements.

Working Hours

Working hours of adult worker have been fixed at 48 hours a week and 9 hours a day. No period of work shall exceed 5 hours and a rest interval of at least half an hour must be allowed after 5 hours' work. The spread over inclusive of period of rest shall not be more than $10\frac{1}{2}$ hours. A worker is entitled to payment at the rate of twice his ordinary rate of wages for overtime work. The term "ordinary rate of wages" in connection with overtime pay means basic wages plus such allowances, including cash equivalent of the advantages accruing through the concessional sale to workers of foodgrains and other articles as the worker is for the time being entitled to, but does not include a bonus.¹⁴ The Provincial Government may make rules which shall remain in force for not more than 3 years, exempting adult workers engaged on specified work from certain provisions of hours restriction, but the total number of hours of work for persons exempted (except workers engaged on urgent repairs) should not exceed 10 hours a day, the total number of hours of overtime may not exceed 50 in any one quarter and the spread over inclusive of intervals for rest may not exceed 12 hours in any one day. Double employment of adult worker is prohibited.

The Washington Hours Convention¹⁵ of 1919 limiting hours of work to 8 hours a day has not even been followed. Though 40-Hour Week Convention of 1935 (I.L.O. Convention No. 47) cannot be adhered to like U.S.A., France, Belgium and other advanced and industrially developed countries, a 44-hour week

¹⁴ The interpretation of the term "ordinary rate of pay" in the 1934 Act was for sometime past a matter of dispute between the employers and the Government. The employers were definitely of opinion that it would mean only the basic pay or wages, but the Government interpreted that it included the dearness and other allowances which might be in force at the time. The new Factories Bill defined it as basic pay and such allowances as the worker was for the time being entitled to, but did not include a bonus. The Select Committee made the position clear beyond doubt and amplified it by including within its meaning all payments and concessions made to a worker whether in cash or in kind except bonus.

¹⁵ The first International Labour Conference held in Washington in 1919 adopted a Convention limiting the hours of work in industrial undertakings to 8 in a day and 48 in a week, but, by a special article, allowed India to adopt a 60-hour week having regard to the conditions then prevailing in the country. Weekly limit to working hours in factories was unknown in India prior to 1922 when a 60-hour week was first introduced in pursuance of the special provision relating to India in the Washington Hours Convention by an Amendment (Act II of 1922) of the Indian Factories Act, 1911.

with 8 hours on week days and 4 hours on Saturday could have been introduced. Burma is the only Asian country which has adopted 44 hours in a week and 8 hours in a day. The Factories Act, 1951 (65 of 1951) of the Union of Burma, which has closely followed the Indian Factories Act of 1948 has fixed the working hours of adults in a factory to 44 hours in a week and 8 hours in a day subject to a proviso that an adult male worker in a factory engaged in work which for technical reasons must be continuous throughout the day may work 48 hours in a week.

Employment of Women¹⁶

The Act prohibits exemption of women workers from the provisions of 9 hours a day. Such women should be employed between 6 a.m. and 7 p.m. Provincial Government may vary the limits but no such variation shall authorise employment between the hours of 10 p.m. and 5 a.m. except in fish-curing and fish-canning factories.

Employment of Young Persons¹⁶

The minimum age for employment of a child worker is raised from 12 to 14 years and the age limit of adolescent is raised from 17 to 18 years. The term "young person" is now used to denote a worker between 14 and 18 years of age. The provisions relating to certificate of fitness for employment of young persons under 18 years of age have been strengthened and provide for their adequate medical examination before employment and also for annual examination. The issue or renewal of a certificate of fitness is subject to conditions in regard to nature of work of young persons and require re-examination before expiry of 12 months. Adolescent (persons between 15 to 18 years of age) cannot work as adult without a medical certificate of fitness. The working hours of child (person under 15 years of age and adolescent not qualified to work as adult) have been fixed at 4½ hours a day and he is not permitted to work between 7 p.m. and 6 a.m. The period of work is limited to two shifts which must not overlap or spread over more than 5 hours each and each child shall be employed in only one of the relays. No exemption from the provisions of weekly holidays can be granted for child workers. These provisions are in additions to those of Employment of Children Act, 1938. A young person is prohibited to work at a dangerous machine unless he has been fully instructed about the dangers arising in connection with the machine and precautions to be observed and has received sufficient training in work at the machine or is under adequate supervision by a person who has a thorough knowledge and experience of the machine.

Leave with Wages

The provisions regarding holidays with pay have been radically changed and substantially recast. The leave rules of the Federal Railways being more liberal, these provisions shall not apply to any workshop of Federal Railway. The Act lays down that its provisions relating to leave with wages shall not operate to the prejudice of any rights to which a worker may be entitled under any other law or under the terms of any award, agreement or contract of service. Where any award, agreement or contract of service provides for longer leave with wages than provided under the Act, the worker shall be entitled to such longer leave. A worker with 12 months continuous service is entitled during the subsequent period of 12 months annual leave with wages calculated at the rate of one day for every 20 days of work during the previous 12 months up to a minimum of 10 days for an adult and one day for every 15 days subject to a minimum of

¹⁶ See also Notes on the Factories (Amendment) Act, 1954, pp. 16-18.

14 days for a child, these days being inclusive of any holiday which may occur during such period. A worker whose services are terminated after completing 4 months but less than 12 months' continuous service, is entitled to proportionate paid leave. A worker shall apply in writing to the Manager not less than 15 days before taking leave and the total leave may be taken in 3 instalments instead of in a continuous period as before. Worker in public utility services has to apply at least 30 days before. If a worker entitled to leave or having applied for but not granted such leave, is discharged before taking leave, he shall be paid wages for his due leave period before the expiry of the second working day of the termination of his services. A worker shall be deemed to have completed period of continuous service inspite of interruptions brought by (i) sickness, accident or authorised leave not exceeding in the aggregate one-sixth of the period, (ii) a strike which is not an illegal strike or lockout, (iii) one or more periods of involuntary unemployment not exceeding in the aggregate one-twelfth of the period and (iv) leave admissible or granted under any other law. "Authorised leave" includes casual absence due to any reasonable cause and also unauthorised absence not exceeding in the aggregate one thirty-six of the period of the continuous service provided that the worker gives the reason of his absence in writing to the manager within a week from its commencement. Leave shall not include weekly holidays or holidays for festivals or other occasions except as provided for annual leave.

Wages during leave period will be at a rate equal to the daily average of the worker's total full-time earning, exclusive of overtime earnings and bonus but inclusive of dearness allowance and cash equivalent of any advantage, for the days worked during the month immediately preceding the leave. The wages due to a worker for a period of leave for not less than 4 days in case of an adult and 5 days in case of a child, should be paid in advance¹⁷ before the leave begins. The Inspector may institute proceedings on behalf of the workers for recovery of advance wages in case of employer's default.

As the provisions relating to annual leave with wages have been causing considerable difficulty in determining 12 month's "continuous service" for eligibility to leave with wages, Factories (Amendment) Bill, 1953 was introduced to simplify the provisions for removing the difference between the employers and the employees. The Factories (Amendment) Act, 1954 (XXV of 1954) received the assent of the President on the 7th of May, 1954.¹⁸

Other Provisions re. Occupational Diseases, Accidents, etc.

New provisions have been introduced authorising Provincial Government to make rules providing for periodical medical examination of workers in certain dangerous trades and for restricting or controlling use of specified materials or processes with a view to control occupational diseases such as lead poisoning, anthrax, silicosis, etc. It is obligatory on the part of the factory managers to give information regarding specified accidents which cause death or serious bodily injury or regarding occupational diseases contracted by the employees. Medical practitioners attending on the factory workers suffering from occupational diseases are also required to report such cases to the Chief Inspector of Factories. The Provincial Government has been authorised to direct enquiry into the causes of accidents or into any case of occupational disease. Inspectors are authorised to take a sufficient sample of substances used in the manufacturing process if the use is either contrary to the provisions of the Act or likely to cause bodily injury or

¹⁷ The 1934 Act allows advance payment of half of the total pay due for the period of holidays. The new Bill also endorsed it but limited to holidays for not less than 6 days. The Select Committee made the above amendment.

¹⁸ See also Notes on the Factories (Amendment) Act, 1954, see pp. 16-18.

disease, for examination. Wrongful disclosure of results of analysis is punishable with imprisonment up to 3 months or with fine up to Rs. 500/- or both. The Act gives Central Government powers of directions over the Provincial Governments for carrying out the provisions of the Act.

Penalties and Procedure

The old Act only provides for a fine for contraventions of the provisions of the Act. The new Act provides for imprisonment up to 3 months or a fine up to Rs. 500/- or both for the first offence and up to 6 months or a fine up to Rs. 1000/- or both for the second and subsequent offence. Complaints should be made within 3 months of the commission of the offence to the knowledge of the Inspector or 6 months in the case of disobedience to Inspector's written order.

Obligations of Workers

Where lunch room exists, worker should not eat any food in the work room. New provisions have been added placing some obligations on the workers and contravention is punishable with imprisonment up to 3 months or with fine up to Rs. 100/- or both. Workers contravening any provision of the Act or any Rules or orders made thereunder imposing any duty or liability, shall be punishable with fine extending to Rs. 20/-. When a worker is so convicted, the occupier or manager shall not be deemed to be guilty of an offence in respect of that contravention unless it is proved that he failed to take all reasonable measures for its prevention.

Amendments to the Factories Act, 1948

Repealing and Amending Act, 1949 (XL of 1949)

Some minor changes in Sections 7(3), 55, 79(4) and 82 as well as the language of Section 1(2) viz., application of the Act, were made.

Adaptation of Laws Order, 1950

Section 1(2) of the Factories Act, 1948 was amended by the above Order and also some other minor changes and the Act was extended to the whole of India, except the States of Hyderabad, Jammu and Kashmir, Mysore and Travancore-Cochin.

Repealing and Amending Act, 1950 (XXXV of 1950)

Section 119, viz. Amendment of Section 3 of the Employment of Children Act, 1938 and the Table of Enactments were repealed.

Part B States (Laws) Act, 1951 (III of 1951)

Section 1(2) was amended by the above Act and the Factories Act, 1948 has now been extended to the whole of India except the State of Jammu and Kashmir with effect from the 1st of April, 1951.

Factories (Amendment) Act, 1954 (XXV of 1954)

The Government of India having ratified the I.L.O. Conventions No. 89 Night Work (Women) Convention (Revised), 1948 and No. 90 Night Work of Young Persons (Industry) Convention, 1948, introduced a Bill further to amend the Factories Act, 1948 for amending Sections 66, 70 and 71 of the Act to give effect to the provisions of the Conventions. The Government also took the opportunity to replace the Chapter VIII of the Act relating to annual leave with wages, as these provisions have been causing considerable difficulty particularly in determining the 12 months' "continuous service" for eligibility of leave with wages and as there is a cause of difference of opinion between the employers and workers in this respect. Some other amendments were incorporated for removing some

practical difficulties experienced in the working of the Act during the last four and half years.

A period of 240 days has been fixed as the minimum attendance necessary during a calendar year beginning with the 1st of January of each year. Leave with wages will be calculated at the rate of one day for every 20 days of work performed by an adult worker during the previous calendar year and one day for every 15 days of work by a child.¹⁹ The period of lay-off or of maternity leave or leave earned in the year prior to that in which it is enjoyed, shall be included in computing the period of 240 days or more but leave cannot be earned for these periods. The leave admissible is exclusive of all holidays which may occur during or at either end of the period of leave. Proportionate leave will be granted to any worker whose services commence after the beginning of the calendar year provided he has worked for two-thirds of the total number of days in the remainder of the calendar year. A worker, discharged or dismissed from service during the course of the year, is entitled to leave with wages at the rate of 1 day for 20 days of work (adult) and 1 day for 15 days of work (child) even if he has not worked for the entire period of 240 days or two-third of this qualifying period. The annual leave with wages may be availed of by the worker to cover periods of sickness also. The maximum period of leave which can be carried forward to the succeeding year has been doubled. Leave is now accumulative up to an extent 30 days for an adult and 40 days for a child and this was 15 days and 20 days respectively before this Amendment.

While moving the Factories (Amendment) Bill as passed by the Council of State, in House of the People on the 27th April 1954, the Labour Minister, Shri V. V. Giri²⁰ explained the proposed amendment to Chapter VIII relating to leave with wages as follows:—

“Another important amendment is the revision of Chapter VIII relating to leave with wages. This is with a view to simplify the provisions and thus to remove the frequent differences of opinion that now occur between employers and workers. Under the existing provisions, a worker has to put in 12 months' continuous service for eligibility to leave with wages. The determination of “continuous service” has, however, been causing considerable difficulty as interruptions on account of various causes such as sickness, involuntary unemployment, etc., have to be reckoned with. A large number of representations have been received from workers against the provision relating to ‘continuous service.’ Suggestions have also been received that the workers should be entitled to leave with wages without any condition of qualifying service and that the rate of earning leave with wages should be increased. I would like to point out here that the I.L.O. Convention on Leave with Wages prescribes continuous service for a year as a pre-requisite to earning leave. The object of leave with wages is to give to the worker an opportunity of rest and recuperation. At the same time, the terms of leave should be such as to encourage regular attendance. It is, therefore, proposed to fix 240 days work in a calendar year as the minimum attendance necessary to qualify for leave with wages. This will still leave 125 days in a year to account for absence for various reasons. Periods of lay-off, maternity leave up to 12 weeks in the case of female workers and the leave earned by a worker in the year prior to that in which the leave is enjoyed are proposed to be counted towards the qualifying period of 240 days mentioned above. This condition of qualifying service will not be applicable to workers who are discharged or dismissed by the employer in the course of the year. It is also

¹⁹ Factories Act, 1934 as amended by the Factories (Amendment) Act 1946 allowed 10 days annual holidays with pay for adult and 14 days for child with effect from 1st of January, 1946 and this can be carried over to the succeeding year.

²⁰ Parliamentary Debates, House of the People, Vol. IV, Part II, pages 5816-5817.

proposed to make it clear in the new provisions that the annual leave with wages admissible under the Act is exclusive of holidays occurring during or at either end of the period of leave. Provision has been made for the grant of proportionate leave to workers whose service commences after the beginning of the calendar year. The limit of the leave that can be carried forward has also been raised as it is felt that workers cannot afford to go on leave very often and that when they go, they prefer to be away for comparatively long periods. It is also proposed to provide that where a worker requires leave to cover a period of illness, no prior notice of leave, as required under the existing provisions, should be necessary. The sums payable by an employer on account of leave with wages have been made recoverable as if they were wages under the Payment of Wages Act."

Administration and Strengthening of Factory Inspectorate

The Labour Investigation Committee has strongly criticised the standard of enforcement of factory laws. "However, it is a regrettable fact that the enforcement of labour laws have not been up to the mark and although much has been done by way of putting the workers' right on the Statute Book, on the whole the worker has not been able to obtain a fair deal. His illiteracy, ignorance and unhealthiness has been availed of by some employers who have been able to break or disregard the law with impunity."²¹ The Committee remarked that the evasions of the provisions of law were largely due to the inadequacy of factory inspectorate. The question of adequate factory inspection was discussed in the Conferences of Chief Inspectors of Factories and Provincial and States Labour Ministers and special stress was placed on the immediate necessity of strengthening of the factory inspection services for proper and efficient enforcement of the Act. It was suggested that the standard strength of Factory Inspectorate should be one Inspector for every 150 to 200 factories.

The Planning Commission in their First Five Year Plan recommended that that the main emphasis should be on a proper implementation of the Factories Act by strengthening the Factory Inspectorate and by giving more attention to the social aspect of the legislation and also to areas and industries in which sub-standard conditions still prevail. The Commission also recommended appointment of full-time medical inspectors in the Factory Inspectorate for effective implementation of the provisions relating to medical supervision and occupational health.

The enforcement of the new Factories Act has brought under its purview a large number of small factories hitherto not covered by any legislation. With the increase in the number of factories governed by the Factories Act, 1948 the responsibility of the Factory Inspectorates in the various States has also increased. Inadequate inspecting staff is mainly responsible for a large number of factories remaining uninspected every year. Of late the position is gradually improving on account of increase of the inspecting staff who continues to lay special stress on the working hours, health, safety and welfare provisions of the Act and tries to enforce the same effectively by launching prosecution proceedings against defaulters in the various States.

Adequate training of Factory Inspectors have been arranged in some of the industrially advanced countries under the various foreign Technical Assistance Programmes. Training and refresher courses are being held by the organisation of Chief Adviser, Factories for the benefit of the inspecting staff.

Planning Commission and Central Labour Institute

The Planning Commission recommended setting up of a National Museum of Industrial Safety, Health and Welfare, with a view to implement properly the

²¹Labour Investigation Committee, Main Report, p. 9.

various provisions of the Factories Act and to provide a centre of information for inspectors, employers, workers and others concerned with the well-being of industrial labour and to stimulate interest in the application of the principles of industrial safety, health and welfare. The Museum, as a centre of demonstration with exhibits covering all aspects of working conditions and with its library and information section, should serve as a nucleus of an Institute for conducting specialised scheme of training and education in labour problems.

The Government of India accepted the above recommendation and decided to set up the Central Labour Institute. The proposed Institute will comprise a Museum of Industrial Safety, Health and Welfare, an Industrial Hygiene Laboratory, a Training Centre and a Library-cum-Information Centre. The Productivity Centre and the Training-within-Industry Centre which are being set up with the assistance of the I. L. O. will be attached to the proposed Institute. Mr. N. S. Mankiker, Chief Adviser, Factories, Ministry of Labour will be in charge of this Institute. The Prime Minister of India laid the foundation stone of the Institute in Bombay on the 7th October, 1954.

I. L. O. Industrial Safety Code²²

A Technical Tripartite Conference under the auspices of the I.L.O. was held in Geneva on the 27th September 1948 to examine the Draft Model Code of Safety Regulations for factories with a view to the adoption of a text suitable for international application. The drafting of the Model Code was completed and after final approval, was sent to the different Governments for their guidance in the drafting of laws and regulations on industrial safety.

I.L.O. Convention and Recommendation on Labour Inspection

The International Labour Organisation on the 11th July, 1947 adopted one Convention (No. 81) and one Recommendation (No. 81) concerning Labour Inspection in Industry and Commerce, after accepting India Government's suggestion that the function of the Labour Inspection Organisation should not be confined to the enforcement of the existing legal provisions relating to the conditions of work and the protection of the workers but they should also extend to drawing the attention of the competent authorities towards defects or abuses not specifically covered by the existing labour legislation. The Convention has recently been ratified by India.

Asian Regional Conferences on Labour Inspection

In pursuance of the Resolution adopted at the Preparatory Asian Regional Conference of the International Labour Organisation held in New Delhi in 1947, a Preparatory Conference on Labour Inspection in Asian countries was held at Kandy in Ceylon in November, 1948. The Conference discussed the three aspects of labour inspection with special reference to (a) recruitment and training of labour inspectors, employment of women in labour inspection services, (b) role of inspectorate in the enforcement of measures intended to ameliorate working and living conditions and (c) standardisation of the collection and publication of information obtained by labour inspectors in various countries. The Conference decided to bring to the attention of the authorities concerned the need for ensuring that the strength of the Inspectorates and the facilities at their disposal should keep pace with tasks they have to perform in view of the expansion and development of labour and social legislation in the Asian countries.

²² Model Code of Safety Regulations for Industrial Establishments for the Guidance of Governments and Industry, 1949 and Safety in Factories, 1949.

The Asian Regional Conference held at Nuwara Eliya, Ceylon, in January, 1950, adopted a Resolution on the 24th January 1950 concerning Labour Inspection requesting the Asian Members of the International Labour Organisation to ratify the Labour Inspection Convention, 1947 and to accord to the Labour Inspectors a status among the social services of the State commensurate with their responsibilities with a view to enable them to discharge their functions adequately and to carry out propaganda and public education of the employers and workers and to institute national health and safety exhibits and museums and to take appropriate steps to secure the training of inspectors and keeping them fully informed of latest developments in sphere of industrial problems of health, safety and welfare by means of technical training centres, refresher courses for inspectors and periodical conferences of inspectors.

Rules under the Factories Act, 1948

The Draft Model Rules framed by the Chief Adviser, Factories, for the guidance of Provinces and States (at present Part A States and Part B States) were discussed at the Seventh Conference of the Chief Inspectors of Factories held in New Delhi on the 15th September 1948. In the light of the discussions, the draft Rules were revised and forwarded to the Chief Inspectors of Factories for comments. The comments received were further discussed at a Conference of the Chief Inspectors of Factories and forwarded to the Provincial and States Governments for adoption. Both the Conferences were unanimous about the necessity of securing uniformity in the matter of factory regulations throughout the country and with this object in view the Model Rules were framed. The Provincial Governments have been requested to forward their suggestions for any change to the Draft Rules, if considered absolutely essential, to the Government of India with their own views along with the comments and objections received from the public. The Schedules included in the Draft Rules are not exhaustive but only illustrative and will be supplemented to suit local needs. The Chief Adviser, Factories, has issued a Guide to the Safety Provisions of the new Act. There are provisions prescribing certain measures requiring considerable time to implement and the Provincial Governments have been granted powers to prescribe a date from which such provisions will take effect. The general view expressed in the Conferences of the Chief Inspector of Factories regarding license fees was that the same should be fixed on the basis of horse power installed and the number of persons employed and that there should be an uniform scale of fees for all Provinces and States. The duties of Inspectors were also discussed and it was thought desirable to deal with the same by executive instructions of confidential or semi-confidential nature.

All Part A States and Part B States and majority of Part C States have framed Rules under Section 112 and other enabling powers under the provisions of the Factories Act, 1948. These Rules are not all uniform but are made according to local conditions.

Factory Employment

The Chief Inspector of Factories responsible for the administration of the Act, submits Annual Report to the State Government showing the enumeration of factories, inspections, employment, etc. on the basis of the returns received from the employers. Statistics of employment position in factories are also being published in the Indian Labour Gazette²³ from time to time. The following statement shows the number of factories covered by the Factories Act, 1934 and

²³ Indian Labour Gazette., Vol. V, 1947-48, p. 222 for 1939 to 1945, Vol. VI, 1948-49, p. 545 for 1946 and 1947, Vol. VIII, 1950-51, p. 907 for 1948 and 1949, Vol. X, 1952-53, p. 911 for 1950, Vol. XI, 1953-54, p. 837 for 1951 and Vol. XII, 1954-55, p. 1 for 1952.

FACTORIES ACT, 1948 (LXIII OF 1948)

Statement of Object and Reasons²⁵

The existing law relating to the regulation of labour employed in factories in India is embodied in the Factories Act, 1934. Experience of the working of the Act has revealed a number of defects and weaknesses which hamper effective administration. Although the

²⁵ Gazette of India, 1947, Part V, pp. 580-585.

Act has been amended in certain respects in a piece-meal fashion whenever some particular aspect of labour safety or welfare assumed urgent importance, the general framework has remained unchanged. The provisions for the safety, health and welfare of workers are generally found to be inadequate and unsatisfactory, and even such protection as is provided does not extend to the large mass of workers employed in work-places not covered by the Act. In view of the large and growing industrial activities in the country, a radical overhauling of the Factories law is essentially called for and cannot be delayed.

The proposed legislation differs materially from the existing law in several respects. Some of the important features are herein mentioned. Under the definition of "Factory" in the Act of 1934, several undertakings are excluded from its scope but it is essential that important basic provisions relating to health, working hours, holidays, lighting and ventilation, should be extended to all work-places in view of the unsatisfactory state of affairs now prevailing in unregulated factories. Further the present distinction between seasonal and perennial factories which has little justification has been done away with. The minimum age of employment for children has been raised from 12 to 13 and their working hours reduced from 5 to 4½, with powers to Provincial Governments to prescribe even a higher minimum age for employment in hazardous undertakings.

The present Act is very general in character and leaves too much to the rule-making powers of the Provincial Governments. While some of them do have rules of varying stringency, the position on the whole is not quite satisfactory. This defect is sought to be remedied by laying down clearly in the Bill itself the minimum requirements regarding health (cleanliness, ventilation and temperature, dangerous dusts and fumes, lighting and control of glare, etc.), safety (eye-protection, control of explosive and inflammable dusts, etc.), and general welfare of workers (washing facilities, first aid, canteens, shelter rooms, creches, etc.) amplified, where necessary, by rules and regulations to be prescribed by Provincial Governments.

Further the present Act leaves important and complex points to the discretion of Inspectors placing heavy responsibility on them. In view of the specialised and hazardous nature of the processes employed in the factories, it is too much to expect Inspectors to possess an expert knowledge of all these matters. The detailed provisions contained in the Bill will go a long way in lightening their burden.

Some difficulties experienced in the administration of the Act, especially relating to hours of employment, holidays with pay, etc., have been met by making the provisions more definite and clearer. The penalty clauses have also been simplified. An important provision has also been made in the Bill empowering Provincial Governments to require that every factory should be registered and should take a licence for working to be renewed at periodical intervals. Provincial Governments are further being empowered to require that before a new factory is constructed or any extensions are made to an existing one, the plans, designs and specifications of the proposed construction should receive their prior approval.

It is expected that the Bill when enacted into law will considerably advance the condition of workers in factories.

The substantial changes made in the existing law are also indicated in the Notes on Clauses. Opportunity has also been taken to rearrange the existing law and to revise expressions, where necessary.

Notes on Clauses²⁶

CHAPTER I—PRELIMINARY.

Clause 2—Cf section 2. The age limit in the case of 'adults and adolescents' has been raised from 17 to 18 years. The interpretation of the item 'machinery' has been widened by bringing in 'prime movers' and 'transmission machinery' and the interpretation of the term 'factory' has been modified so as to cover those establishments which employ ten or more persons every day.

Clause 3—Cf section 3.

Clause 4—Cf section 7. The only change is in respect of reference to the number of persons employed.

Clause 5—Cf section 6.

Clause 6—Cf section 8.

²⁶ In these Notes section denotes a section of the Factories Act, 1934. The Report of the Select Committee on the Factories Bill, 1948 published in the Gazette of India, 1947, Part V, pp.551-590 made several changes and re-arranged some clauses of the Bill.

Clause 7—This is a new clause. As designs of most of the factory buildings and layout of machinery have been found unsatisfactory and the building materials used not suited to climatic conditions of the place which made working conditions unusually trying, this clause regarding approval, licensing and registration of factories is considered very necessary.

Clause 8—Cf section 9.

CHAPTER II—THE INSPECTING STAFF.

Clause 9—Cf section 10.

Clause 10—Cf section 11.

Clause 11—The existing section 12 has been amplified by laying down the duties of the Certifying Surgeons more clearly.

CHAPTER III—HEALTH; CHAPTER IV—SAFETY AND CHAPTER V—WELFARE.

The existing Chapter III relating to 'Health and Safety' has been split up into three separate chapters each dealing with Health, Safety and Welfare of workers. The clauses in these chapters have been redrafted and amplified prescribing the minimum standards required.

CHAPTER VI—WORKING HOURS OF ADULTS.

Clause 51—Cf section 34. The noticeable change is that the distinction between 'seasonal' and 'non-seasonal' factories has been removed. Also the words 'allowed to work' wherever they occur in the existing Act have been substituted by the word 'employed' so as to obviate the plea that when the occupier was absent at the time he could not have 'allowed the worker to work'.

Clause 52—Cf section 35.

Clause 53—Cf section 35A. A time limit has been fixed within which a compensatory holiday must be given.

Clause 54—Cf section 36. The proviso has been omitted as it is proposed to do away with the distinction between 'seasonal' and 'non-seasonal' factories.

Clause 55—Cf section 37. As hours of daily work have been reduced to nine, the period of work before rests has been reduced to five and the Provincial Governments have been empowered to prescribe higher limit of rest up to one hour in case where they consider a longer rest interval is necessary. The existing section 37 has been redrafted to provide for this.

Clause 56—Cf section 38.

Clause 57—Cf section 46. This has been redrafted in order to make it clear that a continuous rest period of twenty-four hours will be counted as a day's holiday.

Clause 58—Cf section 49.

Clause 59—Cf section 47. In this clause also the distinction between 'seasonal' and 'non-seasonal' factories has been removed.

Clause 60—Cf section 48.

Clause 61—Existing sections 39 and 40 have been combined and redrafted with verbal changes.

Clause 62—Existing section 41 has been redrafted with verbal changes. It has been made obligatory on the part of the Managers to show the registers to the Inspector at all times during working hours.

Clause 63—Cf section 42.

Clause 64—Cf section 43. In para (h) of sub-clause (2) the workers attending to power-plant or transmission machinery have also been included for purposes of exemption.

Clause 65—Cf section 44.

Clause 66—Cf section 45. The second proviso in sub-section (i) of the existing section 45 has been omitted to conform to the deletion of the distinction between 'seasonal' and 'non-seasonal' factories.

Clause 67—This is a new clause enabling the Provincial Governments to make rules to supplement Chapter VI.

CHAPTER VII—EMPLOYMENT OF YOUNG PERSONS.

Clause 68—Cf section 50. The minimum age has been raised to thirteen.

Clause 69—Cf section 51.

Clause 70—The existing section 52 has been redrafted and the provisions regarding the examination and re-examination of young persons and grant of certificates of fitness to them tightened. To avoid unnecessary work on the Certifying Surgeon it has also been provided that he will examine only those young persons who produce a certificate from the Manager that he will be employed in his factory if found fit.

Clause 71—Cf section 53.

Clause 72—As the hours of work of adults have been reduced to nine, the half-time period of a child has also been reduced to $4\frac{1}{2}$ hours. The existing section 54 has been redrafted to provide for this change. A new sub-clause has also been added to prevent overlapping shifts in the case of children.

Clause 73—Cf section 55, sub-section (4) of the existing section has been omitted as it is covered by sub-clause (8) of clause 61.

Clause 74—Cf section 56. As in the case of clause 62, it has been made obligatory on the part of the Managers to make available the registers to the Inspector at all times during working hours.

Clause 75—Cf section 57.

Clause 76—Cf section 58.

Clause 77—Cf section 59.

Clause 78—Cf section 59C.

CHAPTER VIII—HOLIDAYS WITH PAY.

Clause 79—The reference to 'Seasonal Factory' in the existing section 49A has been omitted and that section has been redrafted to exclude persons working in a manufacturing process which is ordinarily carried on for less than 180 days in a year.

Clause 80—The existing section 49B has been completely recast and expanded to remove the practical difficulties, which were experienced in its working. It provides for the grant of holidays in two spells to cover the needs of workers. It also provides for the grant of proportionate holidays to workers whose services have been terminated but who have completed six months continuous service. Provision has also been made for condoning unauthorised absence up to 20 days.

Clause 81—Cf section 49C.

Clause 82—Cf section 49D. Advance payment of half the pay has been limited to holidays for not less than six days.

Clause 83—Cf section 49E.

Clause 84—Cf section 49F.

Clause 85—Cf section 49G. The question whether the factory leave rules are substantially similar to those provided for in the Bill is left to be decided by the Provincial Governments in future.

CHAPTER IX—SPECIAL PROVISIONS.

Clause 86—This is partly a replacement of the existing sections 59A and 59B. The basic provisions regarding health, safety and welfare have been made applicable to all work places irrespective of the number of workers employed and excludes premises where processes are carried on by the occupier with the aid of his family only.

Clause 87—The heading of the existing section 33(4) has been changed from "Hazardous operations" to 'Dangerous operations' and a new sub-clause enabling the Provincial Governments to make rules prohibiting, restricting or controlling the use of any specified materials or processes in connection with the dangerous operations has been added.

Clause 88—Cf section 30. For the words 'forty-eight hours' in the existing section the words 'seventy-two hours' have been substituted.

Clause 89—This is a new clause which has been inserted with a view to control industrial diseases.

Clause 90—This is a new clause. It empowers the Provincial Governments to require a formal investigation in the case of serious accidents.

Clause 91—This is new clause intended to facilitate investigation of cases involving contravention of the safety provisions.

CHAPTER X—PENALTIES AND PROCEDURE.

Clause 92—The existing section 60 has been redrafted with a view to make the breach of any section or of any rule or order made under the Act an offence which can be punished with imprisonment or fine or with both.

Clause 93—This is a new clause defining the liability of the owner of the premises in certain circumstances.

Clause 94—Cf section 61. The limit of fine has been raised and provision has been made for awarding imprisonment for a period of one year.

Clause 95—This is a new clause intended to cover offences involving several persons.

Clause 96—Cf section 63.

Clause 97—This is a new clause prescribing penalty for disclosing the results of analysis made under clause 91.

Clause 98—This is a new clause prescribing penalty for offences committed by workers.
 Clause 99—Cf section 67. Punishment includes imprisonment also.
 Clause 100—Cf section 68. The words 'on guardian' have been omitted from the heading.

Clause 101—Cf section 70. The heading has been slightly changed and a new sub-clause (3) added to cover the case of building owned by companies, etc.

Clause 102—The existing section 71 has been recast and the provisions made more definite.

Clause 103—This is a new clause which empowers the Courts to pass orders on the occupiers or managers of factories to take such measures for remedying the matters in respect of which offence was committed.

Clause 104—Cf section 72.

Clause 105—Cf section 73.

Clause 106—Cf section 74.

Clause 107—Cf section 75. In view of the great distances in India and the possible infrequency in the visits of Inspectors, six months period has been made to date from the time the offence came to the knowledge of the Inspector instead of the date of offence.

CHAPTER XI—SUPPLEMENTAL.

Clause 108—Cf section 31.

Clause 109—The existing section 76 has been recast and a new sub-clause (3) added, which would enable the display of any notice or poster relating to health, safety and welfare of workers in a factory.

Clause 110—This is a new clause enabling the Provincial Governments to prescribe the manner of service of orders on occupiers or manager of factories.

Clause 111—Cf section 77.

Clause 112—This is a new clause defining the obligations of workers.

Clause 113—This is a new clause giving general powers to the Provincial Governments to frame rules.

Clause 114—Cf section 79.

Clause 115—Cf section 80.

Clause 116—Cf section 81.

Clause 117—This is a new clause which seeks to amend sub-section (3) of section 3 of the Employment of Children Act 1938, by which the age of employment of children is raised from 12 to 13.

Clause 118—This is a new clause.

The Schedule—This has been added with reference to clauses 89 and 90.

FACTORIES (AMENDMENT) ACT, 1954 (XXV OF 1954)²⁷

Statement of Objects and Reasons¹

The Government of India have ratified the I.L.O. Conventions Nos. 89 and 90 prohibiting employment of women and young persons during night in factories. It is, therefore, necessary to amend sections 66, 70 and 71 of the Factories Act, 1948, to give effect to the provisions of the Conventions.

2. The provisions in the Act relating to annual leave with wages have been causing considerable difficulty particularly in determining the 12 months' "Continuous Service" for eligibility to leave with wages. It has, therefore, become necessary to simplify the provisions so as to remove any cause for difference of opinion between employers and workers.

3. This opportunity is also taken to incorporate in the Act certain other amendments which would remove some practical difficulties experienced in the working of the Act during the last four and a half years. The reasons for amendments are, wherever necessary, given in the Notes on Clauses attached to this Bill.

Notes on Clauses

Clause 2—The existing sub-clause k (iv) as it is worded, excludes some of the presses including Government presses from the scope of the Act as they cannot be considered as being carried on by way of trade or for purposes of gain. As it is not the intention to exclude them from the Act, it is necessary to amend the sub-clause to make the intention clear.

²⁷ Gazette of India, 1953, Part II, Section 2, pp. 869-872.

It is also necessary to amend the definition of 'manufacturing process' to cover separate premises engaged in 'composing types for printing'.

Clause 3—The existing section 4 empowers the State Governments to declare different departments of a factory as separate factories. But there is no provision to enable two or more factories of the same occupier being declared as a single factory if an application for that purpose is made by the occupier. This clause provides for that.

Clause 6—The amendment is intended to make it clear that women and young persons will be prohibited from cleaning, lubricating or adjusting any prime mover or transmission machinery while it is in motion only if such work would expose them to risk of injury.

Clause 7—This clause makes it clear that all new machines should comply with the requirements of encasement specified in sub-section (i) of section 26 and it authorises State Governments to make rules specifying any further safeguards to be provided in respect of any class or description of machines.

Clause 8—Section 29 is being revised with a view to prescribing clearly the safety requirements not only in respect of cranes and other lifting machinery but also in respect of chains, ropes and lifting tackles.

Clause 11—This clause will permit six hours' work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six. This is intended mainly to enable workers to avail themselves of half holidays in full on Saturdays wherever such holidays are allowed. It will also permit newspaper printing presses to work their entire night shift of six hours at a stretch.

Clause 12—The existing sub-section (2) empowers State Governments to frame rules exempting any factory or class of factories from the provisions relating to overlapping shifts. It has been found not possible to prescribe by rules the type of factories or the conditions under which the exemption can be granted to these factories as the grant of exemption has to be considered on the circumstances of each case. A redraft of the sub-section has, therefore, become necessary.

Clause 13—The calculation of 'cash equivalent of the advantage accruing through the concessional sale to workers of foodgrains and other articles' for the purpose of computing the ordinary rate of wages of individual workers for payment of wages for overtime is creating difficulties. Calculation to be made in each individual case depends on the size of the family, the actual rations bought as distinct from the maximum quantities the worker is entitled to buy and the actual difference. This involves considerable volume of clerical and computational work and the only practical way of avoiding this is to lay down in the section itself that the cash equivalent will be computed on the basis of the maximum ration admissible to a standard family of specific number of consumption units. This clause is intended for this purpose.

Clause 15—This amendment will liberalise the working of overtime. The amended section will also enable continuous employment of workers in case some of the subsequent shift workers do not turn up in time.

Clauses 17 and 18 and 19—The amendments of section 66, 70 and 71 are for the purpose of bringing the provisions in conformity with the I. L. O. Conventions Nos. 89 and 90 prohibiting employment of women and children during night in factories.

Clause 20—Chapter VIII relating to leave with wages is revised in order to simplify the existing provision. According to the existing law, a worker has to put in 12 months' 'continuous service' for eligibility to leave with wages. The determination of 'continuous service' has, however, been causing considerable difficulty as interruptions on account of various causes such as sickness, involuntary unemployment, etc., have to be reckoned with. A period of two hundred and forty days has now been fixed as the minimum attendance necessary during a calendar year to qualify for leave with wages. This condition of qualifying service will not be applicable to workers who are discharged or dismissed by the employer in the course of the year. Proportionate leave will be granted to workers whose service commences after the beginning of the calendar year. The annual leave with wages admissible under the Act will be exclusive of holidays occurring during or at either end of the period of leave. The limit of the leave that can be carried forward has been raised. No prior notice will be necessary when a worker requires leave to cover a period of illness. The sums payable by an employer on account of leave with wages will be recoverable as if they were wages under the Payment of Wages Act.

Clause 21—Section 93 has been recast to specify more clearly and definitely the responsibility for compliance with the various provisions of the Act between the owners of the premises and the occupier of the factory.

FACTORIES ACT, 1948 (LXIII OF 1948)

Arrangement of Sections

CHAPTER I—PRELIMINARY

1. Short title, extent and commencement.
2. Interpretation.
3. References to time of day.
4. Power to declare different departments to be separate factories or two or more factories to be a single factory.
5. Power to exempt during public emergency.
6. Approval, licensing and registration of factories.
7. Notice by occupier.

CHAPTER II—THE INSPECTING STAFF

8. Inspectors.
9. Powers of Inspectors.
10. Certifying Surgeons.

CHAPTER III—HEALTH

11. Cleanliness.
12. Disposal of wastes and effluents.
13. Ventilation and temperature.
14. Dust and fume.
15. Artificial humidification.
16. Overcrowding.
17. Lighting.
18. Drinking water.
19. Latrines and urinals.
20. Spittoons.

CHAPTER IV—SAFETY

21. Fencing of machinery.
22. Work on or near machinery in motion.
23. Employment of young persons on dangerous machines.
24. Striking gear and devices for cutting off power.
25. Self-acting machines.
26. Casing of new machinery.
27. Prohibition of employment of women and children near cotton-openers.
28. Hoists and lifts.
29. Lifting machines, chains, ropes and lifting tackles.
30. Revolving machinery.
31. Pressure plant.
32. Floors, stairs and means of access.
33. Pits, sumps, openings in floors, etc.
34. Excessive weights.
35. Protection of eyes.
36. Precautions against dangerous fumes.
37. Explosive or inflammable dust, gas, etc.
38. Precautions in case of fire.
39. Power to require specifications of defective parts or tests of stability.
40. Safety of buildings and machinery.
41. Power to make rules to supplement this Chapter.

CHAPTER V—WELFARE

42. Washing facilities.
43. Facilities for storing and drying clothing.
44. Facilities for sitting.
45. First aid appliances.
46. Canteens.
47. Shelters, rest rooms and lunch rooms.
48. Creches.
49. Welfare Officers.
50. Power to make rules to supplement this Chapter.

CHAPTER VI—WORKING HOURS OF ADULTS

51. Weekly hours.
52. Weekly holidays.
53. Compensatory holidays.
54. Daily hours.
55. Intervals for rest.
56. Spreadover.
57. Night shifts.
58. Prohibition of overlapping shifts.
59. Extra wages for overtime.
60. Restriction on double employment.
61. Notice of periods of work for adults.
62. Register of adult workers.
63. Hours of work to correspond with notice under section 61 and register under section 62.
64. Power to make exempting rules.
65. Power to make exempting orders.
66. Further restriction on employment of women.

CHAPTER VII—EMPLOYMENT OF YOUNG PERSONS

67. Prohibition of employment of young children.
68. Non-adult workers to carry tokens.
69. Certificates of fitness.
70. Effect of Certificate of fitness granted to adolescent.
71. Working hours for children.
72. Notice of periods of work for children.
73. Register of child workers.
74. Hours of work to correspond with notice under section 72 and register under section 73.
75. Power to require medical examination.
76. Power to make rules.
77. Certain other provisions of law not barred.

CHAPTER VIII—ANNUAL LEAVE WITH WAGES

78. Application of Chapter.
79. Annual leave with wages.
80. Wages during leave period.
81. Payment in advance in certain cases.
82. Mode of recovery of unpaid wages.
83. Power to make rules.
84. Power to exempt factories.

CHAPTER IX—SPECIAL PROVISIONS

85. Power to apply the Act to certain premises.
86. Power to exempt public institutions.
87. Dangerous operations.
88. Notice of certain accidents.
89. Notice of certain diseases.
90. Power to direct enquiry into cases of accident or disease.
91. Power to take samples.

CHAPTER X—PENALTIES AND PROCEDURE

92. General penalty for offences.
93. Liability of owner of premises in certain circumstances.
94. Enhanced penalty after previous conviction.
95. Penalty for obstructing Inspector.
96. Penalty for wrongfully disclosing results of analysis under section 91.
97. Offences by workers.
98. Penalty for using false certificate of fitness.
99. Penalty for permitting double employment of child.
100. Determination of occupier in certain cases.
101. Exemption of occupier or manager from liability in certain cases.
102. Power of Court to make orders.
103. Presumption as to employment.

- 104. Onus as to age.
- 105. Cognizance of offences.
- 106. Limitation of prosecutions.

CHAPTER XI—SUPPLEMENTAL

- 107. Appeals.
- 108. Display of notices.
- 109. Service of notices.
- 110. Returns.
- 111. Obligations of workers.
- 112. General power to make rules.
- 113. Powers of Centre to give directions.
- 114. No charge for facilities and conveniences.
- 115. Publication of rules.
- 116. Application of Act to Government factories.
- 117. Protection to persons acting under this Act.
- 118. Restriction on disclosure of information.
- 119. [*Repealed.*]
- 120. Repeal and savings.

THE SCHEDULE

FACTORIES ACT, 1948 (LXIII OF 1948)¹

An Act to consolidate and amend the law regulating labour in factories.

[23rd September, 1948.]

Whereas it is expedient to consolidate and amend the law regulating labour in factories;

It is hereby enacted as follows:—

CHAPTER I—PRELIMINARY

1. Short title, extent and commencement.—(1) This Act may be called the Factories Act, 1948.

² [(2) It extends to the whole of India ³ [except the State of Jammu and Kashmir].

(3) It shall come into force on the 1st day of April, 1949.

2. Interpretation.—In this Act, unless there is anything repugnant in the subject or context,—

(a) “adult” means a person who has completed his eighteenth year of age;

(b) “adolescent” means a person who has completed his fifteenth year of age but has not completed his eighteenth year;

⁴ [(bb) “calendar year” means the period of twelve months beginning with the first day of January in any year;]

(c) “child” means a person who has not completed his fifteenth year of age;

(d) “young person” means a person who is either a child or adolescent;

(e) “day” means a period of twenty-four hours beginning at midnight;

(f) “week” means a period of seven days beginning at midnight on Saturday night or such other night as may be approved in writing for a particular area by the Chief Inspector of Factories;

¹ For Statement of Objects and Reasons, see Gazette of India, 1947, Pt. V. pp. 580-581; for Report of Select Committee, see *ibid*, 1948, Pt. V, pp. 551-590, see also pp. 23-28.

² Subs. by the A. O. 1950, for the former section.

³ Subs. by Act 3 of 1951 (w.e.f. 1-4-51) for “except the States of Hyderabad, Jammu and Kashmir, Mysore and Travancore-Cochin”.

⁴ Ins. by Act 25 of 1954, s. 2.

- (g) "power" means electrical energy, or any other form of energy which is mechanically transmitted and is not generated by human or animal agency;
- (h) "prime mover" means any engine, motor or other appliance which generates or otherwise provides power;
- (i) "transmission machinery" means any shaft, wheel, drum, pulley, system of pulleys, coupling, clutch, driving belt or other appliance or device by which the motion of a prime mover is transmitted to or received by any machinery or appliance;
- (j) "machinery" includes prime movers, transmission machinery and all other appliances whereby power is generated, transformed, transmitted or applied;
- (k) "manufacturing process" means any process for—
- (i) making, altering, repairing, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing, or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal, or
 - (ii) pumping oil, water or sewage, or
 - (iii) generating, transforming or transmitting power; or
 - ⁵(iv) composing types for printing, printing by letter press, lithography, photogravure or other similar process or book binding;]
 - (v) constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels;
- (l) "worker" means a person employed, directly or through any agency, whether for wages or not, in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or in any other kind of work incidental to, or connected with, the manufacturing process, or the subject of the manufacturing process;
- (m) "factory" means any premises including the precincts thereof—
- (i) whereon ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or
 - (ii) Whereon twenty or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on,—
- but does not include a mine subject to the operation of ⁶[the Mines Act, 1952 (XXXV of 1952)], or a railway running shed;
- (n) "occupier" of a factory means the person who has ultimate control over the affairs of the factory, and where the said affairs are entrusted to a managing agent, such agent shall be deemed to be the occupier of the factory;
- (o) "managing agent" has the meaning assigned to it in the Indian Companies Act, 1913 (VII of 1913);
- (p) "prescribed" means prescribed by rules made by the ⁷[State] Government under this Act;

* * * * *

⁵ Subs. by Act 25 of 1954, s. 2 for former sub-clause.

⁶ Subs. *ibid* for "the Indian Mines Act, 1923 (IV of 1923)".

⁷ Subs. by the A. O. 1950, for "Provincial."

⁸ Clause (q) was repealed, *ibid*.

(r) where work of the same kind is carried out by two or more sets of workers working during different periods of the day, each of such sets is called a "relay" and each of such periods is called a "shift."

3. References to time of day.—In this Act references to time of day are references to Indian Standard Time, being five and a half hour, each ahead of Greenwich Mean Time:

Provided that for any area in which Indian Standard time is not ordinarily observed the ⁹[State] Government may make rules—

- (a) specifying the area,
- (b) defining the local mean time ordinarily observed therein, and
- (c) permitting such time to be observed in all or any of the factories situated in the area.

¹⁰**4. Power to declare different departments to be separate factories or two or more factories to be a single factory.**—The State Government may, on an application made in this behalf by an occupier, direct, by an order in writing, that for all or any of the purposes of this Act different departments or branches of a factory of the occupier specified in the application shall be treated as separate factories or that two or more factories of the occupier specified in the application shall be treated as a single factory.]

5. Power to exempt during public emergency.—In any case of public emergency the ⁹[State] Government may, by notification in the official Gazette, exempt any factory or class or description of factories from all or any of the provision of this Act ¹¹[except section 67] for such period and subject to such conditions as it may think fit:

Provided that no such notification shall be made for a period exceeding three months at a time.

6. Approval, licencing and registration of factories. (1) The ⁹[State] Government may make rules—

- (a) requiring the previous permission in writing of the ⁹[State] Government or the Chief Inspector to be obtained for the site on which the factory is to be situated and for the construction or extension of any factory or class or description of factories;
- (b) requiring for the purpose of considering applications for such permission the submission of plans and specifications;
- (c) prescribing the nature of such plans and specifications and by whom they shall be certified;
- (d) requiring the registration and licensing of factories or any class or description of factories, and prescribing the fees payable for such registration and licensing and for the renewal of licences;
- (e) requiring that no licence shall be granted or renewed unless the notice specified in section 7 has been given.

(2) If on an application for permission referred to in clause (a) of sub-section (1) accompanied by the plans and specifications required by the rules made under clause (b) of that sub-section, sent to the ⁹[State] Government or Chief Inspector by registered post, no order is communicated to the applicant within three months from the date on which it is so sent, the permission applied for in the said application shall be deemed to have been granted.

(3) Where a ⁹[State] Government or a Chief Inspector refuses to grant permission to the site, construction or extension of a factory or to the registration

⁹ Subs. by the A. O. 1950, for "Provincial."

¹⁰ Subs. by Act 25 of 1954, s. 3.

¹¹ Ins. by the A. O. 1950.

and licensing of a factory, the applicant may within thirty days of the date of such refusal appeal to the Central Government if the decision appealed from was of the ¹²[State] Government and to the ¹²[State] Government in any other case.

Explanation.—A factory shall not be deemed to be extended within the meaning of this section by reason only of the replacement of any plant or machinery, or within such limits as may be prescribed, of the addition of any plant or machinery.

7. Notice by occupier.—(1) The occupier shall, at least fifteen days before he begins to occupy or use any premises as a factory, send to the Chief Inspector a written notice containing—

- (a) the name and situation of the factory;
- (b) the name and address of the occupier;
- ¹³[(bb) the name and address of the owner of the premises or building (including the precincts thereof) referred to in section 93;]
- (c) the address to which communications relating to the factory may be sent;
- (d) the nature of the manufacturing process—
 - (i) carried on in the factory during the last twelve months in the case of factories in existence on the date of the commencement of this Act, and
 - (ii) to be carried on in the factory during the next twelve months in the case of all factories;
- (e) the nature and quantity of power to be used;
- (f) the name of the manager of the factory for the purposes of this Act;
- (g) the number of workers likely to be employed in the factory;
- (h) the average number of workers per day employed during the last twelve months in the case of a factory in existence on the date of the commencement of this Act;
- (i) such other particulars as may be prescribed.

(2) In respect of all establishments which come within the scope of the Act for the first time, the occupier shall send a written notice to the Chief Inspector containing the particulars specified in sub-section (1) within thirty days, from the date of the commencement of this Act.

(3) Before a factory engaged in a manufacturing process which is ordinarily carried on for less than one hundred and eighty working days in the year resumes working, the occupier shall send a written notice to the Chief Inspector containing the particulars specified in sub-section (1) ¹⁴[at least thirty days] before the date of the commencement of work.

(4) Whenever a new manager is appointed, the occupier shall send to the ¹⁵[Inspector a written notice and to the Chief Inspector a copy thereof] within seven days from the date on which such person takes over charge.

(5) During any period for which no person has been designated as manager of a factory or during which the person designated does not manage the factory, any person found acting as manager, or if no such person is found, the occupier himself, shall be deemed to be the manager of the factory for the purposes of this Act.

CHAPTER II.—THE INSPECTING STAFF

8. Inspectors.—(1) The ¹²[State] Government may, by notification in the official Gazette, appoint such persons as possess the prescribed qualification to be

¹² Subs. by the A. O. 1950, for " Provincial."

¹³ Ins. by Act 25 of 1954, s. 4.

¹⁴ Subs. by Act 40 of 1949, s. 3 and Sch. II for " within thirty days."

¹⁵ Subs. by Act 25 of 1954, s. 4 for " Chief Inspector a written notice."

Inspectors for the purposes of this Act and may assign to them such local limits as it may think fit.

(2) The ¹⁶[State] Government may, by notification in the official Gazette, appoint any person to be a Chief Inspector who shall, in addition to the powers conferred on a Chief Inspector under this Act, exercise the powers of an Inspector throughout the ¹⁶[State].

(3) No person shall be appointed under sub-section (1), sub-section (2) or sub-section (5) or, having been so appointed, shall continue to hold office, who is or becomes directly or indirectly interested in a factory or in any process or business carried on therein or in any patent or machinery connected therewith.

(4) Every District Magistrate shall be an Inspector for his district.

(5) The ¹⁶[State] Government may also, by notification as aforesaid, appoint such public officers as it thinks fit to be additional Inspectors for all or any of the purposes of this Act, within such local limits as it may assign to them respectively.

(6) In any area where there are more Inspectors than one the ¹⁶[State] Government may, by notification as aforesaid, declare the powers which such Inspectors shall respectively exercise and the Inspector to whom the prescribed notices are to be sent.

(7) Every Chief Inspector and Inspector shall be deemed to be a public servant within the meaning of the Indian Penal Code (XLV of 1860), and shall be officially subordinate to such authority as the ¹⁶[State] Government may specify in this behalf.

9. Powers of Inspectors.—Subject to any rules made in this behalf, an Inspector may, within the local limits for which he is appointed,—

(a) enter, with such assistants, being persons in the service of the Government, or any local or other public authority, as he thinks fit, any place which is used, or which he has reason to believe is used, as a factory;

(b) make examination of the premises, plant and machinery, require the production of any prescribed register and any other document relating to the factory, and take on the spot or otherwise statements of any persons which he may consider necessary for carrying out the purposes of this Act;

(c) exercise such other powers as may be prescribed for carrying out the purposes of this Act:

Provided that no person shall be compelled under this section to answer any question or give any evidence tending to incriminate himself.

10. Certifying Surgeons.—(1) The ¹⁶[State] Government may appoint qualified medical practitioners to be certifying surgeons for the purposes of this Act within such local limits or for such factory or class or description of factories as it may assign to them respectively.

(2) A certifying surgeon may, with the approval of the ¹⁶[State] Government, authorise any qualified medical practitioner to exercise any of his powers under this Act for such period as the certifying surgeon may specify and subject to such conditions as the ¹⁶[State] Government may think fit to impose, and references in this Act to a certifying surgeon shall be deemed to include references to any qualified medical practitioner when so authorised.

(3) No person shall be appointed to be, or authorised to exercise the powers of a certifying surgeon, or having been so appointed or authorised, continue to exercise such powers, who is or becomes the occupier of a factory or is or becomes directly or indirectly interested therein or in any process or business carried on

¹⁶ Subs. by the A. O. 1950, for "Provincial,"

therein or in any patent or machinery connected therewith or is otherwise in the employ of the factory.

(4) The certifying surgeon shall carry out such duties as may be prescribed in connection with—

- (a) the examination and certification of young persons under this Act;
- (b) the examination of persons engaged in factories in such dangerous occupations or processes as may be prescribed;
- (c) the exercising of such medical supervision as may be prescribed for any factory or class or description of factories where—
 - (i) cases of illness have occurred which it is reasonable to believe are due to the nature of the manufacturing process carried on, or other conditions of work prevailing, therein;
 - (ii) by reason of any change in the manufacturing process carried on or in the substances used therein or by reason of the adoption of any new manufacturing process or of any new substance for use in a manufacturing process, there is a likelihood of injury to the health of workers employed in that manufacturing process;
 - (iii) young persons are, or are about to be, employed in any work which is likely to cause injury to their health.

Explanation.—In this section “qualified medical practitioner” means a person holding a qualification granted by an authority specified in the Schedule to the Indian Medical Degrees Act, 1916 (VII of 1916), or in the Schedules to the Indian Medical Council Act, 1933 (XXVII of 1933).

CHAPTER III.—HEALTH

11. Cleanliness.—(1) Every factory shall be kept clean and free from effluvia arising from any drain, privy, or other nuisance, and in particular—

- (a) accumulations of dirt and refuse shall be removed daily by sweeping or by any other effective method from the floors and benches of workrooms and from staircases and passages, and disposed of in a suitable manner;
- (b) the floor of every workroom shall be cleaned at least once in every week by washing, using disinfectant, where necessary, or by some other effective method;
- (c) where a floor is liable to become wet in the course of any manufacturing process to such extent as is capable of being drained, effective means of drainage shall be provided and maintained;
- (d) all inside walls and partitions, all ceilings or tops of rooms and all walls, sides and tops of passages and staircases shall—
 - (i) where they are painted or varnished, be repainted or revarnished at least once in every period of five years;
 - (ii) where they are painted or varnished or where they have smooth impervious surfaces, be cleaned at least once in every period of fourteen months by such method as may be prescribed;
 - (iii) in any other case, be kept whitewashed, or colourwashed, and the whitewashing or colourwashing shall be carried out at least once in every period of fourteen months;
- (e) the dates on which the processes required by clause (d) are carried out shall be entered in the prescribed register.

(2) If, in view of the nature of the operations, carried on in a factory, it is not possible for the occupier to comply with all or any of the provisions of subsection (1), the ¹⁷[State] Government may by order exempt such factory or class

¹⁷ Subs. by the A. O. 1950, for “Provincial.”

or description of factories from any of the provisions of that sub-section and specify alternative methods for keeping the factory in a clean state.

12. Disposal of wastes and effluents.—(1) Effective arrangements shall be made in every factory for the disposal of wastes and effluents due to the manufacturing process carried on therein.

(2) The ¹⁸[State] Government may make rules prescribing the arrangements to be made under sub-section (1) or requiring that the arrangements made in accordance with sub-section (1) shall be approved by such authority as may be prescribed.

13. Ventilation and temperature.—(1) Effective and suitable provision shall be made in every factory for securing and maintaining in every workroom—

(a) adequate ventilation by the circulation of fresh air, and

(b) such a temperature as will secure to workers therein reasonable conditions of comfort and prevent injury to health;—
and in particular,—

- (i) walls and roofs shall be of such material and so designed that such temperature shall not be exceeded but kept as low as practicable;
- (ii) where the nature of the work carried on in the factory involves, or is likely to involve, the production of excessively high temperatures, such adequate measures as are practicable shall be taken to protect the workers therefrom, by separating the process which produces such temperatures from the workroom, by insulating the hot parts or by other effective means.

(2) The ¹⁸[State] Government may prescribe a standard of adequate ventilation and reasonable temperature for any factory or class or description of factories or parts thereof and direct that a thermometer shall be provided and maintained in such place and position as may be specified.

(3) If it appears to the ¹⁸[State] Government that in any factory or class or description of factories excessively high temperatures can be reduced by such methods as whitewashing, spraying or insulating and screening outside walls or roofs or windows, or by raising the level of the roof, or by insulating the roof either by an air space and double roof or by the use of insulating roof materials, or by other methods, it may prescribe such of these or other methods as shall be adopted in the factory.

14. Dust and fume.—(1) In every factory in which, by reason of the manufacturing process carried on, there is given off any dust or fume or other impurity of such a nature and to such an extent as is likely to be injurious or offensive to the workers employed therein, or any dust in substantial quantities, effective measures shall be taken to prevent its inhalation and accumulation in any workroom, and if any exhaust appliance is necessary for this purpose, it shall be applied as near as possible to the point of origin of the dust, fume or other impurity, and such point shall be enclosed so far as possible.

(2) In any factory no stationary internal combustion engine shall be operated unless the exhaust is conducted into the open air, and no other internal combustion engine shall be operated in any room unless effective measures have been taken to prevent such accumulation of fumes therefrom as are likely to be injurious to workers employed in the room.

15. Artificial humidification.—(1) In respect of all factories in which the humidity of the air is artificially increased, the ¹⁸[State] Government may make rules,—

(a) prescribing standards of humidification;

¹⁸ Subs. by the A. O. 1950, for "Provincial."

- (b) regulating the methods used for artificially increasing the humidity of the air;
- (c) directing prescribed tests for determining the humidity of the air to be correctly carried out and recorded;
- (d) prescribing methods to be adopted for securing adequate ventilation and cooling of the air in the workrooms.

(2) In any factory in which the humidity of the air is artificially increased, the water used for the purpose shall be taken from a public supply, or other source or drinking water, or shall be effectively purified before it is so used.

(3) If it appears to an Inspector that the water used in a factory for increasing humidity which is required to be effectively purified under sub-section (2) is not effectively purified he may serve on the manager of the factory an order in writing, specifying the measures which in his opinion should be adopted, and requiring them to be carried out before specified date.

16. Overcrowding.—(1) No room in any factory shall be overcrowded to an extent injurious to the health of the workers employed therein.

(2) Without prejudice to the generality of sub-section (1), there shall be in every workroom of a factory in existence on the date of the commencement of this Act at least three hundred and fifty cubic feet and of a factory built after the commencement of this Act at least five hundred cubic feet of space for every worker employed therein, and for the purposes of this sub-section no account shall be taken of any space which is more than fourteen feet above the level of the floor of the room.

(3) If the Chief Inspector by order in writing so requires, there shall be posted in each workroom of a factory a notice specifying the maximum number of workers who may, in compliance with the provisions of this section, be employed in the room.

(4) The Chief Inspector may by order in writing exempt, subject to such conditions, if any, as he may think fit to impose any workroom from the provisions of this section, if he is satisfied that compliance therewith in respect of the room is unnecessary in the interest of the health of the workers employed therein.

17. Lighting.—(1) In every part of a factory where workers are working or passing there shall be provided and maintained sufficient and suitable lighting, natural or artificial, or both.

(2) In every factory all glazed windows and skylights used for the lighting of the workrooms shall be kept clean on both the inner and outer surfaces and, so far as compliance with the provisions of any rules made under sub-section (3) of section 13 will allow, free from obstruction.

(3) In every factory effective provision shall, so far as is practicable, be made for the prevention of—

- (a) glare, either directly from a source of light or by reflection from a smooth or polished surface;
- (b) the formation of shadows to such an extent as to cause eye-strain or the risk of accident to any worker.

(4) The ¹⁹[State] Government may prescribe standards of sufficient and suitable lighting for factories or for any class or description of factories or for any manufacturing process.

18. Drinking water.—(1) In every factory effective arrangements shall be made to provide and maintain at suitable points conveniently situated for all workers employed therein a sufficient supply of wholesome drinking water.

¹⁹ Subs. by the A. O. 1950, for "Provincial."

(2) All such points shall be legibly marked "drinking water" in a language understood by a majority of the workers employed in the factory, and no such point shall be situated within twenty feet of any washing place, urinal or latrine unless a shorter distance is approved in writing by the Chief Inspector.

(3) In every factory wherein more than two hundred and fifty workers are ordinarily employed, provision shall be made for cooling drinking water during hot weather by effective means and for distribution thereof.

(4) In respect of all factories or any class or description of factories the ²⁰[State] Government may make rules for securing compliance with the provisions of sub-sections (1), (2) and (3) and for the examination by prescribed authorities of the supply and distribution of drinking water in factories.

19. Latrines and urinals.—(1) In every factory—

- (a) sufficient latrine and urinal accommodation of prescribed types shall be provided conveniently situated and accessible to workers at all times while they are at the factory;
- (b) separate enclosed accommodation shall be provided for male and female workers;
- (c) such accommodation shall be adequately lighted and ventilated, and no latrine or urinal shall, unless specially exempted in writing by the Chief Inspector, communicate with any workroom except through an intervening open space or ventilated passage;
- (d) all such accommodation shall be maintained in a clean and sanitary condition at all times;
- (e) sweepers shall be employed whose primary duty it would be to keep clean latrines, urinals and washing places.

(2) In every factory wherein more than two hundred and fifty workers are ordinarily employed—

- (a) all latrine and urinal accommodation shall be of prescribed sanitary types;
- (b) the floors and internal walls, up to a height of three feet, of the latrines and urinals and the sanitary blocks shall be laid in glazed tiles or otherwise finished to provide a smooth polished impervious surface;
- (c) without prejudice to the provisions of clauses (d) and (e) of sub-section (1), the floors, portions of the walls and blocks so laid or finished and the sanitary pans of latrines and urinals shall be thoroughly washed and cleaned at least once in every seven days with suitable detergents or disinfectants or with both.

(3) The ²⁰[State] Government may prescribe the number of latrines and urinals to be provided in any factory in proportion to the numbers of male and female workers ordinarily employed therein, and provide for such further matters in respect of sanitation in factories, including the obligation of workers in this regard, as it considers necessary in the interest of the health of the workers employed therein.

20. Spittoons.—(1) In every factory there shall be provided a sufficient number of spittoons in convenient places and they shall be maintained in a clean and hygienic condition.

(2) The ²⁰[State] Government may make rules prescribing the type and the number of spittoons to be provided and their location in any factory and provide for such further matters relating to their maintenance in a clean and hygienic condition.

²⁰ Subs. by the A. O. 1950, for "Provincial."

(3) No person shall spit within the premises of a factory except in the spittoons provided for the purpose and a notice containing this provision and the penalty for its violation shall be prominently displayed at suitable places in the premises.

(4) Whoever spits in contravention of sub-section (3) shall be punishable with fine not exceeding five rupees.

CHAPTER IV—SAFETY

21. Fencing of machinery.—(1) In every factory the following namely,—

- (i) every moving part of a prime mover and every flywheel connected to a prime mover, whether the prime mover or flywheel is in the engine house or not,
- (ii) the headrace and tailrace of every water-wheel and water turbine;
- (iii) any part of a stock-bar which projects beyond the head stock of a lathe; and
- (iv) unless they are in such position or of such construction as to be safe to every person employed in the factory as they would be if they were securely fenced, the following, namely,—
 - (a) every part of an electric generator, a motor or rotary convertor;
 - (b) every part of transmission machinery; and
 - (c) every dangerous part of any other machinery,

shall be securely fenced by safeguards of substantial construction which shall be kept in position while the parts of machinery they are fencing are in motion or in use:

Provided that for the purpose of determining whether any part of machinery is in such position or is of such construction as to be safe as aforesaid, account shall not be taken of any occasion when, it being necessary to make an examination of the machinery while it is in motion or, as a result of such examination, to carry out any mounting or shipping of belts, lubrication or other adjusting operation while the machinery is in motion, such examination or operation is made or carried out in accordance with the provisions of ²¹[sub-section (1) of section 22].

(2) The ²²[State] Government may by rules prescribe such further precautions as it may consider necessary in respect of any particular machinery or part thereof, or exempt, subject to such condition as may be prescribed, for securing the safety of the workers, any particular machinery or part thereof from the provisions of this section.

22. Work on or near machinery in motion.—(1) Where in any factory it becomes necessary to examine any part of machinery referred to in section 21 while the machinery is in motion, or as a result of such examination, to carry out any mounting or shipping of belts, lubrication or other adjusting operation while the machinery is in motion, such examination or operation shall be made or carried out only by a specially trained adult male worker wearing tight fitting clothing whose name has been recorded in the register prescribed in this behalf and while he is so engaged,—

- (a) such worker shall not handle a belt at a moving pulley unless the belt is less than six inches in width and unless the belt-joint is either laced or flush with the belt;
- (b) without prejudice to any other provision of this Act relating to the fencing of machinery, every set screw, bolt and key on any revolving shaft, spindle, wheel or pinion, and all spur, worm and other toothed or friction gearing in motion with which such worker would

²¹ Subs. by Act 25 of 1954, s. 5 for "section 22."

²² Subs. by the A. O. 1950, for "Provincial."

otherwise be liable to come into contact, shall be securely fenced to prevent such contact.

²¹[(2) No woman or young person shall be allowed to clean, lubricate or adjust any part of a prime mover or of any transmission machinery while the prime mover or transmission machinery is in motion, or to clean, lubricate or adjust any part of any machine if the cleaning, lubrication or adjustment thereof would expose the woman or young person to risk of injury from any moving part either of that machine or of any adjacent machinery.]

(3) The ²²[State] Government may, by notification in the official Gazette, prohibit, in any specified factory or class or description of factories, the cleaning, lubricating or adjusting by any person of specified parts of machinery when those parts are in motion.

23. Employment of young persons on dangerous machines.—(1) No young person shall work at any machine to which this section applies, unless he has been fully instructed as to the dangers arising in connection with the machine and the precautions to be observed and—

(a) has received sufficient training in work at the machine, or

(b) is under adequate supervision by a person who has a thorough knowledge and experience of the machine.

(2) Sub-section (1) shall apply to such machines as may be prescribed by the ²²[State] Government, being machines which in its opinion are of such a dangerous character that young persons ought not to work at them unless the foregoing requirements are complied with.

24. Striking gear and devices for cutting off power.—(1) In every factory—

(a) suitable striking gear or other efficient mechanical appliance shall be provided and maintained and used to move driving belts to and from fast and loose pulleys which form part of the transmission machinery, and such gear or appliances shall be so constructed, placed and maintained as to prevent the belt from creeping back on to the fast pulley;

(b) driving belts when not in use shall not be allowed to rest or ride upon shafting in motion.

(2) In every factory suitable devices for cutting off power in emergencies from running machinery shall be provided and maintained in every work-room:

Provided that in respect of factories in operation before the commencement of this Act, the provisions of this sub-section shall apply only to work-rooms in which electricity is used as power.

25. Self-acting machines.—No traversing part of a self-acting machine in any factory and no material carried thereon shall, if the space over which it runs is a space over which any person is liable to pass, whether in the course of his employment or otherwise, be allowed to run on its outward or inward traverse within a distance of eighteen inches from any fixed structure which is not part of the machine:

Provided that the Chief Inspector may permit the continued use of a machine installed before the commencement of this Act which does not comply with the requirements of this section on such conditions for ensuring safety as he may think fit to impose.

26. Casing of new machinery.—(1) In all machinery driven by power and installed in any factory after the commencement of this Act,—

(a) every set screw, bolt or key on any revolving shaft, spindle, wheel or pinion shall be so sunk, encased or otherwise effectively guarded as to prevent danger;

²¹ Subs. by Act 25 of 1954, s. 6.

²² Subs. by the A. O. 1950 for "Provincial."

- (b) all spur, worm and other toothed or friction gearing which does not require frequent adjustment while in motion shall be completely encased unless it is so situated as to be as safe as it would be if it were completely encased.

(2) Whoever sells or lets on hire or, as agent of a seller or hirer, causes or procures to be sold or let on hire, for use in a factory any machinery driven by power which does not comply with the provisions of ²³[sub-section (1) or any rules made under sub-section (3)] shall be punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees or with both.

²⁴[(3) The State Government may make rules specifying further safeguards to be provided in respect of any other dangerous part of any particular machine or class or description of machines.]

27. Prohibition of employment of women and children near cotton-openers.

—No woman or child shall be employed in any part of a factory for pressing cotton in which a cotton-opener is at work:

Provided that if the feed-end of a cotton-opener is in a room separated from the delivery end by a partition extending to the room or to such height as the Inspector may in any particular case specify in writing, women and children may be employed on the side of the partition where the feed-end is situated.

28. Hoists and lifts.—(1) In every factory—

(a) every hoist and lift shall be—

(i) of good mechanical construction, sound material and adequate strength;

(ii) properly maintained, and shall be thoroughly examined by a competent person at least once in every period of six months, and a register shall be kept containing the prescribed particulars of every such examination;

(b) every hoistway and liftway shall be sufficiently protected by an enclosure fitted with gates, and the hoist or lift and every such enclosure shall be so constructed as to prevent any person or thing from being trapped between any part of the hoist or lift and any fixed structure or moving part;

(c) the maximum safe working load shall be plainly marked on every hoist or lift, and no load greater than such load shall be carried thereon;

(d) the cage of every hoist or lift used for carrying persons shall be fitted with a gate on each side from which access is afforded to a landing;

(e) every gate referred to in clause (b) or clause (d) shall be fitted with interlocking or other efficient device to secure that the gate cannot be opened except when the cage is at the landing and that the cage cannot be moved unless the gate is closed.

(2) The following additional requirements shall apply to hoists and lifts used for carrying persons and installed or reconstructed in a factory after the commencement of this Act, namely:—

(a) where the cage is supported by rope or chain, there shall be at least two ropes or chains separately connected with the cage and balance weight, and each rope or chain with its attachments shall be capable of carrying the whole weight of the cage together with its maximum load;

²³ Subs. by Act 25 of 1954, s. 7 for " sub-section (1) ".

²⁴ Subs., *ibid.*

(b) efficient devices shall be provided and maintained capable of supporting the cage together with its maximum load in the event of breakage of the ropes, chains or attachments;

(c) an efficient automatic device shall be provided and maintained to prevent the cage from over-running.

(3) The Chief Inspector may permit the continued use of a hoist or lift installed in a factory before the commencement of this Act which does not fully comply with the provisions of sub-section (1) upon such conditions for ensuring safety as he may think fit to impose.

(4) The ²⁵[State] Government may, if in respect of any class or description of hoist or lift, it is of opinion that it would be unreasonable to enforce any requirement of sub-sections (1) and (2), by order direct that such requirement shall not apply to such class or description of hoist or lift.

²⁶29. **Lifting machines, chains, ropes and lifting tackles.**—(1) In any factory the following provisions shall be complied with in respect of every lifting machine (other than a hoist and lift) and every chain, rope and lifting tackle for the purpose of raising or lowering persons, goods or materials:—

(a) all parts, including the working gear, whether fixed or movable, of every lifting machine and every chain, rope or lifting tackle shall be—

(i) of good construction, sound material and adequate strength and free from defects;

(ii) properly maintained; and

(iii) thoroughly examined by a competent person at least once in every period of twelve months, or at such intervals as the Chief Inspector may specify in writing, and a register shall be kept containing the prescribed particulars of every such examination;

(b) no lifting machine and no chain, rope or lifting tackle shall, except for the purpose of test, be loaded beyond the safe working load which shall be plainly marked thereon together with an identification mark and duly entered in the prescribed register; and where this is not practicable, a table showing the safe working loads of every kind and size of lifting machine or chain, rope or lifting tackle in use shall be displayed in prominent positions on the premises;

(c) while any person is employed or working on or near the wheel track of a travelling crane in any place where he would be liable to be struck by the crane, effective measures shall be taken to ensure that the crane does not approach within twenty feet of that place.

(2) The State Government may make rules in respect of any lifting machine or any chain, rope or lifting tackle used in factories—

(a) prescribing further requirements to be complied with in addition to those set out in this section;

(b) providing for exemption from compliance with all or any of the requirements of this section, where in its opinion, such compliance is unnecessary or impracticable.

(3) For the purposes of this section a lifting machine or a chain, rope or lifting tackle shall be deemed to have been thoroughly examined if a visual examination supplemented, if necessary, by other means and by the dismantling of parts of the gear, has been carried out as carefully as the conditions permit in order to arrive at a reliable conclusion as to the safety of the parts examined.

²⁵ Subs. by the A. O. 1950, for "Provincial."

²⁶ Subs. by Act 25 of 1954, s. 8.

Explanation.—In this section,—

- (a) “lifting machine” means a crane, crab winch, teagle, pulley block, gin wheel, transporter or runway;
- (b) “lifting tackle” means chain slings, rope slings, rings, hooks, shackles and swivels.]

30. Revolving machinery.—(1) In every room in a factory in which the process of grinding is carried on there shall be permanently affixed to or placed near each machine in use a notice indicating the maximum safe working peripheral speed of every grindstone or abrasive wheel, the speed of the shaft or spindle upon which the wheel is mounted, and the diameter of the pulley upon such shaft or spindle necessary to secure such safe working peripheral speed.

(2) The speeds indicated in notices under sub-section (1) shall not be exceeded.

(3) Effective measures shall be taken in every factory to ensure that the safe working peripheral speed of every revolving vessel, cage, basket, flywheel, pulley disc or similar appliance driven by power is not exceeded.

31. Pressure plant.—(1) If in any factory any part of the plant or machinery used in a manufacturing process is operated at a pressure above atmospheric pressure effective measures shall be taken to ensure that the safe working pressure of such part is not exceeded.

(2) The ²⁷[State] Government may make rules providing for the examination and testing of any plant or machinery such as is referred to in sub-section (1) and prescribing such other safety measures in relation thereto as may in its opinion be necessary in any factory or class or description of factories.

32. Floors, stairs and means of access.—In every factory—

(a) all floors, steps, stairs, passages and gangways shall be of sound construction and properly maintained and where it is necessary to ensure safety, steps, stairs, passages and gangways shall be provided with substantial handrails;

(b) there shall, so far as is reasonably practicable, be provided and maintained safe means of access to every place at which any person is at any time required to work.

33. Pits, sumps, openings in floors, etc.—(1) In every factory every fixed vessel, sump, tank, pit or opening in the ground or in a floor which, by reason of its depth, situation, construction or contents is or may be a source of danger, shall be either securely covered or securely fenced.

(2) The ²⁷[State] Government may, by order in writing, exempt, subject to such conditions as may be prescribed, any factory or class or description of factories in respect of any vessel, sump, tank, pit or opening from compliance with the provisions of this section.

34. Excessive weights.—(1) No person shall be employed in any factory to lift, carry or move any load so heavy as to be likely to cause him injury.

(2) The ²⁷[State] Government may make rules prescribing the maximum weights which may be lifted, carried or moved by adult men, adult women, adolescents and children employed in factories or in any class or description of factories or in carrying on any specified process.

35. Protection of eyes.—In respect of any such manufacturing process carried on in any factory as may be prescribed, being a process which involves—

- (a) risk of injury to the eyes from particles or fragments thrown off in the course of the process, or

²⁷ Subs. by the A. O. 1950, for “Provincial.”

- (b) risk to the eyes by reason of exposure to excessive light,—the ²⁸[State] Government may by rules require that effective screens or suitable goggles shall be provided for the protection of persons employed on, or in the immediate vicinity of, the process.

36. Precautions against dangerous fumes.—(1) In any factory no person shall enter or be permitted to enter any chamber, tank, vat, pit, pipe, flue or other confined space in which dangerous fumes are likely to be present to such an extent as to involve risk of persons being overcome thereby, unless it is provided with a manhole of adequate size or other effective means of egress.

(2) No portable electric light of voltage exceeding twenty-four volts shall be permitted in any factory for use inside any confined space such as is referred to in sub-section (1), and where the fumes present are likely to be inflammable, no lamp or light other than of flame-proof construction shall be permitted to be used in such confined space.

(3) No person in any factory shall enter or be permitted to enter any confined space such as is referred to in sub-section (1) until all practicable measures have been taken to remove any fumes which may be present and to prevent any ingress of fumes and unless either—

- (a) a certificate in writing has been given by a competent person, based on a test carried out by himself, that the space is free from dangerous fumes and fit for persons to enter, or
- (b) the worker is wearing suitable breathing apparatus and a belt securely attached to a rope, the free end of which is held by a person standing outside the confined space.

(4) Suitable breathing apparatus, reviving apparatus and belts and ropes shall in every factory be kept ready for instant use beside any such confined space as aforesaid which any person has entered, and all such apparatus shall be periodically examined and certified by a competent person to be fit for use; and a sufficient number of persons employed in every factory shall be trained and practised in the use of all such apparatus and in the method of restoring respiration.

(5) No person shall be permitted to enter in any factory any boiler furnace, boiler flue, chamber tank, vat, pipe or other confined space for the purpose of working or making any examination therein until it has been sufficiently cooled by ventilation or otherwise to be safe for persons to enter.

(6) The ²⁸[State] Government may make rules prescribing the maximum dimensions of the manholes referred to in sub-section (1) and may by order in writing exempt, subject to such conditions as it may think fit to impose, any factory or class or description of factories from compliance with any of the provisions of this section.

37. Explosive or inflammable dust, gas, etc.—(1) Where in any factory any manufacturing process produces dust, gas, fume or vapour of such character and to such extent as to be likely to explode on ignition, all practicable measures shall be taken to prevent any such explosion by—

- (a) effective enclosure of the plant or machinery used in the process;
- (b) removal or prevention of the accumulation of such dust, gas, fume or vapour;
- (c) exclusion or effective enclosure of all possible sources of ignition.

(2) Where in any factory the plant or machinery used in a process such as is referred to in sub-section (1) is not so constructed as to withstand the probable pressure which such an explosion as aforesaid would produce, all practicable measures shall be taken to restrict the spread and effects of the explosion by the

²⁸ Subs. by the A. O. 1950, for "Provincial."

provision in the plant or machinery of chokes, baffles, vents or other effective appliances.

(3) Where any part of the plant or machinery in a factory contains any explosive or inflammable gas or vapour under pressure greater than atmospheric pressure, that part shall not be opened except in accordance with the following provisions, namely:—

- (a) before the fastening of any joint of any pipe connected with the part or the fastening of the cover of any opening into the part is loosened, any flow of the gas or vapour into the part or any such pipe shall be effectively stopped by a stop-valve or other means;
- (b) before any such fastening as aforesaid is removed, all practicable measures shall be taken to reduce the pressure of the gas or vapour in the part or pipe to atmospheric pressure;
- (c) where any such fastening as aforesaid has been loosened or removed effective measures shall be taken to prevent any explosive or inflammable gas or vapour from entering the part or pipe until the fastening has been secured, or, as the case may be, securely replaced:

Provided that the provisions of this sub-section shall not apply in the case of plant or machinery installed in the open air.

(4) No plant, tank or vessel which contains or has contained any explosive or inflammable substance shall be subjected in any factory to any welding, brazing, soldering or cutting operation which involves the application of heat unless adequate measures have first been taken to remove such substance and any fumes arising therefrom or to render such substance and fumes non-explosive or non-inflammable, and no such substance shall be allowed to enter such plant, tank or vessel after any such operation until the metal has cooled sufficiently to prevent any risk of igniting the substance.

(5) The ²⁹[State] Government may by rules exempt, subject to such conditions as may be prescribed, any factory or class or description of factories from compliance with all or any of the provisions of this section.

38. Precautions in case of fire.—(1) Every factory shall be provided with such means of escape in case of fires as may be prescribed, and if it appears to the Inspector that any factory is not so provided, he may serve on the manager of the factory an order in writing specifying the measures which, in his opinion should be adopted to bring the factory into conformity with the provisions of this section and any rules made thereunder, and requiring them to be carried out before a date specified in the order.

(2) In every factory the doors affording exit from any room shall not be locked or fastened so that they cannot be easily and immediately opened from the inside while any person is within the room, and all such doors, unless they are of the sliding type, shall be constructed to open outwards.

(3) In every factory, every window, door or other exit affording a means of escape in case of fire, other than the means of exit in ordinary use, shall be distinctively marked in a language understood by the majority of the workers and in red letters of adequate size or by some other effective and clearly understood sign.

(4) There shall be provided in every factory effective and clearly audible means of giving warning in case of fire to every person employed in the factory.

(5) A free passage-way giving access to each means of escape in case of fire shall be maintained for the use of all workers in every room of a factory.

(6) Effective measures shall be taken to ensure that in every factory—

- (a) wherein more than twenty workers are ordinarily employed in any place above the ground floor, or

²⁹ Subs. by the A. O. 1950, for "Provincial."

(b) wherein explosives or highly inflammable materials are used or stored, all the workers are familiar with the means of escape in case of fire and have been adequately trained in the routine to be followed in such case.

(7) The ³⁰[State] Government may make rules prescribing, in respect of any factory or class or description of factories the means of escape to be provided in case of fire and the nature and amount of fire-fighting apparatus to be provided and maintained.

39. Power to require specifications of defective parts or tests of stability.—If it appears to the Inspector that any building or part of a building or any part of the ways, machinery or plant in a factory is in such a condition that it may be dangerous to human life or safety, he may serve on the manager of the factory an order in writing requiring him before a specified date—

- (a) to furnish such drawings, specifications and other particulars as may be necessary to determine whether such building, ways, machinery or plant can be used with safety, or
- (b) to carry out such tests in such manner as may be specified in the order, and to inform the Inspector of the results thereof.

40. Safety of buildings and machinery.—(1) If it appears to the Inspector that any building or part of a building or any part of the ways, machinery or plant in a factory is in such a condition that it is dangerous to human life or safety, he may serve on the manager of the factory an order in writing specifying the measures which in his opinion should be adopted, and requiring them to be carried out before a specified date.

(2) If it appears to the Inspector that the use of any building or part of a building or any part of the ways, machinery or plant in a factory involves imminent danger to human life or safety, he may serve on the manager of the factory an order in writing prohibiting its use until it has been properly repaired or altered.

41. Power to make rules to supplement this Chapter.—The ³⁰[State] Government may make rules requiring the provision in any factory or in any class or description of factories of such further devices for securing the safety of persons employed therein as it may deem necessary.

CHAPTER V.—WELFARE.

42. Washing facilities.—(1) In every factory—

- (a) adequate and suitable facilities for washing shall be provided and maintained for the use of the workers therein;
- (b) separate and adequately screened facilities shall be provided for the use of male and female workers;
- (c) such facilities shall be conveniently accessible and shall be kept clean.

(2) The ³⁰[State] Government may, in respect of any factory or class or description of factories or of any manufacturing process, prescribe standards of adequate and suitable facilities for washing.

43. Facilities for storing and drying clothing. The ³⁰[State] Government may, in respect of any factory or class or description of factories, make rules requiring the provision therein of suitable places for keeping clothing not worn during working hours and for the drying of wet clothing.

44. Facilities for sitting.—(1) In every factory suitable arrangements for sitting shall be provided and maintained for all workers obliged to work in a

³⁰ Subs. by the A. O. 1950, for "Provincial."

standing position, in order that they may take advantage of any opportunities for rest which may occur in the course of their work.

(2) If, in the opinion of the Chief Inspector, the workers in any factory engaged in a particular manufacturing process or working in a particular room are able to do their work efficiently in a sitting position, he may, by order in writing require the occupier of the factory to provide before a specified date such seating arrangements as may be practicable for all workers so engaged or working.

(3) The ³¹[State] Government may, by notification in the official Gazette, declare that the provisions of sub-section (1) shall not apply to any specified factory or class or description of factories or to any specified manufacturing process.

45. First-aid appliances.—(1) There shall in every factory be provided and maintained so as to be readily accessible during all working hours first-aid boxes or cupboards equipped with the prescribed contents, and the number of such boxes or cupboards to be provided and maintained shall not be less than one for every one hundred and fifty workers ordinarily employed ³²[at any one time in the factory].

³³[(2) Nothing except the prescribed contents shall be kept in a first-aid box or cupboard.]

(3) Each first-aid box or cupboard shall be kept in the charge of a separate responsible person who is trained in first aid treatment and who shall always be readily available during the working hours of the factory.]

³⁴[(4)] In every factory wherein more than five hundred workers are employed there shall be provided and maintained an ambulance room of the prescribed size, containing the prescribed equipment and in the charge of such medical and nursing staff as may be prescribed.

46. Canteens.—(1) The ³¹[State] Government may make rules requiring that in any specified factory wherein more than two hundred and fifty workers are ordinarily employed, a canteen or canteens shall be provided and maintained by the occupier for the use of the workers.

(2) Without prejudice to the generality of the foregoing power, such rules may provide for—

- (a) the date by which such canteen shall be provided;
- (b) the standards in respect of construction, accommodation, furniture and other equipment of the canteen;
- (c) the foodstuffs to be served therein and the charges which may be made therefor;
- (d) the constitution of a managing committee for the canteen and representation of the workers in the management of the canteen;
- (e) the delegation to the Chief Inspector, subject to such conditions as may be prescribed, of the power to make rules under clause (c).

47. Shelters, rest rooms and lunch rooms.—(1) In every factory wherein more than one hundred and fifty workers are ordinarily employed, adequate and suitable shelters or rest rooms and a suitable lunch room, with provision for drinking water, where workers can eat meals brought by them, shall be provided and maintained for the use of the workers:

Provided that any canteen maintained in accordance with the provisions of section 46 shall be regarded as part of the requirements of this sub-section:

Provided further that where a lunch room exists no worker shall eat any food in the work room.

³¹ Subs. by the A. O. 1950, for "Provincial."

³² Ins. by Act 25 of 1954, s. 9.

³³ Subs., *ibid.* for original sub-section (2).

³⁴ Renumbered for "(3)", *ibid.*

(2) The shelters or rest rooms or lunch rooms to be provided under sub-section (1) shall be sufficiently lighted and ventilated and shall be maintained in a cool and clean condition.

(3) The ³⁵[State] Government may—

(a) prescribe the standards in respect of construction, accommodation, furniture and other equipment of shelters, rest rooms and lunch rooms to be provided under this section;

(b) by notification in the official Gazette, exempt any factory or class or description of factories from the requirements of this section.

48. Creches.—(1) In every factory wherein more than fifty women workers are ordinarily employed there shall be provided and maintained a suitable room or rooms for the use of children under the age of six years of such women.

(2) Such rooms shall provide adequate accommodation, shall be adequately lighted and ventilated, shall be maintained in a clean and sanitary condition and shall be under the charge of women trained in the care of children and infants.

(3) The ³⁵[State] Government may make rules—

(a) prescribing the location and the standards in respect of construction, accommodation, furniture and other equipment of rooms to be provided, under this section;

(b) requiring the provision in factories to which this section applies of additional facilities for the care of children belonging to women workers, including suitable provision of facilities for washing and changing their clothing;

(c) requiring the provision in any factory of free milk or refreshment or both for such children;

(d) requiring that facilities shall be given in any factory for the mothers of such children to feed them at the necessary intervals.

49. Welfare Officers.—(1) In every factory wherein five hundred or more workers are ordinarily employed the occupier shall employ in the factory such number of Welfare Officers as may be prescribed.

(2) The ³⁵[State] Government may prescribe the duties, qualifications and conditions of service of officers employed under sub-section (1).

50. Power to make rules to supplement this Chapter.—The ³⁵[State] Government may make rules—

(a) exempting, subject to compliance with such alternative arrangements for the welfare of workers as may be prescribed, any factory or class or description of factories from compliance with any of the provisions of this Chapter;

(b) requiring in any factory or class or description of factories that representatives of the workers employed in the factory shall be associated with the management of the welfare arrangements of the workers.

CHAPTER VI.—WORKING HOURS OF ADULTS.

51. Weekly hours.—No adult worker shall be required or allowed to work in a factory for more than forty-eight hours in any week.

52. Weekly holidays.—(1) No adult worker shall be required or allowed to work in a factory on the first day of the week (hereinafter referred to as the said day), unless—

(a) he has or will have a holiday for a whole day on one of the three days immediately before or after the said day, and

³⁵ Subs. by the A. O. 1950, for "Provincial."

(b) the manager of the factory has, before the said day or the substituted day under clause (a), whichever is earlier,—

(i) delivered a notice at the office of the Inspector of his intention to require the worker to work on the said day and of the day which is to be substituted, and

(ii) displayed a notice to that effect in the factory:

Provided that no substitution shall be made which will result in any worker working for more than ten days consecutively without a holiday for a whole day.

(2) Notices given under sub-section (1) may be cancelled by a notice delivered at the office of the Inspector and a notice displayed in the factory not later than the day before the said day or the holiday to be cancelled, whichever is earlier.

(3) Where, in accordance with the provisions of sub-section (1), any worker works on the said day and has had a holiday on one of the three days immediately before it, that said day shall, for the purpose of calculating his weekly hours of work, be included in the preceding week.

53. Compensatory holidays.—(1) Where, as a result of the passing of an order or the making of a rule under the provisions of this Act exempting a factory or the workers therein from the provisions of section 52, a worker is deprived of any of the weekly holidays for which provision is made in sub-section (1) of that section, he shall be allowed, within the month in which the holidays were due to him or within the two months immediately following that month, compensatory holidays of equal number to the holidays so lost.

(2) The ³⁶[State] Government may prescribe the manner in which the holidays for which provision is made in sub-section (1) shall be allowed.

54. Daily hours.—Subject to the provisions of section 51, no adult worker shall be required or allowed to work in a factory for more than nine hours in any day:

³⁷[Provided that, subject to the previous approval of the Chief Inspector, the daily maximum specified in this section may be exceeded in order to facilitate the change of shifts.]

55. Intervals for rest.—³⁸[(1)] ³⁹[The periods of work] of adult workers in a factory each day shall be so fixed that no period shall exceed five hours and that no worker shall work for more than five hours before he has had an interval for rest of at least half an hour.

⁴⁰[(2)] The State Government or, subject to the control of the State Government, the Chief Inspector, may, by written order and for the reasons specified therein, exempt any factory from the provisions of sub-section (1) so however that the total number of hours worked by a worker without an interval does not exceed six.]

56. Spreadover.—The periods of work of an adult worker in a factory shall be so arranged that inclusive of his intervals for rest under section 55 they shall not spread over more than ten and a half hours in any day:

Provided that the Chief Inspector may, for reasons to be specified in writing, increase the spreadover to twelve hours.

³⁶ Subs. by the A. O. 1950, for "Provincial."

³⁷ Added by Act 25 of 1954, s. 10.

³⁸ Renumbered as paragraph (1) by s. 11, *ibid.*

³⁹ Subs. by Act 40 of 1949, s. 3 and Sch. II for "The period."

⁴⁰ Added by Act 25 of 1954, s. 11.

57. Night shifts.—Where a worker in a factory works on a shift which extends beyond midnight,—

- (a) for the purposes of sections 52 and 53, a holiday for a whole day shall mean in his case a period of twenty-four consecutive hours beginning when his shift ends;
- (b) the following day for him shall be deemed to be the period of twenty-four hours beginning when such shift ends, and the hours he has worked after midnight shall be counted in the previous day.

58. Prohibition of overlapping shifts.—(1) Work shall not be carried on in any factory by means of a system of shifts so arranged that more than one relay of workers is engaged in work of the same kind at the same time.

⁴¹[(2) The State Government or subject to the control of the State Government, the Chief Inspector, may, by written order and for the reasons specified therein, exempt on such conditions as may be deemed expedient, any factory or class or description of factories or any department or section of a factory or any category or description of workers therein from the provisions of sub-section (1).]

59. Extra wages for overtime.—(1) Where a worker works in a factory for more than nine hours in any day or for more than forty-eight hours in any week, he shall, in respect of overtime work, be entitled to wages at the rate of twice his ordinary rate of wages.

(2) Where any workers in a factory are paid on a piece rate basis, the ⁴²[State] Government, in consultation with the employer concerned, and the representatives of the workers shall, for the purposes of this section, fix time rates as nearly as possible equivalent to the average rate of earnings of those workers, and the rates so fixed shall be deemed to be the ordinary rates of wages of those workers.

(3) For the purposes of this section, “ordinary rate of wages” means the basic wages plus such allowances, including the cash equivalent of the advantage accruing through the concessional sale to workers of foodgrains and other articles, as the worker is for the time being entitled to, but does not include a bonus.

⁴³[(4) The cash equivalent of the advantage accruing through the concessional sale to a worker of foodgrains and other articles shall be computed as often as may be prescribed on the basis of the maximum quantity of foodgrains and other articles admissible to a standard family.

Explanation 1.—“Standard family” means a family consisting of the worker, his or her spouse and two children below the age of fourteen years requiring in all three adult consumption units.

Explanation 2.—“Adult consumption unit” means the consumption unit of a male above the age of fourteen years; and the consumption unit of a female above the age of fourteen years and that of a child below the age of fourteen years shall be calculated at the rates of .8 and .6 respectively of one adult consumption unit.

(5) The State Government may make rules prescribing—

- (a) the manner in which the cash equivalent of the advantage accruing through the concessional sale to a worker of foodgrains and other articles shall be computed; and
- (b) the registers that shall be maintained in a factory for the purpose of securing compliance with the provisions of this section.]

⁴¹ Subs. by Act 25 of 1954, s. 12.

⁴² Subs. by the A. O. 1950 for “Provincial.”

⁴³ Subs. by Act 25 of 1954, s. 13.

60. Restriction on double employment.—No adult worker shall be required or allowed to work in any factory on any day on which he has already been working in any other factory, save in such circumstances as may be prescribed.

61. Notice of periods of work for adults.—(1) There shall be displayed and correctly maintained in every factory in accordance with the provisions of sub-section (2) of section 108, a notice of periods of work for adults, showing clearly for every day the periods during which adult workers may be required to work.

(2) The periods shown in the notice required by sub-section (1) shall be fixed beforehand in accordance with the following provisions of this section, and shall be such that workers working for those periods would not be working in contravention of any of the provisions of sections 51, 52, 54, ⁴⁴[55, 56 and 58.]

(3) Where all the adult workers in a factory are required to work during the same periods, the manager of the factory shall fix those periods for such workers generally.

(4) Where all the adult workers in a factory are not required to work during the same periods, the manager of the factory shall classify them into groups according to the nature of their work indicating the number of workers in each group.

(5) For each group which is not required to work on a system of shifts, the manager of the factory shall fix the periods during which the group may be required to work.

(6) Where any group is required to work on a system of shifts and the relays are not to be subject to predetermined periodical changes of shifts, the manager of the factory shall fix the periods during which each relay of the group may be required to work.

(7) Where any group is to work on a system of shifts and the relays are to be subject to predetermined periodical changes of shifts, the manager of the factory shall draw up a scheme of shifts whereunder the periods during which any relay of the group may be required to work and the relay which will be working at any time of the day shall be known for any day.

(8) The ⁴⁵[State] Government may prescribe forms of the notice required by sub-section (1) and the manner in which it shall be maintained.

(9) In the case of a factory beginning work after the commencement of this Act, a copy of the notice referred to in sub-section (1) shall be sent in duplicate to the Inspector before the day on which work is begun in the factory.

(10) Any proposed change in the system of work in any factory which will necessitate a change in the notice referred to in sub-section (1) shall be notified to the Inspector in duplicate before the change is made, and except with the previous sanction of the Inspector, no such change shall be made until one week has elapsed since the last change.

62. Register of adult workers.—(1) The manager of every factory shall maintain a register of adult workers, to be available to the Inspector at all times during working hours, or when any work is being carried on in the factory, showing—

- (a) the name of each adult worker in the factory;
- (b) the nature of his work;
- (c) the group, if any, in which he is included;
- (d) where his group works on shifts, the relay to which he is allotted;
- (e) such other particulars as may be prescribed:

Provided that, if the Inspector is of opinion that any muster roll or register maintained as part of the routine of a factory gives in respect of any or all the workers in the factory the particulars required under this section, he may, by

⁴⁴ Subs. by Act 25 of 1954, s. 14 for " 55 and 56."

⁴⁵ Subs. by A. O. 1950 for " Provincial."

order in writing, direct that such muster roll or register shall to the corresponding extent be maintained in place of, and be treated as, the register of adult workers in that factory.

(2) The ⁴⁶[State] Government may prescribe the form of the register of adult workers, the manner in which it shall be maintained and the period for which it shall be preserved.

63. Hours of work to correspond with notice under section 61 and register under section 62.—No adult worker shall be required or allowed to work in any factory otherwise than in accordance with the notice of periods of work for adults displayed in the factory and the entries made beforehand against his name in the register of adult workers of the factory.

64. Power to make exempting rules.—(1) The ⁴⁶[State] Government may make rules defining the persons who hold positions of supervision or management or are employed in a confidential position in a factory, and the provisions of this Chapter, other than the provisions of clause (b) of sub-section (1) of section 66 and of the proviso to that sub-section, shall not apply to any person so defined.

(2) The ⁴⁶[State] Government may make rules in respect of adult workers in factories providing for the exemption, to such extent and subject to such conditions as may be prescribed—

- (a) of workers engaged on urgent repairs, from the provisions of sections 51, 54, 55 and 56;
- (b) of workers engaged in work in the nature of preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the factory, from the provisions of sections 51, 54, 55 and 56;
- (c) of workers engaged in work which is necessarily so intermittent that the intervals during which they do not work while on duty ordinarily amount to more than the intervals for rest required by or under section 55, from the provisions of sections 51, 54, 55 and 56;
- (d) of workers engaged in any work which for technical reasons must be carried on continuously ⁴⁷* * * from the provisions of sections 51, 52, 54, 55 and 56;
- (e) of workers engaged in making or supplying articles of prime necessity which must be made or supplied every day, from the provisions of section 52;
- (f) of workers engaged in a manufacturing process which cannot be carried on except during fixed seasons, from the provisions of section 52;
- (g) of workers engaged in a manufacturing process which cannot be carried on except at times dependent on the irregular action of natural forces, from the provisions of sections 52 and 55;
- (h) of workers engaged in engine-rooms or boiler-houses or in attending to power-plant or transmission machinery, from the provisions of section 52;
- ⁴⁸[(i) of workers engaged in the printing of newspapers, who are held up on account of the breakdown of machinery, from the provisions of sections 51, 54 and 56.

Explanation.—In this clause the expression “news-papers” has the meaning assigned to it in the Press and Registration of Books Act, 1867 (XXV of 1867);

- (j) of workers engaged in the loading or unloading of railway wagons, from the provisions of sections 51, 52, 54, 55 and 56.]

⁴⁶ Subs. by the A. O. 1950, for “Provincial.”

⁴⁷ The word “throughout the day” omitted by Act 25 of 1954, s. 15.

⁴⁸ Added, *ibid*, s. 15.

(3) Rules made under sub-section (2) providing for any exemption may also provide for any consequential exemption from the provisions of section 61 which the ⁴⁹[State] Government may deem to be expedient, subject to such conditions as it may prescribe.

⁵⁰[(4) In making rules under this section, the State Government shall not exceed, except in respect of exemption under clause (a) of sub-section (2), the following limits of work inclusive of overtime:—

- (i) the total number of hours of work in any day shall not exceed ten;
- (ii) the spreadover, inclusive of intervals for rest, shall not exceed twelve hours in any one day;

Provided that the State Government may, in respect of any or all of the categories of workers referred to in clause (d) of sub-section (2), make rules prescribing the circumstances in which, and the conditions subject to which, the restrictions imposed by clause (i) and clause (ii) shall not apply in order to enable a shift worker to work the whole or part of a subsequent shift in the absence of a worker who has failed to report for duty;

- (iii) the total number of hours of overtime shall not exceed fifty for any one quarter.

Explanation.—"Quarter" means a period of three consecutive months beginning on the 1st of January, the 1st of April, the 1st of July or the 1st of October.]

(5) Rules made under this section shall remain in force for not more than three years.

65. Power to make exempting orders.—(1) Where the ⁴⁹[State] Government is satisfied that, owing to the nature of the work carried on or to other circumstances, it is unreasonable to require that the periods of work of any adult workers in any factory or class or description of factories should be fixed beforehand it may, by written order, relax or modify the provisions of sections 61 in respect of such workers therein, to such extent and in such manner as it may think fit, and subject to such conditions as it may deem expedient to ensure control over periods of work.

(2) The ⁴⁹[State] Government or, subject to the control of the ⁴⁹[State] Government, the Chief Inspector, may by written order exempt, on such conditions as it or he may deem expedient, any or all of the adult workers in any factory or group or class or description of factories from any or all of the provisions of sections 51, 52, 54 and 56 on the ground that the exemption is required to enable the factory or factories to deal with an exceptional press of work.

(3) Any exemption given under sub-section (2) in respect of ⁵¹[working hours] shall be subject to the maximum limits prescribed under sub-section (4) of section 64.

(4) No factory shall be exempted under sub-section (2) for a period or periods exceeding in the aggregate three months in any year.

66. Further restrictions on employment of women.—(1) The provisions of this Chapter shall, in their application to women in factories, be supplemented by the following further restrictions, namely:—

(a) no exemption from the provisions of section 54 may be granted in respect of any woman;

(b) no woman shall be employed, in any factory except between the hours of 6 A.M. and 7 P.M.:

Provided that the ⁴⁹[State] Government may, by notification in the official Gazette, in respect of any class or description of factories, vary the limits laid

⁴⁹ Subs. by the A. O. 1950 for "Provincial."

⁵⁰ Subs. by Act 25 of 1954, s. 15 for the original sub-section (4).

⁵¹ Subs. *ibid*, s. 16 for "weekly hours of work."

down in clause (b), but so that no such variation shall authorise the employment of any woman between the hours of 10 P.M. and 5 A.M.;

⁵²[(c) there shall be no change of shifts except after a weekly holiday or any other holiday.]

(2) The ⁵³[State] Government may make rules providing for the exemption from the restrictions set out in sub-section (1), to such extent and subject to such conditions as it may prescribe, of women working in fish-curing or fish-canning factories, where the employment of women beyond the hours specified in the said restrictions is necessary to prevent damage to, or deterioration in, any raw material.

(3) The rules made under sub-section (2) shall remain in force for not more than three years at a time.

CHAPTER VII.—EMPLOYMENT OF YOUNG PERSONS.

67. Prohibition of employment of young children.—No child who has not completed his fourteenth year shall be required or allowed to work in any factory.

68. Non-adult workers to carry tokens.—A child who has completed his fourteenth year or an adolescent shall not be required or allowed to work in any factory unless—

- (a) a certificate of fitness granted with reference to him under section 69 is in the custody of the manager of the factory, and
- (b) such child or adolescent carries while he is at work a token giving a reference to such certificate.

69. Certificates of fitness.—(1) A certifying surgeon shall, on the application of any young person or his parent or guardian accompanied by a document signed by the manager of a factory that such person will be employed therein if certified to be fit for work in a factory, or on the application of the manager of the factory in which any young person wishes to work, examine such person and ascertain his fitness for work in a factory.

(2) The certifying surgeon, after examination, may grant to such young person, in the prescribed form, or may renew—

- (a) a certificate of fitness to work in a factory as a child, if he is satisfied that the young person has completed his fourteenth year, that he has attained the prescribed physical standards and that he is fit for such work;
- (b) a certificate of fitness to work in a factory as an adult, if he is satisfied that the young person has completed his fifteenth year, and is fit for a full day's work in a factory:

Provided that unless the certifying surgeon has personal knowledge of the place where the young person proposes to work and of the manufacturing process in which he will be employed, he shall not grant or renew a certificate under this sub-section until he has examined such place.

(3) A certificate of fitness granted or renewed under sub-section (2)—

- (a) shall be valid only for a period of twelve months from the date thereof;
- (b) may be made subject to conditions in regard to the nature of the work in which the young person may be employed, or requiring re-examination of the young person before the expiry of the period of twelve months.

(4) A certifying surgeon shall revoke any certificate granted or renewed under sub-section (2) if in his opinion the holder of it is no longer fit to work in the capacity stated therein in a factory.

⁵² Ins. by Act 25 of 1954, s. 17.

⁵³ Subs. by the A. O. 1950, for "Provincial."

(5) Where a certifying surgeon refuses to grant or renew a certificate or a certificate of the kind requested or revokes a certificate, he shall, if so requested by any person who could have applied for the certificate or the renewal thereof, state his reasons in writing for so doing.

(6) Where a certificate under this section with reference to any young person is granted or renewed subject to such conditions as are referred to in clause (b) of sub-section (3), the young person shall not be required or allowed to work in any factory except in accordance with those conditions.

(7) Any fee payable for a certificate under this section shall be paid by the occupier and shall not be recoverable from the young person, his parents or guardian.

70. Effect of certificate of fitness granted to adolescent.—(1) An adolescent who has been granted a certificate of fitness to work in a factory as an adult under clause (b) of sub-section (2) of section 69, and who while at work in a factory carries a token giving reference to the certificate, shall be deemed to be an adult for all the purposes of Chapters VI and VIII.

⁵⁴[Provided that no such adolescent who has not attained the age of seventeen years shall be employed or permitted to work in any factory during night.

Explanation.—For the purpose of this sub-section “night” shall mean a period of at least twelve consecutive hours which shall include an interval of at least seven consecutive hours falling between 10 P.M. and 7 A.M.].

(2) An adolescent who has not been granted a certificate of fitness to work in a factory as an adult under the aforesaid clause (b) shall, notwithstanding his age, be deemed to be a child for all the purposes of this Act.

71. Working hours for children.—(1) No child shall be employed or permitted to work, in any factory.

(a) for more than four and a half hours in any day;

⁵⁵[(b) during the night.

Explanation.—For the purpose of this sub-section “night” shall mean a period of at least twelve consecutive hours which shall include the interval between 10 P.M. and 6 A.M.].

(2) The period of work of all children employed in a factory shall be limited to two shifts which shall not overlap or spread over more than five hours each; and each child shall be employed in only one of the relays which shall not, except with the previous permission in writing of the Chief Inspector, be changed more frequently than once in a period of thirty days.

(3) The provisions of section 52 shall apply also to child workers and no exemption from the provisions of that section may be granted in respect of any child.

(4) No child shall be required or allowed to work in any factory on any day on which he has already been working in another factory.

72. Notice of periods of work for children.—(1) There shall be displayed and correctly maintained in every factory in which children are employed, in accordance with the provisions of sub-section (2) of section 108 a notice of periods of work for children, showing clearly for every day the periods during which children may be required or allowed to work.

(2) The periods shown in the notice required by sub-section (1) shall be fixed beforehand in accordance with the method laid down for adult workers in section 61, and shall be such that children working for those periods would not be working in contravention of any of the provisions of section 71.

⁵⁴ Added by Act 25 of 1954, s. 18.

⁵⁵ Subs. *ibid*, s. 19.

(3) The provisions of sub-sections (8), (9) and (10) of section 61 shall apply also to the notice required by sub-section (1) of this section.

73. Register of child workers.—(1) The manager of every factory in which children are employed shall maintain a register of child workers, to be available to the Inspector at all times during working hours or when any work is being carried on in a factory, showing—

- (a) the name of each child worker in the factory,
- (b) the nature of his work,
- (c) the group, if any, in which he is included,
- (d) where his group works on shifts, the relay to which he is allotted, and
- (e) the number of his certificate of fitness granted under section 69.

(2) The ⁵⁶[State] Government may prescribe the form of the register of child workers, the manner in which it shall be maintained and the period for which it shall be preserved.

74. Hours of work to correspond with notice under section 72 and register under section 73.—No child shall be employed in any factory otherwise than in accordance with the notice of periods of work for children displayed in the factory and the entries made beforehand against his name in the register of child workers of the factory.

75. Power to require medical examination.—Where an Inspector is of opinion—

- (a) that any person working in a factory without a certificate of fitness is a young person, or
- (b) that a young person working in a factory with a certificate of fitness is no longer fit to work in the capacity stated therein,—

he may serve on the manager of the factory a notice requiring that such person or young person, as the case may be, shall be examined by a certifying surgeon, and such person or young person shall not, if the Inspector so directs, be employed, or permitted to work, in any factory until he has been so examined and has been granted a certificate of fitness or a fresh certificate of fitness, as the case may be, under section 69, or has been certified by the certifying surgeon examining him not to be a young person.

76. Power to make rules.—The ⁵⁶[State] Government may make rules—

- (a) prescribing the forms of certificates of fitness to be granted under section 69, providing for the grant of duplicates in the event of loss of the original certificates, and fixing the fees which may be charged for such certificates, and renewals thereof and such duplicates;
- (b) prescribing the physical standards to be attained by children and adolescents working in factories;
- (c) regulating the procedure of certifying surgeons under this Chapter;
- (d) specifying other duties which certifying surgeons may be required to perform in connection with the employment of young persons in factories, and fixing the fees which may be charged for such duties and the persons by whom they shall be payable.

77. Certain other provisions of law not barred.—The provisions of this Chapter shall be in addition to, and not in derogation of, the provisions of the Employment of Children Act, 1938 (XXVI of 1938).

⁵⁶ Subs. by the A. O. 1950, for "Provincial."

57 [CHAPTER VIII

ANNUAL LEAVE WITH WAGES

78. Application of Chapter.—(1) The provisions of this Chapter shall not operate to the prejudice of any right to which a worker may be entitled under any other law or under the terms of any award, agreement or contract of service:

Provided that when such award, agreement or contract of service provides for a longer annual leave with wages than provided in this Chapter, the worker shall be entitled only such longer annual leave.

(2) The provisions of this Chapter shall not apply to workers in any workshop of any railway administered by the Government, who are governed by leave rules approved by the Central Government.

79. Annual leave with wages.—(1) Every worker who has worked for a period of 240 days or more in a factory during a calendar year shall be allowed during the subsequent calendar year, leave with wages for a number of days calculated at the rate of—

- (i) if an adult, one day for every twenty days of work performed by him during the previous calendar year;
- (ii) if a child, one day for every fifteen days of work performed by him during the previous calendar year.

Explanation 1.—For the purpose of this sub-section—

- (a) any days of lay off, by agreement or contract or as permissible under the standing orders;
- (b) in the case of a female worker, maternity leave for any number of days not exceeding twelve weeks; and
- (c) the leave earned in the year prior to that in which the leave is enjoyed; shall be deemed to be days on which the worker has worked in a factory for the purpose of computation of the period of 240 days or more, but he shall not earn leave for these days.

Explanation 2.—The leave admissible under this sub-section shall be exclusive of all holidays whether occurring during or at either end of the period of leave.

(2) A worker whose service commences otherwise than on the first day of January shall be entitled to leave with wages at the rate laid down in clause (i) or, as the case may be, clause (ii) of sub-section (1) if he has worked for two-thirds of the total number of days in the remainder of the calendar year.

(3) If a worker is discharged or dismissed from service during the course of the year he shall be entitled to leave with wages at the rates laid down in sub-section (1) even if he has not worked for the entire period specified in sub-section (1) or sub-section (2) entitling him to earn leave.

(4) In calculating leave under this section, fraction of leave of half a day or more shall be treated as one full day's leave, and fraction of less than half a day shall be omitted.

(5) If a worker does not in any one calendar year take the whole of the leave allowed to him under sub-section (1) or sub-section (2), as the case may be, any leave not taken by him shall be added to the leave to be allowed to him in the succeeding calendar year:

Provided that the total number of days of leave that may be carried forward to a succeeding year shall not exceed thirty in the case of an adult or forty in the case of a child:

Provided further that a worker, who has applied for leave with wages but has not been given such leave in accordance with any scheme laid down in sub-

sections (8) and (9) shall be entitled to carry forward the unavailed leave without any limit.

(6) A worker may at any time apply in writing to the manager of a factory not less than fifteen days before the date on which he wishes his leave to begin, to take all the leave or any portion thereof allowed to him during the calendar year:

Provided that the application shall be made not less than thirty days before the date on which the worker wishes his leave to begin, if he is employed in a public utility service as defined in clause (u) of section 2 of the Industrial Disputes Act, 1947 (XIV of 1947):

Provided further that the number of times in which leave may be taken during any year shall not exceed three.

(7) If a worker wants to avail himself of the leave with wages due to him to cover a period of illness, he shall be granted such leave even if the application for leave is not made within the time specified in sub-section (6); and in such a case wages as admissible under section 81 shall be paid not later than fifteen days, or in the case of a public utility service not later than thirty days from the date of the application for leave.

(8) For the purpose of ensuring the continuity of work, the occupier or manager of the factory, in agreement with the Works Committee of the factory constituted under section 3 of the Industrial Disputes Act, 1947 (XIV of 1947), or a similar Committee constituted under any other Act or if there is no such Works Committee or a similar Committee in the factory, in agreement with the representatives of the workers therein chosen in the prescribed manner, may lodge with the Chief Inspector a scheme in writing whereby the grant of leave allowable under this section may be regulated.

(9) A scheme lodged under sub-section (8) shall be displayed at some conspicuous and convenient places in the factory and shall be in force for a period of twelve months from the date on which it comes into force, and may thereafter, be renewed with or without modification for a further period of twelve months at a time, by the manager in agreement with the Works Committee or a similar Committee, or as the case may be, in agreement with the representatives of the workers as specified in sub-section (8), and a notice of renewal shall be sent to the Chief Inspector before it is renewed.

(10) An application for leave which does not contravene the provisions of sub-section (6) shall not be refused, unless refusal is in accordance with the scheme for the time being in operation under sub-sections (8) and (9).

(11) If the employment of a worker who is entitled to leave under sub-section (1) or sub-section (2), as the case may be, is terminated by the occupier before he has taken the entire leave to which he is entitled, or if having applied for and having not been granted such leave, the worker quits his employment before he has taken the leave, the occupier of the factory shall pay him the amount payable under section 80 in respect of the leave not taken, and such payment shall be made, where the employment of the worker is terminated by the occupier, before the expiry of the second working day after such termination, and where a worker who quits his employment, on or before the next pay day.

(12) The unavailed leave of a worker shall not be taken into consideration in computing the period of any notice required to be given before discharge or dismissal.

80. Wages during leave period.—(1) For the leave allowed to him under section 79, a worker shall be paid at a rate equal to the daily average of his total full time earnings for the days on which he worked during the month imme-

diately preceding his leave, exclusive of any overtime and bonus but inclusive of dearness allowance and the cash equivalent of the advantage accruing through the concessional sale to the worker of food-grains and other articles.

(2) The cash equivalent of the advantage accruing through the concessional sale to the worker of foodgrains and other articles shall be computed as often as may be prescribed, on the basis of the maximum quantity of foodgrains and other articles admissible to a standard family.

Explanation 1.—"Standard family" means a family consisting of a worker, his or her spouse and two children below the age of fourteen years requiring in all three adult consumption units.

Explanation 2.—"Adult consumption unit" means the consumption unit of a male above the age of fourteen years; and the consumption unit of a female above the age fourteen years and that of a child below the age of fourteen years shall be calculated at the rates of .8 and .6 respectively of one adult consumption unit.

(3) The State Government may make rules prescribing—

(a) the manner in which the cash equivalent of the advantage accruing through the concessional sale to a worker of foodgrains and other articles shall be computed; and

(b) the registers that shall be maintained in a factory for the purpose of securing compliance with the provisions of this section.

81. Payment in advance in certain cases.—A worker who has been allowed leave for not less than four days, in the case of an adult, and five days, in the case of a child, shall, before his leave begins, be paid the wages due for the period of the leave allowed.

82. Mode of recovery of unpaid wages.—Any sum required to be paid by an employer, under this Chapter but not paid by him shall be recoverable as delayed wages under the provisions of the Payment of Wages Act, 1936 (IV of 1936).

83. Power to make rules.—The State Government may make rules directing managers of factories to keep registers containing such particulars as may be prescribed and requiring the registers to be made available for examination by Inspectors.

84. Power to exempt factories.—Where the State Government is satisfied that the leave rules applicable to workers in a factory provide benefits which in its opinion are not less favourable than those for which this Chapter makes provision it may, by written order, exempt the factory from all or any of the provisions of this Chapter subject to such conditions as may be specified in the order.]

CHAPTER IX

SPECIAL PROVISIONS

85. Power to apply the Act to certain premises.—(1) The ⁵⁸[State] Government may, by notification in the official Gazette, declare that all or any of the provisions of this Act shall apply to any place wherein a manufacturing process is carried on with or without the aid of power or is so ordinarily carried on, notwithstanding that—

(i) the number of persons employed therein is less than ten, if working with the aid of power and less than twenty if working without the aid of power, or

⁵⁸ Subs. by the A. O. 1950 for "Provincial."

- (ii) the persons working therein are not employed by the owner thereof but are working with the permission of, or under agreement with, such owner:

Provided that the manufacturing process is not being carried on by the owner only with the aid of his family.

(2) After a place is so declared, it shall be deemed to be a factory for the purposes of this Act, and the owner shall be deemed to be the occupier, and any person working therein, a worker.

Explanation.—For the purposes of this section, “owner” shall include a lessee or mortgagee with possession of the premises.

86. Power to exempt public institutions.—The ⁵⁹[State] Government may exempt, subject to such conditions as it may consider necessary, any workshop or workplace where a manufacturing process is carried on and which is attached to a public institution maintained for the purposes of education, training or reformation, from all or any of the provisions of this Act:

Provided that no exemption shall be granted from the provisions relating to hours of work and holidays, unless the persons having the control of the institution submit, for the approval of the ⁵⁹[State] Government, a scheme for the regulation of the hours of employment, intervals for meals, and holidays of the persons employed in or attending the institution or who are inmates of the institution, and the ⁵⁹[State] Government is satisfied that the provisions of the scheme are not less favourable than the corresponding provisions of this Act.

87. Dangerous operations.—Where the ⁵⁹[State] Government is of opinion that any operation carried on in a factory exposes any persons employed in it to a serious risk of bodily injury, poisoning or disease, it may make rules applicable to any factory or class or description of factories in which the operation is carried on—

- (a) specifying the operation and declaring it to be dangerous;
- (b) prohibiting or restricting the employment of women, adolescents or children in the operation;
- (c) providing for the periodical medical examination of persons employed, or seeking to be employed, in the operation, and prohibiting the employment of persons not certified as fit for such employment;
- (d) providing for the protection of all persons employed in the operation or in the vicinity of the places where it is carried on;
- (e) prohibiting, restricting or controlling the use of any specified materials or processes in connection with the operation.

88. Notice of certain accident.—Where in any factory an accident occurs which causes death, or which causes any bodily injury by reason of which the person injured is prevented from working for a period of forty-eight hours or more immediately following the accident, or which is of such nature as may be prescribed in this behalf, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

89. Notice of certain diseases.—(1) Where any worker in a factory contracts any disease specified in the Schedule, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

(2) If any medical practitioner attends on a person who is or has been employed in a factory, and who is, or is believed by the medical practitioner to be, suffering from any disease specified in the Schedule, the medical practitioner

⁵⁹ Subs. by the A. O. 1950, for “Provincial.”

shall without delay send a report in writing to the office of the Chief Inspector stating—

- (a) the name and full postal address of the patient,
- (b) the disease from which he believes the patient to be suffering, and
- (c) the name and address of the factory in which the patient is, or was last, employed.

(3) Where the report under sub-section (2) is confirmed to the satisfaction of the Chief Inspector, by the certificate of a certifying surgeon or otherwise, that the person is suffering from a disease specified in the Schedule, he shall pay to the medical practitioner such fee as may be prescribed, and the fee so paid shall be recoverable as an arrear of land-revenue from the occupier of the factory in which the person contracted the disease.

(4) If any medical practitioner fails to comply with the provisions of sub-section (2), he shall be punishable with fine which may extend to fifty rupees.

90. Power to direct enquiry into cases of accident or disease.—(1) The ⁶⁰[State] Government may, if it considers it expedient so to do, appoint a competent person to inquire into the causes of any accident occurring in a factory or into any case where a disease specified in the Schedule has been, or is suspected to have been, contracted in a factory, and may also appoint one or more persons possessing legal or special knowledge to act as assessors in such inquiry.

(2) The person appointed to hold an enquiry under this section shall have all the powers of a Civil Court under the Code of Civil Procedure, 1908 (V of 1908), for the purposes of enforcing the attendance of witnesses and compelling the production of documents and material objects, and may also, so far as may be necessary for the purposes of the inquiry, exercise any of the powers of an Inspector under this Act; and every person required by the person making the inquiry to furnish any information shall be deemed to be legally bound so to do within the meaning of section 176 of the Indian Penal Code (XLV of 1860).

(3) The person holding an inquiry under this section shall make a report to the ⁶⁰[State] Government stating the causes of the accident, or as the case may be, disease, and any attendant circumstances, and adding any observations which he or any of the assessors may think fit to make.

(4) The ⁶⁰[State] Government may, if it thinks fit, cause to be published any report made under this section or any extracts therefrom.

(5) The ⁶⁰[State] Government may make rules for regulating the procedure at inquiries under this section.

91. Power to take sample.—(1) An Inspector may at any time during the normal working hours of a factory, after informing the occupier or manager of the factory or other person for the time being purporting to be in charge of the factory, take in the manner hereinafter provided a sufficient sample of any substance used or intended to be used in the factory, such use being—

- (a) in the belief of the Inspector in contravention of any of the provisions of this Act or the rules made thereunder, or
- (b) in the opinion of the Inspector likely to cause bodily injury to, or injury to the health of, workers in the factory.

(2) Where the Inspector takes a sample under sub-section (1), he shall, in the presence of the person informed under that sub-section unless such person wilfully absents himself, divide the sample into three portions and effectively seal and suitably mark them, and shall permit such persons to add his own seal and mark thereto.

⁶⁰ Subs. by the A. O. 1950, for "Provincial."

(3) The person informed as aforesaid shall, if the Inspector so requires, provide the appliance for dividing, sealing, and marking the sample taken under this section.

(4) The Inspector shall—

- (a) forthwith give one portion of the sample to the person informed under sub-section (1);
- (b) forthwith send the second portion to a Government Analyst for analysis and report thereon;
- (c) retain the third portion for production to the Court before which proceedings, if any, are instituted in respect of the substance.

(5) Any document purporting to be a report under the hand of any Government Analyst upon any substance submitted to him for analysis and report under this section, may be used as evidence in any proceedings instituted in respect of the substance.

CHAPTER X—PENALTIES AND PROCEDURE

92. General penalty for offences.—Save as is otherwise expressly provided in this Act and subject to the provisions of section 93, if in, or in respect of, any factory there is any contravention of any of the provisions of this Act or of any rule made thereunder or of any order in writing given thereunder, the occupier and manager of the factory shall each be guilty of an offence and punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees or with both, and if the contravention is continued after conviction, with a further fine which may extend to seventy-five rupees for each day on which the contravention is so continued.

⁶¹[**93. Liability of owner of premises in certain circumstances.**—(1) Where in any premises separate buildings are leased to different occupiers for use as separate factories, the owner of the premises shall be responsible for the provision and maintenance of common facilities and services, such as approach roads, drainage, water supply, lighting and sanitation.

(2) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out of the provisions of sub-section (1).

(3) Where in any premises, independent or self-contained, floors or flats are leased to different occupiers for use as separate factories, the owner of the premises shall be liable as if he were the occupier or manager of a factory, for any contravention of the provisions of this Act in respect of—

- (i) latrines, urinals and washing facilities in so far as the maintenance of the common supply of water for these purposes is concerned;
- (ii) fencing of machinery and plant belonging to the owner and not specifically entrusted to the custody or use of an occupier;
- (iii) safe means of access to the floors or flats and maintenance and cleanliness of stair cases and common passages;
- (iv) precautions in case of fire;
- (v) maintenance of hoists and lifts; and
- (vi) maintenance of any other common facilities provided in the premises.

(4) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out the provisions of sub-section (3).

(5) The provisions of sub-section (3) relating to the liability of the owner shall apply where in any premises independent rooms with common latrines,

⁶¹ Subs. by Act 25 of 1954, s. 21.

urinals and washing facilities are leased to different occupiers for use as separate factories:

Provided that the owner shall be responsible also for complying with the requirements relating to the provisions and maintenance of latrines, urinals and washing facilities.

(6) The Chief Inspector shall have, subject to the control of the State Government, the power to issue orders to the owner of the premises referred to in sub-section (5) in respect of the carrying out of the provisions of section 46 or section 48.

(7) Where in any premises portions of a room or a shed are leased to different occupiers for use as separate factories, the owner of the premises shall be liable for any contravention of the provisions of—

(i) Chapter III, except sections 14 and 15;

(ii) Chapter IV, except sections 22, 23, 27, 34, 35 and 36:

Provided that in respect of the provisions of sections 21, 24 and 32 the owner's liability shall be only in so far as such provisions relate to things under his control:

Provided further that the occupier shall be responsible for complying with the provisions of Chapter IV in respect of plant and machinery belonging to or supplied by him;

(iii) section 42.

(8) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out the provisions of sub-section (7).

(9) In respect of sub-sections (5) and (7), while computing for the purposes of any of the provisions of this Act the total number of workers employed, the whole of the premises shall be deemed to be a single factory.]

94. Enhanced penalty after previous conviction.—If any person who has been convicted of any offence punishable under section 92 is again guilty of an offence involving a contravention of the same provision, he shall be punishable on a subsequent conviction with imprisonment for a term which may extend to six months or with fine which may extend to one thousand rupees or with both:

Provided that for the purposes of this section no cognizance shall be taken of any conviction made more than two years before the commission of the offence which is being punished.

95. Penalty for obstructing Inspector.—Whoever wilfully obstructs an Inspector in the exercise of any power conferred on him by or under this Act, or fails to produce on demand by an Inspector any registers or other documents in his custody kept in pursuance of this Act or of any rules made thereunder, or conceals or prevents any workers in a factory from appearing before, or being examined by, an Inspector, shall be punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees or with both.

96. Penalty for wrongfully disclosing results of analysis under section 91.—Whoever except in so far as it may be necessary for the purposes of a prosecution for any offence punishable under this Act, publishes or discloses to any person the results of an analysis made under section 91, shall be punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees, or with both.

97. Offences by workers.—(1) Subject to the provisions of section III, if any worker employed in a factory contravenes any provision of this Act or any rules or orders made thereunder, imposing any duty or liability on workers, he shall be punishable with fine which may extend to twenty rupees.

(2) Where a worker is convicted of an offence punishable under sub-section (1) the occupier or manager of the factory shall not be deemed to be guilty of an

offence in respect of that contravention, unless it is proved that he failed to take all reasonable measures for its prevention.

98. Penalty for using false certificate of fitness.—Whoever knowingly uses or attempts to use, as a certificate of fitness granted to himself under section 70, a certificate granted to another person under that section, or who, having procured such a certificate, knowingly allows it to be used, or an attempt to use it to be made, by another person, shall be punishable with imprisonment for a term which may extend to one month or with fine which may extend to fifty rupees or with both.

99. Penalty for permitting double employment of child.—If a child works in a factory on any day on which he has already been working in another factory, the parent or guardian of the child or the person having custody of or control over him or obtaining any direct benefit from his wages, shall be punishable with fine which may extend to fifty rupees, unless it appears to the Court that the child so worked without the consent or connivance of such parent, guardian or person.

100. Determination of occupier in certain cases.—(1) Where the occupier of a factory is a firm or other association of individuals, any one of the individual partners or members thereof may be prosecuted and punished under this Chapter for any offence for which the occupier of the factory is punishable:

Provided that the firm or association may give notice to the Inspector that it has nominated one of its members, residing within ⁶² * * India to be the occupier of the factory for the purposes of this Chapter, and such individual shall, so long as he is so resident, be deemed to be the occupier of the factory for the purposes of this Chapter, until further notice cancelling his nomination is received by the Inspector or until he ceases to be a partner or member of the firm or association.

(2) Where the occupier of a factory is a Company, any one of the directors thereof, or in the case of a private company, any one of the shareholders thereof, may be prosecuted and punished under this Chapter for any offence for which the occupier of the factory is punishable:

Provided that the Company may give notice to the Inspector that it has nominated a director, or in the case of a private company, a shareholder, who is resident in either case within ⁶² * * India, to be the occupier of the factory for the purposes of this Chapter, and such director or shareholder, as the case may be, shall, so long as he is so resident, be deemed to be the occupier of the factory for the purposes of this Chapter, until further notice cancelling his nomination is received by the Inspector or until he ceases to be a director or shareholder.

(3) Where the owner of any premises or building referred to in section 93 is not an individual, the provisions of this section shall apply to such owner as they apply to occupiers of factories who are not individuals.

101. Exemption of occupier or manager from liability in certain cases.—Where the occupier or manager of a factory is charged with an offence punishable under this Act, he shall be entitled, upon complaint duly made by him and on giving to the prosecutor not less than three clear days' notice in writing of his intention so to do, to have any other person whom he charges as the actual offender brought before the Court at the time appointed for hearing the charge; and if, after the commission of the offence has been proved, the occupier or manager of the factory, as the case may be, proves to the satisfaction of the Court—

(a) that he has used due diligence to enforce the execution of this Act, and

(b) that the said other person committed the offence in question without his knowledge, consent or connivance,—

that other person shall be convicted of the offence and shall be liable to the like punishment as if he were the occupier or manager of the factory, and the occupier

⁶² The words " the Provinces of " were rep. by the A. O. 1950.

or manager, as the case may be, shall be discharged from any liability under this Act in respect of such offence:

Provided that in seeking to prove as aforesaid, the occupier or manager of the factory, as the case may be, may be examined on oath, and his evidence and that of any witness whom he calls in his support shall be subject to cross-examination on behalf of the person he charges as the actual offender and by the prosecutor:

Provided further that, if the person charged as the actual offender by the occupier or manager cannot be brought before the Court at the time appointed for hearing the charge, the Court shall adjourn the hearing from time to time for a period not exceeding three months and if by the end of the said period the person charged as the actual offender cannot still be brought before the Court, the Court shall proceed to hear the charge against the occupier or manager and shall, if the offence be proved, convict the occupier or manager.

102. Power of Court to make orders.—(1) Where the occupier or manager of a factory is convicted of an offence punishable under this Act the Court may, in addition to awarding any punishment, by order in writing require him, within a period specified in the order (which the Court may, if it thinks fit and on application in such behalf, from time to time extend) to take such measures as may be so specified for remedying the matters in respect of which the offence was committed.

(2) Where an order is made under sub-section (1), the occupier or manager of the factory, as the case may be, shall not be liable under this Act in respect of the continuation of the offence during the period or extended period, if any, allowed by the Court, but if, on the expiry of such period or extended period, as the case may be, the order of the Court has not been fully complied with, the occupier or manager, as the case may be, shall be deemed to have committed a further offence, and may be sentenced therefor by the Court to undergo imprisonment for a term which may extend to six months or to pay a fine which may extend to one hundred rupees for every day after such expiry on which the order has not been complied with, or both to undergo such imprisonment and to pay such fine, as aforesaid.

103. Presumption as to employment.—If a person is found in a factory at any time, except during intervals for meals or rest, when work is going on or the machinery is in motion, he shall until the contrary is proved, be deemed for the purposes of this Act and the rules made thereunder to have been at that time employed in the factory.

104. Onus as to age.—(1) When any act or omission would, if a person were under a certain age, be an offence punishable under this Act, and such person is in the opinion of the Court *prima facie* under such age, the burden shall be on the accused to prove that such person is not under such age.

(2) A declaration in writing by a certifying surgeon relating to a worker that he has personally examined him and believes him to be under the age stated in such declaration shall, for the purposes of this Act and the rules made thereunder, be admissible as evidence of the age of that worker.

105. Cognizance of offences.—(1) No Court shall take cognizance of any offence under this Act except on complaint by, or with the previous sanction in writing of, an Inspector.

(2) No Court below that of a Presidency Magistrate or of a Magistrate of the first class shall try any offence punishable under this Act.

106. Limitation of prosecution.—No Court shall take cognizance of any offence punishable under this Act unless complaint thereof is made within three

months of the date on which the alleged commission of the offence came to the knowledge of an Inspector:

Provided that where the offence consists of disobeying a written order made by an Inspector, complaint thereof may be made within six months of the date on which the offence is alleged to have been committed.

CHAPTER XI.—SUPPLEMENTAL.

107. Appeals.—(1) The manager of a factory on whom an order in writing by an Inspector has been served under the provisions of this Act or the occupier of the factory may, within thirty days of the service of the order, appeal against it to the prescribed authority, and such authority may, subject to rules made in this behalf by the ⁶³[State] Government, confirm, modify or reverse the order.

(2) Subject to rules made in this behalf by the ⁶³[State] Government (which may prescribe classes of appeals which shall not be heard with the aid of assessors), the appellate authority may, or if so required in the petition of appeal shall, hear the appeal with the aid of assessors, one of whom shall be appointed by the appellate authority and the other by such body representing the industry concerned as may be prescribed:

Provided that if no assessor is appointed by such body before the time fixed for hearing the appeal, or if the assessor so appointed fails to attend the hearing at such time, the appellate authority may, unless satisfied that the failure to attend is due to sufficient cause, proceed to hear the appeal without the aid of such assessor or, if it thinks fit, without the aid of any assessor.

(3) Subject to such rules as the ⁶³[State] Government may make in this behalf and subject to such conditions as to partial compliance or the adoption of temporary measures as the appellate authority may in any case think fit to impose, the appellate authority may, if it thinks fit, suspend the order appealed against pending the decision of the appeal.

108. Display of notices.—(1) In addition to the notices required to be displayed in any factory by or under this Act, there shall be displayed in every factory a notice containing such abstracts of this Act and of the rules made thereunder as may be prescribed and also the name and address of the Inspector and the certifying surgeon.

(2) All notices required by or under this Act to be displayed in a factory shall be in English and in a language understood by the majority of the workers in the factory, and shall be displayed at some conspicuous and convenient place at or near the main entrance to the factory, and shall be maintained in a clean and legible condition.

(3) The Chief Inspector may, by order in writing served on the manager of any factory, require that there shall be displayed in the factory any other notice or poster relating to the health, safety or welfare of the workers in the factory.

109. Service of notices.—The ⁶³[State] Government may make rules prescribing the manner of the service of orders under this Act on owners, occupiers or managers of factories.

110. Returns.—The ⁶³[State] Government may make rules requiring owners, occupiers or managers of factories to submit such returns, occasional or periodical, as may in its opinion be required for the purposes of this Act.

111. Obligations of workers.—(1) No worker in a factory—

(a) shall wilfully interfere with or misuse any appliance, convenience or other thing provided in a factory for the purposes of securing the health, safety or welfare of the workers therein;

⁶³ Subs. by the A. O. 1950, for " Provincial."

- (b) shall wilfully and without reasonable cause do anything likely to endanger himself or others; and
- (c) shall wilfully neglect to make use of any appliance or other thing provided in the factory for the purposes of securing the health or safety of the workers therein.

(2) If any worker employed in a factory contravenes any of the provisions of this section or of any rule or order made thereunder, he shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to one hundred rupees, or with both.

112. General power to make rules.—The ⁶⁴[State] Government may make rules providing for any matter which, under any of the provisions of this Act, is to be or may be prescribed or which may be considered expedient in order to give effect to the purposes of this Act.

113. Powers of Centre to give directions.—The Central Government may give directions to a ⁶⁴[State] Government as to the carrying into execution of the provisions of this Act.

114. No charge for facilities and conveniences.—Subject to the provisions of section 46 no fee or charge shall be realised from any worker in respect of any arrangements or facilities to be provided, or any equipment or appliances to be supplied by the occupier under the provisions of this Act.

115. Publication of rules.—All rules made under this Act shall be published in the Official Gazette, and shall be subject to the condition of previous publication; and the date to be specified under clause (3) of section 23 of the General Clauses Act, 1897 (X of 1897), shall be not less than three months from the date on which the draft of the proposed rules was published.

116. Application of Act to Government factories.—Unless otherwise provided this Act shall apply to factories belonging to the Central or any ⁶⁴[State] Government.

117. Protection to persons acting under this Act.—No suit, prosecution or other legal proceeding shall lie against any person for anything which is in good faith done or intended to be done under this Act.

118. Restriction on disclosure of information.—(1) No Inspector shall, while in service or after leaving the service, disclose otherwise than in connection with the execution, or for the purposes, of this Act any information relating to any manufacturing or commercial business or any working process which may come to his knowledge in the course of his official duties.

(2) Nothing in sub-section (1) shall apply to any disclosure of information made with the previous consent in writing of the owner of such business or process or for the purposes of any legal proceeding (including arbitration) pursuant to this Act or of any criminal proceedings which may be taken, whether pursuant to this Act or otherwise, or for the purposes of any report of such proceedings as aforesaid.

(3) If any Inspector contravenes the provisions of sub-section (1) he shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to one thousand rupees, or with both.

119. Amendment of section 3, Act XXVI of 1938.—[*Rep. by the Repealing and Amending Act, 1950 (XXXV of 1950), S. 2 and Sch. I.*]

120. Repeal and Savings.—The enactments set out in the Table appended to this section are hereby repealed:

Provided that anything done under the said enactments which could have been done under this Act if it had then been in force shall be deemed to have been done under this Act.

⁶⁴ Subs. by the A. O. 1950, for "Provincial."

Table—Enactments repealed. [Repealed]

The Schedule.—(See Sections 89 and 90.)

List of Notifiable Diseases.

1. Lead poisoning, including poisoning by any preparation or compound of lead or their sequelae.
2. Lead tetra-ethyl poisoning.
3. Phosphorous poisoning or its sequelae.
4. Mercury poisoning or its sequelae.
5. Manganese poisoning or its sequelae.
6. Arsenic poisoning or its sequelae.
7. Poisoning by nitrous fumes.
8. Carbon bisulphide poisoning.
9. Benzene poisoning, including poisoning by any of its homologues, their nitro or anido derivatives or its sequelae.
10. Chrome ulceration or its sequelae.
11. Anthrax.
12. Silicosis.
13. Poisoning by halogens or halogen derivatives of the hydro-carbons of the aliphatic series.
14. Pathological manifestations due to—
 - (a) radium or other radio-active substances.
 - (b) X-rays.
15. Primary epitheliomatous cancer of the skin.
16. Toxic anaemia.
17. Toxic jaundice due to poisonous substances.

**A GUIDE TO THE SAFETY PROVISIONS OF
THE FACTORIES ACT, 1948**

Arrangement of Paragraphs

- Introduction.
- Responsibility of Occupier.
- Fencing of Machinery.
- Approach to Unfenced Machinery.
- Training of Young Persons working at certain Machines.
- Additional Safeguards in connection with Transmission Machinery.
- Fencing of Materials or Articles in Machines.
- Self-acting Machines.
- Cleaning, etc. of Machinery by Women or Children.
- Construction and Sale of New Machinery.
- Hoists and Lifts.

Cranes and other Lifting Machines.

Examination of Plant or Machinery by a "Competent Person."

Precautions against Dust Explosions.

Welding, Soldering, etc., on Plant, Tanks or Vessels.

Confined Spaces where Dangerous Fumes are liable to be present.

Protection of Eyes.

Revolving Wheels, Vessels, etc.

Pressure Plant.

Precautions against Falls.

Lifting Excessive Weights.

Fire—Means of Escape, etc.

Safety of Buildings, Machinery, etc.

Penalty for Offences.

Powers of Provincial Governments

¹A GUIDE TO THE SAFETY PROVISIONS OF THE FACTORIES ACT, 1948

Introduction

The Factories Act, 1948, contains many new safety provisions of a high standard based on modern industrial practice, and the purpose of this pamphlet is to explain briefly and in simple non-legal language how some of these provisions are designed to meet certain types of danger, and to help employers and others concerned to find the changes or additions in the law which will affect them.

The Act does not come into force until 1st April 1949, but some considerable alteration of plant and equipment may be necessary in a number of cases, and employers would be well advised to read the relevant sections of the Act now, if they have not already done so, and to obtain any necessary expert advice, with a view to seeing that their factories are in conformity with the new law by this date. This pamphlet is intended only as a guide or pointer, and for detailed information as to the precise requirements, the reader is referred to the Act itself.

Responsibility of Occupier

Before considering the various safety provisions of the new Act, there is a very important point to note regarding the responsibility which the law now requires the factory occupier to take for the safety of his work-people.

In the past an Inspector visited a factory and notified to the occupier that certain parts of machinery or plant were dangerous and required him to provide suitable safeguards. This procedure tend to encourage some occupiers to leave their machines unfenced until the Inspector called and gave specific instructions in the matter. It is not, however, possible for the Inspectorate to arrange frequent visits to every individual factory, and the result has been that very serious accidents occurred on machinery which was unfenced, simply because the occupier did not consider it to be dangerous or the Inspector had not visited and directed him.

The new law changes the procedure completely and, from now on the responsibility for safety matters is placed squarely on the shoulders of the occupier. In other words, the occupier must comply with the safety provisions of the Act

¹ This Guide was issued by the Chief Adviser, Factories, Ministry of Labour, Government of India, after the Factories Act was passed in 1948.

without waiting for an Inspector to visit and give instructions for what ought to be done.

Many occupiers emphasise the difficulty of securing the proper maintenance of guards throughout a large factory, especially when work-people are opposed or indifferent to their use, and have expressed the opinion that, when guards have been provided, and the work-people told to use them, the work-people themselves should be held responsible if the guards are not used. The difficulties experienced by employers in this matter are recognised and credit is due to many of them for the useful work they have done in overcoming active opposition or passive negligence on the part of the work-people. But, although the moral blame for neglect to maintain or use a guard may sometimes rest with the worker, the necessity of maintaining the legal responsibility, which is placed by the Act on the occupier, must be emphasised. The supervision of guards is a matter requiring daily attention, and however large the staff of Factory Inspectors, it is clearly impracticable for them to exercise this detailed supervision. Only persons who are in the factory from day to day can see that guards are properly maintained, and unless the employer under this duty, there are no means of ensuring that this important provision will be observed. Accordingly, the Act places the responsibility upon the occupier and expects him to secure compliance with the legal requirement by discipline among his employees. It should be noted, however, that the affixing of notices or the giving of perfunctory instructions does not fulfil the employer's obligation: he is required to use as much diligence to see that guards are maintained as he naturally exercises to see that his work-people turn out satisfactory work. And, if he shows himself determined to secure the use and maintenance of guards by a persevering use of his disciplinary powers, he can effect this object.

Finally, the occupier is reminded that the Inspectors are always available for consultation and in any cases of doubt or difficulty he should not hesitate to call for their assistance. They will continue, as heretofore, to pay periodical visits to every factory, and at these visits they will advise as to the suitability of the guards provided, indicate dangerous parts that may have been overlooked, discuss methods of guarding particular machines and, in general, assist the occupier to secure compliance with the various requirements of the Act.

But, and this is a very important point for the occupier to note, the requirements of the Act are absolute and are in no way dependent upon previous notice or warning from the Inspector.

Fencing of Machinery

In regard to the fencing of machinery the general principle is that every part of the transmission machinery and every *dangerous* part of other machinery must be securely fenced, unless it is in such a position, or of such construction as to be as safe to every person employed or working on the premises as it would be if securely fenced. All parts of electric generators, motors, rotary converters, and flywheels directly connected to them, are also subject to this requirement; while all moving parts of other prime-movers, and fly-wheels directly connected to them, must be securely fenced irrespective of their position, and so must the head and tail race of a water wheel or water turbine. Prime-mover is defined as any engine, motor or other appliance which generates or otherwise provides power; and transmission machinery means any shaft, wheel, drum, pulley, system of pulleys, coupling, clutch, driving belt or other appliance or device by which the motion of a prime-mover is transmitted to or received by any machine or appliance.

Large gear wheels, pulleys, belts, etc. are obviously dangerous when in motion, but *smooth polished shafting* can be just as dangerous, and many accidents happen because the danger is not appreciated. If loose clothing comes in contact with

a shaft it will almost certainly wrap round the shaft and the wearer will be caught and whirled off his feet and either killed or seriously injured. The law requires, therefore, that transmission machinery and dangerous parts of other machinery shall be securely fenced so as to protect not only the ordinary worker employed in the factory every day, but also those engaged on temporary jobs such as painting or whitewashing or carrying out repairs to overhead electric lights and so on.

It will be noted that both transmission machinery, and dangerous parts of other machinery, must be securely fenced, and the question immediately arises: "What is the meaning of 'dangerous' in this context?" The new Act contains no definition and the question is one of fact. In an English High Court it was held that it meant "machinery from which, in the ordinary course of working it, danger may reasonably be anticipated, even if such danger would arise from negligence or some outside source". In practice most dangerous parts can at once be recognised by a person with ordinary imagination and experience after careful examination of the machine in motion.

Approaching Unfenced Machinery—Positional Safety

In the past a good deal of latitude has been allowed as respects occasional approach to unfenced machinery in motion. Under the new Act, this will be much more strictly limited and controlled. If a part of the machinery is left unfenced, on the ground that it is safe by reason of its position, *effective steps must be taken by the factory occupier to prevent anyone from getting within the danger zone while the machinery is running*. There is, however, an exception strictly confined to the case of a person carrying out, while the part of the machinery is in motion, an examination of the machinery which it is necessary to carry out while the machinery is in motion, or such work as the mounting or slipping of belts, lubrication or other adjustment shown by the examination to be necessary while the machinery is in motion. A person so engaged may approach the machinery for any of these purposes, if—

- (a) all belts, screws or other projections and all gearing with which the person would otherwise be likely to come in contact are securely fenced so as to prevent such contact,
- (b) the belt to be mounted or slipped is less than six inches in width and the joint is either laced or flush with the belt.
- (c) the person doing the job is a specially trained adult male worker, wearing tight fitting clothing, and his name is entered in the prescribed register of workers as a person designated for such duties.
- (d) any further precautions laid down in rules made by the Provincial Government are complied with.

The exception does not, as some people may imagine, permit every kind of work to be carried out on unfenced moving machinery provided that it is done by a person as specified in paragraph (c). To make the matter clearer the following test questions should be asked in regard to any proposed operation:—

1. Is it an examination which *must* be carried out while the part is in motion?

Or 2. Is it a lubrication or adjustment, which is shown by such examination to be *really necessary* and *must* it be done while the part is in motion?

Or 3. Is it a lubrication of, or slipping or mounting of belts on, transmission machinery, which cannot be deferred until the machinery is stopped?

If one of these questions cannot be answered unreservedly in the affirmative, the operation proposed is not legal.

When an accident occurs on an unguarded or badly guarded machine, factory occupiers sometimes plead that the machine has been in use for 10, 20 or 30 years and has never previously injured anybody. The assumption appears to be that if a machine has been in use for many years without causing an injury, it cannot really be dangerous—even if eventually it has killed somebody. This assumption which is contrary to common sense and to good safety practice is also contrary to the law. What the Court has to decide, if an occupier is charged with a breach of Section 21(1)(c), is whether at the time of the alleged offence the machinery was dangerous. If it was, its previous history does not affect the issue.

Training and supervision of young persons working at certain machines

This important new Section lays down the principle that a young person must not work at certain dangerous machines unless:—

- (a) he has been fully instructed as to the dangers arising in connection with the machine and the precautions to be observed, and
- (b) he has received sufficient training in work at the machine or is under adequate supervision by a person who has a thorough knowledge and experience of the machine.

It is left to the Provincial Governments to specify the machines to which this Section shall apply and in so doing they will no doubt bear in mind the many distressing accidents which young persons have had on power presses, milling machines, guillotines, platen printing machines and certain types of carding machines.

Additional Safeguards in connection with Transmission Machinery

1. A type of accident associated with overhead shafting is that caused by the dangerous practice of allowing belts to hang idly on a revolving shaft. Such a belt may easily lap on the shaft, and any worker in the immediate vicinity may be caught by it and dragged up around the shafting. This danger is met by a requirement in the Act that a driving belt, when not in use, shall not be allowed to rest or ride on a revolving shaft. Belt hangers or perches should therefore be provided, or the shaft may be sleeved or encased so that the belt can rest on the sleeve or casing.

2. It is obviously very desirable that there should be in every workroom some efficient means of cutting off the power promptly from the machinery. This may be done by fitting fast and loose pulleys, clutches or stop buttons and the provision of such stopping devices is required in every room where electricity is the motive power, and in the case of factories registered after the date of this Act, in all rooms whatever motive power is used. If such devices had been fitted in the past, many accidents to workers engaged in replacing belts on overhead pulleys, or carrying out repairs near overhead shafting, would have been avoided or the severity of the injuries reduced.

3. The dangerous practice of moving running belts by hand from one pulley to another and the unexpected starting of machines because of the belt creeping from the loose to the fast pulley have caused many accidents. A recent example occurred in a leather works where large drums driven by power and revolving on a horizontal axis are used. A worker entered a drum to clean it and when so engaged, the drum turned and trapped his body between the edge of the opening in the drum and part of the fixed structure. His injuries were so serious that he died. Investigations showed that when the belt was on the loose pulley it could, and did in fact, overlap the fast pulley and cause the drum to revolve. The new Act requires that suitable mechanical devices must now be provided and used for moving driving belts, and they must be so constructed that they prevent the belt from creeping.

Fencing of Materials or Articles in Machines

The materials or articles being worked upon in a machine may, when in motion, be quite as dangerous as parts of the machine itself. For example, the stock-bar of a lathe, that is the long bar of metal which passes through the spindle of a hollow spindle lathe, presents the same danger as a revolving shaft, and a worker's clothing or hair are liable to be entangled on it and cause serious or even fatal injuries. All these bars must now be securely fenced by enclosing them in a metal tube or by other equally effective means.

Self-acting Machines

Sometimes a self-acting machine, such as a spinning mule or a metal planing machine, is so placed that when it runs outwards or inwards to its full extent there is very little space left between it and the wall, or a girder, or another machine. If a worker happens to be in that space he is likely to be trapped and severely injured, and in fact many such accidents have happened, and some have proved fatal. To reduce the risk of similar accidents the new law states that no traversing part of a self-acting machine, and no material carried on it, shall be allowed to run within a distance of eighteen inches from any fixed structure, if the space over which it runs is one in which a person is liable to pass.

In the case of machines installed before the 1st April 1949 which do not comply with this requirement, the Chief Inspector has power to permit the continued use of the machine subject to such conditions for ensuring safety as he thinks fit to impose. He might, for example, require the occupier to fence or box-in the space so that it is physically impossible for a person to pass. The emphasis here is on the words "physically impossible" and it should be carefully noted that the Chief Inspector is not likely to accept a flimsy guard or barrier which could readily be removed or broken.

Cleaning, etc. of Machinery by Women and Children

The requirements of the new law are more stringent than the existing law. In future a woman or child will not be allowed to clean, lubricate or adjust any part of machinery in motion or to work between moving parts of machinery in motion. Furthermore, the Provincial Governments have power to extend this prohibition to all persons irrespective of sex or age in any specified factory or class or description of factories.

Construction and Sale of New Machinery

For some years the designers and makers of machines have recognised that proper safeguarding of dangerous parts should be embodied in the design. Unfortunately, this has not always been done. The absence of adequate guarding on new machines has often resulted in accidents to workers, and the purchasers of such machines feel that they have ground for complaint against the makers. The Act introduces a new principle, in that in the case of new machinery intended to be driven by mechanical power, certain requirements as to the sinking or guarding of set-screws, gearing, etc., must be complied with. When the machine is in a factory, the occupier of the factory is responsible for seeing that this is the case; but it is made an offence for any person to sell or let on hire (or as agent for the seller or hirer to cause or procure to be sold or let on hire) for use in a factory in India a machine which does not comply with the requirements.

Hoists and Lifts

Hoists and lifts are responsible for numerous accidents and the new law requires, amongst other things, that every hoist and lift should be properly constructed and maintained, be examined at least every six months by a competent

person, have the hoist well protected, and the doors for the landing openings fitted with interlocking gates; additional safeguards, such as interlocking cage gates are required where persons are carried, whether with goods or otherwise. Provision has, however, been made for exemption to be given in certain cases from some of these requirements.

Cranes and Other Lifting Machines

Important provisions are contained in the new Act relating to the use and maintenance of cranes and other lifting machines. Failure of parts of such machines is another source of many accidents and the new Act now says that all parts must be of good construction and be properly maintained; that they must be thoroughly examined at least once a year by a competent person and that they must not be overloaded. So many workers have been killed or injured by being struck by travelling cranes that a clause has been inserted in the Act requiring effective measures to be taken to ensure that a crane does not approach within 20 feet of any person working on or near the wheel track of the crane. Merely to warn the crane-driver is not sufficient; stop-blocks, detonators and/or cut-outs are more likely to be effective and one or more of these methods should be used.

Examination of Plant and Machinery by a "Competent Person"

In certain Sections of the Act reference is made to a "competent person". For example, Section 28 states that.....every hoist and lift shall be thoroughly examined by a "competent person".....and Section 29 thatevery part of a crane or other lifting machine shall be thoroughly examined by a "competent person".....Occupiers will naturally enquire—who is a competent person for the purpose of examinations under the Act?

The question whether a person who makes an examination is competent for the purpose depends on the circumstances of the case and it is not possible to give an authoritative definition. It may be said, however, that what appears to be contemplated is that the person should have such practical and theoretical knowledge and actual experience of the type of machinery and plant which he has to examine as will enable him to detect defects or weaknesses which it is the purpose of the examination to discover, and to assess their importance in relation to the strength and functions of the particular plant or machinery.

While the occupier of a factory is responsible for selecting a "competent person", the Act does not prohibit a firm from appointing one of their own staff, for example, their chief engineer, provided, of course, that he is competent.

Precautions against Dust Explosions

Amongst the more important new provisions are those directed against the dangers which arise from inflammable dusts, gases and vapours produced or used in industry. Most people know that coal dust is explosive and that this leads to many disasters in coal mines, but it may be a surprise to some to learn that other familiar domestic articles—such as flour, sugar and starch—are also explosive if they are ignited when in the form of a dust cloud. Some of the worst factory disasters have been due to dust explosions. Hence, where inflammable dusts are produced by grinding or other processes, the new Act requires special precautions to be taken, such as enclosing the plant, keeping the rooms free from dust and keeping away naked lights.

Welding, Soldering, etc., on Plant, Tanks or Vessels

Accidents often happen when people attempt to repair empty tanks and other vessels which have contained petrol or other inflammable liquids. In order

to prevent these, the law now requires that, before any welding, soldering, brazing or cutting operation, which involves the application of heat, is carried out on any plant, tank or vessel which has contained any explosive or inflammable substance, all practicable steps must be taken to remove the substance and fumes or to make them non-explosive. Petrol and similar vapours can generally be removed by steaming and ventilating a tank or drum.

Confined Spaces where Dangerous Fumes are Liable to be Present

New provisions are introduced which apply to a wide variety of places and plant, such as chambers, tanks, pits and pipes, where dangerous fumes are liable to be present to such an extent as to involve the risk of persons being overcome by the fumes. Requirements are laid down as to (a) the provision of effective means of egress such as a manhole of adequate size, (b) prohibiting the use, inside the space, of hand or portable electric light of voltage exceeding 24 volts, and (c) prohibiting the use of any lamp or light, other than those of flame-proof construction, if the dangerous fumes are likely to be inflammable. The Act also prohibits persons from entering such confined spaces unless certain precautions are taken, such as (a) the taking of necessary steps to remove fumes and to prevent fumes from entering and (unless certain conditions are fulfilled) the wearing of a life belt and a breathing apparatus, (b) the provision and periodical inspection of breathing apparatus, reviving apparatus, and belts and ropes, (c) the training of persons in the use of the apparatus and in artificial respiration. Provision has been made to grant exemption in certain cases and to specify minimum dimensions of manholes.

Protection of Eyes

A great many accidents causing eye injuries occur in factories every year. A large proportion of these accidents arise from the use of hand tools, lathes and grinding wheels. Under the new Act power has been given to Provincial Governments to prescribe the provision of effective screens or suitable goggles for the protection of persons employed on certain processes or in the immediate vicinity of the processes. Also, a new Section in the Act expressly requires the workers to use protective devices. Very often the individual worker seems obsessed with the idea that screens and goggles, for example, are not necessary in his case. An interesting instance of this came to light recently. Two men were grinding metal articles on the two emery wheels of a double-ended grinder. One was wearing goggles but the other man's goggles were lying in a box in front of the machine. When asked why he was not wearing them like his mate, he replied, "Oh, he's only got one eye". The first man had in fact lost his eye when not wearing goggles on this grinding work.

Revolving Wheels, Vessels, etc.

Anybody who has seen the havoc wrought by a burst fly-wheel or who has personal knowledge of an accident due to the failure of an abrasive wheel, etc. will readily agree that the Section of the Act dealing with revolving wheels and vessels is an important one. This Section lays down that effective steps shall be taken to ensure that the safe working peripheral speed of certain wheels and vessels, such as, flywheels, discs, pulleys, baskets, abrasive wheels, grindstones, etc., shall not be exceeded. It also requires, in the case of abrasive wheels and grindstones, that a notice of the safe speed shall be permanently affixed to each machine.

Pressure Plant

Precautions in respect of machinery or plant working at a pressure above atmospheric pressure are obviously necessary when one considers the danger of an

explosion or failure of the plant in a crowded factory. The Act, therefore, requires precautions to be taken to ensure that the safe working pressure of any such plant is not exceeded. Power has been given to the Provincial Governments to make Rules specifying details of examination and test of pressure plant and to prescribe the provision of such other safety measures as may be necessary. All this is in accordance with modern industrial practice and the precautions are now taken as a matter of course.

Precautions against Falls

Persons falling on the flat or through openings in the floor or into pits or sumps, etc. account for a large proportion of the annual total of non-machinery accidents. Provisions in the new Act are designed to reduce this total by requiring floors, stairs, gangways, etc. to be kept in good order and handrails to be fitted where necessary to secure safety. Pits or tanks or openings in floors which are a source of danger must be covered or securely fenced and there must be safe means of access to every place at which any person is at any time required to work.

Lifting Excessive Weights

Another new provision is that no person shall be employed in a factory to lift, carry or move any load so heavy as to be likely to cause injury to him or her. It also empowers the Provincial Governments to make Rules prescribing the maximum weights that may be lifted, carried or moved by persons employed in factories or in any process carried on in a factory.

Fire—Means of Escape, etc.

The law as to safety provision in case of fire is very much strengthened. The general principle is that every factory must be provided with adequate means of escape in case of fire, and that if a factory is not so provided, an Inspector may serve on the Manager an order specifying the measures which should be taken and requiring them to be carried out before a specified date. The Act then goes on to lay down certain requirements in detail which may be summarized briefly as follows:—

Doors.—Doors of rooms must not be locked or fastened so that they cannot be easily and immediately opened from the inside and, unless they are of the sliding type, they must open outwards.

Fire Exits.—All exits, other than those in ordinary use, must be marked in red letters or by other effective sign.

Audible Warning.—Clearly audible means of giving warning in case of fire must be provided.

Free Passage.—Passage way to fire exits must be kept clear and free from obstructions.

Fire Instruction.—In the following cases (1) where in any factory more than twenty persons are employed in the same building above the ground floor, (2) where in any factory explosive or highly inflammable materials are stored or used, effective steps must be taken to ensure that all the persons employed are familiar with (a) the means of escape and their use, and (b) the routine to be followed in case of fire.

The Provincial Government may make Rules specifying the nature and amount of fire-fighting equipment to be provided in a factory and the means of escape from a factory.

Safety of Buildings, Machinery, etc.

If it appears to an Inspector that any building, part of a building, or part of the ways, machinery or plant in a factory is or may be dangerous to human life or safety, there are three courses of action open to him:—

1. Imminent Danger.—If danger appears to be imminent, he may serve on the factory manager an order in writing prohibiting its use until it has been repaired or altered.

2. Danger not Imminent.—If danger appears to exist but it is not imminent, he may require the factory manager to adopt certain measures before a specified date.

3. Possibility of Danger.—If danger is possible he may require the factory manager to furnish drawings, specifications and other particulars or to carry out certain tests and to inform the Inspector of the results.

Penalty for Offences.

If there is a contravention of the Act, or of any Rule or Order made under the Act, both the factory occupier and the factory manager may be held guilty of an offence and punished with imprisonment for three months, or with a fine of five hundred rupees, or with both. And if the contravention is continued after conviction, a further fine of seventy five rupees may be inflicted on them for each day on which the contravention is continued.

In certain circumstances workpeople are also liable to imprisonment and a fine but, in general, responsibility for securing compliance with the Act and Rules rests with the occupier and factory manager.

Powers of Provincial Governments.

Wide powers have been given to the Provincial Governments to make Rules on matters which may be expedient to give effect to the safety provisions of the Act, *e.g.*, power to require the provision of automatic guards, further fencing of particular machines or articles in motion in machines, and for stopping machines in case of danger, etc. They also have power to grant exemption from compliance with certain requirements of the Act in cases where such compliance is unnecessary or impracticable.

OCCUPATIONAL DISEASES : A GUIDE TO RECOGNITION AND NOTIFICATION¹

Arrangement of Paragraphs

Introduction.

Basic Considerations of Occupational Disease.

Occupational Diseases.

1. Lead Poisoning, including Poisoning by any preparation or Compound of Lead or their Sequelae.
2. Lead Tetra-ethyl Poisoning.
3. Phosphorus Poisoning or its Sequelae.
4. Mercury Poisoning or its Sequelae.

¹ The Factories Act, 1948 has incorporated certain provisions regarding notification of Occupational Diseases and medical supervision in factories. The Chief Adviser, Factories, Government of India, has issued this Guide, about the existence of such diseases and the circumstances under which they arise, for the factory managements and attending medical practitioners who are responsible for notification of Occupational Diseases. The Human Sketches in the Guide, viz., Loci of Clinical Manifestations have not been reproduced here.

5. Manganese Poisoning or its Sequelae.
 6. Arsenic Poisoning or its Sequelae.
 7. Poisoning by Nitrous Fumes.
 8. Carbon Bisulphide Poisoning.
 9. Benzene Poisoning, including Poisoning by any of its Homologues, their Nitro or Amido Derivatives or its Sequelae.
Benzene; Toluene, Xylene; Aniline; Nitrobenzene; Trinitrotoluene.
 10. Chrome Ulceration or its Sequelae.
 11. Anthrax.
 12. Silicosis.
 13. Poisoning by Halogens or Halogen Derivatives of the Hydrocarbons of the Aliphatic Series.
Chlorine; Trichlorethylene; Carbon Tetrachloride; Methyl Bromide.
 14. Pathological Manifestations due to—
(a) Radium or other Radio-Active Substances.
(b) X-Rays.
 15. Primary Epitheliomatous Cancer of the Skin.
 16. Toxic Anaemia.

OCCUPATIONAL DISEASES: A GUIDE TO RECOGNITION AND NOTIFICATION

Introduction

The *Workmen's Compensation Act* has been in force since 1923. Although the Act recognizes 12 Occupational Diseases as compensable, there have been very few claims for compensation for such diseases. There are many reasons for this. Probably the main reason is, as mentioned in a comprehensive report on labour conditions in the country, the failure on the part of industrial management, practising physicians and others concerned, to recognize the diseases in question.

The acceptance of the factor of occupation as a cause of specific disease is further emphasised by the *Factories Act*, 1948 in which is incorporated a schedule of notifiable Occupational Diseases. Notification of the occurrence of these diseases is now compulsory both upon the attending physicians and factory managements. It is only by having the knowledge as to where and under what circumstances the occupational diseases occur, can appropriate steps be taken to prevent the further occurrence of such diseases. A wealth of information on occupational disease prevention is now available as a result of research and investigations carried out in the other industrially advanced countries; this knowledge when applied to conditions in India should be of help in reducing the incidence of occupational diseases. It is to assist all persons concerned with the many sides of this problem that this booklet has been prepared.

For whom the booklet is intended.—This booklet, although written primarily for medical personnel, will, it is hoped, be of interest to many other groups and individuals. The private practitioner, who so often is the first person to see the ailing worker, will obviously be interested in the technical discussions. He, as well as the factory doctor, hospital medical officer, public health medical officer, medical factory inspector, certifying surgeon, and insurance medical officer, may wish to have more than the limited information provided herein. They will find it useful to study the material contained in the carefully selected references relating to the diseases in which they may be primarily interested.

Factory inspectors, labour welfare officers, personnel managers, safety officers and other persons concerned with the well-being of the workers may also find the information presented in the booklet of value in understanding some of the problems they may be faced with in their day-to-day work.

Manner of presentation of the data.—Since the training, experience, and interests vary in the different groups for whom the contents are prepared, the manner of the presentation

² Not included in the Notifiable Diseases mentioned in the Schedule of the *Factories Act*, 1948 but listed in Schedule III of the *Workmen's Compensation Act*, 1923.

has been carefully considered. In the first instance a brief discussion is given of some of the basic principles which are applicable to most of the diseases under consideration. Following this section the diseases themselves are discussed. This is limited, in essence, to those conditions listed in the "Schedule" of the Factories Act, 1948. The only exception is the inclusion of the item "Compressed air illness or its sequelae", which is found in "Schedule III" of the *Workmen's Compensation Act*, 1923, and which is not listed in the "Schedule" of notifiable diseases of the Factories Act, 1948.

Outline followed in describing each occupational disease.—For each of the disease conditions the description will be presented in the following manner, where it is feasible: (1) definition of the disease; (2) name of the causative agent, together with its more common synonyms; (3) the nature of the agent; (4) the occupations (trades or professions) in which exposure to the causative agent or agents may be expected to occur; (5) the metabolism of the agent in relation to its toxicity; (6) pathologic and physiologic action of the agent; (7) a brief description of the clinical syndrome, with special diagnostic features; (8) significant factors in regard to prophylaxis and therapy for each disease.

Basic Considerations of Occupational Disease

Importance of the work history in diagnosis.—There is no organ of the body which cannot be affected by occupational disease. It is reasonable, therefore, to find that the symptoms and signs, that may appear among the manifestations of such diseases, are very often indistinguishable from those symptoms and signs that may occur with other diseases unrelated to occupation. Indeed there are certain diseases which may be occupational or non-occupational dependent upon circumstances, e.g., anthrax, tuberculosis and cancer. Thus, it will be apparent that many difficulties may arise in the diagnosis of occupational disease; more so, if occupation, as a possible cause of illness, is overlooked. Obviously, therefore, in the consideration of the differential diagnosis of occupational disease, it is essential that a proper and complete history of the patient be obtained.

It is not enough to ask the patient for his present occupation only. Many diseases of occupation require months or even many years for their development. It is, therefore, necessary to go back in time and to inquire about his entire work history, beginning with the time that he obtained his first job.

The avenue of entrance of industrial toxic agents into body.—The toxic agents used in industry may enter the body through the skin or the mucous membranes. In either case the predominant action may be local, at the point of contact, or systemic. When the action of the agent is local on the skin, many types of dermatoses may occur.

Local effects.—These may give rise to eczemas (as with exposure to a large host of substances), skin burns (as with exposure to acids or alkalis), acne (as with exposure to paraffin oils), skin anthrax (as with exposure of the broken skin to the *Bacillus anthracis*), and skin cancer (as with exposure to X-rays). When the action is local on the mucous membranes the effects may again be quite variable. One may develop ulceration of the nasal septal lining (as with exposure to certain hexavalent chromium compounds), irritation of the trachea (windpipe) (as with exposure to acid fumes and mist), marked irritation of the lungs (as with exposure to the oxides of nitrogen), inflammation of the eye membranes (as with direct exposure to ultraviolet rays generated in electric arc-welding).

The respiratory tract as the main avenue of entry.—The effects of industrial exposure to toxic materials or conditions may also manifest themselves in organs or tissues remote from the point of initial contact of the agent with the body. In essence, this requires absorption of the agent and its removal to another site in the body to produce disease. Although the skin may serve as an avenue of entrance for a limited number of materials (e.g., X-rays, aniline, lead tetra-ethyl), by far the most important avenue of entry is through the respiratory tract. It is the exposure to the inhalation of dusts, fumes, gases, vapours, or mists of potentially toxic materials that most commonly produces serious systemic disease. The inhaled material is absorbed into the blood and carried to the vulnerable organs to produce the disease.

Although the lungs offer a very large area for absorption of the noxious agents, and by virtue of this fact the respiratory tract becomes the major avenue of entry, the respiratory tract also has mechanisms which work in the opposite direction, to prevent absorption. In the first place the filtering action of the nose, with the nasal hairs and the devious channelling of the air, as it moves against moist surfaces, catches a great part of the larger particulate matter which may then be removed by discharge of the mucus. The vigorous action of the hair-like structures that are present on the mucosal surface of the trachea, as well as the local mucoid secretions, also assist in trapping and removing larger particles. It is only the finer particles, of sizes less than 3–5 microns that can reach the surfaces

of the air-sacs of the lung for possible absorption into the blood from which they may be transported to vulnerable organs.

Ingestion as a minor factor in industrial poisoning.—In general, swallowing of toxic agents is of relatively minor importance in industrial poisonings. Certain factors, however, may permit the digestive tract to contribute a not inconsiderable part to the total dose of the toxic agent which the body may receive. Swallowing of mouth and nasal secretions, chewing of tobacco or betel, eating of meals with hands contaminated with the noxious agent, and eating in workrooms, each may act as a contributory factor, since each one permits the possibility of swallowing of the noxious agent and its introduction into the intestinal tract for possible absorption.

Physical agents.—Mention must be made of the role of physical factors, such as excessive heat, excessive humidity, and radiant energy in the causation of illness in industry. Local action of ultraviolet rays may possibly cause damage to the eye tissues. Ionizing radiation may produce damage to the skin or it may, by its cumulative effect, produce serious damage to other vital organs.

Dosage as a factor in industrial poisoning.—Not all exposures to noxious industrial agents produce disease, either latent or manifest. Dosage is an important factor. To determine if the suspected noxious agent could have been a causative factor in the disease under consideration, one needs to know as to how much of the toxic agent and for how long a time the worker was exposed. The man who has been working in a lead accumulator plant for only one day or one week is unlikely to have developed lead poisoning therefrom. On the other hand, the worker who is employed for perhaps only a few days, without protective equipment, in removing a lead-bearing paint from steel by the use of an acetylene torch will have a tremendous exposure to fumes of lead compounds, and may truly develop symptoms of acute lead poisoning in such a short period of time.

Maximum allowable concentration.—In this latter instance the concentration of the noxious agent in the breathed air, as well as its fine particle size, are of significance in causing poisoning. Clinical experience from many surveys carried out in other countries has led to certain conclusions about the concentrations of noxious agents in air that are necessary to produce illness. The maximum allowable concentrations of many agents permissible in workrooms have been evolved from such data (*e.g.* benzol—25 parts per million parts of air). These values for maximum allowable concentrations are never to be regarded as absolute values, since the data on which they are generally based are not in any sense complete.

Since maximum allowable concentrations are given for an 8-hour work-day, it is obvious that if the daily period of work is longer than eight hours, there will be a proportionate increase in the dosage of the noxious agent received by the worker; conversely, his period of freedom from exposure, during which time he may excrete the poison, will be decreased. Both of these factors may contribute to earlier development of toxic effects, since the industrial poisons are, in many instances, cumulative poisons.

Cumulative action of some industrial poisons.—The cumulative nature of industrial poisons may depend on either an accumulation of the poisons to a toxic amount or to an accumulation of the effects to a level of clinical manifestation. Thus, in the case of exposure to mercury or its inorganic compounds, symptoms will not appear until a toxic level of the material in the body is reached. On the other hand, it appears likely that any amount of benzol will be damaging to the blood forming tissues (in the bone-marrow) and that repeated injuries to that organ finally result in loss of function of the marrow with resultant severe anaemia.

Metabolism as a factor in toxicity.—The cumulative action, however, is modified by the metabolism of the noxious agent. The metabolic process may result in direct detoxification, as with the change of toluol to hippuric acid which is then excreted in the urine as an inert material. Metabolism in the body can act to store the agent. This may result in decreasing or increasing the health hazard, dependent upon the material involved. Thus, a portion of the lead, taken into the body as an inorganic compound, is changed to an organic compound, and conveyed by the blood to the bones, where it is stored in a relatively inert form. This then is slowly excreted through the kidneys. Some of the radioactive elements (*e.g.* radium), however, which may be treated by the body in a like manner, result in serious injury to the bone and to the bone marrow.

The excretion of toxic agents.—Metabolism is, of course associated with excretion of the agents. Such excretory processes, although in general acting to reduce toxic effects by getting rid of the noxious agent from the body, may act to concentrate the noxious effect in the excretory organ itself. In addition to the generally accepted avenues of excretion, namely the urinary and the intestinal tracts, for purposes of the discussion of occupational

disease, the lungs, the skin and its appendages, and the salivary glands must also be considered as excretory organs.

The lungs allow egress of a large part of volatile solvents which it excretes unchanged. In the case of certain metals (tellurium, selenium) volatile organic compounds are formed in the body and these are then excreted in part through the expired air. The intestinal tract not only acts to rid the body of an appreciable portion of those noxious agents that may be swallowed, but some agents (*e.g.* mercury) are actually secreted through the wall and into the large intestine. Not infrequently such secretion results in severe diarrhoea. Some mercury leaves the blood by secretion into the bile which is then excreted into the intestines. The role of the kidney as an excretory organ for such foreign materials as lead, arsenic, and mercury is well known. Less well-known is the excretory function of the urinary tract in connection with the metabolic products of the aniline dye intermediate, beta-naphthylamine, with resultant bladder cancer.

The appendages of the skin (the hair, the finger-nails and toe-nails) are, in a sense, excretory organs for arsenic. The sweat glands excrete organic tellurium compounds, the tellurium having gained entry into the body as an element or as inorganic compounds. Finally, it may be mentioned that mercury is excreted through the salivary glands, and it is by virtue of this fact that gum inflammation is believed to occur.

Occupational Diseases³

1. Lead Poisoning including Poisoning by any preparation of Compound of Lead or their Sequelæ

Definition.—Lead poisoning is a disease due to lead or one or more of its compounds, and is clinically characterized by its effects on the blood-forming organs, the alimentary (digestive) tract, the peripheral and central nervous systems, and the musculo-skeletal system. One or more of these organ systems may be affected. The blood-forming organs are affected with the occurrence of mild to moderate anæmia, the intermittent occurrence in the circulating blood of a stippled appearance of the red blood cells, irregular increase of white blood cells and abnormal blood pigment metabolism. The alimentary tract is affected with the appearance of the Burtonian "line" of the gums, marked constipation, rarely diarrhoea, and acute attacks of abdominal pain. The peripheral nervous system is affected with the appearance of motor neuritis, especially of the radial and peroneal nerves, leading to "wrist drop" and "foot drop" respectively. The central nervous system is affected with the appearance of disease of the brain. The musculo-skeletal system manifestations are muscular atrophies (loss of muscle bulk), joint pains and low back pain. The sequelæ (end results) of lead poisoning may include weakness, joint pains, back pains, and a tendency to the recurrence of acute attacks when, for any reason, there is a drop in alkali reserve of the blood.

Causative agents.—Lead (chemical symbol Pb). Synonym: plumbum.

Lead is a heavy malleable, ductile gray soft metal of low tensile strength. The melting point of lead is 327.4°C., and its boiling point is 1525—1620°C. It is derived commercially mostly by the roasting and reduction of the ore, galena. Industrially metallic lead is very often used as an alloy.

Lead Compounds.

Of the large number of lead compounds known to exist, only a few are of commercial, and therefore, of industrial interest. The more important of these are lead carbonate, lead sulphate, red lead, lead chromate, lead arsenate, litharge, lead peroxide, lead sulphide, lead suboxide, lead sesquioxide, basic lead carbonate, lead acetate, lead chloride, lead nitrate, and lead tetra-ethyl.

Occupations involved.—There is a very large number of occupations in which there is a potential exposure to lead or one or more of its compounds. The more important, in terms of severity of possible exposure, are the following:—

(1) Babbitt-metal handlers; (2) Colour (inorganic) makers; (3) Cable makers; (4) Electrotypers; (5) Glass mixers; (6) Lead burners; (7) Lead-pipe makers; (8) Litharge workers; (9) Red lead workers; (10) Paint makers; (11) Refiners of metals; (12) Storage battery workers; (13) Type melters and (14) White lead makers.

A lesser degree of exposure to lead occurs in the following:—

(1) Brass foundries; (2) Cannery; (3) Compositors; (4) Compounders of rubber; (5) Glaze mixers and dippers; (6) Linotypers; (7) Monotypers; (8) Painters; (9) Paint removers; (10)

³ For the Notice of certain diseases and the List of Notifiable Diseases, see section 89 of the Factories Act, 1948 and the Schedule.

Plumbers; (11) Printers; (12) Solder makers and solderers; (13) Sprayers of trees; (14) Stereotypers and (15) Type foundries.

Metabolism.—In industrial processes, lead and its compounds may enter the body through the respiratory tract, and, to a lesser extent through the gastro-intestinal tract, (An exception is lead tetra-ethyl which may enter the body by absorption through the intact skin. This is treated separately). After absorption from the lung, the lead compound is carried by the blood (95 per cent. in the red blood cells) as an organic compound, from where it is deposited in vital centres to produce its effect. A large part of the lead is, however, deposited in the bony skeleton, especially in the long bones, and a portion is regularly excreted by the kidneys.

Pathogenesis.—Lead poisoning occurs when the critical amount of lead is exceeded in the blood and tissues. The manner in which tissue (and organ) effects are produced by lead in the blood and tissue fluids has not been exactly defined.

Clinical features.—Lead poisoning may become clinically manifest by its effects on the blood, the digestive tract, the peripheral and central nervous systems.

The blood effects include mild to moderate anaemia, irregular increase of white blood cells, intermittent increase of the number of red blood cells showing stippling, and abnormal pigment metabolism. The clinical manifestations which may be associated with these effects are pallor, weakness, and an increase of urinary excretion of porphyrins. The pallor ("yellow-pallor") is marked and is, usually, out of proportion to the degree of anaemia present. It is likely that the pallor is at least partly due to constriction of the superficial blood vessels of the facial skin.

The clinical manifestations in the alimentary tract include the Burtonian "line" of the gums ("lead line"), constipation to severe obstipation, intestinal colic, and nausea and vomiting. The Burtonian "line" consists of a finely granular line of a bluish-black deposit of lead sulphide in the gums a short distance from the gum margin, usually on the outside portion of the gums, although it may also be found on the inside at the bicuspid teeth and first molars. It is generally found when there is bad oral hygiene. It must be distinguished from gum congestion and the normal mucosal pigmentation found in dark-skinned peoples. A similar "line" can be produced by bismuth, and differentiation in such cases will depend upon medical history.

Constipation may be severe, and leads to the continued absorption of any lead compound that may reach the intestinal tract. The practice of providing purgatives routinely to workers exposed to lead is to be deplored, for it is not truly a preventive procedure. Constipation, when it has a high incidence among lead workers, should be considered as an indication of the need for engineering control methods to decrease the exposures.

Intestinal colic, is usually preceded by a few days of marked constipation, loss of appetite, and a sense of abdominal discomfort. The colic starts suddenly with severe spasmodic pains, usually in the lower half of the abdomen, and may last from a few seconds to several minutes, only to recur after some minutes to hours. It is often partially relieved by the patient himself, who applies continued pressure to the area of discomfort, by the use of a pillow or his fists. Although there may be some abdominal tenderness during attacks of colic, commonly there is absence of rigidity of the abdominal wall. The pain is often associated with mild to moderate degrees of symptoms of shock. With treatment, intestinal colic due to lead may be relieved in a few days, otherwise it may go on for weeks.

The peripheral nervous system effect is manifested with inflammation of nerves, usually of the motor portions, ending in varying degrees of paralysis. The radial nerve, and less often the peroneal nerve, is affected, especially that of the right side in right-handed persons. These involvements are clinically expressed by paralysis of the muscles supplied by those nerves, the ultimate effect being wrist drop, and, less frequently, foot drop.

The central nervous system damage is the most serious form of illness due to lead; but, fortunately, this is rare except in poisoning due to lead tetra-ethyl. It is characterized by evidence of irritation of the brain cortex and its lining membranes, and is manifest by headache, dizziness, sleepiness or insomnia, stupor, convulsions, and coma, often terminating fatally. Mania and mental confusion may occur.

The musculo-skeletal system effects may include pain in the large joints, low back pain, and muscular atrophies. The muscular atrophies are, possibly, due to the motor nerve injuries.

Diagnosis.—Since lead poisoning clinically imitates many other medical conditions, the first responsibility of the medical attendant, as with other occupational toxic exposures, is to rule out these other clinical entities. After having done that the following confirmatory

procedures may be performed. In any case, as with other clinical or laboratory procedures generally, these procedures may be used only as links in the chain of evidence.

1. Examination of blood for stippling (granular appearance) of the red blood cells. The finding of such cells in normal individuals, and in persons with anemias, is quite variable (7). What is the most significant in lead absorption is the finding of a progressive increase in the percentage of red blood cells showing this phenomenon. By themselves, therefore, one, or even two, such determinations are of doubtful value.
2. Examination of blood and urine for lead. The extreme average level of normal lead in blood may be taken as 0.09 mg. per 100 grams of blood. The extreme average level of normal lead in urine may be taken as 0.15 mg. per litre. These figures must be treated with caution for much difference of professional opinion exists on their true significance.
3. Examination of urine for porphyrin excretion (8, 9). Due to the abnormal metabolism of blood pigments, said to be due to lead absorption and other clinical entities, the urinary excretion of certain porphyrin fractions is elevated. At the present time this must be considered an experimental procedure until more definite evidence is available of its significance in lead exposures.

Prophylaxis.—Prophylaxis of lead poisoning in those industries handling lead or its compounds must be directed at reducing the chance of inhalation, and possibly ingestion, of lead dust and fume, and will vary depending upon the operation. It may be accomplished by isolating the processes involving the use of lead and its compounds, using totally enclosed processes of handling, instituting local and general exhaust ventilation, and applying wet methods. When the lead in the air of the workroom is reduced to a level of 1.5 mg. or less per 10 cubic meters of air, then it may be considered to be safe.

Provision should be made for the washing of hands before eating, and workers should not be permitted to eat food in the workrooms. Medical control comprises careful observation of the workers' health by periodic medical examination, and periodic examination of urine, and possibly the blood, for their lead levels. Periodic blood examination for stippling of the red blood cells may also be used.

Although it is not intended to discuss at any length the treatment of the industrial diseases, certain points may with advantage be mentioned. In regard to treatment of lead poisoning the process of "deleading" and the recent introduction of dithiopropanol (British anti-lewisite) (10) may be stated. If deleading procedures are instituted they must be done under strict medical supervision. Dithiopropanol therapy in lead poisoning appears to be a useful tool.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in lead poisoning:

1. Blood effects: Moderate anemia, stippling of red blood cells, increase of white blood cells, porphyrinuria, pallor, weakness.
2. Alimentary tract effects: Burtonian (lead) "line" of gums, constipation, intestinal colic.
3. Nervous system effects: Muscle weakness, paralysis (wrist drop, foot drop), headache, dizziness, sleepiness, or insomnia, stupor, convulsions, coma.
4. Musculo-skeletal system effects: Joint pains, muscle atrophies, low-back pain.
5. Miscellaneous: Excessive lead in blood and in urine.

2. Lead Tetra-ethyl Poisoning

Definition.—Lead tetra-ethyl poisoning is a disease due to the inhalation, or absorption through the skin, of lead tetra-ethyl and differs from lead poisoning caused by inorganic compounds of lead in that it is characterized almost entirely by involvement of the central nervous system. Here the effect is essentially an inflammation of the brain and its lining membranes which is manifest by loss of appetite, nightmares, sleeplessness, mania, convulsions and coma, and may end fatally.

Causative agent.—Lead tetra-ethyl. [Chemical symbol $Pb(C_2H_5)_4$. Synonyms: Lead tetraethyl, tetraethyl of lead.

It is a colourless, oily liquid, with a pleasant characteristic odour, and is somewhat volatile at ordinary room temperatures. It has a boiling range of 198–202° C. and is soluble in all organic solvents.

Occupations involved.—Exposure to lead tetra-ethyl may occur among petrol blenders who add the compound to petrol, and tank cleaners engaged in cleaning tanks which had previously contained petrol bearing lead tetra-ethyl. The exposure in the case of petrol

station attendants is insignificant, since "leaded-petrol" contains only about one part of lead tetra-ethyl in 1,000 parts of petrol.

Metabolism.—Lead tetra-ethyl reaches the lung as a vapour and is partially absorbed. By virtue of its solubility in fats (lipoids), it may be absorbed directly through the intact skin from where it is carried by the blood to the brain to produce its effects. Its effects on the brain are also due to its high solubility in lipoids.

Pathogenesis.—Lead tetra-ethyl poisoning has its action almost entirely in the central nervous system, and produces the same clinical effects as described under the central nervous system effects due to "lead and its compounds" (q.v.). In addition to the clinical manifestations described earlier, loss of appetite, insomnia, and nightmares are early evidences of poisoning.

Diagnosis.—The changes in the blood cells described under poisoning by inorganic compounds of lead, are usually not found in cases of absorption of lead tetra-ethyl; nor is a high lead content found in blood.

Prophylaxis.—Prophylaxis must be directed at the prevention of inhalation of the vapour, as well as at the prevention of contact of the liquid itself with the skin or mucous membranes.

3. Phosphorus Poisoning or its Sequelæ

Definition.—Phosphorus poisoning is a disease due to elemental, yellow phosphorus, and is characterized by severe liver injury in the acute form of poisoning, and by severe infection of the bones, especially of the lower jaw, in the chronic form. Only the chronic form of the disease is of industrial importance. The results of chronic phosphorus poisoning include loss of part of the lower jaw bone, or other malformation of the bony structure of the face, scars of the face, and loss of teeth. Death may occur as a consequence of the septic process in the bone.

Causative agent.—Phosphorus (Chemical symbol: P).

There are two forms of elemental phosphorus, yellow and red. Since only the yellow form is toxic, discussion is limited to that form. Yellow phosphorus is a solid, non-metallic element, light yellow (to white) in colour, wax-like, and semi-transparent. It phosphoresces in the dark. It has a distinctive disagreeable odour.

Occupations involved.—Exposure to yellow phosphorus may occur among workers engaged in the manufacture of certain types of explosives. Since yellow phosphorus is not permitted to be used in the manufacture of matches, this formerly most prolific source of phosphorus poisoning no longer exists.

Metabolism.—Little is precisely known about the metabolism of yellow phosphorus. It is suggested by some that the "fumes" (whether they be the oxides of the element or the element itself) find their portal of entry through tooth cavities to produce injury to the jaw bone.

Pathogenesis.—It would appear more likely that the "fumes" are absorbed through the lungs and carried by the blood to the bones where their destructive activity begins. This destructive activity is very likely an irritative action on the Haversian canal systems, causing partial or complete bony obstruction of the local circulation. This resultant loss of nutriment to the bone, aggravated by infection, results in the disease manifestations.

Clinical features.—Industrial phosphorus poisoning is essentially a bone disease, causing increased density and leading to severe infection of bone. Most often the lower jaw, or even the upper jaw, is involved by the destructive process. The earliest sign may be the onset of toothache, followed by severe bone destruction due to bacterial invasion of underlying bone. If surgical removal of the damaged bone is not done, the disease extends, and fistulous tracts develop bringing the pus to the outside. The patient then develops severe weakness and loses weight due to the septic process. Even if surgical removal of the dead bone is done, it may result in loss of bone structure, leading to facial deformity.

Prophylaxis.—The prevention of phosphorus poisoning is effected by engineering and medical control. By engineering control, the air concentration of the fumes is reduced to a minimum. Medical control involves the careful selection and follow-up of workers who must handle phosphorus. Special attention should be paid to the condition of the mouth, and those persons who have untreated tooth cavities, or gingivitis (inflammation of the gums) should not be employed. Periodic monthly examination of the oral structures is advised, and those workers who develop any dental disease should receive immediate treatment.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chronic (industrial) phosphorus poisoning: Toothache, fistula in lower jaw, and symptoms and signs indicating an infective process of the jaw-bone (pain in lower jaw, fever, headache, weakness, malaise).

As a sequel to chronic (industrial) phosphorus poisoning there may be: Loss of teeth, deformity of face, scarring of face.

4. Mercury Poisoning or its Sequelæ

Definition.—Mercury poisoning, industrially, is a disease due to the inhalation of mercury vapour or dust of the compounds of mercury, and is characterized by symptoms and signs of the alimentary tract and the central nervous system. The alimentary tract manifestations include excessive salivation, gingivitis (gum inflammation), and diarrhœa. The effect on the central nervous system may result in weakness, tremors especially of the hands and the tongue which are exaggerated by effort, and the mental abnormality termed erethism. In contra-distinction to the condition in acute mercury poisoning which may occur due to the ingestion of inorganic mercury compounds, usually with suicidal or homicidal intent, kidney disease is an unusual occurrence in industrial mercury poisoning. Organic mercury compounds which have recently found use especially in modern agriculture, have their effect mainly on the central nervous system. The sequelæ of industrial mercury poisoning may include permanent mental disturbances and the loss of teeth.

Causative agent.—Mercury. (Chemical symbol Hg). Synonyms: hydrargyrum, quick-silver.

It is a silvery mobile liquid, with a melting point of 38.85°C. and a boiling point of 357.33°C. At ordinary temperatures and pressures mercury has an appreciable vapour tension, resulting in the appearance of relatively large amounts of its vapour in the air.

Mercury compounds of industrial importance are mercurous nitrate, mercuric sulphide, mercuric chloride, mercury fulminate, mercuric oxide, and several alkyl mercury derivatives.

Occupations involved.—Occupations in which exposure to mercury may occur include the following:—

(1) Barometer makers; (2) Dentists; (3) Explosive cap loaders; (4) Extractors (refiners) of gold and silver; (5) Laboratory workers; (6) Mercury alloy and amalgam makers; (7) Thermometer makers and (8) Wood preservers.

Metabolism.—In mercury exposures in industry, the metal enters the body by inhalation of the vapour from where it is absorbed into the blood and carried to vital centres. Practically all of the mercury so inhaled is absorbed. The same is the case with those compounds of mercury which may appear as dust in industrial environmental air. An appreciable portion of the absorbed mercury is excreted through the kidneys and it is a matter of controversy as to whether or not an estimate of the amount of mercury in the body can be obtained from the urine analysis. Some of the mercury in the body is secreted into the intestines and is excreted in the fæces.

Clinical features.—Mercury and its compounds cause symptoms of the alimentary tract and central nervous system. The effects on the alimentary tract include excessive salivation, gingivitis, loss of teeth, and diarrhœa. The central nervous system effects are manifest by tremor exaggerated by effort and the mental effect, erethism. The tremor is most easily observed in the handwriting. Erethism is a mental condition that is noted by marked shyness, easy blushing and "quick temper" of the individual. A complete change may be noticed in the patient's temperament. He becomes extremely embarrassed if he is watched while at work.

Prophylaxis.—Prevention of industrial poisoning by mercury requires strict adherence to control measures for preventing the inhalation of vapour and dust. Any spillage of mercury that occurs should be immediately cleaned up. The maximum allowable concentration of mercury is considered to be 0.1 mg. per cubic meter of air.

(Human sketch—Locs of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chronic (industrial) mercury poisoning:

1. Alimentary tract effects: Excessive salivation, inflammation of gums, loss of teeth, diarrhœa.
2. Central nervous system effects: Tremor exaggerated by effort, and erethism (a mental condition characterized by shyness, easy blushing, "quick temper", change from normal temperament).

5. Manganese Poisoning or its Sequelæ

Definition.—Manganese poisoning in industry is a disease due to the inhalation of dust or fume of manganese compounds and is characterized by symptoms of the central nervous system, and, less frequently of the liver and lungs. The effect on the central nervous system gives rise to a group of symptoms which simulates the disease paralysis agitans. The effect on the liver is said to be due to the development of cirrhosis (scarring). Persons exposed to manganese compounds are believed to be especially susceptible to attack of pneumonia.

Causative agent.—Manganese (Chemical symbol: Mn).

There is only one compound of manganese that needs consideration as an industrial toxic agent, and that is manganese dioxide. It occurs in nature in the ore, pyrolusite. Manganese dioxide is a black crystalline or amorphous powder. Synonyms: Manganese bioxide, battery manganese, manganese peroxide, and glass makers soap.

Occupations involved.—Industrial exposure to manganese compounds occurs in mining and processing of manganese ore, in dry-cell battery making, and in manganese brick making.

Metabolism.—Manganese is an element which is required in trace amounts in nutrition for the proper functioning of certain enzymes. Most of the manganese that finds its way into the system through food is excreted in the faeces. The minute amounts normally retained are found mostly in the liver, bones and lymph glands. When manganese compounds are inhaled they are absorbed into the circulation and carried to vital centres to produce their effects. Excretion occurs through the kidneys.

Clinical features.—The typical case of manganese poisoning resembles the disease paralysis agitans. Early symptoms are weakness and sleepiness. The individual then develops a characteristically stiff gait, mask-like facial expression, and tremor of the hands, with slow rhythmic movements of the arms and legs. Mental changes may occur and include uncontrollable laughter and mental dulness. A hesitant form of speech may be present. All these signs and symptoms indicate disease of the mid-brain, and at post-mortem examination such areas are actually found to show degeneration.

Prophylaxis.—To prevent manganese poisoning in industry, all efforts must be directed at preventing inhalation of the dust. The maximum allowable concentration of manganese dust in the air of workrooms is relatively a large amount, and is recorded as 6.0 mg. per cubic meter of air. Periodic medical examination will be effective in preventing severe damage in that it will enable the removal from further exposure of those who show early signs of damage.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in manganese poisoning: Weakness, sleepiness, stiff gait, mask-like facial expression, tremor of hands, uncontrollable laughter, mental dulness.

6. Arsenic Poisoning or its Sequelæ

Definition.—Arsenic poisoning in industry is a disease due to the inhalation of arsenic compounds and is characterized by skin changes, inflammation of nerves, anæmia and diarrhoea, and probably an increased tendency to develop cancer. The characteristic skin changes include thickening and peeling of the skin (keratosis), dermatitis and skin cancer.

Arsine gas, one of the arsenic compounds, deserves special consideration since it is not an infrequent cause of industrial poisoning. It produces its effect in an acute form even from a single inhalation, and is characterized by destruction of red blood cells with its attendant phenomena, which may include the presence of hæmoglobin in the urine, jaundice, and severe kidney injury.

Causative agents.—Arsenic (Chemical symbol: As).

Only certain of the arsenical compounds are significant as potential industrial poisons. They are arsenic trioxide (synonyms: arsenious anhydride, white arsenic, and arsenious acid), Paris green (synonyms: copper aceto-arsenite, Imperial green), Scheele's green (synonym: cupric arsenite), lead arsenate and arsine.

Arsine (chemical symbol: AsH_3) is a gas with a characteristic garlic-like odour. It may be produced accidentally when nascent hydrogen is formed from an inorganic acid in the presence of even traces of arsenic occurring as impurities.

Occupations involved.—Industrial exposure to arsenic compounds may occur in the following occupations:—

(1) Brass foundries; (2) Compounders of rubber; (3) Copper foundries; (4) Farmers; (5) Insecticide makers (6) Lead smelters; (7) Painters; (8) Paint makers; (9) Refiners of metals; (10) Sprayers of trees; (11) Sulphuric acid makers and (12) Wood preservers.

Arsine gas may occur in the following occupations:

(1) Hydrochloric acid workers; (2) Picklers of metal (in acid); (3) Storage battery workers and (4) Sulphuric acid workers.

Metabolism.—In industrial arsenic poisoning arsenical compounds enter the body through the lungs as dusts. Arsine is an exception to this. The arsenic is then absorbed into the blood from where it is carried to vital centres to produce the clinical effects. Arsenic is distributed to all the organs and tissues of the body and is found even in the hair and finger-nails.

Arsine, when inhaled, rapidly enters the blood stream and causes destruction of the red blood cells. The arsenic of the compound is excreted largely through the kidneys.

Clinical features.—Clinically excessive absorption of arsenical compounds produces skin, nerve, and gastro-intestinal symptoms. The skin manifestation, which in part may be due to direct contact of the dust, is most often a thickening (keratosis) which may lead to true inflammatory dermatitis. Nerve inflammation is an infrequent finding. Diarrhœa is a manifestation of industrial arsenic poisoning. Cancer incidence has recently been shown to be inordinately high in occupations involving exposure to arsenical compounds.

Arsine produces its effect by causing disintegration of the red blood cells. The hæmoglobin freed in the circulating blood is excreted through the kidneys. This excretion may injure the kidneys. Some of the freed hæmoglobin left in the body may subsequently appear as unexcreted bile pigment, and result in jaundice. Anæmia, when it occurs, is generally moderate.

Prophylaxis.—The prevention of absorption of arsenical compounds is essentially a problem of dust control. In the case of arsine, greater difficulty is encountered since its production is almost invariably an accidental one. The maximum allowable concentration of arsenical compounds, other than arsine, is given as 0.15 mg. per cubic meter of air. The maximum allowable concentration for arsine is stated to be 0.05 parts per million of air.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in arsenic poisoning. Thickness and peeling of the skin, inflammation of the skin, diarrhœa, nerve inflammation, weakness.

The following symptoms and signs may occur in arsine poisoning: Moderate anæmia, jaundice, "bloody urine", evidence of kidney injury (weakness, marked decrease in amount of urine excreted, headache, dizziness, coma).

7. Poisoning due to Nitrous Fumes

Definition.—Poisoning due to nitrous fumes is, industrially, a disease due to a single inhalation of a mixture of certain oxides of nitrogen and is characterized by the development of severe lung irritation and is not infrequently followed by an attack of pneumonia. It is characteristic of the poisoning that the effect on the lungs is delayed by 6—18 hours following the inhalation of the fumes.

Causative agent.—Nitrous fumes. (Synonyms: Oxides of nitrogen, nitrogen oxides).

This is a mixture of several closely related oxides of nitrogen which seldom occur separately in industry, *viz.*, nitric oxide, nitrous anhydride and nitrogen dioxide or tetraoxide. It has a brown colour and a sweetish taste.

Occupations involved.—Nitrous fumes may occur adventitiously in the following occupations: (1) Acid dippers; (2) Blasters; (3) Electroplaters; (4) Engravers; (5) Etchers (metal); (6) Explosive workers; (7) Guncotton workers; (8) Jewellers; (9) Lithographers; (10) Nitric acid workers; (11) Nitocellulose makers; (12) Nitroglycerine makers; (13) Nitrous-oxide workers; (14) Photo-engravers; (15) Picklers (metal); (16) Refiners (metal); (17) Sulphuric acid workers and (18) Welders.

Pathogenesis.—Nitrous fumes reach the depths of the lungs by inhalation. Here they get dissolved giving rise to nitrous and nitric acids which produce the markedly irritant effect. A small portion of the nitrites formed from the nitrous acid is absorbed and this may act upon the hæmoglobin of the blood to form a small amount of methemoglobin, a modified form of oxyhæmoglobin which gives up its oxygen with great difficulty.

The gas produces severe irritation of the lining of the lung air-sacs, by virtue of the nitrates and nitrites that form when the acids are neutralised by the alkaline fluids located on the walls of the air-sacs. This severe irritation results in the secretion of excessive amounts of fluid in the lungs which appears some hours (6-18) after exposure.

Clinical features.—Because of the presence of the secreted fluids in the air-sacs, oxygen absorption from the lungs is impeded. The skin then becomes blue. This is followed by shortness of breath and coughing up of a frothy pink fluid. Shock may occur at this stage. Examination of the lungs will reveal the usual rales (abnormal sounds) of excessive fluid in the lung. Pneumonia very often sets in after recovery from the excessive lung fluid. Either the excessive lung fluid itself or the pneumonia may end fatally.

The effect due to the systemic absorption of the nitrite from the lungs is a minor one, and is usually marked by the lung symptoms. There may be headache, a moderate fall in blood pressure, and a small amount of methemoglobin will be formed.

Prophylaxis.—To prevent inhalation of nitrous fumes care must be taken to ensure that the workers are made aware of the danger. This is important because the accumulation of the gas in the air of the workroom is very often an accidental occurrence. Further, those workers who are known to have inhaled an appreciable air concentration of the gas, should

be placed under medical supervision, and should be confined to bed and receive oxygen even before the clinical effects are apparent. Such treatment will often prevent clinical illness. The maximum allowable concentration of nitrogen oxides (other than nitrous oxide) is 25 parts per million.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in "nitrous fumes" poisoning: A sense of tightness of chest, coughing of frothy pink sputum, shortness of breath, headache, weakness, blue colouration of skin of face.

8. Carbon Bisulphide Poisoning

Definition.—Carbon bisulphide poisoning in industry is a disease due to the repeated inhalation of carbon bisulphide vapour and is characterized by injury to the peripheral nerves and the central nervous system. The peripheral nervous system manifestations appear as inflammation of nerves. The central nervous system may be affected to produce mental changes, especially of the maniacal type. An acute form of poisoning, due to short periods of exposure to high concentrations, may occur, and is characterized by varying degrees of unconsciousness.

Causative agent.—Carbon bisulphide (Chemical symbol: CS_2). Synonym: carbon disulphide.

It is a heavy, colourless liquid, with a rather disagreeable odour. It is highly inflammable and has an appreciably high vapour tension. Its boiling point is 46.3°C , its vapour being heavier than air.

Occupations involved.—The potential occupational sources of exposure to carbon bisulphide are:

(1) Dry cleaners (spotters); (2) Rubber and rubber cement workers and (3) Viscose rayon workers.

Metabolism.—Carbon bisulphide reaches the body as an inhaled vapour and is rapidly absorbed into the blood. The bulk of the solvent is changed to inorganic sulphates, probably in the liver, and is excreted as such in the urine. The remainder is removed in the expired air.

Clinical features.—When exposure occurs due to inhalation of a large air concentration for a brief period of time, the effect is to produce unconsciousness. A single moderate exposure may result in headache, giddiness, nausea, and vomiting.

The more important clinical features from industrial exposure are those which occur following exposure to low concentration for prolonged periods. In such cases, the effects are on the peripheral and central nervous system, to produce, respectively nerve inflammation especially of the motor nerves, and mental symptoms. The latter may manifest itself as depression or mania. Early evidences of damage to the nervous system by fumes of carbon bisulphide include visual disturbances, fatigue, loss of memory, sleeplessness, headache, loss of appetite, and symptoms of irritation of the gastro-intestinal tract.

Prophylaxis.—The dangers to health from fumes of carbon bisulphide are so serious that the solvent is used almost invariably in an enclosed system in industrial processes. In operations where this is not possible, a suitable substitute should be found. Early recognition of clinical effects, and consequent removal from further exposure, often result in the disappearance of many of the symptoms. The maximum allowable concentration for continued exposure is recorded as 20 parts per million of air.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chronic carbon bisulphide poisoning: Paralysis of muscles, fatigue, loss of memory, loss of appetite, headache, symptoms of gastro-intestinal tract irritation, depression (or mania).

9. Benzene Poisoning, Including Poisoning By Any Of Its Homologues, Their Nitro Or Amido Derivatives Or Its Sequelæ

Under this heading may be included, besides benzene, the following homologues of benzene and the following nitro- and amido-derivatives of benzene and their homologues:

1. The industrially important homologues of benzene are toluene and xylene.
2. The nitro-derivatives of benzene and its homologues are legion and are those derivatives of benzene and its homologues which have a nitro-radical attached to one of the carbon atoms of the "ring". Only the following industrially significant nitro-derivatives will be discussed: Nitroaniline, nitrobenzene, and trinitrotoluene.
3. The amido-derivatives of benzene and its homologues are legion and are those derivatives of benzene and its homologues which have an amido-radical attached to one of the carbon atoms of the "ring". Only aniline, an amido-

derivative, will be discussed. Nitroaniline, which is both an amido- and a nitro-derivative of benzene, is discussed under nitro-derivatives of benzene.

Benzene

Definition.—Benzene poisoning in industry is a disease due to the inhalation of benzene (benzol) and may become manifest in either an acute or chronic form. The acute form of benzene poisoning is due to exposure for a short period to high air concentrations of benzene, and is characterized by symptoms of drunkenness to unconsciousness, and may end fatally. The chronic form of poisoning is due to repeated exposure, over weeks or months, to low air concentrations of benzene, and is characterized by varying degrees of leukopenia (fall in white blood cells count), anæmia, or thrombocytopenia (fall in platelet count), or any combination of these.

Causative agent.—Benzene (Chemical symbol: C_6H_6). Synonym: benzol.

It is a light, oily liquid with a rather pleasant odour. It is highly inflammable. Benzene is an excellent solvent for rubber, oils, fats and waxes. It is a coal-tar derivative, but is also found in some petroleum oils.

Occupations involved.—The following occupations have a potential exposure to benzene: (1) Airplane dope workers; (2) Alcohol (denatured) workers; (3) Artificial leather workers; (4) Benzene workers; (5) Can sealers; (6) Coal tar workers; (7) Coke oven workers; (8) Degreasers; (9) Extactors (oils and fats); (10) Gas (illuminating) workers; (11) Lacquer workers; (12) Painters and paint removers; (13) Petroleum refiners; (14) Petrol blenders; (15) Pharmaceutical workers; (16) Printers; (17) Dry cleaners (spotters); (18) Electroplaters; (19) Rubber and rubber cement workers and (20) Waterproof fabric makers.

Metabolism.—Benzene enters the body as a vapour in the inhaled air. It is absorbed into the blood, from where it is carried to vital centres. Its solubility in lipoids (fats) results in the accumulation of appreciable amounts of benzene in fatty tissues. The bulk of inhaled benzene is excreted unchanged through the lungs. Some is changed to a phenolic compound, which then combines with sulphates in the liver, the new compound finally being excreted with the urine.

Pathogenesis.—In acute poisoning benzene acts on the central nervous system, by virtue of its lipid solubility. In chronic poisoning it has its effect on the blood-forming functions of the bone marrow.

Clinical features.—When large air concentrations of benzene are inhaled, they produce drunkenness and varying degrees of unconsciousness which may prove fatal.

In the chronic form of benzene poisoning the predominant effect is the depression of the blood-forming organs. This manifests itself in anæmia, leukopenia, thrombocytopenia, or any combination of these. Examination of the blood shows a moderate to severe fall in red blood cell count and hæmoglobin level, fall in the white blood cell (leucocyte) count, and, less frequently, a fall in platelet count. At this stage of the disease there is weakness, dyspnoea on mild exertion, pallor, and spontaneous bleeding from the nose or mouth and pin head to massive hemorrhages into the skin. The first sign of the disease may be the occurrence of uncontrollable hemorrhage following the extraction of a tooth. Severe infection of the throat may appear as a terminal event.

The earliest evidence of bone marrow effect in chronic benzene poisoning is the appearance of macrocytosis (increased red blood cell volume), with or without mild anæmia. The formerly held concept that a fall of white blood cell count is the first sign of poisoning is no longer tenable. It appears that any of the blood cells may be damaged earliest, but that increase in the volume of the red blood cells appears early. Examination of the blood, therefore, is one of the best diagnostic procedures that will assist in arriving at a correct diagnosis.

Bone marrow examination may be of some assistance. Unfortunately, the microscopic appearance of the marrow is not as characteristic as one would wish. If it shows decreased activity, it is, of course, helpful in diagnosis; but, the bone marrow may also appear normal or show increased activity.

Leukemia (cancer of the white blood cells) as a consequence of benzene poisoning occurs occasionally.

The urine may be examined for the relative proportions of sulphates that are in the organic and in the inorganic forms. This will be of material aid in determining that very recent exposure to benzene had occurred. It does not signify that poisoning is present. Normally, in persons not so exposed, there is a ratio of inorganic to organic urinary sulphates or about 70 per cent to 30 per cent. When exposure has occurred to benzene, the ratio is reversed.

Prophylaxis.—Prevention of acute benzene poisoning requires careful supervision. Workers should not be allowed to enter tanks (or similar receptacles) in which benzene

might have been stored. If entry into such tanks is necessary, the tanks should first be fully steamed out, and ventilated; even after that they may still be a source of danger. The worker entering such steamed-out tanks should wear a belt securely attached to a rope, the free end of which is held by a person outside the confined space. The purpose of such an arrangement is for the man to be pulled out of the tank, should he appear to be overcome by the fumes.

In the prevention of chronic benzene poisoning, efforts are directed at the avoidance of inhalation of the fumes. Those persons who are believed to have any blood abnormality should not be permitted to work where there is a potential exposure to benzene. The maximum allowable concentration of benzene for continued exposure is probably about 25 parts per million parts of air.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chronic benzol poisoning: Weakness, headache, pallor, pin-head to massive hemorrhages into the skin, nose-bleeds, sore throat, fever, severe anaemia, decrease of white blood cell count.

Toluene

Definition.—Toluene poisoning in industry in its acute form resembles benzene poisoning (q.v.). In the chronic form toluene poisoning causes mild anaemia and liver enlargement.

Causative agent.—Toluene (Chemical symbol: $C_6H_5CH_3$). Synonyms: toluol, methyl benzene. Commercial toluene usually contains some benzene and xylene. It is a light oily liquid with a characteristic unpleasant odour. It has solvent properties similar, but not quite equal, to that of benzene.

Occupations involved.—As for benzene (q.v.).

Metabolism.—Toluene enters the body in the same manner as benzene. It is excreted in part unchanged through the lungs. The larger part, however, is oxidized and conjugated to form hippuric acid which is then excreted in the urine.

Clinical features.—The acute form of poisoning is similar to that of benzene. In continued exposures to low concentrations mild anaemia may occur, as may liver enlargement. The liver enlargement appears to be a transitory phenomenon.

Prophylaxis.—Methods for preventing toluene poisoning are the same as those for benzene poisoning.

Xylene

Definition.—Xylene poisoning in industry in its acute form resembles benzene poisoning (q.v.). There does not appear to be a chronic form of xylene poisoning.

Causative agent.—Xylene [Chemical symbol: $C_6H_4(CH_3)_2$]. Synonyms: zylol, dimethylbenzene. Commercial xylene often contains some benzene and toluene. It is a heavy oily liquid with a characteristic unpleasant odour. It has less effective solvent properties than toluene.

Occupations involved.—As for benzene (q.v.).

Metabolism.—It enters the body in the same manner as benzene and toluene. Part is excreted by the lungs. The fate of the remainder is not known.

Clinical features.—As for toluene (q.v.).

Prophylaxis.—As for benzene poisoning.

Aniline

Definition.—Aniline poisoning is an acute disease that develops as a result of a single inhalation of aniline vapour or by absorption of aniline through the skin. It is characterized by the formation of methemoglobin in the blood, resulting in headache and blueness of the skin and mucous membranes.

Causative agent.—Aniline (Chemical symbol: $C_6H_5NH_2$). Synonyms: aminobenzene, phenylamine. Aniline is a colourless or slightly brownish heavy liquid which has a characteristic, not unpleasant odour.

Occupations involved.—The occupations in which there is potential exposure to aniline include the following:

(1) Explosive makers; (2) Gasoline blenders; (3) Petroleum refiners; (4) Rubber workers and (5) Shoe dyers.

Metabolism.—Aniline enters the body by inhalation of the vapour or by absorption of the liquid through the skin. In the body it is transformed to paranitrophenol, and this in combination with sulphates is excreted through the kidneys.

Pathogenesis.—The formation of methemoglobin is due to aniline and this directly is responsible for the blue colouration of the skin. The symptoms of headache, weakness, and dyspnoea are due to the lowered oxygen tension of the blood resulting from its decreased oxygen-carrying capacity.

Clinical features.—The earliest signs of aniline absorption is a blue appearance of the lips. At this stage no ill effects may be noticed. As the condition progresses, due to further absorption, and further methemoglobin formation, weakness develops followed by severe headache, and dyspnoea on slight exertion.

Diagnosis.—The blue appearance of the skin in the potentially exposed worker is generally accepted as clear evidence of the disease. Blood examination for methemoglobin, by chemical methods or by spectrography, may be performed for the purpose of clinically following the progress of the disease.

Prophylaxis.—To prevent poisoning by aniline all efforts should be directed to avoid inhalation of the vapours and to avoid contact of the liquid with the skin. When aniline spills on the clothing, the contaminated clothing should be removed at once, and a bath taken to remove any of the aniline that may have reached the skin.

In the treatment of methemoglobinemia, the use of oxygen-carbon dioxide inhalations and rest in bed with sedatives is advised. Glucose solution administered intravenously appears to be of benefit. The condition is usually alleviated in 24—48 hours with proper therapy. In recent years a solution of methylene blue intravenously has been recommended for treatment. Its value, and rationale, are yet to be established.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur from the methemoglobinemia which results from aniline or nitrobenzene poisoning: Blueness of lips (and of skin of face), weakness, headache, shortness of breath.

Nitrobenzene

Definition.—Nitrobenzene poisoning is an acute disease that develops as a result of a single inhalation or skin absorption of nitrobenzene. It is characterized by manifestations similar to those of aniline poisoning.

Causative agent.—Nitrobenzene (Chemical symbol: $C_6H_5NO_2$) Synonym: Oil of mirbane. It is a colourless, to light yellow, oily liquid, and has a characteristic sweetish odour. It has excellent solvent properties for many organic compounds.

Occupations involved.—The occupations in which there is a potential exposure to nitrobenzene are:

(1) Chemical workers; (2) Explosive makers; (3) Shoe dyers and (4) Soap (scented) makers.

Pathogenesis.—As for aniline (q.v.).

Clinical features.—As for aniline, except that nitrobenzene has a greater tendency towards the formation of methemoglobin.

Prophylaxis.—Although inhalation of nitrobenzene, in amounts sufficient to produce a toxic effect, cannot be ruled out, in actuality industrial poisoning normally involves skin contact with the liquid and absorption by that route. For this reason prevention mainly consists in avoiding splashes on to the skin, and education of the workers as to what should be done when such splashes occur. (See under section on "Aniline".)

Trinitrotoluene

Definition.—Trinitrotoluene poisoning is a disease due to the inhalation of the dust or fumes of trinitrotoluene, or less frequently from skin absorption of the agent. It is characterized by damage to the blood, the liver and skin.

Causative agent.—Trinitrotoluene [Chemical symbol: $CH_3C_6H_2(NO_2)_3$]. Synonyms: 1:2:4:6: trinitrotoluene, TNT. It is a yellow crystalline solid.

Occupations involved.—The following occupations involve a potential exposure to this agent:

Trinitrotoluene makers and Trinitrotoluene shell loaders.

Metabolism.—Trinitrotoluene enters the body by inhalation of the dust or fume, and less frequently through contact with the skin, and is absorbed to produce its effect elsewhere in the body. The direct skin contact may result in skin disease.

Clinical features.—The skin disease is a dermatitis which generally is manifest early in the course of exposure. The serious effects of exposure involve damage to the blood-forming organs and the liver. Either organ, or both, may be affected.

The blood may be affected with the appearance of moderate to severe anæmia, due to the effect on the blood-forming function of the bone marrow. Liver damage may appear in the form of acute destruction of liver cells with its attendant symptoms of fever, jaundice, and nausea and vomiting. Either form of disease may end fatally.

Prophylaxis.—Prevention is based on avoiding the inhalation of the dust and fumes. Skin disease is avoided by preventing skin contact with the agent, and by good personal (skin) hygiene.

(Human sketch—Locs of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in trinitrotoluene poisoning: Dermatitis, anæmia (leading to weakness and pallor), jaundice, fever, and nausea and vomiting.

10. Chrome Ulceration Or Its Sequelæ

Definition.—Chrome ulceration is an ulcerative phenomenon of either the exposed skin or of the mucosa of the nasal septum, and less frequently of the mouth, throat or trachea, and is due to the direct contact with these surfaces of the dust or mist of hexavalent compounds of chromium. The results of the nasal mucosal ulceration include perforation of the cartilaginous portion of the nasal septum. Chrome ulceration of the skin can infrequently be so severe as to involve the deeper tissues, including the bone.

Causative agents.—The hexavalent chromium compounds which are of industrial significance are chronic acid, potassium and sodium dichromate, zinc chromate, and lead chromate. Chromic acid is an amorphous reddish-brown solid readily soluble in water. Potassium (or sodium) dichromate is a reddish-yellow crystalline material and is readily soluble in water. Zinc chromate is a greenish-yellow powdery material; it is relatively insoluble in water. Lead chromate is a canary-yellow coloured powdery material that is relatively insoluble in water.

Occupations involved.—The occupations which have a potential exposure to hexavalent chromium compounds are:

(1) Chromium compound producers; (2) Chromium platers; (3) Colour (inorganic) makers; (4) Match factory workers; (5) Paint makers; (6) Photo-engravers and (7) Tannery (chrome) workers.

Clinical features.—The action of hexavalent chromium compounds to produce ulceration is entirely a local one, and occurs by direct contact of the dusts or mist with the linings of the mouth or nose or of the skin.

The skin ulcer usually occurs on the exposed areas, especially of the hands or forearms, although it is not unusual to find it on the feet, legs, or abdomen (at the belt line). It is often multiple. It begins at a break in the skin or at skin folds. The ulcer has a typical "punched-out" appearance with well-defined borders, and with but little, if any, inflammatory reaction about it. It may be pin-head in size to many centimeters in diameter. It may be round, or have an irregular outline. The ulcer causes but slight discomfort, unless it burrows into the deeper tissues. Even if kept clean, it heals very slowly.

Ulceration of the lining of the nose is usually limited to the mucosa overlying the cartilaginous septum, and is associated with some nasal discomfort, blood-streaked mucus, and the occurrence of the dried-black crusts. As the lining is eroded, the underlying cartilage is eaten away resulting in perforation of the septum. There is no discomfort at this stage unless the irritation of the adjacent mucosa continues. The worker may notice a whistling sound as he breathes, and he may have further crusting in his nose. The sense of smell is generally not affected.

Consideration of the chromium compounds as industrial poisons would not be complete without the mention of the recently reported high incidence of lung cancer in the chromate-producing industry in other countries. The exact manner of its production and its prevention are still to be determined. From the available evidence the lung cancer which occurs among chromate-producing plant workers does not appear significantly different from that which occurs in other persons.

Prophylaxis.—The prevention of chrome ulceration requires care to avoid contact of the skin and mucous membranes with the dust and mist of hexavalent chromium compounds. This is mainly an engineering problem. But, much can be done through good personal hygiene. This would include avoidance of any skin breaks and washing off any of the chromates that may accidentally fall on the skin. At the first sign of an ulcer, medical treatment should be sought. Further contact of the affected skin with chromate must be avoided.

Ulceration of the nasal lining and perforation of the nasal septum can be prevented possibly by instituting proper methods of engineering control and enforcing good personal hygiene. The application of suitable ointment to the nasal septum, several times each day, may prevent ulceration and perforation.

(Human sketch—Loci of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chrome ulceration: Skin ulcer of exposed parts, ulcer of lining of nose, perforation of cartilaginous portion of nasal septum, nose-bleeds, formation of reddish-black crusts in nose.

11. Anthrax

Definition.—Anthrax is an acute infectious disease due to the *Bacillus anthracis*, and industrially is characterized by the occurrence of the skin form of the disease, and, only rarely, by the pneumonic form.

Causative agent.—The microbe, *Bacillus anthracis*, which is the causative agent of the disease may exist in either of two forms, vegetative or spore. Only the vegetative form can produce disease by invading the host. Spore formation does not occur in the body, but rather develops when conditions are unfavourable for the vegetative form. The spore has marked resistance to cold, heat, and ordinary chemical disinfectants. It may remain viable for many years in soil, water, hides, hair, wool, and other animal products, until a susceptible host provides the proper environment for its germination.

Occupations involved.—The occupations which have a potential hazard from anthrax are:

- (1) Animal handlers (2) Brush (bristle) makers; (3) Carpet (wool) makers; (4) Farmers;
- (5) Fur workers; (6) Tannery workers and (7) Wool sorters.

Clinical features.—Cutaneous anthrax, the only industrially important form of the disease, starts with the appearance of a small area of redness and slight skin elevation after 24—36 hours following the entrance of the organism through a break in the skin. A few hours later a well-formed pimple develops. If the disease is on the extremities, this stage is associated with little or none of the systemic manifestations noted later. In fact there are practically no local symptoms either and the patient pays little heed to the pimple. A few hours later the pimple enlarges in height and circumference, with an area of redness and swelling sprading out from the base. Later, numerous small blisters form in the area; the top of the pimple begins to be depressed and turns dark-brown to black. A watery discharge is present and this will show large numbers of *Bacillus anthracis* organisms.

By the time the skin lesion is well-formed there are general symptoms which may include fever (up to 103—105°F.), headache, and a feeling of sickness. Lesions of the head, neck and upper chest wall are the more serious and may be associated with severe local swelling.

Prophylaxis.—The prevention of industrial anthrax (cutaneous) is based on avoiding contact with potentially infective material. Protective clothing is of doubtful value in such a programme. Rather should efforts be made, whenever possible, to destroy the organisms. In the case of wool this can be accomplished by treatment with accepted concentrations of formaldehyde at certain elevated temperatures. In the case of bristles, boiling will be effective. In the case of hides, there is at present no suitable method known.

Since treatment with sulfonamides and penicillin has proved very effective in the early stages of the disease, the workers should be informed of the dangers and should be required to report any suspicious skin lesion.

12. Silicosis

Definition.—Silicosis is a scarring disease of the lungs due to the inhalation of dust containing free silica, silicon dioxide. A long period of exposure (5—20 years) is required for the development of the disease. Pathologically the disease is characterized by miliary nodular scarring, the small nodules in the later stages fusing to form larger nodules, and finally forming conglomerate (tumorous) masses. Fairly typical X-ray appearances mark out the various stages of the disease.

Causative agent.—Silica. (Chemical symbol: SiO_2) Synonym: silicon dioxide.

Silica is a very hard crystalline material which occurs abundantly in nature in rocks and soil.

Occupations involved.—The occupations in which there is a potential exposure to free silica include the following:

- (1) Abrasive makers; (2) Brick makers (refractory); (3) Foundry workers; (4) Glass mixers; (5) Grinders (metal); (6) Miners; (7) Polishers (metal); (8) Pottery workers; (9) Rock crushers; (10) Sandblasters; (11) Sanders; (12) Sand pulverizers; (13) Scouring power makers; (14) Stone dressers and (15) Tumbling barrel workers.

Pathogenesis.—The silica particles reach the walls of the air-sacs where they are engulfed by specialized white blood cells. Many of the particles are in this way discharged with the sputum; but, others enter the lung lymphatic stream, from where they are carried to the lymph glands. At the glands the wandering white blood cells disintegrate, leaving behind the silica particles which cause further damage. They stimulate the development of nodular bundles of scar tissue, microscopic in size; and, as more of these nodules form, they become fused to form larger nodules which eventually obstruct the normal passage of lymphatic fluid through the lymph glands.

When this occurs, the further passage of silica-laden scavenger cells to the pulmonary lymph glands occurs with difficulty. Now, new foci in the lung lymphatic vessel chain act as depots for the dust-laden cells, and nodular scarring forms at these locations also. This latter action leads to the widely scattered nodules found in the lungs at this stage.

The fusion of the nodules to each other gradually results in the appearance of large tumorous masses. It is believed by some authorities that this stage is invariably associated with tuberculosis. There is little doubt, however, that silica dust in the lungs predisposes to the onset or progression of pulmonary tuberculosis.

At any stage, but more frequently at the later stages, stretching of the air-sacs of the lungs occurs. It is likely that this phenomenon, in addition to the constricting action of silica on the bronchial tubes is the chief cause of dyspnoea in silicosis.

At any stage, but more frequently in later stages, symptoms develop. These consist of dyspnoea, either on exertion or at rest, cough, and often a sense of tightness in the chest. Physical examination reveals nothing that is typical. Some indeterminate rales (abnormal sounds in the lungs) may be found. The existence of the nodules themselves, the typical scarring of silicosis is not revealed by any special objective signs, except by chest X-ray.

The chest X-ray is fairly typical, if one can rule out such conditions as rheumatic heart disease with chronic heart failure, fungus disease of the lungs, iron dust deposition, pulmonary sarcoidosis and eosinophilic lung. It is obvious, therefore, that physical examination and a good occupational history are necessary before one can adequately interpret the chest X-ray as that of silicosis.

The chest X-rays have been classified, for purposes of recording the stage of disease, in many different ways. The classification that seems the least difficult to master is as follows: prenodular stage, first nodular stage, second nodular stage and conglomerate stage of silicosis. In the prenodular stage there is merely the appearance of a diffuse haziness throughout the lung fields. Even with a carefully recorded history of exposure, and excellent technique in the taking of the picture, such an appearance on the film cannot be definitely interpreted as that due to silicosis. In the first nodular stage, there is the appearance of millet-sized nodular shadows scattered throughout the lung fields. In the second nodular stage, these nodules are larger, and are more than one millimeter in diameter. In the conglomerate stage, tumorous masses appear in the lung fields, especially in the upper and mid-portions. Tuberculous infiltration, with or without cavitation, may be visualized at any stage of silicosis.

Prophylaxis.—Prevention of silicosis consists of avoidance of the inhalation of silica dust, especially those particles which are of the order of 0.3 to 5.0 microns in average diameter. This can be achieved by using any, or all, of the methods of prevention of occupational diseases discussed below.

In recent years, inhalations of a special preparation of aluminium oxide (or hydroxide) have been recommended and tried for prevention, as well as for treatment. Its efficacy is still to be proved, and this would probably require continued observations for at least 10 more years.

There is no proven therapy which will eliminate any of the pulmonary fibrosis once it is established. Symptomatic treatment, however, is useful. This may consist of inhalation, under a few millimeters of water pressure, of oxygen with an aerosol of anti-spasmodics.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in silicosis: Shortness of breath, cough, weakness, sense of constriction of chest. The chest X-ray photograph is fairly typical in this disease, if a complete occupational history is taken, and certain other lung diseases are ruled out.

13. Poisoning by Halogens or Halogen Derivatives of the Hydro-carbons of the Aliphatic Series

Of the halogens of significance as industrial toxic substances, only chlorine is considered. Of the "halogen derivatives of the hydro-carbons of the aliphatic series" of import from the occupational disease point of view, only trichlorethylene, carbon tetrachloride, and methyl bromide are considered.

Chlorine

Definition.—Poisoning by chlorine is an acute disease of the lungs due to the inhalation of moderate amounts of chlorine gas, and is characterized by the development of excessive fluid in the lungs and pneumonia. It is characteristic of the poisoning that the effect is delayed by some hours following the inhalation of the gas.

Causative agent.—Chlorine (Chemical symbol: Cl). Chlorine is a gas with a greenish-yellow colour. It has a characteristically pungent disagreeable odour.

Occupations involved.—The following occupations have a potential exposure to chlorine gas: (1) Bleachers; (2) Bleaching-powder makers; (3) Chlorine makers; (4) Laundry workers; (5) Paper makers; (6) Sewage purification workers; (7) Soda lime makers; (8) Sodium hydroxide makers; (9) Sugar refiners and (10) Waterworks workers.

Pathogenesis.—Chlorine inhaled even in moderate amounts brings about its adverse effects by causing severe local irritation of the lungs.

Clinical features.—The earliest evidence of chlorine exposure is the occurrence of smarting of the eyes and irritation of the throat, with cough. When the exposure is severe enough to affect the lungs, there is at first a sense of mild chest "tightness". This is followed, after a few hours, by manifestations of excessive fluid in the lungs and consequent symptoms, similar to those described for "nitrous oxide" exposure (q.v.).

Prophylaxis.—Since industrial exposure to chlorine is almost always of an accidental nature, all efforts should be directed at educating the workers as to the nature of the hazard. Appropriate gas masks should be provided in all places where chlorine exposure may occur, and these masks should be properly maintained.

When a worker is known to have received a sufficient dose of the gas, he should be given prophylactic oxygen treatment for 8–24 hours. This is important as the oxygen treatment may prevent the delayed appearance of lung irritation.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chlorine poisoning: A sense of tightness of chest, coughing of frothy pink sputum, shortness of breath, weakness, blue colouration of skin of face.

Trichlorethylene

Definition.—Poisoning by trichlorethylene is an acute disease due to the inhalation of air containing relatively large amounts of trichlorethylene, and is characterized by a sense of drunkenness to severe unconsciousness. The rhythm of the heart may be adversely affected by such an inhalation and the result may be fatal.

Causative agent.—Trichlorethylene (Chemical symbol: C_2HCl_3). Synonym: trichlorethylene.

Trichlorethylene is a light colourless liquid with a boiling point of 87°C. It has a pleasant odour. It is an excellent solvent for oils and greases. It is non-inflammable, but may decompose under high temperatures with the production of phosgene.

Occupations involved.—There is potential exposure to trichlorethylene in the following occupations:

(1) Degreasers; (2) Dry cleaners; (3) Paint remover handlers; (4) Pharmaceutical workers and (5) Rubber workers.

Metabolism.—Trichlorethylene reaches the lungs as vapour, is absorbed into the blood, and thus carried to vital centres. As with other volatile solvents, part is excreted by the lungs. A certain amount is converted to trichloroacetic acid which is excreted as such in the urine. A small portion of the absorbed trichlorethylene reaches the urine as a "volatile organic chloride".

Clinical features.—The earliest signs of exposure to trichlorethylene are those of drunkenness. There is a sense of well-being and some degree of incoordination. As it progresses there may be nausea and vomiting. Deep unconsciousness then occurs. Because of the sense of well-being developed in the early stages, workers occasionally breathe the vapours purposely. In this manner addiction may occur.

Death due to marked changes in heart rhythm may occur at any stage. Such cases have occurred in which there were no warning signs or symptoms.

Prophylaxis.—The prevention of trichlorethylene poisoning depends upon avoiding inhalation of the fumes.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in acute trichlorethylene poisoning: Sense of well-being, talkativeness, incoordination, nausea and vomiting, unconsciousness, abnormal heart rhythm.

Carbon Tetrachloride

Definition.—Poisoning by carbon tetrachloride is, industrially, a disease due to the inhalation of vapours of carbon tetrachloride, and is characterized by damage to kidney, liver or both organs, and which may end fatally.

Causative agent.—Carbon tetrachloride (Chemical symbol: C Cl_4) Synonyms: tetrachlor-methane.

Carbon tetrachloride is a heavy colourless oily liquid with a characteristic disagreeable odour. It is an excellent solvent for oils, greases, paraffins, and rubber. It is non-inflammable, but will decompose under high temperatures with the possible formation of phosgene.

Occupations involved.—There is potential exposure to carbon tetrachloride in the following occupations:—

(1) Airplane dope workers; (2) Degreasers; (3) Dry cleaners; (4) Fire extinguisher refillers; (5) Paint remover handlers; (6) Pharmaceutical workers; (7) Printers; (8) Rubber and rubber cement workers and (9) Waterproof fabric makers.

Metabolism.—Carbon tetrachloride reaches the body by inhalation of its vapours. Further information on its metabolism is lacking.

Pathogenesis.—In chronic poisoning, and following acute poisoning, it produces its effects through damage to the liver and kidneys primarily. In the latter, its action is essentially on portions of the tubules (the urine collecting system), rather than upon the glomeruli (the urine secreting system). In the liver it produces destruction of the cells. In acute exposure to high concentrations its effect is mainly to produce unconsciousness.

Clinical features.—The industrial disease due to carbon tetrachloride is usually one that involves the liver or kidneys or both. In the liver disease, jaundice and other symptoms associated with destruction of liver cells occur. This may result fatally; or, if recovery occurs from the acute phase, liver scarring may develop. When kidney involvement occurs, albumen will appear in the urine and there will be retention of products of normal body metabolism. Swelling of the face and extremities may develop. Exposures to relatively low concentrations manifest themselves in loss of appetite, nausea and vomiting, and sleeplessness, without any damage to liver or kidney becoming apparent.

Prophylaxis.—Prevention of poisoning by carbon tetrachloride will depend upon the avoidance of the inhalation of its vapours. This is accomplished by engineering methods. Medical control involves pre-employment examination to avoid employing those individuals who already have liver or kidney disease, or who may have a tendency to develop such conditions. In view of a tendency toward development of liver disease in chronic alcoholics, such persons should not be permitted to work with carbon tetrachloride.

(Human sketch—Locs of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in chronic carbon tetrachloride poisoning. Weakness, nausea and vomiting, jaundice, fever, swelling of face and extremities, sleepiness coma.

Methyl Bromide

Definition.—Poisoning by methyl bromide in industry is a disease due to the inhalation of methyl bromide vapour and is characterized by the appearance of symptoms of central nervous system irritation, including mania and convulsions.

Causative agent.—Methyl bromide (Chemical symbol: CH_3Br).

Methyl bromide is a colourless liquid with a relatively high vapour tension. Its boiling point 4.6°C . It is non-inflammable. It has practically no odour.

Occupations involved.—There is a potential exposure to methyl bromide in the following occupations:

(1) Fire extinguisher refillers; (2) Insect exterminators; (3) Pharmaceutical workers.

Metabolism.—Methyl bromide reaches the body on inhalation of the vapour. From the lungs it is carried to vital centres in the brain to exert its severe effect which is possibly bromide-like in nature. No further information on its metabolism is available.

Clinical features.—Following exposure to methyl bromide, the eyes appear "blood-shot", and some hours later irritation of the brain occurs. The latter becomes manifest in the appearance of headache, dizziness, mental excitement, and convulsions. Mania may develop. Fever is a common finding.

Prophylaxis.—To prevent poisoning by methyl bromide one must avoid its inhalation. This is primarily an engineering problem. The maximum allowable concentration is 20 parts per million of air.

(Human sketch—Loca of Clinical Manifestations not reproduced.)

The following symptoms and signs may occur in methyl bromide poisoning: Congestion of conjunctivæ, headache, dizziness, mental excitement, convulsions, fever, coma.

14. Pathological Manifestations Due To (a) Radium Or Other Radio-active Substances (b) X-Rays

Definition.—The pathological manifestations due to radium or other radio-active substances and of X-rays depend, in part, on the specific radio-active substance and the radio-activity involved. According to one theory of its action, the activity of all ionizing radiation is to produce, by the ionization process, cellular tissue changes. In the case of excessive exposure to X-rays, one may develop diffuse lung scarring, lung cancer, destruction of skin, skin cancer, damage to the bone marrow, leukemia (cancer of the white blood cells), loss of function of the testicles or ovaries or destruction of other organs. In the case of the radio-active elements, the action will depend upon whether the material acts on the body from the outside, its rays (or particles) acting on or through the skin, or from inside the body, the rays having relatively short distances to penetrate to affect vital organs or tissues. This is of significance in regard to the kind of tissue effect which may be expected since the various ionizing radiations do not all have the same tissue penetrating powers. Thus, the alpha particle is the least able to penetrate; the beta ray is only somewhat more penetrating; and, the gamma ray has the strongest penetrating power of the three. The neutron is even more penetrative than any of the others.

Some of the radio-active isotopes by virtue of their metabolism may be concentrated in or near vital tissues and may exert their effect locally. In this manner certain radium compounds by being deposited in bone result in constant bombardment of that organ by ionizing radiation, and thus damage the vital blood-forming tissues in the bone marrow or even the bone itself. In the latter instance secondary bone infection or bone cancer may result.

Causative agents.—The agents which can give rise to ionizing radiation include X-ray machines and chemical sources of gamma rays, used to detect defects in manufactured metal parts, radium compounds or other radio-active isotopes used in luminous dial painting, and the thorium series of radio-active materials present in the monazite sands. These are sources of radio-activity of varying nature, alpha, beta, gamma rays, neutrons, or X-rays, whose penetrating and tissue ionizing effect will differ dependent in part on the energy contained in the radio-activity in question.

Occupations involved.—There is a potential exposure to radio-active isotopes or to ionizing radiation in the following occupations:

(1) Dentists; (2) Incandescent mantle makers; (3) Industrial radiographers; (4) Laboratory workers using radio-active agents; (5) Medical and ancillary personnel; (6) Monazite sand workers and (7) Radio-active paint makers and users.

Metabolism.—The direct rays of radio-active materials exert their effects and thus their energy is expended. In the case of radio-active materials which enter the body either by inhalation as a dust (radium compounds) or as a gas (radon), the action may be local in the lungs, or by the absorption and transfer of the material to other sites, the radio-activity will exert its influence at those sites. Many such radio-active isotopes are carried to bones, and may even be excreted by the kidneys unchanged.

Radium, although it may be deposited in bones, continues to disintegrate, as do other radio-active materials. With the disintegration of radium, radon gas is produced, and the gas is excreted in the expired air.

Clinical features.—The clinical symptoms will, of course, depend upon the tissue which is the target. In general, however, in cases of exposure there is always (except in overwhelming doses) a period of latency before symptoms become manifest.

The earliest change is said to be a transient appearance of lymphocytosis (increase of certain white blood cells), rarely observed clinically. The blood effects that are generally found include anæmia and fall in the white blood cell count of varying severity, and are due to depression of the blood-forming function of the bone marrow. Leukemia may occur.

Affected bone may be destroyed or may even show cancerous changes. Cancerous changes may also occur of the skin or internal organs. In the case of the skin, there is usually concomitant evidence of other destructive changes, which include loss of hair, thickening, fissuring and dermatitis.

Prophylaxis.—Preventive measures against the effects of radio-activity will vary dependent upon the agent. In the case of X-rays, shielding by appropriate thickness of material (lead, cement, steel) will be effective. In the case of some radio-active elements, avoidance of direct contact with the skin, and avoidance of swallowing or inhalation must be ensured. The use of testing equipment to determine exposure is a vast subject and reference should be made to the extensive literature.

Medical control is part of the programme of prevention. This includes careful periodic medical examinations and thorough blood studies.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

15. Primary Epitheliomatous Cancer Of The Skin

Definition.—"Primary epitheliomatous cancer of the skin" is a disease which differs but little, when due to occupation, from the same disease which may otherwise occur. In industrial skin cancers, multiplicity of primary growths may occasionally be found. The growth (or growths) are usually found on areas of the skin directly exposed to the known or suspected offending agent.

Causative agents.—Such known agents are petroleum oil and some of its derivatives, tar, pitch, creosote, X-rays (and other sources of ionizing radiation), arsenic and the ultra-violet rays of the sun.

Occupations involved.—The potentially hazardous occupations in which there may be exposure to the various causative agents are as follows:

1. Petroleum oil and its derivatives:
 - (1) Automobile repairers; (2) Engineering works operatives; (3) Diesel engine operators;
- (4) Oil field workers and (5) Petroleum refiners.
2. Tar and pitch:
 - (1) Battery (dry) workers; (2) Pitch workers; (3) Coal tar workers; (4) Road repairers;
- (5) Coke oven workers; (6) Tar workers; (7) Gas (illuminating) workers; (8) Rope workers;
- (9) Paint (tar) workers and (10) Wood preservers.
3. Creosote:
 - Pharmaceutical workers and Wood preservative workers.
4. X-rays (and other sources of ionizing radiation):
 - See under section, entitled "Pathological manifestations due to (a) radium or other radio-active substances, (b) X-rays".
5. Arsenical compounds:
 - See under section entitled "Arsenic poisoning or its sequelæ".
6. Ultraviolet rays of the sun:
 - Farmers and Seamen.

Clinical features.—Skin cancer due to the causative agents usually occurs on the areas having the largest degree of contact with the offending agent. It may take the form of basal or squamous cell type, and is occasionally multiple. It often occurs before the "normal" cancer age, and may be associated with such concomitant skin lesions as keratosis and warts. Its degree of malignancy is variable, and may spread to distant organs in the squamous cell type of the disease.

Prophylaxis.—Skin contact with the offending agent must be kept to a minimum. Cleanliness, in the case of the chemical agents, is the most effective method. In the case of radiation, the use of protective shielding is effective.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

The symptoms and signs of primary epitheliomatous cancer of the skin may include the following: A skin sore which heals very slowly or not at all, a painless localized swelling of the skin.

16. Toxic Anæmia

Definition.—"Toxic anæmia" is a disease characterized by any significant decrease in either the circulating red blood cells or haemoglobin, or both, and is due to exposure to certain toxic substances in industry. The industrially important substances or conditions which can produce such anæmia are benzene, X-rays, radio-active materials, arsenic and its compounds, and lead and its compounds. These agents have been discussed earlier.

17. Toxic Jaundice

Definition.—"Toxic jaundice" is a disease characterized by the appearance of the symptom, jaundice (a yellow discolouration of the eyes and the skin), and is due to the exposure to certain toxic substances in industry. The industrially important substances which can produce jaundice include carbon tetrachloride, the chlorinated naphthalenes and chlorinated diphenyls, manganese compounds, trinitrotoluene, tetryl, and arsine.

Causative agents.—Carbon tetrachloride, the chlorinated naphthalenes and chlorinated diphenyls, trinitrotoluene, and tetryl may produce jaundice by virtue of the severe liver disease they may produce. The others, except arsine, may result in jaundice by virtue of the scarring of the liver which they may cause. Arsine as well as trinitrotoluene may cause jaundice by their destructive effect on the circulating red blood cells.

Occupations involved.—The potentially hazardous occupations in which there may be exposure to the various causative agents which may result in toxic jaundice are:

1. Carbon tetrachloride:

See in section, entitled "Poisoning by halogens or halogen derivatives of the hydrocarbons of the aliphatic series".

2. Chlorinated naphthalenes and diphenyls:

(1) Cable (electric) makers; (2) Electrical (transformer) makers; (3) Electrical condenser makers and (4) Wire insulator makers.

3. Manganese compounds:

See in section, entitled "Manganese poisoning or its sequelæ".

4. Trinitrotoluene and tetryl:

Explosive makers

5. Arsine:

See in section, entitled "Arsenic poisoning or its sequelæ".

Since, of these causative agents, only the chlorinated naphthalenes and diphenyls have not been considered earlier, discussion at this point will be limited to these substances.

Clinical features.—The chlorinated naphthalenes and diphenyls may produce their effect on the liver on inhalation as dust or fume. They produce severe destruction of liver cells which may end fatally. Associated with the liver disease will often be found acne due to skin contact with the agent. The acne is characterized by the marked incidence of "black-heads" and by its location on the forearms, abdomen and thighs, and less frequently on the face and shoulders.

18. Compressed Air Illness Or Its Sequelæ⁴

Definition.—Compressed air illness consists of a group of symptom complexes which occurs as a result of inadequate decompression carried out on those persons who work under increased atmospheric pressures either in caissons or in diving gear. The symptom complexes may be either ear "block" or the "bends". In the case of ear "block", damage may occur to the ear drum or to the middle ear. In the case of the "bends" there may be severe pain in the abdomen, the joints, or the muscles, due to the sudden release of pressure. A result of repeated sub-clinical or clinical compressed air illness is the development, after many years, of bone destruction, especially of the bones of the hip joints.

Occupations involved.—The occupations which may potentially expose the workers to the possibility of being affected with compressed air illness are:

(1) Caisson workers; (2) Divers and (3) Tunnel workers.

Pathogenesis.—The increased atmospheric pressures under which the exposed individuals must work, and then return to normal pressures, can produce illness by virtue either of the mechanical effect of the changed pressures or by the effect of these pressure changes on the air gases in solution in the body. In the first instance, the changing pressures can damage the middle ear or the ear drum if there is any obstruction to the equalization of the pressure on both sides of the ear drum. In this manner there may be stretching of the ear drum, rupture of the drum, hæmorrhage in the middle ear, or displacement of the small bones of the middle ear. Less frequently are there manifestations of a similar physical effect upon the nasal sinuses.

The effect of sudden release of the air gases from solution is generally the more serious. Under normal atmospheric pressure, the blood liquids, and thus the tissue-bathing fluids, absorb the inert air-gas, nitrogen, according to its partial pressure of about 80% of the total atmospheric pressure. When the atmospheric pressure is raised as it must be, for

⁴ Not included as a notifiable disease in the Factories Act, 1948, but listed as compensable in Schedule III of the Workmen's Compensation Act, 1923.

divers and caisson workers, partial pressure of nitrogen in the air rises, and so its solubility in the tissue fluids increases proportionately. On arrival at the surface there is a reduction of the atmospheric pressure to normal levels again. This excess of nitrogen is again released to conform to the new pressure. If the lowering of pressure to normal is done too rapidly, the nitrogen is released too fast for the blood to be able to absorb it and carry it to the lungs for discharge; then, nitrogen gas bubbles are released in the tissues with destructive effect.

Clinical features.—The clinical features in ear “block” include pain in the ear, loss of hearing, and bleeding from the ear canal. In the “bends”, which is due to the solution of the gases, and the later appearance of nitrogen gas bubbles in tissues, the symptoms will vary dependent upon the point of action. Muscle and joint pains may be severe. Abdominal pains may be so severe as to cause the patient to bend over to try to obtain relief. Brain involvement may lead to local damage or even death.

In caisson workers and divers there may develop after many years, destruction of the bones at the large joints. The hip joint is especially likely to be involved.

Prophylaxis.—In the prevention of compressed air illness, careful attention should be paid to the following: (1) limitation of the number of hours that persons may work under compressed air of different magnitudes; (2) carrying out of the decompression procedure as slowly as possible; (3) easy availability of the decompression chamber for workers, who become ill away from the job site; (4) careful supervision of the health of the workers.

Mention may be made of the use of helium and oxygen inhalations for prevention and treatment of some of the clinical symptoms.

(Human sketch—Loc of Clinical Manifestations not reproduced.)

Principles of Occupational Disease Prevention

There is enough information now available on occupational diseases that one can state with confidence that all such diseases are preventable. Their prevention requires recognition of two factors, namely (1) that the presence of potentially toxic substances in certain industrial occupations can produce disease, and (2) that the exposure level of the particular noxious agent is approaching the danger point. Very often it is the physician who is the first person to recognize that either or both the factors exist. It is, therefore, his moral responsibility to inform the authority concerned of the situation so that adequate steps may be taken for prevention. Should the physician attend a case of illness incident to occupation, his duty is obvious.

In the prevention of the diseases both engineering and medical methods of control are used. By far the more important are the engineering methods of control. The following are certain basic principles for minimizing industrial toxic exposures: (1) substitution of a relatively safe material for the more hazardous substance; (2) use of enclosed processes; (3) use of wet methods; (4) ventilation, either local exhaust or general ventilation. The use of personal protective equipment, although not strictly an engineering method of control, may sometimes be the only method of protection feasible.

The substitution of a relatively safe for an unsafe material in industry is feasible only in certain operations, and requires an understanding of the degree of health hazard as well as of the industrial process involved. Thus, for example, benzol, a very useful and inexpensive solvent requires elaborate control measures in view of the high toxicity of its vapour. It is, therefore, best replaced by other solvents, such as toluene, which, though they may not be so efficient from the industrial point of view, obviate the necessity for installing elaborate system of ventilation. A second instance of the substitution principle is that of the replacement of sand by steel-shot in blasting (cleaning) operations in foundries. Sometimes substitution is a legal requirement, as with the legal elimination of yellow phosphorus from the match industry, and its substitution by the safe sesquisulphide of phosphorus.

The use of enclosed processes is especially useful in the handling of highly toxic materials. Further, in the chemical manufacturing industries this is often the only suitable method for the handling of the many toxic agents used. Thus, a closed system of piping, tanks and reaction vessels confines the potentially toxic material, so that practically none of it may enter the air of the workroom. Isolation of certain dangerous operations to a limited area of the plant, by suitable walls and doors, is a modified form of “enclosure” since it serves to limit the possibility of exposure to a relatively small number of persons by preventing the noxious material from circulating in the air of all the work areas in the plant.

The use of wet methods is limited to those operations in which dust of certain types is generated. It is further of value when the dusts reach the flooring from which they may be stirred up into the workroom air. Wetting the floors in foundries and in storage

battery plants is thus very useful in preventing the dissemination into the air of the noxious agents (silica and lead dust, respectively). The use of wet drilling of rock, in which water is constantly being discharged on the surface being worked, is very effective in reducing the health hazards from the dust, for it is wetted as it is formed, and thus falls to the ground and is washed away.

The use of local exhaust implies that the dust, fume, gas, vapour, or mist will be removed at its point of generation. It is generally more effective and more economical than is general ventilation. Local exhaust ventilation requires not only a knowledge of ventilation principles but also an understanding of the particular industrial process to which the local exhaust is to be applied. One common example of local exhaust ventilation is the use of an appropriately constructed hood on grinding wheels, the hood being connected by piping to a dust collecting bag or box.

General ventilation is the least effective method of preventing occupational diseases due to dust, fumes, gases, vapours and mists. However, it is used when other methods are not feasible. In this method fresh air is introduced into the workrooms in quantities sufficient to dilute the toxic agent down to a safe level.

The use of personal protective equipment is the last method to be considered, and, although it is very useful in particular cases, reliance should rather be placed on one or more of the above four methods. In general, workes are loathe to use the personal protective equipment provided to them for it impedes their work. Too often the personal protective equipment is not properly maintained. Except in certain special circumstances, personal protective respiratory equipment (masks) should be used only in emergencies and that too for relatively short periods of time.

Respiratory tract protection is provided by the use of suitable mechanisms worn by the worker to prevent (or reduce) the inhalation of the toxic agent. These may be air (or oxygen) suppliers, in which case the worker breathes none of the workroom air. A second type embodies the principle of air cleaning, in which there is a filter arrangement to remove the noxious agent, allowing the cleansed workroom air to reach the workers' lungs. The air cleaning type of respirator may be made suitable for gases, vapours, or dusts, and depends for its effectiveness on the absorbing medium or nature of the filter. These respirators (masks) are generally made for specific substances, or groups of substances, and are labelled to indicate for which type of material they are effective.

The respirator must be worn properly, or it is of no value. It must fit well and must not introduce excessive resistance to the respiratory effort. Changing of the filter cartridge, or the filtering cloth or paper, must be done periodically to maintain its effectiveness.

The purpose of protective clothing is to reduce the possibility of contact between the noxious agent and the skin. The protection of the skin will result in avoidance of dermatoses and possibly absorption of the agent. Protective clothing may include gloves, shirts and trousers, aprons and sleeves. The use of special shoes, head dress, and goggles for the prevention of accidents is not considered here.

Gloves may be of cotton or impervious materials. The impervious type of glove may be made of natural rubber, synthetic rubber, or synthetic plastics. The type chosen will depend upon the nature of the noxious agent that is to be handled.

Shirts and trousers or overalls should be provided in those industrial operations in which there is danger to the skin or danger from skin absorption of a noxious material.

Aprons are usually made of a material that is impervious to the potentially noxious agent. Similarly, in some occupations, impervious sleeves need to be provided, to prevent contact of the skin of the forearms with the potentially dangerous material. Where air-impervious sleeves, such as those made of rubber or plastic-impregnated cotton are used, provision should be made for the aeration of the skin of the forearms. This is accomplished by having the sleeve perforated along the side (usually the anterior aspect of the forearm) which does not come into contact with the noxious agent.

For the present purposes, skin barrier creams may be considered as protective clothing, since they coat the skin with a bland material, and this prevents skin contact with the noxious agent. The usefulness of barrier creams to prevent dermatoses is well established. But, there is no universally applicable type of cream; for different types of noxious agents, different types of creams must be used. Thus, if the noxious agent used in the process is a solvent, a cream which is relatively insoluble in that particular solvent will be most effective.

Finally, a brief mention may be made about washing facilities in industrial plants. These should be ample to allow all the workers to use them before the mid-shift meal time and before leaving the place of work at the end of the shift. Washing will remove the noxious agent from the skin thus preventing its continued irritating action and, further, will eliminate the possibility of swallowing with food any of the material that may be remaining on the hands.

9. Conduct and Discipline.
10. Postings and Transfers.
11. Duties.

LABOUR OFFICERS (CENTRAL POOL) RECRUITMENT AND CONDITIONS OF SERVICE RULES, 1951¹

In exercise of the powers conferred by the proviso to Article 309 of the Constitution, the President hereby makes the following rules. They shall come into force with effect from the 20th November, 1951:—

1. (1) These rules may be called Labour Officers (Central Pool) Recruitment and Conditions of Service Rules, 1951.

(2) These rules shall apply to all Labour Officers included in the Pool.

(3) The Pool shall, to start with, consist of all Labour Officers who are required to perform the duties specified in rule 11 in any undertaking except the Railways whether such officers are designated as Labour Officers, Labour Welfare Officers, Civilian Labour Officers or by any other name and whether they are appointed under a statute or otherwise.

2. **Definitions.**—In these Rules unless there is anything repugnant in the subject or context—

(1) “Government or Government of India” means the Government of India in the Ministry of Labour.

(2) “Ministry concerned” means a Ministry of the Central Government and shall include a Head of a Department subordinate thereto possessing appropriate powers which exercises control over an undertaking in which a Labour Officer is employed.

(3) “Undertaking” means a Central undertaking such as a Defence Installation, a Posts and Telegraphs Circle, Central Public Works Department and a Government factory where one or more Labour Officers are employed for performing duties specified in rule 11.

(4) “Worker” means any person employed in any undertaking directly or through any agency and for whose welfare the Central Government is responsible by statute or otherwise.

3. **Number of Labour Officers.**—(1) In every undertaking where five hundred or more workers are ordinarily employed there shall be appointed at least one Labour Officer: provided that, when the number of workers exceed two thousand one Labour Officer shall be appointed for every two thousand workers or a fraction thereof.

(2) Ordinarily no Labour Officer should work for more than 3 years under a Ministry concerned at one stretch.

4. **Recruitment.**—(1) Recruitment shall be made by the Government of India through the Union Public Service Commission.

NOTE.—In case of short vacancies where recruitment is permissible without consultation with the Union Public Service Commission, the Ministry of Labour may appoint a qualified person to such vacancy provided that where a suitable candidate selected by the Union Public Service Commission is available, he should normally be so appointed.

(2) Labour Officers shall be liable to be on probation for a period of one year which may be extended at the discretion of the Government for such period as it may think fit subject to a maximum of six months.

(3) During the period of probation a Labour Officer may be required to pass such examination or examinations as the Government may prescribe.

¹ These Rules were published under Ministry of Labour Notification No. LWI-47(4)/46 dated the 20th November 1951. Under Section 49(2) of the Factories Act, 1948, the State Governments prescribe the duties, qualifications and conditions of service of Welfare Officers.

(4) If, in the opinion of the Government, the work or conduct of the Labour Officer on probation is unsatisfactory or shows that he is unlikely to prove efficient, the Government may discharge him after giving him a reasonable opportunity of showing cause against such action, or may extend the period of probation as in sub-rule (2) above.

(5) On the conclusion of the period of probation, a Labour Officer may be confirmed provided a permanent vacancy is available for such confirmation. In other cases, successful conclusion of the period of probation will entitle an officer to further retention in service; subject to availability of a post.

5. Qualifications.—

- (1) *Essential*.—Candidates must be Graduates of one of the recognised Universities preferably in one of the Social Sciences such as economics, commerce and sociology.

NOTE.—Candidates selected as Labour Officers may be required to be conversant in one principal local language of their jurisdictions within a reasonable period of time.

- (2) *Desirable*.—Preference will be given to candidates who have successfully undergone a recognised course of training in social work in such institutions as the Government may prescribe from time to time.

NOTE.—In the case of candidates who have not undergone a recognised course of training, it will be a condition of appointment that such candidates shall be liable to be deputed for training for about six months and their continued employment will be subject to successful conclusion of training. During the period of training, candidate would be entitled to draw 2/3rd of that pay.

- (3) Preference will also be given to candidates with adequate experience of labour welfare work in organisations employing a substantial labour force and candidates with experience of other social and administrative work.

²[5A. **Disqualifications for appointment**.—No person who has more than one wife living shall be eligible for appointment as Labour Officer in the Central Pool:

Provided that the Government of India may, if satisfied that there are special grounds for doing so, exempt any person from the operation of this rule.]

6. **Age**.—Candidates should be between 25 and 40 years of age. Upper age-limit may be relaxed in the case of permanent Government servants and Scheduled Castes and Scheduled Tribes candidates in accordance with the instructions issued by the Ministry of Home Affairs from time to time.

³[6A. In exceptional cases the Union Public Service Commission may, on the recommendations of the Central Government or a State Government, treat as a qualified candidate, a candidate, who though he has not all or any of the qualifications prescribed in rules 5 and 6, has passed examinations conducted by other institutions of a standard which in the opinion of the Commission justifies his admission.

6B. The decision of the Union Public Service Commission whether a candidate does, or does not, satisfy any of the requirements of rules 5 and 6 (including special qualifications, if any, prescribed under rule 5) shall be final].

7. **Scale of pay and status**.—(1) The scale of pay of a Labour Officer shall be Rs. 275—25—500—EB—30—650—EB—30—800.

² Inserted by Notification No. S.R.O. 937 dated the 21st April 1955.

³ Rules 6A & 6B inserted by Notification No. LWI-47(2)53 dated the 14th August, 1953.

(2) Higher initial pay may be allowed, at the discretion of the Government, to candidates with exceptional qualifications and/or previous experience.

(3) The officers will be Class II Officers with gazetted status.

8. Leave, travelling allowance, medical attendance, pension, provident fund.—Labour Officers shall be governed in respect of leave, travelling allowance, medical attendance, pension, provident fund and other conditions of service not provided for in these rules, by the same rules as may, for the time being, be applicable to Class II Officers of the Central Government generally.

9. Conduct and Discipline.—(1) In day-to-day administrative and disciplinary matters, Labour Officers will be under the immediate control of the Head of the Establishment and the Ministry concerned to which they are posted.

(2) In the matter of disciplinary procedure, rights of appeal, etc., Labour Officers shall be governed generally by the Civil Services (Classification, Control and Appeal) Rules as applicable to Central Service Class II Officers.

(3) The power to remove or dismiss a Labour Officer subject to these rules shall not be exercised by any authority other than the Ministry of Labour. The Ministry concerned shall in a case where it considers that the punishment of removal or dismissal should be imposed, complete the enquiry and revert the officer concerned to the Ministry of Labour for such action as that Ministry may consider necessary.

(4) The Ministry concerned shall consult the Ministry of Labour before imposing any lesser penalty (except suspension) and in case of suspension shall report forthwith to the Ministry of Labour the circumstances leading to the imposition of that penalty.

10. Postings and Transfers.—Postings of Labour Officers and their transfers between undertakings under the control of different Ministries shall be regulated by the Ministry of Labour in consultation with the Ministries concerned. Transfers between undertakings under the control of the same Ministry shall be regulated by the Ministry concerned.

11. Duties.—The duties of Labour Officers shall be as follows:—

- (i) to establish contacts and hold consultations with a view to maintaining harmonious relations between the management of the undertaking and workers;
- (ii) to bring to the notice of the management of the undertaking the grievances of workers, individual as well as collective, with a view to securing their expeditious redress and to act as a negotiating officer with trade unions;
- (iii) to study and understand the point of view of labour in order to help the management of the undertaking to shape and formulate labour policies and to interpret these policies to the workers in a language they can understand;
- (iv) to watch industrial relations with a view to using his influence in the event of a dispute arising between the management of the undertaking and workers and to help to bring about a settlement by conciliation and arbitration;
- (v) to deal with wage and employment matters by joint consultations with the management of the undertaking and workers' representative bodies;
- (vi) to exercise a restraining influence over workers going on illegal strikes and over managements declaring illegal lockouts, and to help in preventing anti-social activities;

- (vii) to maintain a neutral attitude during legal strikes or lockouts and to help in bringing about a peaceful settlement;
- (viii) to ensure fulfilment on the part of the management of the undertaking of obligations, statutory or otherwise, concerning the application of provisions of the Factories Act, 1948 and the rules made thereunder, and to establish liaison with the Factory Inspector and the Medical Services concerning medical examinations of employees, health records, supervision of hazardous jobs, sick visiting and convalescence, accident prevention and supervision of safety committees, systematic plant inspection, safety education, investigation of accidents, maternity benefits and workmen's compensation;
- (ix) to promote relations between management of the undertaking and workers which will ensure productive efficiency as well as amelioration in the working conditions and to help workers to adjust and adapt themselves to their working environments;
- (x) to encourage the formation of Works and Joint Production Committees, Co-operative Societies and Safety-First and Welfare Committees, and to supervise their work;
- (xi) to secure provision of amenities, such as canteens, shelters for rest, creches, adequate latrine facilities, drinking water, sickness and benevolent scheme payments, pension and superannuation funds, gratuity payments, granting of loans, and legal advice to workers;
- (xii) to help the management of the undertaking in regulating the grant of leave with wages and explain to the workers the provisions relating to leave with wages and other leave privileges and to guide the workers in the matter of submission of application for grant of leave for regulating authorised absence;
- (xiii) to secure welfare provisions, such as housing facilities, food stuffs, social and recreational facilities, sanitation, advice on individual personnel problems and education of children;
- (xiv) to advise the management of the undertaking on questions relating to training of new starters, apprentices, workers on transfer and promotion, instructors and supervisors, supervision and control of notice-board and information bulletins to further education of workers and to encourage their attendance at Technical Institutes;
- (xv) to suggest measures which will serve to raise the standard of living of workers and in general promote their wellbeing.

COTTON GINNING AND PRESSING FACTORIES ACT, 1925 (XII OF 1925)

Statement of Objects and Reasons¹

The Indian Cotton Committee which was appointed in 1917, in Chapter XVI of their Report recommended certain measures, including the licensing of cotton ginning and pressing factories to prevent such malpractices as damping, mixing and adulteration which are injurious to the quality and reputation of Indian cotton. The recommendations of the Committee, however, involved an excessive amount of official interference. The object of the present Bill is to put the trade in a position to protect itself by providing for the marking of bales and the record of ownership, and by providing further that unmarked bales are not tenderable in fulfilment of contract, if marked bales are demanded by the purchaser.

The Bill also makes provision for the maintenance of registers for statistical returns, for the use of correct scales and weights, and for the structural improvement of ginning and pressing factories. The Bill is based on the recommendations of the Indian Central Cotton Committee, and is supplementary to the Indian Cotton Cess Act, 1923.

¹ Gazette of India, 1924, Part V, page 115.

COTTON GINNING AND PRESSING FACTORIES ACT, 1925 (XII OF 1925)

Arrangement of Sections

1. Short title, extent and commencement.
2. Definitions.
3. Maintenance of registers.
4. Making of bales.
5. Returns.
- 5A. Returns from cotton ginning factories.
6. Scales and weights.
7. Liability of lessee as owner.
8. Liability on transfer of ownership.
9. Structural requirements for factories.
10. Liability of officers of a company.
11. Cognizance of offences.
12. Power of the Central Government to make rules.
13. Power of the State Government to make rules.
14. Power to reject unmarked bales in fulfilment of contracts.
15. Protection for acts done under Act.

COTTON GINNING AND PRESSING FACTORIES ACT, 1925 (XII OF 1925)¹

An Act to provide for the better regulation of cotton ginning and cotton pressing factories.

[18th March, 1925.]

Whereas it is expedient to provide for the better regulation of cotton ginning and cotton pressing factories;

It is hereby enacted as follows:—

1. Short title, extent and commencement.—(1) This Act may be called the Cotton Ginning and Pressing Factories Act, 1925.

²[(2) It extends to the whole of India, except ³[the State of Jammu and Kashmir].

(3) It shall come into force on such ⁴date as the ⁵[Central Government] may, by notification in the ⁶[Official Gazette], appoint.

2. Definitions.—In this Act, unless there is anything repugnant in the subject or context,—

(a) “bale” means any pressed package of cotton of whatever size or density;

(b) “cotton” means ginned or unginned cotton, or cotton waste;

(c) “cotton ginning factory” means any place where cotton is ginned or where cotton fibre is separated from cotton seed by any process

¹For Statement of Objects and Reasons, see Gazette of India, 1924, Pt. V., p. 115, and for Report of Select Committee, see Gazette of India, 1925, Pt. V, p. 59.

The Act has been amended in its application to:—

(1) the State of Bombay by Bom. Acts 4 of 1936 and 20 of 1938;

(2) the C.P. by C.P. Act 24 of 1936 and Madhya Pradesh by M.P. Acts 33 of 1939, 1 of 1942, 13 of 1947 and 47 of 1947;

(3) the State of Punjab by Punjab Act 12 of 1941, and

(4) Uttar Pradesh by U.P. Act 15 of 1941.

²Subs. by the A.O. 1950 for the former sub-section.

³Subs. by Act 3 of 1951 for “Part B States”.

⁴8th August, 1925, see Notification No. 236-C (2), dated the 8th August, 1925, Gazette of India, 1925, Pt. I, p. 728.

⁵Subs. by the A.O. 1937 for “Governor-General in Council”.

⁶Subs., *ibid*, for “Gazette of India”.

whatever involving the use of steam, water or other mechanical power or of electrical power;

- (d) "cotton pressing factory" means any factory as defined in the Indian Factories Act, 1911 (XII of 1911)⁷ in which cotton is pressed into bales;
- (e) "cotton waste" means droppings, strippings, fly and other waste products of a cotton mill or of a cotton ginning factory or of a cotton pressing factory, but does not include yarn waste;
- (f) "Indian Central Cotton Committee" means the Indian Central Cotton Committee constituted under the Indian Cotton Cess Act, 1923 (XIV of 1923), and includes any sub-committee appointed by it to perform any function of the Indian Central Cotton Committee under this Act;
- (g) "occupier" includes a managing agent or other person authorised to represent the occupier; and
- (h) "prescribed" means prescribed by or under rules made under this Act.

3. Maintenance of registers.—(1) The owner of every cotton ginning factory shall cause to be maintained at the factory in such form, if any, as may be prescribed, a ginning register containing a record of all cotton ginned in the factory and of the names of the persons for whom and the dates on which the cotton has been ginned and of the amount ginned for each person.

(2) The owner of every cotton pressing factory shall cause to be maintained at the factory in such form, if any, as may be prescribed, a press register containing a daily record of the number of bales pressed in the factory, the serial number of each bale, and the name of the person for whom it has been pressed.

(3) The owner or the person in charge of a cotton ginning or cotton pressing factory shall be bound to produce any ginning register or press register maintained under this section when required to do so by any person appointed by the ⁸[State Government] in this behalf, and the owner or person in charge of any cotton pressing factory shall be bound to furnish to the Indian Central Cotton Committee, if so required by it in writing, a copy, certified as correct by the owner or person in charge of the factory, of the entry in any press register maintained at the factory relating to any specified bale.

(4) No register required to be maintained by this section shall be destroyed until after the expiration of three years from the date of the last entry therein.

(5) If—

- (a) in any factory any register required by this section to be maintained is not maintained or is maintained in any form other than the form if any, prescribed for the purpose, or
- (b) any entry in any such register is proved to be false in any material particular, or
- (c) any such register is destroyed before the expiration of the period referred to in sub-section (4);

the owner of the factory shall be punished with fine which may extend to fifty rupees or, if he has previously been convicted of any offence under this sub-section, to five hundred rupees.

(6) If the owner or the person in charge of any factory fails to produce any register, or to furnish a certified copy of any entry, when required to do so under sub-section (3), or furnishes a certified copy of an entry knowing or having reason to believe such copy to be false, he shall be punished with fine which may extend

⁷ See now the Factories Act, 1948 (63 of 1948).

⁸ Subs. by the A. O. 1950 "Provincial Government".

to fifty or, if he has previously been convicted of any offence under this sub-section, to five hundred rupees.

4. Marking of bales.—(1) The owner of every cotton pressing factory shall cause every bale pressed in the factory to be marked in such manner as may be prescribed, before it is removed from the press-house, with a serial number and with the mark prescribed for the factory.

(2) If any bale is removed from the press-house of any cotton pressing factory without having been marked as required by sub-section (1), the owner of the factory shall be punished with fine which may extend to fifty rupees.

5. Returns.—(1) The owner of every cotton pressing factory shall submit to the prescribed authority, within such time and in such form as may be prescribed, weekly returns showing the total number of bales of cotton pressed during the preceding week and from the commencement of the season to the end of that week, and the approximate average net weight of the bales pressed in that week.

(2) The ⁹[State Government] shall compile from the weekly returns, and shall publish in such manner as ¹⁰[it thinks fit], a statement showing the total number of bales pressed in the ¹¹[State] during the week and from the commencement of the season to the end of the week, to which the returns relate;

Provided that the number of bales pressed in any individual factory shall not be published.

(3) If default is made in submitting any return as required by sub-section (1), the owner of the factory shall be punished with fine which may extend to fifty rupees.

(4) Where the owner of a cotton pressing factory has notified to the prescribed authority that the work of pressing bales in that factory has been suspended, it shall not be necessary for the owner to submit returns under sub-section (1) until such work has been resumed.

Explanation.—In this section “season” means the period notified in this behalf by the ⁹[State Government] in the ¹²[Official Gazette].

5A. ¹³[Returns from cotton ginning factories.]—(1) This section shall be in force in ¹⁴[Part C States] only; but the ⁹[State Government] of any other ¹¹[State] may, by notification in the official Gazette, bring this section into force in the ¹¹[State].

(2) The owner of every cotton ginning factory shall submit to the prescribed authority, within such time and in such form as may be prescribed, weekly returns showing the quantity of cotton ginned in the factory during the preceding week and from the commencement of the season to the end of that week.

(3) The ⁹[State Government] shall compile from the weekly returns so submitted, and shall publish in such manner as it thinks fit, a statement showing the total quantity of cotton ginned in the ¹¹[State] during the week and from the commencement of the season to the end of the week, to which the returns relate:

Provided that the quantity of cotton ginned in any individual factory shall not be published.

(4) If default is made in submitting any return as required by sub-section (2), the owner of the factory shall be punished with fine which may extend to fifty rupees.

⁹ Subs. by the A.O. 1950 for “Provincial Government”.

¹⁰ Subs. by the A.O. 1937 for “the Governor-General in Council may direct”.

¹¹ Subs. by the A.O. 1950 for “Province”.

¹² Subs. by the A.O. 1937 for “local official Gazette”.

¹³ Ins. by Act 9 of 1942, s. 2.

¹⁴ Subs. by the A.O. 1950 for “Chief Commissioners’ Provinces”.

(5) The provisions of sub-section (4) of section 5 apply to cotton ginning factories and the returns referred to in sub-section (2) of this section as they apply to cotton pressing factories and the returns referred to in sub-section (1) of section 5, and "season" in this section means the season as notified for the purposes of section 5.]

6. Scales and weights.—(1) No scales or weights shall be used in any cotton ginning or cotton pressing factory other than the scales or weights, if any, prescribed by the ¹⁵[Central Government] as standard for the district in which the factory is situated.

(2) If in any factory any scale or weights is used in contravention of the provisions of sub-section (1), the owner of the factory shall be punished with fine which may extend to fifty rupees or, if he has been previously convicted of any offence under this sub-section, to five hundred rupees.

7. Liability of lessee as owner.—(1) Where the owner of a cotton ginning or pressing factory has leased the factory for a period of not less than one month, in the case of a cotton ginning factory or three months, in the case of a cotton pressing factory, and the lessor retains no interest in the management or profits of the factory and notice of the lease has been given by the lessor and the lessee to the prescribed authority, the lessee shall be deemed to be the owner of the factory, from the date of the notice and for the period of the continuance of the lease, for the purposes of section 3, in respect of the registers maintained or to be maintained from that date and for that period, and for the purposes of sections 4, 5, ¹⁶[5A] and 6.

(2) On the termination of the lease the lessee shall hand over to the lessor the registers maintained under section 3, and the lessor shall forthwith report to the prescribed authority any default of the lessee in complying with the provisions of this sub-section or in maintaining the registers in accordance with the provisions of section 3.

(3) If default is made in handing over any register or making any report as required by this section, the lessor or the lessee, as the case may be, shall be punished with fine which may extend to fifty rupees.

8. Liability on transfer of ownership.—(1) On a transfer of the ownership of a cotton ginning or pressing factory, the transferor shall hand over to the transferee the registers maintained under section 3, and the transferee shall forthwith report to the prescribed authority any default of the transferor in complying with the provisions of this sub-section or in maintaining the registers in accordance with the provisions of section 3.

(2) If default is made in handing over any register or making any report as required by sub-section (1), the transferor or the transferee, as the case may be, shall be punished with fine which may extend to fifty rupees.

9. Structural requirements for factories.—(1) In the case of cotton ginning factories the construction of which is commenced after the commencement of this Act—

(a) gin-houses shall be provided with separate entrances and exits for the bringing in of unginmed and the taking out of ginned cotton respectively, and

(b) the factories shall be constructed in accordance with plans and specifications approved by the prescribed authority:

Provided that nothing in this sub-section shall apply to any factory in which only roller gins are used where the number of such gins is not more than four.

¹⁵ Subs. by the A.O. 1937 for 'Local Government'.

¹⁶ Ins. by Act 9 of 1942, s. 3.

¹⁷[(1A) In any cotton ginning factory, whether erected before or after the commencement of this Act—

- (a) no structural alterations or additions, the construction of which commenced after the 27th day of February, 1939, shall be made so as to minimise the degree of compliance of the factory as a whole with the requirements set forth in clauses (a) and (b) of sub-section (1), and
- (b) every structural addition (whether actually attached to any existing structure in the factory or not), the construction of which commenced after the last-mentioned date, shall be constructed in accordance with plans and specifications approved by the prescribed authority:

Provided that nothing in this sub-section shall apply to any factory in which, after any alteration or addition has been made, only roller gins are used where the number of such gins is not more than four.]

(2) Within such period after the commencement of this Act as may be prescribed, the owner of every cotton pressing factory in which cotton is handled on the ground floor shall cause the press house to be paved or provided with other suitable flooring to the satisfaction of the prescribed authority.

(3) If the owner of any factory fails to comply with any provision of this section which is applicable to the factory, he shall be punished with fine which may extend to one hundred rupees.

(4) (a) Where the owner of a factory has been convicted under sub-section (3), the prescribed authority may serve on the owner of the factory an order in writing directing that such alterations shall be made in the factory, before a specified date, as in the opinion of the said authority are necessary to secure compliance with the provisions of sub-section (1), ¹⁷[sub-section (1A)] or sub-section (2), as the case may be.

(b) Where the alterations are not made in accordance with the order served under clause (a) of this sub-section, the prescribed authority may serve on the owner and on the occupier, if any, of the factory an order in writing directing that the work of ginning or pressing cotton in such factory shall be suspended until the alterations have been made in accordance with the order served under clause (a) of this sub-section and the owner and the occupier, if any, shall be jointly and severally liable to fine which may extend to fifty rupees for each day on which cotton is ginned or pressed in the factory in contravention of the order served under this clause.

10. Liability of officers of a company.—Where the person guilty of an offence under this Act is a company, every director, manager, secretary and other officer thereof who is knowingly a party to the default shall also be guilty of the like offence and liable to the like punishment.

11. Cognizance of offences.—(1) No prosecution under this Act shall be instituted except by or with the previous sanction of the District Magistrate or a Chief Presidency Magistrate or a Magistrate of the first class specially empowered in this behalf by the ¹⁸[State Government].

(2) No offence punishable under this Act shall be tried by any Court inferior to that of a Presidency Magistrate or of a Magistrate of the first class.

12. Power of the Central Government to make rules.—The ¹⁹[Central Government] may make rules to provide for—

- (a) the allotment of a special mark to be used by each pressing factory for the purpose of the marking of bales;

¹⁷ Ins. by Act 14 of 1939, s. 2.

¹⁸ Subs. by the A.O. 1950 for "Provincial Government".

¹⁹ Subs. by the A.O. 1937 for "Governor-General in Council".

(b) the manner in which bales shall be marked; and

²⁰[(c) the standard weight and scale to be used in cotton ginning and cotton pressing factories in any part of ²¹[the territories to which this Act extends] and the inspection of the same].

13. Power of the State Government to make rules.—The ²²[State Government] may, by notification in the ²³[Official Gazette], make rules consistent with this Act to provide for all or any of the following matters, namely:—

(a) the forms in which registers, records and returns are to be maintained or submitted, and the inspection of records and registers;

(b) the appointment of the authority to whom and the time within which the returns required by ²⁴[sections 5 and 5A] shall be made;

²⁵ * * * * *

(d) the appointment of authorities for the purposes of sections 7, 8 and 9;

(e) the manner of service of orders made under section 9;

(f) the powers of entry and inspection which may be exercised by District Magistrates or by any officer specially empowered in this behalf by the ²²[State Government];

(g) any other matter which is to be or may be prescribed or for which provision is necessary in order to carry out the purposes of this Act.

14. Power to reject unmarked bales in fulfilment of contracts.—²⁶[(1)] After the expiration of one year from the commencement of this Act, any person who has made a contract for the purchase of baled cotton may require that no bales other than bales marked ²⁷[with the mark prescribed under section 4 for the factory in which they were pressed,] shall be supplied in fulfilment of such contract, and, if he does so require, no bale not so marked shall be tenderable in fulfilment of the contract:

²⁸ * * * * *

²⁹[(2) Any bale marked in accordance with the provisions of section 4 shall within the meaning of the Indian Evidence Act, 1872 (I of 1872), be presumed for all purposes as between the parties to a contract for the purchase of baled cotton, to have been so marked before leaving the factory in which it was pressed.]

15. Protection for acts done under Act.—No suit or other legal proceeding shall be instituted against any person in respect of anything which is in good faith done or intended to be done under this Act.

INDIAN COTTON GINNING AND PRESSING FACTORIES RULES, 1925

Arrangement of Paragraphs

1. Short title and commencement.
2. Definitions.
3. Application.
4. Special mark.
5. Marks not transferable.
6. Serial No.
7. Manner of marking.

²⁰ Subs. by A. O. 1937, for the original clause.

²¹ Subs. by Act 3 of 1951 for "Part A States and Part C States".

²² Subs. by the A.O. 1950 for "Provincial Government".

²³ Subs. by the A.O. 1937 for "local official Gazette".

²⁴ Subs. by Act 9 of 1942, s. 4, for "section 5".

²⁵ Cl. (c) was omitted by the A.O. 1937.

²⁶ Renumbered by Act 14 of 1939, s. 3.

²⁷ Subs. by Act 14 of 1939, s. 3, for "in accordance with section 4".

²⁸ Proviso, omitted, *ibid*.

²⁹ Ins., *ibid*.

INDIAN COTTON GINNING AND PRESSING FACTORIES RULES, 1925¹

In exercise of the power conferred by section 12 of the Cotton Ginning and Pressing Factories Act, 1925 (XII of 1925), the Central Government is pleased to make the following rules:—

1. Short title and commencement.—(1) These rules may be called the Indian Cotton Ginning and Pressing Factories Rules, 1925.

(1A) They extend to the whole of India except the State of Jammu and Kashmir.

(2) They shall come into force on the eighth day of August, 1925.

2. Definitions.—In these rules—

“Act” means the Cotton Ginning and Pressing Factories Act, 1925.

“Section” means a section of the Act.

3. The owner or lessee of every cotton pressing factory shall apply to the authority appointed to receive returns under sub-section (1) of Section 5 for the allotment of the mark required by section 4 to be used for such factory. Such application shall be made, in the case of factories in existence at the commencement of these rules, on or before the 1st September, 1925, and, in case of factories constructed thereafter not less than one month before work commences in the factory.

Provided that the authority aforesaid may at any time allot the mark to be used in a factory in respect of which no application has been made and may intimate the allotment to the owner of such factory.

4. Special mark.—(1)—The special mark allotted to each factory shall consist of a letter denoting the State in which the factory is situated together with a number denoting the factory.

(2) The letters denoting the State shall be as follows:—

For presses situated in the State of Bombay, the letter	B
For presses situated in the State of Madras, the letter	M
For presses situated in the State of Madhya Pradesh, the letter	C
For presses situated in the State of Punjab, the letter	H
For presses situated in the State of West Bengal, the letter	N
For presses situated in the State of Uttar Pradesh, the letter	U
For presses situated in the State of Bihar, the letter	Q
For presses situated in the State of Orissa, the letter	O
For presses situated in the State of Assam, the letter	A

(3) The number denoting the factory shall run consecutively within each State.

5. Marks not transferable.—No special marks once allotted shall be transferred to another factory:—

Provided that when a press is transferred from one State to another, the original allotted mark shall no longer be used and application shall be made to the prescribed authority for allotment of a fresh mark.

6. Serial No.—The serial number shall consist of two parts. The first part shall consist of two numerals being the last two integers of the calendar year in which the cotton year has commenced and the second part shall be the running number of the bale according to the press factory register. A new series of running number shall be started at the commencement of each cotton year. The cotton year shall commence on the 1st day of September in each calendar year and shall terminate on the thirty-first day of August next following, except in the State of Madras when the dates for the commencement and ending of the cotton year shall be the first day of February and thirty-first day of January respectively.

6A. The statements compiled by the State Government under sub-section (2) of section 5 shall be published every week in the Fort St. George Gazette in the form specified in Schedule D.

7. Manner of marking.—Every bale of cotton pressed in a cotton pressing factory shall be marked in the following manner:—

(1) The special mark and the serial number shall be in English figures and letters and shall be clearly decipherable.

(2) The special mark and serial number shall be punched on one or more of the hoops or stencilled on the hessian on the lashed side of the bale or may be both so punched and stencilled, provided however that, if stencilled such mark and number shall not be stencilled on an end hessian.

8. The inspection of weights and scales used in the cotton ginning and cotton pressing factories in the State of Bombay shall be carried out in accordance with the provisions of the Bombay Weights and Measures Rules, 1934.

¹ These Rules were published under the Department of Commerce Notification No. 23-C (2) dated the 8th August, 1925 as amended.

MODEL RULES FOR THE PROTECTION OF HEALTH AND SANITARY ARRANGEMENTS FOR WORKERS EMPLOYED BY C.P.W.D. OR ITS CONTRACTORS.

Arrangement of Paragraphs

1. Application.
2. Definitions.
3. First aid.
4. Drinking water.
5. Wash and bath places.
6. Scale of accommodation in latrines and urinals.
7. Latrines and urinals for women.
8. Latrines and urinals.
9. Construction of latrines.
10. Disposal of excreta.
11. Provision of shelter during rest.
12. Creche.
13. Canteen.

MODEL RULES FOR THE PROTECTION OF HEALTH AND SANITARY ARRANGEMENTS FOR WORKERS EMPLOYED BY C.P.W.D. OR ITS CONTRACTORS¹

1. Application.—These rules shall apply to all construction works in charge of Central P. W. D.

2. Definitions.—(i) Work place means a place at which at an average fifty or more workers are employed in connection with construction work.

(ii) Large work place means a place at which at an average 500 or more workers are employed in connection with construction work.

3. First aid.—(a) At every work place there shall be maintained in a readily accessible place, first aid appliance, including an adequate supply of sterilized dressing and sterilized cotton wool. The appliance shall be kept in good order and in large work place they shall be placed under the charge of a responsible person who shall be readily available during working hours.

(b) At large work places where hospital facilities are not available within easy distance of the works, first aid posts shall be established and run by a trained compounder.

(c) Where large work places are remote from regular hospital an indoor ward shall be provided with one bed for every 250 employees.

(d) Where large work places are situated in cities, towns or in their suburbs and no beds are considered necessary owing to the proximity of city or town hospital, an ambulance shall be provided to facilitate removal of urgent cases to those hospitals. At other work places, some conveyance facilities, such as, a car shall be kept readily available to take injured persons or persons suddenly taken seriously ill, to the nearest hospital.

4. Drinking water.—(a) In every place, there shall be provided and maintained at suitable places, easily accessible to labour, sufficient supply of water pit.

(b) Where drinking water is obtained from an intermittent public water supply, each work place shall be provided with a storage where such drinking water shall be stored.

(c) Every water supply of storage shall be at a distance of not less than 50 feet from any latrine, drain or other source of pollution. Where water has to be drawn from an existing well, which is within such proximity of latrine, drain or any other source of pollution, the well shall be properly cleaned before water is drawn from it for drinking.

¹ These Model Rules were framed by the Central Government in regard to labour employed in public works. The Central Government have recommended to the various State Governments to follow, as far as possible, the provisions contained in these model rules regarding health and sanitary arrangements in their public works.

In December, 1953, the Central Government decided to have a rapid *ad hoc* survey for collection of necessary data in regard to the labour conditions in the Building and Construction Industry and the enquiry was completed in March 1954 by the Labour Bureau, Ministry of Labour, who reported that "although it may appear to be a very sweeping statement one can not help remarking that the various Rules and Regulations relating to labour in the Building and Construction Industry are observed more in their breach than in their compliance."

All such wells shall be entirely closed in and be provided with trap doors which shall be dust and water proof.

(d) A reliable pump shall be fitted to each covered well, the trap door shall be kept locked and opened only for cleaning or inspection which shall be done at least once a month.

(e) The temperature of drinking water supplied to workers shall not exceed 90°F.

5. **Wash and bath places.**—(i) Adequate washing and bathing places shall be provided separately for men and women.

(ii) Such places shall be kept in clean and drained condition.

6. **Scale of accommodation in latrines and urinals.**—There shall be provided within the precincts of every work place, latrines and urinals in an accessible place, and the accommodation separately for each of them shall not be less than the following scales:—

	No. of Seats.
(a) Where the number of persons employed does not exceed 50	... 2
(b) Where the number of persons employed exceeds 50, but does not exceed 100	... 3
(c) For every additional 100	... 3 per 100

In particular cases, the Executive Engineers shall have the power to vary the scale where necessary.

7. **Latrines and urinals for women.**—If women are employed, separate latrines and urinals screened from those for men and marked in the vernacular in conspicuous letters "For Women only" shall be provided on the scale laid in rule 6. Those for men shall be similarly marked "For Men only". A poster showing the figure of a man and a woman shall also be exhibited at the entrance of latrines for each sex. There shall be adequate supply of water close to the urinals and latrines.

8. **Latrines and urinals.**—Except in work places provided with water flushed latrines connected with a water borne sewage system, all latrines shall be provided with receptacles on dry earth system which shall be cleaned at least four times daily and at least twice during working hours and kept in strictly sanitary conditions. The receptacles shall be tarred inside and outside at least once a year.

9. **Construction of latrines.**—The inside walls shall be constructed of masonry some suitable heat resisting, non-absorbant material and shall be cement washed inside and outside at least once a year. The dates of cement washing shall be noted in a register maintained for this purpose and kept available for inspection.

10. **Disposal of excreta.**—Unless otherwise arranged for by the local sanitary authority, arrangements for proper disposal of excreta incineration at the work place shall be made by means of a suitable incinerator approved by an Assistant Director of Public Health or the Municipal Medical Officer of Health, as the case may be, in whose jurisdiction the work place is situated. Alternatively excreta may be disposed off by putting a layer of a night soil at the bottom of pucca tank prepared for the purpose and covering it with a 6 in. layer of waste of refuse and then covering it up with layer of earth for fortnight when it will turn into manure.

11. **Provision of shelter during rest.**—At every work place there shall be provided free of cost two suitable sheds one for meals and the other for rest, for the use of labour. The height of the shelter shall not be less than 11 ft. from the floor level to the lowest part of the roof.

12. **Creche.**—At every work place at which 50 or more women workers are ordinarily employed, there shall be provided two huts for the use of children under the age of 6 years belonging to such women. One hut shall be used for infants' games and the other as their bed room. The huts shall not be constructed on a lower standard than the following:—

(i) Thatched roof.

(ii) Mud floor and walls.

(iii) Planks spread over the mud floor and covered with matting. The huts shall be provided with suitable and sufficient openings for light and ventilation. There shall be adequate provision for sweepers to keep the place clean. There shall be two dais in attendance. Sanitary utensils shall be provided to the satisfaction of the Health Officer of the area concerned. The use of the huts shall be restricted to children, their attendants and mothers of the children.

13. **Canteen.**—A cooked food canteen on a moderate scale shall be provided for the benefit of workers wherever it is considered expedient.

14. The above rules shall be incorporated in the contracts and in notices inviting tenders and shall form an integral part of the contract.

INDIAN BOILERS ACT, 1923 (V OF 1923)

Statement of Objects Reasons¹

Under the Devolution Rules the regulation of boilers is a provincial subject, subject to legislation by the Indian Legislature. There are at present seven Provincial Boiler Acts; some of them were framed many years ago and are out of date, and all of them are inconsistent with each other. The result is that different rules are enforced in different provinces, and the anomalous position has been reached that a boiler which is allowed to work up to a certain pressure in one province can only be worked to a much lower pressure when transferred to another province. Further, in the interest of safety, a boiler requires regular inspection in whatever province it may be situated, and it is wrong that in certain provinces no boiler law should be in force at all. The object therefore of the present legislation is:

(a) to secure uniformity throughout India in all technical matters connected with boiler regulations, *e.g.*, standards of construction, maximum pressure, and

(b) to insist on the registration and regular inspection of all boilers throughout India.

This object can only be attained by an all-India Act with uniform regulations throughout the country: under the Devolution Rules, as explained above, it is the function of the Central Government to promulgate such an Act.

2. The subject being a highly technical one a Committee of three persons including two boiler experts was appointed to examine the existing provincial laws and to put forward proposals for an all-India Act, based on the provisions of these laws brought up to date and co-ordinated. The report of this Committee has been published and the views of Local Governments obtained upon it. The Bill which is now presented to this Assembly is the result of their recommendations as modified after consideration of the views of Local Governments.

3. The only important respect in which the Bill diverges from certain of the existing Acts is with regard to certificated boiler attendants. It is only in a few provinces that boiler attendants are required to possess certificates of competency. The Industrial Commission recommended that this requirement was unnecessary, a recommendation which the Boiler Laws Committee endorsed, and in which Local Governments, including those now insisting on certificates have unanimously agreed.

INDIAN BOILERS (AMENDMENT) ACT, 1952 (XXV OF 1952)

Statement of Objects and Reasons²

Economisers do not form an integral part of boilers and hence the provisions of the Indian Boilers Act, 1923, as originally enacted, relating to registration and inspection of boilers, did not apply to economisers. A serious explosion to an economiser which occurred in Bombay demonstrated the necessity of providing for the inspection, *etc.*, of economisers and accordingly in 1947 a new section 2-B was inserted in the Indian Boilers Act which enabled the Central Boilers Board to make regulations for regulating the registration and inspection of economisers. The amendment, however, did not make it possible for rules to be framed so that the economisers could be placed in charge of persons holding a certificate of competency. Thus under the existing provisions of the Act a boiler attendant must be the holder of a certificate of competency, but no such certificate of competency can be prescribed for handling economisers.

It is proposed to provide that economisers also should be in charge of persons holding certificate of competency.

INDIAN BOILERS ACT, 1923 (V OF 1923)

Arrangement of Sections

1. Short title, extent and commencement.
2. Definitions.
- 2A. Application of Act to feed-pipes.
- 2B. Application of Act to economisers.
3. Limitation of Application.
4. Power to limit extent.
5. Appointment of Chief Inspectors and Inspectors.
6. Prohibition of use of unregistered or uncertificated boiler.
7. Registration.

¹ Gazette of India, 1922, Part V, p. 249.

² Gazette of India, 1952.

8. Renewal of certificate.
 9. Provisional orders.
 10. Use of boiler pending grant of certificate.
 11. Revocation of certificate or provisional order.
 12. Alterations and renewals to boilers.
 13. Alterations and renewals to steam-pipes.
 14. Duty of owners at examination.
 15. Production of certificates, etc.
 16. Transfer of certificates, etc.
 17. Powers of entry.
 18. Report of accidents.
 19. Appeals to Chief Inspector.
 20. Appeals to appellate authority.
 21. Finality of orders.
 22. Minor penalties.
 23. Penalties for illegal use of boiler.
 24. Other penalties.
 25. Penalty for tampering with register mark.
 26. Limitation and previous sanction for prosecution.
 27. Trial of offences.
 - 27A. Central Boilers Board.
 28. Power to make regulations.
 29. Power to make rules.
 30. Penalty for breach of rules.
 31. Publication of regulations and rules.
 32. Recovery of fees, etc.
 33. Applicability to the Government.
 34. Exemptions.
 - Power to suspend in case of emergency.
 35. [Repealed.]
- The Schedule.*—[Repealed.]

INDIAN BOILERS ACT, 1923 (V OF 1923)¹

[23rd February, 1923.]

An Act to consolidate and amend the law relating to steam-boilers.

Whereas it is expedient to consolidate and amend the law relating to steam-boilers; it is hereby enacted as follows:—

1. Short title, extent and commencement.—(1) This Act may be called the Indian Boilers Act, 1923.

²[(2) It extends to the whole of India ³[except the State of Jammu and Kashmir].]

(3) It shall come into force on such date⁴ as the ⁵[Central Government] may, by notification in the ⁶[Official Gazette], appoint.

2. Definitions.—In this act, unless there is anything repugnant in the subject or context,—

(a) “accident” means an explosion of a boiler or steam-pipe or any damage to a boiler or steam-pipe which is calculated to weaken the strength thereof so as to render it liable to explode;

⁷[(aa) “Board” means the Central Boilers Board constituted under section 27A;]

¹ For Statement of Objects and Reasons, see Gazette of India, 1922, Pt. V, page 249; and for Report of Joint Committee, see *ibid.*, 1923, Pt. V, page 15; also p. 117 ante.

This Act has been extended to Berar by the Berar Laws Act, 1941 (4 of 1941).

² Subs. by the A. O. 1950 for the former sub-section (2).

³ Subs. by the Part B States (Laws) Act, 1951 (3 of 1951) for “except Part B States.”

⁴ 1st January, 1924, see Notification No. A-61, dated the 4th December, 1923, Gazette of India, 1923, Pt. I, page 1695.

⁵ Subs. by the A. O. 1937, for “G. G. in C.”

⁶ Subs. by the A. O. 1937, for “Gazette of India”.

⁷ Ins. by the Indian Boilers (Amendment) Act, 1937 (11 of 1937), s. 3.

- (b) "boiler" means any closed vessel exceeding five gallons in capacity which is used expressly for generating steam under pressure* * * * and includes any mounting or other fitting attached to such vessel, which is wholly or partly under pressure when steam is shut off;
- (c) "Chief Inspector" and "Inspector" mean, respectively, a person appointed to be a Chief Inspector and an Inspector under this Act;
- ⁹[(cc) "economiser" means any part of a feed-pipe that is wholly or partially exposed to the action of the flue gases for the purpose of recovery of waste heat;
- (ccc) "feed-pipe" means any pipe or connected fitting wholly or partly under pressure through which feed water passes directly to a boiler and ¹⁰[which] does not form an integral part thereof;]
- (d) "owner" includes any person using a boiler as agent of the owner thereof and any person using a boiler which he has hired or obtained on loan from the owner thereof;
- (e) "prescribed" means prescribed by regulations or rules made under this Act;
- (f) "steam-pipe" means any main pipe exceeding three inches in internal diameter through which steam passes directly from a boiler to a prime-mover or other first user, and includes any connected fitting of a steam-pipe; and
- (g) "structural alteration, addition or renewal" shall not be deemed to include any renewal or replacement of a petty nature when the part or fitting used for replacement is not inferior in strength, efficiency or otherwise to the replaced part or fitting.

¹¹[2A. **Application of Act to feed-pipes.**—Every reference in this Act (except where the word 'steam-pipe' is used in clause (f) of section 2), to a steam-pipe or steam-pipes shall be deemed to include also a reference to a feed-pipe or feed-pipes, respectively.]

¹²[2B. **Application of Act to economisers.**—Every reference in this Act to a boiler or boilers (except in clause (ccc) of section 2¹³ * * * * and section 34) shall be deemed to include also a reference to an economiser or economisers, respectively.]

3. Limitation of application.—(1) Nothing in this Act shall apply in the case of any boiler or steam-pipe—

- (a) in any steam-ship as defined in section 3 of the ¹⁴Indian Steamships Act, 1884 (VII of 1884), or in any steam-vessel as defined in section 2 of the Inland Steam-vessels Act, 1917 (I of 1917); or

¹⁵[(b) belonging to, or under the control of, the Army, Navy or Air Force; or]

⁸ The words "for use outside such vessel" rep. by the Indian Boilers (Amendment) Act, 1929 (9 of 1929), s. 2.

⁹ Subs. by the Indian Boilers (Amendment) Act, 1947 (34 of 1947), s. 2, for the former clause (cc).

¹⁰ Ins. by the Repealing and Amending Act, 1949 (40 of 1949), s. 3 and Sch. II.

¹² Ins. by the Indian Boilers (Amendment) Act, 1947 (34 of 1947), s. 3.

¹³ The words, letters and figures "clause (e) of section 6, clauses (c) and (d) of section 11 and clause (d) of section 29" and omitted by the Indian Boilers (Amendment) Act, 1952 (25 of 1952).

¹⁴ See now the Indian Merchant Shipping Act, 1923 (21 of 1923), s. 2.

¹⁵ Subs. by the Indian Boilers (Amendment) Act, 1951 (38 of 1951), s. 2 for the former clause.

¹⁶[(c) appertaining to a sterilizer or disinfecter of a type such as is commonly used in hospitals, if the boiler does not exceed twenty gallons in capacity.]

(2) The ¹⁷[Central Government] may, by notification in the ¹⁸[Official Gazette], declare that the provisions of this Act shall not apply in the case of boilers or steam-pipes, or of any specified class of boilers or steam-pipes, belonging to or under the control of any railways administered ¹⁹[by the ²⁰[Central Government] or by any ²¹[State Government]] or by any railway company as defined in clause (5) of section 3 of the Indian Railways Act, 1890 (IX of 1890).

22* * * * *

4. Power to limit extent.—The ²¹[State Government] may, by notification in the ¹⁸[Official Gazette], exclude²³ any specified area from the operation of all or any specified provisions of this Act.

5. Appointment of Chief Inspectors and Inspectors.—(1) The ²¹[State Government] may appoint such persons as it thinks fit to be Inspectors for the ²⁴[State] for the purposes of this Act, and may define the local limits within which each Inspector shall exercise the powers and perform the duties conferred and imposed on Inspectors by or under this Act.

(2) The ²¹[State Government] shall likewise appoint a person to be Chief Inspector for the ²⁴[State] who may, in addition to the powers and duties conferred or imposed on the Chief Inspector by or under this Act, exercise any power or perform any duty so conferred or imposed on Inspectors.

(3) Every Chief Inspector and every Inspector shall be deemed to be a public servant within the meaning of the Indian Penal Code (XLV of 1860).

6. Prohibition of use of unregistered or uncertified boiler.—Save as otherwise expressly provided in this Act, no owner of a boiler shall use the boiler or permit it to be used—

- (a) unless it has been registered in accordance with the provisions of this Act;
- (b) in the case of any boiler, which has been transferred from one ²⁴[State] to another, until the transfer has been reported in the prescribed manner;
- (c) unless a certificate or provisional order authorising the use of the boiler is for the time being in force under this Act;
- (d) at a pressure higher than the maximum pressure recorded in such certificate or provisional order;
- (e) where the ²¹[State Government] has made rules requiring the boilers shall be in charge of persons holding certificates of competency, unless the boiler is in charge of a person holding the certificate required by such rules:

Provided that any boiler registered, or any boiler certified or licensed, under any Act hereby repealed shall be deemed to have been registered or certified, as the case may be, under this Act;

²³ The Andaman and Nicobar Islands have been excluded from the operation of the provisions of this Act, *see* Notification No. G(B)-10, dated the 21st June, 1924, Gazette of India, 1924, Pt. I, page 585.

²⁴ Subs. by the A. O. 1950, for "Province".

25 * * * * *

7. Registration.—(1) The owner of any boiler which is not registered under the provisions of this Act may apply to the Inspector to have the boiler registered. Every such application shall be accompanied by the prescribed fee.

(2) On receipt of an application under sub-section (1), the Inspector shall fix a date, within thirty days or such shorter period as may be prescribed from the date of the receipt, for the examination of the boiler and shall give the owner thereof not less than ten days notice of the date so fixed.

(3) On the said date the Inspector shall proceed to measure and examine the boiler and to determine in the prescribed manner the maximum pressure, if any, at which such boiler may be used, and shall report the result of the examination to the Chief Inspector in the prescribed form.

(4) The Inspector, on receipt of the report, may—

(a) register the boiler and assign a register number thereto either forthwith or after satisfying himself that any structural alteration, addition or renewal which he may deem necessary has been made in or to the boiler or any steam-pipe attached thereto, or

(b) refuse to register the boiler;

Provided that where the Chief Inspector refuses to register a boiler, he shall forthwith communicate his refusal to the owner of the boiler together with the reasons therefor.

(5) The Chief Inspector shall, on registering the boiler, order the issue to the owner of a certificate in the prescribed form authorising the use of the boiler for a period not exceeding twelve months at a pressure not exceeding such maximum pressure as he thinks fit, and as is in accordance with the regulations made under this Act.

²⁶[Provided that a certificate issued under this sub-section in respect of an economiser may authorise its use for a period not exceeding twenty-four months.]

(6) The Inspector shall forthwith convey to the owner of the boiler the orders of the Chief Inspector and shall in accordance therewith issue to the owner any certificate of which the issue has been ordered, and where the boiler has been registered, the owner shall within the prescribed period cause the register number to be permanently marked thereon in the prescribed manner.

8. Renewal of certificate.—(1) A certificate authorising the use of a boiler shall cease to be in force—

(a) on the expiry of the period for which it was granted; or

(b) when any accident occurs to the boiler; or

(c) when the boiler is moved, the boiler not being a vertical boiler the heating surface of which is less than two hundred square feet, or a portable or vehicular boiler; or

(d) when any structural alteration, addition or renewal is made in or to the boiler; or

(e) if the Chief Inspector in any particular case so directs, when any structural alteration, addition or renewal is made in or to any steam-pipe attached to the boiler; or

(f) on the communication to the owner of the boiler of an order of the Chief Inspector or Inspector prohibiting its use on the ground that it or any steam-pipe attached thereto is in a dangerous condition.

²⁵ Proviso repealed by the Repealing and Amending Act, 1939 (34 of 1939), s. 3 and Sch. II.

²⁶ This proviso was added by the Indian Boilers (Amendment) Act, 1947 (34 of 1947), s. 4.

(2) When an order is made under clause (f) of sub-section (1), the grounds on which the order is made shall be communicated to the owner with the order.

(3) When a certificate ceases to be in force, the owner of the boiler may apply to the Inspector for a renewal thereof for such period not exceeding twelve months as he may specify in the application.

²⁷[Provided that where the certificate relates to an economiser, the application for its renewal may be for a period not exceeding twenty-four months.]

(4) An application under sub-section (3) shall be accompanied by the prescribed fee and, on receipt thereof, the Inspector shall fix a date, within thirty days or such shorter period as may be prescribed from the date of the receipt, for the examination of the boiler and shall give the owner thereof not less than ten days' notice of the date so fixed:

Provided that, where the certificate has ceased to be in force owing to the making of any structural alteration, addition, or renewal, the Chief Inspector may dispense with the payment of any fee.

²⁷[Provided further that in the case of an economiser, the owner shall be given not less than thirty days' notice of the date fixed for its examination.]

(5) On the said date the Inspector shall examine the boiler in the prescribed manner, and if he is satisfied that the boiler and the steam-pipe or steam-pipes attached thereto are in good condition shall issue a renewal certificate authorising the use of the boiler for such period not exceeding twelve months and at a pressure not exceeding such maximum pressure as he thinks fit and as is in accordance with the regulations made under this Act:

²⁷[Provided that a renewed certificate issued under this sub-section in respect of an economiser may authorise its use for a period not exceeding twenty-four months.]

Provided ²⁷[further] that if the Inspector—

(a) proposes to issue any certificate—

(i) having validity for a less period than the period entered in the application, or

(ii) increasing or reducing the maximum pressure at which the boiler may be used, or

(b) proposes to order any structural alteration, addition or renewal to be made in or to the boiler or any steam-pipe attached thereto, or

(c) is of opinion that the boiler is not fit for use,

the Inspector shall, within forty-eight hours of making the examination, inform the owner of the boiler in writing of his opinion and the reasons therefor, and shall forthwith report the case for orders to the Chief Inspector.

(6) The Chief Inspector, on receipt of a report under sub-section (5) may, subject to the provisions of this Act and of the regulations made hereunder, order the renewal of the certificate in such terms and on such conditions, if any, as he thinks fit, or may refuse to renew it:

Provided that where the Chief Inspector refuses to renew a certificate, he shall forthwith communicate his refusal to the owner of the boiler, together with the reasons therefor.

(7) Nothing in this section shall be deemed to prevent an owner of a boiler from applying for a renewed certificate therefor at any time during the currency of a certificate.

9. Provisional orders.—Where the Inspector reports the case of any boiler to the Chief Inspector under sub-section (3) of section 7 or sub-section (5) of section 8, he may, if the boiler is not a boiler the use of which has been pro-

²⁷ Added by the Indian Boilers (Amendment) Act, 1947 (34 of 1947), s. 5.

hibited under clause (f) of sub-section (1) of section 8, grant to the owner thereof a provisional order in writing permitting the boiler to be used at a pressure not exceeding such maximum pressure as he thinks fit and as is in accordance with the regulations made under this Act pending the receipt of the orders of the Chief Inspector. Such provisional order shall cease to be in force—

(a) on the expiry of six months from the date on which it is granted,
or

(b) on receipt of the orders of the Chief Inspector, or

(c) in any of the cases referred to in clauses (b), (c), (d), (e) and (f) of sub-section (1) of section 8;

and on so ceasing to be in force shall be surrendered to the Inspector.

10. Use of boiler pending grant of certificate.—(1) Notwithstanding anything hereinbefore contained, when the period of a certificate relating to a boiler has expired, the owner shall, provided that he has applied before the expiry of that period for a renewal of the certificate, be entitled to use the boiler at the maximum pressure entered in the former certificate pending the issue of orders on the application.

(2) Nothing in sub-section (1) shall be deemed to authorise the use of a boiler in any of the cases referred to in clauses (b), (c), (d), (e) and (f) of sub-section (1) of section 8 occurring after the expiry of the period of the certificate.

11. Revocation of certificate or provisional order.—The Chief Inspector may at any time withdraw or revoke any certificate or provisional order on the report of an Inspector or otherwise—

(a) if there is reason to believe that the certificate or provisional order has been fraudulently obtained or has been granted erroneously or without sufficient examination; or

(b) if the boiler in respect of which it has been granted has sustained injury or has ceased to be in good condition; or

(c) where the ²⁸[State Government] has made rules requiring that boilers shall be in charge of persons holding certificates of competency, if the boiler is in charge of a person not holding the certificate required by such rules; or

(d) where no such rules have been made, if the boiler is in charge of a person who is not, having regard to the condition of the boiler in the opinion of the Chief Inspector competent to have charge thereof:

Provided that where the Chief Inspector withdraws or revokes a certificate or provisional order on the ground specified in clause (d), he shall communicate to the owner of the boiler his reasons in writing for the withdrawal or revocation, and the order shall not take effect until the expiry of thirty days from the receipt of such communication.

12. Alterations and renewals to boilers.—No structural alteration, addition or renewal shall be made in or to any boiler registered under this Act unless such alteration, addition or renewal has been sanctioned in writing by the Chief Inspector.

13. Alterations and renewals to steam-pipes.—Before the owner of any boiler registered under this Act makes any structural alteration, addition or renewal in or to any steam-pipe attached to the boiler, he shall transmit to the Chief Inspector a report in writing of his intention, and shall send therewith such particulars of the proposed alteration, addition or renewal as may be prescribed.

²⁸ Subs. by the A. O. 1950 for "Provincial Government".

14. Duty of owner at examination.—(1) On any date fixed under this Act for the examination of a boiler, the owner thereof shall be bound—

- (a) to afford to the Inspector all reasonable facilities for the examination and all such information as may reasonably be required of him;
- (b) to have the boiler properly prepared and ready for examination in the prescribed manner; and
- (c) in the case of an application for the registration of a boiler, to provide such drawings, specifications, certificates and other particulars as may be prescribed.

(2) If the owner fails, without reasonable cause, to comply with the provisions of sub-section (1), the Inspector shall refuse to make the examination and shall report the case to the Chief Inspector who shall, unless sufficient cause to the contrary is shown, require the owner to file a fresh application under section 7 or section 8, as the case may be, and may forbid him to use the boiler notwithstanding anything contained in section 10.

15. Production of certificates, etc.—The owner of any boiler who holds a certificate or provisional order relating thereto shall, at all reasonable times during the period for which the certificate or order is in force, be bound to produce the same when called upon to do so by a District Magistrate, Commissioner of Police or Magistrate of the first class having jurisdiction in the area in which the boiler is for the time being, or by the Chief Inspector or by an Inspector or by any Inspector appointed under the ²⁹Indian Factories Act, 1911 (XII of 1911), or by any person specially authorised in writing by a District Magistrate or Commissioner of Police.

16. Transfer of certificates, etc.—If any person becomes the owner of a boiler during the period for which a certificate or provisional order relating thereto is in force, the preceding owner shall be bound to make over to him the certificate or provisional order.

17. Power of entry.—An Inspector may, for the purpose of inspecting or examining a boiler or any steam-pipe attached thereto or of seeing that any provision of this Act or of any regulation or rule made hereunder has been or is being observed, at all reasonable times enter any place or building within the limits of the area for which he has been appointed in which he has reason to believe that a boiler is in use.

18. Report of accidents.—(1) If any accident occurs to a boiler or steam-pipe, the owner or person in charge thereof shall, within twenty-four hours of the accident, report the same in writing to the Inspector. Every such report shall contain a true description of the nature of the accident and of the injury, if any, caused thereby to the boiler or to the steam-pipe or to any person, and shall be in sufficient detail to enable the Inspector to judge of the gravity of the accident.

(2) Every person shall be bound to answer truly to the best of his knowledge and ability every question put to him in writing by the Inspector as to the cause, nature or extent of the accident.

19. Appeals to Chief Inspector.—Any person considering himself aggrieved by—

- (a) an order made or purporting to be made by an Inspector in the exercise of any power conferred by or under this Act, or
- (b) a refusal of an Inspector to make any order or to issue any certificate which he is required or enabled by or under this Act to make or issue,

²⁹ See now the Factories Act, 1948 (63 of 1948).

may, within thirty days from the date on which such order or refusal is communicated to him, appeal against the order or refusal to the Chief Inspector.

20. Appeals to appellate authority.—Any person considering himself aggrieved by an original or appellate order of the Chief Inspector—

- (a) refusing to register a boiler or to grant or renew a certificate in respect of a boiler; or
- (b) refusing to grant a certificate having validity for the full period applied for; or
- (c) refusing to grant a certificate authorising the use of a boiler at the maximum pressure desired; or
- (d) withdrawing or revoking a certificate or provisional order; or
- (e) reducing the amount of pressure specified in any certificate or the period for which such certificate has been granted; or
- (f) ordering any structural alteration, addition or renewal to be made in or to a boiler or steam-pipe, or refusing sanction to the making of any structural alteration, addition or renewal in or to a boiler,

may, within thirty days of the communication to him of such order, lodge with the Chief Inspector an appeal to an appellate authority to be constituted by the ³⁰[State Government] under this Act.

21. Finality of orders.—An order of an appellate authority under section 20 and, save as otherwise provided in sections 19 and 20, an order of the Chief Inspector or of an Inspector shall be final and shall not be called in question in any Court.

22. Minor penalties.—Any owner of a boiler who refuses or without reasonable excuse neglects—

- (i) to surrender a provisional order as required by section 9, or
- (ii) to produce a certificate or provisional order when duly called upon to do so under section 15, or
- (iii) to make over to the new owner of a boiler a certificate or provisional order as required by section 16,

shall be punishable with fine which may extend to one hundred rupees.

23. Penalties for illegal use of boiler.—Any owner of a boiler who, in any case in which a certificate or provisional order is required for the use of the boiler under this Act, uses the boiler either without any such certificate or order being in force or at a higher pressure than that allowed thereby, shall be punishable with fine which may extend to five hundred rupees, and in the case of a continuing offence, with an additional fine which may extend to one hundred rupees for each day after the first day in regard to which he is convicted of having persisted in the offence.

24. Other penalties.—Any person who—

- (a) uses or permits to be used a boiler of which he is the owner and which has been transferred from one ³¹[State] to another without such transfer having been reported as required by section 6, or
- (b) being the owner of a boiler fails to cause the registered number allotted to the boiler under this Act to be marked on the boiler as required by sub-section (6) of section 7, or
- (c) makes any structural alteration, addition or renewal in or to a boiler without first obtaining the sanction of the Chief Inspector when so

³⁰ Subs. by the A. O. 1950, for "Provincial Government."

³¹ Subs. *ibid*, for "Province."

required by section 12, or to a steam-pipe without first informing the Chief Inspector, when so required by section 13, or

(d) fails to report an accident to a boiler or steam-pipe when so required by section 18, or

(e) tampers with a safety valve of a boiler so as to render it inoperative at the maximum pressure at which the use of the boiler is authorised under this Act.

shall be punishable with fine which may extend to five hundred rupees.

25. Penalty for tampering with register mark.—(1) Whoever removes, alters, defaces, renders invisible or otherwise tampers with the register number marked on a boiler in accordance with the provisions of this Act or any Act repealed hereby, shall be punishable with fine which may extend to five hundred rupees,

(2) Whoever fraudulently marks upon a boiler a register number which has not been allotted to it under this Act or any Act repealed hereby, shall be punishable with imprisonment which may extend to two years, or with fine, or with both.

26. Limitation and previous sanction for prosecutions.—No prosecution for an offence made punishable by or under this Act shall be instituted except within six months from the date of the commission of the offence, and no such prosecution shall be instituted without the previous sanction of the Chief Inspector.

27. Trial of offences.—No offence made punishable by or under this Act shall be tried by a Court inferior to that of a Presidency Magistrate or a Magistrate of the first class.

³²[27A. Central Boilers Board.—(1) A Board to be called the Central Boilers Board shall be constituted to exercise the powers conferred by section 28.

(2) The Board shall consist of ³³[nineteen] members, namely:—

(a) a chairman to be nominated by the ³⁴[Central Government];

³⁵[(b) one member to be nominated by the ³⁶[State] Government ³⁷[of each Part A or Part B State];

(c) one member, holding office for a period of three years, to be nominated ³⁸[by the Central Government to represent Part C States]; and

(d) one member to be nominated by the ³⁹[Chairman, Railway Board.]

(3) Any vacancy occurring in the Board, otherwise than by the expiry of the term of office of the members referred to in clause (c) of sub-section (2), shall be filled as soon as may be by a nomination made by the authority by whom the member vacating office was nominated.

(4) The Board shall have full power to regulate by by-laws or otherwise its own procedure and the conduct of all business to be transacted by the Board.

(5) The powers of the Board may be exercised notwithstanding any vacancy in the Board.]

³² Ins. by the Indian Boilers (Amendment) Act, 1937 (11 of 1937), s. 4.

³³ Subs. by Part B States (Laws) Act, 1951 (3 of 1951) for "twelve".

³⁴ Subs. by the A. O. 1937 for "G. G. in C.".

³⁵ Subs. by the A. O. 1948 for the former clause.

³⁶ Subs. by the A. O. 1950 for "Provincial".

³⁷ Subs. by Act 3 of 1951 for "of each Part A State".

³⁸ Subs. by the A. O. 1950 for "alternately by the Provincial Government of Delhi and the Provincial Government of Ajmer-Merwara".

³⁹ Subs. by the Repealing and Amending Act, 1952 (48 of 1952) for "Chief Commissioner of Railways".

28. Power to make Regulations.—The ⁴⁰[Board] may, by notification in the Gazette of India, make regulations consistent with this Act for all or any of the following purposes, namely:—

- (a) for laying down the standard conditions in respect of material, design and construction which shall be required for the purpose of enabling the registration and certification of a boiler under this Act;
- ^{40a}[(aa) for prescribing the circumstances in which, the extent to which, and the conditions subject to which variation from the standard conditions laid down under clause (a) may be permitted];
- (b) for prescribing the method of determining the maximum pressure at which a boiler may be used;
- (c) for regulating the registration of boilers, prescribing the fees payable therefor, the drawings, specifications, certificates and particulars to be produced by the owner, the method of preparing a boiler for examination, the form of the Inspector's report thereon, the method of marking the register number, and the period within which such number is to be marked on the boiler;
- (d) for regulating the inspection and examination of boilers and steam-pipes, and prescribing forms of certificates therefor;
- (e) for ensuring the safety of persons working inside a boiler; and
- (f) for providing for any other matter which is not, in the opinion of the ⁴⁰[Board], a matter of merely local or ⁴¹[State] importance.

29. Power to make Rules.—The ⁴¹[State Government] may, by notification in the ⁴²[Official Gazette], make rules consistent with this Act and the regulations made thereunder for all or any of the following purposes, namely:—

- (a) for prescribing the qualifications and duties of the Chief Inspector and of Inspectors, ⁴³* * * *, for prescribing or constituting authorities to which they shall respectively be subordinate, and the limits of the administrative control to be exercised by such authorities;
- (b) for regulating the transfer of boilers;
- (c) for providing for the registration and certification of boilers in accordance with the regulations made under this Act;
- (d) for requiring boilers to be in charge of persons holding certificates of competency, and for prescribing the conditions on which such certificates may be granted;
- (e) for prescribing the times within which Inspectors shall be required to examine boilers under section 7 or section 8;
- (f) for prescribing the fees payable for the issue of renewed certificates and the method of determining the amount of such fees in each case;
- (g) for regulating inquiries into accidents;
- (h) for constituting the appellate authority referred to in section 20, and for determining its powers and procedure;
- (i) for determining the mode of disposal of fees, costs and penalties levied under this Act; and
- (j) generally to provide for any matter which is, in the opinion of the ⁴¹[State Government], a matter of merely local importance in the ⁴⁴[State];

⁴⁰ Subs. by the Indian Boilers (Amendment) Act, 1937 (11 of 1937), s. 5, for "G. G. in C."

^{40a} Ins. *ibid.*

⁴¹ Subs. by the A. O. 1950 for "Provincial". "Provincial Government".

⁴² Subs. by the A. O. 1937, for "local official Gazette".

⁴³ The words "for regulating their salary, allowance and conditions of service" rep. by the A. O. 1937.

⁴⁴ Subs. by the A. O. 1950 for "Province".

45* * * * *

30. Penalty for breach of Rules.—Any regulation or rule made under section 28 or section 29 may provide that a contravention thereof shall be punishable with fine which may extend to one hundred rupees.

31. Publication of Regulations and Rules.—(1) The power to make regulations and rules conferred by sections 28 and 29 shall be subject to the condition of the regulations and rules being made after previous publication.

(2) Regulations and rules so made shall be published in the Gazette of India and the local official Gazette respectively, and, on such publication, shall have effect as if enacted in this Act.

32. Recovery of Fees, etc.—All fees, costs and penalties levied under this Act shall be recoverable as arrears of land-revenue.

33. Applicability to the Government.—Save as otherwise expressly provided, this Act shall apply to boilers and steam-pipes belonging to the ⁴⁶[Government].

34. Exemptions.—⁴⁷[(1) The ⁴⁸[State Government] may, by notification in the ⁴⁹[Official Gazette], exempt from the operation of this Act, subject to such conditions and restrictions as it thinks fit, any boilers or classes or types of boilers used exclusively for the heating of buildings or the supply of hot water.]

⁴⁷[(2)] **Power to suspend in case of emergency.**—In case of any emergency, the ⁴⁸[State Government] may, by general or special order in writing, exempt any boiler or steam-pipe from the operation of all or any of the provisions of the Act.

35. [Repeal of enactments].—*Repealed by the Repealing Act, 1927 (XII of 1927).*

[THE SCHEDULE.]

[Enactments repealed.]

INDIAN ELECTRICITY ACT, 1910 (IX OF 1910) (Extracts)

An Act to amend the law relating to the supply and use of electrical energy.

[18th March, 1910.]

Whereas it is expedient to amend the law relating to the supply and use of electrical energy; it is hereby enacted as follows:—

PART I—PRELIMINARY.

1. Short title, extent and commencement.—(1) This Act may be called the Indian Electricity Act, 1910.

¹[(2) It extends to the whole of India ²[except the State of Jammu and Kashmir]];

(3) It shall come into force on such date³ as the ⁴[Central Government] may, by notification in the ⁵[Official Gazette], direct in this behalf.

2. Definitions.—In this Act, expressions defined in the Indian Telegraph Act, 1885 (XIII of 1885), have the meanings assigned to them in that Act, and, unless there is anything repugnant in the subject or context,—

(a) “aerial line” means any electric supply-line which is placed above ground and in the open air;

¹ Subs. by the A. O. 1950 for the original sub-section.

² Subs. by Act 3 of 1951.

³ Brought into force on the 1st January, 1911, see Gazette of India, 1910, Pt. I, p. 1236.

⁴ Subs. for “G. G. in C.” by the A. O. 1937.

⁵ Subs. for “Gazette of India” by the *ibid.*

- (b) "area of supply" means the area within which alone a licensee is for the time being authorized by his license to supply energy;
- (c) "consumer" means any person who is supplied with energy by a licensee or whose premises are for the time being connected for the purposes of a supply of energy with the works of a licensee;

* * * * *

- (e) "distributing main" means the portion of any main with which a service-line is, or is intended to be, immediately connected;
- (f) "electric supply-line" means a wire, conductor or other means used for conveying, transmitting or distributing energy together with any casing, coating, covering, tube, pipe or insulator enclosing, surrounding or supporting the same or any part thereof, or any apparatus connected therewith for the purpose of so conveying, transmitting or distributing such energy;
- (g) "energy" means electrical energy when generated, transmitted, supplied or used for any purpose except the transmission of a message;

* * * * *

- (i) "main" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee to the public;
- (j) "prescribed" means prescribed by rule made under this Act;
- (k) "public lamp" means an electric lamp used for the lighting of any street;

“(1) "service-line" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee—

- (i) to a single consumer either from a distributing main or immediately from the licensee's premises, or
- (ii) from a distributing main to a group of consumers on the same premises or on adjoining premises supplied from the same point of the distributing main.]

* * * * *

PART IV—GENERAL

Protective Clauses

31. Protection of railways and canals, docks, wharves and piers.—No person shall, in the generation, transmission, supply or use of energy, in any way injure any railway, tramway, canal or water-way or any dock, wharf or pier vested in or controlled by a local authority, or obstruct or interfere with the traffic on any railway, tramway, canal or water-way.

32. Protection of telegraphic, telephonic and electric-signalling lines.—

(1) Every person generating, transmitting, supplying or using energy (hereinafter in this section referred to as the "operator") shall take all reasonable precautions in constructing, laying down and placing his electric supply-lines and other works and in working his system, so as not injuriously to affect, whether by induction, or otherwise, the working of any wire or line used for the purpose of telegraphic, telephonic or electric-signalling communication, or the currents in such wire or line.

(2) Where any difference or dispute arises between the operator and the telegraph-authority as to whether the operator has constructed, laid down or placed his electric supply-lines or other works, or worked his system, in contravention of sub-section (1), or as to whether the working of any wire, line or current is or is not injuriously affected thereby, the matter shall be referred to

⁶ Subs. by Act I of 1922, s. 2, for the original clause.

⁷[the Central Government]; ⁷[the Central Government], unless ⁸[it] is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the operator after the construction of such lines or works, may direct the operator to make such alterations in, or additions to his system as may be necessary in order to comply with the provisions of this section, and the operator shall make such alterations or additions accordingly:

Provided that nothing in this sub-section shall apply to the repair, renewal or amendment of any electric supply-line so long as the course of the electric supply-line and the amount and nature of the energy transmitted thereby are not altered.

(3) Where the operator makes default in complying with the requirements of this section, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Explanation.—For the purposes of this section, a telegraph-line shall be deemed to be injuriously affected if telegraphic, telephonic or electric-signalling communication by means of such line is, whether through induction or otherwise, prejudicially interfered with by an electric supply-line or work or by any use made thereof.

33. Notice of accidents and inquiries.—⁹[(1) If any accident occurs in connection with the generation, transmission, supply or use of energy in, or in connection with, any part of the electric supply-lines or other works of any person, and the accident results or is likely to have resulted in loss of life or personal injury, such person shall give notice of the occurrence, and of any loss of life or personal injury, actually occasioned by the accident, in such form and within such time and to such authorities as the ¹⁰[State Government] may, by general or special order, direct.]

(2) ¹⁰[State Government] may, if it thinks fit, require any Electric Inspector, or any other competent person appointed by it in this behalf, to inquire and report—

- (a) as to the cause of any accident affecting the safety of the public, which may have been occasioned by, or in connection with, the generation, transmission, supply or use of energy; or
- (b) as to the manner in, and extent to, which the provisions of this Act or of any license or rules thereunder, so far as those provisions affect the safety of any person, have been complied with.

34. Prohibition of connection with earth, and power for Government to interfere in certain cases of default.—(1) No person shall, in the generation, transmission, supply or use of energy, permit any part of his electric supply-lines to be connected with earth except so far as may be prescribed in this behalf or may be specially sanctioned by the ¹⁰[State Government].

(2) If at any time it is established to the satisfaction of the ¹⁰[State Government]—

- (a) that any part of an electric supply-line is connected with earth contrary to the provisions of sub-section (1), or
- (b) that any electric supply-lines or other works for the generation, transmission, supply or use of energy are attended with danger to the public safety or to human life or injuriously affect any telegraph-line, or

⁷ Subs. for the words "the Local Government", by the A. O. 1937.

⁸ Subs. by Act 38 of 1920, s. 2 and Sch. I for the word "he".

⁹ Subs. by Act I of 1922, s. 15, for the original sub-section.

¹⁰ Subs. by the A. O. 1950 for "Provincial Government".

- (c) that any electric supply-lines or other works are defective so as not to be in accordance with the provisions of this Act or of any rule thereunder,

the ¹⁵[State Government] may, by order in writing, specify the matter complained of and require the owner or user of such electric supply-lines or other works to remedy it in such manner as shall be specified in the order, and may also in like manner forbid the use of any electric supply-line or works until the order is complied with or for such time as is specified in the order.

Administration and rules.

35. Advisory Boards.—¹²[The Central Government may, for the whole or any part of the territories to which this Act extends, and each State Government may, for the whole or any part of the State, by notification in the Official Gazette, constitute an Advisory Board.]

(2) Every such Board shall consist of a chairman and not less than two other members.

13*

*

*

*

*

(3) The ¹⁴[Central Government] or the ¹⁵[State Government] as the case may be, may, by general or special order,—

¹⁶[(a) determine the number of members of which any such Board shall be constituted and the manner in which such members shall be appointed,]

¹⁶[(b)] define the duties and regulate the procedure of any such Board,

¹⁶[(c)] determine the tenure or office of the members of any such Board, and

¹⁶[(d)] give directions as to the payment of fees to, and the travelling expenses incurred by, any member of any such Board in the performance of his duty.

36. Appointment of Electric Inspectors.—(1) The ¹⁴[Central Government] may, by notification in the ¹⁷[Official Gazette], appoint duly qualified persons to be Electric Inspectors, and every Electric Inspector so appointed shall ¹⁸[in relation to mines, oil-fields and railways] exercise the powers and perform the functions of an Electric Inspector under this Act within such areas and subject to such restrictions as the ¹⁴[Central Government] may direct.

(2) The ¹⁵[State Government] may, by notification in the ¹⁹[Official Gazette], appoint duly qualified persons to be Electric Inspectors within such areas as may be assigned to them respectively; and every Inspector so appointed shall ¹⁸[except in relation to mines, oil-fields and railways] exercise the powers and perform the functions of an Electric Inspector under this Act subject to such restrictions as the ¹⁵[State Government] may direct.

(3) In the absence of express provision to the contrary in this Act, or any rule thereunder, an appeal shall lie from the decision of an Electric Inspector to the ¹⁴[Central Government] or the ¹⁵[State Government], as the case may be ²⁰[or, if the ¹⁴[Central Government] or the ¹⁵[State Government], as the case may be, by general or special order, so directs, to an Advisory Board.]

¹² Subs. by Act 3 of 1951, for the former sub-section.

¹³ Sub-section (3) omitted by Act I of 1922, s. 16.

¹⁴ Subs. by the A. O. 1937 for "G. G. in C."

¹⁵ Subs. by the A. O. 1950 for "Provincial Government".

¹⁶ This clause was ins. and the original clauses (a), (b) and (c) re-lettered (b), (c) and (d) by Act I of 1922, s. 16.

¹⁷ Subs. by the A. O. 1937 for "Gazette of India".

¹⁸ Ins. by the A. O. 1937.

¹⁹ Subs. by the A. O. 1937 for "Local Official Gazette".

²⁰ Ins. by Act I of 1922, s. 17.

²¹[36A. **Central Electricity Board.**—(1) A Board to be called the Central Electricity Board shall be constituted to exercise the powers conferred by section 37.

(2) The Central Electricity Board shall consist of ²²[twenty] members, namely:—

(a) a chairman to be nominated by the ²³[Central Government];

²⁴[(b) one member to be nominated by the Government of each of the States to which this Act extends.]

(c) one member, holding office for a period of three years, to be nominated alternately by the ²⁵[State Government] of Delhi and the ²⁵[State Government] of ²⁶[Ajmer];

(d) one member to be nominated by the Chief Commissioner of Railways; and

(e) one member to be nominated by the Chief Inspector of Mines.

(3) Any vacancy occurring in the Board, otherwise than by the expiry of the term of office of the member referred to in clause (c) of sub-section (2), shall be filled as soon as may be by a nomination made by the authority by whom the member vacating office was nominated.

(4) The Board shall have full power to regulate by bye-laws or otherwise its own procedure and the conduct of all business to be transacted by it.

(5) The powers of the Central Electricity Board may be exercised notwithstanding any vacancy in the Board.]

37. Power for Board to make rules.—(1) The ²⁷[Central Electricity Board] may make rules, for ²⁸[the whole or any part of the territories to which this Act extends], to regulate the generation, transmission, supply and use of energy, and, generally, to carry out the purposes and objects of this Act.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

(a) prescribe the form of applications for licenses and the payments to be made in respect thereof;

(b) regulate the publication of notices;

(c) prescribe the manner in which objections with reference to any application under Part II are to be made;

(d) provide for the preparation and submission of accounts by licensees in a specified form;

(e) provide for the securing of a regular, constant and sufficient supply of energy by licensees to consumers and for the testing at various parts of the system of the regularity and sufficiency of such supply, and for the examination of the records of such tests by consumers;

(f) provide for the protection of persons and property from injury by reason of contact with, or the proximity of, or by reason of the defective or dangerous condition of, any appliance or apparatus used in the generation, transmission, supply or use of energy;

(g) for the purposes of electric traction regulate the employment of insulated returns, or of uninsulated metallic returns of low resistance, in order to prevent fusion or injurious electrolytic action of or on metallic pipes, structures or substances, and to minimise, as far as is reasonably practicable, injurious interference with the electric wires, supply-lines

²¹ Ins. by Act. 10 of 1937, s. 3.

²² Subs. by Act 3 of 1951, for "thirteen".

²³ Subs. by the A. O. 1937 for "G. G. in C.",

²⁴ Subs. by Act 3 of 1951 for the former clause.

²⁵ Subs. by the A. O. 1950 for "Provincial Government".

²⁶ Subs. by the A. O. 1950 for "Ajmer-Merwara".

²⁷ Subs. by Act 10 of 1937, s. 4, for "G. G. in C.",

²⁸ Subs. by Act 3 of 1951 for "the territories for the time being comprised within Part A States and Part C States or any part of such territories".

41. Penalty for unauthorised supply of energy by non-licensees.—Whoever, in contravention of the provisions of section 28, engages in the business of supplying energy shall be punishable with fine which may extend to three thousand rupees, and, in the case of a continuing contravention, with a daily fine which may extend to three hundred rupees.

42. Penalty for illegal or defective supply or for non-compliance with order.—Whoever—

- (a) being a licensee, save as permitted under section 27 or section 51 or by his license, supplies energy or lays down or places any electric supply-line or works outside the area of supply; or
- (b) being a licensee, in contravention of the provisions of this Act or of the rules thereunder or in breach of the conditions of his license and without reasonable excuse, the burden of proving which shall lie on him, discontinues the supply of energy or fails to supply energy; or
- (c) makes default in complying with any order issued to him under section 34, sub-section (2);

shall be punishable with fine which may extend to one thousand rupees, and, in the case of a continuing offence or default, with a daily fine which may extend to one hundred rupees.

43. Penalty for illegal transmission or use of energy.—Whoever, in contravention of the provisions of section 30, transmits or uses energy without giving the notice required thereby, shall be punishable with fine which may extend to five hundred rupees, and, in the case of continuing offence, with daily fine which may extend to fifty rupees.

44. Penalty for interference with meters or licensee's works, and for improper use of energy.—Whoever—

- (a) connects any meter referred to in section 26, sub-section (1), or any meter, indicator or apparatus referred to in section 26, sub-section (7), with any electric supply-line through which energy is supplied by a licensee, or disconnects the same from any such electric supply-line, without giving to the licensee forty-eight hours' notice in writing of his intention; or
- (b) lays, or causes to be laid, or connects up any works for the purpose of communicating with any other works belonging to a licensee, without such licensee's consent; or
- (c) maliciously injures any meter referred to in section 26, sub-section (1), or any meter, indicator or apparatus referred to in section 26, sub-section (7), or wilfully or fraudulently, alters the index of any such meter, indicator or apparatus, or prevents any such meter, indicator or apparatus from duly registering; or
- (d) improperly uses the energy of a licensee;

shall be punishable with fine which may extend to ³⁴[five hundred] rupees, and, in the case of a continuing offence, with a daily fine which may extend to ³⁵[fifty] rupees; and ³⁶[if it is proved that any artificial means exist] for making such connection as is referred to in clause (a), or such communication as is referred to in clause (b), or for causing such alteration or prevention as is referred to in clause (c), or for facilitating such improper use as is referred to in clause (d), ³⁷[and that] the meter, indicator or apparatus is under the custody or control of the consumer, whether it is his property or not ³⁸[it shall be presumed, until the contrary is

³⁴ Subs. by Act 1 of 1922, s. 19 for "three hundred".

³⁵ Subs. for "thirty", *ibid.*

³⁶ Subs. for "the existence of artificial means", *ibid.*

³⁷ Subs. for "shall, where", *ibid.*

proved,] that such connection, communication, alteration, prevention or improper use, as the case may be, has been knowingly and wilfully caused by such consumer.

45. Penalty for extinguishing public lamps.—Whoever maliciously extinguishes any public lamp shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to three hundred rupees, or with both.

46. Penalty for negligently wasting energy or injuring works.—Whoever negligently causes energy to be wasted or diverted, or negligently breaks, throws down or damages any electric supply-line, post, pole, or lamp or other apparatus connected with the supply of energy, shall be punishable with fine which may extend to two hundred rupees.

47. Penalty for offences not otherwise provided for.—Whoever, in any case not already provided for by sections 39 to 46 (both inclusive), makes default in complying with any of the provisions of this Act, or with any order issued under it, or, in the case of a licensee, with any of the conditions of his license, shall be punishable with fine which may extend to one hundred rupees, and, in the case of continuing default, with a daily fine which may extend to twenty rupees:

Provided that, where a person has made default in complying with any of the provisions of section 13, 14, 15, 17 and 32, as the case may be, he shall not be so punishable if the Court is of opinion that the case was one of emergency, and that the offender complied with the said provisions as far as was reasonable in the circumstances.

48. Penalties not to affect other liabilities.—The penalties imposed by sections 39 to 47 (both inclusive) shall be in addition to, and not in derogation of, any liability in respect of the payment of compensation or in the case of a licensee, the revocation of his license, which the offender may have incurred.

49. Penalties where works belong to Government.—The provisions of sections 39, 40, 44, 45 and 46 shall, so far as they are applicable, be deemed to apply also when the acts made punishable thereunder are committed in the case of energy supplied by, or of works belonging to, ³⁹[Central Government or any ⁴⁰[State] Government.]

50. Institution of prosecutions.—No prosecution shall be instituted against any person for any offence against this Act or any rule, license or order thereunder, except at the instance of the Government or an Electric Inspector, or of a person aggrieved by the same.

Supplementary.

51. Exercise in certain cases of powers of telegraph-authority.—Notwithstanding anything in sections 12 to 16 (both inclusive) and sections 18 and 19, the ⁴¹[State Government] may, by order in writing, for the placing of appliances and apparatus for the transmission of energy, confer upon any public officer or licensee, subject to such conditions and restrictions (if any) as the ⁴¹[State Government] may think fit to impose, and to the provisions of the Indian Telegraph Act, 1885 (XIII of 1885), any of the powers which the telegraph-authority possesses under that Act, with respect to the placing of telegraph-lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained.

52. Arbitration.—Where any matter is, by or under this Act, directed to be determined by arbitration, the matter shall, unless it is otherwise expressly provided

³⁸ Subs. for "be *prima facie* evidence", *ibid*.

³⁹ Subs. by the A. O. 1948 for "any Government in British India".

⁴⁰ Subs. by the A. O. 1950 for "Provincial".

⁴¹ Subs. by the A. O. 1950 for "Provincial Government".

in the license of a licensee, be determined by such person or persons as the ⁴²[State Government] may nominate in that behalf on the application of either party; but in all other respects the arbitration shall be subject to the provisions of the ⁴³* Arbitration Act, ⁴⁴[1940] (X of 1940). I

53. Service of notices, orders or documents.—(1) Every notice, order or document by or under this Act required or authorized to be addressed to any person may be served by post or left—

(a) where ⁴⁵[the Central Government or the ⁴⁶[State] Government] is the addressee, at the office of ⁴⁷[such officer as the ⁴⁸[Central Government] or the ⁴²[State Government], as the case may be, may designate in this behalf;]

⁴⁹*

*

*

*

*

(b) where a local authority is the addressee, at the office of the local authority;

(c) where a company is the addressee, at the registered office of the Company or, in the event of the registered office of the Company not being in India, at the head office of the Company in India;

(d) where any other person is the addressee, at the usual or last known place of abode or business of the person.

(2) Every notice, order or document by or under this Act required or authorized to be addressed to the owner or occupier of any premises shall be deemed to be properly addressed if addressed by the description of the "owner" or "occupier" of the premises (naming the premises), and may be served by delivering it, or a true copy thereof, to some person on the premises, or, if there is no person on the premises to whom the same can with reasonable diligence be delivered, by affixing it on some conspicuous part of the premises.

54. Recovery of sums recoverable under certain provisions of Act.—Every sum declared to be recoverable by section 5, clause (f), section 6, sub-section (2), section 14, sub-section (2), clause (h), section 16, sub-section (2), section 18, sub-section (2) or sub-section (4), or section 26, sub-section (4), and every fee leviable under this Act, may be recovered, on application to a Magistrate having jurisdiction where the person liable to pay the same is for the time being resident, by the distress and sale of any moveable property belonging to such person.

55. Delegation of certain functions of ⁴²[State Government] to Electric Inspectors.—The ⁴²[State Government] may, by general or special order, authorize the discharge of any of its functions under section 13 or section 18, ⁵⁰[or section 34, sub-section (2)], or clause V, sub-clause (2), or clause XIII of the Schedule by an Electric Inspector.

56. Protection for acts done in good faith.—No suit, prosecution or other proceeding shall lie against any public officer, or any servant of a local authority, for anything done, or in good faith purporting to be done, under this Act.

57. Amendment of the Land Acquisition Act, 1894.—(1) In section 40, sub-section (1), clause (b), and section 41, sub-section (5), of the Land Acquisition

⁴² Subs. by the A. O. 1950 for "Provincial Government".

⁴³ The word "Indian" omitted by Act 32 of 1940, s. 3 and Sch. II.

⁴⁴ Subs. by Act 10 of 1940 s. 49 and Sch. IV, for "1899".

⁴⁵ Subs. by the A. O. 1937 for "the Government".

⁴⁶ Subs. by the A. O. 1950 for "Provincial".

⁴⁷ Subs. by Act 1 of 1922, s. 21, for "the Secretary in the Public Works Department".

⁴⁸ Subs. for "G. G. in C." by A. O. 1937.

⁴⁹ Clause (aa) repealed by the A. O. 1948.

⁵⁰ Ins. by Act 1 of 1922, s. 22.

Act, 1894 (I of 1894), the term "work" shall be deemed to include electrical energy supplied, or to be supplied, by means of work to be constructed.

(2) The ⁵¹[State Government] may, if it thinks fit, on the application of any person, not being a company, desirous of obtaining any land for the purposes of his undertaking, direct that he may acquire such land under the provisions of the Land Acquisition Act, 1894 (I of 1894), in the same manner and on the same conditions as it might be acquired if the person were a company.

INDIAN ELECTRICITY RULES, 1937 (EXTRACTS)¹

In exercise of the powers conferred by section 37 of the Indian Electricity Act, 1910 (IX of 1910), and in supersession of the Indian Electricity Rules, 1922, the Central Government is pleased after previous publication to make the following rules applicable to the whole of India, to regulate the generation, transmission, supply and use of energy, and generally to carry out the purposes and objects of the said Act—

INDIAN ELECTRICITY RULES, 1937

CHAPTER I—PRELIMINARY

1. (1) These rules may be called the Indian Electricity Rules 1937.
- (2) They extend to the whole of India except the State of Jammu and Kashmir.²
2. **Definitions.**—(1) In these rules, unless there is anything repugnant in the subject or context,—
 - (a) “the Act” means the Indian Electricity Act, 1910 (IX of 1910).
 - (h) “conductor” means an electrical conductor arranged to be electrically connected to a system;
 - (n) “earthed” or “connected with earth” means connected with the general mass of earth in such manner as to ensure at all times an immediate discharge of energy without danger;
 - (o) “earthing system” means an electrical system in which all the conductors are earthed;
 - (p) “electrician” means a person who is over 21 years of age and is competent for the purposes of the rule in which the term is used and who has been appointed in writing by the lessee, owner, agent or manager of any apparatus for the purpose of supervising it;
 - (q) “Inspector” means an Electric Inspector appointed under section 36;
 - (r) “Inspector of Mines” means an Inspector appointed under the Indian Mines Act, 1923 (IV of 1923)³;
 - (s) “live” means electrically charged;
 - (t) “metallic covering” means iron or steel armouring with or without a lead or other metallic sheath as the conditions of the case may require or an iron or steel pipe surrounding one or more conductors;
 - (u) “neutral conductor” means that conductor of a multi-wire system the pressure of which is normally intermediate between the pressures of the other conductors of the system;
 - (x) “open sparking” means sparking which owing to the lack of adequate provisions for preventing the ignition of inflammable gas external to the apparatus would ignite such inflammable gas;
 - (y) “owner”, “agent” or “manager” of a mine have the same meanings as are assigned to them in section 3 (g), 3 (a) and 15 (i) respectively, of the Indian Mines Act, 1923 (IV of 1923)³;
 - (z) “pressure” means the difference of electric potential measured in volts between any two conductors or between any part of either conductor and the earth as measured by a suitable voltmeter, and is said to be—
 - (i) “low” where the normal pressure is not greater than 250 volts, and the pressure in no circumstances exceeds 263 volts;
 - (ii) “medium” where the normal pressure is greater than 250 volts, but is not greater than 650 volts, and the pressure in no circumstances exceeds 683 volts;
 - (iii) “high” where the normal pressure exceeds 650 volts or the pressure at any time exceeds 683 volts;
 - (aa) “section” means a section of the Act;
 - (bb) “switchgear” means switches, cut-outs or fuses, conductors, and other apparatus in connection therewith used for the purpose of controlling the current or pressure in any system or part of a system;

¹ These Rules were published under Department of Industries and Labour (Electricity) Notification No. S. 601 dated the 27th March, 1937 as amended by Notification No. S. 601 dated the 29th March, 1937.

² Vide Central Electricity Board Notification No. S. R. O. 1701 dated the 3rd Oct., 1952.

³ See now the Mines Act, 1952.

3. **Authorization.**—(1) A licensee, a non-licensee or a consumer or the owner, agent or manager of a mine, or the agent of any company operating in an oil field or the owner of a drilled well in an oil-field or a contractor for the time being under contract with a licensee, a non-licensee or a consumer to carry out duties incidental to the generation, transformation, distribution or use of energy may authorise any person for the purpose of any or all of the following rules, namely, rules 43, 60, 64 (1), 96 (2), 106 (1), 108 (4) and 109.

(2) No person shall be authorised under sub-rule (1) unless he is competent to perform the duties specified in the rules for the purpose for which he is authorised.

(3) No person shall be deemed to be authorised under sub-rule (1) unless his name has been entered in a list maintained at the office or premises of the person authorising him, and giving the purposes for which such person is authorised and the entry has been attested by the person authorising him.

(4) Every list maintained under sub-rule (3) shall be produced before an Inspector when required.

CHAPTER X—ADDITIONAL PRECAUTIONS TO BE ADOPTED IN MINES AND OIL-FIELDS

95. **Application of Chapter.**—(1) The rules in this Chapter apply only—

(a) where energy is used in mines where the provisions of Part III of the Act apply; and

(b) where energy is used in oil-fields.

(2) In mines the rules in this Chapter do not apply to apparatus used above ground, excepting such apparatus as may directly affect the safety of persons below ground.

96. **Responsibility for observance.**—(1) It shall be the duty of the owner, agent, or manager of the mine, or of the agent of any company operating in the oil-field, or of the owner of one or more drilled wells situated in the oil-field, to comply with and enforce the following rules and it shall be the duty of all persons employed to conduct their work in accordance with the rules.

(2) An authorised person shall be on duty in every mine or oil field while energy is being used therein.

97. **Notices.**—(1) On or before the first day of February in every year in every oil-field returns giving the size and type of apparatus and any particulars as to the circumstances of its use which may be required by the Inspector shall be sent by the persons specified in rule 96 in the form set out in Annexure IX.

(2) This rule does not apply to telephones and signalling apparatus or to low pressure installations for lighting only.

98. **Plans.**—(1) A correct plan on the same scale as the plan kept at the mine in fulfilment of the requirements of the Indian Mines Act, 1923³, shall be kept in the office at the mine showing the position of all fixed apparatus and conductors in the mine, other than lights, telephones or signalling apparatus, or cables for the same.

(2) A similar plan, on a scale of not less than sixteen inches to the mile shall be kept by the manager or owner of one or more wells in any oil-field showing similar particulars.

(3) A similar plan, on such scale as the Central Government may require, shall be kept in the office of the licensee or person transmitting or distributing energy in a mine or oil-field, showing the position of all electric supply lines under his control.

(4) The plans required by this rule shall be corrected every six months, and the dates of correction entered on them by the manager of the mine or wells or the owner of the wells, and they shall be produced to an Inspector or an Inspector of mines at any time on his request.

99. **Lighting, communications and fire precautions.**—(1) In a mine lighted by electricity, one or more safety lamps or other proper lights shall be kept continuously burning in all places where failure of the electric light at any time would be likely to cause danger.

(2) Efficient means shall be provided in every mine for communicating between the place in which the switchgear provided under sub-rule (1) of rule 106 is erected and the shaft-bottom or main distributing centre in the mine.

(3) Appliances for extinguishing fires shall be kept ready for immediate use in every place in a mine containing apparatus, other than cables, telephones and signalling apparatus.

100. **Isolation and fixing of transformer switchgear, etc.**—(1) Where necessary to prevent danger or mechanical damage transformers and switchgear shall be placed in a separate room, compartment or box.

(2) Unless the apparatus is so constructed, protected, and worked as to obviate the risk of fire no inflammable material shall be used in the construction of any room, com-

partment, or box containing apparatus, or in the construction of any of the fittings therein. Each such room, compartment or box shall be substantially constructed and shall be kept dry.

(3) Adequate working space and means of access clear of obstruction and free from danger shall, so far as circumstances permit, be provided for all apparatus that has to be worked or attended to, and all handles intended to be operated shall be conveniently placed for that purpose.

101. Method of Earthing.—Where earthing is necessary it shall be carried out in a mine by connection to an earthing system at the surface of the mine, in a manner approved by an Inspector.

102. Earth or fault detector.—(1) Earth or fault detectors or recorders shall be connected up in every system in a mine to show immediately any defect in the insulation of the system.

(2) The readings of these instruments shall be recorded daily in a book kept at the generating station, sub-station or switch room.

103. Earthing metal, etc.—(1) All metallic sheaths, coverings, handles, joint-boxes, switchgear frames, instrument covers, switch and fuse covers and boxes, and all lampholders, unless efficiently protected by an earthed or insulating covering made of fire-resisting material and the frames and bedplates or generators, transformers, and motors (including portable motors), shall be earthed by connection to an earthing system in the manner prescribed in rule 101.

(2) Where the cables are provided with a metallic covering constructed and installed in accordance with clause (d) of rule 107, such metallic covering may be used as a means of connection to the earthing system.

(3) All the conductors of an earthing system shall have a conductivity at all parts and at all joints at least equal to 50 per cent. of that of the largest conductor used solely to supply the apparatus a part of which it is desired to earth:

Provided: that no conductor of an earthing system shall have a cross-sectional area of less than .022 of a square inch.

(4) All joints in earth conductors and all joints to the metallic covering of the cables shall be properly soldered or otherwise efficiently made.

(5) No switch, fuse, or circuit breaker shall be placed in any earth conductor.

(6) This rule shall not apply (except in the case of portable apparatus) to any system in a mine in which the pressure does not exceed low pressure direct current or 125 volts alternating current.

104. Motors and their transformers.—(1) Where energy is distributed at a pressure higher than medium pressure;

(i) it shall not be used without transformation to medium or low pressure except in fixed machines in which the high pressure parts are stationary; and

(ii) motors under 20 H.P. shall be supplied through a transformer stepping down to medium or low pressure.

(2) Where energy is transformed, suitable provision shall be made to guard against danger by reason of the lower pressure apparatus becoming accidentally charged above its normal pressure by leakage from or contact with the higher pressure apparatus.

105. Switchgear and Terminals.—Switchgear and all terminals, cable-ends, cable-joints and connections of apparatus shall be totally enclosed, and shall be so constructed and installed as to comply with the following requirements:

(i) all parts shall be of mechanical strength sufficient to resist rough usage;

(ii) all conductors and contact areas shall be of ample current carrying capacity and all joints in conductors shall be properly soldered or otherwise efficiently made;

(iii) the lodgment of any matter likely to diminish the insulation or affect the working of any switchgear shall be prevented;

(iv) all live parts shall be so protected or enclosed as to prevent persons accidentally coming into contact with them and danger from arcs, short circuits, fire, water, gas or oil;

(v) where there may be risk of igniting gas, coal-dust, oil or other inflammable material, all parts shall be so protected as to prevent open sparking; and

(vi) every switch or circuit-breaker shall be capable of opening the circuit it controls, without danger, or any short circuit with which it may have to deal.

106. Cutting off supply.—(1) Properly constructed switchgear for cutting off the supply of energy to the mine or oil-field shall be provided at the surface of the mine or oil-field at a point approved by an Inspector, and, during the time any cable is live, a person authorised to operate the said switchgear shall be available within easy reach thereof.

(2) Efficient means, suitably placed, shall be provided for cutting off all pressure from every part of a system, when necessary, to prevent danger.

(3) Such efficient means shall be provided for cutting off all pressure automatically from the part or parts of the system affected in the event of a fault as may, in the opinion of an Inspector, be necessary to prevent danger.

(4) Every motor shall be controlled by switchgear for starting and stopping, so arranged as to cut off all pressure from the motor and from all apparatus in connection therewith, and so placed as to be easily worked by the person appointed to work the motor.

107. **Cables.**—All cables, other than flexible cables for portable apparatus shall comply with the following requirements:—

- (a) they shall be covered with insulating material (except that the outer conductor of a concentric system may be bare). They shall be efficiently protected from mechanical damage and supported at sufficiently frequent intervals and in such a manner as adequately to prevent damage to the cables or danger;
- (b) (i) except as provided in clause (c), no cables other than concentric cables, or two-core cables or multi-core cables protected by a metallic covering, or single-core cables which contain all the conductors of circuit, shall be used
 - (1) where the pressure exceeds low pressure direct current or 125 volts alternating current, or
 - (2) when an Inspector considers that there is risk of igniting coal-dust or other inflammable material, and so directs; and
- (ii) the lead sheath of lead sheathed cables and the iron or steel armouring of armoured cables respectively shall be of a thickness not less than that recommended from time to time by the British Standards Institution;
- (c) where the medium pressure direct current system is used two single-core cables may be used for any circuit, if their metallic coverings are bonded together by earth conductors so placed that the distance between any two consecutive bonds is not greater than 100 feet measured along either cable;
- (d) the metallic covering of every cable shall be—
 - (i) electrically continuous throughout;
 - (ii) earthed, if it is required by sub-rule (1) of rule 103 to be earthed by a connection to the earthing system of not less conductivity than the same length of the said metallic covering;
 - (iii) efficiently protected against corrosion where necessary;
 - (iv) of a conductivity at all parts and at all joints at least equal to 50 per cent. of the conductivity of the largest conductor enclosed by the said metallic covering; and
 - (v) where there may be risk of igniting gas, coal dust, or other inflammable material, so constructed as to prevent, as far as is practicable, the occurrence of open sparking as the result of any fault or leakage from live conductors:

Provided that, where two single-core cables protected by metallic covering bonded together in accordance with clause (c) of this rule are used for a circuit, the conductivity of each of the said metallic coverings at all parts and at all joints shall be at least equal to 25 per cent. of the conductivity of the conductor enclosed thereby;

- (e) cables and conductors where joined up to motors, transformers, switchgear and other apparatus, shall be installed so that—
 - (i) they are mechanically protected by securely attaching the metallic covering to the apparatus; and
 - (ii) the insulating material at each cable end is efficiently sealed so as to prevent the diminution of its insulating properties.

Where necessary to prevent abrasion or to secure gas-tightness there shall be properly constructed glands or bushes; and

- (f) unarmoured cables or conductors, shall be either conveyed in pipes or casings or suspended from efficient insulators by means of some non-conducting material which will not cut the covering and which will prevent contact with any timbering or metal work. If separate uncased wires are used, they shall be kept at least one and a half inches apart and shall not be brought together except at lamps switches, and fittings.

108. **Flexible Cables.**—(1) Flexible cables for portable apparatus shall be two-core or multi-core unless they are required for electric welding, and shall be covered with insulating material which shall be efficiently protected from mechanical damage. If a flexible metallic covering is used either as the outer conductor of a concentric system or as a means of protection from mechanical damage, it shall not be used by itself to form an earth conductor

for the portable apparatus, but it may be used for that purpose in conjunction with an earthing core.

(2) Every flexible cable for portable apparatus shall be connected to the system and to the portable apparatus by a properly constructed connector.

(3) At every point where flexible cables are joined to main cables a switch shall be provided which is capable of entirely cutting off the pressure from the flexible cables.

(4) Every flexible cable attached to a portable machine shall be examined periodically by the person authorised to work the machine, and, if such cable is used underground, he shall examine it at least once in each shift. If such cable is found to be damaged or defective, it shall forthwith be replaced by a spare cable in good condition, and shall not again be used until it has been properly repaired.

109. **Portable machines.**—The person authorised to work an electrically driven coal-cutter or other portable machine shall not leave the machine while it is working and shall, before leaving the place where such machine is working, ensure that the pressure is cut off from the flexible trailing cable which supplies such machine. Trailing-cable shall not be dragged along by the machine when working.

110. **Sundry precautions.**—(1) All apparatus shall be kept clear of obstruction and free from dust, dirt and moisture.

(2) Inflammable or explosive material shall not be stored in any room, compartment, or box containing apparatus, or in the vicinity of apparatus.

(3) Should there be a fault in any circuit, the part affected shall be made dead without delay, and shall remain so until the fault has been remedied.

(4) While lamps are being changed the pressure shall be cut off.

(5) No lamp holder shall be in metallic connection with the guard or other metal work of a portable lamp.

111. **Precautions where gas exists.**—(1) In any part of a mine or oil-field in which inflammable gas or vapour, whether normally present or not, is likely to occur in quantity sufficient to be indicative of danger, and in any working approaching such part, the following additional requirements shall be satisfied as regards all apparatus:—

(a) all cables, apparatus, signalling wires, and signalling instruments shall be so constructed, installed, protected, worked and maintained, that in the normal working thereof there shall be no risk of open sparking;

(b) all motors shall be so constructed that when any part is live, all rubbing contacts (such as commutators and slip-rings) are so arranged or enclosed as to prevent open sparking;

(c) the pressure shall be cut off the apparatus immediately if open sparking occurs, and during the whole time that examination or adjustment disclosing parts liable to open sparking is being made. The pressure shall not be switched on again until the apparatus has been examined by the electrician or one of his duly appointed assistant and the defect, if any, has been remedied or the adjustment made;

(d) every electric lamp shall be enclosed in an air-tight fitting, and the lamp globe shall be hermetically sealed; and

(e) a safety lamp shall be provided and kept continually burning near each motor when working, and should the appearance of the flame of such safety lamp indicate the presence of inflammable gas, the pressure shall be cut off immediately from all apparatus in the vicinity and the matter shall be reported forthwith to an official of the mine.

(2) If at any time in any place the percentage of inflammable gas in the general body of the air is found to exceed one and a quarter the supply of energy shall be cut off immediately from all cables and apparatus in that place and shall not be recommended so long as the percentage of inflammable gas exceeds that amount.

112. **Short firing.**—(1) When shot firing is being carried on adequate precautions shall be taken to protect conductors and apparatus from injury.

(2) Current from lighting or power circuits shall not be used for firing shots.

(3) Shot firing cables shall be covered and protected as provided by rule 108 for flexible cables. Adequate precautions shall be taken to prevent them from touching other cables and apparatus.

113. **Signalling.**—Where electrical signalling is used:—

(a) adequate precautions shall be taken to prevent signal and telephone wires from touching cables and other apparatus;

(b) the pressure used in any one circuit shall not exceed 25 volts; and

(c) contact makers shall be so constructed as to prevent the accidental closing of the circuit.

114. **Haulage.**—Haulage by electric locomotives on the overhead trolley-wire system, at pressures not exceeding medium, and haulage by storage battery locomotives, may be used with the prior consent in writing of an Inspector, and subject to such conditions affecting safety as he may impose.

115. **Supervision.**—(1) An electrician shall be appointed in writing by the owner, agent or manager of the mine or by the agent or the owner of one or more wells in an oil-field to supervise the apparatus. If necessary for the proper fulfilment of the duties detailed in this rule one or more assistants to the electrician shall be appointed by the aforesaid authority.

(2) Every person appointed to work, supervise, examine, or adjust any apparatus shall be competent for the work that he is set to do. No person except the electrician, or a competent person acting under his supervision shall undertake any work where, in order adequately to avoid danger, technical knowledge or experience is required.

(3) The electrician shall be responsible for the proper performance by himself or by an assistant appointed under sub-rule (1) of the following duties, namely:—

(i) the thorough examination of all apparatus (including the testing of earth conductors and metallic coverings for continuity) as often as may be necessary to prevent danger; and

(ii) the examination and testing of all new apparatus, and of all apparatus re-erected in the mine before it is put into service in a new position.

(4) In the absence of the electrician for more than three days the owner, agent or manager of the mine or the agent or owner of one or more oil-wells in an oil-field shall appoint in writing an efficient substitute.

(5) The electrician or the substitute appointed for him, under sub-rule (4), shall keep at the mine or oil-field a log-book made up of daily log-sheets kept in the form set out in Annexure X. The log-book shall be produced at any time on request to an Inspector of Mines or an Inspector.

116. **Exemptions.**—The provisions of rules 96 to 113 both inclusive and 115, shall not apply in any case in which exemption is obtained, on such conditions as he may prescribe, from an Inspector, on the ground either of emergency or special circumstances.

CHAPTER XI—MISCELLANEOUS

* * * * *

120. **Responsibility of Agents and Managers.**—Where any person is responsible for the observance of any of these rules, every agent and manager of such person shall also be responsible for such observance in respect of matters under their respective controls.

* * * * *

Annexure IX—Form of Annual Return for Oil-fields.

(SEE RULE 97).

This form must be correctly filled up by the owner, agent or manager, and sent to the Inspector not later than the first day of February 19 .

PART A

Year ending 19 .

Name of Oil-field

Situation of Oil-field } District
 } State

Postal address of Oil-field

Name and address of owner

Name of Manager

Name of Under Manager

PART B

Type and Horse-power of Electrical Apparatus.

1.—System of Supply (whether direct current or alternating current).

Voltage of Supply

Periodicity (if alternating current)

Source of Supply

2.—Voltage at which current is used for—

Lighting

Power

3.—Particulars of Motors, etc., in use on the Oil field.

(a) On wells

No. or other identifying mark of well	Drilling or pumping	H.P. of Motor	No. of lamps and type	Other electrical appliances

(b) Not on wells

H. P. of Motor	Purpose for which used	Identifying mark on map

4.—Other electrical appliances, not included in item 3, in use on the Oil field.

Appliances	Size in K. W.	Purpose for which used	Identifying mark on map

Annexure X—Log Sheet for Mines and Oil-fields.

[SEE RULE 115 (5)]

Daily Log Sheet for

1. Name of electrician in charge:—

2. Report as to:—

(a) Condition of the insulation of the system:—

(b) Specific defects of insulation (particulars of each failure of apparatus should be given):—

(c) Accidents or dangerous occurrence (including any cases of electric shock and any cases of open sparking in apparatus in use in places where rule 111 applies:—

(d) Examinations* of apparatus as provided by rule 115:—

(i) Routine examinations as required by rule 115 (3) (i).

(ii) Special examinations* as required by rule 115 (3) (ii).

3. Remarks:—

Signed

Examined by

Electrician

Manager

NOTE.—This log sheet should be filled in as completely as possible. If, for instance there are no defects of insulation to report, the word "none" should be written in the vacant space.

* State which apparatus has been examined or tested and result.

ESTABLISHMENT LEGISLATION

Hours of Work in Shops and Commercial Establishments.

The International Labour Convention No. 30 regulating hours of work in commerce and office was adopted in 1930. At the First Conference of Labour Ministers held in 1940, it was suggested that the Central Government should consider the question of legislation authorising State Governments to provide for the compulsory closing of shops and commercial establishments for a minimum period in each week. The Weekly Holidays Bill was drafted after consulting the State Governments and after further discussion at the Second Conference of Labour Ministers held in January 1941 and the Act was passed in 1942.

Weekly Holidays Act, 1942 (XVIII of 1942)

The Weekly Holidays Act, 1942 is permissive in character and becomes effective in a State or in a specified area within a State, only if the State Government by notification in the official Gazette chooses to apply it. The Act provides for a weekly closure of shops and for grant of one paid weekly holiday for every person employed otherwise than in a confidential capacity or in a position of management in any shop, restaurant or theatre. State Governments are empowered further to grant additional holiday with pay for one half-day a week. At present it applies to Orissa, Rajasthan, Ajmer, Coorg and Vindhya Pradesh, all other States having enacted their own legislations.

State Legislations relating to Shops and Commercial Establishments.¹

Legislations concerning shops and commercial establishments providing holidays with pay were first undertaken in Bombay in 1939, in Bengal and Punjab in 1940. Madhya Pradesh, Uttar Pradesh and Madras Governments also passed legislations in 1947. The Assam and Mysore Governments enacted similar legislations in 1948. The Bombay Government after enquiry into the working of the 1939 Act passed a comprehensive measure in 1949. Subsequently legislations were undertaken in Travancore-Cochin in 1949, Hyderabad in 1951, Madhya Bharat in 1952 and in Bihar in 1953. The Punjab Act was enforced in Himachal Pradesh in 1951. In 1949 the Government of Saurashtra adopted the Bombay Act of 1939 and enforced it in the State with effect from 7th June, 1949. The PEPSU Government applied the Patiala Trade Employees Act, 1947 to that State. The Central Government applied the Bengal Shops & Establishments Act 1940 to Tripura with certain modifications by a notification dated the 7th April, 1953. The Punjab Act was extended to Delhi in 1942 but subsequently Delhi Shops and Establishments Act was passed in 1954.

All Acts apply to wage earners employed in shops, commercial establishments (including insurance and banking firms), restaurants, theatre, cinema and other places of public amusements in certain selected urban centres, but Government can extend the Act by notification. All Acts contain provisions in respect of opening and closing hours, hours of work (daily, weekly or monthly), rest intervals, spread

¹Part A States—(1) Assam Shops & Establishments Act, 1948; (2) Bengal Shops & Establishments Act, 1940; (3) Bihar Shops & Establishments Act, 1953; (4) Bombay Shops & Establishments Act, 1948; (5) Central Provinces and Berar Shops & Establishments Act, 1947; (6) Madras Shops & Establishments Act, 1947; (7) Punjab Trade Employees Act, 1940; (8) Uttar Pradesh Shops & Commercial Establishments Act, 1947.

Part B States—(1) Madhya Bharat Shops & Establishments Act, 1952; (2) Mysore Shops & Establishments Act, 1948; (3) Patiala Trade Employees Act, 1947; (4) Travancore-Cochin Shops & Establishments Act, 1952; (5) Hyderabad Shops & Establishments Act, 1951.

Part C States—Delhi Shops & Establishments Act, 1954.

over, overtime rate, weekly holidays and leave to employees. Some Acts include special provisions for the protection of children and young persons. Employees working in a confidential capacity or whose work is of an intermittent character, are excluded from the scope of the Acts.

Central Legislation for Shops and Commercial Establishments.

In the Five-year Labour Programme, the Central Government desired to have a central legislation for regulating working conditions in shops and commercial undertakings. The proposed law would be fairly comprehensive in its scope and would ensure uniformity in application in all States. It will be applicable in the first instance to municipal areas and will cover persons employed in commercial and trading undertakings, office sections of factories, restaurants, eating houses, theatres and other places of public amusement and will regulate hours of work, intervals, rest periods, spread over, opening and closing hours, weekly holidays, holidays with pay, payment of wages, cleanliness of the premises and lighting. It will also contain provisions regarding employment of young persons. This proposal was considered and approved by the Standing Labour Committee in their Ninth Meeting held on the 25th and 26th July, 1946.

The question of enacting a Central legislation for shops and commercial establishments was again discussed in the 13th Meeting of the Standing Labour Committee held in New Delhi on the 27th and 28th July, 1953. It was decided that the Central Government should initiate legislation as a standard to which the States would have to conform. Such standards would be in the nature of a minimum so that those States whose standards were in fact more liberal could retain them. Summing up the discussion, Sri V. V. Giri, Labour Minister stated that if a State legislation confronted to the standards prescribed by the Central law in all important respects, it was not necessary to apply the Central law to that State; if a State law did not conform to those standards, it should either amend its law to correspond to the standards of the Central law or come under the jurisdiction of the Central law. The draft Bill prepared and previously circulated to different organisations, is being scrutinised for introduction in the Lok Sabha.

WEEKLY HOLIDAYS ACT, 1942 (XVIII OF 1942)

Statement of Objects and Reasons¹

It was suggested at the First Conference of Labour Ministers held in January, 1940, that the Central Government should consider the question of passing an enabling measure giving Provincial Governments power by notification to provide for the compulsory closing of shops and commercial establishments for a minimum period of one day in the week, leaving it to the Provincial Governments to provide an extra half-holiday if they considered it necessary. The present Bill has been drafted after consultation with Provincial Governments, and further discussion at the Second Conference of Labour Ministers held in January, 1941. The Bill will not come into effect in any Province until the Government for that Province directs its application by notification, either to the whole Province or any specified area within it. A further notification of the Provincial Government will be necessary to bring into application the provisions about an extra half holiday. It is considered desirable that Provincial Governments should have power to introduce by notification certain minimum provisions on uniform lines as embodied in the Bill. The Bill provides for payment of wages for holidays declared under it. Certain classes of persons and establishments are excluded from its purview. It proposes to leave power with the Central Government in respect of establishments under its control and with Provincial Governments in respect of all other establishments within the Province, to make exceptions from or temporary suspension of the provisions of the proposed Act.

¹ Gazette of India, 1941, Part V, page 142.

WEEKLY HOLIDAYS ACT, 1942 (XVIII OF 1942)

Arrangement of Sections

1. Short title, extent and commencement.
2. Definitions.
3. Closing of shops.
4. Weekly holidays in shops, restaurants and theatres.
5. Additional half-day closing or holiday.
6. No deduction or abatement to be made from wages.
7. Inspectors.
8. Powers of Inspectors.
9. Penalties.
10. Rules.
11. Power of exemption and suspension.

WEEKLY HOLIDAYS ACT, 1942 (XVIII OF 1942)¹

An Act to provide for the grant of weekly holidays to persons employed in shops, restaurants and theatres

[3rd April, 1942.]

Whereas it is expedient to provide for the grant of weekly holidays to persons employed in shops, restaurants and theatres;

It is hereby enacted as follows:—

1. **Short title, extent and commencement.**—(1) This Act may be called the Weekly Holidays Act, 1942.

(2) It extends to ²[the whole of India except Part B States].

(3) It shall come into force in a ³[State] or in a specified area within a ³[State] only if the ⁴[State] Government by notification in the official Gazette so directs.

2. **Definitions.**—In this Act, unless there is anything repugnant in the subject or context,—

(a) “establishment” means a shop, restaurant or theatre;

(b) “day” means a period of twenty-four hours beginning at midnight;

(c) “restaurant” means any premises in which is carried on principally or wholly the business of supplying meals or refreshments to the public or a class of the public for consumption on the premises but does not include a restaurant attached to a theatre;

(d) “shop” includes any premises where any retail trade or business is carried on, including the business of a barber or hair dresser, and retail sales by auction, but excluding the sale of programmes, catalogues and other similar sales at theatres;

(e) “theatre” includes any premises intended principally or wholly for the presentation of moving pictures, dramatic performances or stage entertainments;

(f) “week” means a period of seven days beginning at midnight on Saturday.

3. **Closing of shops.**—(1) Every shop shall remain entirely closed on one day of the week, which day shall be specified by the shop keeper in a notice permanently exhibited in a conspicuous place in the shop.

¹ For Statement of Objects and Reasons, see Gazette of India, 1941, Pt. V, p. 142; and for Report Select Committee, see *ibid.*, 1942, Pt. V, p. 55; see also p. 147 ante.

² Substituted by the Adaptation of Laws Order, 1950 for “all the Provinces of India”.

³ Substituted, *ibid.*, 1950 for “Province”.

⁴ Substituted, *ibid.* for “Provincial”.

(2) The day so specified shall not be altered by the shop-keeper more often than once in three months.

4. Weekly holidays in shops, restaurants and theatres.—Every person employed otherwise than in a confidential capacity or in a position of management in any shop, restaurant or theatre shall be allowed in each week a holiday of one whole day:

Provided that nothing in this section shall apply to any person whose total period of employment in the week including any days spent on authorised leave is less than six days or entitle to an additional holiday a person employed in a shop who has been allowed a whole holiday on the day on which the shop has remained closed in pursuance of section 3.

5. Additional half-day closing or holiday.—(1) The ⁵[State] Government may, by notification in the official Gazette, require in respect of shops or any specified class of shops that they shall be closed at such hour in the afternoon of one week-day in every week in addition to the day provided for by section 3 as may be fixed by the ⁵[State] Government, and in respect of theatres and restaurants or any specified class of either or both, that every person employed therein otherwise than in a confidential capacity or in a position of management shall be allowed in each week an additional holiday of one-half-day commencing at such hour in the afternoon as may be fixed by the ⁵[State] Government.

(2) The ⁵[State] Government may, for the purposes of this section, fix different hours for different shops or different classes of shops or for different areas or for different times of the year.

(3) The weekly day on which a shop is closed in pursuance of a requirement under sub-section (1) shall be specified by the shop-keeper in a notice permanently exhibited in a conspicuous place in the shop and shall not be altered by the shop-keeper more often than once in three months.

6. No deduction or abatement to be made from wages.—No deduction or abatement of the wages of any person employed in an establishment to which this Act applies shall be made on account of any day or part of a day on which the establishment has remained closed or a holiday has been allowed in accordance with sections 3, 4 and 5, and if such person is employed on the basis that he would not ordinarily receive wages for such day or part of a day he shall none the less be paid for such day or part of a day the wages he would have drawn had the establishment not remained closed or the holiday not been allowed on that day or part of a day.

7. Inspectors.—(1) The ⁵[State] Government may, by notification in the official Gazette, appoint persons to be Inspectors for the purposes of this Act within such local limits as it may assign to each such person.

(2) Every Inspector appointed under this section shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code, (XLV of 1860).

8. Powers of Inspectors.—(1) Subject to any rules made in this behalf by the ⁵[State] Government, an Inspector may, within the local limits for which he is appointed,—

(a) enter and remain in any establishment to which this Act applies with such assistants, if any, being servants of the ⁶[Government] as he thinks fit;

⁵ Substituted by the Adaptation of Laws Order, 1950 for "Provincial".

⁶ Substituted, *ibid*, for "Crown".

(b) make such examination of any such establishment and of any record, register or notice maintained therein in pursuance of rules made under clause (c) of sub-section (2) of section 10, and take on the spot or otherwise such evidence of any person as he may deem necessary for carrying out the purposes of this Act;

(c) exercise such other powers as may be necessary for carrying out the purposes of this Act.

(2) Any person having the custody of any record, register or notice maintained in pursuance of rules made under clause (c) of sub-section (2) of section 10 shall be bound to produce it when so required by the Inspector, but no person shall be compellable to answer any question if the answer may tend directly or indirectly to criminate himself.

9. Penalties.—In the event of any contravention of the provisions of section 3, or section 4, of a requirement imposed by notification under sub-section (1) of section 5, of section 6, or of the rules made under clause (c) of sub-section (2) of section 10, the proprietor or other person responsible for the management of the establishment in which such contravention takes place shall be punishable with fine which may extend, in the case of the first offence, to twenty-five rupees, and, in the case of a second or subsequent offence, to two hundred and fifty rupees.

10. Rules.—(1) The ⁷[State] Government may, subject to the condition of previous publication by notification in the official Gazette, make rules for carrying out the purposes of this Act.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

(a) define the persons who shall be deemed to be employed in a confidential capacity or in a position of management for the purpose of sections 4 and 5;

(b) regulate the exercise of their powers and the discharge of their duties by inspectors;

(c) require registers and records to be maintained and notices to be displayed in establishments to which this Act applies and prescribe the form and contents thereof.

11. Power of exemption and suspension.—The Central Government in respect of establishments under its control, and the ⁷[State] Government in respect of all other establishments within the ⁸[State] may, subject to such conditions if any, as it thinks fit to impose, exempt any establishment to which this Act applies from all or any specified provisions of this Act, and may, on any special occasion in connection with a fair or festival or a succession of public holidays, suspend for a specified period the operation of this Act.

⁷ Substituted by the Adaptation of Laws Order, 1950 for "Provincial".

⁸ Substituted, *ibid*, for "Province."

PLANTATION LEGISLATION

PLANTATION LEGISLATION

Early legislation

Plantation legislation began to develop in India in connection with the tea industry in Assam. Owing to the scarcity of labour in that Province, workers had to be imported from other Provinces and the character of these workers were thus migratory. The early legislative measures were more protective of the planters than of their workers. The Workmens' Breach of Contract Act, 1859 (VIII of 1859), the Employers and Workmens' (Disputes) Act, 1860 (IX of 1860) and Sections 490 and 492 of the Indian Penal Code, 1860, which regulated the condition of employment of plantation labour, made it a penal offence for a worker for breach of contract of service. In compliance with the recommendation of the Assam Labour Committee, the Government of India passed an Act in 1925¹ repealing the Workmens' Breach of Contract Act, 1859 (VIII of 1859) and Sections 490 and 492 of the Indian Penal Code, 1860. The new Act came into force on 1st April 1926 and took a forward step in abolishing penal contract.

Madras and Coorg Acts

The Madras Planters' Act of 1903 also introduced a penal provision to protect the planters from loss of advances given to the workers. The Coorg Labour Act, 1926 contained similar penal provision. The Madras Act was repealed in 1929 and the Coorg Act came to an end in 1931.

Assam Labour and Emigration Act, 1901 (VI of 1901)

All legislative measures so far undertaken to secure labour from different Provinces instead of solving the problem of adequate labour supply, created various difficulties and gave rise to a system of indentured labour. These legislative measures were more protective of planters than of labour.

The first legislation which gave some degree of protection to plantation labour was passed in 1901. The Commission of Enquiry appointed by the Government of Bengal in 1895 criticised the abuses in connection with the prevailing system of recruitment and recommended several measures. Assam Labour and Emigration Act was passed by the Government of India on the basis of these recommendations in 1901 (VI of 1901) extending it to Bengal, Assam, Central Provinces, North-West Frontier Province, Oudh (United Provinces) and the District of Ganjam in Madras. The Provincial Government with the sanction of the Central Government could extend it within their respective provinces. The Act prohibited the recruitment of labour except through licensed contractors. Regulations were thus laid down for control of labour supply to tea gardens. The Act was amended in 1908 (XI of 1908) abolishing the system of penal contract for new recruits except in the recruiting districts and prohibiting recruitment by unlicensed contractors and the right of arrest of workers by planters. The Act was further amended in 1915 abolishing the system of indentured labour in Assam Valley and recruitment by all sorts of contractors. The Act provided for the establishment of Assam Labour Board for supervision of recruitment by tea-garden sirdars.

Jalpaiguri Labour Act, 1912

Jalpaiguri Labour Act, 1912, provides for keeping of registers and submission of returns by employers about health, sickness and mortality of the workers within

¹ The Workmen's Breach of Contract (Repealing) Act, 1925 (III of 1925).

the District. An annual report about sickness and medical services among the workers in the Dooars has also to be submitted by the Civil Surgeon, Jalpaiguri.

Tea Districts Emigrant Labour Act, 1932 (XXII of 1932)

The Assam Labour and Emigration Act of 1901 though amended in 1908 and 1915 proved inadequate for regulation of recruitment and was unintelligible to the common people. The Government of India took steps for further amendment and drafted Assam Recruitment Bill in 1928, but postponed further action on the appointment of Royal Commission on Labour. The Commission found the Act of 1901 open to several objections and recommended the enactment of a new law with the object of (1) freer movement of labour, (2) greater security for labourers and (3) better administration of law. On the basis of these recommendations, the Tea Districts Emigrant Labour Act was passed in 1932 (XXII of 1932) which came into force on 1st October 1933. The Act repealed the Assam Labour and Emigration Act 1901 (VI of 1901) and thus removed the last vestige of penal contract from the statute book.

Main Provisions of Act XXII of 1932

The object of the Act is to regularise the condition of recruitment of plantation labour in the tea gardens of Assam. The Act provides for the appointment of a Controller of Emigrant Labour and the inspecting staff whose duty is to enforce the provisions of the Act and to safeguard the rights and interest of emigrant labour during their stay in the tea estate and during journey to and from the estate to their homes. The Central Government is authorised to levy a cess on recruitment to defray the expenses of the Controller and his staff. The Act empowers the Provincial Government, subject to the control of the Central Government, to declare an area to be controlled emigration area and thereafter an assisted emigrant (a new recruit proceeding to Assam to work as a labourer in tea plantation through the assistance of another person) may be forwarded to Assam by a licensed forwarding agent acting on behalf of an employer. Such assisted recruits can be sent only by prescribed routes where feeding and accommodation arrangements have been made by the agents. The Act also empowers the Provincial Government, with the concurrence of Central Government to declare any controlled emigration area or any part of it to be restricted recruiting area. In such case recruitment can be made only by licensed recruiters or certified garden sirdars. The Provincial Government's powers to declare controlled emigration areas and restricted recruiting areas now vest in the Central Government under the Adaptation Order of 1937. Every emigrant labourer is entitled to repatriation to his own place at the expense of the employer after completing three years' service or even earlier under certain circumstances. He may also postpone the exercise of his right of repatriation or may waive it. The family of a deceased worker enjoys similar rights. Children under 16 must not migrate unless accompanied by parents or guardians and married woman without the consent of her husband. Infringement is punishable with imprisonment which may extend to six months or a fine of Rs. 500/- or both. The Act does not contain any provision regulating accommodation, sanitation, water supply, medical treatment, wages, hours of work, educational facilities, rest, recreation and other welfare arrangements for workers employed in tea estate. The Act is, strictly speaking, not a labour legislation but is really an emigration legislation.

Administration

The Act is administered by the Controller of Emigrant Labour appointed by the Central Government, whose main functions are supervision of recruitment and repatriation of emigrant labourers. He has no control over conditions of labour

and life in tea gardens in Assam. The Controller publishes an annual report on the working of the Act. Statistics for the year ending 30th September 1946 shows that there were 1,144,439 emigrant labourers in Assam, of whom 584,222 were adults and 560,217 children. Of these 44,574 were new recruits during the year, 26,814 repatriated and 11,733 postponed their rights. The major portion of Sylhet having acceded to Pakistan in 1947, the total emigrant labour population was reduced to 966,057 for the year ending 30th September, 1947, of these 492,749 were adults and 473,308 children. The number of new recruits during that year was 43,007, 21,047 persons were repatriated and 13,675 labourers postponed their right of repatriation.

Defects of the Act and Government's Five-year Labour Programme

Next to factories, the plantation industries are the largest employers of labour. The existing Act is not actually a piece of labour legislation as it does not regulate working conditions in tea plantation; but it is really an emigration legislation.

Great majority of the plantation workers are not covered by the Act. The Controller of Emigrant Labour has no control over conditions of labour and life in the tea gardens in Assam. Plantations in India are thus practically immune from any legislative control regarding the regulation of working conditions. Plantation labour also does not at present come under any existing labour legislation excepting the Workmen's Compensation Act. The provisions for regulating the conditions of work of plantation labour exist in Cochin State only. The Reports of the Labour Investigation Committee² show that in plantations (1) wages are inadequate (2) housing conditions are unsatisfactory and (3) medical and welfare services require substantial improvement and expansion. The Committee suggested the enactment of a separate Plantation Labour Code for the whole of India as the conditions of life and employment on plantations are quite different from those in other industries.

Under the Five-year Labour Plan, the Government of India undertook to adopt measures for improvement of wages and living conditions of these workers. A conference of the representatives of Provincial and State Governments, employers and workers was convened to chalk out a programme of action for bringing about the much needed improvements in the conditions of plantation workers. Legislation will be undertaken to give effect to the agreed policy and to provide for inspection by health authorities. An Industrial Committee on Plantation was set up by the Government to consider the problems of plantation industry.

Steps for New Plantation Labour Code

Industrial Committee on Plantation: First Meeting

A Tripartite Conference of the representatives of Provincial Governments, employers and workers in Tea Plantation Industry was held on the 8th and 9th January 1947, at New Delhi to consider the special problems affecting tea plantation labour and to decide what specific measures should be taken to secure a living wage and reasonable conditions of work. As a result of discussions, it was agreed that a rapid enquiry into the Cost and Standard of Living of Plantation workers in Assam, Bengal and South India should be conducted by the Government in collaboration with the industry to enable the Committee to fix fair rate of wages for the workers. Pending the enquiry the employers in Assam and Bengal agreed to certain minimum increase in dearness allowance to the workers. As a result, the dearness allowance was increased to 2 annas per day for every adult worker and one anna per day for every child worker in the *hazira* rate and to 25 per cent

² Main Report and Mr. Rege's Report on Plantation.

for monthly rated workers. Maternity benefit was increased to 12 annas a day for a period of 8 weeks and sickness benefit was fixed at 10 annas a day for a maximum period of 2 weeks a year. The Conference agreed that the Government should prescribe and enforce standards regarding housing and medical services for plantation labour and the employers should submit their proposals to the Government through the Provincial Governments and that the matters should be discussed in the next Conference. The extension of Primary Education Act to plantation areas and the necessity of organising welfare activities were also discussed. The Conference unanimously recommended that a special Plantation Labour Act should be enacted to secure the above objectives. It was also decided that the Plantation Labour Conference should be made a permanent body and the conference should consider major problems affecting all plantation labour whether of tea, rubber, coffee or other products, leaving the specific problems regarding each section for detailed consideration of the appropriate Advisory Committee. It was also agreed that a small Standing Committee should be constituted which could meet at non-frequent intervals and advise the Government on the problems referred to it.

Second Meeting

The Second meeting of the Industrial Committee on Plantations was held at New Delhi from 31st March to 2nd April 1948. Mr. Deshpande's Reports³ on the enquiry into the Cost and Standard of Living of Plantation Workers in Assam and Bengal and South India were placed before the Committee and the exclusion of children below 12 years of age from employment and the question of wages were considered. The Committee agreed to discontinue the employment of children who have not completed 12 years of age. As the fixation of minimum wage under the Minimum Wages Act, 1948 and the determination of fair wages by Wage Boards under the proposed Plantation Act will take time, an agreement on wages was reached which resulted in further increase of dearness allowance to the workers from 1st of May 1948. Dearness allowance to adult workers in tea plantation in Assam Valley, the Dooars and Terai has to be increased to 3½ annas per day and 3 annas per day for Darjeeling and Cachar. Children between 12 and 18 are to be given 2 annas per day. Adult workers in coffee estates are to be given an increase of 3 annas and children 1½ annas. In rubber estates, adults are to be given an increase of 2 annas and children 1 anna.

In connection with the formation of Standards for Medical Care for Plantation labour as decided in the first Plantation Conference, Major Lloyd Jones, Deputy Director-General of Health Services (Social Insurance) was deputed by the Government. He visited the plantation areas in Assam, Bengal and South India and drew up, in consultation with the Provincial Governments and the Employers' Associations, Standards of Medical Care for tea plantation labour, recommending provision of garden hospitals and dispensaries in the first stage and group and central hospitals in the second stage. His Report⁴ was discussed in the Second Meeting of the Industrial Committee. Indian Tea Association accepted the proposals while Indian Tea Planters Association criticised the same. Major Lloyd Jones met the criticisms in the meeting but there was no unanimous acceptance of the proposed Standards. Ultimately an agreement was reached that a cess should be imposed only on the gardens, which did not join the Scheme and the Committee agreed that standards of medical care should be prescribed by law and the employment of children below the age of 12 in plantation should be stopped.

³ (1) Report on an Enquiry into the Cost and Standard of Living of Plantation Workers in Assam and Bengal and (2) Report on an Enquiry into the Cost and Standard of Living of Plantation Workers in South India.

⁴ Standards of Medical Care for Tea Plantations in India.

The meeting also agreed that the Standing Committee should consist of 12 members, 4 each from the employers, workers and the Government groups.

Third Meeting

The third meeting of the Industrial Committee on Plantation which met in New Delhi on the 4th and 5th November 1950 discussed the draft Plantation Labour Bill, clause by clause. The provisions relating to education were objected to by the employers' representatives on the ground that primary education being the responsibility of the State, the employers should not be further burdened as they are already paying primary rural educational cess. The Bill gives direction relating to hygienic arrangements and medical facilities to be provided by the employers.

On the question of welfare measures, the Government has been endeavouring to persuade the planters to introduce such measures voluntarily. Welfare measures have been incorporated in the draft Bill and the Government's view is that most of these measures will be borne at the cost of the employers.

The Committee reaffirmed the liability of the employers to provide housing facilities to the workers. The Committee laid down certain standard building specifications and recommended that the employers should aim at a target of providing eight per cent of the population of plantation gardens with houses every year.

The question of abolition of Kangany system of labour in South India plantations about which the Rege Committee disclosed many evils, was discussed. The Committee proposed to appoint a Sub-Committee, comprising representatives of South India plantation employers and workers and Government of States where this system prevails to examine the problem and report thereon within three months.

Plantation Labour Act, 1951 (LXIX of 1951)

Largely on the basis of discussions at a Tripartite Plantation Conference held in September, 1949 and the Third Meeting of the Industrial Committee on Plantation held in November 1950, the Government framed the Plantation Labour Bill and introduced the same in the Parliament on the 7th June 1951. The Bill was passed by the Parliament on the 15th October, 1951 and received the assent of the President on the 2nd November 1951. The Act regulates for the first time the conditions of work and employment of plantation workers and its provisions are largely based on the Factories Act, 1948.

Main Provisions of Act LXIX of 1951

Scope

The Act extends to the whole of India except the State of Jammu and Kashmir and applies, in the first instance, to all tea, coffee, rubber and cinchona plantations which admeasure 25 acres or more or whereon 30 or more persons are employed or were employed on any day of the preceding 12 months. State Governments, subject to the previous approval of the Central Government, may apply it to any other class of plantations within that State.

Inspecting Staff

The administration of the Act will be responsibility of the Chief Inspector of Plantation to be appointed by the State Government. They are to be assisted by Inspectors. Provisions are made for appointment of Certifying Surgeons for the examination of and enquiry into the conditions of work and for the exercise of medical supervision.

Health

Under the Act, the employers are required to make effective arrangement for supply of wholesome drinking water for all workers and for providing sufficient

number of latrines and urinals, of the prescribed standard, separately for men and women. They are also required to provide and maintain such medical facilities for the workers as may be prescribed by the State Government. The Act empowers the Chief Inspector to provide and maintain such facilities if these are not provided by the employers and to recover the cost from them.

Welfare

The State Governments are empowered to make rules requiring (1) every planter ordinarily employing 150 workers to provide and maintain canteens, (2) every planter to provide such recreational facilities for the workers and children as may be prescribed, (3) every planter employing 50 or more women to provide and maintain creches and (4) every planter in whose estate there are more than 25 workers' children between the ages of 6 and 12 to provide educational facilities for them. Exact standards of canteen, creches, recreational and educational facilities are to be prescribed under the Rules framed by the Governments.

Under the Act it is the duty of every employer to provide and maintain for every worker and his family residing in the plantation necessary housing accommodation. The State Government may make rules providing (1) the standard and specification of the accommodation to be provided, (2) the selection of preparation of the site for the construction of the houses and the size of such plot, (3) rent chargeable from the workers, (4) the procedure for allotment to workers and their families housing accommodation and suitable strip of land adjoining such accommodation for use as kitchen garden and (5) the constitution of tripartite Advisory Boards for consultation in regard to matters connected with the provisions of housing accommodation. The State Government may make rules requiring the planters to provide workers with such number and type of umbrellas, blankets, rain coats or other like amenities for protection of the workers from rain or cold.

Welfare Officers

Employers employing 300 or more workers are required to employ Welfare Officers. The State Government may prescribe the number, duties, qualifications and conditions of service of the Welfare Officers.

Hours of Work

The Act fixes the weekly working hours for adults at 54 and for children and adolescents at 40. The Act does not fix the daily working hours but fixes the spread over period at 12 hours a day including the period of rest and the time spent for waiting for work on any day. Workers must be given an interval for rest for at least half an hour after working for 5 hours. The State Government may make rules providing for (1) weekly holiday and (2) payment for work done on such holiday at a rate not less than overtime rate prevailing in the area. Workers can work on any day of rest which is not a closed holiday and this is allowed up to a total period of 10 days at a stretch. Where on any day a worker has been prevented from working by reason of tempest, fire, rain or other natural causes, that day may be treated as his weekly day of rest for the week concerned, if he so desires. Workers whose total period of employment in any week is less than 6 days are not entitled to weekly holidays.

Employment of Children and Young Persons

The Act prohibits the employment of children under 12 years of age. No child (who has not completed 15 years) or adolescent (who has not completed 18 years) can be allowed to work unless he is certified fit to work by a Certifying Surgeon and unless he carries with him a token to this effect.

Night Work for Women and Children

Except with the permission of the State Government, no woman or child worker can be employed in any plantation otherwise than between the hours of 6 A.M. and 7 P.M.

Leave with Pay

The Act provides for annual leave with wages for an adult worker at the rate of one day for every 20 days of work, and for a child or adolescent one day for each 15 days of work. The leave is accumulative but the worker shall cease to earn any leave when his earned leave amounts to a maximum period of 30 days. During the leave period, the worker will be paid at a rate equal to his total full-time wages, exclusive of any overtime earnings and bonus but including dearness allowance and money value of food concessions. The Act reserves the right accruing to workers from awards, agreements or contracts of services providing for longer period of leave.

Sickness and Maternity Benefit

The Act prescribes that every worker shall be entitled to sickness allowance in case of sickness duly certified by a qualified medical practitioner and a woman worker maternity allowance in case of confinement or expected confinement, subject to any rules that may be prescribed by the State Government in this respect. The State Government may make rules prescribing the rate, period of benefit, qualifying conditions, etc.

Penalties

Adequate penalty provisions have been made in the Act to secure proper enforcement of law. Complaint has to be lodged within three months from the date on which the alleged commission of the offence comes to the knowledge of the Inspector.

General Powers of the Central and State Governments

The Central Government may give directions to the State Governments in regard to the implementation of the Act. The State Governments may make Rules to carry out the purposes of the Act. The Act authorises the State Government to exempt, subject to conditions and restrictions, any employer or class of employers from all or any of the provisions, after obtaining previous approval of the Central Government.

Non-implementation of the Plantation Labour Act

Slump in Tea Industry and Official Team (Raja Ram Rao) Report

The slump in tea prices towards the end of the year 1951 led to the closing down of a number of gardens. The Government of India received a number of representations in March and April 1952 from different quarters requesting for immediate relief to the tea industry owing to the significant fall in prices. Towards the end of May, 1952, the Government of India in the Ministry of Commerce and Industry, appointed a Team of Officials consisting of Sri E. Raja Ram Rao, Member, Central Board of Revenue and Sri M. A. Mulkey of the Ministry of Commerce and Industry assisted by Sri S. V. Ayyar, Chief Cost Accounts Officer, Ministry of Finance (Industry and Commerce Division) to investigate into the conditions of the industry and to recommend measures of relief. Though the object of enquiry was to give advice on the immediate reliefs to the industry on account of steep fall in prices, many questions which had no immediate bearing on this

aspect have been placed before the Team. The Report of the Team dated the 19th September, 1952 is a comprehensive review of all problems facing the industry. The Team pointed out to the industry at the very early stage of enquiry that its first attempt to effect economy must not be by attempted reduction of minimum wages or retrenchment.

The following amongst others, are the main demands of the industry before the Team:—

(1) Reduction of the Wage Bill which has increased due to the implementation of the Minimum Wages Act and enforcement of minimum wages Awards; and suspension of the operation of the Minimum Wages Act, 1948; (2) Conversion of the foodstuff concessions into cash benefits; the State to take over supply of foodgrains to the labour and responsibility for supply of foodstuffs to the workers' dependants and non-workers to end; (3) Suspension of the implementation of the Plantation Labour Act, 1951 and (4) Retrenchment of surplus labour.

The Team's Recommendations on the abovementioned demands are as follows:—

(1) The industry should make necessary representations to the States concerned for appointment of Advisory Committees and Advisory Boards and the anomalies placed before the Team in regard to minimum wage should be studied by the Central Advisory Board appointed by the Central Government. The Team suggested that in the interests of all, the Central Advisory Board recently constituted might quickly advise the Governments concerned. The Team further suggested that in the long-term interest of labour itself, the wages and other amenities must be such as the Industry could afford to pay; (2) Government should supply rationed foodstuffs at convenient centres and depots and the tea gardens should only be required to retail these foodstuffs through their shops. The garden should continue to bear the expenses of transporting the foodstuffs from the centres or depots to their ration shops. The legal responsibility for distribution of foodstuffs to the workers should continue to rest on the tea gardens. An additional cash wage equivalent to the difference between the prices at present paid by the workers for foodstuffs, viz., Rs. 5/- per maund in case of rice and the price they will have to pay for rationed foodstuffs at controlled rates, should be paid to them. The foodstuffs should be supplied only to workers and their dependant family members such as father, mother, brother, sister and other close relations. It would not be proper to make the industry responsible for feeding at concession rates people not connected with the industry; (3) The implementation of the Plantation Labour Act should be postponed for a period of 2 years or so in the case of tea industry; (4) Retrenchment should not appear as the first item on the proposal for reduction of the cost of production. The Team found it difficult to make any positive recommendation about retrenchment and expressed the view that the State Governments might consider the question sympathetically in the light of factors obtaining at the time

Industrial Committee on Plantation: Fourth Meeting

The Fourth Meeting of the Industrial Committee on Plantation was held in Calcutta on the 19th and 20th December, 1952 to consider the question of the closing of tea gardens and the Recommendations of the Official Team concerning labour. The Union Labour Minister Sri V. V. Giri while delivering the inaugural speech dwelling on the recommendations of the Raja Ram Rao Committee (Official Team) about tea industry, admitted that the tea garden labourers' wages were inadequate but expressed the hope that they would be realistic enough to judge the situation objectively. He advised the representatives of the employers and labour to hold bipartite discussions for arriving at some agreed solution acceptable to all. A resolution arrived at as a result of the bipartite agreement was furnished

to the Government for consideration. The resolution recommended that since the Official Team's Report did not furnish adequate statistical data relating to industry and labour, a Tripartite Commission should be appointed to investigate into the cost structure of the industry.

The Central Government, though in agreement with the above view, felt that in view of the technical nature of the problem, a Committee consisting of Experts rather than a Tripartite Commission would be more appropriate, and decided to appoint an Expert Committee consisting of a body of experts including one with an intimate knowledge of labour problems to investigate into the cost structure of the industry with a view to suggesting ways and means for revision of the cost structure to bring it in consonance with the present price level, etc.

Standing Plantation Committee

A special meeting of the above Committee was held at Shillong on the 28th February, 1953 to discuss the problems of closure of tea gardens and surplus labour and conversion of foodgrains concession into cash. The Central Labour Minister Sri V. V. Giri who inaugurated the meeting remarked: "If workers are asked to undergo sacrifices to meet the emergencies, it is fair that other higher placed *i.e.*, the managerial staff as well as the shareholders should also make some sacrifices". There was a general agreement on the principle of cash conversion but there was no agreement on the exact quantum of compensation to be paid. The problem of closure of tea gardens and surplus labour could not be decided upon for want of time.

Fifth Meeting

The Fifth Meeting of the Industrial Committee on Plantation was held in Calcutta on the 30th and 31st December, 1954 to consider the following agenda—(1) Lay-off compensation for plantation workers; (2) Enforcement of the Plantation Labour Act, 1951 and (3) Cash conversion of the foodgrains concessions.

A number of tea gardens closed down or drastically retrenched their workers during 1952. The question of payment of compensation for involuntary unemployment was discussed at the 13th Meeting of the Standing Labour Committee held at New Delhi in July 1953 and an agreement was reached between the representatives of employers and labour as a result of bipartite consultation, on the quantum of compensation and the conditions for grant of compensation in the event of retrenchment and lay-off. Industrial Disputes (Amendment) Act, 1953 (XLI of 1953) was based largely on the terms of this agreement, but the lay-off provisions were applicable to factories and mines only. The Committee recommended that the provisions of the Industrial Disputes (Amendment) Act of 1953 relating to lay-off should be applicable to plantation industry with effect from the 1st April, 1954. The Industrial Disputes (Amendment) Act, 1954 (XLVIII of 1954) was passed to give effect to this recommendation.

The Committee recommended that (1) the Plantation Labour Act 1951 should be brought into force from the 1st April, 1954, (2) the sections which automatically came into force, as for example, those relating to the provision of drinking water, fitness certificate and annual leave with wages, should be given effect to from that date, (3) the Rules should be framed in respect of all welfare measures and submitted to the Tripartite Committee for scrutiny and approval and after finalisation of the Rules, a phased programme should be drawn up in the matter of implementation. The Committee felt that priority should be given to the provisions of medical facilities, housing, protection from the weather and appointment of Welfare Officers.

On the question of cash conversion the Committee recommended that for Assam the cash wage should be increased subject to the condition that foodgrains would be available at certain specified rates.

Enforcement of the Plantation Labour Act, 1951 & Rules

The Act has come into force on the 1st of April, 1954. The scheme of the Act is such that practically none of the welfare measures can be implemented unless Rules on the subject have been framed by the State Government concerned. The Act authorises the Central Government to give directions to the State Governments in regard to the implementation of the Act. Model Rules drafted by the Central Government in respect of most of the health and welfare provisions, were circulated for comments. The draft Model Rules were subsequently finalised and forwarded to the State Governments for adoption. Drafts of the Plantation Labour Rules have been published by the State Governments concerned in their respective State Gazettes in August, 1955 after the draft Model Rules were discussed in the Sixth Meeting of the Industrial Committee on Plantation held at Oatcamund on the 19th July, 1954.

Industrial Committee on Plantation: Sixth Meeting

The Sixth Meeting of the Industrial Committee on Plantation held at Oatcamund on the 19th July 1954 dealt with the draft Model Rules. The model rules have since been finalised and forwarded to the State Governments concerned for adoption. The Rules provide for phased implementation of measures relating to housing and medical facilities and authorises the State Governments to fix the date or dates for providing certain other facilities, *viz.*, conservancy, canteens, creches, recreational and educational facilities.

Seventh Meeting

The Seventh Meeting of the Industrial Committee on Plantation held in New Delhi on the 31st August 1955 and the 1st September, 1955 recommended speedy implementation of the Plantation Labour Act of 1951. The Union Labour Minister Sri Khandubhai Desai addressing the meeting stressed the need for the immediate implementation of the Act and regretted that even in 1955 the Act could not be implemented fully. He said, "Not only this generation but the future generation will blame us if we delay the implementation of the law any further."⁶ He further said that the plantation industry played a very important part in the country's economy having engaged roughly about a million and a quarter of employees but the plantation labour was not given a fair deal before the independence.

Welfare for Plantation Workers

The Tea Board allocated Rs. 20,000/- to the Governments of Uttar Pradesh and Bihar for the welfare of plantation workers to provide a mobile dispensary and a welfare centre. The Board also agreed to donate a sum of Rs. 57,500/- towards the capital cost of the T. B. Chest Clinic proposed to be set up at Darjeeling where treatment on concessional terms will be offered to the tea garden workers.

Maternity Benefit extended to Plantation Labour

Maternity benefit legislation was so long applicable to the factory labour only and there was no statutory obligation on the employer to pay maternity benefit to plantation labour. In Assam only women workers in plantations are entitled

⁶ Hindusthan Standard, Calcutta Edition, dated the 2nd September, 1955.

to maternity benefit under the law amounting Re. 1/- per week before and Re. 1-4-0 per week after confinement, total amount payable being Rs. 14/-. In October 1948 the Government of West Bengal passed a separate maternity legislation called West Bengal Maternity Benefit (Tea Estates) Act, 1948 (West Bengal Act No. XXXIII of 1948) for extending maternity benefit to women workers employed in tea factories and plantations. The Act has come into force from the 1st May, 1949 and provides for payment of maternity allowance at a rate of Rs. 5/4/- per week for a period of 12 weeks as has been provided in the Employees' State Insurance Act, 1948 (XXXIV of 1948).

Minimum Wages Act, 1948

Employment in plantations is one of the employments covered by the provisions of the Minimum Wages Act, 1948. The Governments of Assam, Bihar, Madras, Punjab, Uttar Pradesh, West Bengal, Mysore, Travancore-Cochin and Coorg have fixed minimum wages for the workers employed in the plantations. The Seventh Meeting of the Industrial Committee on Plantation decided that the need for revising minimum wages fixed under the Minimum Wages Act, 1948 should be brought to the notice of the State Governments, as the objective to be arrived at was a suitable minimum wage rising to a fair wage.

Payment of Wages Act extended to Plantation Labour

As a first step in improving the conditions of labour in plantation and in giving effect to the recommendation of the Labour Investigation Committee, the Government of Madras has extended the provisions of the Payment of Wages Act to the plantation workers in the State with effect from April 1947. The Government of West Bengal also, by a notification dated 9th May, 1949, has extended the provisions of the said Act to the payment of wages to all classes of persons employed in the Tea Plantations in West Bengal.

Provident Fund for Plantation Labour

The question of introducing the compulsory contributory provident fund scheme for the tea plantation labour is under the consideration of the Government of India for some time past. The Seventh Meeting of the Industrial Committee on Plantation held on 31st August and 1st September, 1955 decided to extend the Employees Provident Fund Act, 1952 to plantation labour. It is expected that the Central Government would initiate suitable legislation for amending the present Employees Provident Fund Act 1952 with a view to extending its benefits to plantation labour.

The Government of Assam has recently enacted the Assam Tea Plantations Provident Fund Scheme Act, 1955 (Assam Act X of 1955) for making provisions for the framing of a compulsory provident fund scheme for labourers including artisans employed in Tea Plantations in Assam. The Act received the assent of the President on the 5th June, 1955. The Assam Government has framed the Assam Tea Plantations Provident Fund Scheme under the above Act and published the same in Assam Gazette, Part IIA dated the 10th August, 1955 at page 1415 under Notification No. G. L. R. 267/55, dated the 5th August, 1955.

Plantation Enquiry Committee

The Government of India has set up the Plantation Enquiry Committee in 1954 to enquire into the economic conditions and problems relating to tea, coffee and rubber industries. It is expected to submit its report by the end of 1955.

TEA DISTRICTS EMIGRANT LABOUR ACT, 1932 (XXII OF 1932)

Statement of Objects and Reasons¹

The Assam Labour and Emigration Act, 1901, which regulates emigration to the tea districts of Assam, was designed, like its predecessors, mainly to regulate the recruitment and engagement of indentured labour. It has not been possible for some years for any worker in Assam to be subjected to a penal contract and, in consequence of this and other changes, the law is entirely unsuited to present conditions. Attempts were made by amending Acts in 1908, 1915 and 1927 to adapt the Act to meet altering conditions; substantial parts of it have been repealed and large numbers of rules have been framed in the endeavour to use the Act to regulate the recruitment of emigrants who are subject to no indenture. These changes have proved inadequate and they have made the law extremely confused. Large parts of the surviving provisions of the Act have become completely ineffective and those provisions which are operative are open to weighty criticisms.

2. In 1926, the Government of India addressed the Local Governments mainly concerned suggesting that the time might have come for the abolition of all control over recruitment and that, if this was inadvisable, considerable changes should be made in the law. The replies received agreed in regarding some restrictions on recruiting as still essential and the existing restrictions as unsatisfactory. The Government of India accordingly drafted an Assam Recruitment Bill, which was sent to the Local Governments in December, 1928. By the time criticisms of it had been received, the Royal Commission on Labour had been appointed and a decision was deferred until they had reported. They collected a large amount of evidence on the subject and devoted Chapter XX of their Report to a discussion of it. As a result, they recommended the replacement of the existing legislation by a new enactment. The Bill follows the scheme prepared by the Commission, whose recommendations have been varied in respect of minor details and supplemented where necessary.

3. The first object of the Bill is to make it possible, on the one hand, to exercise all the control over the recruitment and forwarding of assisted emigrants to the Assam tea gardens as may be justified and required by the interests of emigrants and potential emigrants and, on the other hand, to ensure that no restrictions are imposed which are not so justified. The ideal, now as in the past, is the reduction of restrictions to a minimum and the establishment of such conditions as will make it possible to dispense with all control. This ideal has recently been endorsed by both the Royal Commission on Agriculture and the Royal Commission on Labour. It is desirable, therefore, that the provisions relating to control should be sufficiently elastic to allow of their complete or partial relaxation as and where this is required, and sufficiently wide to deal with any possible recrudescence of recruiting abuses. The Bill proposes that Local Governments should be able, subject to the control of the Government of India¹ to impose control over the forwarding of assisted emigrants (clause 16 and Chapter III generally) or over both their recruitment and their forwarding (clauses 16 and 26 and Chapters III and IV generally) as occasion may dictate. Under the former system, assisted emigrants will ordinarily be forwarded through licensed local agents in the recruiting districts (clauses 17, 18)² by prescribed routes (clause 19) on which provision for food, shelter, etc., must be made by employers and medical supervision can be exercised [clauses 20, 33, 35 and 36 (4)]. Only employers who make satisfactory provision will be able to secure and retain licenses for local agents [clause 17 (3)], and the operations of local agents and others engaged in forwarding will be subject to inspection and scrutiny (clauses 4 and 22). Under the latter system, employers will, in addition, be prevented from recruiting otherwise than by means of certificated persons employed in the gardens (*garden-sardars*), or recruiters³ licensed in the recruiting provinces (clause 27). But the ordinary provisions relating to either system may be relaxed to such extent as seems desirable in any area to which the system is applicable [provisos to clauses 16 (1) and 26 (1)].

4. In addition, the Bill seeks to secure for all those who are to emigrate under it the right to be repatriated from Assam (Chapter II) with their dependants (clause 9) at the employer's expense (clause 12). Ordinarily this right will accrue after three years from the date of entry into Assam (clause 7). It will also be possible to claim repatriation within three years in the event of the emigrant (a) being dismissed otherwise than for wilful misconduct⁴ (clause 8), (b) failing in health, (c) not being provided with suitable work⁵, or (d) having his wages unjustly withheld (clause 10). Repatriation within one year of entry to Assam will also be possible where there has been fraud or misrepresentation or other irregularities in recruiting (clauses 10 and 34). Further, repatriation can be ordered at any time by a Criminal Court in the case of a labourer who has been assaulted by the

¹ Gazette of India, 1932, Part V, page 133.

employer or his agent (clause 11)⁶. It is believed that the offer of these rights of repatriation to emigrants will benefit not merely emigrants but the industry as a whole by removing a serious obstacle to the flow of suitable labour, and that the existence of an adequate supply of such labour will go far to remove the conditions which make it undesirable at present to dispense with control over emigration.

5. For the general administration of the system which the Bill seeks to establish it is proposed to appoint a Controller of Emigrant Labour with some staff and possibly a Deputy Controller (clause 3)⁷. The charges will be met by the tea industry through a cess of somewhat similar character to that raised under the present Act for the Assam Labour Board (clause 5). The Controller is intended to be an officer subject to the Government of India and responsible for—

- (a) enforcing the law relating to repatriation in Assam (clauses 4, 8—10, 12—15) collateral powers being given to District Magistrates (clause 36);
- (b) supervising the forwarding routes (clauses 4, 33—35)⁸;
- (c) supervising conditions in the recruiting provinces, where his powers will be limited to inspection and advice [clauses 4, 17(3)], executive action being entrusted to the local authorities (Chapters III and IV).

He should thus be able to secure the proper co-ordination of the whole system, and to advise regarding possible relaxations of control or the imposition of further restrictions under the Act, if required. It is intended that, with the appointment of the Controller, the Assam Labour Board, which has since 1915 exercised some supervision, without executive authority, in the recruiting provinces, should be abolished.

6. Apart from the main changes proposed in the law and explained above, the Bill involves a number of minor alterations in the present position.

(a) The Bill is not limited in its initial application to certain provinces [clause 1 (2)]. So to limit it would involve the limitation of repatriation rights to emigrants from these provinces, while its general extension does not render obligatory the extension of control to areas at present uncontrolled.

(b) It will no longer be possible to restrict the recruitment of labour within Assam itself, *cf.* Report of the Royal Commission on Labour, page 373 [clause 2 (c)].

(c) Unassisted emigration will be entirely free; control can only be exercised where material assistance is given (clause 2 (h)⁹).

(d) The engagement and forwarding of emigrants who are merely returning to Assam after leaving it as adults¹⁰ will be uncontrolled [clauses 2 (f) and 2 (h)¹¹].

(e) It will no longer be possible to prohibit recruitment for Assam; with the complete abolition of penal contracts, the prohibition of recruitment for certain districts of India cannot be justified in the interests of labour, *cf.* Reports of the Royal Commission on Agriculture, page 581, and of the Royal Commission on Labour, page 363.

(f) Managers and other supervising officers on tea estates will be able to receive certificates to conduct recruiting in restricted recruiting areas (clause 28).

(g) It is proposed that in all areas, controlled or uncontrolled, it should be unlawful to assist persons under 16 to emigrate unless they are accompanied by their parent or guardian (clause 32)¹².

(h) It is proposed that it should be possible to detain and return at the employer's expense sick persons emigrating from any province (clause 33).

(i) The provisions of the Bill are intended to apply only to emigration for work on tea plantation in the first instance; but power is retained to extend its application to other industries in Assam and to other districts than the eight tea districts. This power could be used if labourers are imported to other forms of industry with a view to their transference to tea estates, or if the tea industry develops in other parts of Assam (clause 38)¹³.

Note

[The numbers of the clauses of the Tea Districts Emigrant Labour Bill of 1932, as introduced in the Legislative Assembly, quoted in the Statement, have been altered where necessary to accord with the numbers of the sections of the Tea Districts Emigrant Labour Act, 1932 (XXII of 1932).]

1. The Select Committee provided that a notification under section 26 should have the previous sanction of the Governor-General in Council.

2. This clause was revised by the Select Committee to cover not only assisted emigrants but also persons who had worked in Assam as labourers in the two preceding years. The Committee considered that, for purposes of check and in the interest of those persons themselves, it was desirable that they should be produced at the depots of the local forwarding agents. But the Committee did not contemplate that they should be subject to the provisions of the Act relating to assisted emigrants in other respects.

3. The original clause 27 was omitted by the Select Committee as the provision in it was covered by section 31 as amended by the Committee.

4. The Select Committee amended the phrase "wilful misconduct" to "wilful and serious misconduct".

5. This provision was amended by the Select Committee so as to prevent an emigrant labourer from being compelled to work on less than the ordinary wage.

6. The Select Committee provided for the grant of repatriation also for "any other sufficient cause" [section 10(1) (d)] because they considered that it was not possible to provide specifically for all the grounds which might warrant repatriation and that cases of serious hardship might arise which were not covered by the other provisions. But as a safeguard in the exercise of this very wide power, they provided that it should be exercised only by the Controller of Emigrant Labour himself and not by another officer exercising the powers of the Controller delegated by or under the Act.

7. The Select Committee amended the clause to make it possible to appoint more than one Deputy Controller if necessary.

8. The Select Committee amended these clauses to cover persons who had worked in Assam as labourers in the two preceding years.

9. See also section 2(g) which was inserted by the Select Committee.

10. The definition was widened by the Select Committee to cover persons who had already worked in Assam as labourers, provided they had been absent from Assam for more than two years.

11. See also section 2(g) which was inserted by the Select Committee. The definition in section 2(h) was amended by the Select Committee so as to ensure that a person who takes up other employment on a tea garden such as that of domestic servant or mechanic does not thereby lose his status as an emigrant labourer.

12. The Select Committee extended the prohibition also to the recruitment of a married woman without the consent of her husband.

13. The Select Committee added section 39, and section 40 was added by the Legislative Assembly.

TEA DISTRICTS EMIGRANT LABOUR ACT, 1932 (XXII OF 1932)

Arrangement of Sections

CHAPTER I—PRELIMINARY

1. Short title, extent and commencement.
2. Definitions.
3. Appointment and status of Controller and Deputy Controllers.
4. Powers of the Controller.
5. Emigrant labour cess.
6. Power to make rules for the collection of emigrant labour cess.

CHAPTER II—REPATRIATION

7. General right of repatriation after three years in Assam.
8. Right to repatriation on dismissal.
9. Rights of repatriation of family of deceased emigrant labourer.
10. Right to apply for repatriation in certain circumstances.
11. Power of Criminal Courts to order repatriation.
12. Incidents of the right of repatriation.
13. The discharge of an employer's duty to repatriate.
14. Postponement, waiver and forfeiture of the right.
15. Power of the Controller to enforce the provisions of this Chapter.

CHAPTER III—CONTROLLED EMIGRATION AREAS

16. Power to declare controlled emigration areas.
17. Power to grant licenses to local forwarding agents.
18. Recruits in controlled emigration areas to be sent to forwarding agents' depots.
19. Assisted emigrants to be forwarded to Assam by local forwarding agents by prescribed routes.
20. Maintenance of depots along prescribed routes.
21. Power of Central Government to make rules.
22. Inspection of depots, vessels and vehicles.
23. Action where proper arrangements not made for assisted emigrants.
24. Cancellation of licenses.
25. Penalty for illicit abetment of emigration.

CHAPTER IV—RESTRICTED RECRUITING AREAS

26. Power to declare restricted recruiting areas.
27. Grant of licenses to recruiters.
28. Grant of certificates to garden-sardars.
29. Cancellation and suspension of recruiter's license.
30. Cancellation of garden-sardar's certificate.
31. Penalty for illicit recruitment.

CHAPTER V—SUPPLEMENTAL

32. Prohibition of the recruitment of children.
33. Power to detain and return sick persons.
34. Power to return person improperly recruited.
35. Power to enforce the provisions of Sections 33 & 34.
36. Magistrates and medical officers who may exercise the powers of the Controller.
37. Power of the Central Government to make rules.
38. Powers to extend the scope of this Act.
39. Saving for acts done in good faith under the Act.
40. Bar of jurisdiction of Civil Courts.
41. Repeal of Act VI of 1901 and certain consequences.

SCHEDULE.

TEA DISTRICTS EMIGRANT LABOUR ACT, 1932 (XXII OF 1932)¹

An Act to amend the law relating to emigrant labourers in the tea districts of Assam.

[8th October, 1932.]

Whereas it is expedient to amend the law relating to emigrant labourers in the tea districts of Assam; It is hereby enacted as follows:—

CHAPTER I.—PRELIMINARY.

1. Short title, extent and commencement.—(1) This Act may be called the Tea Districts Emigrant Labour Act, 1932.

²[(2) It extends³ to the whole of India ⁴[except the State of Jammu and Kashmir].]

(3) It shall come into force on such ⁵date as the ⁶[Central Government] may, by notification in the ⁷[Official Gazette], appoint.

2. Definitions.—In this Act, unless there is anything repugnant in the subject or context,—

(a) “tea district” means any of the following districts in the ⁸[State] of Assam, namely,—

Lakhimpur, Sibsagar, Nowgong, Darrang, Kamrup, Goalpara,
⁹[and Cachar], and the Balipara Frontier Tract;

¹ For Statement of Objects and Reasons, see Gazette of India, 1932, Pt. V, p. 133; for Report of Select Committee, see *ibid.*, p. 179; see also pp. 164-166, ante.

² Subs. by the A. O. 1950 for the former sub-section (2).

³ This Act has been declared to be in force in the Khondmals District by the Khondmals Law Regulation, 1936 (4 of 1936), s. 3 and Sch. and in the Angul District by the Angul Laws Regulation, 1936 (5 of 1936), s. 3 and Sch.

⁴ Subs. by Act 3 of 1951, s. 3 and Sch. for “except Part B States”.

⁵ 1st October, 1933, see Gazette of India, 1933, Pt. I, p. 903.

⁶ Subs. by the A. O. 1937 for “G. G. in C.”.

⁷ Subs., *ibid.*, for “Gazette of India”.

⁸ Subs. by the A. O. 1950 for “province”.

⁹ Subs. by the A. O. 1948 for “Cachar and Sylhet”.

- (b) "tea estate" means an estate, situated in the tea districts, any part of which is used or is intended to be used for the cultivation or manufacture of tea or for any purpose connected therewith;
- ¹⁰[(c) "recruiting State" means any State other than Assam;]
- (d) "adult" means a person who has completed his sixteenth year, and "child" means a person who is not an adult;
- (e) a "labourer" means an adult working on wages not exceeding fifty rupees a month, but does not include a clerk or domestic servant, or a mechanic, carpenter, mason, bricklayer or other artisan;
- (f) an "assisted emigrant" means an adult who, after the commencement of this Act, has left his home in any recruiting ¹¹[State] ¹²* * * is proceeding through ¹³[any part of the territories to which this Act extends] to any place in Assam to work as a labourer on tea estate, and has received assistance from any person, but does not include any person who at any time within the two preceding years has worked as a labourer on a tea estate;
- (g) "assistance" means the gift or offer of any money, goods or ticket entitling to conveyance to any person as an inducement to such person to proceed to Assam to work as a labourer on a tea estate, and "assisted" and "with assistance" when used with reference to any person mean that such person has received assistance;
- (h) an "emigrant labourer" means a person who has last entered Assam as an assisted emigrant and is employed on a tea estate and includes any person who, having accompanied an assisted emigrant to Assam as a child dependent on him, has become an adult and is so employed, but does not include any person who, at any time after his last entry into Assam and after he has become an adult, has taken employment not on a tea estate;
- (i) the "family" of any person includes the following, if living with him, namely,—
- (i) in the case of a male,—his wife and any child and aged or incapacitated relative dependent on him,
 - (ii) in the case of a married woman,—her husband and any child and aged or incapacitated relative dependent on her or on her husband, and
 - (iii) in the case of any other woman,—any child and aged or incapacitated relative dependent on her,
- and in the case of an emigrant labourer, includes any person who, having accompanied him to Assam as a child dependent on him, has become an adult and is living with him;
- (j) "employing interest" means any employer of labourers, or any group or association of such employers; and
- (k) "prescribed" means prescribed by rules made by the ¹⁴[Central Government].

3. Appointment and status of Controller and Deputy Controllers.—(1) The ¹⁴[Central Government] may appoint a person to be Controller of Emigrant Labour, to exercise the powers and discharge the duties conferred and imposed upon the Controller by or under this Act.

¹⁰ Subs. by Act 3 of 1951, s. 3 and Sch.

¹¹ Subs. by the A. O. 1950 for "Province".

¹² The words "or in any Part B State" were omitted by Act 3 of 1951, s. 3 and Sch.

¹³ Subs., *ibid.*, for "any part of any Part A State or Part C State".

¹⁴ Subs. by the A. O. 1937 for "G. G. in C".

(2) The ¹⁴[Central Government] may also appoint one or more Deputy Controllers of Emigrant Labour, who shall exercise such of the powers and discharge such of the duties of the Controller as the ¹⁴[Central Government] may determine.

(3) The Controller may, from time to time and subject to the control of the ¹⁴[Central Government], make a distribution of work as between himself and the Deputy Controllers.

(4) The Controller and Deputy Controllers shall be deemed to be public servants within the meaning of the Indian Penal Code (XLV of 1860).

4. Powers of the Controller.—The Controller shall have power—

(a) to enter—

(i) all open places on a tea estate,

(ii) any enclosed place on a tea estate where he knows or has reason to believe emigrant labourers are working or are accommodated,

(iii) any office of a tea estate,

(iv) any office or depot maintained by a labour recruiting agency, in Assam or in a recruiting ¹⁵[State],

(v) any train, vessel or vehicle which he knows or has reason to believe is being used for the conveyance of assisted emigrants;

(b) to inspect, in any office or depot mentioned in sub-clauses (iii) and (iv) of clause (a), any register or other document required to be kept under this Act;

(c) to carry out in any place mentioned in clause (a) any inquiry which he may deem to be expedient for carrying out the purposes of this Act; and

(d) to do any other reasonable act which may be expedient in the discharge of his duties.

5. Emigrant Labour Cess.—(1) In order to meet expenditure incurred in connection with the Controller, the Deputy Controllers and their staff or under this Act, an annual cess shall be levied, to be called the Emigrant Labour Cess.

(2) It shall be paid in respect of the entry into Assam of each assisted emigrant and shall be payable by the employing interest on whose behalf he was recruited.

(3) It shall be levied at such rate¹⁶, not exceeding nine rupees, for each such emigrant as the ¹⁴[Central Government] may, by notification in the ¹⁷[Official Gazette], determine for the year of levy.

(4) The proceeds of the cess shall be credited to a fund, to be called the Emigrant Labour Fund, to be administered by the ¹⁴[Central Government].

6. Power to make rules for the collection of the Emigrant Labour Cess.—

(1) The ¹⁴[Central Government] may, by notification in the ¹⁷[Official Gazette], make rules¹⁸—

(a) prescribing the agency which shall collect the Emigrant Labour Cess;

(b) prescribing the returns to be submitted to such agency by employers of emigrant labourers, and by persons who recruit or forward emigrant labourers, and the form and date of such returns;

(c) regulating the procedure of the collecting agency;

(d) prescribing the mode of payment of the cess;

(e) determining the date when any sum payable as cess shall be an arrear;

¹⁴ Subs. by the A. O. 1937 for "G. G. in C."

¹⁵ Subs. by the A. O. 1950 for "Province".

¹⁶ Rs. 5/- from 1-10-55 to 30-9-56, vide Ministry of Labour Notification No. S.R.O. 2047 dated 9-9-55.

¹⁷ Subs., *ibid.*, for "Gazette of India".

¹⁸ See Tea Districts Emigrant Labour Rules, 1933.

- (f) declaring that an arrear of cess may be recovered as an arrear of land-revenue and prescribing the procedure to be followed to secure such recovery; and
- (g) generally, to secure the equitable collection of the cess.

CHAPTER II.—REPATRIATION.

7. General right of repatriation after three years in Assam.—Every emigrant labourer, on the expiry of three years from the date of his entry into Assam, shall have the right of repatriation as against the employer employing him at such expiry.

8. Right to repatriation on dismissal.—(1) Any emigrant labourer who, before the expiry of three years from his entry into Assam, is dismissed by his employer, otherwise than for wilful and serious misconduct, shall have the right of repatriation against such employer.

(2) Where any emigrant labourer is dismissed by his employer before the expiry of three years from his entry into Assam, and his employer refuses or fails to repatriate him, the labourer may apply to the Controller, and the Controller, after such inquiry as he may think fit and after giving the employer an opportunity to be heard, may declare that the labourer has the right of repatriation against such employer.

9. Rights of repatriation of family of deceased emigrant labourer.—(1) Where an emigrant labourer other than a married woman living with her husband and having no child living with her dies within three years of his entry into Assam, the family of such labourer shall be entitled to be repatriated by the employer last employing him.

(2) Where such deceased labourer leaves a widow, she shall be deemed to be an emigrant labourer in whom a right of repatriation has arisen.

(3) Where there is no such widow, the Controller shall have all powers necessary to enforce the rights of the family under this section, and may take such action as he may deem to be expedient in their interests.

10. Right to apply for repatriation in certain circumstances.—(1) An emigrant labourer may, before the expiry of three years from his entry into Assam, apply to the Controller for a declaration of his right to repatriation on any of the following grounds, namely:—

- (a) that his state of health makes it imperative that he should leave Assam, or
- (b) that his employer has failed to provide him with work suited to his capacity, at the normal rate of wages for that class of work; or
- (c) that his employer has unjustly withheld any portion of any wages due to him, or
- (d) any other sufficient cause.

(2) An emigrant labourer may, before the expiry of one year from his entry into Assam, apply to the Controller for a declaration of his right to repatriation on any of the following grounds, namely:—

- (a) that he was recruited by coercion, undue influence, fraud or misrepresentation, or
- (b) that he was recruited otherwise than in accordance with the provisions of this Act and the rules made thereunder.

(3) The Controller, after such inquiry as he may think fit and after giving the employer an opportunity to be heard, may declare that an emigrant labourer applying under this section has a right of repatriation against his employer:

Provided that a declaration in pursuance of clause (d) of sub-section (1) may be made by the Controller only and not by any other officer exercising the powers of the Controller by or under this Act.

11. Power of Criminal Courts to order repatriation.—Where any employer of an emigrant labourer, or any agent of such employer in authority over such labourer, is convicted of any offence committed against such labourer and punishable under Chapter XVI of the Indian Penal Code (XLV of 1860) with imprisonment for one year or upwards, the convicting Court or the Appellate Court or the High Court when exercising its powers of revision may declare that such labourer has a right of repatriation against such employer.

12. Incidents of the right of repatriation.—(1) When an emigrant labourer has a right of repatriation against any employer, the employer or his agent shall defray the cost of the return journey of the emigrant labourer and his family from the station nearest the employer's tea estate to the home of the labourer and shall provide subsistence allowances on the prescribed scale for such labourer and his family for the time requisite for him and his family to travel from such estate to his home:

Provided that where the emigrant labourer is a married woman living with her husband who is also an emigrant labourer, her right of repatriation arising under section 7 shall extend only to herself and any children dependent on her:

Provided further that a married woman living with her husband is entitled to be treated as a member of his family notwithstanding that she is herself an emigrant labourer.

(2) In the event of any dispute regarding the cost of the return journey or subsistence allowances, the question shall be referred for decision to the Controller.

13. The discharge of an employer's duty to repatriate.—(1) Within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, or within such shorter period as the authority declaring such right may determine, the employer concerned shall, subject to any agreement under section 14, make all necessary arrangements for the homeward journey of the labourer and his family, and shall despatch them on their journey:

Provided that an employer shall not be required to make such arrangements for or any payment in respect of any adult person who does not wish to leave Assam.

(2) Where an employer fails to comply with the provisions of sub-section (1), the right of repatriation of the emigrant labourer concerned shall not be affected, but the employer shall be liable to pay to the labourer one rupee for each day on which he is in default:

Provided that on application made to him by either party the Controller may direct that the labourer shall be paid at a lower rate than one rupee a day or at a higher rate not exceeding two rupees a day, and may also determine the number of days, being a reasonable number regard being had to all the circumstances of the case, for which the payment shall be made.

14. Postponement, waiver and forfeiture of the right.—(1) An emigrant labourer may, by agreement with his employer, postpone his exercise of the right of repatriation, or may waive it conditionally or unconditionally, but no such agreement shall be valid unless it is in writing and in the prescribed form and has been made not more than one month before the right of repatriation arises:

Provided that the ¹⁹[Central Government] may, by notification in the ²⁰[Official Gazette], make rules requiring that in any area such agreement shall be made in the prescribed manner before a prescribed authority and that the prescribed authority, if satisfied that the labourer understands the terms of his agreement, and his rights in regard to repatriation, shall ratify the agreement:

¹⁹ Subs. by the A. O. 1937 for "G. G. in C.".

²⁰ Subs., *ibid.*, for "Gazette of India".

Provided further that after such rules come into force no such agreement shall be valid unless it is so made and ratified.

(2) Where an emigrant labourer having a right to repatriation fails without reasonable cause to proceed on his homeward journey at the time arranged by his employer, the employer may notify the Controller of such failure, and the Controller, after such inquiry as he may think fit and after giving the labourer an opportunity to be heard, may declare that the labourer has forfeited his right of repatriation, and such labourer shall not be entitled to repatriation again as against any employer, save by an order of the Court under section 11.

15. Power of the Controller to enforce the provision of this Chapter.—

(1) Where the Controller, on information obtained from any source and after such inquiry as he may think fit and after giving the employer concerned an opportunity to be heard, is of opinion that an emigrant labourer is entitled to repatriation under any of the provisions of this Chapter, or is entitled to the payment of any sum of money under the provisions of sub-section (2) of section 13, the Controller may direct the employer concerned to despatch such labourer and his family or to pay him the sum of money within such period as the Controller may fix.

(2) If the employer fails to comply with such direction, the Controller may repatriate the labourer and his family or pay him the sum of money out of any funds at the Controller's disposal, and shall recover the costs incurred from the employer.

(3) For the purposes of such recovery the Controller may certify the costs to be recovered to the Collector, who shall recover the amount and may recover it as an arrear of land-revenue.

(4) The Controller shall have similar powers in regard to any person in Assam who he knows or has reason to believe is a member of the family of a repatriated emigrant labourer who should have been repatriated along with such labourer.

CHAPTER III.—CONTROLLED EMIGRATION AREAS.

16. Power to declare controlled emigration areas.—²¹[(1) The Central Government may, by notification in the Official Gazette, declare any area within a recruiting ²²[State] to be a controlled emigration area and thereupon the provisions of this Chapter shall apply to that area:

Provided that the Central Government may by the same or any subsequent notification declare that any of the provisions of this Chapter shall not apply in that area, or shall apply subject to such general or special relaxations as may be specified.]

(2) A notification under sub-section (1) shall be expressed to take effect from a date not earlier than two months from the date of its publication, and during the said two months licences may be granted under section 17 and such licences shall be dated as being granted on the date on which the notification takes effect and shall not be valid until that date.

17. Power to grant licences to local forwarding agents.—(1) The ²³[Central Government], or any District Magistrate empowered by it in this behalf, may grant a licence to any person to act as local forwarding agent in any part of a controlled emigration area, on behalf of an employer or employers of labourers.

(2) Such licences shall be granted only on the application of an employing interest.

(3) No such application shall be entertained unless the Controller has certified that the employing interest making the application has made proper provision, in

²¹ Subs. by the A. O. 1937 for sub-section (1).

²² Subs. by the A. O. 1950 for "Province".

²³ Subs. by the A. O. 1937 for "L. G.".

accordance with section 20 and rules made under section 21, for the forwarding, accommodation and feeding of assisted emigrants on their journey to the tea estates on which they are to be employed.

(4) A local forwarding agent may be granted separate licences on applications by separate employing interests.

18. Recruits in controlled emigration areas to be sent to forwarding agents' depots.—(1) Whoever arranges with any person in a controlled emigration area that such person shall proceed to Assam with assistance, shall take or send such person, along with the members of his family who are to accompany him to Assam, to the depot of a local forwarding agent licensed for the area in which the arrangement was made, unless the arrangement was made at such a depot.

(2) Whoever arranges with any person in ²⁴[a Part B State] that such person shall proceed to Assam with assistance and brings or sends such person and any of the members of his family into any controlled emigration area, shall take or send such person and members to the depot of a local forwarding agent licensed for that area.

(3) At every such depot proper arrangements shall be made for the accommodation and feeding of assisted emigrants and their families.

19. Assisted emigrants to be forwarded to Assam by local forwarding agents by prescribed routes.—An assisted emigrant and his family shall be forwarded to Assam from the depot of a local forwarding agent by such agent and only by such routes and in such manner as may be prescribed by rules made under section 37, and shall be accompanied on their journey by a competent person deputed by the local forwarding agent.

20. Maintenance of depots along prescribed routes.—Every employing interest which recruits labour in a controlled emigration area shall maintain or have the right to use depots at reasonable intervals on the prescribed routes by which it forwards assisted emigrants to Assam, for the accommodation and feeding of assisted emigrants and their families.

21. Power of Central Government to make rules.—(1) The ²⁵[Central Government] may, by notification in the ²⁶[Official Gazette], make rules—

- (a) prescribing the form and particulars of licences to be granted to local forwarding agents, and the annual fees, not exceeding ten rupees, which may be levied from persons holding such licences;
- (b) prescribing returns relating to assisted emigrants and their families which shall be made by local forwarding agents and the registers and the form thereof which shall be maintained by such agents;
- (c) prescribing the scales of diet which shall be provided for assisted emigrants and their families at depots;
- (d) prescribing the accommodation which shall be provided for assisted emigrants and their families at depots, and the sanitary and medical arrangements at such depots;
- (e) providing for the detention, for a period not exceeding three days, at depots of local forwarding agents of women unaccompanied by their husbands who propose to proceed to Assam as assisted emigrants, and for investigation into their circumstances;
- (f) prescribing the information which shall be supplied by local forwarding agents to assisted emigrants regarding the conditions of life and work on tea estates, and the methods in which it shall be supplied;

²⁴ Subs. by the A. O. 1950 for "an Indian State".

²⁵ Subs. by the A. O. 1937 for "L. G.".

²⁶ Subs., *ibid.*, for "Local Official Gazette".

(g) providing for any other matter which in the opinion of the ³¹[Central Government] may be required to give effect to the provisions of this Chapter.

(2) In making rules under clause (b), clause (e), clause (f) or clause (g) of sub-section (1), the ³¹[Central Government] may provide that a contravention thereof shall be punishable with fine which may extend to one hundred rupees.

22. Inspection of depots, vessels and vehicles.—(1) The Civil Surgeon, the District Magistrate or the Sub-Divisional Magistrate, or any Magistrate or police officer not below the rank of Inspector, deputed by the District Magistrate, or the Sub-Divisional Magistrate, may enter a local forwarding agent's depot, or any depot maintained by an employing interest on a prescribed route to Assam, and inspect the accommodation, feeding arrangements, and sanitary arrangements provided for assisted emigrants and their families and all registers and other documents required to be maintained or kept by or under this Act and shall record the results of such inspection in a book to be kept in such depot for the purpose.

(2) The Civil Surgeon or such Magistrate or person deputed may also enter and inspect any vessel, train or vehicle on which assisted emigrants are travelling, or on which he has reason to believe that any assisted emigrant is travelling whether along a prescribed route or not.

23. Action where proper arrangements not made for assisted emigrants.—If the ²⁷[Central Government] is satisfied that an employing interest recruiting assisted emigrants in a controlled area is not making proper provision for the forwarding, accommodation or feeding of such emigrants and their families on their journey to Assam, ²⁸[the Central Government may] direct all District Magistrates concerned to cancel or suspend all licences under section 17 held by local forwarding agents on behalf of such employing interest:

Provided that the ²⁷[Central Government] shall not ²⁹[direct the cancellation of any] licences under this section until ³⁰[it] has given the employing interest concerned an opportunity to submit its explanation.

24. Cancellation of licences.—(1) ³¹[Central Government] may cancel wholly or in part any licence granted to a local forwarding agent, and a District Magistrate may cancel wholly or in part any licence granted by him to a local forwarding agent,—

- (a) if, in the opinion of the ³¹[Central Government] or of the District Magistrate, as the case may be, such agent has been guilty of misconduct or wilful default or negligence in the discharge of the duties imposed upon him by or under this Act, or
- (b) if the employing interest, on whose application the licence was granted, has applied to the ³¹[Central Government] or to the District Magistrate, as the case may be, for the cancellation of the licence, or
- (c) if, in the opinion of the ³¹[Central Government] or of the District Magistrate, as the case may be, an employer on whose behalf the agent is licensed to act has been guilty of misconduct, or wilful default or negligence in the discharge of the duties imposed upon him by or under this Act:

Provided that no licence shall be cancelled under clause (a) until the holder thereof has or under clause (c) until the holder thereof and the employer concerned have had an opportunity to show cause against the cancellation:

²⁷ Subs. by the A. O. 1937 for "G. G. in C.".

²⁸ Subs., *ibid.*, for "he may require the Local Government to".

²⁹ Subs., *ibid.*, for "make any requisition for the cancellation of".

³⁰ Subs., *ibid.*, for "he".

³¹ Subs., *ibid.*, for "L. G.".

Provided further that a cancellation under clause (c) shall, where the agent is licensed to act on behalf of more than one employer, operate only to prevent the agent from acting on behalf of the employer held guilty.

(2) A local forwarding agent whose licence has been cancelled by a District Magistrate under clause (a) of sub-section (1), or any employing interest on whose behalf he acts, may, within three months from the date of the District Magistrate's order, appeal to the ³²[Central Government], whose decision shall be final.

25. Penalty for illicit abetment of emigration.—Where any person who is required to be taken or sent to a local forwarding agent's depot in any district under section 18 leaves that district on his journey to Assam without being so taken or sent, or, being an assisted emigrant, proceeds to Assam otherwise than in accordance with section 19, or by any route other than a route prescribed under section 37, any person who abets him in so leaving the district or in so proceeding to Assam, shall be punishable with imprisonment which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

CHAPTER IV—RESTRICTED RECRUITING AREAS.

26. Power to declare restricted recruiting areas.—³³[(1) The Central Government may, by notification in the Official Gazette, declare any controlled emigration area or any part of a controlled emigration area within a recruiting ³⁴[State] to be a restricted recruiting area and thereupon the provisions of this Chapter shall apply to that area:

Provided that the Central Government may, by the same or any subsequent notification, declare that any of the provisions of this Chapter shall not apply in relation to that area, or shall apply subject to such general or special relaxations as may be specified.]

(2) A notification under sub-section (1) shall be expressed to take effect from a date not earlier than two months from the date of its publication, and during the said two months licences may be granted under section 27 or certificates may be granted and endorsements made under section 28, and such licences, certificates and endorsements shall be dated as being granted or made on the date on which the notification takes effect and shall not be valid until that date.

27. Grant of licences to recruiters.—(1) Subject to rules made under sub-section (2) and sub-section (3), the District Magistrate may grant a licence to any person to act as recruiter in the whole or any part of his district.

(2) The ³⁵[Central Government] may, by notification in the ³⁶[Official Gazette], make rules prescribing the qualifications for persons who may be granted licences under this section.

(3) ³⁷[The Central Government] may, by notification in the ³⁸[Official Gazette], make rules ³⁹[as respects any restricted recruiting area]—

(a) regulating the procedure of the District Magistrate in granting such licences,

(b) prescribing the form and particulars of such licences, and fees, not exceeding ten rupees, to be paid therefor.

³² Subs. by the A. O. 1937 for "L. G.".

³³ Subs., *ibid.*, for the original sub-section (1).

³⁴ Subs., by the A. O. 1950 for "province".

³⁵ Subs. by the A. O. 1937 for "G. G. in C.".

³⁶ Subs., *ibid.*, for "Gazette of India".

³⁷ Subs., *ibid.*, for "The L. G. having jurisdiction over any restricted recruiting area".

28. Grant of certificates to garden-sardars.—(1) Subject to rules made under sub-section (2), the owner or manager of a tea estate may grant a certificate to any person employed on such estate as a labourer or in a position of supervision or management empowering him to recruit labour for such estate in the whole or any part of a restricted recruiting area, and such person shall thereupon be entitled to recruit labour for such estate as a garden-sardar in the area specified:

Provided that ³⁷[the Central Government] may, by notification in the ³⁸[Official Gazette], make rules ³⁹[as respects any restricted recruiting area] directing that certificates of garden-sardars or of specified classes of garden-sardars shall not be valid in any district in any such area until they have been endorsed as valid for that district by the District Magistrate or a Magistrate authorised by the District Magistrate in this behalf.

(2) The ⁴⁰[Central Government] may make rules ³⁹[for Assam]—

(a) regulating the procedure of owners and managers in granting and withdrawing such certificates,

(b) prescribing the form and particulars of such certificates.

29. Cancellation and suspension of recruiter's licence.—The District Magistrate may, for reasons to be recorded by him, cancel or suspend the licence of a recruiter on the ground of his misconduct or wilful neglect or default in the discharge of the duties imposed on him by or under this Act:

Provided that no licence shall be cancelled under this section until the holder thereof has had an opportunity of showing cause against the cancellation.

30. Cancellation of garden-sardar's certificate.—(1) The District Magistrate of any district in respect of any part of which a garden-sardar holds a certificate may cancel the certificate if he is satisfied that the garden-sardar has contravened any of the provisions of this Act or of the rules made thereunder.

(2) A District Magistrate cancelling a certificate under sub-section (1) shall record his reasons, and shall send intimation of his action to the District Magistrate of every other district in respect of any part of which the certificate was valid and to the person who granted the certificate.

31. Penalty for illicit recruitment.—Whoever, not being a licensed recruiter holding a licence under section 27, or a garden-sardar holding a valid certificate under section 28, or a local forwarding agent holding a licence under section 17, in any part of a restricted recruiting area gives or offers any money or goods to any person, or defrays or offers to defray and travelling expenses of any person, as an inducement to such person to proceed to Assam as an assisted emigrant, shall be punishable with imprisonment which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

CHAPTER V—SUPPLEMENTAL.

32. Prohibition of the recruitment of children.—(1) No person shall in any way assist a child to proceed from any recruiting ⁴¹[State] to Assam, to work in any capacity on a tea estate, unless such child is accompanied by a parent or other adult relative on whom he is dependent, and no person shall so assist a married woman who is living with her husband unless she is so proceeding with the consent of her husband.

(2) Any person who knowingly contravenes the provisions of this section shall be punishable with imprisonment which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

³⁸ Subs., *ibid.*, for "local official Gazette".

³⁹ Ins., *ibid.*

⁴⁰ Subs., *ibid.*, for "L. G. of Assam".

⁴¹ Subs. by the A. O. 1950 for "province".

33. Power to detain and return sick persons.—(1) Where it appears to the Controller that any person proceeding to a tea garden with assistance, or any member of the family of such person, is suffering from an infectious or contagious disease, or is not in a fit state of health to proceed on his journey, the Controller may—

- (a) detain such person and his family,
- (b) send the sufferer for medical treatment to a hospital or dispensary or other suitable place, and
- (c) cause all necessary arrangements to be made for the accommodation and feeding of the other members of the party so detained,

and all arrangements for such detention and treatment shall be made by and at the cost of the employing interest on whose behalf such person was recruited.

(2) Where it appears that a sufferer detained under sub-section (1) is not likely to be in a fit state of health to proceed on his journey within a reasonable time, the Controller may direct that he and the other members of his party detained with him shall be returned to the home of the person proceeding with assistance by and at the cost of the employing interest on whose behalf such person was recruited.

34. Power to return person improperly recruited.—Where it appears to the Controller after such inquiry as he thinks fit to make that any person proceeding to a tea estate with assistance—

- (a) has been recruited by coercion, undue influence, fraud or misrepresentations, or
- (b) has been recruited or forwarded otherwise than in accordance with the provisions of this Act and the rules made thereunder,

the Controller may direct that such person and his family shall if such person so desires be returned to his home by and at the cost of the employing interest on whose behalf he was recruited.

35. Power to enforce the provisions of sections 33 and 34.—(1) If an employing interest fails to make arrangements to the satisfaction of the Controller for the detention or treatment of any person detained under sub-section (1) of section 33, the Controller may himself make such arrangements and defray the cost out of any funds at his disposal.

(2) In making a direction under sub-section (2) of section 33 or under section 34 the Controller may fix a period within which such person and family shall be forwarded by the employing interest concerned, and shall send a copy of his direction to the employing interest concerned, and to the nearest agent, if any, of such employing interest in the ⁴²[State] where such person then is.

(3) If the employing interest fails to comply with the direction within the time fixed, the Controller may cause such person and his family to be returned to his home and defray the costs out of any funds at the Controller's disposal.

(4) The Controller shall recover any costs incurred by him under this section from the employing interest concerned, and for the purposes of such recovery may certify the costs to be recovered to the Collector of any district in which a tea estate belonging to the employing interest concerned, or to any member thereof, is situated, and the Collector shall recover the amount and may recover it as an arrear of land-revenue.

(5) Any costs so certified may, where the employing interest concerned is a group or association of employers, be recovered from any one of such employers.

⁴² Subs. by the A. O. 1950 for "province".

36. Magistrates and medical officers who may exercise the powers of the Controller.—(1) Subject to the provisions of sub-section (3) of section 10, any District Magistrate in Assam may exercise in respect of his district any power which the Controller by or under this Act could exercise in such district.

(2) The Controller may transfer any proceeding under Chapter II pending before him to the District Magistrate having jurisdiction under sub-section (1) to dispose of it.

(3) ⁴³[The Central Government may invest a District Magistrate or a Sub-Divisional Magistrate in any recruiting ⁴⁴[State] and a Sub-Divisional Magistrate in Assam] with any of the powers of the Controller under section 4 or section 33 or section 34 or section 35 in respect of his district or sub-division, as the case may be.

(4) The ⁴⁵[Central Government] may invest any medical officer not below the rank of Assistant Surgeon with any of the powers of the Controller under section 33 and section 35.

37. Power of Central Government to make rules.—(1) The ⁴⁶[Central Government] may, by notification in the ⁴⁷[Official Gazette], make rules—

- (a) regulating the procedure of the Controller and of persons exercising the powers of the Controller in the exercise of their powers under this Act;
- (b) where there are more authorities than one exercising any of the powers of the Controller in the same area, regulating the exercise of their powers by such authorities;
- (c) prescribing scales of subsistence allowances for the purposes of section 12;
- (d) prescribing the form of agreements under section 14;
- (e) prescribing the routes by which assisted emigrants may be forwarded from districts in controlled emigration areas to tea districts;
- (f) prescribing the manner in which assisted emigrants and their families shall be forwarded to Assam from the depots of local forwarding agents;
- (g) prescribing the action to be taken by local forwarding agents and by persons in charge of depots on prescribed routes where an assisted emigrant or a member of his family appears to be suffering from infectious or contagious disease or where an assisted emigrant appears to have been recruited by coercion, undue influence, fraud or misrepresentation, or to have been recruited or forwarded otherwise than in accordance with the provisions of this Act and the rules made thereunder;
- (h) directing that employers of emigrant labourers shall keep registers of such labourers and their families, and prescribing the form of such registers;
- (i) directing that employing interests which recruit emigrant labourers shall keep registers of such labourers, and their families, and of their journeys to and from Assam, and prescribing the form of such registers;
- (j) requiring employers of emigrant labourers and employing interests which recruit emigrant labourers to submit such return in respect of such

⁴³ Subs. by the A. O. 1937 for "The L. G. of a recruiting province may invest a District Magistrate or a Sub-Divisional Magistrate and the L. G. of Assam may invest a Sub-Divisional Magistrate".

⁴⁴ Subs. by the A. O. 1950 for "province".

⁴⁵ Subs. by the A. O. 1937 for "L. G.".

⁴⁷ Subs. *ibid.*, for "Gazette of India".

labourers as the ⁴⁸[Central Government] may think expedient for carrying out the purposes of this Act; and

(k) generally, to carry out the purposes of this Act.

(2) The ⁴⁹[Central Government] may, by notification in the ⁵⁰[Official Gazette], make rules ⁵¹[for Assam] requiring employers of labourers on tea estates to submit returns of wages and earnings of labourers employed by them.

(3) ⁵²[Rules made under this section], may provide that a contravention thereof shall be punishable with fine which may extend to five hundred rupees.

38. Powers to extend the scope of this Act.—(1) ⁴⁸[Central Government] may, by notification in the ⁵³[Official Gazette], declare that the provisions of this Act shall apply in respect of any lands and premises in Assam other than tea estates, and thereupon the provisions of this Act shall apply in all respects to such lands and premises as if they were tea estates.

(2) ⁵⁴[The Central Government] may, by notification in the ⁵⁰[Official Gazette], declare that the provisions of this Act shall apply in any area in Assam other than the districts specified in clause (a) of section 2, and thereupon the provisions of this Act shall apply in all respects to such area as if it were a tea district.

39. Saving for acts done in good faith under the Act.—No suit, prosecution or other legal proceeding shall lie against any person for anything which is in good faith done or intended to be done under this Act.

40. Bar of jurisdiction of Civil Courts.—No Civil Court shall have jurisdiction—

(a) to deal with or decide any question which the Controller is, by or under this Act, empowered to deal with or to decide, or

(b) to enforce any liability incurred under this Act.

41. [*Repeal of Act VI of 1901 and certain consequences*] *Rep. by the Repealing and Amending Act, 1937 (XX of 1937), s. 3 and Sch. II.*

THE SCHEDULE—*Rep. by the Repealing and Amending Act, 1937 (XX of 1937), s. 3 and Sch. II.*

TEA DISTRICTS EMIGRANT LABOUR RULES, 1933

Arrangement of Paragraphs

CHAPTER I—SHORT TITLE AND DEFINITIONS.

1. Short title.
2. Definitions.

CHAPTER II—APPLICATIONS UNDER SECTION 17.

3. Form of certificate under section 17 (3).
4. Application for certificate under section 17 (3).
5. Forwarding of copies of certificates by Controller.
6. Applications for local forwarding agents' licenses.

51. Return of applications decided.

CHAPTER VIII—OFFENCES AND IRREGULARITIES.

52. Action by Controller on offences punishable with imprisonment.
53. Action by Controller on offences punishable with fine.
54. Saving.
55. Action by depot officers in case of improper recruitment.
- 55A. Duties of persons engaged in recruiting labourers.
56. Issue of orders under section 34.
57. Punishments for contraventions of Rules.

CHAPTER IX—MISCELLANEOUS.

58. Subsistence allowance.
59. Agreements under Section 14.
60. Right of repatriation arising in family of deceased labourer.
61. Medical arrangement or the general sanitary conditions of a depot.
62. Maintenance of rations accounts.
63. Report on emigrant labourer quitting employment, etc.

Schedule.

Forms.

TEA DISTRICTS EMIGRANT LABOUR RULES, 1933¹

CHAPTER I—SHORT TITLE AND DEFINITIONS.

1. Short title.—²[(1) These rules may be called the Tea Districts Emigrant Labour Rules, 1933.]

³[(2) They extend to all Part A States and the Part C States of Ajmer, Coorg, Delhi and Vindya Pradesh.]

2. Definitions.—In these rules unless there is anything repugnant in the subject or context,—

- (a) “the Act” means the Tea District Emigrant Labour Act, 1932 (XXII of 1932);
- (b) “Cess” means the Emigrant Labour Cess levied under section 5 of the Act;
- (c) “the Controller” means the Controller of Emigrant Labour appointed under the Act;
- (d) “employer” includes the principal officer of a company or association of individuals owning a tea estate;
- (e) “escort” means the competent person deputed by the local forwarding agent under section 19 of the Act to accompany assisted emigrants and their families on journey to Assam;
- (f) “Form” means a form appended to these Rules;
- (g) “manager” means the principal person for the time being in charge of any tea estate;
- (h) “medical officer” means the nearest medical officer exercising within the area in question any of the powers of the Controller, or where no medical officer exercises any of these powers, the Civil Surgeon;
- (i) “person in charge” means the local forwarding agent in respect of the depot in his charge and includes the person in charge of a depot maintained under section 20 of the Act;
- (j) “section” means a section of the Act.

CHAPTER II—APPLICATIONS UNDER SECTION 17.

3. Form of certificate under section 17 (3).—Certificates granted by the Controller under section 17 (3) shall be in Form A.

4. Application for certificate under section 17 (3).—(1) Every application for a certificate in Form A shall be submitted to the Controller.

(2) Every such application shall specify the controlled emigration areas or parts thereof within which the employing interest proposes that the local forwarding agents who may be licensed on its behalf shall be employed, and the areas in Assam to which it is proposed that these agents shall be at liberty to forward assisted emigrants. It shall also contain particulars of the provision made for the forwarding, accommodation and feeding on their journey to Assam of assisted emigrants recruited by or on behalf of the employing interest presenting the application.

5. Forwarding of copies of certificates by Controller.—The Controller shall forward a copy of every certificate in Form A granted by him to the State Government of every

¹ These Rules were published with the Government of India, Department of Industries and Labour, Notification No. L3021 (2), dated the 31st July, 1933.

² Rule 1 was re-numbered as sub-rule (1) by the Ministry of Labour Notification No. S. R. O. 245 dated the 14th February, 1951.

³ This sub-rule was inserted, *ibid*.

recruiting State and the District Magistrate of every district forming the whole or part of every controlled emigration area specified in the certificate.

6. Applications for local forwarding agents' licences.—(1) All applications for licences under section 17 (1) shall, unless the State Government concerned otherwise directs, be submitted through the Controller.

(2) All applications so submitted shall specify the area within which the persons for whom the licences are desired or intended to act as local forwarding agent and the number of the certificate in Form A held by the applicant.

(3) The Controller, if he is satisfied that the applicant holds a valid certificate in Form A, shall forward the application to State Government or District Magistrate empowered to grant the licences, as the case may be, and may add any observations relating to matters lying within his knowledge which bear on the fitness or unfitness of any person named in the application to receive a license.

7. Employing interest ceasing to make proper provision.—(1) If the Controller considers that any employing interest in whose favour he has granted a certificate in Form A has ceased to make proper provision for the forwarding, accommodation or feeding on their journey to Assam of assisted emigrants recruited by that employing interest, he shall forward a report to the Central Government stating the manner in which and the extent to which such proper provision has not been made.

(2) The Controller shall also send a copy of the report to the State Government of every State.

8. Non-renewal of licences.—(1) Any State Government receiving a copy of a report submitted by the Controller under rule 7, may, pending the issue of final orders by the Central Government under section 23 or the receipt of a free certificate from the Controller in Form A decline to renew any license which has expired.

(2) No licence which is under suspension by virtue of an order of the Central Government under section 23 shall be renewed while so suspended.

CHAPTER III—COLLECTION OF CESS AND CERTIFICATES OF EMIGRATION.

9. Method of collection of cess.—The cess shall be collected by the Controller by means of the sale of certificates of emigration.

10. Form and issue of certificates.—(1) Certificates of emigration shall be on a stamped paper in Form B obtained from the Controller and no certificate shall be valid unless the particulars in Part I of the certificate have been filled in before issue.

(2) Certificates of emigration shall be issued by the Controller either on payment for each certificate of the sum determined under sub-section (3) of section 5 as the rate for the time being of the cess, or on credit as provided by rule 12.

11. Employing interest to supply certificates.—(1) Every assisted emigrant shall be provided by the employing interest on whose behalf he was recruited with a certificate of emigration.

(2) Certificates of emigration may be used only by or on behalf of the employing interest to whom they are issued, and no certificate of emigration shall be valid if it relates to an assisted emigrant or emigrant labourer recruited by or on behalf of any other employing interest.

12. Issue of certificates on credit.—(1) Employing interests at whose instance local forwarding agents have received licenses valid within any controlled emigration area may apply to the Controller for the issue on credit of certificates of emigration, and, save as provided by sub-rules (2) and (3), the Controller shall comply with such request.

(2) The Controller may decline to supply on credit at any one time a larger number of certificates than is, in his opinion, likely to be required by the employing interest during the following three months.

(3) The Controller may decline to supply on credit any certificates to an employing interest which has within the preceding two years defaulted in paying for the certificates as or when required or which has, in his opinion, been responsible for any serious irregularity in the use of the certificates or in the submission of information required in connexion therewith.

(4) Employing interests receiving certificates of emigration on credit shall not be provided with such certificates on payment; and certificates issued on credit may be used in any area, whether that area is a controlled emigration area or not.

13. Account of certificates.—(1) Every employing interest receiving certificates shall send to the Controller on or before the date specified in column 2 below a statement in Form C in respect of the period specified in column 1 below:—

Period.			Date.
April, May, June	15th July.
July, August, September	15th October.
October, November, December	15th January.
January, February, March	15th April.

(2) Employing interests receiving certificates of emigration on credit shall forward with the statement payment for every certificate shown therein as utilized at the rate prescribed for the cess at the time when the certificate was issued to the emigrant.

14. Entries in Part II of certificates.—(1) Before forwarding as an assisted emigrant any person who is brought to his depot under section 18, the local forwarding agent shall have the entries made in Part II of the emigrant's certificate of emigration and shall sign it.

(2) If any person who is not required by section 18 to be taken to the depot of a local forwarding agent, is so taken, the local forwarding agent, before forwarding that person as an assisted emigrant, if the entries in Part II of the emigrant's certificate of emigration have not previously been made, shall have those entries made and shall sign the certificate.

(3) If an assisted emigrant or intending assisted emigrant who is not required by section 18 to be taken to a depot of a local forwarding agent has not been so taken, the employing interest on whose behalf he was recruited or some one authorized to act on behalf of that employing interest shall have the entries made in Part II of the emigrant's certificate and shall sign the same:—

(a) before any assistance is given by or on behalf of that employing interest to the emigrant; and

(b) before any money, goods or travelling tickets are given by or on behalf of that employing interest to any person who has assisted the emigrant.

15. List of certificates.—The person signing any certificates of emigration under rule 14 shall forward on the same day to the Controller a list of the certificates in Form D signed by him giving the particulars required by that Form:

Provided that no list of certificates need be prepared or sent when a way-bill in Form F is required to be sent, or is sent on the day on which the certificates are signed.

16. Retention and production of certificates during journey.—(1) When any assisted emigrants are accompanied by an escort on their journey to Assam, their certificates of emigration and the list of their certificates or the way-bill containing the numbers of these certificates, as the case may be, shall be supplied by the person signing the certificates to the escort.

(2) The escort to whom any certificates of emigration are supplied under sub-rule (1) of this rule, or any escort to whom the charge of accompanying the assisted emigrants may subsequently be transferred, shall retain during the journey the certificates and the list of certificates or way-bill, as the case may be and shall produce them on demand, at any time and at any place where the assisted emigrants are for the time being, before the Controller or any officer authorized by him in writing or any person authorised by or empowered under section 36 to exercise any of the powers of the Controller.

(3) An escort required by any officer under sub-rule (2) of this rule to produce a certificate of emigration shall, if so required, produce before that officer the assisted emigrant to whom it refers and the members of his family whose names are entered on the certificate.

(4) When any assisted emigrant is not accompanied by an escort on his journey to Assam, his certificate of emigration shall be given to him before he is forwarded and shall be retained by him throughout the journey and produced on demand at any time and at any place where the assisted emigrant is for the time being, before the Controller or any officer authorized by him in writing or any person authorized by or empowered under section 36 to exercise any of the powers of the Controller.

17. Entries to be made on arrival in Assam.—On the arrival of an assisted emigrant at a depot in Assam, the person in charge of the depot shall, if these entries have not previously been made at any other depot in Assam, make the entries in Part III of his certificate of emigration.

18. Entries to be made on arrival on tea estate.—(1) When an assisted emigrant arrives on a tea estate the manager shall make the entries in Part IV of his certificate of emigration and, if this has not already been done, in Part III of that certificate and if the certificate is in the possession of the emigrant on his arrival on the tea estate may demand it for the purpose of making these entries.

(2) After making the entries required by sub-rule 1 and within 48 hours of the assisted emigrant's arrival on the tea estate the manager shall give him his certificate of emigration, and it shall not thereafter be demanded or retained by the employer or the manager or any of their agents except as provided by rule 19.

19. When manager may hold certificates.—(1) The manager of any tea estate on which an emigrant labourer is subsequently employed may retain his certificate of emigration for the purpose of making an entry in Part V thereof during the first 48 hours of the emigrant labourer's residence on the tea estate.

(2) A manager who is about to repatriate an emigrant labourer may for the purpose of making an entry in Part VI thereof require his certificate of emigration to be surrendered to him at any time within the 48 hours preceding the labourer's departure from the tea estate on his journey to his home.

20. Assisted emigrants arriving on tea estate without certificates.—(1) If any assisted emigrants arrive on a tea estate from a recruiting State without certificates of emigration, the manager shall forthwith send a report of the circumstances to the Controller together with a sum equivalent to the cess on each such emigrant and shall at the same time furnish to the Controller in respect of each such emigrant the names of the person or persons responsible for forwarding the emigrant, the date of the emigrant's entry into Assam and his arrival on the tea estate and the particulars necessary for completing Part II of the emigrant's certificate.

(2) The Controller on receiving such a report and the sum may take such action as he thinks fit in respect of the breach of the rules and shall issue to the manager a certificate of emigration for each emigrant mentioned in the report.

21. Entry into Assam without certificate.—(1) The Controller may present the employing interest by or on whose behalf any emigrant labourers were recruited a demand for the payment of the cess on any such labourer who has entered Assam without a certificate, and may require the said employing interest to furnish him with the names of the person or persons responsible for forwarding the emigrant labourer, the date of the labourer's entry into Assam and his arrival on the tea estate and the particulars necessary for completing Part II of the labourer's certificate of emigration.

(2) The Controller on receiving the said payment and particulars may take such action as he thinks fit in respect of the breach of the rules and shall issue a certificate of emigration for the labourer to the manager of the tea estate to which the labourer was sent.

22. Delivery of certificate by manager.—The manager of a tea estate on receipt of a certificate of emigration under rule 20 or rule 21 shall, after making the entries in Parts III and IV, and within 24 hours of its receipt deliver it to the labourer and it shall not thereafter be demanded or retained by the employer or the manager or their agents except as provided by rule 19.

4[22A. Issue of duplicate certificate of emigration.—(1) When a certificate of emigration is lost or destroyed, an application for the issue of a duplicate thereof may be made by the emigrant labourer or his employer, to the Controller.

(2) Such application shall be accompanied by a fee of rupee one.

(3) On receipt of such application and the fee, the Controller shall, if satisfied, after making such enquiry as he thinks fit, that the certificate is lost or destroyed, issue a duplicate thereof to the applicant.]

23. Certificate to be of correct year.—Subject to the provisions of rules 24 and 25 no certificate of emigration shall be valid unless the emigrant to whom it refers enters Assam during the year entered in Part I of the certificate.

24. Use of certificate of preceding year.—If the rate of the cess for any year is the same as that for the preceding year, all certificates of emigration valid for the preceding year shall be valid also for the subsequent year.

25. Labourer entering Assam in different year from that of certificate.—(1) If an emigrant labourer who has been provided with a certificate of emigration of any year in the expectation that he would enter Assam in that year enters Assam in a different year:—

(a) the certificate of emigration shall, subject to any directions issued by the Controller, be treated as valid, and

(b) the difference between the cess payable on that emigrant's entry and the amount paid for his certificate shall be refunded by the Controller or recovered from the employing interest as the case may be.

⁴ This Rule was inserted by the Ministry of Labour Notification No. S. R. O. 3282 dated the 15th October, 1954.

(2) Where under sub-rule (1) an amount is due to be refunded to or recovered from an employing interest receiving certificates of emigration on credit the amount of the refund or recovery shall be adjusted in the first payment due under rule 13 in the year of entry of the emigrant labourers in respect of whose certificates the refund or recovery is due.

(3) Where under sub-rule (1) an amount is due to be refunded to or recovered from an employing interest not receiving certificates on credit the Controller shall remit any refund due to the employing interest, and the employing interest shall remit the amount of any recovery to the Controller with a statement in Form E.

(4) This Rule shall not apply unless the rate of the cess for the year entered in the certificate of emigration differs from the rate for the year in which the emigrant labourer entered Assam.

26. Action following alteration in rate of cess.—If the rate of the cess is altered, every employing interest receiving certificates of emigration during the year preceding that to which the altered rate is applicable shall send, on or before the 1st October of the year to which the altered rate is applicable, a statement in Form E.

27. Return and recall of certificates.—(1) The employing interest shall return to the Controller any certificates of emigration issued to it which have ceased to be valid by reason of a change in the rate of the cess.

(2) Certificates which cannot be used by reason of being defaced or torn or of the failure of the emigrant for whom they were prepared to enter Assam may be returned to the Controller.

(3) The Controller, after giving not less than one month's notice and making such arrangements for the provision of fresh certificates as may be necessary, may recall any or all of the certificates in the possession of any or all employing interests and any certificates so recalled shall be returned to the Controller within 15 days of the receipt of notice.

(4) If any certificates returned under this rule were issued on payment the Controller shall refund to the employing interest concerned the amount paid on the certificates:

Provided that the Controller may deduct a sum not exceeding two annas for each certificate returned under sub-rule (2).

(5) If any certificates returned under sub-rule (2) were issued on credit the Controller may require that a sum not exceeding two annas for each certificate shall be paid by the employing interest concerned and this sum shall be forwarded with the next following statement due under sub-rule (1) of rule 13.

28. Recovery of Cess.—(1) Any payment due under this Chapter on account of the cess shall be deemed to be an arrear if it is not paid on the date specified in these rules, or where no date is specified, before the expiry of ten days from the receipt of a demand from the Controller.

(2) An arrear of cess shall be recoverable as an arrear of land revenue.

(3) The Controller may certify any sum forming the whole or part of an arrear of cess to the Collector of any district in which the defaulting employing interest or any member of it has any property, and the Collector shall proceed to recover the sum certified and shall remit the sum recovered to the Controller.

CHAPTER IV—FORWARDING OF ASSISTED EMIGRANT.

29. Application of Chapter.—The rules in this Chapter apply only to the forwarding of assisted emigrants who are required to be taken or sent to a local forwarding agent's depot under section 18.

30. Despatch of emigrants.—The local forwarding agent shall despatch an assisted emigrant on his journey to Assam within 48 hours of his arrival at the depot unless the emigrant is detained in accordance with the rules made under clause (8) of sub-section (1) of section 21 or under the provision of section 33, section 34 or section 35, or unless the local forwarding agent considers it necessary to detain the emigrant longer owing to his sickness or in order to investigate the circumstances of his recruitment or for other sufficient reason.

⁵[**31. Permissible routes to Katihar.**—(1) The permissible routes for the forwarding of assisted emigrants from controlled emigration areas are those specified in the Schedule appended to these rules.

⁵ Rules 31 and 32 substituted by Ministry of Labour Notification No. A.L. 136/EMG (1) dated the 12th April, 1950.

(2) Except as provided by sub-rule (3) the journeys between any places specified in the Schedule appended to these rules shall be performed by rail and by the most direct route passing through India.

(3) The journeys from the depot of the local forwarding agent by whom the emigrant has been despatched to the first of the points through which an emigrant must pass in accordance with the Schedule appended to these rules shall be made by rail from the railway station nearest the depot or from such other railway station as the Controller may approve for this purpose in the case of any depot specified in his order, and by the most direct route passing through India:

Provided that if the Controller is satisfied that, in consequence of a breach in the line or other cause, a permissible route cannot conveniently be followed, he may, by order valid for such period not exceeding one month as he may direct, permit the use of any alternative route specified in his order.

32. Permissible routes from Katihar.—Assisted emigrants leaving or passing through Katihar shall be forwarded by rail by the most direct route ⁶[passing through India] to Amingaon or Tezpur:

Provided that emigrants proceeding to tea estates in the Goalpara, Kamrup or Darrang districts or in the Balipara Frontier Tract may be forwarded from Golakganj to the tea estate by the most direct route ⁶[passing through India.]

⁷[Provided further that, if the Controller is satisfied that, in consequence of a breach in the line or other cause assisted emigrant cannot be forwarded from Katihar by the most direct route passing through India, he may by order valid for such period not exceeding one month as he may direct, permit the use of any alternative route specified in his order.]

33. Way-bills.—(1) Every local forwarding agent forwarding assisted emigrants to Assam shall prepare three copies of a way-bill in Form F correctly filled in and signed by him in respect of each estate to which emigrants are being sent.

(2) One copy of the way-bill shall be given to the escort accompanying the emigrants and shall be retained by him or any subsequent escort throughout the journey to the tea estate, a second copy shall be sent to the Controller on the day on which the emigrants are despatched and the remaining copy shall be retained by the local forwarding agent in his depot for a period of not less than four years:

Provided that where a register is maintained giving an accurate reproduction of the particulars given in the schedule of the way-bill, and its serial number, it shall not be necessary to retain a copy of the way-bill in the depot.

34. Escorts' badges.—The local forwarding agent shall issue to each escort employed for the purpose of accompanying assisted emigrants from his depot a badge bearing the name of the depot and a separate serial number, and the escort shall wear this badge in a conspicuous manner while accompanying assisted emigrants.

35. Detraining of emigrants.—When assisted emigrants are forwarded by train, the escort shall, unless he has the general or special sanction of the Controller to the contrary, detrain them at least once every 24 hours for the purpose of enabling them to have a cooked meal outside their compartments. He shall also detrain them for a rest of at least 9 hours in every 48 hours of travel by rail.

36. Lepers.—No forwarding agent shall forward to Assam either as an assisted emigrant or as a member of the family of an assisted emigrant any person whom he knows or has reason to suspect to be suffering from leprosy.

CHAPTER V—PROCEDURE TO BE FOLLOWED ON THE OCCURRENCE OF DEATH OR INFECTIOUS OR CONTAGIOUS DISEASES.

37. Outbreak of infectious or contagious disease.—(1) If cholera, small-pox, plague, enteric, influenza or other serious epidemic, infectious or contagious diseases occurs in any depot in which assisted emigrants or members of their families are usually accommodated the person in charge of the depot shall take immediate steps to secure the removal of the person attacked to the nearest available hospital accommodating infectious or contagious cases or to such other place as the medical officer may have approved for the purpose and shall report the occurrence ⁸[immediately, to the medical officer, the district magistrate

⁶ These words were inserted by the Ministry of Labour Notification No. S. R. O. 3282 dated the 15th October, 1954.

⁷ This proviso was inserted, *ibid*.

⁸ These words were substituted for the words "without delay to the medical officer" by the Ministry of Labour Notification No. A. L. 136/EMG(1) dated the 12th April, 1950.

and the Controller. The person-in-charge of the depot shall also send weekly reports to the medical officer, the district magistrate, and the Controller, stating the steps taken to control the disease and the extent to which it has been brought under control.]

(2) If cholera, small-pox, plague, enteric, influenza or other serious epidemic, infectious or contagious disease occurs among assisted emigrants or their families while on a journey, the escort shall at once report the occurrence to the medical officer and arrange for the removal, as soon as possible, of the person attacked to the nearest available hospital accommodating infectious or contagious cases or to such other places as the medical officers may have approved for the purpose. He shall take the remaining emigrants to the nearest depot maintained or used by the employing interest concerned.

(3) All cases of and deaths from cholera, small-pox, plague, enteric and influenza shall be notified at once to the medical officer.

(4) The person in charge of a depot shall maintain a separate register for cases of and deaths from such diseases.

(5) The person in charge of a depot shall provide clean towels and basins in sufficient numbers at the depot and shall stock therein sufficient quantities of disinfectants such as chlorinated lime, permanganate of potash, cyllin and cyllin soap.

(6) The person in charge of a depot shall carry out all instructions given to him by the medical officer, ⁹[the District Magistrate and the Controller] in connexion with any infectious or dangerous disease which has broken out at the depot.

38. Segregation sheds.—(1) A permanent segregation shed with sufficient accommodation for at least ten patients shall be provided for each depot at such distance from the quarters used for the accommodation of emigrants as the medical officer may direct.

(2) The Controller may exempt any depot from the necessity of having a permanent segregation shed or may reduce the scale of accommodation to be supplied.

(3) On the outbreak at a depot of cholera, small-pox or other dangerous or infectious disease, the medical officer may, if he is satisfied that the existing provision is likely to prove inadequate, require the person in charge to erect or secure further temporary accommodation for the segregation and treatment of patients of contact cases.

39. Arrangements for disposal of bodies.—The person in charge of a depot shall make all necessary arrangements for the disposal, either by burning or burial, of the bodies of assisted emigrants or members of their families, or intending assisted emigrants, in his charge, who die either in his depot or in the hospital, and shall defray all expenses connected therewith.

40. Death of assisted emigrants.—¹⁰[(1)] If an assisted emigrant dies in a depot or in a hospital or during a journey by road, rail or steamer the person in charge of the depot or the escort, as the case may be, shall hand over the property of the deceased emigrant to his relatives if any are present. If no relation is present or if there is any dispute among the relatives present, the person in charge of the depot or the escort shall make a list of the property and forward it with the list to the nearest District or Sub-divisional Magistrate, who shall, after making enquiry as to the heirs dispose of the property.

¹¹[(2)] If an emigrant labourer having no family residing with him dies, the Manager of the tea estate shall, immediately after the death occurs, take into safe custody the property left behind by the deceased and send a report, by registered post, to the Controller who will inform the next-of-kin of the death and make arrangements for the disposal of the property among the heirs of the deceased.]

CHAPTER VI—REGISTERS AND RETURNS

41. Register of emigrant labourers.—(1) The employer or manager of every tea estate which employs emigrant labourers shall maintain at the estate a register of emigrant labourers and their families in Form G ¹²[and where the emigrant labourer is a person who, having accompanied an assisted emigrant to Assam as a child dependent upon him, has become an adult and is so employed, a report of the entry of his name in such register shall be sent to the Controller within fourteen days of the date of such employment.]

(2) The register in Form G shall be preserved for at least seven years after the last entry recorded in it.

⁹ These words were inserted, *ibid*.

¹⁰ Rule 40 renumbered as sub-rule (1) by the Ministry of Labour Notification No. A. L. 136/EMG(1) dated the 12th April, 1950.

¹¹ This sub-rule was inserted, *ibid*.

¹² These words were added by the Ministry of Labour Notification No. S. R. O. 3282 dated the 15th October, 1954.

¹³[42. **Repatriation return.**—The employer or manager of every tea estate which has during the period of twelve months ending on the 30th September in any year employed any emigrant labourers shall

- (a) send to the Controller within ten days from the date of repatriation of an emigrant labourer who is repatriated during the said period of twelve months, a report containing the names and other particulars of the emigrant labourers and the members of his family, if any, as well as his emigration certificate number; and
- (b) send to the Controller on or before the 1st November in that year—
 - (i) a return in Form H of all such labourers and their families as have been repatriated under the provisions of Chapter II of the Act during the said period of twelve months; and
 - (ii) a report containing the following particulars namely:—(a) the name together with the emigration certificate number of every emigrant labourer who has not availed himself of the right of repatriation during the said period of twelve months or who intends to exercise that right at some later date; (b) the date of entry in Assam of every such emigrant labourer; (c) the date of execution of the agreement under section 14 in respect of every such emigrant labourer and (d) the approximate period during which the right of repatriation would be exercised.]

CHAPTER VII.—PROCEEDING BEFORE THE CONTROLLER OR OTHER OFFICERS.

43. **Presentation of applications.**—(1) An application to the Controller for the exercise of any power conferred on him by Chapter II of the Act may be presented in person or by post—

- (a) at the office of the Controller or to the Controller himself at any place where he is for the time being, or
- (b) to the District Magistrate of the district in which the labourer to whom it relates is employed.

(2) Applications shall be made in writing and shall bear the signature or thumb impression of the applicant.

Provided that if the officer to whom the application is presented is within the tea estate in which the labourer to whom it relates is employed, the application may be made orally and if so made shall be reduced to writing and attested under his supervision.

44. **Forwarding of applications to Controller.**—When the District Magistrate receives an application under clause (b) of rule 43, he shall forward it to the Controller in any of the following cases, namely:—

- (a) if at the time of its receipt the Controller is in the district and has previously intimated his arrival or intention to arrive in the district to the District Magistrate;
- (b) if the Controller has intimated to the District Magistrate that he will be staying in the district within a period of 20 days;
Provided that in this case the District Magistrate may dispose of the application if he is of opinion that it is urgently necessary that the application should be disposed of before the Controller is likely to reach the district;
- (c) if it is an application for a declaration in pursuance of clause (d) of sub-section (1) of section 10;
- (d) if, for special reasons to be recorded, he considers it desirable that the application should be placed before the Controller.

45. **Disposal of applications.**—(1) The District Magistrate shall dispose of—

- (a) any application received under clause (b) of rule 43 which is not forwarded to the Controller under rule 44; and
- (b) any application, whether presented originally to him or to the Controller, which is transferred to him under sub-section (2) of section 36.

(2) All other applications to the Controller for the exercise of a power conferred by Chapter II of the Act shall be disposed of by the Controller.

46. **Procedure.**—Enquiries held under the Act by the Controller may be held summarily and evidence taken need not be recorded. Where, however, an application made to him for a declaration or direction under Chapter II of the Act is opposed, he shall record the substance of the points on which the parties are at variance and the reasons for his declaration or direction.

¹³ Substituted, *ibid.*

47. **Orders.**—(1) Any declaration, direction or order by the Controller in any proceedings under the Act shall be in writing.

(2) Every such order shall be communicated to the parties concerned without delay.

48. **Copy to be sent to Government of India.**—A copy of every order passed under clause (d) of sub-section (1) of section 10, with the reasons therefor, shall be forwarded by the Controller to the Secretary to the Government of India in the ¹⁴[Ministry of Labour].

49. **Copies.**—Copies of any part of the record made under rule 46 and of any declaration, direction or order made by the Controller shall be furnished to any person concerned on payment of such fee as the Controller may fix.

50. **Meaning of "the Controller".**—In rules 46, 47 and 49, the expression "the Controller" shall be deemed to include any person exercising the powers of the Controller under the Act.

51. **Return of applications decided.**—When a District Magistrate disposes of any application under the provisions of sub-rule (1) of rule 45 he shall send to the Controller a statement in Form I at the close of the month in which orders were passed on such applications.

CHAPTER VIII—OFFENCES AND IRREGULARITIES

52. **Action by Controller on offences punishable with imprisonment.**—(1) If it appears to the Controller that an offence punishable under the Act with imprisonment has been committed he shall send a report to the District Magistrate of a district in which the offence can be tried and may file a complaint in the Court of any Magistrate in the same district having jurisdiction to try the offence.

(2) If he has filed such a complaint he shall in his report inform the District Magistrate accordingly.

(3) If he does not file such a complaint, he shall in his report state, whether in his opinion, the offender should or should not be prosecuted and the District Magistrate, after any further inquiry that he deems necessary, shall institute proceedings or not as he deems fit, and shall inform the Controller accordingly.

53. **Action by Controller on offences punishable with fine.**—(1) If it appears to the Controller that an offence punishable with fine only has been committed he shall, if he considers that the offender should be prosecuted, either send a report to the District Magistrate of any district in which the offence can be tried or file a complaint in the Court of any Magistrate having jurisdiction to try the offence.

(2) A District Magistrate receiving a report under sub-rule (1) shall, after any further enquiry that he deems necessary, institute proceedings or not, as he thinks fit, and shall inform the Controller accordingly.

54. **Saving.**—Nothing in rules 52 and 53 shall be deemed to prevent the institution of proceedings at any stage by complaint or otherwise by any person in any court having jurisdiction to try an offence under the Act or these rules.

55. **Action by depot officers in case of improper recruitment.**—(1) Where a local forwarding agent or a person in charge of a depot receives a complaint or has otherwise reason to believe that a person who has been brought to him and who is proceeding to a tea estate or who has reached the tea estate with assistance—

- (a) has been recruited by coercion, undue influence, fraud or misrepresentation, or
- (b) has been recruited or forwarded otherwise than in accordance with the provisions of the Act and the rules made thereunder, he shall report the circumstances without delay to the Controller and to the nearest Magistrate exercising powers of the Controller under section 34 within that area, and may, pending the receipt of any order under section 34, return the person improperly recruited and his family to their home if such person so desires.

(2) In cases, where an offence under section 25 or section 32 appears to have been committed, the local forwarding agent or the person in charge of a depot shall record the statement of any persons who are able to give information relevant to the commission of the offence.

(3) In other cases the local forwarding agent may forward the person and his family to Assam if they are willing to proceed there and if, in the case of persons suspected to have been recruited by coercion, undue influence, fraud or misrepresentation, he is satisfied that they are no longer under any fear or misapprehension.

¹⁴ Substituted for "Department of Labour" by the Ministry of Labour Notification No. AL136/EMG (1) dated the 12th April, 1950.

¹⁵[55A. **Duties of persons engaged in recruiting labourers.**—Every person engaged in the recruitment of labourers shall give to the local forwarding agent to whom he is attached, a true account of every labourer recruited by him, and shall correct any misdescription of any such labourer or of any member of the family of such labourer, which is given by such labourer and which such person knows to be incorrect or has reason to believe to be incorrect.]

56. Issue of orders under Section 34.—(1) When any report is sent under rule 55 to a Magistrate and to the Controller, any necessary orders under section 34 shall be issued by the Magistrate receiving the report and not by the Controller, provided that the Magistrate may, and, if the Controller is in the vicinity of the depot, shall refer any such case to the Controller. When any such reference is made to him, the Controller may dispose of the case himself or return it to the Magistrate for disposal.

(2) When any order is passed either on the receipt of a report under rule 55 or on other information by a Magistrate exercising the powers of the Controller under section 34 such Magistrate shall send a copy of the order to the Controller.

(3) When it appears to the Controller or any Magistrate exercising the powers of the Controller under section 34 that in any case not reported under rule 55 an order under section 34 is necessary the order may notwithstanding the provisions of sub-rule (1) be issued by him:

Provided that no order shall be issued by any such officer if another such officer has previously investigated the matter:

Provided further that the Controller instead of issuing orders may report the matter to any Magistrate empowered to deal with it for such action as that Magistrate deems necessary.

57. Punishment for contraventions of rules.—Whoever contravenes any of the provisions of rules 11 or 15 shall be punishable with fine which may extend to five hundred rupees.

(2) Whoever contravenes any of the provisions of Chapter VI of these rules shall be punishable with fine which may extend to two hundred rupees.

(3) Whoever, not being an escort, contravenes any of the provisions of rules 14, 16, 17, 18, 20, 22, 26, 27, 55, 60 (2), or of Chapter V of these rules shall be punishable with fine which may extend to two hundred rupees.

¹⁶[(4) Whoever, contravenes any of the provisions of rule 55A shall be punishable with fine which may extend to one hundred rupees.]

CHAPTER IX—MISCELLANEOUS

58. Subsistence allowance.—¹⁷[(1)] The subsistence allowance provided under section 12 shall be at the rate of ¹⁸[one rupee and eight annas] a day for each adult and ¹⁹[twelve annas] a day for each child.

20 * * * *

²¹[(2) An emigrant labourer who is being repatriated to the organisation by which he was originally sent to Assam, shall be entitled to receive the same facilities in respect of accommodation, medical attention, detention, rest at interval and meals of the type and on the scales prescribed as in the case of the upward journey:

Provided that in lieu of meals he may be paid subsistence allowance at the rate specified in sub-rule (1)].

59. Agreements under section 14.—(1) Agreements under section 14 shall be in Form J.

²²[(2) The employer or manager of the tea estate, on which the emigrant labourer executing the agreement was employed at the time the agreement was made, shall retain the agreement—

¹⁵ Inserted by Notification No. 3282 dated the 15th October, 1954.

¹⁶ Substituted, *ibid.*

¹⁷ Rule 58 was re-numbered as sub-rule (1) by the Notification No. A. L. 316/EMG/(1) dated the 12th April, 1950.

¹⁸ Substituted for the words "six annas" *ibid.*

¹⁹ Substituted for the words "three annas," *ibid.*

²⁰ The proviso omitted, *ibid.*

²¹ This sub-rule was added, *ibid.*

²² Substituted by the Notification No. 3282 dated the 15th October, 1954.

(a) Where it is for the postponement of the exercise of the right of repatriation, for a period of two years from the expiry of the period for which such right is postponed, and;

(b) Where it is for the waiver of the right of repatriation, for a period of two years from the date of execution of the agreement and every such employer shall, if so required by the Controller or any officer exercising the powers of the Controller under section 4, produce the agreement at any time during the period concerned.]

(3) If the agreement is conditional it shall be prepared in duplicate and a copy shall be given to the emigrant labourer executing it.

60. Right of repatriation arising in family of deceased labourer.—(1) Where a right of repatriation arises under section 9 in respect of a widow, an agreement by the widow under section 14 (1) shall be made before the District Magistrate or such other Magistrate as he may appoint in this behalf, who shall, if he is satisfied that the widow understands the terms of the agreement and her rights in regard to repatriation ratify the agreement by endorsing a statement to this effect upon it.

(2) Where a right of repatriation arises under section 8 in respect of the family of a deceased emigrant labourer who leaves no widow, the manager of the tea estate on which the emigrant labourer was employed shall send to the Controller within three days of the labourer's death a report of the fact by registered post, giving the name, age and sex of each member of the family, and may with the report submit for the Controller's approval proposals for the action to be taken in respect of the family.

²³[**61. Medical arrangement or the general sanitary conditions of a depot.**—Any directions given by the Controller regarding improvement of the general sanitary conditions of the depot or of its medical arrangement shall be carried out within a reasonable time specified by the Controller. Non-compliance with any such directions within the time fixed shall render the license of the person in charge of the depot liable to cancellation by the Controller.

62. Maintenance of ration accounts.—Each depot shall maintain regular account of ration issued to a worker in such form that information about the issue of ration to each worker or his or her family is easily available from the ration register.]

²⁴[**63. Report on emigrant labourer quitting employment.**—The employer or manager of a tea estate shall send to the Controller by registered post a report giving the names of emigrant labourers who have quitted their employment otherwise than in exercise of their right of repatriation or who have been transferred to another estate within ten days of the event. The report shall contain the date on which such labourer quitted his employment or was transferred as the case may be and also the reasons thereof as far as they are known.]

²⁵[SCHEDULE

(See Rule 31)

Permissible Routes from controlled Emigration Areas to Katihar

Where the depot of the Local Forwarding Agent despatching the emigrants is in

The route shall pass through the following places

1

1. The State of Madras

2

- (1) Berhampur, Kharagpur, Howrah, Naihati, Bandel, Sahibganj or
- (2) Berhampur, Kharagpur, Howrah, Bandel, Sahibganj.

2. The Nagpur Division of the Madhya Pradesh.

- (1) Gondia, Raipur, Chakradharpur, Kharagpur, Howrah, Bandel, Sahibganj or
- (2) Gondia, Raipur, Chakradharpur, Purulia, Asansol, Burdwan, Sahibganj or
- (3) Gondia, Raipur, Chakradharpur, Purulia, Asansol, Ondal, Sainthia, Sahibganj.

²³ Rules 61 and 62 were added by the Notification No. A. L. 136/EMG(1) dated the 12th April, 1950.

²⁴ Added by the Notification No. 3282 dated the 15th October, 1954.

²⁵ The Schedule was substituted by the Notification No. A.L. 136/EMG(1) dated the 12th April, 1950.

PLANTATIONS LABOUR ACT, 1951 (LXIX OF 1951)

Statement of Objects and Reasons¹

In spite of the fact that the plantation industry provides employment for more than a million workers, there is at present no comprehensive legislation regulating the conditions of labour in the industry. The Tea Districts Emigrant Labour Act, 1932, which applies only to Assam, regulates merely the conditions of recruitment of labour for employment in the tea gardens of Assam. The Workmen's Compensation Act, 1923, which applies to estates growing cinchona, coffee, rubber or tea also does not confer any substantial benefit on plantation labour as accidents in plantations are few. The other Labour Acts like the Payment of Wages Act, 1936, the Industrial Employment Standing Orders Act, 1946, and the Industrial Disputes Act, 1947, benefit plantation labour only to a very limited extent. In its report the Labour Investigation Committee observed "that as the conditions of life and employment on plantations were different from those in other industries, it would be very difficult to fit plantation labour in the general framework of the Industrial Labour Legislation without creating serious anomalies" and recommended a Plantation Labour Code covering all plantation areas.

2. The present Bill, drafted as an All-India measure, seeks to regulate the conditions of plantation labour generally. It applies in the first instance to tea, coffee, rubber and cinchona plantations, but the State Government may apply it to any other plantation. Provision is made in the Bill for assuring to the worker reasonable amenities, as for example, the supply of wholesome drinking water or suitable medical and educational facilities or provision for canteens and creches in suitable cases or provision for a sufficient number of latrines and urinals separately for males and females. Housing accommodation is also to be provided for every worker and standards and specifications of such housing accommodation will be prescribed after due consultation. The Bill also regulates the working hours of workers employed in the plantations.

3. Children under 12 are prohibited from employment in any plantation and State Governments are empowered to make rules regulating the payment of sickness or maternity benefits.

4. Necessary provision is made in the Bill for the appointment of a suitable inspecting, medical or other staff for the purpose of securing the implementation of the various provisions in the Bill.

PLANTATIONS LABOUR ACT, 1951 (LXIX OF 1951)¹

An Act to provide for the welfare of labour, and to regulate the conditions of work, in plantations.

[2nd November, 1951]

Be it enacted by Parliament as follows:—

CHAPTER I.—PRELIMINARY

1. Short title, extent, commencement and application.—(1) This Act may be called the Plantations Labour Act, 1951.

(2) It extends to the whole of India except the State of Jammu and Kashmir.

(3) It shall come into force on such date² as the Central Government may, by notification in the Official Gazette, appoint.

(4) It applies in the first instance to all tea, coffee, rubber and cinchona plantations, but any State Government may, subject to the previous approval of the Central Government, by notification in the Official Gazette, apply it to any other class of plantations within that State.

2. Definitions.—In this Act, unless the context otherwise requires,—

(a) “adolescent” means a person who has completed his fifteenth year but has not completed his eighteenth year;

(b) “adult” means a person who has completed his eighteenth year;

(c) “child” means a person who has not completed his fifteenth year;

(d) “day” means a period of twenty-four hours beginning at midnight;

(e) “employer”, when used in relation to a plantation, means the person who has the ultimate control over the affairs of the plantation, and where the affairs of any plantation are entrusted to any other person (whether called a managing agent, manager, superintendent or by any other name) such other person shall be deemed to be the employer in relation to that plantation;

(f) “plantation” means any land used or intended to be used for growing tea, coffee, rubber, or cinchona which admeasures twenty-five acres or more and whereon thirty or more persons are employed, or were employed on any day of the preceding twelve months, and in any State where the provisions of this Act have been applied by notification under sub-section (4) of section 1 to any other class of plantations, means also any land used or intended to be used for growing the plant mentioned in such notification and whereon thirty or more persons are employed, or were employed on any day of the preceding twelve months;

(g) “prescribed” means prescribed by rules made under this Act;

(h) “qualified medical practitioner” means a person having a certificate granted by an authority specified in the Schedule to the Indian Medical Degrees Act, 1916 (VII of 1916), or in the Schedules to the Indian Medical Council Act, 1933 (XXVII of 1933) and also persons having certificates granted under the different State (Provincial) Medical Council Acts;

(i) “wages” has the meaning assigned to it in clause (h) of section 2 of the Minimum Wages Act, 1948 (XI of 1948);

(j) “week” means a period of seven days beginning at midnight on Saturday night or such other night as may be fixed by the State Government in relation to plantations in any area after such consultation as may be prescribed with reference to the plantations concerned in that area;

¹ For Statement of Objects and Reasons, see the Gazette of India, 1951, Part II, Section 2, p. 517; see also page 200 of this book.

² 1st April, 1954, *vide* Ministry of Labour Notification No. S. R. O. 880, dated the 6th March, 1954.

(k) "worker" means a person employed in a plantation for hire or reward, whether directly or through any agency, to do any work, skilled, unskilled, manual or clerical, but does not include—

- (a) a medical officer at the plantation;
- (b) any person whose monthly wages exceed three hundred rupees; or
- (c) a person employed in a plantation primarily in a managerial capacity notwithstanding that his monthly wages do not exceed rupees three hundred;

(l) "young person" means a person who is either a child or an adolescent.

3. **Reference to time of day.**—In this Act, references to time of day are references to Indian Standard time being five and a half hours ahead of Greenwich Mean time:

Provided that for any area in which the Indian Standard time is not ordinarily observed, the State Government may make rules—

- (a) specifying the area;
- (b) defining the local mean time ordinarily observed therein; and
- (c) permitting such time to be observed in all or any of the plantations situated in that area.

CHAPTER II.—INSPECTING STAFF

4. **Chief Inspector and Inspectors.**—(1) The State Government may, by notification in the Official Gazette, appoint for the State a duly qualified person to be the chief inspector of plantations and so many duly qualified persons to be inspectors of plantations subordinate to the chief inspector as it thinks fit.

(2) Subject to such rules as may be made in this behalf by the State Government, the chief inspector may declare the local area or areas within which, or the plantations with respect to which, inspectors shall exercise their powers under this Act, and may himself exercise the powers of an inspector within such limits as may be assigned to him by the State Government.

(3) The chief inspector and all inspectors shall be deemed to be public servants within the meaning of the Indian Penal Code (XLV of 1860).

5. **Powers and functions of inspectors.**—Subject to any rules made by the State Government in this behalf, an inspector may within the local limits for which he is appointed—

- (a) make such examination and inquiry as he thinks fit in order to ascertain whether the provisions of this Act and of the rules made thereunder are being observed in the case of any plantation;
- (b) with such assistants, if any, as he thinks fit, enter, inspect and examine any plantation or part thereof at any reasonable time for the purpose of carrying out the objects of this Act;
- (c) examine the crops grown in any plantation or any worker employed therein or require the production of any register or other document maintained in pursuance of this Act, and take on the spot or otherwise statements of any person which he may consider necessary for carrying out the purposes of this Act;
- (d) exercise such other powers as may be prescribed:

Provided that no person shall be compelled under this section to answer any question or make any statement tending to incriminate himself.

6. **Facilities to be afforded to inspectors.**—Every employer shall afford the inspector all reasonable facilities for making any entry, inspection, examination or inquiry under this Act.

7. Certifying Surgeons.—(1) The State Government may appoint qualified medical practitioners to be certifying surgeons for the purposes of this Act within such local limits or for such plantation or class of plantations as it may assign to them respectively.

(2) The certifying surgeon shall carry out such duties as may be prescribed in connection with—

- (a) the examination and certification of workers;
- (b) the exercise of such medical supervision as may be prescribed where adolescents and children are, or are to be, employed in any work in any plantation which is likely to cause injury to their health.

CHAPTER III.—PROVISIONS AS TO HEALTH

8. Drinking water.—In every plantation effective arrangements shall be made by the employer to provide and maintain at convenient places in the plantation a sufficient supply of wholesome drinking water for all workers.

9. Conservancy.—(1) There shall be provided separately for males and females in every plantation a sufficient number of latrines and urinals of prescribed types so situated as to be convenient and accessible to workers employed therein.

(2) All latrines and urinals provided under sub-section (1) shall be maintained in a clean and sanitary condition.

10. Medical facilities.—(1) In every plantation there shall be provided and maintained so as to be readily available such medical facilities for the workers as may be prescribed by the State Government.

(2) If in any plantation medical facilities are not provided and maintained as required by sub-section (1) the chief inspector may cause to be provided and maintained therein such medical facilities, and recover the cost thereof from the defaulting employer.

(3) For the purposes of such recovery the chief inspector may certify the costs to be recovered to the Collector, who may recover the amount as an arrear of land-revenue.

CHAPTER IV.—WELFARE

11. Canteens.—(1) The State Government may make rules requiring that in every plantation wherein one hundred and fifty workers are ordinarily employed, one or more canteens shall be provided and maintained by the employer for the use of the workers.

(2) Without prejudice to the generality of the foregoing power, such rules may provide for—

- (a) the date by which the canteen shall be provided;
- (b) the number of canteens that shall be provided and the standards in respect of construction, accommodation, furniture and other equipment of the canteens;
- (c) the food-stuffs which may be served therein and the charges which may be made therefor;
- (d) the constitution of a managing committee for the canteen and the representation of the workers in the management of the canteen;
- (e) the delegation to the chief inspector, subject to such conditions as may be prescribed, of the power to make rules under clause (c).

12. Creches.—(1) In every plantation wherein fifty or more women workers are employed or were employed on any day of the preceding twelve months, there shall be provided and maintained by the employer suitable rooms for the use of children of such women who are below the age of six years.

(2) Such rooms shall—

- (a) provide adequate accommodation;
- (b) be adequately lighted and ventilated;
- (c) be maintained in a clean and sanitary condition; and
- (d) be under the charge of a woman trained in the care of children and infants.

(3) The State Government may make rules prescribing the location and the standards of such rooms in respect of their construction and accommodation and the equipment and amenities to be provided therein.

13. Recreational facilities.—The State Government may make rules requiring every employer to make provision in his plantation for such recreational facilities for the workers and children employed therein as may be prescribed.

14. Educational facilities.—Where the children between the ages of six and twelve of workers employed in any plantation exceed twenty-five in number, the State Government may make rules requiring every employer to provide educational facilities for the children in such manner and of such standard as may be prescribed.

15. Housing facilities.—It shall be the duty of every employer to provide and maintain for every worker and his family residing in the plantation necessary housing accommodation.

16. Power to make rules relating to housing.—The State Government may make rules for the purpose of giving effect to the provisions of section 15 and, in particular providing for—

- (a) the standard and specification of the accommodation to be provided;
- (b) the selection and preparation of sites for the construction of houses and the size of such plot;
- (c) the constitution of advisory boards consisting of representatives of the State Government, the employer and the workers for consultation in regard to matters connected with housing and the exercise by them of such powers, functions and duties in relation thereto as may be specified;
- (d) the fixing of rent, if any, for the housing accommodation provided for workers;
- (e) the allotment to workers and their families of housing accommodation and of suitable strips of vacant land adjoining such accommodation for the purpose of maintaining kitchen gardens, the definition of what constitutes the family of a worker for the purposes of section 15, and for the eviction of workers and their families from such accommodation;
- (f) access to the public to those parts of the plantation wherein the workers are housed.

17. Other facilities.—The State Government may make rules requiring that in every plantation the employer shall provide the workers with such number and type of umbrellas, blankets, rain coats or other like amenities for the protection of workers from rain or cold as may be prescribed.

18. Welfare Officers.—(1) In every plantation wherein three hundred or more workers are ordinarily employed the employer shall employ such number of Welfare Officers as may be prescribed.

(2) The State Government may prescribe the duties, qualifications and conditions of service of officers employed under sub-section (1).

CHAPTER V.—HOURS AND LIMITATION OF EMPLOYMENT

19. Weekly hours.—Save as otherwise expressly provided in this Act, no adult worker shall be required or allowed to work on any plantation in excess of fifty-four hours a week and no adolescent or child for more than forty hours a week.

20. Weekly holidays.—(1) The State Government may by rules made in this behalf—

(a) provide for a day of rest in every period of seven days which shall be allowed to all workers;

(b) provide for payment for work done on a day of rest at a rate not less than the overtime rate prevailing in the area, and where there is no such rate at such rate as may be fixed by the State Government in this behalf.

(2) Notwithstanding anything contained in clause (a) of sub-section (1) where a worker is willing to work on any day of rest which is not a closed holiday in the plantation, nothing contained in this section shall prevent him from doing so:

Provided that in so doing a worker does not work for more than ten days consecutively without a holiday for a whole day intervening.

Explanation 1.—Where on any day a worker has been prevented from working in any plantation by reason of tempest, fire, rain or other natural causes, that day, may, if he so desires, be treated as his day of rest for the relevant period of seven days within the meaning of sub-section (1).

Explanation 2.—Nothing contained in this section shall apply to any worker whose total period of employment including any day spent on leave is less than six days.

21. Daily intervals for rest.—The period of work on each day shall be so fixed that no period shall exceed five hours and that no worker shall work for more than five hours before he has had an interval for rest for at least half an hour.

22. Spread-over.—The period of work of an adult worker in a plantation shall be so arranged that inclusive of his interval for rest under section [21]³ it shall not spread over more than twelve hours including the time spent in waiting for work on any day.

23. Notice of period of work.—(1) There shall be displayed and correctly maintained in every plantation a notice of periods of work in such form and manner as may be prescribed showing clearly for every day the periods during which the workers may be required to work.

(2) Subject to the other provisions contained in this Act, no worker shall be required or allowed to work in any plantation otherwise than in accordance with the notice of periods of work displayed in the plantation.

(3) An employer may refuse to employ a worker for any day if on that day he turns up for work more than half an hour after the time fixed for the commencement of the day's work.

24. Prohibition of employment of young children.—No child who has not completed his twelfth year shall be required or allowed to work in any plantation.

25. Night work for women and children.—Except with the permission of the State Government, no woman or child worker shall be employed in any plantation otherwise than between the hours of 6 a.m. and 7 p.m.:

Provided that nothing in this section shall be deemed to apply to midwives and nurses employed as such in any plantation.

³ The figures "21" was substituted for the figures "19" by the Repealing and Amending Act, 1953 (XLII of 1953).

26. Non-adult workers to carry tokens.—No child who has completed his twelfth year and no adolescent shall be required or allowed to work in any plantation unless—

- (a) a certificate of fitness granted with reference to him under section 27 is in the custody of the employer; and
- (b) such child or adolescent carries with him while he is at work a token giving a reference to such certificate.

27. Certificate of fitness.—(1) A certifying surgeon shall, on the application of any young person or his parent or guardian accompanied by a document signed by the employer or any other person on his behalf that such person will be employed in the plantation if certified to be fit for work, or on the application of the employer or any other person on his behalf with reference to any young person intending to work, examine such person and ascertain his fitness for work either as a child or as an adolescent.

(2) A certificate of fitness granted under this section shall be valid for a period of twelve months from the date thereof, but may be renewed.

(3) Any fee payable for a certificate under this section shall be paid by the employer and shall not be recoverable from the young person, his parents or guardian.

28. Power to require medical examination.—An inspector may, if he thinks necessary so to do, cause any young person employed in a plantation to be examined by a certifying surgeon.

CHAPTER VI.—LEAVE WITH WAGES

29. Application of Chapter.—(1) The provisions of this Chapter shall not operate to the prejudice of any rights to which a worker may be entitled under any other law or under the terms of any award, agreement, or contract of service:

Provided that where such award, agreement or contract of service provides for a longer leave with wages than provided in this Chapter the worker shall be entitled only to such longer leave.

Explanation.—For the purpose of this Chapter leave shall not, except as provided in section 30, include weekly holidays or holidays for festivals or other similar occasions.

30. Annual leave with wages.—(1) Every worker shall be allowed leave with wages for a number of days calculated at the rate of—

- (a) if an adult, one day for every twenty days of work performed by him, and
- (b) if a young person, one day for every fifteen days of work performed by him:

Provided that a period of leave shall be inclusive of any holiday which may occur during such periods.

(2) If a worker does not in any one period of twelve months take the whole of the leave allowed to him under sub-section (1), any leave not taken by him shall be added to the leave to be allowed to him under that sub-section in the succeeding period of twelve months.

(3) A worker shall cease to earn any leave under this section when the earned leave due to him amounts to thirty days.

31. Wages during leave period.—(1) For the leave allowed to a worker under section 30 he shall be paid at the rate equal to the daily average of his total full-time wages, exclusive of any overtime earnings and bonus, if any, but inclusive of dearness allowance and the cash equivalent of any advantage accruing by the concessional supply by the employer of foodgrains for the day on which he worked.

(2) A worker who has been allowed leave for ⁴[any period not less than] four days in the case of an adult and five days in the case of a young person under section 30 shall, before his leave begins, be paid his wages for the period of the leave allowed.

32. Sickness and maternity benefits.—(1) Subject to any rules that may be made in this behalf, every worker shall be entitled to obtain from his employer—

(a) in the case of sickness certified by a qualified medical practitioner, sickness allowance, and

(b) if a woman, in the case of confinement or expected confinement, maternity allowance,

at such rate, for such period and at such intervals as may be prescribed.

(2) The State Government may make rules regulating the payment of sickness or maternity allowance and any such rules may specify the circumstances in which such allowance shall not be payable or shall cease to be payable, and in framing any rules under this section the State Government shall have due regard to the medical facilities that may be provided by the employer in any plantation.

CHAPTER VII.—PENALTIES AND PROCEDURE

33. Obstruction.—(1) Whoever obstructs an inspector in the discharge of his duties under this Act or refuses or wilfully neglects to afford the inspector any reasonable facility for making any inspection, examination or inquiry authorised by or under this Act in relation to any plantation, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

(2) Whoever wilfully refuses to produce on the demand of an inspector any register or other document kept in pursuance of this Act, or prevents or attempts to prevent or does anything which he has reason to believe is likely to prevent any person from appearing before or being examined by an inspector acting in pursuance of his duties under this Act, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

34. Use of false certificate of fitness.—Whoever knowingly uses or attempts to use as a certificate of fitness granted to himself under section 27 a certificate granted to another person under that section, or having been granted a certificate of fitness to himself, knowingly allows it to be used, or allows an attempt to use it to be made by another person, shall be punishable with imprisonment which may extend to one month, or with fine which may extend to fifty rupees, or with both.

35. Contravention of provisions regarding employment of labour.—Whoever, except as otherwise permitted by or under this Act, contravenes any provision of this Act or of any rules made thereunder, prohibiting, restricting or regulating the employment of persons in a plantation, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

36. Other offences.—Whoever contravenes any of the provisions of this Act or of any rules made thereunder for which no other penalty is elsewhere provided by or under this Act, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

⁴ These words were substituted for the words "any period less than" by the Repealing and Amending Act, 1953 (XLII of 1953.)

37. Enhanced penalty after previous conviction.—If any person who has been convicted of any offence punishable under this Act is again guilty of an offence involving a contravention of the same provision, he shall be punishable on a subsequent conviction with imprisonment which may extend to six months, or with fine which may extend to one thousand rupees, or with both:

Provided that for the purposes of this section no cognizance shall be taken of any conviction made more than two years before the commission of the offence which is being punished.

38. Exemption of employer from liability in certain cases.—Where an employer charged with an offence under this Act, alleges that another person is the actual offender, he shall be entitled upon complaint made by him in this behalf to have, on giving to the prosecutor in this behalf three clear days' notice in writing of his intention so to do, that other person brought before the court on the day appointed for the hearing of the case and if, after the commission of the offence has been proved, the employer proves to the satisfaction of the court that—

(a) he has used due diligence to enforce the execution of the relevant provisions of this Act; and

(b) that the other person committed the offence in question without his knowledge, consent or connivance;

the said other person shall be convicted of the offence and shall be liable to the like punishment as if he were the employer and the employer shall be acquitted:

Provided that—

(a) the employer may be examined on oath and his evidence and that of any witness whom he calls in his support shall be subject to cross-examination on behalf of the person he charges to be the actual offender and by the prosecutor, and

(b) if, in spite of due diligence, the person alleged as the actual offender cannot be brought before the court on the day appointed for the hearing of the case, the court shall adjourn the hearing thereof from time to time so, however, that the total period of such adjournment does not exceed three months, and if, by the end of the said period, the person alleged as the actual offender cannot still be brought before the court, the court shall proceed to hear the case against the employer.

39. Cognizance of offences.—No court shall take cognizance of any offence under this Act except on complaint made by, or with the previous sanction in writing of, the chief inspector and no court inferior to that of a presidency magistrate or a magistrate of the second class shall try any offence punishable under this Act.

40. Limitation of prosecutions.—No court shall take cognizance of an offence punishable under this Act unless the complaint thereof has been made or is made within three months from the date on which the alleged commission of the offence came to the knowledge of an inspector:

Provided that where the offence consists of disobeying a written order made by an inspector, complaint thereof may be made within six months of the date on which the offence is alleged to have been committed.

CHAPTER VIII.—MISCELLANEOUS

41. Power to give directions.—The Central Government may give directions to the Government of any State as to the carrying into execution in the State of the provisions contained in this Act.

42. Power to exempt.—The State Government may, by order in writing, exempt, subject to such conditions and restrictions as it may think fit to impose, any employer or class of employers from all or any of the provisions of this Act:

Provided that no such exemption shall be granted except with the previous approval of the Central Government.

43. General power to make rules.—(1) The State Government may, subject to the condition of previous publication, make rules to carry out the purposes of this Act:

Provided that the date to be specified under clause (3) of section 23 of the General Clauses Act, 1897 (X of 1897) shall not be less than six weeks from the date on which the draft of the proposed rules was published.

(2) In particular, and without prejudice to the generality of the foregoing power, any such rules may provide for—

- (a) the qualifications required in respect of the chief inspector and inspector;
- (b) the powers which may be exercised by inspectors and the areas in which and the manner in which such powers may be exercised;
- (c) the medical supervision which may be exercised by certifying surgeons;
- (d) the examination by inspectors or other persons of the supply and distribution of drinking water in plantations;
- (e) appeals from any order of the chief inspector or inspector and the form in which, the time within which and the authorities to which, such appeals may be preferred;
- (f) the time within which housing, recreational, educational or other facilities required by this Act to be provided and maintained may be so provided;
- (g) the types of latrines and urinals that should be maintained in plantations;
- (h) the medical, recreational and educational facilities that should be provided in plantations;
- (i) the form and manner in which notices of periods of work shall be displayed and maintained;
- (j) the registers which should be maintained by employers and the returns, whether occasional or periodical, as in the opinion of the State Government may be required for the purposes of this Act; and
- (k) the hours of work for a normal working day for the purpose of wages and overtime.

(3) All rules made under this Act shall, if made by any Government, other than the Central Government, be subject to the previous approval of the Central Government.

MINING & MINERAL LEGISLATION
INCLUDING
MINING LABOUR WELFARE LEGISLATION

MINING & MINERAL LEGISLATION¹

Early Mining Legislation

Mining industry was introduced in India early in the nineteen century, but the Government did not then consider the necessity of regulating employment of labour in mines. The first Act concerning the mines was passed in 1901 (VIII of 1901) on the basis of the Report of the Mining Committee appointed in 1895 and the Act came into force on 22nd March 1901. The main object of the Indian Mines Act, 1901 was to solve the problems of health and safety of the miners. It applied to all excavations which were 20 feet and undertaken in search of minerals. It empowered the Government of India to appoint Chief Inspector of Mines and the Provincial Governments for the appointment of inspecting staff. It authorised the Chief Inspector to prohibit employment of child (a person under 12 years of age) and woman in mines which were dangerous to their health and safety. Infringement of the provisions was punishable with a fine of Rs. 500 or imprisonment not exceeding 3 months or both. The serious defect of the Act was the absence of any statutory limitation to working hours.

Indian Mines Act, 1923 (IV of 1923)

The first attempt to regulate the conditions of employment in mines was made in the Indian Mines Act, 1923 to carry out the recommendation of the Washington Conference. The definition of the term "mine" was extended to include any excavation irrespective of depth for obtaining minerals. It prohibited the employment of children under 13 years below the ground. The Act prescribed a compulsory weekly holiday for all miners. The weekly hours of work were limited to 54 below ground and 60 above ground. It authorised the Central Government to prohibit the employment of women underground. Mining legislation is applicable to the whole of India and its administration is chiefly the concern of the Government of India. For the administration purposes, a large number of rules and regulations have been made relating to the health and safety in mines and prescribing conditions to make the mining operation as safe as possible. The inspection and supervision are carried on by (1) Inspectorate, (2) Mining Boards, (3) Committee, (4) Court of Enquiry. The Manager in charge of mine is required to keep adequate supply of drinking water and to make provision for sanitary arrangements and when notified to keep first aid medical appliances, stores, stretchers, etc., ready at hand. Abstract of the Act, regulations and rules have to be posted at or near every mine. Infringement of major provisions is punishable with a fine of Rs. 500. The chief defect of the Act of 1923 was the absence of the statutory limitation of daily hours of work.

Indian Mines (Amendment) Act, 1928 (XIII of 1928)

The Act which came into force on 1st April 1930, laid down that no mine could work more than 12 hours out of 24 hours with the same set of workers and that there should not be any over lapping of shifts. Every mine should maintain a register of workers and their hours of work.

Prohibition of Women's Underground Work, 1929

The Government of India, promulgated Regulations under section 29 of the Indian Mines Act, 1923, on 7th March 1929 prohibiting underground employment

¹ Mines Maternity Benefit Act, 1941 & Rules 1943, Coal Mines Provident Fund and Bonus Scheme Act, 1948 and different Coal Mines Bonus Schemes and Coal Mines Provident Fund Schemes under this Act, have not been included here as they are neither mining nor mineral legislation but they form part of Social Security Legislations in India. Accordingly these legislations have been included under Social Security Legislation.

Mining Labour Welfare Legislations have been included under separate heading.

of women in all mines from 1st July 1929. After the adoption of Underground Work (Women) Convention (No. 45) by the International Labour Conference in 1935, the Government of India revised the Regulation of 1929 and prohibited the underground employment of women in mines from 1st July 1937. Due to shortage of labour and fall in coal output the Government of India temporarily lifted the ban in coal mines in August 1943. The ban was reimposed from 1st February 1946.

Indian Mines (Amendment) Act, 1931 (XXI of 1931)

The Act was again amended in 1931 for some minor purposes for determining the jurisdiction of the Court to try cases concerning mines.

Indian Mines (Amendment) Act, 1935 (V of 1935)

On the basis of the recommendations of the Royal Commission on Labour and in the light of the Draft Convention of the Fifteenth Session of the International Labour Conference, the Government of India framed a new Bill further to amend the Act. The Bill was passed in 1935 and came into force from 1st October 1935. The amending Act regulated the hours of work above ground to 54 a week and 10 a day with at least one hour's rest for six hours work, and for work underground to 54 in a week and 9 a day. It prohibited the employment in mines of children under 15 years of age and included provisions relating to safety in mines. It prescribed the maintenance of accident register and submission of record of accidents incapacitating person for 24 hours or more to the Chief Inspector of Mines twice a year. It prescribed setting up of Mining Boards by the Provincial Government, consisting of equal numbers of the representatives of mine owners and mine workers.

Indian Mines (Amendment) Act, 1936 (XI of 1936)

The amendment was made for securing greater safety and providing adequate safeguards against fire in mines. The power of the Inspectorate was temporarily enlarged to include the issue of orders to individual mines to take precautionary measures in case of collapse of any part of a mine. The Government of India was also authorised to make regulations requiring groups of mines to establish rescue stations and to provide for the formation, training and duties of rescue brigade.

Indian Mines (Amendment) Act, 1937 (XXIX of 1937)

The amendment was undertaken with a view to give effect to the recommendations of the Coal Committee appointed on 19th October 1936 and to bring about certain changes in the light of new experiences. The Act made permanent the powers of the Inspectorate to issue orders to individual mines where danger was apprehended. It permitted the Inspectorate to disclose evidence of danger to adjacent mines to persons likely to be affected. A duty on coal and coke was levied to defray the cost of rescue stations. The establishment of Boards of Health is an important provision of the Act. These Boards adequately look after the health of workers and have powers to compel mine owners to maintain good housing conditions, water supply, sanitation and medical help.

Indian Mines (Amendment) Act, 1940 (XXIV of 1940)

The Act required the owner of the coal mine to pay the salaries and wages of the manager, the supervisory staff, and persons employed in connection with the raising and lowering of the workers instead of the same being paid by the coal raising contractors. Its main purpose was that the supervisory staff who would take necessary measures for the safety of the mines would be directly responsible to the owner.

Indian Mines (Amendment) Ordinance, 1945 (XVII of 1945)

It is an important piece of legislation providing maintenance of creches in mines and amends sections 30 and 31 of the Act. It empowers the Central Government to make rules requiring the maintenance of suitable rooms for use of children in mines where women are ordinarily employed. Under this amendment, the Central Government promulgated Mines Creche Rules in 1946.

Indian Mines (Amendment) Act, 1946 (II of 1946)

The amended Act conferred on the Central Government rule-making powers to require the colliery owners to erect in their mines separate bathing places with shower baths and separate locker rooms, for men and women employed in the mine on a scale laid down by the rules and to maintain them at prescribed standard. The object of pit-head bath is to ensure that a miner should go home clean after his days' work. The Advisory Committee of the Coal Mines Welfare Fund have agreed that it is the responsibility of mine owners to provide bathing facilities for men and women working underground. The Government of India has promulgated Coal Mines Pithead Bath Rules in 1946 under this Act.

Five-year Labour Programme of the Government of India

The Government of India in consultation with the Provincial and State Governments proposed to bring about an effective improvement in the working conditions and standards of living of workers in mines on the basis of the factual data collected by the Labour Investigation Committee. It is proposed to revise the Mines Act to reduce the hours of work both above and underground so as to bring it in conformity with the reduction of hours in respect of factories and to incorporate the provisions regarding holidays with pay and monetary relief during sickness. The existing Act is inadequate in respect of welfare provisions relating to labour. The Mines Inspectorate mainly look to the adoption of safety measures and not to other provisions relating to health, hours of work, etc. The inspection of mine was inadequate and strict enforcement of the Act was not done due to inadequate staff. Expansion of the Mines Inspectorate is proposed for frequent inspection and strict enforcement of law. Institution of training courses for mines and introduction of more mechanical appliances are also contemplated.

Revision of the Indian Mines Act, 1923

Standing Labour Committee

Revision of the Mines Act was discussed in the Ninth Meeting of the Standing Labour Committee held in July 1946. After the passing of the Factories Amendment Act of 1946 reducing the working hours in factories, the Government brought proposal for reduction of hours of work in mines. No tentative decision was arrived at in the meeting.

Industrial Committee on Coal Mining

Government's proposal for amendment of the Mines Act was discussed in the First Meeting of the Industrial Committee on Coal Mining held at Dhanbad on the 23rd and 24th January, 1948. Far reaching amendments were proposed to improve the conditions of work of colliery workers and these relate to reduction of working hours and age limit for workers, provision of sanitary conveniences and the rate for overtime work as suggested by the Conciliation Board which reported in May, 1947. Diarchical control of certain kinds of colliery workers under the provisions of the Factories Act and Mines Act has to be abolished. Workshops run for the maintenance of the machinery and plant in mines in safe and efficient working order, which are now subject to the Factories Act, will be brought within the scope of the Mines Act. Power stations utilised for generating power

used wholly in the mines, are also proposed to be brought within the scope of the proposed amendment.

Mines Act, 1952 (XXXV of 1952)

After the passing of the new Factories Act of 1948, which brought about considerable changes in the law regulating the working conditions of the factory workers and containing elaborate provisions for their welfare, the Central Government was thinking of revising the legislation relating to mine workers and to bring it in line with the legislation concerning factory workers. Indian Mines Act of 1923 placed greater emphasis on the safety of mine workers than on the measures relating to their welfare. The Central Government introduced the new Mines Bill in the Parliament on the 8th December, 1949 to revise the legislation concerning mine workers. This Bill is both a repealing and consolidating measure. The Bill was passed on the 15th March, 1952 and the Act came into force on the 18th July, 1952.

Main Provisions of Act XXXV of 1952

Scope

The Act extends to the whole of India except the State of Jammu and Kashmir and applies to all persons employed exclusively on work relating to mines and also covers power stations which generate power used wholly in connection with work in mines.

Inspection Staff

The Act provides for the appointment of a Chief Inspector of Mines by the Central Government for the purpose of the administration of the Act. He will be assisted by Inspectors of Mines. The District Magistrate may exercise the powers and perform the duties of an Inspector subject to the general or special orders of the Central Government. The main changes in the new Act involve the appointment of certified surgeons who are to carry out prescribed duties in connection with the examination of young persons and of persons engaged in dangerous occupations or processes and to exercise medical supervision in cases of occupational diseases.

Mining Boards and Committees

The Central Government may constitute Mining Boards and Committees which may exercise the power of Inspector for the purpose of deciding or reporting upon any matter referred therein and also the powers of Civil Courts for the purpose of enforcing the attendance of witnesses and compelling the production of documents and material objects. The expenses of enquiry conducted by a Mining Board or Committee may be realised in whole or part from the owner or agent of the mine concerned.

Mining Operations and Management of Mines

The Act prescribes that the owner, agent or manager of a mine shall give to the Chief Inspector, the Director, Indian Bureau of Mines and the local District Magistrate, notice in writing in the prescribed form before the commencement of any mining operation so as to reach the persons concerned at least one month before such commencement.

The Manager shall be responsible for the control, management and direction of the mine. The owner, agent or manager shall be responsible that all operations carried on are conducted in accordance with the provisions of the Act, Regulations, Rules, Bye-laws and of any order made thereunder.

Health and Safety

The Act contains elaborate provisions for safeguarding the health and safety of mine workers. It provides that effective arrangement shall be made to provide and maintain a sufficient supply of cool and wholesome drinking water both above and below ground. Sufficient number of latrines and urinals of prescribed types shall be provided, separately for males and females and maintained in a clean and sanitary condition. Provision has been made for maintenance of first aid boxes or cupboards equipped with the prescribed contents in mines at the rate of one per every 150 workers. Such boxes and cupboards shall be kept in charge of persons trained in first aid treatment, who shall always be available during the working hours of the mine. Provision has also been made for maintenance of ambulances and stretchers of the prescribed type and ambulance room of the prescribed size containing the prescribed equipment in charge of medical and nursing staff, in every mine employing over 500 workers.

The Act authorises the Chief Inspector or any Inspector to issue directions to the employers to carry out remedial measures in case the mine is dangerous to human life and safety or defective and threatening the bodily injury of the workmen working therein.

The Act further provides that if the Chief Inspector or any Inspector feels that there is urgent or immediate danger to the life and safety of the workers in the mine he may, until the danger is removed, prohibit the employment in or about the mine or part thereof of any person where employment is not reasonably necessary for removing the danger. The Act provides for compulsory reporting of all types of fatal accidents and certain types of serious accidents by the owner, agent or manager. The Central Government may appoint Court of Inquiry in cases of fatal accidents and certain types of serious accidents. The Central Government have been empowered to notify any disease connected with the mining operations or occupational disease in mines and the employers shall inform the Chief Inspector of occurrence of such disease in the mines. Medical practitioners attending to workers suspected to be suffering from such occupational diseases shall immediately report such cases to the Chief Inspector. The Central Government may appoint a competent person to enquire into and report on any case of occupational disease. The Central Government may make Regulations, Rules and Bye-laws regulating various matters which affect the safety of the workers, prescribing the duties of owners, agents and managers of mines and also the qualifications of managers and regulating the storage, conveyance and use of explosives, safety of the road and working places, inspection of workings and sealed off fire-areas in mines, ventilation, lighting, use of safety lamp, fencing and other matters connected therewith.

Welfare

The Act authorises the Central Government to make rules requiring mines (1) wherein women are employed or were employed on any day of the preceding 12 months to maintain creches; (2) to maintain at or near pit-heads of bathing places equipped with shower baths and locker rooms separately for men and women; (3) wherein more than 150 persons are ordinarily employed to provide and maintain suitable shelters with provision for drinking water; (4) wherein more than 250 persons are ordinarily employed to provide and maintain canteen or canteens as specified by the Chief Inspector; (5) wherein 500 or more persons are ordinarily employed to employ Welfare Officers; (6) to establish Central Rescue Stations for groups of specified mines or for all mines in a specified area and to prescribe the position, equipment, control, maintenance and functions of such stations; (7) to provide for levy and collection of excise duty not exceeding six pies per ton on coal and coke produced in and despatched from mines for which Rescue Stations

may be set up, the proceeds of such excise duty to be utilised for the creation of a Central Rescue Station Fund and (8) to provide for the formation, training, composition and duties of rescue brigades and generally for the conduct of rescue work in mines.

Hours of Work

The Indian Mines Act of 1923 fixed the daily working hours of surface workers at 10 and underground workers at 9 and the weekly working hours of all categories of workers at 54. The new Act limits the hours of work of adult workers at 9 per day and 48 per week if employed above ground and 8 per day and 48 per week if employed below ground. The maximum spread over in the case of surface workers has been fixed at 12 hours per day (same as in the old Act) and in the case of underground worker it has been reduced from 9 hours to 8 hours. Longer hours of work have been prescribed for certain categories of underground workers, viz., pump-minders, onsetters or attendants of continuously operated machineries and they have to work 54 hours a week and 9 hours a day including spread over.

The Act provides for rest interval and no person employed in the mine is allowed to work more than 6 days in a week. If the worker is deprived of one or more weekly days of rest as a result of exemption provided in the Act, he shall be allowed an equal number of compensatory days of rest within two months positively.

As regards the overtime, the old Act did not specify the rate of pay for overtime, but the new Act provides that the surface workers will be paid at $1\frac{1}{2}$ time the ordinary rate of wages and underground workers at double the ordinary rate. The Act lays down that except in the case of emergency involving serious risks in the safety of a mine or persons employed therein no person is allowed to work for more than 10 hours in any day inclusive of overtime and that the total number of hours of overtime must not exceed 50 in any quarter of a year.

Employment of Young Persons

The Act fixes the minimum age of employment in mines at 15. It prohibits the employment of any child (below 15 years) in any part of the mine which is below ground or in any open excavation in which any mining operation is being carried on. The minimum age for employment below ground has been raised from 17 to 18. Adolescent (persons between the age of 15 and 18) cannot be employed below ground unless they are certified to be medically fit to work as an adult by a Certifying Surgeon and they carry a token to that effect while at work and unless they have an interval for rest of at least half an hour after every $4\frac{1}{2}$ hours of continuous work on any day. They shall not be employed in any mine except between the hours of 6 A.M. and 6 P.M.

Women Workers

The Act lays down that women workers cannot be employed to work in any part of a mine which is below ground and while working above ground they shall not be employed except between the hours of 6 A.M. and 7 P.M. The Central Government has been empowered to relax restrictions regarding employment of women during night, but employment of women between hours of 10 P.M. and 5 A.M. is not permitted.

Leave with Wages

The Act contains a new chapter regarding leave with wages. Previously in the old Act there was no provision for granting leave with wages to the workmen employed in mines. The Act provides that every person employed in a mine shall be entitled to leave with wages after 12 months' continuous service—14 days if he is a monthly paid employee and 7 days if he is a weekly paid employee

or a loader or employed below ground on a piece rate basis. A worker paid on a monthly basis may carry forward his leave to the succeeding 12 months, but the accumulated annual leave must not exceed a total period of 28 days. 12 months continuous service shall be deemed to have been completed in the case of a loader or other person employed below ground on piece rate basis if he has put in at least 190 days of attendance and for other persons the qualifying period of attendance for 265 days during a period of 12 months.

The Act lays down that in calculating wages for leave period, the cash equivalent of advantages accruing to workers through free issue of food grains and any compensation drawn in cash shall be taken into account. Wages for leave period can be drawn in advance if the period of leave is 10 days or more in case of monthly paid employees and 5 days or more in case of others.

Exemption

The Central Government has been authorised to exempt any mine¹ or any class of persons from the operation of all or any of the provisions of the Act. No mine can be exempted from the operation of the provisions of the Act relating to employment of children unless it is granted exemption from the operation of all other provisions of the Act.

Obligation of Mine Workers

Persons employed in mine shall not wilfully interfere with or misuse any appliances, conveyances or any other thing provided in a mine for the purpose of securing the health, safety or welfare of the employees.

Penalty

The old Act imposed penalty in the form of a fine for contravention of its provisions. Under the new Act the penalty may take the form of a fine or imprisonment or both.

Proposed Amendment to the Mines Act, 1952

The Central Government announced in the Lok Sabha that in order to comply with the Minimum Age (Coal Mines) Recommendation, 1953 adopted by the International Labour Conference at its 36th Session held in Geneva in 1953, it proposed to amend the Mines Act, 1952 to raise the minimum age of employment underground in mines from 15 to 16 years.

Rules and Regulations under the Mines Act

Draft of the Mines (Certifying Surgeons) Rules, 1954 has been published under the Mines Act of 1952 and have not yet been finalised. But Rules and Regulations² for gold mines in Mysore have been finalised and published in 1953. The Mines Rules 1955 have since been finalised and published in the Gazette of India Part II, Sec. 3 dated the 22nd July, 1955 at page 1172.

All Rules, Regulations³ and Bye-laws, etc. framed under the Indian Mines Act of 1923, however, continue to remain in force under the Mines Act of 1952 by virtue of Section 24 of the General Clauses Act, 1897 (X of 1897).

Safety Measures in Mines

At present safety measures in mines are regulated by the Indian Coal Mines Regulations, 1926 and Indian Metalliferous Mines Regulations, 1926. The two recent colliery disasters in quick succession have brought some misgivings in public

² Mysore Gold Mines Rules, 1953 and Mysore Gold Mines Regulations, 1953.

³ Indian Coal Mines Regulations, 1926; Indian Metalliferous Mines Regulations, 1926; Indian Oil Mines Regulations, 1933; Coal Mines Rescue Rules, 1939; Mines Pithead Bath Rules, 1946 and Mines Creche Rules, 1946.

mind about the operation of the mines, particularly in respect of safety measures—either these measures are defective or they are not implemented quite scrupulously in all mines. The Government of India have now taken up the question of the revision of the safety regulations under the Mines Act, so as to ensure greater safety to the labourers working in the mines. In revising these regulations, the Government will also take into consideration the suggestions which are likely to be made regarding the safety measures by the Courts of Enquiry appointed by the Government to go into the cases of the recent serious accidents.

New Regulations to ensure safety in mines in supersession of the Coal Mines Regulations 1926 and Metalliferous Mines Regulations, 1926 will be promulgated directing the colliery having a monthly output of 5,000 tons or over to appoint a competent engineer to supervise its machinery and plant. A new category of certificates will be introduced in order that responsible mine officials have the requisite technical knowledge and managers and supervisory staff should possess such certificates. It will be made obligatory on the managers to reside in the vicinity of their respective mines and to supervise the mines personally every day and examine every working place once in three days.

Court of Enquiry

The Court of Enquiry⁴ consisting of Mr. Justice V. R. Sen and two assessors which was appointed by the Central Government to hold an enquiry into the causes of, and circumstances attending the accident which occurred at the Newton Chickli Colliery, Chhindwara on the 10th December, 1954 suggested that the Government of India should appoint a High-level Commission to suggest measures for ensuring safety of the workers in mines. The Commission, which is to be constituted on the basis of U. K. Royal Commission of Safety in Coal Mines appointed in 1935, should “examine the provisions of the Mines Act, Rules, Regulations and By-laws now in force in the context of the prevailing conditions and the progressive developments and make suitable recommendations to ensure safety in Coal mines.”⁵

The Court of Enquiry also suggested a substantial increase in the number of Mine Inspectors and remarked that “increased depth, modernisation of mines and ageing of mines have brought in their train attendant difficulties and unsafe conditions requiring constant and intelligent supervision. In our opinion, coal mines should be inspected 4 times a year.”⁶

The Court of Enquiry further recommended that “Inspectors of Mines should have practical experience of management of a colliery. Before appointment, an Inspector should have worked for 5 years as a colliery manager.”⁶ The Court also recommended the appointment of an independent body of qualified surveyors by the Chief Inspector of Mines or by the appropriate State Government in order to survey each mine every year. Besides there should be Central Rescue Stations at suitable sites in different coal fields.

The above recommendations of the Court of Enquiry were very important as the accident was caused by the non-observance of certain precautions embodied in the Regulations and the negligence of the Manager to take proper safety precautions. There was also a considerable laxity of supervision. It is expected that the Central Government should give serious consideration to the recommendations.

⁴ Report of the Court of Enquiry was published under the Ministry of Labour Notification No. S. R. O. 1894 dated the 24th August, 1955 in Gazette of India, Part II, Sec. 3, p. 1701. For the Report of the Court of Inquiry about Amlabad Colliery disaster, see Notification No. S. R. O. 3688 dated the 7th December, 1955 at p. 2385 of Gazette of India, Part II, Sec. 3.

⁵ *Ibid*, para 132 (35), p. 1736.

⁶ *Ibid*, para 132 (28 & 30), p. 1735.

Coal Mines (Conservation and Safety) Act, 1952 (XII of 1952)

In order to safeguard the miners against the danger involved in the existing methods of mining in the coalfields, the Coal Mines Safety (Stowing) Act was passed in 1939 (Act XIX of 1939) which provided for the creation of a fund to finance stowing measures to promote safety in coal mines. The Act did not make any provision for assisting stowing for conservation of coal. Various Committees which surveyed the coal resources of the country, suggested urgent need of compulsory stowing for conservation of coal resources. An Ordinance called Coal Mines (Conservation and Safety) Ordinance was promulgated by the President on the 8th January, 1952 (Ordinance No. 1 of 1952) repealing the Coal Mines Safety (Stowing) Act, 1939 and embodying its essential provisions in the said Ordinance. The Ordinance was replaced by Coal Mines (Conservation and Safety) Act which was passed on the 4th March, 1952.

The Act is applicable to the whole of India, except the State of Jammu and Kashmir. The Act authorises establishment of a Coal Board for the purpose of maintenance of safety in coal mines or for conservation of coal and matters connected thereunder or incidental thereto. The Board shall exercise such powers and discharge such duties as may be assigned to it. The Act authorises the Central Government to take such measures as they deem proper and necessary for the purpose of maintenance of safety in coal mines or for conservation of coal. The Act authorises imposition of excise duty on all coal raised and despatched and on all coke manufactured and despatched from the collieries in India at a rate not exceeding Re. 1/- per ton as may be fixed by the Government. Apart from the levy of excise duty, the Central Government are empowered to impose on all coke imported or brought into India a duty of customs at the rate of excise duty levied under the Act. The proceeds of the excise duty are to be paid to the Coal Board and credited to the Coal Mines Safety and Conservation Fund constituted under the Act. The Fund is to be utilised for meeting the expenses of the Board, the execution of stowing and other operations and granting of stowing materials and other assistance and also for research work connected with safety in coal mine or conservation and utilisation of coal.

The Central Government is empowered to constitute one or more Advisory Committees to advise the Central Government or the Board in regard to any matter connected with the administration of the Act as may be referred to them. The Act empowers the Chief Inspector and any Inspector appointed under the Mines Act to make enquiries and to inspect the coal mines to ensure that the provisions of the Act or Rules framed thereunder are being complied with.

Coal Mines Conservation and Safety Rules, 1952

The Central Government has framed the Rules on the 25th September, 1954 prescribing the procedure and powers of the Coal Board and the powers and duties of the Chairman and Secretary, the constitution of the Committees of Enquiry, Technical Advisory Committee (Mining), Advisory Committee on Stowing and Research Advisory Committee and their functions, levy and collection of excise duty, procedure for the grant of assistance and accounts and audit.

Mines and Minerals (Regulation & Development) Act, 1948 (LIII of 1948)

The Mines and Minerals (Regulation and Development Act, 1948 (LIII of 1948) provides for the regulation of mines and oilfields and for the development of minerals and extends to the whole of India except the State of Jammu and Kashmir. The Act received assent of the Governor-General on the 8th September, 1948 and came into force on the 25th October, 1948. Mine has been defined as any excavation for the purpose of searching for or obtaining minerals including

an oil-well. Mining lease includes a lease granted for the purpose of searching for, winning, working, getting, making merchantable, carrying away or disposing of minerals or for purposes connected therewith and includes an exploring or a prospecting lease. The Act empowers the Central Government to frame rules for the regulation of the terms and conditions of prospecting leases and mining leases, conservation and development of minerals and modification of the terms and conditions of old licenses and lease on payment of compensation. The Act authorises the Central Government to relax the rules in the public interests.

Mineral Concession Rules, 1949

The Mineral Concession Rules framed by the Central Government on the 18th October, 1949 under Section 5 of the Act and enforced with effect from the 25th October, 1949, regulate the grant by the State Government and by private persons, with whomsoever the mineral rights may rest, of prospecting licenses and mining leases for minerals other than petroleum, natural gas and minor minerals which means building stone, boulder, shingle, gravel, lime-shell, kankar and limestone used for lime burning, murrum, brick-earth, fullers' earth, bentonite, ordinary clay, ordinary sand, road metal, reh-matti slate and slate when used for building material.

The mineral policy as indicated in the Rules is intended to encourage the exploitation of mineral deposits. A certificate of approval is an essential prerequisite for grant of any mineral concessions. This certificate may be issued to any person or company or a firm registered or incorporated in India, who or which is in a position to employ an efficient prospecting agency or possesses special knowledge of geology or mining. The certificate is renewable annually on application in the prescribed way and on payment of prescribed fee. A prospecting license or mining lease can only be granted to a person holding a certificate of approval. In the case of a person who is not an Indian citizen, prior approval of the Central Government is required. The period of prospecting license shall not exceed two years. The period of mining lease shall not exceed thirty years in case of coal, iron ore and bauxite and twenty years in case of any other mineral. The license and lease are renewable for a prescribed period at the option of the lessee.

Applications for certificate of approval, prospecting lease and mining lease have to be made to the State Government, and the State Governments have been given power to grant concessions for minerals on the terms and conditions as specified in the Rules. Persons aggrieved by the order of the State Government may within two months of the date of such order apply to the Central Government for reviewing the same. On receipt of such application and after hearing the State Government, the Central Government may cancel the order of the State Government or revise the same and such order shall be final.

The Central Government have issued model forms (1) for the grant of mineral concession (including certificates of approval), (2) of applications for grant of mineral concession (including certificate of approval) and (3) of application for review.

Mineral Conservation and Development Rules, 1955

The Mineral Conservation and Development Rules were framed by the Central Government on the 15th March, 1955 under Section 6 of the Act and they came into force on the 1st April, 1955. Under the Rules, every holder of prospecting license has to give a notice to the Director, Indian Bureau of Mines of the commencement of the prospecting operations within thirty days from the date of such commencement and has to submit annual returns in triplicate to the Director.

MINES ACT, 1952 (XXXV OF 1952)

Statement of Objects and Reasons¹

The existing Indian Mines Act which relates to the regulation and inspection of mines was passed in 1923. Although it has since been amended in certain respects, the general framework has remained unchanged. Experience of the working of the Act has revealed a number of defects and deficiencies which hamper effective administration. Some of these necessitate new forms of control while others require the tightening up of the existing legal provisions. It has, therefore, been considered necessary to thoroughly overhaul the existing Act.

2. The proposed legislation differs from the existing law in certain respects. The more important features are mentioned below:—

(i) At present workshops run by a mine for the maintenance of its machinery and plant in safe and efficient working order are subject to the Factories Act, 1948, which is administered by Provincial Governments. Workers in workshops such as fitters, black-smiths, welders, electricians and others frequently work for a part of the shift underground and while so employed come within the scope of the Mines Act. It is inconvenient that the same personnel should be subject to two different Acts administered by two different authorities. It is now proposed to bring all personnel engaged solely on work relating to mines within the scope of the Mines Act. For similar reasons it is proposed to bring within the scope of the Mines Act power stations which generate power used wholly in connection with the mine concerned.

(ii) Provision has been made in the Bill for the issue of certificates of fitness to adolescents and the appointment of certifying surgeons.

(iii) The provisions in the existing Act regarding conservancy and sanitary conveniences are of a general nature. The Bill provides for more definite arrangements for drinking water, latrines, urinals, etc.

(iv) It has been made obligatory on the part of the owner, agent or manager of a mine to report the contraction of any of certain notified diseases. Provision for the holding of an enquiry regarding the causes of contraction of a reported disease has also been made.

(v) It has also been laid down that first-aid appliances should be made available underground and that they should be kept in charge of qualified personnel.

(vi) A new chapter regarding the grant of compensatory holidays and holidays with pay has been included.

(vii) The existing Act does not specify the rate of payment for overtime work. In the Bill the rates for overtime have been fixed at $1\frac{1}{2}$ times the ordinary rate of wages in the case of surface workers and twice the ordinary rate for underground workers. The working hours for all workers, both surface and underground, have been reduced to 48 per week and no worker is to be allowed to work for more than 9 hours a day above ground and 8 hours a day below ground. The provisions in the existing Act permit workers on the surface to work for 54 hours a week or 10 hours a day and workers underground for 9 hours a day.

(viii) It is proposed to prohibit after a certain date to be notified by the Central Government the presence of children in any part of a mine where operations connected with, or incidental to, mining processes are being carried on. The intention is that the presence of children at mines should be prohibited as soon as arrangements for the provision of elementary education can be made in collieries.

(ix) The age limit of persons employed underground has been raised from 17 to 18 years.

(x) At present the penalty for violation of the provisions of the Act is only fine. It is proposed to provide that the punishment may be imprisonment or fine or both. This will bring the penalty provisions in line with the penalties prescribed in the Factories Act, 1948.

(xi) The employment of women underground is already prohibited. This prohibition will be continued. The employment of women on the surface between the hours of 7 P.M. and 6 A.M. will also be prohibited, but Provincial Governments will be empowered to relax these limits but not so as to authorise working between the hours of 10 P.M. and 5 A.M.

(xii) Opportunity has also been taken to include in the Bill provisions relating to health, safety and comfort of workers somewhat on the lines of the Factories Act, 1948.

3. It is hoped that when the Bill is passed into law, the provisions regulating labour and safety in mines will largely to be on the lines of those contained in the Factories Act, 1948.

¹ Gazette of India, 1949, Part V, p. 436.

MINES ACT, 1952 (XXXV OF 1952)

Arrangement of Sections

CHAPTER I—PRELIMINARY

1. Short title, extent and commencement.
2. Definitions.
3. References to enactments not in force in Part B States.
4. References to time of day.

CHAPTER II—INSPECTORS AND CERTIFYING SURGEONS

5. Chief Inspector and Inspectors.
6. Functions of Inspectors.
7. Powers of Inspectors of Mines.
8. Powers of special officer to enter, measure, etc.
9. Facilities to be afforded to Inspectors.
10. Secrecy of information obtained.
11. Certifying Surgeons.

CHAPTER III—MINING BOARDS AND COMMITTEES

12. Mining Boards.
13. Committees.
14. Powers of Mining Boards.
15. Recovery of expenses.

CHAPTER IV—MINING OPERATIONS AND MANAGEMENT OF MINES

16. Notice to be given of mining operations.
17. Managers.
18. Duties and responsibilities of owners, agents and managers.

CHAPTER V—PROVISIONS AS TO HEALTH AND SAFETY

19. Drinking water.
20. Conservancy.
21. Medical appliances.
22. Powers of Inspectors when causes of danger not expressly provided against exist or when employment of persons is dangerous.
23. Notice to be given of accidents.
24. Power of Government to appoint Court of Inquiry in case of accidents.
25. Notice of certain diseases.
26. Power to direct investigation of causes of disease.
27. Publication of reports.

CHAPTER VI—HOURS AND LIMITATION OF EMPLOYMENT

28. Weekly day of rest.
29. Compensatory days of rest.
30. Hours of work above ground.
21. Hours of work below ground.
32. Special provision for night relays.
33. Extra wages for overtime.
34. Prohibition of employment of certain persons.
35. Limitation of periods of overtime work.
36. Notice regarding hours of work.
37. Supervising staff.
38. Exemption from provisions regarding employment.
39. Power to make exempting rules.
40. Employment of adolescents.
41. Certificate of fitness.
42. Effect of certificate of fitness granted to adolescents.
43. Power to require medical examination.
44. Working hours for adolescents not certified to be fit for work as adults.
45. Employment of children.
46. Employment of women.
47. Disputes as to age.
48. Registers of persons employed.

CHAPTER VII—LEAVE WITH WAGES

49. Leave defined.
50. Application of Chapter.
51. Annual leave with wages.
52. Wages during leave period.
53. Payment in advance in certain cases.
54. Power of Inspector to act for an employee.
55. Power to make rules.
56. Power to exempt mines.

CHAPTER VIII—REGULATIONS, RULES AND BYE-LAWS

57. Power of Central Government to make regulations.
58. Power of Central Government to make rules.
59. Prior publication of regulations and rules.
60. Power to make regulations without previous publication.
61. Bye-laws.
62. Posting up of Abstracts from Act, regulations, etc.

CHAPTER IX—PENALTIES AND PROCEDURE

63. Obstruction.
64. Falsification of records, etc.
65. Use of false certificates of fitness.
66. Omission to furnish plans, etc.
67. Contravention of provisions regarding employment of labour.
68. Penalty for double employment of young persons.
69. Failure to appoint manager.
70. Notice of accidents.
71. Owner, etc., to report to Chief Inspector in certain cases.
72. Obligation of persons employed in a mine.
73. Disobedience of orders.
74. Contravention of law with dangerous results.
75. Prosecution of owner, agent or manager.
76. Determination of owner in certain cases.
77. Exemption of owner, agent or manager from liability in certain cases.
78. Power of court to make orders.
79. Limitation of prosecutions.
80. Cognizance of offences.
81. Reference to Mining Board or Committee in lieu of prosecution in certain cases.

CHAPTER X—MISCELLANEOUS

82. Decision of question whether a mine is under this Act.
83. Power to exempt from operation of Act.
84. Power to alter or rescind orders.
85. Application of Act to mines belonging to Government.
86. Application of certain provisions of Act LXIII of 1948 to mines.
87. Protection of action taken in good faith.
88. Repeal of Act IV of 1923.

MINES ACT, 1952 (XXXV OF 1952)¹

An Act to amend and consolidate the law relating to the regulation of labour and safety in mines.

[15th March, 1952.]

Be it enacted by Parliament as follows:—

CHAPTER I—PRELIMINARY

1. **Short title, extent and commencement.**—(1) This Act may be called the Mines Act, 1952.
- (2) It extends to the whole of India except the State of Jammu and Kashmir.
- (3) It shall come into force on such² date or dates as the Central Government

¹ For Statement of Objects and Reasons, see the Gazette of India, 1949, Part V, p. 436.

² 1st July, 1952, vide Ministry of Labour Notification No. S. R. O. 967 dated the 27th May 1952, published in the Gazette of India, 1952, Part II, Section 3, p. 869.

may, by notification in the Official Gazette, appoint, and different dates may be appointed for different provisions of this Act and for different States but not later than 31st December, 1953.

2. **Definitions.**—In this Act, unless the context otherwise requires,—

- (a) “adolescent” means a person who has completed his fifteenth year but has not completed his eighteenth year;
- (b) “adult” means a person who has completed his eighteenth year;
- (c) “agent”, when used in relation to a mine, means any person, whether appointed as such or not, who acts as the representative of the owner in respect of the management of the mine or of any part thereof, and as such superior to a manager under this Act;
- (d) “Chief Inspector” means the Chief Inspector of Mines appointed under this Act;
- (e) “child” means a person who has not completed his fifteenth year;
- (f) “day” means a period of twenty-four hours beginning at midnight;
- (g) “district magistrate” means, in a presidency-town, the person appointed by the Central Government to perform the duties of a district magistrate under this Act in that town;
- (h) a person is said to be “employed” in a mine who works under appointment by or with the knowledge of the manager, whether for wages or not, in any mining operation, or in cleaning or oiling any part of any machinery used in or about the mine, or in any other kind of work whatsoever incidental to, or connected with, mining operations;
- (i) “Inspector” means an Inspector of Mines appointed under this Act, and includes a district magistrate when exercising any power or performing any duty of an Inspector which he is empowered by this Act to exercise or perform;
- (j) “mine” means any excavation where any operation for the purpose of searching for or obtaining minerals has been or is being carried on, and includes—
 - (i) every shaft in the course of being sunk;
 - (ii) every level and inclined plane in the course of being driven;
 - (iii) all shafts, levels, planes, machinery, works, tramways and sidings, whether above or below ground, in or adjacent to, and belonging to, the mine;
 - (iv) any workshop situated within the precincts of the mine and under the same management and used solely for purposes connected with that mine or a number of mines under the same management;
 - (v) any power station for supplying electricity solely for the purpose of working the mine, or any group of mines; and
 - (vi) unless exempted by the Central Government by notification in the Official Gazette, any premises or part thereof on which any process ancillary to the getting, dressing or preparation for sale of minerals or of coke is being carried on;
- (k) “office of the mine” means an office at the surface of the mine concerned;
- (l) “owner”, when used in relation to a mine, means any person who is the immediate proprietor or lessee or occupier of the mine or of any part thereof and in the case of a mine the business whereof is being carried on by a liquidator or receiver, such liquidator or receiver; but does not include a person who merely receives a royalty, rent or fine from the mine, or is merely the proprietor of the mine, subject to any lease, grant or licence for the working thereof, or is

merely the owner of the soil and not interested in the minerals of the mine; but any contractor for the working of a mine or any part thereof shall be subject to this Act in like manner as if he were an owner, but not so as to exempt the owner from any liability;

- (m) "prescribed" means prescribed by rules, regulations or bye-laws, as the case may be
- (n) "qualified medical practitioner" means a person holding a qualification granted by an authority specified in the Schedule to the Indian Medical Degrees Act, 1916 (VII of 1916), or in the Schedule to the Indian Medical Council Act, 1933 (XXVII of 1933);
- (o) "regulations", "rules" and "bye-laws" mean respectively regulations, rules and bye-laws made under this Act;
- (p) where work of the same kind is carried out by two or more sets of persons working during different periods of the day each of such sets is called a "relay";
- (q) "serious bodily injury" means any injury which involves, or in all probability will involve, the permanent loss of the use of, or permanent injury to, any limb, or the permanent loss of or injury to the sight or hearing, or the fracture of any limb or the enforced absence of the injured person from work for a period exceeding twenty days;
- (r) "week" means the period between midnight on Saturday night and midnight on the succeeding Saturday night.

3. References to enactments not in force in Part B States.—In the application of this Act to any Part B State, unless the context otherwise requires, references to any enactment in force in Part A States but not in force in that Part B State shall be construed as references to the corresponding enactment, if any, in force in that Part B State.

4. References to time of day.—In this Act, references to time of day are references to Indian standard time, being five and a half hours ahead of Greenwich mean time:

Provided that, for any area in which Indian standard time is not ordinarily observed, the Central Government may make rules—

- (a) specifying the area;
- (b) defining the local mean time ordinarily observed therein; and
- (c) permitting such time to be observed in all or any of the mines situated in the area.

CHAPTER II—INSPECTORS AND CERTIFYING SURGEONS

5. Chief Inspector and Inspectors.—(1) The Central Government may, by notification in the Official Gazette, appoint such a person as possesses the prescribed qualifications to be Chief Inspector of Mines for all the territories to which this Act extends and such persons as possess the prescribed qualifications to be Inspectors of Mines subordinate to the Chief Inspector.

(2) No person shall be appointed to be Chief Inspector or an Inspector, or having been appointed shall continue to hold such office, who is or becomes directly or indirectly interested in any mine or mining rights in India.

(3) The district magistrate may exercise the powers and perform the duties of an Inspector subject to the general or special orders of the Central Government:

Provided that nothing in this sub-section shall be deemed to empower a district magistrate to exercise any of the powers conferred by section 22 or section 61.

(4) The Chief Inspector and all Inspectors shall be deemed to be public servants within the meaning of the Indian Penal Code (Act XLV of 1860).

6. Functions of Inspectors.—(1) The Chief Inspector may, by order in writing, prohibit or restrict the exercise by any Inspector named, or any class of Inspectors specified, in the order of any power conferred on Inspectors by this Act, and shall, subject as aforesaid, declare the local area or areas within which, or the group or class of mines with respect to which, Inspectors shall exercise their respective powers.

(2) The Inspectors shall give information to owners, agents and managers of mines, situate within the local area or areas or belonging to the group or class of mines, in respect of which he exercises powers under sub-section (1) as to all regulations and rules which concern them respectively and as to the places where copies of such regulations and rules may be obtained.

7. Powers of Inspectors of Mines.—(1) The Chief Inspector and any Inspector may—

(a) make such examination and inquiry as he thinks fit in order to ascertain whether the provisions of this Act and of the regulations, rules and bye-laws and of any orders made thereunder are observed in the case of any mine;

(b) with such assistants, if any, as he thinks fit, enter, inspect and examine any mine or any part thereof at any time by day or night:

Provided that the power conferred by this clause shall not be exercised in such a manner as unreasonably to impede or obstruct the working of the mine;

(c) examine into, and make inquiry respecting, the state and condition of any mine or any part thereof, the ventilation of the mine, the sufficiency of the bye-laws for the time being in force relating to the mine, and all matters and things connected with or relating to the health, safety and welfare of the persons employed in the mine, and take whether on the precincts of the mine or elsewhere, statements of any person which he may consider necessary for carrying out the purposes of this Act;

(d) exercise such other powers as may be prescribed by regulations made by the Central Government in this behalf:

Provided that no person shall be compelled under this sub-section to answer any question or make any statement tending to incriminate himself.

(2) The Chief Inspector and any Inspector may, if he has reason to believe, as a result of any inspection, examination or inquiry under this section, that an offence under this Act has been or is being committed, search any place and take possession of any register or other record appertaining to the mine, and the provisions of the Code of Criminal Procedure, 1898 (Act V of 1898), shall, so far as may be applicable, apply to any search or seizure under this Act as they apply to any search or seizure made under the authority of a warrant issued under section 98 of that Code.

8. Powers of special officer to enter, measure, etc.—Any person in the service of the Government duly authorised in this behalf by a special order in writing of the Chief Inspector or of an Inspector may, for the purpose of surveying, levelling or measuring any mine, after giving not less than three days' notice to the manager of such mine, enter the mine and may survey, level or measure the mine or any part thereof at any time by day or night:

Provided that, where in the opinion of the Chief Inspector or of an Inspector an emergency exists, he may, by order in writing, authorise any such person to enter the mine for any of the aforesaid purposes without giving any such notice.

9. Facilities to be afforded to Inspectors.—Every owner, agent and manager of a mine shall afford the Chief Inspector and every Inspector and every person authorised under section 8 all reasonable facilities for making any entry, inspection, survey, measurement, examination or inquiry under this Act.

10. Secrecy of information obtained.—(1) All copies of, and extracts from, registers or other records appertaining to any mine and all other information acquired by the Chief Inspector or an Inspector or by any one assisting him, in the course of the inspection of any mine under this Act or acquired by any person authorised under section 8 in the exercise of his duties thereunder, shall be regarded as confidential and shall not be disclosed to any person or authority unless the Chief Inspector or the Inspector considers disclosure necessary to ensure the health, safety or welfare of any person employed in the mine or in any other mine adjacent thereto.

(2) Nothing in sub-section (1) shall apply to the disclosure of any such information (if so required) to—

- (a) any court;
- (b) a Mining Board, Committee, or Court of Inquiry constituted or appointed under section 12, section 13 or section 24 as the case may be;
- (c) an official superior or the owner, agent or manager of the mine concerned;
- (d) a Commissioner for Workmen's Compensation appointed under the Workmen's Compensation Act, 1923 (VIII of 1923);
- (e) the Director, Indian Bureau of Mines.

(3) If the Chief Inspector, or an Inspector or any other person, referred to in sub-section (1) discloses, contrary to the provisions of this section, any such information as aforesaid without the consent of the Central Government, he shall be punishable with imprisonment for a term which may extend to one year, or with fine, or with both.

(4) No court shall proceed to the trial of any offence under this section except with the previous sanction of the Central Government.

11. Certifying Surgeons.—(1) The Central Government may appoint qualified medical practitioners to be certifying surgeons for the purposes of this Act within such local limits or for such mine or class or description of mines as it may assign to them respectively.

(2) Subject to such conditions as the Central Government may think fit to impose, a certifying surgeon may, with the approval of the Central Government, authorise any qualified medical practitioner to exercise all or any of his power under this Act for such period as the certifying surgeon may specify, and references to a certifying surgeon shall be deemed to include references to any qualified medical practitioner when so authorised.

(3) No person shall be appointed to be, or authorised to exercise the powers of, a certifying surgeon, or, having been so appointed or authorised, continue to exercise such powers, who is or becomes the owner, agent or manager of a mine, or is or becomes directly or indirectly interested therein, or in any process or business carried on therein or in any patent or machinery connected therewith, or is otherwise in the employment of the mine.

(4) The certifying surgeon shall carry out such duties as may be prescribed in connection with—

- (a) the examination and certification of adolescents under this Act;
- (b) the examination of persons engaged in a mine in such dangerous occupations or processes as may be prescribed;

- (c) the exercise of such medical supervision as may be prescribed for any mine or class or description of mines where—
 - (i) cases of illness have occurred which it is reasonable to believe are due to the nature of any process carried on or other conditions of work prevailing in the mine;
 - (ii) adolescents are or are to be employed in any work which is likely to cause injury to their health.

CHAPTER III—MINING BOARDS AND COMMITTEES

12. Mining Boards.—(1) The Central Government may constitute for any part of the territories to which this Act extends, or for any group or class of mines, a Mining Board consisting of—

- (a) a person in the service of the Government, not being the Chief Inspector or an Inspector, nominated by the Central Government to act as chairman;
- (b) the Chief Inspector or an Inspector nominated by the Central Government;
- (c) a person, not being the Chief Inspector or an Inspector, nominated by the Central Government;
- (d) two persons nominated by owners of mines or their representatives in such manner as may be prescribed;
- (e) two persons to represent the interest of miners, who shall be nominated in accordance with the following provisions, namely,—
 - (i) if there are one or more registered trade unions having in the aggregate as members not less than one-quarter of the miners, the said persons shall be nominated by such trade union or trade unions in such manner as may be prescribed;
 - (ii) if sub-clause (i) is not applicable and there are one or more registered trade unions having in the aggregate as members not less than one thousand miners, one of the said persons shall be nominated by such trade union or trade unions in such manner as may be prescribed and the other by the Central Government;
 - (iii) if neither sub-clause (i) nor sub-clause (ii) is applicable, the said persons shall be nominated by the Central Government.

Explanation.—In this clause 'miner' means a person employed, otherwise than in a position of supervision or management, in any of the mines for which the Mining Board is constituted.

(2) The chairman shall appoint a person to act as secretary to the Board.

(3) The Central Government may give directions as to the payment of travelling expenses incurred by the secretary or any member of any such Mining Board in the performance of his duty as such secretary or member.

13. Committees.—(1) Where under this Act any question relating to a mine is referred to a Committee, the Committee shall consist of—

- (a) a chairman nominated by the Central Government or by such officer or authority as the Central Government may authorise in this behalf;
- (b) a person nominated by the chairman and qualified by experience to dispose of the question referred to the Committee; and
- (c) two persons to represent the interests of the persons employed in the mine of whom one shall be nominated by the owner, agent or manager of the mine concerned, and the other shall be nominated by the

Central Government in consultation with such organisations of miners employed in the mine as may be recognised for the purpose by that Government.

(2) No Inspector or person employed in or in the management of any mine concerned shall serve as chairman or member of a Committee appointed under this section.

(3) Where an owner, agent or manager fails to exercise his power of nomination under clause (c) of sub-section (1), the Committee may, notwithstanding such failure, proceed to inquire into and dispose of the matter referred to it.

(4) The Committee shall hear and record such information as the Chief Inspector or the Inspector, or the owner, agent or manager of the mine concerned, may place before it, and shall intimate its decision to the Chief Inspector or the Inspector and to the owner, agent or manager of the mine, and shall report its decision to the Central Government.

(5) On receiving such report the Central Government shall pass orders in conformity therewith unless the Chief Inspector or the owner, agent or manager of the mine has lodged an objection to the decision of the Committee, in which case the Central Government may proceed to review such decision and to pass such orders in the matter as it may think fit:

Provided that if an objection is lodged by the Chief Inspector, notice of the same shall be given to the owner, agent or manager of the mine before any orders are passed thereon by the Central Government.

(6) The Central Government may give directions as to the remuneration, if any, to be paid to the members of the Committee or any of them, and as to the payment of expenses of the inquiry including such remuneration.

14. Powers of Mining Boards.—(1) Any Mining Board constituted under section 12 and any Committee constituted under section 13 may exercise such of the powers of an Inspector under this Act as it thinks necessary or expedient to exercise for the purpose of deciding or reporting upon any matter referred to it.

(2) Every Mining Board constituted under section 12 and every Committee appointed under section 13 shall have the powers of a civil court under the Code of Civil Procedure, 1908 (Act V of 1908), for the purpose of enforcing the attendance of witnesses and compelling the production of documents and material objects, and every person required by any such Mining Board or Committee to furnish information before it shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code (Act XLV of 1860).

15. Recovery of expenses.—The Central Government may direct that the expenses of any inquiry conducted by a Mining Board constituted under section 12 or by a Committee appointed under section 13 shall be borne in whole or in part by the owner or agent of the mine concerned, and the amount so directed to be paid may, on application by the Chief Inspector or an Inspector to a magistrate having jurisdiction at the place where the mine is situated or where such owner or agent is for the time being resident, be recovered by the distress and sale of any movable property within the limits of the magistrate's jurisdiction belonging to such owner or agent:

Provided that the owner or his agent has not paid the amount within six weeks from the date of receiving the notice from the Central Government or the Chief Inspector of Mines.

CHAPTER IV—MINING OPERATIONS AND MANAGEMENT OF MINES

16. Notice to be given of mining operations.—(1) The owner, agent or manager of a mine shall, before the commencement of any mining operation, give

to the Chief Inspector, the Director, Indian Bureau of Mines and the district magistrate of the district in which the mine is situate, notice in writing in such form and containing such particulars relating to the mine as may be prescribed.

(2) Any notice given under sub-section (1) shall be so given as to reach the persons concerned at least one month before the commencement of any mining operation.

17. Managers.—Save as may be otherwise prescribed every mine shall be under one manager who shall have the prescribed qualifications and shall be responsible for the control, management and direction of the mine, and the owner or agent of every mine shall appoint himself or some other person, having such qualifications, to be such manager.

18. Duties and responsibilities of owners, agents and managers.—(1) The owner, agent and manager of every mine shall be responsible that all operations carried on in connection therewith are conducted in accordance with the provisions of this Act and of the regulations, rules and bye-laws and of any orders made thereunder.

(2) In the event of any contravention of any such provisions by any person whosoever, the owner, agent and manager of the mine shall each be deemed also to be guilty of such contravention unless he proves that he had taken all reasonable means, by publishing and to the best of his power enforcing those provisions, to prevent such contravention:

Provided that the owner or agent shall not be so deemed if he proves—

- (a) that he was not in the habit of taking, and did not in respect of the matter in question take, any part in the management of the mine; and
- (b) that he had made all the financial and other provisions necessary to enable the manager to carry out his duties; and
- (c) that the offence was committed without his knowledge, consent or connivance.

(3) Save as hereinbefore provided, it shall not be a defence in any proceedings brought against an owner or agent of a mine under this section that a manager of the mine has been appointed in accordance with the provisions of this Act.

CHAPTER V—PROVISIONS AS TO HEALTH AND SAFETY

19. Drinking water.—(1) In every mine, both above and below ground, effective arrangements shall be made to provide and maintain at suitable points conveniently situated for all persons employed therein a sufficient supply of cool and wholesome drinking water.

(2) All such points shall be legibly marked 'DRINKING WATER' in a language understood by a majority of the persons employed in the mine and no such point shall be situated within twenty feet of any washing place, urinal or latrine, unless a shorter distance is approved in writing by the Chief Inspector.

(3) In respect of all mines or any class or description of mines, the Central Government may make rules for securing compliance with the provisions of sub-sections (1) and (2) and for the examination by prescribed authorities of the supply and distribution of drinking water.

20. Conservancy.—(1) There shall be provided, separately for males and females in every mine, a sufficient number of latrines and urinals of prescribed types so situated as to be convenient and accessible to persons employed in the mine at all times.

(2) All latrines and urinals provided under sub-section (1) shall be adequately lighted, ventilated and at all times maintained in a clean and sanitary condition.

(3) The Central Government may specify the number of latrines and urinals to be provided in any mine, in proportion to the number of males and females employed in the mine and provide for such other matters in respect of sanitation in mines (including the obligations in this regard of persons employed in the mine) as it may consider necessary in the interests of the health of the persons so employed.

21. Medical appliances.—(1) In every mine, both above and below ground, there shall be provided and maintained so as to be readily accessible during all working hours first-aid boxes or cupboards equipped with the prescribed contents, and the number of such boxes or cupboards shall not be less than one for every one hundred and fifty persons employed in the mine.

(2) Nothing except the prescribed contents shall be kept in the boxes and cupboards referred to in sub-section (1) and all such boxes and cupboards shall be kept in the charge of any person employed in the mine who is trained in such first-aid treatment as may be prescribed and who shall always be available during the working hours of mine.

(3) In every mine wherein more than five hundred persons are employed, there shall be provided and maintained such ambulances and stretchers as may be prescribed and an ambulance room of the prescribed size containing the prescribed equipment and in the charge of such medical and nursing staff as may be prescribed.

22. Powers of Inspectors when causes of danger not expressly provided against exist or when employment of persons is dangerous.—(1) If in respect of any matter for which no express provision is made in this Act, or in the regulations, rules or bye-laws or in any orders made thereunder it appears to the Chief Inspector or the Inspector that any mine, or any part thereof or any matter, thing or practice in or connected with the mine, or with the control, management or direction thereof, is dangerous to human life or safety, or defective so as to threaten, or tend to, the bodily injury of any person, he may give notice in writing thereof to the owner, agent or manager of the mine, and shall state in the notice the particulars in which he considers the mine, or part thereof, or the matter, thing or practice, to be dangerous or defective and require the same to be remedied within such time as he may specify in the notice.

(2) Without prejudice to the generality of the provisions contained in sub-section (1), the Chief Inspector or the Inspector may, by order in writing addressed to the owner, agent or manager of a mine, prohibit the extraction or reduction of pillars in any part of the mine if, in his opinion, such operation is likely to cause the crushing of pillars or the premature collapse of any part of the workings or otherwise endanger the mine, or if, in his opinion, adequate provision against the outbreak of fire has not been made by providing for the sealing off and isolation of the part of the mine in which such operation is contemplated and for restricting the area that might be affected by a fire, and the provisions of sub-sections (4), (5), (6) and (7), shall apply to an order made under this sub-section as they apply to an order made under sub-section (3).

(3) If the Chief Inspector or an Inspector authorised in this behalf by general or special order in writing by the Chief Inspector is of opinion that there is urgent and immediate danger to the life or safety of any person employed in any mine or part thereof, he may, by an order in writing containing a statement of the grounds of his opinion, prohibit, until the danger is removed, the employment in or about the mine or any part thereof of any person whose employment is not in his opinion reasonably necessary for the purpose of removing the danger.

(4) Where an order has been made under sub-section (3) by an Inspector, the owner, agent or manager of the mine may, within ten days after the receipt

of the order, appeal against the same to the Chief Inspector who may confirm, modify or cancel the order.

(5) The Chief Inspector or the Inspector making a requisition under sub-section (1) or an order under sub-section (3), and the Chief Inspector making an order (other than an order of cancellation) in appeal under sub-section (4) shall forthwith report the same to the Central Government.

(6) If the owner, agent or manager of the mine objects to a requisition made under sub-section (1) or to an order made by the Chief Inspector under sub-section (3), or sub-section (4), he may, within twenty days after the receipt of the notice containing the requisition or of the order or after the date of the decision of the appeal, as the case may be, send his objection in writing stating the grounds thereof, to the Central Government which shall refer the same to a Committee.

(7) Every requisition made under sub-section (1), or order made under sub-section (3), or sub-section (4) to which objection is made under sub-section (6), shall be complied with pending the receipt at the mine of the decision of the Committee:

Provided that the Committee may, on the application of the owner, agent or manager, suspend the operation of a requisition under sub-section (1), pending its decision on the objection.

(8) Nothing in this section shall affect the powers of a magistrate under section 144 of the Code of Criminal Procedure, 1898 (Act V of 1898).

23. Notice to be given of accidents.—(1) Where there occurs in or about a mine—

- (a) an accident causing loss of life or serious bodily injury, or
- (b) an accidental explosion, ignition, spontaneous heating, outbreak of fire or irruption of water, or
- (c) an accidental breakage of ropes, chains or other gear by which men are lowered or raised, or
- (d) an accidental overwinding of cages, while men are being lowered or raised, or
- (e) a premature collapse of any part of the workings,

the owner, agent or manager of the mine shall give notice of the occurrence to such authority, in such form and within such time as may be prescribed, and he shall simultaneously post one copy of the notice on a special notice board in the prescribed manner at a place where it may be inspected by trade union officials and shall ensure that the notice is kept on the board for not less than two months from the date of such posting.

(2) Where a notice given under sub-section (1) relates to an accident causing loss of life, the authority shall make an inquiry into the occurrence within two months of the receipt of the notice and, if the authority is not the Inspector, he shall cause the Inspector to make an inquiry within the said period.

(3) The Central Government may, by notification in the Official Gazette, direct that accidents other than those specified in sub-section (1), which cause bodily injury resulting in the enforced absence from work of the person injured for a period exceeding forty-eight hours shall be entered in a register in the prescribed form or shall be subject to the provisions of sub-section (1).

(4) A copy of the entries in the register referred to in sub-section (3) shall be sent by the owner, agent, or manager of the mine, within fourteen days after the 30th day of June and the 31st day of December in each year, to the Chief Inspector.

24. Power of Government to appoint Court of Inquiry in cases of accidents.—

(1) When any accident occurs in or about a mine causing loss of life or serious

bodily injury or when an accidental explosion, ignition, spontaneous heating, outbreak of fire, irruption of water, breakage of ropes, chains or other gear by which men are lowered or raised, or when an accidental overwinding of cages occurs in or about a mine while men are being lowered or raised, the Central Government may, if it is of opinion that a formal inquiry into the causes of and circumstances attending the accident ought to be held, appoint a competent person to hold such inquiry and may also appoint any person or persons possessing legal or special knowledge to act as assessor or assessors in holding the inquiry.

(2) The person appointed to hold any such inquiry shall have all the powers of a civil court under the Code of Civil Procedure, 1908 (Act V of 1908), for the purpose of enforcing the attendance of witnesses and compelling the production of documents and material objects; and every person required by such person as aforesaid to furnish any information shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code (Act XLV of 1860).

(3) Any person holding an inquiry under this section may exercise such of the powers of an Inspector under this Act as he may think it necessary or expedient to exercise for the purposes of the inquiry.

(4) The person holding an inquiry under this section shall make a report to the Central Government stating the causes of the accident and its circumstances, and adding any observations which he or any of the assessors may think fit to make.

25. Notice of certain diseases.—(1) Where any person employed in a mine contracts any disease notified by the Central Government in the Official Gazette as a disease connected with mining operations, the owner, agent or manager of the mine, as the case may be, shall send notice thereof to the Chief Inspector and to such other authorities, in such form and within such time as may be prescribed.

(2) If any medical practitioner attends on a person who is or has been employed in a mine and who is or is believed by the medical practitioner to be suffering from any disease notified under sub-section (1), the medical practitioner shall without delay send a report in writing to the Chief Inspector stating—

(a) the name and address of the patient,

(b) the disease from which the patient is or is believed to be suffering, and

(c) the name and address of the mine in which the patient is or was last employed.

(3) Where the report under sub-section (2) is confirmed to the satisfaction of the Chief Inspector by the certificate of a certifying surgeon or otherwise that the person is suffering from a disease notified under sub-section (1), the Chief Inspector shall pay to the medical practitioner such fee as may be prescribed, and the fee so paid shall be recoverable as an arrear of land revenue from the owner, agent or manager of the mine in which the person contracted the disease.

(4) If any medical practitioner fails to comply with the provisions of sub-section (2), he shall be punishable with fine which may extend to fifty rupees.

26. Power to direct investigation of causes of disease.—(1) The Central Government may, if it considers it expedient to do so, appoint a competent person to inquire into and report to it on any case where a disease notified under sub-section (1) of section 25 has been or is suspected to have been contracted in a mine, and may also appoint one or more persons possessing legal or special knowledge to act as assessors in such inquiry.

(2) The provisions of sub-sections (2) and (3) of section 24 shall apply to an inquiry under this section in the same manner as they apply to any inquiry under that section.

27. Publication of reports.—The Central Government may cause any report submitted by a Committee under section 13 or any report or extracts from any report submitted to it under section 26, and shall cause every report submitted by a Court of Inquiry under section 24 to be published at such time and in such manner as it may think fit.

CHAPTER VI—HOURS AND LIMITATION OF EMPLOYMENT

28. Weekly day of rest.—No person shall be allowed to work in a mine on more than six days in any one week.

29. Compensatory days of rest.—(1) Where in pursuance of action under section 38 or as a result of exempting any mine or the persons employed therein from the provisions of section 28, any person employed therein is deprived of any of the weekly days of rest for which provision is made in section 28, he shall be allowed, within the month in which such days of rest were due to him or within the two months immediately following that month, compensatory days of rest equal in number to the days of rest of which he has been deprived.

(2) The Central Government may prescribe the manner in which the days of rest for which provision is made in sub-section (1) shall be allowed.

30. Hours of work above ground.—(1) No adult employed above ground in a mine shall be required or allowed to work for more than forty-eight hours in any week or for more than nine hours in any day.

(2) The periods of work of any such adult shall be so arranged that, along with his interval for rest, they shall not in any day spread over more than twelve hours, and that he shall not work for more than five hours continuously before he has had an interval for rest of at least half an hour:

Provided that the Chief Inspector may, for reasons to be recorded, increase the period of spread over to fourteen hours in any day.

(3) No person belonging to two or more relays shall be allowed to do work of the same kind above ground at the same moment:

Provided that, for the purposes of this sub-section, persons shall not be deemed to belong to separate relays by reason only of the fact that they receive their intervals for rest at different times.

31. Hours of work below ground.—(1) No adult employed below ground in a mine, except a pump-minder, an onsetter or attendant of continuously operated machinery, shall be allowed to work for more than forty-eight hours in any week or for more than eight hours in any day.

(2) No adult excepted under sub-section (1) shall be allowed to work for more than fifty-four hours in any week or for more than nine hours in any day.

(3) Work of the same kind shall not be carried on below ground in any mine for a period spreading over more than eight hours in the case of adults referred to in sub-section (1), and nine hours in the case of adults referred to in sub-section (2), in any day except by a system of relays so arranged that the periods of work for each relay are not spread over more than the hours stipulated in sub-section (1) or sub-section (2), as the case may be.

(4) No adult employed in a mine shall be allowed to be in any part of a mine below ground, except during the periods of work shown in respect of him in the register kept under sub-section (1) of section 48.

32. Special provision for night relays.—Where a worker works in a relay whose period of work extends over midnight, the ensuing day for him shall be deemed to be the period of twenty-four hours beginning at the end of the period

of work fixed for the relay, and the hours he has worked after midnight shall be counted towards the previous day.

33. Extra wages for overtime.—(1) Where a person employed in a mine works therein for more than forty-eight hours ³[in any week] whether above or below ground, he shall in respect of such overtime work be entitled to wages at the rate of twice his ordinary rate of wages if he works below ground, and at one and a half times that rate if he works above ground.

(2) Where any person employed in a mine is paid on piece-rate basis, the Central Government shall, in consultation with the employer concerned and the representatives of the persons employed in the mine, fix for the purposes of this section time rates which shall, as nearly as possible be equivalent to the average rate of earnings of the persons so employed, and the rates so fixed shall be deemed to be the ordinary rates of wages of such persons.

(3) For the purposes of this section 'ordinary rate of wages' means the basic wages *plus* such allowances including the cash equivalent of the advantage accruing through the sale on a concessional basis of foodgrains and other articles as persons employed in a mine may, for the time being, be entitled to, but does not include a bonus.

(4) The Central Government may prescribe the registers to be maintained in a mine for the purpose of securing compliance with the provisions of this section.

34. Prohibition of employment of certain persons.—No person shall be allowed to work in a mine who has already been working in any other mine within the preceding twelve hours.

35. Limitation of periods of overtime work.—Save in respect of cases falling within clause (a) of section 39, no person employed in a mine shall be allowed to work for more than ten hours in any day, inclusive of overtime, nor shall the total number of hours of his overtime work exceed fifty for any one quarter. Provided that—

- (i) subject to the previous approval of the Chief Inspector, the daily maximum hours specified in sections 30 and 31 may be exceeded in order to facilitate a change of shifts;
- (ii) an adult, engaged in work which for technical reasons must be continuous throughout the day, may be employed for fifty-six hours a week.

Explanation.—In this section 'quarter' means a period of three consecutive months beginning with the 1st day of January, April, July or October.

36. Notices regarding hours of work.—(1) The manager of every mine shall cause to be posted outside the office of the mine a notice in the prescribed form stating the time of the commencement and of the end of work at the mine and, if it is proposed to work by a system of relays, the time of the commencement and of the end of work for each relay.

(2) In the case of a mine at which mining operations commence after the commencement of this Act, the notice referred to in sub-section (1) shall be posted not less than seven days before the commencement of work.

(3) The notice referred to in sub-section (1) shall also state the time of the commencement and of the intervals for rest for persons employed above ground and a copy thereof shall be sent to the Chief Inspector, if he so requires.

(4) Where it is proposed to make any alteration in the time fixed for the commencement or for the end of work in the mine generally or for any relay or

³ These words were inserted by the Repealing and Amending Act, 1953 (XLII of 1953.)

in the rest intervals fixed for persons employed above ground, an amended notice in the prescribed form shall be posted outside the office of the mine not less than seven days before the change is made, and a copy of such notice shall be sent to the Chief Inspector not less than seven days before such change.

(5) No person shall be allowed to work in a mine otherwise than in accordance with the notice required by sub-section (1).

37. Supervising staff.—Nothing in section 28, section 30, section 31, section 34 or ⁴[sub-section (5) of section 36] shall apply to persons who may by rules be defined to be persons holding positions of supervision or management or employed in a confidential capacity.

38. Exemption from provisions regarding employment.—(1) In case of an emergency involving serious risk to the safety of the mine or of persons employed therein, or in case of an accident, whether actual or apprehended, or in case of any act of God or in case of any urgent work to be done to machinery, plant or equipment of the mine as the result of breakdown of such machinery, plant or equipment, the manager may, subject to the provisions of section 22 and in accordance with the rules under section 39, permit persons to be employed in contravention of section 28, section 30, section 31, section 34 or ⁴[sub-section (5) of section 36], on such work as may be necessary to protect the safety of the mine or of the persons employed therein:

Provided that, in case of any urgent work to be done to machinery, plant or equipment under this section, the manager may take the action permitted by this section, although the production of coal would thereby be incidentally affected, but any action so taken shall not exceed the limits necessary for the purpose of avoiding serious interference with the ordinary working of the mine.

(2) Every case in which action has been taken by the manager under sub-section (1), shall be recorded together with the circumstances relating thereto and a report thereof shall also be made to the Chief Inspector or the Inspector.

39. Power to make exempting rules.—The Central Government may make rules providing for the exemption, to such extent and subject to such conditions as may be specified, from the provisions of sections 28, 30, 31, 34 or ⁵[sub-section (5) section 36],—

- (a) of all or any of the persons employed in a mine, where an emergency involving serious risk to the safety of the mine or of the persons employed therein is apprehended;
- (b) of all or any of the persons so employed, in case of an accident, actual or apprehended;
- (c) of all or any of the persons engaged in urgent repairs; and
- (d) of all or any of the persons employed in any work which for technical reasons must be carried on continuously throughout the day.

40. Employment of adolescents.—(1) No adolescent shall be allowed to work in any part of a mine which is below ground unless—

- (a) a medical certificate in the prescribed form granted to the adolescent by a certifying surgeon certifying that he is fit for work as an adult is in the custody of the manager of the mine;
- (b) the adolescent carries, while at work, a token giving a reference to such certificate;

⁴ Substituted by the Repealing and Amending Act, 1953 (XLII of 1953.)

⁵ Substituted, *ibid.*

(c) the adolescent has an interval for rest of at least half an hour after every four and a half hours of continuous work on any day.

(2) Notwithstanding anything contained in this Act, no adolescent who has been granted a certificate under sub-section (1) shall be employed in any mine except between the hours of 6 A.M. and 6 P.M.:

Provided that the Central Government may, by notification in the Official Gazette, vary the hours of employment of such adolescent in respect of any mine or class of mines so however that no employment of any such adolescent between the hours of 10 P.M. and 5 A.M. is permitted thereby.

41. Certificate of fitness.—(1) A certificate of fitness granted or renewed for the purposes of section 40—

(a) shall be valid only for a period of twelve months from the date thereof;

(b) may be subject to specified conditions in regard to employment generally or the nature of the work in which the adolescent may be employed.

(2) A certifying surgeon shall revoke a certificate granted or renewed under section 40, if in his opinion the holder of it is no longer fit for work in the capacity stated therein in a mine.

(3) Where a certifying surgeon refuses to grant or renew a certificate or revokes a certificate, he shall, if so required by the persons concerned, state his reasons in writing for so doing.

(4) Where a certificate under section 40 with reference to any adolescent is granted or renewed subject to such conditions as are referred to in clause (b) of sub-section (1), an adolescent shall not be required or allowed to work in any mine except in accordance with those conditions.

(5) The adolescent or his parents shall not be liable to pay any part of the expenses of any medical examination under section 40 in all cases where the application for a medical certificate is accompanied by a document signed by the manager of a mine stating that the adolescent to be examined will be employed in the mine if certified to be fit for work therein or the application is made by the manager of the mine in which the adolescent desires to be employed.

42. Effect of certificate of fitness granted to adolescents.—An adolescent, who has been granted a certificate of fitness to work in a mine as an adult under section 40, and who while actually employed in a mine carries a token giving a reference to such certificate, shall be deemed to be an adult for the purposes of this Act.

43. Power to require medical examination.—Where an Inspector is of opinion that any person employed in a mine without a certificate of fitness is an adolescent or that an adolescent working in a mine with a certificate of fitness is no longer fit to work in the capacity stated in the certificate, he may serve on the manager of the mine a notice requiring that such person or adolescent, as the case may be, shall be examined by a certifying surgeon and such person or adolescent shall not, if the Inspector so directs, be employed or permitted to work in any mine until he has been so examined and has been granted a certificate of fitness, or a fresh certificate of fitness as the case may be, under section 40, or has been certified by the certifying surgeon examining him not to be an adolescent.

44. Working hours for adolescents not certified to be fit for work as adults.—(1) No adolescent who has not been granted a medical certificate certifying that he is fit for work as an adult shall be employed or permitted to be employed above ground or in any workshop or power station in a mine or in any open cast workings in a mine—

(a) for more than four and a half hours in any day; or

(b) between the hours of 6 P.M. and 6 A.M.

(2) The period of work of all such adolescents employed in a mine shall be limited to two shifts which shall not overlap or spread over more than five hours each, and each such adolescent shall be employed in only one of the relays which shall not, except with the previous permission in writing to the Chief Inspector, be changed more frequently than once in a period of thirty days.

(3) The provisions of section 28 shall apply to such adolescents and notwithstanding anything contained in sub-section (1) of section 38 or in section 39, no exemption from the provisions of section 28 shall be granted in respect of any adolescent.

45. Employment of children.—(1) No child shall be employed in any mine, nor shall any child be allowed to be present in any part of a mine which is below ground or in any open excavation in which any mining operation is being carried on.

(2) After such date as the Central Government may, by notification in the Official Gazette, appoint in this behalf, no child shall be allowed to be present in any part of a mine above ground where any operation connected with or incidental to any mining operation is being carried on.

46. Employment of women.—No woman shall be employed at any time of the day or night in any part of a mine which is below the adjacent ground level, and no woman shall be employed in any mine above ground except between the hours of 6 A.M. and 7 P.M.:

Provided that the Central Government may, by notification in the Official Gazette, vary the hours of employment of women, above ground in respect of any mine or class or description of mine, so however that no employment of any woman between the hours of 10 P.M. and 5 A.M. is permitted thereby.

47. Disputes as to age.—(1) If any question arises between the Chief Inspector or Inspector and the manager of any mine as to whether any person is a child or an adolescent the question shall, in the absence of a certificate as to the age of such person granted in the prescribed manner, be referred by the Chief Inspector or the Inspector for decision to a qualified medical practitioner.

(2) Every certificate as to the age of a person which has been granted in the prescribed manner and any certificate granted by a qualified medical practitioner on a reference under sub-section (1) shall for the purposes of this Act, be conclusive evidence as to the age of the person to whom it relates.

48. Registers of persons employed.—(1) For every mine there shall be kept in the prescribed form and place a register of all persons employed in the mine showing in respect of each such person—

- (a) the name of the employee, with the name of his father or, of her husband, as the case may be, and such other particulars as may be necessary for purposes of identification;
- (b) the age and sex of the employee;
- (c) the nature of his employment whether above ground, below ground or open cast workings, and the date of commencement thereof;
- (d) the periods of work fixed for him;
- (e) the intervals for rest, if any, and the days of rest to which he is entitled;
- (f) in the case of an adolescent, reference to the certificate of fitness granted under section 40;
- (g) where work is carried on by a system of relays, the relay to which he belongs and the hours of relay, that is to say, the period of work fixed for him;

(h) such other particulars as may be prescribed;

and the relevant entries shall be authenticated by the signature or the thumb impression of the person concerned.

(2) The entries in the register prescribed by sub-section (1) shall be such that workers working in accordance therewith would not be working in contravention of any of the provisions of this Chapter.

(3) No person shall be employed in a mine until the particulars required by sub-section (1) have been recorded in the register in respect of such person and no person shall be employed except during the periods of work shown in respect of him in the register.

(4) For every mine, other than a mine which is exempted by the Central Government by general or special order, there shall be kept in the prescribed form and place separate registers showing in respect of each person employed in the mine, (a) below ground, (b) in open cast workings and (c) above ground—

(a) the name of the employee;

(b) the nature of his employment;

(c) where work is carried on by a system of relays, the relay to which he belongs and the hours of relay, that is to say, the period of work fixed for him.

(5) The register of persons employed below ground referred to in sub-section (4) shall show at any moment the name of every person who is then present below ground in the mine.

CHAPTER VII—LEAVE WITH WAGES

49. **Leave defined.**—For the purposes of this Chapter leave shall not, except as provided in section 51, include weekly days of rest or holidays for festivals or other similar occasions.

50. **Application of Chapter.**—The provisions of this Chapter shall not operate to the prejudice of any rights to which a person employed in a mine may be entitled under any other law for the time being in force or under the terms of any award, agreement or contract of service, and, where any such award, agreement or contract of service provides for a longer leave with wages than is provided in this Chapter, such person shall be entitled to such longer leave only.

51. **Annual leave with wages.**—(1) Every person employed in a mine who has completed a period of twelve months' continuous service therein shall be allowed, during the subsequent period of twelve months, leave with full pay or wages based on the average pay or wages for the twelve months immediately preceding the leave, as provided in section 52, and such leave shall be calculated at the rate of—

(i) if he is an employee paid by the month, fourteen days for such period of twelve months;

(ii) if he is an employee paid by the week, or a loader, or other person employed below ground on a piece-rate basis, seven days for such period of twelve months.

(2) The twelve months' continuous service referred to in sub-section (1) shall be deemed to have been completed,—

(a) in the case of a loader, or other person employed below ground on a piece-rate basis, if he has during the said period of twelve months put in not less than one hundred and ninety attendances at the mine;

(b) in the case of a person employed above ground on a piece-rate basis or in the case of any other person who is paid by the month, week or

day, if he has during the said period of twelve months put in not less than two hundred and sixty-five attendances at the mine.

Explanation.—In either of the above cases the period of leave shall be inclusive of the weekly days of rest and any holiday (if granted) which may occur during such period.

(3) If any person employed in a mine who is paid by the month does not in any one such period of twelve months take the whole of the leave allowed to him under sub-section (1), any leave not taken by him shall be added to the leave to be allowed to him under that sub-section in the succeeding period of twelve months:

Provided that the total number of days of leave which may be accumulated by any such person shall not exceed twenty-eight days in all.

(4) Any such person may, during any such period of twelve months, apply in writing to the manager of the mine, not less than fifteen full working days before the day on which he wishes his leave to begin, for all leave or any portion thereof allowable to him during that period under sub-sections (1) and (3).

(5) No application for leave made in accordance with the provisions of this section shall ordinarily be refused, unless the authority empowered to grant the leave is of the opinion that owing to the exigencies of the situation the leave should be refused.

(6) If any person entitled to leave under this section is discharged from the mine before he has taken or has been allowed to take the entire leave to which he is entitled, the owner, agent or manager of the mine shall pay to him the pay or wages payable under section 51 in respect of the leave not taken and such payment shall be made before the expiry of the second working day after the day on which his employment is terminated.

Explanation 1.—For the purposes of this section, a person shall be deemed to have completed a period of continuous service in a mine, notwithstanding any interruption of service during that period brought about by—

- (i) sickness, accident or authorised leave not exceeding in the aggregate one-sixth of that period, or
- (ii) a strike, which is not an illegal strike, or
- (iii) a lock-out, or
- (iv) one or more periods of involuntary unemployment not exceeding in the aggregate one-twelfth of the period, or
- (v) leave admissible or granted under any other law.

Explanation 2.—Authorised leave shall include any casual absence due to any reasonable cause:

Provided that the person concerned, within a week from the commencement of the absence, gives the reasons for such absence in writing to the owner, agent or manager of the mine, and any such period of authorised leave may include periods of unauthorised leave not exceeding in the aggregate one-thirty-sixth of the period of continuous service, but not weekly days of rest allowed under section 28 which occurs at the beginning or end of an interruption brought about by the leave.

Explanation 3.—"Illegal strike" means a strike which is an illegal strike within the meaning of section 24 of the Industrial Disputes Act, 1947 (XIV of 1947) or of any other law for the time being in force.

52. Wages during leave period.—(1) For the leave allowed to a loader, or other person employed below ground on a piece-rate basis, he shall be paid at a

rate equal to the daily average of his earnings for the month of December prior to his leave:

Provided that if no such average earnings are available, then the average shall be computed on the basis of the daily average earnings of all persons similarly employed for the same month, and for the purpose of such computation the cash equivalent of the advantage accruing to such persons through the free issue of food grains and any compensation in cash drawn by them during the said month shall be taken into account.

(2) For the leave allowed to a person employed in a mine who is paid by the month or week he shall be paid at a rate equal to his normal daily wages during the week preceding his leave, and in computing such wages the cash equivalent of the advantage accruing to him through the free issue of food grains and any compensation in cash drawn by him shall also be taken into account.

53. Payment in advance in certain cases.—Any person employed in a mine who has been allowed leave for not less than ten days in the case of a person paid by the month, and five days, either in the case of a person paid by the week or in the case of a loader, or other person employed below ground on a piece-rate basis, shall, before his leave begins, be paid the wages due for the period of the leave allowed.

54. Power of Inspector to act for an employee.—Any Inspector may institute proceedings on behalf of any person employed in a mine to recover any sum required to be paid by an employer under this Chapter, which has not been paid by the employer.

55. Power to make rules.—The Central Government may, by rules, prescribe the maintenance by owners, agents or managers of mines of registers showing such particulars as may be required for the purposes of this Chapter and requiring such registers to be made available for examination by Inspectors.

56. Power to exempt mines.—Where the Central Government is satisfied that the leave rules applicable to persons employed in any mine provide benefits which in its opinion are not less favourable than those provided for in this Chapter, it may, by order in writing and subject to such conditions as may be specified therein, exempt the mine from all or any of the provisions of this Chapter.

CHAPTER VIII—REGULATIONS, RULES AND BYE-LAWS

57. Power of Central Government to make regulations.—The Central Government may, by notification in the Official Gazette, make regulations consistent with this Act for all or any of the following purposes, namely:—

- (a) for prescribing the qualifications required for appointment as Chief Inspector or Inspector;
- (b) for prescribing and regulating the duties and powers of the Chief Inspector and of Inspectors in regard to the inspection of mines under this Act;
- (c) for prescribing the duties of owners, agents and managers of mines and of persons acting under them, and for prescribing the qualifications of managers of mines and of persons acting under them;
- (d) for requiring facilities to be provided for enabling managers of mines and other persons acting under them to efficiently discharge their duties;
- (e) for regulating the manner of ascertaining, by examination or otherwise, the qualifications of managers of mines and persons acting under them, and the granting and renewal of certificates of competency;

- (f) for fixing the fees, if any, to be paid in respect of such examinations and of the grant and renewal of such certificates;
- (g) for determining the circumstances in which and the conditions subject to which it shall be lawful for more mines than one to be under a single manager, or for any mine or mines to be under a manager not having the prescribed qualifications;
- (h) for providing for the making of inquiries into charges of misconduct or incompetency on the part of managers of mines and persons acting under them and for the suspension and cancellation of certificates of competency;
- (i) for regulating, subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and of any rules made thereunder, the storage, conveyance and use of explosives;
- (j) for prohibiting, restricting or regulating the employment of women in mines or in any class of mines or on particular kinds of labour which are attended by danger to the life, safety or health of such women and for limiting the weight of any single load that may be carried by a woman;
- (k) for providing for the safety of the persons employed in a mine, their means of entrance thereto and exit therefrom, the number of shafts or outlets to be furnished, and the fencing of shafts, pits, outlets, pathways and subsidences;
- (l) for prohibiting the employment in a mine either as manager or in any other specified capacity of any person except persons paid by the owner of the mine and directly answerable to the owner or manager of the mine;
- (m) for providing for the safety of the roads and working places in mines, including the siting, maintenance and extraction of pillars and the maintenance of sufficient barriers between mine and mine;
- (n) for the inspection of workings and sealed off fire-areas in a mine, and for the restriction of workings under rivers, tanks, water-courses, public roads and buildings and for requiring due precaution to be taken against the onrush of water into, outbreak of fire in or premature collapse of, any workings;
- (o) for providing for the ventilation of mines and the action to be taken in respect of dust, fire, and inflammable and noxious gases, including precautions against spontaneous combustion, underground fire and coal dust;
- (p) for providing for the care, and the regulation of the use, of all machinery and plant and of all electrical apparatus used for signalling or for other purposes of communication;
- (q) for providing for the safety of persons present on haulage roads and for restricting the use of certain classes of locomotives underground;
- (r) for providing for proper lighting of mines and regulating the use of safety lamps therein and for the search of persons entering a mine in which safety lamps are in use;
- (s) for providing against explosions or ignitions or irruptions of or accumulations of water in mines and against danger arising therefrom and for prohibiting, restricting or regulating the extraction of minerals in circumstances likely to result in the premature collapse of or to result

in or to aggravate the collapse of or irruptions of water or ignitions in mines;

- (t) for prescribing the notices of accidents and dangerous occurrences, and the notices, reports and returns of mineral output, persons employed and other matters provided for by regulations, to be furnished by owners, agents and managers of mines, and for prescribing the forms of such notices, returns and reports, the persons and authorities to whom they are to be furnished, the particulars to be contained in them, and the time within which they are to be submitted;
- (u) for prescribing the plans to be kept by owners, agents and managers of mines and the manner and places in which such plans are to be kept for purposes of record and for the submission of copies thereof to the Chief Inspector;
- (v) for regulating the procedure on the occurrence of accidents or accidental explosions or ignitions in or about mines;
- (w) for prescribing the form of, and the particulars to be contained in, the notice to be given by the owner, agent or manager of a mine under section 16;
- (x) for prescribing the notice to be given by the owner, agent or manager of a mine before mining operations are commenced at or extended to any point within fifty yards of any railway subject to the provisions of the Indian Railways Act, 1890 (IX of 1890), or of any public work or classes of public works which the Central Government may, by general or special order, specify in this behalf;
- (y) for the protection from injury, in respect of any mine when the workings are discontinued, of property vested in the Government or any local authority or railway company as defined in the Indian Railways Act, 1890 (IX of 1890);
- (z) for requiring the fencing of any mine or part of a mine or any quarry, incline, shaft, pit or outlet, whether the same is being worked or not, or any dangerous or prohibited area, subsidence, haulage, tramline or pathway, where such fencing is necessary for the protection of the public; and
- (zz) any other matter which has to be or may be prescribed.

58. Power of Central Government to make rules.—The Central Government may, by notification in the Official Gazette, make rules consistent with this Act for all or any of the following purposes, namely:—

- (a) for providing for the appointment of Chairman and members of Mining Boards, and for regulating the procedure of such Boards;
- (b) for prescribing the form of the register referred to in sub-section (3) of section 23;
- (c) for providing for the appointment of Courts of Inquiry under section 24, for regulating the procedure and powers of such Courts, for the payment of travelling allowance to the members, and for the recovery of the expenses of such Courts from the manager, owner or agent of the mine concerned;
- (d) for requiring the maintenance in mines wherein any women are employed or were employed on any day of the preceding twelve months of suitable rooms to be reserved for the use of children under the age of six years belonging to such women, and for prescribing, either generally or with particular reference to the number of women em-

ployed in the mine, the number and standards of such rooms, and the nature and extent of the amenities to be provided and the supervision to be exercised therein;

- (e) for requiring the maintenance at or near pit-heads of bathing places equipped with shower baths and of locker-rooms for the use of men employed in mines and of similar and separate places and rooms for the use of women in mines where women are employed, and for prescribing, either generally or with particular reference to the numbers of men and women ordinarily employed in a mine, the number and standards of such places and rooms;
- (f) for prescribing the standard of sanitation to be maintained and the scale of latrine and urinal accommodation to be provided at mines, the provision to be made for the supply of drinking-water, the supply and maintenance of medical appliances and comforts, and the training of men in ambulance work;
- (g) for prohibiting the possession or consumption of intoxicating drinks or drugs in a mine and the entry or presence therein of any person in a drunken state;
- (h) for prescribing the forms of notices required under section 36, and for requiring such notices to be posted also in specified languages;
- (i) for defining the persons who shall, for the purpose of section 37, be deemed to be persons holding positions of supervision or management or employed in a confidential capacity;
- (j) for prohibiting the employment in mines of persons or any class of persons who have not been certified by a qualified medical practitioner to have completed their fifteenth year, and for prescribing the manner and the circumstances in which such certificates may be granted and revoked;
- (k) for prescribing the form of the certificate of fitness required by section 40, the conditions subject to which and the circumstances in which they may be granted and the circumstances in which they may be revoked;
- (l) for prescribing the form of registers required by section 48;
- (m) for prescribing abstracts of this Act and of the regulations and rules and the language in which the abstracts and bye-laws shall be posted as required by sections 61 and 62;
- (n) for requiring notices, returns and reports in connection with any matters dealt with by rules to be furnished by owners, agents and managers of mines, and for prescribing the forms of such notices, returns and reports, the persons and authorities to whom they are to be furnished, the particulars to be contained in them, and the times, within which they are to be submitted;
- (o) for requiring the provision and maintenance in mines, wherein more than one hundred and fifty persons are ordinarily employed, of adequate and suitable shelters for taking food with provision for drinking water;
- (p) for requiring the provision and maintenance in any mine specified in this behalf by the Chief Inspector or Inspector, wherein more than two hundred and fifty persons are ordinarily employed, of a canteen or canteens for the use of such persons;
- (q) for requiring the employment in every mine wherein five hundred or more persons are ordinarily employed, of such number of Welfare

Officers as may be specified and for prescribing the qualifications and the terms and conditions of, and the duties to be performed by, such Welfare Officers;

- (r) for requiring the establishment of central rescue stations for groups of specified mines or for all mines in a specified area, and prescribing how and by whom such stations shall be established;
- (s) for providing for the management of central rescue stations, and regulating the constitution, powers and functions of, and the conduct of business by the authorities (which shall include representatives of the owners and managers of, and of the miners employed in, the mines or groups of mines concerned) charged with such management;
- (t) for prescribing the position, equipment, control, maintenance and functions of central rescue stations;
- (u) for providing for the levy and collection of a duty of excise (at a rate not exceeding six pies per ton) on coke and coal produced in and despatched from mines specified under clause (r) in any group or included under clause (r) in any specified area, the utilisation of the proceeds thereof for the creation of a central rescue station fund for such group or area and the administration of such funds;
- (v) for providing for the formation, training, composition and duties of rescue brigades; and generally for the conduct of rescue work in mines; and
- (w) generally to provide for any matter not provided for by this Act or the regulations, provision for which is required in order to give effect to this Act.

59. Prior publication of regulations and rules.—(1) The power to make regulations and rules conferred by sections 57 and 58 is subject to the condition of the regulations and rules being made after previous publication.

(2) The date to be specified in accordance with clause (3) of section 23 of the General Clauses Act, 1897 (X of 1897), as that after which a draft of regulations or rules proposed to be made will be taken under consideration, shall not be less than three months from the date on which the draft of the proposed regulations or rules is published for general information.

(3) Before the draft of any regulation is published under this section it shall be referred to every Mining Board which is, in the opinion of the Central Government concerned with the subject dealt with by the regulation, and the regulation shall not be so published until each such Board has had a reasonable opportunity of reporting as to the expediency of making the same and as to the suitability of its provisions.

(4) No rule shall be made unless the draft thereof has been referred to every Mining Board constituted in that part of the territories to which this Act extends which is affected by the rule, and unless each such Board has had a reasonable opportunity of reporting as to the expediency of making the same and as to the suitability of its provisions.

(5) Regulations and rules shall be published in the Official Gazette and, on such publication, shall have effect as if enacted in this Act.

(6) The provisions of sub-sections (1), (2) and (4) shall not apply to the first occasion on which rules referred to in clause (d) or clause (e) of section 58 are made.

(7) The regulations and rules made under sections 57 and 58 shall be laid before Parliament, as soon as may be, after they are made.

60. Power to make regulations without previous publication.—Notwithstanding anything contained in sub-sections (1), (2) and (3) of section 59, regulations under clause (i) and clauses (k) to (s) excluding clause (l) of section 57 may be made without previous publication and without previous reference to Mining Boards, if the Central Government is satisfied that for the prevention of apprehended danger or the speedy remedy of conditions likely to cause danger it is necessary in making such regulations to dispense with the delay that would result from such publication and reference:

Provided that any regulations so made shall not remain in force for more than two years from the making thereof.

61. Bye-laws.—(1) The owner, agent or manager of a mine may, and shall, if called upon to do so by the Chief Inspector or Inspector, frame and submit to the Chief Inspector or Inspector a draft of such bye-laws, not being inconsistent with this Act or any regulations or rules for the time being in force, for the control and guidance of the persons acting in the management of, or employed in, the mine as such owner, agent or manager may deem necessary to prevent accidents and provide for the safety, convenience and discipline of the persons employed in the mine.

(2) If any such owner, agent or manager—

(a) fails to submit within two months a draft of bye-laws after being called upon to do so by the Chief Inspector or Inspector, or

(b) submits a draft of bye-laws which is not in the opinion of the Chief Inspector or Inspector sufficient, the Chief Inspector or Inspector may—

(i) propose a draft of such bye-laws as appear to him to be sufficient, or

(ii) propose such amendments in any draft submitted to him by the owner, agent or manager as will, in his opinion, render it sufficient, and shall send such draft bye-laws or draft amendments to the owner, agent or manager as the case may be, for consideration.

(3) If within a period of two months from the date on which any draft bye-laws or draft amendments are sent by the Chief Inspector or Inspector to the owner, agent or manager under the provisions of sub-section (2), the Chief Inspector or Inspector and the owner, agent or manager are unable to agree as to the terms of the bye-laws to be made under sub-section (1), the Chief Inspector or Inspector shall refer the draft bye-laws for settlement to the Mining Board or, where there is no Mining Board, to such officer or authority as the Central Government may, by general or special order, appoint in this behalf.

(4) (a) When such draft bye-laws have been agreed to by the owner, agent or manager and the Chief Inspector or Inspector, or, when they are unable to agree, have been settled by the Mining Board or such officer or authority as aforesaid, a copy of the draft bye-laws shall be sent by the Chief Inspector or Inspector to the Central Government for approval.

(b) The Central Government may make such modification of the draft bye-laws as it thinks fit.

(c) Before the Central Government approves the draft bye-laws, whether with or without modifications, there shall be published, in such manner as the Central Government may think best adapted for informing the persons affected, notice of the proposal to make the bye-laws and of the place where copies of the draft bye-laws may be obtained, and of the time (which shall not be less than thirty days) within which any objections with reference to the draft bye-laws, made by or on behalf of persons affected should be sent to the Central Government.

(d) Every objection shall be in writing and shall state—

(i) the specific grounds of objections, and

(ii) the omissions, additions or modifications asked for.

(e) The Central Government shall consider any objection made within the required time by or on behalf of persons appearing to it to be affected, and may approve the bye-laws either in the form in which they were published or after making such amendments thereto as it thinks fit.

(5) The bye-laws, when so approved by the Central Government, shall have effect as if enacted in this Act, and the owner, agent or manager of the mine shall cause a copy of the bye-laws, in English and in such other language or languages as may be prescribed, to be posted up in some conspicuous place at or near the mine, where the bye-laws may be conveniently read or seen by the persons employed; and, as often as the same become defaced, obliterated or destroyed, shall cause them to be renewed with all reasonable despatch.

(6) The Central Government may, by order in writing rescind, in whole or in part, any bye-law so made, and thereupon such bye-law shall cease to have effect accordingly.

62. Posting up of Abstracts from Act, regulations, etc.—There shall be kept posted up at or near every mine in English and in such other language or languages as may be prescribed, the prescribed abstracts of the Act and of the regulations and rules.

CHAPTER IX—PENALTIES AND PROCEDURE

63. Obstruction.—(1) Whoever obstructs the Chief Inspector, an Inspector, or any person authorised under section 8 in the discharge of his duties under this Act, or refuses or wilfully neglects to afford the Chief Inspector, Inspector or such person any reasonable facility for making any entry, inspection, examination or inquiry authorised by or under this Act in relation to any mine, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

(2) Whoever refuses to produce on the demand of the Chief Inspector or Inspector any registers or other documents kept in pursuance of this Act, or prevents or attempts to prevent or does anything which he has reason to believe to be likely to prevent any person from appearing before or being examined by an inspecting officer acting in pursuance of his duties under this Act, shall be punishable with fine which may extend to three hundred rupees.

64. Falsification of records, etc.—Whoever—

(a) counterfeits, or knowingly makes a false statement in, any certificate, or any official copy of a certificate, granted under this Act, or

(b) knowingly uses as true any such counterfeit or false certificate, or

(c) makes or produces or uses any false declaration, statement or evidence knowing the same to be false, for the purpose of obtaining for himself or for any other person a certificate, or the renewal of a certificate, under this Act, or any employment in a mine, or

(d) falsifies any plan or register or record the maintenance of which is required by or under this Act, or

(e) makes, gives or delivers any plan, return, notice, record or report containing a statement, entry or detail which is not to the best of his knowledge or belief true,

shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

65. Use of false certificates of fitness.—Whoever knowingly uses or attempts to use as a certificate of fitness granted to himself under section 40 a certificate

granted to another person under that section, or, having been granted a certificate of fitness to himself under that section, knowingly allows it to be used, or allows an attempt to use it to be made by another person, shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or with both.

66. Omission to furnish plans, etc.—Any person who, without reasonable excuse the burden of proving which shall lie upon him, omits to make or furnish in the prescribed form or manner or at or within the prescribed time any plan, return, notice, register, record or report required by or under this Act to be made or furnished shall be punishable with fine which may extend to two hundred rupees.

67. Contravention of provisions regarding employment of labour.—Whoever, save as permitted by section 38, contravenes any provision of this Act or of any regulation, rule or bye-law or of any order made thereunder prohibiting, restricting or regulating the employment or presence of persons in or about a mine shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both, and, if the contravention is continued after conviction, with a further fine which may extend to seventy-five rupees for each day on which the contravention is so continued.

68. Penalty for double employment of young persons.—If a child or an adolescent is employed in a mine on any day on which he has already been employed in another mine, his parent or guardian or the person who has the custody of such child or adolescent or who obtains any direct benefit from his wages shall be punishable with fine which may extend to fifty rupees, unless it appears to the court that the child or adolescent was so employed without the consent or connivance of such parent, guardian or person.

69. Failure to appoint manager.—Whoever in contravention of the provisions of section 17, fails to appoint a manager shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both, and, if the contravention is continued after conviction, with a further fine which may extend to one hundred rupees for each day on which the contravention is so continued.

70. Notice of accidents.—(1) Whoever in contravention of the provision of sub-section (1) of section 23 fails to give notice of any accidental occurrence or to post a copy of the notice on the special notice board referred to in that sub-section and to keep it there for the period specified shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

(2) Whoever in contravention of a direction made by the Central Government under sub-section (3) of section 23 fails to record in the prescribed register or to give notice of any accidental occurrence shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

71. Owner, etc., to report to Chief Inspector in certain cases.—Where the owner, agent or manager of a mine, as the case may be, has taken proceedings under this Act against any person employed in or about a mine in respect of an offence under this Act, he shall within twenty-one days from the date of the judgment or order of the court report the result thereof to the Chief Inspector.

72. Obligation of persons employed in a mine.—No person employed in a mine shall—

- (a) wilfully interfere with or misuse any appliance, convenience or other thing provided in a mine for the purpose of securing the health, safety or welfare of the persons employed therein;

- (b) wilfully and without reasonable cause do anything likely to endanger himself or others;
- (c) wilfully neglect to make use of any appliance or other thing provided in the mine for the purpose of securing the health or safety of the persons employed therein.

73. Disobedience of orders.—Whoever contravenes any provision of this Act or of any regulation, rule or bye-law or of any order made thereunder for the contravention of which no penalty is hereinbefore provided shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to one thousand rupees, or with both, and, if the contravention is continued after conviction, with a further fine which may extend to one hundred rupees for each day on which the contravention is so continued.

74. Contravention of law with dangerous results.—(1) Notwithstanding anything hereinbefore contained, whoever contravenes any provision of this Act or of any regulation, rule or bye-law or of any order made thereunder, shall be punishable,—

- (a) if such contravention results in loss of life, with imprisonment which may extend to one year, or with fine which may extend to five thousand rupees, or with both; or
- (b) if such contravention results in serious bodily injury, with imprisonment which may extend to six months, or with fine which may extend to two thousand rupees, or with both; or
- (c) if such contravention otherwise causes injury or danger to persons employed in the mine or other persons in or about the mine, with imprisonment which may extend to one month, or with fine which may extend to five hundred rupees, or with both.

(2) Where a person having been convicted under this section is again convicted thereunder he shall be punishable with double the punishment provided by sub-section (1).

(3) Any court imposing, or confirming in appeal, revision or otherwise, a sentence of fine passed under this section may, when passing judgment, order the whole or any part of the fine recovered to be paid as compensation to the person injured, or, in the case of his death, to his legal representative:

Provided that if the fine is imposed in a case which is subject to appeal, no such payment shall be made before the period allowed for presenting the appeal has elapsed, or, if an appeal has been presented, before the decision of the appeal.

75. Prosecution of owner, agent or manager.—No prosecution shall be instituted against any owner, agent or manager for any offence under this Act except at the instance of the Chief Inspector or of the district magistrate or of an Inspector authorised in this behalf by general or special order in writing by the Chief Inspector:

Provided that in respect of an offence committed in the course of the technical direction and management of a mine, the district magistrate shall not institute any prosecution against an owner, agent or manager without the previous approval of the Chief Inspector.

76. Determination of owner in certain cases.—Where the owner of a mine is a firm or other association of individuals, any one of the partners or members thereof or where the owner of a mine is a public company, any one of the directors thereof, or where the owner of a mine is a private company, any one of the shareholders thereof, may be prosecuted and punished under this Act for any offence for which the owner of a mine is punishable:

Provided that where a firm, association or company has given notice in writing to the Chief Inspector that it has nominated,—

- (a) in the case of a firm, any of its partners,
- (b) in the case of an association, any of its members,
- (c) in the case of a public company, any of its directors, or
- (d) in the case of a private company, any of its shareholders,

who is resident in each case in any place to which this Act extends to assume the responsibilities of the owner of the mine for the purposes of this Act, such partner, member, director or shareholder, as the case may be, shall, so long as he continues to so reside, be deemed to be the owner of the mine for the purposes of this Act, unless notice in writing cancelling his nomination or stating that he has ceased to be a partner, member, director or shareholder, as the case may be, is received by the Chief Inspector.

77. Exemption of owner, agent or manager from liability in certain cases.—

Where the owner, agent or manager of a mine, accused of an offence under this Act, alleges that another person is the actual offender, he shall be entitled, upon complaint made by him in this behalf and on giving to the prosecutor not less than three clear days' notice in writing of his intention so to do, to have that other person brought before the court on the date appointed for the hearing of the case; and if, after the commission of the offence has been proved, the owner, agent or manager of the mine, as the case may be, proves to the satisfaction of the court—

- (a) that he has used due diligence to enforce the execution of the relevant provisions of this Act, and
- (b) that the other person committed the offence in question without his knowledge, consent or connivance,

the said other person shall be convicted of the offence and shall be liable to the like punishment as if he were the owner, agent or manager of the mine, and the owner, agent or manager, as the case may be, shall be acquitted:

Provided that—

- (a) the owner, agent or manager of the mine, as the case may be, may be examined on oath and his evidence and that of any witness whom he calls in support shall be subject to cross-examination by or on behalf of the person he alleges as the actual offender and by the prosecutor;
- (b) if in spite of due diligence the person alleged as the actual offender cannot be brought before the court on the date appointed for the hearing of the case, the court shall adjourn the hearing thereof from time to time so however that the total period of such adjournments does not exceed three months, and if by the end of the said period the person alleged as the actual offender cannot be brought before the court, the court shall proceed to hear the case against the owner, agent or manager, as the case may be.

78. Power of court to make orders.—(1) Where the owner, agent or manager of a mine is convicted of an offence punishable under this Act, the court may, in addition to awarding him any punishment, by order in writing, require him within a period specified in the order (which may be extended by the court from time to time on application made in this behalf) to take such measures as may be so specified for remedying the matters in respect of which the offence was committed.

(2) Where an order is made under sub-section (1), the owner, agent or manager of the mine, as the case may be, shall not be liable under this Act in

respect of the continuance of the offence during the period or extended period, if any, but if on the expiry of such period or extended period the order of the court has not been fully complied with, the owner, agent or manager, as the case may be, shall be deemed to have committed a further offence and shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to one hundred rupees for every day after such expiry on which the order has not been complied with, or with both.

79. Limitation of prosecutions.—No court shall take cognizance of any offence under this Act, unless complaint thereof has been made—

- (i) within six months of the date on which the offence is alleged to have been committed, or
- (ii) within six months of the date on which the alleged commission of the offence came to the knowledge of the Inspector, or
- (iii) in any case where a Court of Inquiry has been appointed by the Central Government under section 24, within six months after the date of the publication of the report referred to in sub-section (4) of that section,

whichever is later.

80. Cognizance of offences.—No court inferior to that of a presidency magistrate or magistrate of the first class shall try any offence under this Act which is alleged to have been committed by any owner, agent or manager of a mine or any offence which is by this Act made punishable with imprisonment.

81. Reference to Mining Board or Committee in lieu of prosecution in certain cases.—(1) If the court trying any case instituted at the instance of the Chief Inspector or of the district magistrate or of an Inspector under this Act is of opinion that the case is one which should, in lieu of a prosecution, be referred to a Mining Board or a Committee it may stay the criminal proceedings, and report the matter to the Central Government with a view to such reference being made.

(2) On receipt of a report under sub-section (1), the Central Government may refer the case to a Mining Board or a Committee, or may direct the court to proceed with the trial.

CHAPTER X—MISCELLANEOUS

82. Decision of question whether a mine is under this Act.—If any question arises as to whether any excavation or working is a mine within the meaning of this Act, the Central Government may decide the question, and a certificate signed by a Secretary to the Central Government shall be conclusive on the point.

83. Power to exempt from operation of Act.—The Central Government may, by notification in the Official Gazette, exempt either absolutely or subject to any specified conditions any local area or any mine or group or class of mines or any part of a mine or any class of persons from the operation of all or any of the provisions of this Act.

Provided that no local area or mine or group or class of mines shall be exempted from the provisions of section 45 unless it is also exempted from the operation of all the other provisions of this Act.

84. Power to alter or rescind orders.—The Central Government may reverse or modify any order passed under this Act.

85. Applications of Act to mines belonging to Government.—This Act shall apply to mines belonging to the Government.

86. Application of certain provisions of Act LXIII of 1948 to mines.—The Central Government may, by notification in the Official Gazette, direct that the provisions of Chapters III and IV of the Factories Act, 1948 (LXIII of 1948) shall, subject to such exceptions and restrictions as may be specified in the notification, apply to all mines and the precincts thereof.

87. Protection of action taken in good faith.—No suit, prosecution or other legal proceeding whatever shall lie against any person for anything which is in good faith done or intended to be done under this Act.

88. Repeal of Act IV of 1923.—The Indian Mines Act, 1923 (IV of 1923) is hereby repealed.

MINES RULES, 1955

Arrangement of Paragraphs

CHAPTER I—PRELIMINARY

1. Short title and application.
2. Definitions.

CHAPTER II—MINING BOARD

3. Mine owners' representatives.
4. Miners' representatives.
5. Power to co-opt members.
6. Term of office.
7. Resignation.
8. Absence from India.
9. Notification of vacancies.
10. Disposal of business.
11. Time and place of meetings.
12. Notice of meetings.
13. Presiding at meetings.
14. Quorum.
15. Decision by majority.
16. Minutes of the meetings.
17. Allowances to non-official members.
18. Correspondence and Accounts.
19. Appearance at hearings.
20. Proceedings to be in camera.

CHAPTER III—COURT OF INQUIRY

21. Court of Inquiry to be public.
22. Recovery of expenses.

CHAPTER IV—CERTIFYING SURGEONS

23. Powers of Certifying Surgeon.
24. Duties of Certifying Surgeon.
25. Certificate of fitness.
26. Duplicate Certificate.
27. Re-examination.
28. Fresh examination.
29. Metal tokens.

CHAPTER V—HEALTH AND SANITATION PROVISIONS

30. Quantity of drinking water.
31. Storage of drinking water.
32. Decision of Chief Inspector final.
33. Surface latrines and urinals.
34. Standards of construction.
35. Sign Boards to be displayed.

36. Provision of water for washing, etc.
37. Underground latrines.
38. Sanitation.
39. Obligation of workpersons.

CHAPTER VI—FIRST AID AND MEDICAL APPLIANCES

40. Duty of owner, agent or manager.
41. First-aid qualifications.
42. First-aid personnel.
43. Ambulance rooms.
44. First-aid Stations.
45. Carrying of first-aid outfit by officials.

CHAPTER VII—EMPLOYMENT OF PERSONS

46. Persons holding positions of supervision or management, etc.
47. Weekly day of rest.
48. Notice regarding hours of work.
49. Compensatory days of rest.
50. Exemption from hours and limitation of employment.
51. Transfer or termination of employment.
52. Employment of adolescents.

CHAPTER VIII—LEAVE WITH WAGES AND OVERTIME

53. Register of leave with wages.
54. Leave with wages.
55. Arrears of leave.
56. Payment of leave wages due if a person dies.
57. Leave with wages register for exempted mines.
58. Period of continuous service.
59. Overtime Register.
60. Extra wages for overtime.
61. Cases of exception under section 56.

CHAPTER IX—WELFARE AMENITIES

62. Provision of shelters.
63. Standards of shelters.
64. Provision of canteens.
65. Standards of canteen.
66. Furniture and equipment.
67. Cleanliness.
68. Provisions of staff.
69. Canteen Managing Committee.
70. Prices to be charged.
71. Accounts.
72. Welfare Officers.
73. Duties of Welfare Officers.
74. Conditions of service.

CHAPTER X—REGISTERS AND NOTICES

75. Maintenance and production of reports, registers and other records.
76. Register of minor accidents.
77. Register of employees.
78. Register of daily attendance.
79. Postings of abstracts, bye-laws and notices.

CHAPTER XI—MISCELLANEOUS

80. Observance of local time.
81. Intoxicating drugs and drinks.
82. Occupational diseases—Fees of medical practitioner.
83. Mode of payment of fees.

CHAPTER XII—RESCISSION AND SAVINGS

84. Rescission and Savings.

FIRST SCHEDULE
Forms—A to K.

MINES RULES, 1955¹

In exercise of the powers conferred by Section 58 of the Mines Act, 1952 (XXXV of 1952), the Central Government hereby makes the following rules the same having been previously published as required by sub-section (1) of Section 59 of the said Act, namely:—

MINES RULES, 1955

CHAPTER I—PRELIMINARY

1. **Short title and application.**—(1) These rules may be called the Mines Rules, 1955
- (2) Except as otherwise expressly provided, the rules shall apply to every mine of whatever description to which the Act applies.
2. **Definitions.**—In these rules, unless there is anything repugnant in the subject or context—
 - (a) “the Act” means the Mines Act, 1952 (XXXV of 1952);
 - (b) “court of inquiry” means a court of inquiry appointed under section 24 of the Act;
 - (c) “form” means a form as given in the First Schedule;
 - (d) “section” means a section of the Act;
 - (e) “schedule” means a schedule appended to these rules;
 - (f) “manager” includes Mine Superintendent who is appointed by the owner or agent of a mine under section 17 of the Act and as such, responsible for the control, management and direction of a mine;
 - (g) “certifying surgeon” means a qualified medical practitioner appointed to be a certifying surgeon under section 11;
 - (h) “month” means the period from the 1st day of any month to the last day of the same month.
 - (i) “calendar year” means a year from the first day of January to the thirty-first day of December;
 - (j) “shift” means each of the different periods of the day during which work of the same kind is carried out by one or more relay of persons.

CHAPTER II—MINING BOARD

3. **Mine owners’ representatives.**—The two members referred to in clause (d) of sub-section (1) of section 12 shall be nominated from time to time in the manner specified by the Central Government by notification in the Official Gazette.
4. **Miners’ representatives.**—(1) Where in any part of the territories to which the Act extends, or for any group or class of mines, a Mining Board is constituted—
 - (a) if there is one registered trade union of miners entitled to nominate one or two members in accordance with sub-clause (i) or sub-clause (ii) of clause (e) of sub-section (1) of Section 12, the Central Government shall call on such trade union to nominate one or two persons as the case may be.
 - (b) if there are two or more registered trade unions of miners entitled to nominate one or two members in accordance with the said provisions of the Act, the Central Government shall, for each vacancy, call on such registered trade unions, in rotation in such order or priority as it may deem fit, to nominate a person to fill in the vacancy.
5. **Powers to co-opt members.**—(1) The Board may at any time and for such period as it thinks fit, co-opt as members of the Board any person or persons possessing a Mine Manager’s First Class Certificate of Competency or a degree or diploma in mining or special knowledge in mining affairs.
- (2) A member co-opted under sub-rule (1) shall exercise all the powers and functions of a member of the Board except that he shall not be entitled to vote on any question coming before the Board.
6. **Term of office.**—A person nominated under clause (c), clause (d) or clause (e) of sub-section (1) of Section 12 shall, unless he resigns his office or dies at an earlier date, hold office for a period of three years from the date of the notification appointing him a member of the Board and shall be eligible for renomination.

Provided that a member shall, notwithstanding the expiration of his term, continue to hold office until his successor is appointed.

¹ These Rules were published under Ministry of Labour Notification No. S.R.O. 1421 dated 2nd July, 1955.

7. Resignation.—(1) A member other than the Chairman may resign his office by writing under his hand addressed to the Chairman.

(2) The Chairman may resign his office by writing under his hand addressed to the Central Government.

(3) The resignation referred to in sub-rule (1) or sub-rule (2) above shall take effect from the date of its acceptance by the Chairman or the Central Government as the case may be.

8. Absence from India.—(1) Before a member leaves India—

(a) he shall intimate to the Chairman the date of his departure from and the date of his expected return to India;

(b) if he intends to be absent from India for a period longer than six months, he shall tender his resignation.

(2) If any member leaves India without taking the action required by sub-rule (1) he shall be deemed to have resigned with effect from the date of his departure from India.

9. Notification of vacancies.—(1) The Chairman shall inform the Central Government as soon as a vacancy occurs in the membership of the Board by the resignation or death of a member.

(2) In case such a vacancy occurs by the death of the Chairman information shall be furnished to the Central Government by the Chief Inspector or the Inspector nominated to the Board by the Central Government as the case may be.

10. Disposal of business.—(1) All questions which the Board is required to consider shall be considered either at the meetings or by circulation of papers as the Chairman may direct:

Provided that papers need not be circulated to any member who is absent from India at the time.

(2) When a question is referred by circulation of papers any member may request that the question be considered at a meeting of the Board, and thereupon, the Chairman may direct that it be so considered;

Provided that if three or more members make such a request, the Chairman shall direct that it be so considered.

11. Time and place of meetings.—The Board shall meet at such places and times as may be appointed by the Chairman.

12. Notice of meetings.—(1) The Secretary to the Board shall give at least fourteen days' notice to every member of the Board present in India of the time and place fixed for each meeting and shall send to every such member agenda of business to be disposed of at that meeting not less than seven days before the meeting:

Provided that when an emergent meeting is called, at least two days' clear notice shall be given.

(2) No business which is not on the agenda shall be considered at a meeting without the permission of the Chairman.

13. Presiding at meetings.—The Chairman shall preside at every meeting of the Board at which he is present. If the Chairman is absent from any meeting, the members present shall elect one of them to preside over the meeting and the member so elected shall at that meeting exercise all the powers of the Chairman.

14. Quorum.—No business shall be transacted at a meeting of the Board unless at least four members are present:

Provided that at any meeting in which less than four members are present, the Chairman may adjourn the meeting to a date not less than fourteen days later and inform the members present and notify other members that he proposes to dispose of the business at the adjourned meeting irrespective of the quorum, and it shall, thereupon, be lawful to dispose of the business at such adjourned meeting irrespective of the number of members attending.

15. Decision by majority.—(1) Every question referred to the Board by circulation of papers shall, unless the Chairman, in pursuance of sub-rule (2) of rule 10 reserves it for consideration at a meeting, be decided in accordance with the opinions of the majority sending their opinions within the time allowed.

(2) All questions referred to a meeting of the Board shall be decided by a majority of votes of the members present and voting on that question.

(3) In the case of an equal division of votes, or opinions, the Chairman shall exercise an additional vote or opinion.

(4) Any member disagreeing with a decision of the Board may enter a note of dissent which shall form part of the record of the proceedings.

16. Minutes of the meetings.—(1) The Secretary of the Board shall circulate the proceedings of each meeting to all members of the Board, present in India, and thereafter record the proceedings in a minute book which shall be kept for permanent record.

(2) The record of the proceedings of each meeting shall be signed by the Chairman.

17. Allowances to non-official members.—Travelling and daily allowance to non-official members of the Board shall be regulated in accordance with the orders regarding allowances to non-official members of Committees, Commissions and Boards of Enquiry issued by the Central Government from time to time.

18. Correspondence and Accounts.—The Secretary of the Board shall conduct all the correspondence of the Board and keep its accounts.

19. Appearance at hearings.—Any appearance required to be made by a party before the Board, except for purposes of being examined as a witness, may be made either in person or by his agent duly authorised in writing, or by a legal practitioner on his behalf.

20. Proceedings to be in camera.—Unless the Chairman otherwise directs, the proceeding of the Board shall be conducted in camera and shall be regarded as confidential in nature.

CHAPTER III—COURT OF INQUIRY

21. Court of Inquiry to be public.—The person appointed to hold inquiry under section 24 of the Act shall hold the inquiry in public in such manner and under such conditions as the Court thinks most effectual for ascertaining the causes and circumstances of the accident or other occurrences and for enabling the Court to make the report.

22. Recovery of expenses.—(1) If a Court of Inquiry finds that the accident was due to any carelessness or negligence on the part of the management the Court may direct the owner of the mine to pay all or any part of the expenses of the inquiry in such manner and within such time as the Court may specify.

(2) The amount directed to be paid under sub-rule (1) may on application by the Chief Inspector or Inspector to a Magistrate having jurisdiction at the place where the mine is situated, or where such owner is for the time being resident, be recovered by attachment and sale of any movable property within the limits of the Magistrate's jurisdiction belonging to such owner.

CHAPTER IV—CERTIFYING SURGEONS

23. Powers of Certifying Surgeon.—A Certifying Surgeon may within the local limits of his jurisdiction or in respect of mines or class or description of mines assigned to him make such inspection, examination or inquiry as he thinks fit for the purpose of the Act and it shall be the duty of the owner, agent or manager of the mines concerned to afford the Certifying Surgeon all reasonable facilities for carrying out such inspection, examination or inquiry as the case may be.

24. Duties of Certifying Surgeons.—(1) For the purposes of examination and certification of young persons who desire to obtain a certificate of fitness, the Certifying Surgeon shall arrange a suitable time and place for the attendance of such persons, and shall give previous notice in writing of such arrangements to the managers of mines concerned within the local limits of his jurisdiction or mines or class or description of mines assigned to him.

(2) The Certifying Surgeon shall, upon a request being made to him by the Chief Inspector or Inspector, carry out such examination and furnish him with such report as he may indicate in respect of any mine or class or description of mines in which operations involve any risk of injury to the health of any person or class of persons employed therein.

(3) Every certificate of fitness granted by the Certifying Surgeon shall be prepared by filling up the foil and the counterfoil of the certificate, on both of which shall be impressed the left thumb mark of the adolescent in whose name the certificate is granted.

(4) The Certifying Surgeon shall, when satisfied as to the correctness of the entries made therein sign the foil and initial the counterfoil of the certificate and shall deliver the foil to the applicant unless the adolescent has been examined in pursuance of the provision of sub-section (5) of section 41, in which case the Certifying Surgeon shall deliver the foil to the manager of the mine in which the adolescent desires to be employed.

(5) A Certifying Surgeon revoking a certificate under sub-section (2) of section 41 shall write the word "Revoked" in red ink on the foil and the counterfoil of the certificate.

25. Certificate of fitness.—A certificate of fitness granted or renewed in Form K shall be deemed to be a certificate duly granted or renewed, as the case may be, in the manner provided for the purposes of sections 40, 43 and 47.

26. Duplicate certificate.—(1) If the Certifying Surgeon is satisfied that a certificate of fitness granted under these rules has been lost or otherwise mislaid, he may on appli-

cation, after such verification, as he deems fit, grant a duplicate certificate to the applicant. The word "Duplicate" shall be clearly written in red ink across any such duplicate certificate and initialled by him. The counterfoil of the certificate shall be simultaneously marked "Duplicate" and initialled.

(2) For every duplicate certificate granted under sub-rule (1), a fee not exceeding one rupee shall be payable by the applicant. The Certifying Surgeon shall maintain a register of all duplicate certificates so issued and shall initial each entry thereon.

(3) No duplicate certificate shall be granted to any adolescent otherwise than in accordance with the provision of this rule.

27. Re-examination.—(1) Every adolescent in respect of whom a certificate of fitness has been issued, so long as he remains employed in a mine, shall be re-examined by the Certifying Surgeon within twelve months of the date of the examination immediately preceding.

(2) The Certifying Surgeon shall upon making such re-examination, make necessary entries in the said certificate both on the foil and counterfoil and deliver the foil to the manager of the mine.

28. Fresh examination.—(1) If any person sent up for medical examination in pursuance of section 40 or section 43 or section 47 is not certified to be fit by the Certifying Surgeon he shall not without the permission in writing of an Inspector, be sent for another medical examination unless a period of six months has elapsed from the time when he was last sent up for medical examination.

(2) Any certificate obtained in contravention of sub-rule (1) shall be void.

29. Metal Tokens.—(1) The Certifying Surgeon shall issue to every adolescent to whom a certificate of fitness is granted, a metal token stamped with the letter 'P' and bearing the same serial number as the certificate.

(2) The person to whom such token is issued shall so long as the corresponding certificate remains in force, retain such token in his immediate possession and shall not transfer it or dispose of it. In the event of the corresponding certificate being revoked, the token shall be returned to the Certifying Surgeon.

(3) A duplicate token may be obtained for the reasons, in the manner and subject to the condition specified in rule 26.

(4) A record of every token so issued and the person to whom it is issued shall be maintained by the Certifying Surgeon.

CHAPTER V—HEALTH AND SANITATION PROVISIONS

30. Quantity of drinking water.—(1) The quantity of drinking water to be provided in a mine or any part thereof shall be on a scale of at least half-a-gallon for every person employed at any one time and such drinking water shall be readily available at conveniently accessible points during the whole of the working shift.

(2) Where 100 persons or more are employed, either above ground or in opencast workings at any one time an Inspector may by order in writing require the drinking water to be effectively cooled by mechanical or other means available.

(3) No charge shall be made for the drinking water so supplied.

31. Storage of drinking water.—(1) If drinking water is not provided from taps connected with a water supply system, it shall be kept cool in suitable vessels sheltered from the weather and shall be emptied, cleaned and refilled every day. All practical steps shall be taken to preserve the water and the containing vessels in a clean and hygienic condition.

(2) If the source of drinking water is not from a public water supply system, an Inspector may by order in writing require the owner, agent or manager of the mine to submit with the least possible delay a certificate from a competent health authority or analyst as to the fitness of the water for human consumption.

32. Decision of Chief Inspector final.—If any question arises as to whether water supply arrangements are satisfactory and in accordance with the requirements of section 19 and rules 30 and 31 the decision of the Chief Inspector shall be final.

33. Surface latrines and urinals.—(1) On the surface at every mine adequate latrine and urinal accommodation shall be provided at conveniently accessible places separately for the use of males and females employed in the mine.

(2) The scale of latrine accommodation shall be at least one seat for every 50 males and at least one seat for every 50 females employed at any one time:

Provided that where sanitary latrines are maintained in bathing places, the number of latrines to be provided under this rule may include such sanitary latrines.

NOTE.—In calculating latrine accommodation any fraction less than 50 shall be reckoned as 50.

34. Standards of construction.—Every latrine on the surface provided for the use of persons employed in a mine shall conform to the following standards of construction—

- (a) it shall be on a site approved of in writing by an Inspector;
- (b) it shall be built of brick or other suitable building material;
- (c) it shall be adequately drained and properly ventilated and afforded effective protection from the weather;
- (d) it shall be of a type approved of in writing by an Inspector;
- (e) the floors and any interior surface of walls up to a height of four feet shall be cement punned or otherwise so finished as to provide a smooth impervious surface;
- (f) it shall be partitioned off so as to secure privacy and shall have a proper door and fastenings and where a latrine intended for the use of one sex adjoins a latrine intended for the use of other sex, the approaches shall be separate;
- (g) where a latrine is of the service type, the service chamber shall be provided with an efficient trap door and the receptacles for nightsoil shall be of galvanised iron;
- (h) the interior walls, ceilings and partitions shall be white-washed once at least in every four months, and the date of such white washing shall be recorded in a book kept at the mine for the purpose:

Provided that this requirement regarding white washing shall not apply to those parts of walls, ceilings or partitions which are laid in glazed tiles or otherwise finished so as to provide a smooth, polished and impervious surface but all these parts shall be washed with suitable detergents and disinfectants at least once in every seven days.

35. Sign-boards to be displayed.—Where persons of both sexes are employed there shall be displayed outside each latrine a sign-board in the language understood by the majority of workpersons "For Males" or "For Females" as the case may be. Each sign-board shall also have the figure of a man or a woman as the case may be.

36. Provision of water for washing, etc.—(i) Where a piped water supply is available, a sufficient number of water taps, conveniently accessible, shall be provided in or near such latrines.

(2) If piped water supply is not available a sufficient quantity of water shall be kept stored in suitable receptacles near such latrines.

37. Underground latrines.—If in any mine more than fifty persons are employed underground at any one time, latrines shall be provided underground on a scale approved by an Inspector at convenient points near the working shafts and at entrances to the districts or sections of the mine. The latrines shall be of a type approved of in writing by an Inspector.

38. Sanitation.—(i) At every mine all underground working places and travelling roads shall be kept clean from excreta.

(2) All latrines and urinals in or about a mine shall be kept in a clean and sanitary condition.

(3) Receptacles for night soil shall be cleaned and disinfected at least once in every day.

(4) Proper arrangements shall be made on the surface for the disposal of night soil and urine. Such arrangements shall comply with the requirements of any health authority or Mines Board within whose jurisdiction the mine is situated.

39. Obligation of workpersons.—(i) No person shall wantonly misuse or damage the latrines provided either on the surface or underground.

(2) No person shall pollute the underground workings of a mine with excreta. All persons employed underground shall acquaint themselves with the sanitary arrangements provided from time to time in the sections of the mine in which they have to work or pass.

CHAPTER VI—FIRST AID AND MEDICAL APPLIANCES

40. It shall be the duty of the owner, agent or manager of a mine to see that adequate and suitable arrangements are made—

- (i) for the training of persons in first-aid and the provision of such equipment as is prescribed in these rules;
- (ii) for the speedy removal of serious cases of accidents or sickness from mines in hospitals.

41. First-aid qualifications.—No person other than a qualified nurse, dresser, compounder-cum-dresser or medical practitioner shall be appointed to render first-aid under these rules unless he is the holder of a valid first-aid certificate of the standard of St. John's Ambulance Association (India).

42. First-aid personnel.—At every mine the first-aid arrangements on the surface, in opencast workings and below ground shall be placed in charge of persons qualified in first-aid and the owner, agent or manager shall appoint such persons on the following scale—

- (i) For every 100 persons or part thereof employed at any one time on the surface, or in opencast workings, if any, at least one qualified person;
- (ii) For every 50 persons or part thereof employed at any one time below ground at least one qualified person.

43. Ambulance rooms.—(1) At every mine employing 500 or more persons on any one day of the preceding calendar year, there shall be provided and maintained in good order a suitable ambulance room.

(2) The ambulance room shall be situated at a convenient place on the surface of the mine and shall be used only for first-aid and ambulance work.

(3) The ambulance room shall have a floor space of not less than 100 square feet and shall contain at least the equipment specified in the Second Schedule.

(4) The ambulance room shall be in charge of a qualified medical practitioner assisted by at least one qualified compounder-cum-dresser, or a dresser, or a nurse authorised in writing by the manager and such medical practitioner, compounder-cum-dresser, dresser or a nurse, or either of them, shall always be readily available during the whole time persons are employed in the mine:

Provided that in any mine where in conformity with any other law for the time being in force an adequately equipped hospital or dispensary, as the case may be, is maintained the foregoing provisions shall be deemed to have been complied with.

(5) Every person who suffers an injury during the course of work shall report for examination or treatment at the ambulance room, hospital or dispensary, as the case may be, before leaving the mine irrespective of first-aid having been rendered at or near the place of work.

44. First-aid Stations.—(1) At every mine there shall be provided and maintained first-aid equipment as prescribed in the Third Schedule at one or more conveniently accessible stations above ground and in opencast workings where injured persons may receive first-aid treatment.

(2) First-aid equipment, as specified in the Third Schedule shall also be provided and maintained at suitable stations below ground in the workings of a mine near the working shafts and haulages and at entrances to districts or sections of the mine where injured persons may conveniently receive first-aid treatment.

(3) The number of such stations shall be at least one for every one hundred persons or part thereof employed in the mine at any one time and the person or persons in charge of such stations shall be readily available throughout the shift.

(4) It shall be the duty of the person in charge of a first-aid station to see that the equipment provided under this rule is kept in good order and that it is replenished from time to time.

(5) A list of all persons in charge of first-aid stations shall be kept pasted up in the first-aid room or on a notice board near the entrance to the mine.

45. Carrying of first-aid outfit by officials.—Every supervisory official who is in immediate charge of a mine or part and qualified to render first-aid shall carry while on duty a first-aid outfit consisting of one large sterilized dressing, one small sterilized dressing and an ampule of tincture of iodine or other suitable antiseptic. This outfit shall be securely packed to protect it against dirt and water.

CHAPTER VII—EMPLOYMENT OF PERSONS

46. Persons holding positions of supervision or management, etc.—For the purpose of Section 37, the following shall be deemed to be persons holding positions of supervision or management or employed in a confidential capacity—

- (a) superintendent, manager, undermanager, underground manager, underground agent, and assistant manager;
- (b) mining, electrical and mechanical engineer;
- (c) overman, foreman, assistant foreman, sirdar, shift-boss and head-mestri, or any person holding an equivalent position;
- (d) mechanical and electrical foreman;
- (e) surveyor and assistant surveyor;
- (f) medical officer, chemist, assayer, metallurgist and welfare or personnel officer;
- (g) clerk, accountant and register keeper;
- (h) any other person who in the opinion of the Chief Inspector holds a position of supervision or management.

47. Weekly day of rest.—(1) For the purpose of Sections 28 and 29 a day of rest for any person shall mean a period of rest of at least 24 consecutive hours.

(2) There shall be posted up in a conspicuous place outside the office of every mine a notice showing the weekly day of rest. Where the weekly day of rest is not the same day for all persons employed in the mine the notice shall show the day of rest allowed to each relay, or set of persons, or individual.

48. Notice regarding hours of work.—(1) The notice of hours of work referred to in sub-section (1) of section 36 shall be maintained in Form A.

(2) In addition to the particulars specified in sub-sections (1) and (3) of section 36 to be shown in the notice, shall also show the particulars of the system in which periodical changes of shifts are made for all or each set of persons employed in the mine.

(3) A copy of the notice shall be affixed on the first page in the registers maintained in Forms B, C, D and E.

49. Compensatory days of rest.—(1) The compensatory days of rest to be allowed under sub-section (1) of section 29 shall be so spaced that in any one week not more than two such days shall be allowed to any one person.

(2) On or before the last day of every month, there shall be displayed on a notice board outside the office of the mine a list of all persons who have not been allowed compensatory days of rest during that month, and the dates on which compensatory days of rest will be allowed to them in the following two months.

(3) In the event of a person being discharged or dismissed such number of compensatory days as are due to him, shall not be reckoned as part of any period of notice to which he is entitled under any rule, award, agreement or contract of service, and he shall be allowed all such days of compensatory rest before the date of his discharge or dismissal.

(4) There shall be maintained at every mine a register of compensatory days of rest in Form F.

50. Exemption from hours and limitation of employment.—For the purpose of section 39 of the Act, male adults employed in a mine on any work specified in column 1 of the Fourth Schedule shall be exempted from the provisions of the sections of the Act specified in column 2, subject to such conditions as are specified in column 3.

51. Transfer or termination of employment.—(1) When a person is transferred from one set or relay to another or from one shift to another, particulars of the same shall be entered against his name in the register maintained in Form B.

(2) When the employment of a person in a mine is terminated either due to dismissal, discharge or otherwise, the date of such termination shall be entered against his name in the said register.

52. Employment of adolescents.—No adolescent shall be employed in a mine—

- (a) below ground where the dust produced in mining operations is known to constitute a hazard to health; or
- (b) in close proximity to any machinery for crushing, screening or preparing mineral or rock for use or sale, where the concentration of dust in the atmosphere constitutes a hazard to health; or
- (c) in any operation connected with any machinery involving risk of injury from any moving part either of the machine or any adjacent machine; or
- (d) in any work which is unduly arduous; or
- (e) in any apprenticeship or vocational training except under the immediate supervision of competent adult person; or
- (f) alone in a place remote from other workpersons.

CHAPTER VIII—LEAVE WITH WAGES AND OVERTIME

53. Register of leave with wages.—(1) The registers referred to in section 55 shall be maintained in Forms G and H:

Provided that if the Chief Inspector or an Inspector is of opinion that any muster roll or register maintained in accordance with any other rules for the time being in force, gives all the particulars required for the observance of Chapter VII of the Act, he may, by an order in writing, direct that such muster roll or register shall to the corresponding extent, be maintained in place of the registers in Forms G and H.

(2) The registers mentioned in sub-rule (1) shall be preserved for a period of two years after the last entry in them has been made and shall not be destroyed even after the expiry of that period unless it has been certified by an Inspector that the leave account therein has been properly transferred to the new registers.

54. Leave with wages.—(1) For the purpose of section 51, a period of twelve months continuous service shall commence with the first day of a calendar year;

Provided that for a person whose period of continuous service commences otherwise than on the first day of a calendar year, leave with wages shall be allowed in proportion hereinafter specified in sub-rule (2) if the ratio of the number of attendances put in by such a person to the number of days from the date of commencement of his service upto the last day of the calendar year is not less than the ratio of the respective attendances specified in sub-section (2) of section 51 to the number of days in that calendar year.

(2) A person entitled to leave with wages under the above proviso shall be allowed leave with wages for the number of days calculated at the rate of—

- (a) in the case of an employee paid by the month one day for every 19 attendances put in by him;
- (b) in case of any other employee except a loader, or one employed below ground on piece rate basis, one day for every 38 attendances put in by him;
- (c) in case of a loader or other person employed below ground on piece rate basis, one day for every 27 attendances put in by him:

Provided that in calculating leave at the rates laid down in clauses (a), (b) and (c) no person shall be entitled to leave with wages for a period longer than those provided for in section 51.

(3) In calculating leave under this rule any fraction of leave of half-a-day or more shall be treated as one full day and fraction of less than half-a-day shall be omitted.

55. Arrears of leave.—A person who had applied for but had been refused any leave to which he was entitled shall be allowed that leave in the succeeding calendar year.

56. Payment of leave wages due if a person dies.—In the event of death of any person entitled to leave with wages all arrears of such leave wages shall accrue to his legal heirs or nominee as the case may be.

57. Leave with wages register for exempted mines.—In a mine where an exemption is granted under section 56, there shall be maintained a register showing against the name of each person full details of leave due, leave allowed and wages paid therefor in such manner as may be approved by an Inspector.

58. Period of continuous service.—For the purpose of section 51, a period of service shall be deemed to be continuous which has not been interrupted by a period of unauthorised absence from work exceeding 14 days.

59. Overtime Register.—The register required by sub-section (4) of section 33 shall be maintained in Form I.

60. Extra wages for overtime.—For the purpose of section 33, overtime shall be paid at the end of each wage-period, and a person shall be entitled to receive overtime payment calculated on the basis of his daily wages or earnings.

NOTE 1.—In calculating overtime on any day a fraction of an hour less than 30 minutes shall be ignored and a fraction of 30 minutes or more shall be counted as one hour.

NOTE 2.—In calculating the ordinary rate of wages or earnings in the case of a person paid by the month the daily wages shall be $\frac{1}{26}$ th of his monthly rate of wages and in the case of any other person it shall be the ordinary rate of his daily wages or earnings as the case may be.

61. Cases of exemption under section 56.—(1) Where an exemption is granted under section 56, the Manager shall display at the main entrance of the mine, a notice giving full details of the system established in the mine for leave with wages and shall send a copy of it to the Inspector.

(2) No alteration shall be made in the Scheme approved by the Central Government at the time of granting exemption under section 56 without its previous sanction.

CHAPTER IX—WELFARE AMENITIES

62. Provision of Shelters.—At every mine employing 150 or more persons on any one day of the previous calendar year, there shall be provided adequate and suitable shelters at or near loading wharves, opencast workings, workshops and mine entrances where 25 or more persons are ordinarily employed at any one time, for taking food and rest:

Provided that any canteen maintain in accordance with these rules may be regarded as part of the requirements of this rule.

63. Standards of Shelters.—Every shelter shall—

- (a) have a floor area of not less than 150 square feet and a height to the lowest part of the roof of not less than 9 feet;
- (b) be so constructed as to afford effective protection from the weather;
- (c) be constantly provided with an adequate supply of cool and wholesome drinking water during the working hours of the mine;
- (d) be kept in a clean and tidy condition.

64. Provision of canteens.—At every mine employing 250 or more persons on any one day in the previous calendar year, where the Chief Inspector or Inspector so requires, there shall be provided within the precincts of the mine a canteen for the use of all persons employed:

Provided that in case of any mine or mines where a canteen is already in existence or where a single canteen is serving two or more adjoining mines, the Chief Inspector or an Inspector may, if he is satisfied that the said canteen is being run efficiently and that it adequately serves the purpose for which it has been established, waive all or any of the requirements specified in these rules.

65. Standards of canteen.—Every canteen shall—

- (a) be constructed in accordance with plans and specifications approved by the Chief Inspector or Inspector;
- (b) be situated not less than 50 ft., from any latrine, urinal, boiler house, engine room, coal heap, ash heap or heap of other material and any other source of dust or smoke;
- (c) be sufficiently lighted during all hours when open for use;
- (d) be provided with a washing place for females suitably separated or screened to secure privacy;
- (e) be white washed or colour washed inside the rooms and passages at least once a year and woodwork and structural iron or steel work shall be varnished or painted at least once every three years:

Provided that the inside walls of the kitchen shall be whitewashed or colour washed once every four months:

- (f) be provided with receptacles for garbage and have drains to carry away waste water.

66. Furniture and equipment.—In every canteen there shall be provided and maintained—

- (a) sufficient furniture, utensils and other equipment necessary for its efficient operation;
- (b) an adequate supply of cool and wholesome drinking water;
- (c) suitable clean clothes for persons cooking and serving food, drink, etc.

67. Cleanliness.—(1) The canteen and its precincts shall be kept in a sanitary condition.

(2) An adequate supply of hot water shall be provided for cleansing utensils and equipment and all furniture, utensils and other equipment shall be kept clean and in a hygienic condition.

68. Provisions of staff.—The owner, agent or manager shall appoint supervisory and other staff sufficient for the proper working of the canteen.

69. Canteen Managing Committee.—(1) The owner, agent or manager shall appoint a Canteen Managing Committee which shall be consulted from time to time, but not less than once a month, as to the management and working of the Canteen.

(2) (a) The Committee shall consist of an equal number of members nominated by the owner, agent or manager and elected by the persons employed in the mine. The number of elected members shall be on a scale of one for every 1,000 persons employed, provided that the number shall not be more than 5 or less than 2.

(b) The term of office of the elected members shall be two years commencing from the date of the last election, no account being taken of a bye-election.

(c) The owner, agent or manager shall determine the procedure for and supervise the elections to the Committee.

(3) The owner, agent or manager shall appoint either himself or his nominee as *ex-officio* Chairman of the Committee and the Chairman shall preside at every meeting of the Committee.

(4) The proceedings of every meeting of the Committee shall be recorded in a minute book and shall be signed by the Chairman.

70. Prices to be charged.—Food, drink and other items served in a canteen shall be sold on a non-profit basis and the prices charged shall be subject to the approval of the Canteen Managing Committee. A list of approved prices shall be conspicuously displayed in the Canteen in English, Hindi and in the language of the district in which the mine is situated.

71. Accounts.—Proper accounts pertaining to the canteen shall be maintained. Such accounts shall be audited once every twelve months by a competent accountant or auditor, and a balance-sheet shall be submitted to the Canteen Managing Committee not later than two months after the date of closing of the accounts.

72. Welfare Officers.—(1) In every mine wherein 500 or more persons are ordinarily employed there shall be appointed at least one Welfare Officer:

Provided that if the number of persons ordinarily employed exceeds 2,000, there shall be appointed additional Welfare Officers on a scale of one for every 2,000 persons or fraction thereof.

(2) No person shall act as a Welfare Officer of a mine unless he possesses—

- (a) a University degree;
- (b) a degree or diploma in Social Science or Labour Welfare from any institution recognised by the Government and preferably practical experience of handling labour problems in any industrial undertaking for at least three years; and
- (c) a knowledge of the language of the district in which the mine is situated or the language understood by the majority of persons employed in the mine:

Provided that in case of a person already in service as a Welfare Officer in a mine the above qualifications may, with the approval of the Chief Inspector, be relaxed.

(3) Where by reason of temporary absence, illness, or any other similar cause, the Welfare Officer is unable to perform his duties, the owner, agent or manager shall authorise in writing a person whom he considers competent to act in his place:

Provided that no such authorities shall have effect for a period in excess of 30 days except with the previous consent of the Chief Inspector or Inspector.

(4) A written notice of every such appointment, authorisation, discharge or dismissal and of the date thereof shall be sent by the owner, agent or manager to the Chief Inspector within 7 days from the date of such appointment, authorisation, discharge or dismissal.

73. Duties of Welfare Officers.—The duties of Welfare Officers shall be—

- (i) to establish contacts and hold consultations with a view to maintain harmonious relations between the management and persons employed in the mine;
- (ii) to bring to the notice of the management the grievances of employees, individual as well as collective, with a view to securing their expeditious redress;
- (iii) to promote relations between management and employees which will ensure productive efficiency as well as amelioration in the working conditions and to help workers to adjust and adapt themselves to their working environments;
- (iv) to assist in the formation of Works and Joint Production Committees, Co-operative Societies and Safety-First and Welfare Committees, and to supervise their work;
- (v) to help the management in regulating the grant of leave with wages and explain to the workers the provisions relating to leave with wages and other leave privileges and to guide the workers in the matter of submission of applications for grant of leave for regulating authorised absence;
- (vi) to advise on welfare provisions, such as housing facilities, food stuffs, social and recreational facilities, sanitation, individual personnel problems and education of children;
- (vii) to supervise welfare activities, statutory or otherwise, including education and training of employees;
- (viii) to suggest measures which will lend to raise the standard of living of workers and in general promote their well being;
- (ix) to perform any other duty connected with the welfare of the persons employed in mines.

74. Conditions of service.—(1) A Welfare Officer shall be given appropriate status corresponding to the status of the other executive heads of the mine.

(2) The conditions of service of a Welfare Officer shall be the same as of other members of the staff of corresponding status in the mine: Provided that, in the case of discharge or dismissal, the Welfare Officer, shall have a right of appeal to the Chief Inspector whose decision thereon shall be final and binding upon the owner, agent or manager of the mine, as the case may be.

CHAPTER X—REGISTERS AND NOTICES

75. Maintenance and production of reports, registers and other records.—All reports, registers and other records maintained in pursuance of the regulations, rules or bye-laws, unless otherwise provided for, shall—

- (a) be kept at an office or the nearest convenient building within the precincts of the mines;
- (b) be legibly entered in ink in English, Hindi or either in the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine;

(e) be preserved in original for a period of one calendar year after the date of the last report or entry;

Provided that when the original record is lost or destroyed before the expiry of one year's period true copies thereof, if available, shall be preserved for the prescribed period;

(d) be produced on demand before the Chief Inspector or Inspector or any person authorised in that behalf by the Central Government.

76. Register of minor accidents.—The register required by sub-section (3) of section 23 shall be maintained in Form J.

77. Register of employees.—The register required by sub-section (1) of section 48 shall be maintained in Form B.

78. Register of daily attendance.—(1) The registers required by sub-section 4 of section 48 of persons employed in the mine (a) belowground, (b) in opencast workings and (c) above ground shall be maintained in Forms C, D and E respectively.

(2) The entries in the register maintained in Form C shall be made at the entrance or entrances to the mine, at the time when a person against whose name the entry is made enters or leaves the mine.

(3) The entries in the registers maintained in Forms D and E shall be made at suitable points on the premises of the mine with reasonable despatch, at the commencement and end of the period of work.

79. Postings of abstracts, bye-laws and notices.—(1) The abstracts of the Act as given in the Fifth Schedule shall be posted up outside the Office of every mine in English, Hindi and either in the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine.

(2) The bye-laws shall be posted up in the manner required by sub-section (5) of Section 61, in English, Hindi and either in the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine:

Provided that the Chief Inspector may require the abstracts and the bye-laws to be posted up in any Indian language other than the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine.

(3) Every notice required to be posted up under these rules shall be in English, Hindi and either in the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine.

(4) The abstracts, bye-laws and notices required to be posted up by the Act, regulations and the rules shall be maintained in a clear and legible condition.

CHAPTER XI—MISCELLANEOUS

80. Observance of local time.—For the purpose of section 4, the local mean time that shall ordinarily be observed in any class or group of mines situated in any local area, specified in column 1 of the Sixth Schedule shall be as specified in column 2 thereof.

81. Intoxicating drugs and drinks.—(1) No intoxicating drink or drug shall be carried or permitted to be carried belowground into the workings of a mine or part.

(2) No person shall, during the course of his employment in or about a mine, possess, carry or consume any intoxicating drink or drug or remain in a state of intoxication or drunkenness.

82. Occupational diseases—Fees of medical practitioner.—A medical practitioner making an examination in accordance with sub-section (2) of section 25, shall be paid as follows—

(a) a fee not exceeding rupees sixteen for each clinical examination;

(b) a fee not exceeding rupees sixteen for each X-ray examination.

83. Mode of payment of fees, etc.—The fees or other expenses payable by the owner, agent or manager under these rules shall be paid directly into the treasury or a branch of the Imperial Bank of India and the receipt of the treasury or bank shall be sent to the Chief Inspector along with the particulars to which the fees or other expenses relate.

CHAPTER XII—RESCISSION AND SAVINGS

84. Rescission and Savings.—(1) All rules framed by State Governments under section 30 of Indian Mines Act, 1923, those contained in chapters II, III and VI of the Mysore Gold Mines Rules, 1953, and those issued *vide* the Government of India notification No. S.R.O. 2403, dated the 12th July, 1954, are hereby rescinded, but all acts done, orders issued and certificates granted or renewed under any rule so rescinded, so far as they are not inconsistent with these rules, be deemed to have been respectively done, issued, granted or renewed under these rules.

(2) The rules contained in Chapters IV and V of the Mysore Gold Mines Rules, 1953, shall continue to apply to gold mines in the State of Mysore in addition to these rules.

FORM A—[See Rule 48(r)]

It is hereby notified that persons employed at this mine shall begin and end their periods of work between the hours set out below.

Serial No.	Class or kind of Employment	Sex	Adult or Adolescent	Place of work		Set or Relay Number (A,B,C, etc.)	1. Set or Relay	A	B	C	D	Etc.

SECOND SCHEDULE—[See Rule 43(3)].

Equipment of an Ambulance Room.

- (a) A stretcher and a table of convenient height (about 2½ feet) large enough to stand the stretcher on;
- (b) a bench or chairs and one screen;
- (c) a glazed sink with water readily available;
- (d) soap, towel and nail brush;
- (e) a supply of suitable sterilized dressings, cotton wool, bandages and adhesive plaster;
- (f) a supply of tincture of iodine (2 per cent alcoholic solution) or other antiseptic solution;
- (g) blankets and hot-water bottles;
- (h) sets of splints (4½ ft., 3 ft. and 1 foot), with necessary triangular bandages for applying them;
- (i) a supply of drinking water and a drinking vessel;
- (j) a tourniquet, scissors and safety pins;
- (k) a pair of artery forceps;
- (l) one eyebath;
- (m) two clinical thermometers;
- (n) one record syringe (5 c.c.);
- (o) an adequate supply of anti-tetanus serum and morphine ampules;
- (p) first-aid boxes or cupboards not less than one for every 150 persons employed in the mine stocked with requisites specified in the Third Schedule; and
- (q) stove or other apparatus for boiling water.

THIRD SCHEDULE—[See Rule—44(1)].

Requisites of a First-Aid Station.

- (a) A stretcher with two blankets;
- (b) sets of splints (4½ ft., 3 ft., 1 ft.) with necessary triangular bandages for applying them;
- (c) first-aid boxes or cup-boards not less than one for every 150 persons employed containing at least—
 - (i) a sufficient supply of large and small sterilized dressings and burn dressings;
 - (ii) a sufficient supply of sterilized cotton-wool and of adhesive plaster;
 - (iii) a supply of roller bandages;
 - (iv) a supply of tincture of iodine or other antiseptic solution;
 - (v) a tourniquet, scissors and safety pins; and
 - (vi) a piece of carbolic soap.

NOTE.—Each first-aid box or cup-board shall be distinctly marked with the sign of Red Cross and with the words "FIRST-AID" and nothing except appliances or requisites for first-aid shall be kept in it.

FOURTH SCHEDULE—(See Rule 50).

Exemptions from hours and limitations of employment

Nature of work	Extent of exemption Conditions attached to exemption
1. Emergency involving serious risk to the safety of the mine or of persons employed therein such as accidental explosion, ignition of gas, spontaneous heating, outbreak of fire, influx of noxious gases, irruption of water, premature collapse of any part of a mine or failure of power supply.	<ul style="list-style-type: none"> (1) No person shall be employed on such work for more than 12 hours on any one day and 66 hours during each period of seven consecutive days commencing from his first employment on such work. (2) The report referred to in sub-section (2) of section 38 shall be sent to the Chief Inspector on or before the last day of each month.

Nature of work

Extent of exemption Conditions attached to exemption

2. Urgent work in case of—

(i) an accident actual or apprehended in a mine involving work such as, clearing of falls of ground or erecting or withdrawing of supports or completion of blasting operations; or

(ii) a breakdown of any machinery, plant or equipment in a mine involving repairs, renewals or alterations necessary to avoid stoppage of normal mining operations.

(1) No person shall be employed beyond the limits of overtime specified in Section 35.

(2) The report referred to in sub-section (2) of section 38 shall be sent to the Chief Inspector on or before the last day of each month.

FIFTH SCHEDULE—[See Rule 79(1)].

Abstracts of the Act

INSPECTORS

1. Any Inspector may enter and inspect any mine (by day and night) and make such examination and enquiry as may be necessary, to determine the condition of the mine and to ascertain whether the provisions of this Act and of the Regulations, Rules and Bye-laws are being observed. If he has reason to believe that these provisions have been or are being contravened, he may search any place and take possession of any register or record concerning the mine. (Section 7).

2. Any Government servant, duly authorised by the Chief Inspector or an Inspector, may enter any mine for the purpose of surveying, levelling and measuring after giving at least 3 days' notice to the manager. (Section 8).

3. Every owner, agent and manager of a mine shall afford every Inspector and every person authorised under section 8 all reasonable facilities for making any entry, inspection, survey, measurement, examination or enquiry under this Act. (Section 9).

MANAGEMENT OF MINES

4. Every mine shall be under the control, management and direction of one manager having the prescribed qualifications. (Section 17).

5. The owner, agent and manager of every mine shall be responsible that all operations carried on in connection with the mine are conducted in accordance with the provisions of this Act and of the Regulations, Rules and Bye-laws and any order made thereunder. (Section 18).

PROVISION OF DRINKING WATER, AMBULANCE APPLIANCES AND LATRINES

6. In every mine, both above and below ground—

(a) a sufficient supply of cool and wholesome drinking water shall be provided and maintained at suitable points conveniently situated for all persons employed in the mine. (Section 19).

(b) A sufficient number of first-aid boxes shall be provided and maintained. (Section 21).

(c) A sufficient number of latrines and urinals, separately for males and females, shall be provided in every mine at suitable places accessible at all times to all persons employed in the mine. All latrines and urinals shall be maintained in a clean and sanitary condition. (Section 20).

ACCIDENTS

7. Where there occurs in or about a mine an accident causing loss of life or serious bodily injury or any dangerous occurrence, a notice in the prescribed form shall be sent to the prescribed authorities and simultaneously a copy of such notice shall be posted at the mine on a special notice board and kept posted for not less than two months from the date of such posting. (Section 23).

8. Where any person employed in a mine contracts any disease connected with mining operations, the owner, agent or manager shall send notice thereof to the Chief Inspector and to such other authorities as may be prescribed. (Section 25).

HOURS AND LIMITATION OF EMPLOYMENT

9. No person shall work in a mine on more than six days in any one week. (Section 28).

10. If any person works, as provided under this Act, on any day of rest fixed for him he should be given a compensatory day of rest within that or the following two months. (Section 29).

11. No adult shall work above ground in a mine for more than forty-eight hours in any week or for more than nine hours in any day and he shall have at least half an hour's rest after working for not more than five hours. The spread over of the period of work including rest interval shall not normally be more than 12 hours. (Section 30).

12. No adult shall work below ground in a mine for more than forty-eight hours in any week or for more than eight hours in any day, except that a pump-minder, an onsetter or attendant of continuously operated machinery may work for not more than nine hours on any day or for not more than fifty-four hours in any week. (Section 31).

13. Where a person works in a mine for more than forty-eight hours, whether above or below ground, he shall get, for such overtime work, wages at the rate of—

- (a) twice his ordinary rate of wages, for underground work; and
- (b) one and a half times his ordinary rate of wages for work above ground.

'Ordinary rate of wages' means the basic wages plus such allowances including the cash equivalent of the advantage accruing through the sale on a concessional basis of food-grains and other articles but does not include a bonus. (Section 33).

14. No person shall be allowed to work in a mine who has already been working in any other mine within the preceding 12 hours. (Section 34).

15. Except as may be permitted under section 39(a), no person shall work for more than ten hours in any day, inclusive of overtime, nor shall the total number of hours of his overtime work exceed fifty in any one quarter. (Section 35).

16. The Manager of every mine shall post outside the office a notice of working hours and no person shall be allowed to work otherwise than in accordance with the notice. (Section 36).

17. The provisions regarding weekly day of rest, hours of work above and below ground and of section 36 shall not apply to supervising staff. (Section 37).

18. In case of an emergency, the manager may permit in accordance with the rules under section 39 persons to be employed in contravention of the provisions regarding hours of work. (Section 38).

EMPLOYMENT OF ADOLESCENTS

19. No person aged between 15 and 18 years shall work underground in a mine unless he has been certified as fit for work as an adult by a Certifying Surgeon and carries, while at work, a token giving a reference to such certificate and he shall have rest for at least half an hour after not more than four and a half hours of continuous work. He shall not be employed between 6 P.M. to 6 A.M. (Section 40).

20. A certificate of fitness granted or renewed for the purpose of section 40 shall be valid only for 12 months and may be conditional regarding employment in general or regarding the nature of work and may be revoked by a Certifying Surgeon if the holder of a certificate is no longer fit for the work specified in the certificate. Where a certificate or the renewal of a certificate is refused a Certifying Surgeon shall state his reasons for refusal if the person concerned so requires. The adolescent or his parents shall not be liable to pay any fees for medical examination under section 40 in all cases where he is sent by the manager of the mine in which he will be employed if found fit. (Section 41).

21. An adolescent, granted a certificate of fitness and working in a mine shall be considered to be an adult for the purposes of this Act. (Section 42).

22. Where an Inspector is of opinion that any person working in a mine without a certificate of fitness is an adolescent or that an adolescent working with such a certificate is no longer fit, he may ask the manager not to employ such person till he is examined or re-examined as the case may be and declared fit by a Certifying Surgeon or certified by him not to be an adolescent. (Section 43).

23. (i) No adolescent who has not been granted a medical certificate certifying that he is fit for work as an adult shall be employed or permitted to be employed above ground or in any workshop or power station in a mine or in any open cast workings in a mine—

(a) for more than four and a half hours in any day; or

(b) between the hours of 6 P.M. and 6 A.M.

(2) The period of work of all such adolescents employed in a mine shall be limited to two shifts which shall not overlap or spread over more than five hours each, and each such adolescent shall be employed in only one of the relays which shall not, except with the previous permission in writing of the Chief Inspector, be changed more frequently than once in a period of thirty days.

(3) The provisions of section 28 shall apply to such adolescents and notwithstanding anything contained in sub-section (1) of section 38 or in section 39, no exemption from the provisions of section 28 shall be granted in respect of any adolescent. (Section 44).

EMPLOYMENT OF WOMEN AND CHILDREN

24. No person below the age of fifteen years shall be employed in any mine or allowed to be present in any part of a mine which is below ground or in any open excavation in which any mining work is being done. (Section 45).

25. No woman shall be employed at any time of the day or night in any part of a mine which is below ground, and no woman shall be employed in any mine above ground or in open cast excavations except between the hours of 6 A.M. and 7 P.M. (Section 46 and Notification S.R.O. 1395 dated 9th August 1952).

REGISTRATION OF WORKERS

26. For every mine, there shall be kept a register of employees showing in respect of each person his or her name, age, sex, nature of employment, date of commencement of employment, the periods of work, the intervals and days of rest, the relay to which he or she belongs, reference to the certificate of fitness in case of an adolescent and the entries in the register shall be authenticated by the signature or thumb impression of the person concerned. There shall also be kept separate registers for workpersons working (a) below ground (b) in open cast workings and (c) above ground showing in respect of each person the name, nature of his employment and the hours of relay and the relay to which he belongs. The register of persons employed below ground shall show at any moment the name of any person who is then present below ground in the mine. (Section 48).

LEAVE WITH WAGES.

27. Every person employed in a mine who has completed twelve months' continuous service (not less than 190 attendances in case of loaders or piece-rated workers working below ground and not less than 265 attendances for other persons) in the mine, shall be allowed, during the following twelve months, leave with full pay:

(a) for fourteen days, in case of monthly paid staff;

(b) for seven days, in case of other workers.

No application for leave shall ordinarily be refused. If any person is discharged before he can take leave to which he is entitled he shall be paid his wages or pay for that period of leave. (Section 51).

28. For the leave allowed to a loader or a piece-rated worker employed below ground he shall be paid at the rate of daily average earnings during the month of December. For the leave allowed to a person who is paid weekly or monthly the rate shall be equal to his normal daily wages during the week preceding his leave. Daily average earnings or wages shall include cash equivalent of free foodgrains and other cash compensation drawn during the period concerned. (Section 52).

29. Any monthly paid employee who has been granted leave for ten days or more and any weekly paid employee or a loader or piece-rated worker working below ground who has been granted leave for five days or more shall be paid in advance the wages due for the period of the leave allowed. (Section 53).

PENALTIES

30. Any person obstructing an Inspector in the execution of his duties may be punished with imprisonment upto three months or a fine upto Rs. 500/-; or both. (Section 63).

31. Whoever makes, gives or delivers any plan, return, notice record or report containing a statement, entry or detail which is not to the best of his knowledge or belief true, may be punished with imprisonment upto three months or a fine upto Rs. 500/-; or both. (Section 64).

32. Whoever knowingly uses for himself a certificate of fitness granted (under Section 40) to some other person or allows a certificate of fitness granted to him to be used by any other person, may be punished with imprisonment upto one month or a fine upto Rs. 40/-; or both. (Section 65).

33. If any person below 18 years of age is employed in more than one mine on any day, his parents, guardian or custodian may be punished with a fine upto Rs. 50/- (Section 68).

34. If any mine is run without a manager, the owner or agent may be punished with imprisonment upto three months or with a fine upto Rs. 500/-; or both. (Section 69).

35. Whoever fails to give notice of any accidental occurrence or to post a copy of the notice on a special notice board, may be punished with imprisonment upto three months or a fine upto Rs. 500/-; or both. (Section 70).

36. No person shall interfere with, misuse or wilfully neglect to make use of any appliance provided for the purpose of health, safety or welfare of the workers, or wilfully do anything likely to endanger himself or others. (Section 72).

37. Whoever contravenes any provision of this Act or of any Regulation, Rule or bye-law, or of any order made thereunder, for which no penalty is expressly provided may be punished with imprisonment upto three months, or a fine upto Rs. 1,000/-; or both. (Section 73).

38. Whoever contravenes any provision of this Act or of any Regulation, Rule or Bye-law or of any order made thereunder may be punished:

- (a) if such contravention results in loss of life, with imprisonment upto one year or a fine upto Rs. 5,000; or both.
- (b) if such contravention results in serious bodily injury, with imprisonment upto six months or a fine upto Rs. 2,000/-; or both. (Section 74).

SIXTH SCHEDULE—(See Rule 80).

1

Coal Mines situated in the district of
Lakhimpur in the State of Assam.

2

MINES (POSTING UP OF ABSTRACTS) RULES, 1954¹

In exercise of the powers conferred by clause (m) of section 58 of the Mines Act, 1952 (XXXV of 1952), the Central Government hereby makes the following rules, the same having been previously published and referred to every Mining Board as required by sub-sections (1) and (4) of section 59 of the said Act, namely:—

1. **Short title.**—(1) These rules may be called the Mines (Posting up of Abstracts) Rules, 1954.

(2) They extend to the whole of India except the State of Jammu and Kashmir.

2. **Definition.**—In these rules, unless there is anything repugnant in the subject or context, "the Act" means the Mines Act, 1952 (XXXV of 1952), and "section" means a section of the Act.

3. **Posting up of Abstracts from the Act.**—(1) The abstracts of the Act contained in the Schedule annexed hereto shall be posted up outside the office of every mine in English, Hindi and either in the language of the district in which the mine is situated or the language understood by a majority of the persons employed in the mine, and shall be maintained in clear and legible condition.

(2) Notwithstanding anything in sub-rule (1), the Chief Inspector or an Inspector may require the said abstract to be posted at any other place or in any other language.

Schedule

INSPECTORS

1. Any Inspector may enter and inspect any mine (by day and night) and make such examination and enquiry as may be necessary, to determine the condition of the mine and to ascertain whether the provisions of this Act and of the rules, regulations, and bye-laws are being observed. If he has reason to believe that these provisions have been or are being contravened, he may search any place and take possession of any register or record concerning the mine. (Section 7).

2. Any Government servant, duly authorised by the Chief Inspector or an Inspector, may enter any mine for the purpose of surveying, levelling and measuring after giving at least 3 days' notice to the manager. (Section 8).

3. Every owner, agent and manager of a mine shall afford every Inspector and every person authorised under section 8 all reasonable facilities for making any entry, inspection, survey, measurement, examination or enquiry under this Act. (Section 9).

MANAGEMENT OF MINES

4. Every mine shall be under the control, management and direction of one manager having the prescribed qualifications. (Section 17).

5. The owner, agent and manager of every mine shall be responsible that all operations carried on in connection with the mine are conducted in accordance with the provisions of this Act and of the rules, regulations, and bye-laws and any order made thereunder. (Section 18).

PROVISION OF DRINKING WATER, AMBULANCE APPLIANCES AND LATRINES

6. In every mine, both above and below ground—

(a) A sufficient supply of cool and wholesome drinking water shall be provided and maintained at suitable points conveniently situated for all persons employed in the mine. (Section 19).

(b) A sufficient number of first-aid boxes shall be provided and maintained. (Section 21).

(c) A sufficient number of latrines and urinals, separately for males and females, shall be provided in every mine at suitable places accessible at all times to all persons employed in the mine. All latrines and urinals shall be maintained in a clean and sanitary condition. (Section 20).

ACCIDENTS

7. Where there occurs in or about a mine an accident causing loss of life or serious bodily injury or any dangerous occurrence, a notice in the prescribed form shall be sent

¹ These Rules were published under Ministry of Labour Notification No. S.R.O. 2403 dated the 12th July, 1954 in Gazette of India, Part II, Sec. 3, page 1797.

to the prescribed authorities and simultaneously a copy of such notice shall be posted at the mine on a special notice board and kept posted for not less than two months from the date of such posting. (Section 23).

8. Where any person employed in a mine contracts any disease connected with mining operations, the owner, agent or manager shall send notice thereof to the Chief Inspector and to such other authorities as may be prescribed. (Section 25).

HOURS AND LIMITATION OF EMPLOYMENT

9. No person shall work in a mine on more than six days in any one week. (Section 28).

10. If any person works, as provided under this Act, on any day of rest fixed for him, he should be given a compensatory day of rest within that or the following two months. (Section 29).

11. No adult shall work above ground in a mine for more than forty-eight hours in any week or for more than nine hours in any day and he shall have at least half an hour's rest after working for not more than five hours. The spread over of the period of work including rest interval shall not normally be more than 12 hours. (Section 30).

12. No adult shall work below ground in a mine for more than forty-eight hours in any week or for more than eight hours in any day, except that a pump-minder, an onsetter or attendant of continuously operated machinery may work for not more than nine hours on any day or for not more than fifty-four hours in any week. (Section 31).

13. Where a person works in a mine for more than forty-eight hours, whether above or below ground, he shall get, for such overtime work, wages at the rate of—

(a) twice his ordinary rate of wages, for underground work; and

(b) one and a half times his ordinary rate of wages for work above ground.

'Ordinary rate of wages' means the basic wages plus such allowances including the cash equivalent of the advantage accruing through the sale on a concessional basis of foodgrains and other articles but does not include a bonus. (Section 33).

14. No person shall be allowed to work in a mine who has already been working in any other mine within the preceding 12 hours. (Section 34).

15. Except as may be permitted under section 39(a), no person shall work for more than ten hours in any day, inclusive of overtime, nor shall the total number of hours of his overtime work exceed fifty in any one quarter. (Section 35).

16. The Manager of every mine shall post outside the office a notice of working hours and no person shall be allowed to work otherwise than in accordance with the notice. (Section 36).

17. The provisions regarding weekly day of rest, hours of work above and below ground and of section 36 shall not apply to supervising staff. (Section 37).

18. In case of an emergency, the manager may permit in accordance with the rules under section 39 persons to be employed in contravention of the provisions regarding hours of work. (Section 38).

EMPLOYMENT OF ADOLESCENTS

19. No person aged between 15 and 18 years shall work underground in a mine unless he has been certified as fit for work as an adult by a Certifying Surgeon and carries, while at work, a token giving a reference to such certificate and he shall have rest for at least half an hour after not more than four and a half hours of continuous work. He shall not be employed between 6 P.M. to 6 A.M. (Section 40).

20. A certificate of fitness granted or renewed for the purpose of section 40 shall be valid only for 12 months and may be conditional regarding employment in general or regarding the nature of work and may be revoked by a Certifying Surgeon if the holder of a certificate is no longer fit for the work specified in the certificate. Where a certificate or the renewal of a certificate is refused a Certifying Surgeon shall state his reasons for refusal if the person concerned so requires. The adolescent or his parents shall not be liable to pay any fees for medical examination under section 40 in all cases where he is sent by the manager of the mine in which he will be employed if found fit. (Section 41).

21. An adolescent, granted a certificate of fitness and working in a mine shall be considered to be an adult for the purposes of this Act. (Section 42).

22. Where an Inspector is of opinion that any person working in a mine without a certificate of fitness is an adolescent or that an adolescent working with such a certificate is no longer fit, he may ask the manager not to employ such person till he is examined or re-examined, as the case may be, and declared fit by a Certifying Surgeon or certified by him not to be an adolescent. (Section 43).

23. (1) No adolescent who has not been granted a medical certificate certifying that he is fit for work as an adult shall be employed or permitted to be employed above ground or in any workshop or power station in a mine or in any open cast workings in a mine—

(a) for more than four and a half hours in any day; or

(b) between the hours of 6 P.M. and 6 A.M.

(2) The period of work of all such adolescents employed in a mine shall be limited to two shifts which shall not overlap or spread over more than five hours each, and each such adolescent shall be employed in only one of the relays which shall not, except with the previous permission in writing of the Chief Inspector, be changed more frequently than once in a period of thirty days.

(3) The provisions of section 28 shall apply to such adolescents and notwithstanding anything contained in sub-section (1) of section 38 or in section 39, no exemption from the provisions of section 28 shall be granted in respect of any adolescent. (Section 44).

EMPLOYMENT OF WOMEN AND CHILDREN

24. No person below the age of fifteen years shall be employed in any mine or allowed to be present in any part of a mine which is below ground or in any open excavation in which any mining work is being done. (Section 45).

25. No woman shall be employed at any time of the day or night in any part of a mine which is below ground, and no woman shall be employed in any mine above ground or in open cast excavations except between the hours of 6 A.M. and 7 P.M. (Section 46 and Notification No. S.R.O. 1395, dated the 9th August, 1952).

REGISTRATION OF WORKERS

26. For every mine, there shall be kept a register of employees showing in respect of each person his or her name, age, sex, nature of employment, date of commencement of employment, the periods of work, the intervals and days of rest, the relay to which he or she belongs, reference to the certificate of fitness in case of an adolescent and the entries in the register shall be authenticated by the signature or thumb impression of the person concerned. There shall also be kept separate registers for work persons working (a) below ground, (b) in opencast workings, and (c) above ground showing in respect of each person the name, nature of his employment and the hours of relay and the relay to which he belongs. The register of persons employed below ground shall show at any moment the name of any person who is then present below ground in the mine. (Section 48).

LEAVE WITH WAGES

27. Every person employed in a mine who has completed twelve months' continuous service (not less than 100 attendances in case of loaders or piece-rated workers working below ground and not less than 265 attendances for other persons) in the mine, shall be allowed, during the following twelve months, leave with full pay:

(a) for fourteen days, in case of monthly paid staff;

(b) for seven days, in case of other workers.

No application for leave shall ordinarily be refused. If any person is discharged before he can take leave to which he is entitled he shall be paid his wages or pay for that period of leave. (Section 51).

28. For the leave allowed to a loader or a piece-rated worker employed below ground he shall be paid at the rate of daily average earnings during the month of December. For the leave allowed to a person who is paid weekly or monthly the rate shall be equal to his normal daily wages during the week preceding his leave. Daily average earnings or wages shall include cash equivalent of free foodgrains and other cash compensation drawn during the period concerned. (Section 52).

29. Any monthly paid employee who has been granted leave for ten days or more and any weekly paid employee or a loader or piece-rated worker working below ground who has been granted leave for five days or more shall be paid in advance the wages due for the period of the leave allowed. (Section 53).

PENALTIES

30. Any person obstructing an Inspector in the execution of his duties may be punished with imprisonment upto three months or a fine upto five hundred rupees or both. (Section 63).

31. Whoever makes, gives, or delivers any plan, return, notice, record or report containing a statement, entry or detail which is not to the best of his knowledge or belief true, may be punished with imprisonment upto three months or a fine upto five hundred rupees or both. (Section 64).

32. Whoever knowingly uses for himself a certificate of fitness granted (under section 40) to some other person or allows a certificate of fitness granted to him to be used by any other person, may be punished with imprisonment upto one month or a fine upto fifty rupees or both. (Section 65).

33. If any person below 18 years of age is employed in more than one mine on any day, his parents, guardian or custodian may be punished with a fine upto fifty rupees. (Section 68).

34. If any mine is run without a manager, the owner or agent may be punished with imprisonment upto three months or with a fine upto five hundred rupees or both. (Section 69).

35. Whoever fails to give notice of any accidental occurrence or to post a copy of the notice on a special notice board, may be punished with imprisonment upto three months or a fine upto five hundred rupees or both. (Section 70).

36. No person shall interfere with, misuse or wilfully neglect to make use of any appliance provided for the purpose of health, safety or welfare of the workers, or wilfully do anything likely to endanger himself or others. (Section 72).

37. Whoever contravenes any provision of this Act or of any regulation, rule or bye-law, or of any order made thereunder, for which no penalty is expressly provided may be punished with imprisonment upto three months, or a fine upto one thousand rupees or both. (Section 73).

38. Whoever contravenes any provision of this Act or of any rule, regulation, or bye-law or of any order made thereunder may be punished:

- (a) if such contravention results in loss of life, with imprisonment upto one year or a fine upto five thousand rupees or both;
- (b) if such contravention results in serious bodily injury, with imprisonment upto six months or a fine upto two thousand rupees; or both. (Section 74).

MINES (CERTIFYING SURGEONS) RULES, 1954 (DRAFT)

Arrangement of Paragraphs

1. Short title.
2. Definition.
3. Powers of Certifying Surgeon.
4. Duties of Certifying Surgeon.
5. Certificate of Fitness.
6. Duplicate Certificate.
7. Re-Examination.
8. Fresh Examination.
9. Metal Tokens.

MINES (CERTIFYING SURGEONS) RULES, 1954 (DRAFT)¹

1. **Short title.**—These rules may be called the Mines (Certifying Surgeons) Rules, 1954.

2. **Definition.**—In these rules, unless the context otherwise requires,

- (a) the "Act" means the Mines Act, 1952 (XXXV of 1952); and
- (b) "section" means a section of the Act.

3. **Powers of Certifying Surgeon.**—A Certifying Surgeon may within the local limits of his jurisdiction or in respect of mines or class or description of mines assigned to him make such inspection, examination or inquiry as he thinks fit for the purposes of the Act and it shall be the duty of the owner, agent or manager of the mines concerned to afford the Certifying Surgeon all reasonable facilities for carrying out such inspection, examination or inquiry as the case may be.

4. **Duties of Certifying Surgeon.**—(1) For the purposes of examination and certification of young persons who desire to obtain a certificate of fitness, the Certifying Surgeon shall arrange a suitable time and place for the attendance of such persons, and shall give previous notice in writing of such arrangements to the managers of mines concerned

¹ These Draft Rules were published under Ministry of Labour Notification No. S.R.O. 602 dated the 2nd March, 1954.

within the local limits of his jurisdiction or mines or class or description of mines assigned to him.

(2) The Certifying Surgeon shall, upon a request being made to him by the Chief Inspector or Inspector, carry out such examination and furnish him with such report as he may indicate in respect of any mine or class or description of mines in which operations involve any risk of injury to the health of any person or class of persons employed therein.

(3) Every certificate of fitness granted by the Certifying Surgeon shall be prepared by filling up the foil and the counterfoil of the certificate, on both of which shall be impressed the left thumb mark of the adolescent in whose name the certificate is granted.

(4) The Certifying Surgeon shall, when satisfied as to the correctness of the entries made therein sign the foil and initial the counterfoil of the certificate and shall deliver the foil to the applicant unless the adolescent has been examined in pursuance of the provision of sub-section (5) of section 41, in which case the Certifying Surgeon shall deliver the foil to the manager of the mine in which the adolescent desires to be employed.

(5) A Certifying Surgeon revoking a certificate under sub-section (2) of section 41, shall write the word "Revoked" in red ink on the foil and the counterfoil of the certificate.

5. Certificate of fitness.—A certificate of fitness granted or renewed in the Form annexed to these rules shall be deemed to be a certificate duly granted or renewed, as the case may be, in the manner provided for the purposes of sections 40, 43 and 47.

6. Duplicate Certificate.—(1) If the Certifying Surgeon is satisfied that a certificate of fitness granted under these rules has been lost or otherwise mislaid, he may on application, after such verification, as he deems fit, grant a duplicate certificate to the applicant. The word "Duplicate" shall be clearly written in red ink across any such duplicate certificate and initialled by him. The counterfoil of the certificate shall be simultaneously marked "Duplicate" and initialled.

(2) For every duplicate certificate granted under sub-rule (1), a fee not exceeding one rupee shall be payable by the applicant. The Certifying Surgeon shall maintain a register of all duplicate certificates so issued and shall initial each entry thereon.

(3) No duplicate certificate shall be granted to any adolescent otherwise than in accordance with the provision of this rule.

7. Re-Examination.—(1) Every adolescent in respect of whom a certificate of fitness has been issued, so long as he remains employed in a mine, shall be re-examined by the Certifying Surgeon within twelve months of the date of the examination immediately preceding.

(2) The Certifying Surgeon shall upon making such re-examination make necessary entries in the said certificate both on the foil and counterfoil and deliver the foil to the manager of the mine.

8. Fresh Examination.—(1) If any person sent up for medical examination in pursuance of section 40 or section 43 or section 47 is not certified to be fit by the Certifying Surgeon, he shall not, without the permission in writing of an Inspector, be sent for another medical examination unless a period of six months has elapsed from the time when he was last sent up for medical examination.

(2) Any certificate obtained in contravention of sub-rule (1) shall be void.

9. Metal Tokens.—(1) The Certifying Surgeon shall issue to every adolescent to whom a certificate of fitness is granted, a metal token stamped with the letter 'P' and bearing the same serial number as the certificate.

(2) The person to whom such token is issued shall so long as the corresponding certificate remains in force, retain such token in his immediate possession and shall not transfer it or dispose of it. In the event of the corresponding certificate being revoked, the token shall be returned to the Certifying Surgeon.

(3) A duplicate token may be obtained for the reasons, in the manner and subject to the condition specified in rule 6.

(4) A record of every token so issued and the person to whom it is issued shall be maintained by the Certifying Surgeon.

CERTIFYING SURGEONS UNDER THE MINES ACT, 1952

S. R. O. 1135 dated 23rd May, 1955—In exercise of the powers conferred by sub-section (1) of section 11 of the Mines Act, 1952 (XXXV of 1952), and in supersession of the notification of the Government of India in the Ministry of Labour, No. M. 41(20) 52 dated the 27th December, 1952, the Central Government hereby appoints the Medical Officers of the Mines Department, being qualified medical practitioners, specified in column 2 of the Schedule hereto annexed to be Certifying Surgeons for the purposes of the said Act, within

the local limits and for the class or description of mines specified against them in the corresponding entry in column 3 of the said Schedule—

Sl. No.	Particulars of Officers.	Local limits of jurisdiction or mines or class or description of mines.
1	2	3
1	Medical Inspector of Mines, Dhanbad.	All mines in India except in the State of Jammu and Kashmir.
2	Junior Labour Inspector of Mines, Dhanbad.	All mines in the States of Assam, Bihar, West Bengal, Orissa and Uttar Pradesh.
3	Junior Labour Inspector of Mines, Chhindwara.	All mines in the States of Mahya Pradesh and Vindhya Pradesh, Sasti Colliery in Hyderabad State and all mines in Bombay State excluding those in the district of North Kanara, Dharwar, Surat and north of river Tapti.
4	Junior Labour Inspector of Mines, Ajmer.	All mines in the States of Ajmer-Merwara, Rajasthan, East Punjab, Himachal Pradesh, Madhya Bharat, Saurashtra, Delhi, Kutch and in Patiala and East Punjab States Union. All mines in Bombay State situated on the north of river Tapti and those in the district of Surat.
5	Junior Labour Inspector of Mines, Nellore.	All mines in the States of Andhra, Madras, Mysore and Travancore-Cochin. All mines in Hyderabad State excluding Sasti Colliery. All mines in the district of North Kanara and Dharwar in the State of Bombay.

MYSORE GOLD MINES RULES, 1953

Arrangement of Paragraphs

CHAPTER I—PRELIMINARY

CHAPTER II—POSTING OF NOTICES, ETC.

CHAPTER III—SANITARY AND HEALTH PROVISIONS

CHAPTER IV—FIRST-AID AND MEDICAL APPLIANCES

CHAPTER V—FIRE RESCUE BRIGADE

CHAPTER VI—MISCELLANEOUS

MYSORE GOLD MINES RULES, 1953¹

In exercise of the powers conferred by Section 58 of the Mines Act, 1952 (XXXV of 1952), the Central Government hereby makes the following rules, the same having been previously published as required by sub-section (1) of section 59 of the said Act, namely:—

CHAPTER I—PRELIMINARY

- (1) These Rules may be called the Mysore Gold Mines Rules, 1953.
- (2) They shall apply only to gold mines in the State of Mysore.
- In these rules unless the context otherwise requires:—
 - (1) "the Act" means the Mines Act, 1952.
 - (2) "Section" means a section of the Act.
 - (3) "Superintendent" means the manager of a gold mine.

¹ These Rules were published under Ministry of Labour Notification No. S.R.O. 1787 dated the 17th September, 1953 in the Gazette of India 1953, Part II—Sec. 3, p. 1502. Chapters II, III and VI of the Rules have been rescinded by Section 84 of the Mines Rules, 1955.

- (4) "Medical Officer" is the duly qualified person appointed by the owner to have medical charge of the persons employed at the mine.
- (5) "Mining Officer" includes the Superintendent, Chief Underground Agent, Chief Surveyor, Chief Engineer, Chief Metallurgist, Chief Cashier and Accountant and their respective Assistants, and others holding posts of equal importance.

CHAPTER II—POSTING OF NOTICES, ETC.

3. For the purpose of making these rules known to all persons in and about the mine, printed copies thereof shall be posted in conspicuous places at the mine where they can be conveniently read, and every person employed in or about the mine is enjoined to thoroughly acquaint himself with them so far as they affect his duties.

4. All rules and notices shall be printed or written in such languages as the Chief Inspector shall direct and must be posted up in a position where they can be easily seen by persons frequenting the place.

5. All rules and notices posted in or about the mine must be authorised by the Superintendent.

6. Any person pulling down or otherwise defacing any rules or notices, when posted up, shall be guilty of a breach of these rules.

7. *Register of employees.*—The register maintained at every mine in accordance with sub-section (1) of Section 48 shall show the names and such other particulars of—(1) all persons directly employed in the mine; (2) all contractors and work persons they respectively employ; and (3) all mistries, blasters and engine drivers (if any) employed by the contractors.

8. The following persons shall be deemed to be persons holding positions of supervision or management or employed in a confidential capacity, within the meaning of Section 37 of the Act:—

- (a) "Mining Officer."
- (b) "Foreman", "Assistant Foreman", "Head Mistri" and "Electrician."
- (c) "Surveyor."
- (d) Clerks, Accountants and time-keepers.

CHAPTER III—SANITARY AND HEALTH PROVISIONS

9. The Superintendent shall provide or cause to be provided underground, a supply of wholesome drinking water at points reasonably accessible to working places.

10. At every mine a suitable change house or houses with accommodation proportionate in size to the number of persons employed shall be provided for underground workmen. Proper arrangements for bathing, changing and the drying of clothing shall be made.

No person shall use an engine or boiler house for the purpose.

11. At every mine latrine and urinal accommodation on a scale approved by the Inspector shall be provided both on the surface and in the underground workings.

12. All latrines and urinals in or about a mine shall be kept in a sanitary condition.

13. At every mine arrangements shall be made for keeping the working places and travelling roads both on the surface and underground clean from excreta.

14. No person shall pollute the underground workings with excreta. No person shall wantonly misuse or foul the latrines provided either on the surface or underground.

CHAPTER IV—FIRST-AID AND MEDICAL APPLIANCES

15. In all cases of accidents, the owner shall arrange for medical assistance to be rendered to the injured as speedily as possible and shall make the following provision for persons employed in operations conducted under a mining lease:—

- (1) If the number of persons employed daily below ground exceeds 500 or if the total number employed exceeds 1,500 one qualified Medical Officer residing within five miles of the mining block.
- (2) If the number of persons employed daily below ground exceeds 50 or if the total number employed exceeds 500, one Assistant or Sub-Assistant Surgeon, residing within five miles of the mining block.
- (3) If the total number of persons employed exceeds 250, one Assistant or Sub-Assistant Surgeon, residing within ten miles of the mining block.

The foregoing limits may be relaxed by the Chief Inspector in the event of the owner making other arrangements to suit the special circumstances of the work under his control.

16. In order to render immediate assistance in cases of injuries as broken bones, wounds, bleeding, contusion, scalding and suffocation, there must be ready at hand at every mine all such necessary articles and medicines as the Medical Officer shall direct and also an ambulance for the removal of injured persons; and so far as possible every person in charge of any work below ground shall be acquainted with the means of giving first-aid to persons injured.

17. At the head of every main travelling shaft an emergency station shall be provided and such emergency station shall be provided with at least the following:—

Two suitably constructed stretchers, two woollen blankets, two or more first-aid boxes, a supply of dressings and splints, Burrell masks, one portable oxygen inhalation apparatus.

18. One or more competent persons holding Ambulance Certificates shall be appointed to take general charge of the emergency station referred to in Rule 17 and be responsible for the upkeep of the apparatus and the appliances provided.

19. Every underground mining official shall carry, while on duty, a water proof box containing materials for first-aid.

CHAPTER V—FIRE RESCUE BRIGADE

20. There shall be organised and maintained competent Fire Rescue Brigades on the following scales:—

At every mine where the total number of underground employees is more than—

100—One brigade.

700—Two brigades.

Provided that the owner of a mine or the Superintendent shall be deemed to have complied with this provision if he has acquired the right of calling for brigades from a Central Rescue Station.

A Fire Rescue Brigade shall consist of not less than five persons employed at the mine carefully selected on account of their knowledge of underground work, coolness and power of endurance and certified to be medically fit, a majority of whom shall be trained in First-aid work.

CHAPTER VI—MISCELLANEOUS.

21. No person shall be permitted to take or consume any intoxicating drink or drug while at work in a mine and no person shall be permitted to enter or remain in or about a mine in a state of intoxication.

MYSORE GOLD MINES REGULATIONS, 1953

Arrangement of Paragraphs

CHAPTER I—PRELIMINARY

1. Short title and extent.
2. Definitions.

CHAPTER II—SURFACE PROTECTION

3. Fencing of subsidences.
4. Protection of public squares, etc.
5. Filling of excavations.
6. Protection of shaft mouths.
7. Abandoned trenches, etc., to be filled in.
8. Protection round prospecting trenches.
9. Removal of overburden in open workings.
10. Open workings.
11. Protection round open workings.
12. Fencing entrance to open workings.
13. Open workings provision of footpaths.
14. Restriction of weight of load in the case of women employees.
15. Poisonous water, etc.

CHAPTER III—WORKMEN

16. Engine drivers, etc., to have certificates.
17. Suspension or cancellation of certificates.

18. Qualifications for a certificate.
19. Periodical medical examination of engine drivers.
20. Fees.
21. Examination for a certificate.
22. Certificate to be with the Superintendent of Mine.
23. Transfer or disposal of metal checks by certificate holder prohibited.
24. Issue of duplicate metal checks.
25. Responsibility of employer towards new workmen.
26. Substitute workmen.

CHAPTER IV—UNDERGROUND WORKINGS

27. Foreman or other certified workman to be in charge of working place.
28. Responsibility of the person in charge.
29. Inspection of working places.
30. Record of inspection.
31. Supporting of shafts, etc.
32. Lining of shafts.
33. Inflammable timber not to be used.
34. Workings nearing water precautions.
35. Boundary Pillars.
36. Recognised travelling road.
37. Workman not to leave working place without the permission of mistri.
38. Mestri's duty.
39. Unauthorised persons—Prohibited from or remaining in working place.

CHAPTER V—PREVENTION OF FALL OF THINGS AND PERSONS

40. Precautions against fall of things, etc.
41. Opening into a shaft, etc., to be covered.
42. Precautions while sending material down chute, etc.
43. Protection for sinkers.
44. Shaft sinking covering.
45. Bamboo hats.
46. Winding compartment, provision against crossing.
47. Precautions to be observed while working in steep places.

CHAPTER VI—SHAFTS AND OUTLETS

48. Double outlet to surface.
49. Exceptions to Regulation 48.
50. Exceptions in certain cases.
51. Ladderways.

CHAPTER VII—INCLINES

52. Manholes.
53. Care of manholes.

CHAPTER VIII—WINDING GENERALLY

54. Electric hoists.
55. Testing of brakes.
56. Windlasses, etc.
57. Rope-shackles.
58. Buckets, etc., to be steadied.
59. Guides in vertical shafts.
60. How far buckets should be filled.
61. Buckets, etc. to be stopped above sink before being lowered.
62. Timber, etc., to be fastened while being hoisted.
63. Winding compartments entry prohibited.
64. Engines, brakes, operating gear, clutches, unclutching drums, interlocking device, etc.
65. Ropes—Quality strength.
66. Ropes—Attachment to drums.
67. Strength of rope, bar, link, chain, etc.
68. Winding during repairs, examination, etc., of shaft.
69. Provision of 'dogs' to runners.
70. Examination of brakes.
71. Rope Records Book.

CHAPTER IX—RAISING AND LOWERING OF PERSONS

72. Inspection of winding plant before being put into commission.
73. Winding Plant—Condition.
74. Depth Indicator.
75. Headgear clearance.
76. Overrun space below the lowest landing place.
77. Construction of cage.
78. Exemptions.
79. Number of persons to be carried.
80. Travelling outside conveyance.
81. Winding speed.
82. Travelling in cage with heavy articles exceptions.
83. Permission for conveyance of persons in certain cases.
84. Trial run after stoppage of winding.
85. Examination of winding plant.
86. Re-capping of rope.
87. Testing of winding rope.
88. Annealing.
89. New Rope particulars.

CHAPTER X—SIGNALS

90. Signals provision for.
91. Vertical shaft to be provided with two separate means.
92. When driver may start engine.
93. Cage, skip or bucket not to be removed until signal.
94. Who may give signals.
95. Code.
96. Notice of signals to be put up.
97. Duties of Banksmen, etc.

CHAPTER XI—TRAVELLING AND LADDER WAYS

98. Construction of ladders.
99. Provision of sollars.
100. Height of main drive.
101. Refuge places provision of, on haulage road.
102. Sollars in shaft ladderways.
103. Inclination of ladders.
104. Construction.
105. Projection of ladders.
106. Travelling on foot in shafts, exceptions.
107. Railing off ladderways.
108. Carrying tools, etc., on ladderways.

CHAPTER XII—VENTILATION, LIGHTING, ETC.

109. Provision of ventilation.
110. Collar of shaft to be kept clear.
111. When a working place considered unfit for working.
112. Mechanical aid.
113. Self-closing doors.
114. Wet drilling.
115. Prohibition of entrance into disused workings.
116. Stationary lights where.
117. Lights to be carried.
118. Fire prevention.

CHAPTER XIII—EXPLOSIVES

119. Storage of explosives.
120. Explosives to be of good quality.
121. Brands of fuge or explosives.
122. Explosives not to be kept in a dwelling house.
123. Underground magazine.
124. Explosives Storage Book.
125. Distribution of explosives.
126. To whom issued.
127. Record of issue and return.

128. Explosive carriers.
129. Explosives to be taken directly to the working place.
130. Carrying in suitable cases and the permissible quantity.
131. Quantity restricted to a working place.
132. Detonators to be carried separately.
133. Transport of explosives in shifts, etc.
134. Precaution before mine abandoned or workings discontinued.
135. Protection against fire.
136. Prohibition of taking naked light.
137. No smoking in magazine.
138. Scrap or broken portions of magazines.
139. Explosive not to be taken without permission.
140. Possession.
141. Tools for opening.
142. Transport in shaft notice.
143. Lowering.

CHAPTER XIV—BLASTING

144. Who may blast.
145. Preparation of Charges.
146. Precautions during preparation of charge.
147. Fuse capping.
148. Primer cartridge.
149. Tools.
150. Tamping.
151. Number of holes to be fired in a round.
152. Lighting fuses.
153. Warning before firing.
154. Precautions to be observed in the case of working places approaching each other.
155. Counting of shorts.
156. No re-entry until fumes are cleared.
157. Who should enter first.
158. Search for unexploded explosives after blast.
159. Plugging of sockets.
160. Examination of misfired holes.
161. Misfire to be reblasted.
162. Reporting of misfire.
163. Drilling not to be permitted until misfire reblasted, etc.
164. Deepening old holes.
165. Drilling in the vicinity of sockets precautions.
166. Who may handle explosives.
167. Blaster's responsibilities.
168. Precautions in using electrical firing cables.

CHAPTER XV—MACHINERY

169. Air receivers, etc., charge of.
170. Hydraulic testing—record of test.
171. Safety valves.
172. Fencing of machinery, etc.
173. Person in charge of machinery.
174. Repairing and oiling machinery in motion prohibited.
175. Shifting of driving belts.

CHAPTER XVI—ACCIDENTS, ETC.

176. Report of Accidents, etc.
177. When death results from serious injury.
178. Place of accident to be left untouched.
179. Reporting of non-casualty accidents.
180. Report of personal injury.

CHAPTER XVII—MINE PLANS

181. General plan of Mining Rights.
182. Surface Plan.
183. Underground Plans and Sections.
184. Sections of workings.

185. Scale of plans.
186. Bench marks.
187. Plotting of surveys.
188. Plans and Sections to be sent to Chief Inspector before abandonment of mine.
189. Survey of underground workings.
190. Withholding plans or concealing workings an offence.
191. Copies of plans to be deposited with Chief Inspector.

CHAPTER XVIII—GOVERNMENT RETURNS AND NOTICES

192. Monthly returns.
193. Annual returns.
194. Notice of commencement or discontinuance of mining.
195. Particulars of owner, etc., to be supplied to Chief Inspector.
196. Responsibility of owner on abandonment for surface protection, etc.
197. Underground workings approaching railway.
198. Inspector to take samples.

CHAPTER XIX—MISCELLANEOUS

199. Interference with or obstruction of persons in the discharge of their duties under the Rules be reported to a Mining Officer.
200. Periodical examination of working places, etc.
201. No admittance to a mine without previous consent.
202. Sleeping underground prohibited.
203. Unauthorised entry into shaft, etc., prohibited.
204. Workmen prohibited from wandering about.
205. Instruction of workmen in regulations.
206. Attestation of reports.
207. Observance of Regulations pertaining to posts.
208. Deputing of work.
209. Removal of Protective barriers, etc.
210. Causing destruction, theft, etc., offence.
211. Safety regulations, etc., to be complied with.
212. Workmen to strictly adhere to regulations.
213. Report of infringement of regulations.
214. Abetment of breaches of regulations or failure to report them an offence.
215. Persons guilty of wilful or negligent commission or omissions deemed to commit breach of regulations.
216. Suspension or discharge of workmen for breach of regulations.
217. Competent persons only to be employed.
218. Safety and discipline of workmen.
219. Power to postpone operation of regulations.

SCHEDULE

Notice of Accident.

Notes and Instructions.

MYSORE GOLD MINES REGULATIONS, 1953¹

In exercise of the powers conferred by Section 57 of the Mines Act, 1952 (XXXV of 1952), the Central Government hereby makes the following regulations, the same having been previously published as required by sub-section (1) of section 59 of the said Act, namely:—

CHAPTER I—PRELIMINARY

1. **Short title and extent.**—(1) These regulations may be called the Mysore Gold Mines Regulations, 1953.

(2) They shall extend to the whole of the State of Mysore and apply only to gold mines therein.

2. **Definitions.**—In these regulations unless the context otherwise requires:—

(1) "the Act" means the Mines Act, 1952.

¹ These Regulations were published under Ministry of Labour Notification No. S.R.O. 1788 dated the 17th September, 1953, in Gazette of India, 1953, Part II—Sec. 3, p. 1504.

(2) "the District Magistrate" in relation to any mine, means the District Magistrate of the district in which the mine is situated:

Provided that in the case of a mine which is situated partly in one district and partly in another, the District Magistrate for the purpose of these regulations shall be the District Magistrate authorised in this behalf by the Central Government.

(3) "Form" means a form as set out in the Schedule.

(4) "Superintendent" means the manager of a gold mine.

(5) "Chief Underground Agent" is the Officer of the mine who is in charge of the whole of the underground portion thereof under the direction of the Superintendent.

(6) "Assistant Underground Agent" is an officer whose duty it is to assist the Chief Underground Agent.

(7) "Chief Engineer" is the officer in charge of all the machinery of the mine.

(8) "Assistant Engineer" is an officer whose duty it is to assist the Chief Engineer.

(9) "Mining Officer" includes the Superintendent, Chief Underground Agent, Chief Surveyor, Chief Engineer, Chief Metallurgist, Chief Cashier and Accountant and their respective Assistants, and others holding posts of equal importance.

(10) "Underground Foreman" is a subordinate employee of the mine to whom the detailed execution of part of the duties of a Chief or Assistant Underground Agent is delegated.

(11) "Assistant Underground Foreman or Head Mestri" is a subordinate employee whose duty it is to see that work is done in a safe and workmanlike manner in the part of the mine assigned to him.

(12) "Workman" includes every person engaged in mining operations and subordinate in position to an Assistant Underground Foreman.

(13) "Working place" means any place above or below ground where any mining operation is being carried on, and includes any winze, pass, way or other means of access thereto, which is not used for general travelling purposes.

(14) "Working party" means a party of two or more men working at the same working place.

(15) "Blaster" means a workman employed in blasting operations, who prepares charges of explosives, charges holes and fires shots and includes a Blaster Mistri.

(16) "Mestri" means any workman in charge of a working party and the working place assigned to him.

(17) "Barksman" means a workman stationed at the shaft top specially appointed to superintend the raising and lowering of materials, tools and persons.

(18) "Signalman" means a workman specially authorised to transmit signals between the shaft top and the engine driver and between the shaft top and the stations below ground.

(19) "Bellman" means a workman specially appointed to superintend the loading and unloading of persons at any stations below ground, and the transmission of signals between such station and the shaft top.

(20) "Contractor" is one with whom a Company has contracted for the whole or any part of any work which is ordinarily part of the Mining Industry.

(21) "Contractor's Mestri" means any mistri in charge of a working party and the working place assigned to him.

(22) The "Immediate Superior" of any person employed in a mine is the person whether a Mining Officer, or Foreman, or Assistant Underground Foreman or Contractor or Mistri, from whom he takes orders. In the case of a workman other than a mistri, it will generally be the person in charge of his working place.

(23) "Medical Officer" is the duly qualified person appointed by the owner to have medical charge of the persons employed in the mine.

(24) "Shaft" means any adit, or vertical or inclined way, or opening, leading from the surface to the underground working, or from one portion of the underground workings to another which is or might be, used for winding, draining, travelling or ventilating purposes in connection with prospecting or mining operations.

(25) A "Shinking Shaft" is a shaft exclusively devoted to its depth being increased.

(26) "Winze" or "Rise" means a small underground shaft, either vertical or inclined.

(27) "Support" shall include timber work, masonry iron work or other means of securing ground.

(28) "Misfire" shall mean a hole in which the entire charge of explosive has failed to explode.

(29) "Socket" shall mean a hole or part of a hole remaining after blasting and which may or may not contain a remnant of a charge of explosives.

CHAPTER II—SURFACE PROTECTION

3. **Fencing of subsidences.**—Where mining operations have caused subsidences or cavities on the surface, or where such are likely to occur, such places shall be securely fenced in and conspicuous notice boards put up to warn persons off.

4. **Protection of public squares, etc.**—For the protection of public squares, roads, railways, cemeteries, rivers, water-rights, buildings and other property on the surface, the reefs, or other mineral deposits, must be left intact for such depth below them and for such horizontal distance as the Chief Inspector shall prescribe.

5. **Filling of excavations.**—All excavations made contrary to the provisions of the preceding regulation, shall be immediately filled up with rock, sand or earth by the person or persons responsible for such excavations.

6. **Protection of shaft mouths.**—The top and side entrances of all shafts, that are more than 10 feet deep, must be kept securely fenced or covered, except so far as may be necessary to allow of mining operations being efficiently carried on. The fence may be removed for necessary work if due precautions are taken.

7. **Abandoned trenches, etc., to be filled in.**—When any shaft, trench or other excavation more than 10 feet deep, made in the course of mining operations, is or has been abandoned or the working thereof discontinued, at whatever time the abandonment or discontinuance occurs, the owner and every other person interested in the land in which such excavation is situated shall without delay, either fill up such shaft, trench or other excavation, or protect the same by a substantial stone barrier on all sides at least 3 feet 6 inches high and 2 feet thick:

Provided that this regulation may be relaxed with the consent of the Inspector or of the District Magistrate in the case of an open working of which no side has a steeper slope than 45° and which is not considered to be dangerous.

8. **Protection round prospecting trenches.**—In digging prospecting trenches, the materials excavated must be used to form approximately equal ridges on all sides.

9. **Removal of overburden in open workings.**—In open workings, the overburden and all loose ground and materials shall be removed sufficiently far from the edge or otherwise and made secure to prevent danger to persons employed in the mine.

10. **Open workings.**—The sides of open workings shall be sloped, stepped or secured in such a manner as to prevent danger from falls of material and no side shall be cut or worked so that any portion of it projects or overhangs.

11. **Protection round open workings.**—Any place in or about an excavation which is dangerous shall be made safe or shall be kept securely fenced. Should any doubt arise as to whether a place is dangerous or not, the opinion of an Inspector or of the District Magistrate shall be conclusive on the point.

12. **Fencing entrance to open workings.**—Where an excavation, which has been found as the result of any mining operation, extends within fifty feet of a public road or dwelling house, and persons are likely to be endangered thereby, substantial fencing shall be erected and maintained around the excavation.

13. **Open workings provision of footpaths.**—Every foot-path along which loads are carried in open workings by human agency shall comply with the following requirements:—

(a) its breadth shall not be less than 3 feet;

(b) its slope shall be no greater than one vertical to two horizontal;

(c) at every place where its slope exceeds one vertical to four horizontal reasonably level steps should be provided such that the vertical height of every step does not exceed 7 inches and the dimension of every step measured horizontally from the edge to the back is not less than 14 inches.

14. **Restriction of weight of load in the case of women employees.**—Where women are employed in carrying loads, the weight of the load and the height and distance to which they have to be carried shall not be such as to involve risk of injury to the health of the women. If any dispute arises as to whether the risk of injury to health is involved, the decision of the Chief Inspector shall be final.

15. **Poisonous water, etc.**—Inadvertent access to water, which contains poisonous or injurious chemicals used in mining operations must be prevented by fencing or other effectual means and notices must be put up in suitable places warning persons against using such water.

CHAPTER III—WORKMEN

16. Engine drivers, etc., to have certificates.—Every driver of a winding engine and every blaster and underground Mestri, shall hold a certificate in that capacity from an Inspector:

Provided that the driver of a winding engine which has cylinders not exceeding seven inches in diameter and which is not used for raising and lowering persons shall not be required to hold a certificate.

17. Suspension or cancellation of certificates.—If in the opinion of an Inspector, the holder of a certificate has been guilty of negligence or of misconduct in connection with the discharge of his duties his certificate may be suspended or cancelled by an Inspector subject to confirmation by the Chief Inspector.

18. Qualifications for a certificate.—An applicant for a certificate shall have attained the age of 21 years, and—

- (a) for a certificate for work as a winding engine driver on the surface shall have had not less than one year's practical experience in winding operations;
- (b) for a certificate for work as a winding engine driver underground shall have had not less than three years' practical experience underground of which not less than one year shall have been in winding operations;
- (c) for a certificate for work as a blaster or underground mestri shall have had not less than three years' practical experience underground in metalliferous mines.

19. Periodical Medical examination of engine drivers.—Every certified engine driver in charge of a winding engine shall hold a medical certificate from a medical officer which shall be renewed or endorsed at intervals not exceeding three years or at such time or times as the Inspector may require, certifying that the holder is free from deafness, defective vision or any other infirmity, mental or bodily, likely to interfere with the efficient discharge of his duties.

20. Fees.—The following fees shall be paid by each applicant for a certificate under the preceding regulation 16:—

			Rs.	as.	p.
Engine Driver, I Class	7	8	0
Engine Driver, II Class	5	0	0
Underground Mestri	5	0	0
Blaster	5	0	0

NOTE.—(1) Except with the permission in writing of the Inspector, no person who does not possess a I Class Certificate shall be employed as a Driver of a winding engine, the cylinders of which exceed twelve inches in diameter. Such permission may be granted in cases of urgency or for specified periods to men on probation or in training.

Only Drivers holding I Class Certificates shall be permitted to drive electric winding engine of 75 H.P. and upwards.

(2) Engine-Drivers of the II class, when applying for I Class Certificate shall pay the difference between the I and II Class fees.

(3) Underground Mestries presenting themselves for examination may, at the same time, qualify as blasters without payment of any additional fee.

21. Examination for a certificate.—Every applicant shall appear before an Inspector for examination and, after satisfying the latter as to his competency, shall be entitled to receive a certificate and metal check marked with the registered number of the certificate.

Any applicant who fails to obtain a certificate may re-appear for examination on payment of half the original fee prescribed by regulation 20.

22. Certificate to be with the Superintendent of Mine.—Every certificate granted under these regulations shall be kept by the Superintendent in safe custody at the office of the mine at which the holder thereof is employed, and when the holder ceases to be employed at that mine, the certificate shall be returned at once to the office of the Inspector.

23. Transfer or disposal of metal checks by certificate holder prohibited.—The metal check given with each certificate shall remain always in the possession of the certificate-holder and must not be transferred or disposed of in any way. The possession of these checks by any person other than the holder of the corresponding certificate, is strictly prohibited and any person finding one shall return it to the office of the Inspector.

24. **Issue of duplicate metal checks.**—When a metal check granted under the preceding regulation is lost, a duplicate may be issued on payment of a fee of Rs. 2 provided the Inspector is satisfied with the identity of the applicant.

25. **Responsibility of employer towards new workmen.**—Any person who engages a workman who is new to the mine must arrange that he is properly looked after until he is acquainted with the mine.

26. **Substitute workmen.**—Any workman sending a substitute in his place shall first obtain the permission of his immediate superior and shall at the same time inform him whether the substitute is acquainted with the mine. If he is not, the person so informed shall see that he is properly looked after. In the case of a substitute for a mistri or blaster, the consent of an Underground Agent and in the case of a substitute for an engine driver, the consent of an Assistant Engineer must be obtained.

CHAPTER IV—UNDERGROUND WORKINGS

27. **Foreman or other certified workman to be in charge of working place.**—Every working place where work is being carried on shall be placed under the charge of an underground foreman or assistant underground foreman in the direct employment of the Company or a certified mestri or a blaster who shall be responsible for the safety of such place and shall be present.

When work is carried on by a contractor, it shall be his duty to see that a certified mestri or blaster employed by him is placed in charge of the work and such mestri or blaster shall be responsible for the safety of the working place and shall be present.

28. **Responsibility of the person in charge.**—The person in charge of a working place or place where men are stationed or pass, shall take all precautions to ascertain if the place is safe. If there is reason to suppose that there is any danger to persons working, stationed or passing therein, he shall proceed at once to remove the source of danger, and if he is unable to do so himself, he shall inform an Underground Agent or other Mining Officer or (unless he is himself an Underground Foreman or an Assistant Underground Foreman) an Underground Foreman or Assistant Underground Foreman of the fact as soon as possible, and in any case before leaving the mine. He shall, in the meantime, stop all work or access to such working place, except for the purpose of making the place safe or saving life. A Foreman or Assistant Underground Foreman who receives information under this regulation of danger to a working place shall be then considered in charge of such working place.

29. **Inspection of working places.**—Every working place and every place where persons are stationed or pass, shall be inspected at least once every day when work goes on there, during the morning shift and as far as practicable at least once a week in each of the other shifts by an Underground Agent or Underground Foreman or Assistant Underground Foreman or Head Mestri, who shall satisfy himself that the place is in a safe condition, and he shall report to the Superintendent any case of serious neglect on the part of the person in charge.

30. **Record of inspection.**—The examination under the above regulation of any shaft, by which men enter or leave a mine must be made by an Underground Agent or specially selected Underground Foreman or an Assistant Underground Foreman and the result of one such examination in every week must be entered in a book to be kept on the mine.

31. **Supporting of shafts, etc.**—All shafts in use and all underground workings in which the ground is not sufficiently firm must be made secure with suitable support and such support must be renewed as often as necessary to ensure the safety of the workmen and until so secured or renewed no person shall travel or work therein except for the purpose of making the place secure. When it is absolutely necessary to work below ground suspected to be unsafe, which cannot be removed or permanently secured at once, temporary supports shall where practicable be employed.

32. **Lining of shafts.**—The permanent timbers or lining of brick, concrete or masonry in a shaft either vertical or inclined in the course of sinking shall at no time be more than 20 feet from the shaft bottom.

The provisions of regulation 32 shall not apply—

- (i) When iron or steel rings with a lagging of planks are used below the permanent lining of brick, concrete or masonry in circular or elliptical shafts and are kept close to the shaft bottom. In these cases the permanent lining of the shaft shall at no time be more than 60 feet from the shaft bottom.
- (ii) In winzes not exceeding 8 feet in diameter the amount of timbering and its distance from the winze bottom shall be determined by the Agent in charge.

(iii) When cutting stations at levels temporary supports should be used as may seem necessary.

(iv) In special cases when the sanction of the Inspector has been obtained.

33. Inflammable timber not to be used.—In timbering a shaft, care shall be taken that the wood, employed in places where the ground is dry shall not be of an easily inflammable nature and suitable means shall be provided for checking any outbreak of fire.

34. Workings nearing water Precautions.—Where a place is likely to contain a dangerous accumulation of water, a working approaching it shall not at any point within 40 yards exceed 8 feet in width and 8 feet in height and there shall be constantly kept at a sufficient distance not being less than five feet six inches in advance at least one bore-hole near the centre of the working and sufficient flank bore-holes on each side.

35. Boundary Pillars.—In the underground mining operations the ground on the inside of the boundary lines must be left intact for a width of 6 feet from such boundaries but the working, cutting through or removing these boundary pillars is allowed by agreement between the owners of the adjoining mines.

36. Recognised travelling road.—An underground workman commencing work shall proceed to his working place by the recognised travelling road and shall not without due cause stop or loiter on the way. On leaving work, he shall again proceed to leave the mine as directly as possible along the recognised travelling road.

37. Workman not to leave working place without the permission of mestri.—A workman having reached his working place shall commence work under the direction of his mestri and shall not leave the working place until the end of his shift without permission of his mestri.

38. Mestri's duty.—Every mestri or other person in charge of a working party, shall see that none of the workmen forming the party shall leave the working place without his permission. He shall report to an Underground Foreman any workman so leaving without permission.

39. Unauthorised persons—Prohibited from or remaining in working place.—Every mestri or other person in charge of a working place shall see that no other person except those workmen who are on duty at the said working place remain in or at the place and shall report to an Underground Foreman any unauthorised person so doing.

CHAPTER V—PREVENTION OF FALL OF THINGS AND PERSONS

40. Precautions against fall of things, etc.—Tools, wood, stones or any other articles shall not be put down or allowed to remain in such a position in or near shafts or winzes or openings into stopes where work is going on as may result in their falling into them. When a shaft, winze, rise, chute or stope leads directly into a travelling road or place where persons are stationed or at work the traffic at such places must be guarded against danger from falling articles.

41. Opening into a shaft, etc., to be covered.—Every opening into a shaft, winze, chute or sliding hole and any opening into a stope more than ten feet deep below a drive and other dangerous openings shall be provided with a barrier or cover in order to prevent persons or things from falling into them; and the barrier or cover may be temporarily removed when necessary, provided proper precautions are taken to prevent danger to persons.

42. Precautions while sending material down chute, etc.—No person shall cast any material down any chute, pass, stope or other place until he has made himself sure that no person is in the way.

43. Protection for sinkers.—Men engaged in sinking or in repairing any portion of a shaft must be protected by a suitable covering from objects falling from above. The ladderway may form part of such covering.

44. Shaft sinking covering.—Where a winding engine is used at a shaft in the course of sinking, no person shall be allowed to work at the bottom of such shaft unless protected by an adequate covering extending over the whole area of such shaft, sufficient space only being left therein for the passage of any sinking cage, skip, bucket or other means of conveyance. In the case of vertical shafts, such covering shall be situated not more than 75 feet from the shaft bottom. In the case of inclined shafts such covering shall be situated not more than 100 feet from the shaft bottom except with special permission in writing from the Inspector.

45. Bamboo hats.—No person shall work underground unless he wears a hard or bamboo hat of a type approved by the Chief Inspector.

46. Winding compartment, Provision against crossing.—At every shaft station where it is necessary for workmen to pass from one side of the shaft to the other, provision shall be made for them to do so without entering or crossing a winding compartment. Such passage shall be securely fenced off from moving parts of machinery.

47. Precautions to be observed while working in steep places.—No member of a gang shall work or be caused or permitted to work at any place with an inclination of more than 45° where inadvertent slipping or overbalancing may result in his sliding down, unless he is secured by a life-line or otherwise safeguarded.

CHAPTER VI—SHAFTS AND OUTLETS

48. Double outlet to surface.—(1) No Owner, Agent or Superintendent of a mine shall employ any person in a mine or permit any person to be in a mine for the purpose of employment therein, unless—

There are at least two shafts or outlets with which all the underground workings of the mine have communication, so that such shafts or outlets afford separate and efficient means of ingress and egress available to all persons employed in the mine whether the shafts or outlets belong to the same mine or to more than one mine.

(2) **Distance between outlets.**—Provided also, that such shafts or outlets must not at any point be nearer to one another than 30 feet and that there is between two such shafts, or outlets a communication in the mine not less than 4 feet high and 4 feet wide, and that sufficient means of ingress and egress are provided at each shaft.

49. Exceptions to Reg. 48.—The provisions of Regulation 48 shall not apply—

- (1) to any shaft which is actually being sunk;
- (2) to any work for the purpose of opening up communication; or
- (3) to any work for the purpose of opening out the mine or proving or searching for minerals which does not continue for more than one year or does not extend for more than 50 feet from the shaft.

50. Exceptions in certain cases.—The provisions of these regulations shall also not apply—

- (1) to any other work for the purpose of opening out the mine or proving or searching for minerals;
- (2) in case of an accident to a shaft;
- (3) if the mineral would not repay the cost of a second shaft;
- (4) in other cases where the circumstances of the case would render the provision of two shafts not reasonably practicable and where the rock is firm and there is no reason to apprehend danger from water or noxious gases:

Provided that the consent of the Chief Inspector is previously obtained.

51. Ladderways.—Where there is only one shaft and it exceeds 100 feet in depth and is not merely a sinking shaft, it shall be provided both with ladders and with other means of raising and lowering men.

CHAPTER VII—INCLINES

52. Manholes.—Every underground plane on which persons travel on foot, which is self-acting (that is to say, the motive power is the weight of the load in the wagon), or worked by an engine, windlass or gin shall be provided (if exceeding 90 feet in length) with some proper means of communicating distinct and definite signals between the stopping places and the ends of the plane shall be provided in every case with sufficient manholes or places of refuge at intervals of not more than 60 feet. No person shall be allowed to travel on foot on any such place if there is not room for a person to stand between the tracks and one of the wells.

53. Care of manholes.—Every manhole and space for a place refuge shall be constantly kept clear and no person shall place anything in a manhole or such space so as to prevent access thereto.

CHAPTER VIII—WINDING GENERALLY

54. Electric hoists.—All electric hoists fitted with mechanically operated brakes shall be so installed that—

(a) **Automatic brakes.**—The mechanically operated brakes will be applied automatically the moment the power supply fails;

(b) **Circuit breaker.**—In case of a heavy overload, such as would be caused by the shaft conveyance leaving the rails or becoming jammed in the shaft, a circuit-breaker will cut off the power and thus allow the mechanically operated brakes to come into play;

(c) **Overwind device.**—A suitable overwind device, which can be set to engage shaft conveyance at any point in the head frame, will cut off the current, in case of an overwind past this point, and thus allow the mechanically operated brakes to come into play. In default of a device of this nature the hoist shall be equipped with some other form of satisfactory and dependable overwind device. Such devices shall be tested out by the hoistman at least once a week;

(d) **Brakes operated by mechanical means.**—The brakes shall, on failure of the power supply, be put into play by mechanical means, preferably gravity, and shall in no case be operated by an auxiliary electric current.

55. **Testing of brakes.**—The operator of a hoisting engine shall not, after going on shift, hoist men until he has satisfied himself by actual test that the hoist-brakes are in good working condition; and, when the hoist-engine is fitted with a friction clutch, it shall be similarly tested.

56. **Windlasses, etc.**—Windlasses, whims and whips in use at shafts and winzes shall be provided with a stopper, lynch-peg or other reliable holder.

57. **Rope-shackles.**—The connection between the rope and the bucket, skip or other conveyance must be of such character that no accidental disconnection can take place and care must be taken that the hooking on and off buckets is done without danger to the workmen.

58. **Buckets, etc., to be steadied.**—(1) No bucket or other means of conveyance shall be allowed to leave the top or bottom of the shaft or winze unless the workman in charge thereof has steadied or caused it to be steadied.

(2) In a vertical shaft in the course of sinking except at time of blasting, the bucket or kibble shall be raised from the bottom slowly and shall not be accelerated until the rider has been picked up.

59. **Guides in vertical shafts.**—Vertical shafts exceeding one hundred feet in depth shall be provided with guides for kibbles unless exempted in writing by the Chief Inspector.

Such guides shall always be kept extended down to the lowest set of timbers; also the crosshead shall be allowed to travel to the lowest set but one and in no case shall the lowest set of timbers be more than fifty feet from the shaft bottom.

60. **How far buckets should be filled.**—In hoisting, the bucket, skip or other receptacle shall not be filled to such a height that any of the contents can fall out and in no case above the level of the brim.

61. **Buckets, etc., to be stopped above sink before being lowered.**—Where a winding engine is used at a shaft in the course of sinking, the cage, skip or bucket or other means of conveyance shall not be lowered directly to the bottom of the said shaft if men are there present but shall be stopped at least 15 feet from the said bottom until the signal to lower it further has been given by one of the sinkers thereat.

62. **Timber, etc., to be fastened while being hoisted.**—In hoisting or lowering timber, tools, etc., ends projecting above the top of the cage, skip or bucket must be securely fastened to the rope or bow. If a detaching hook is employed between the rope and the conveyance, care must be taken to secure it to any material which may project above it.

63. **Winding compartments entry prohibited.**—Entering any section of a winding compartment of a shaft while winding is going on in that section is prohibited except in cases of necessity.

64. (1) **Engines, brakes, operating gear, clutches, etc.**—When winding is effected by means of an engine each drum must be provided with an adequate brake so arranged that it can be easily manipulated by the engine driver when standing at the levers controlling the engine.

(2) The operating gear of the clutch of the drum shall be provided with locking gear to prevent inadvertent withdrawal of the clutch.

(3) **Unclutching drums.**—The driver of a winding engine shall not unclutch a drum of his engine until he has assured himself immediately beforehand by testing the brake of the drum against the full power of the engine that the brake is in proper condition to hold the load suspended from the said drum.

(4) When the drum is unclutched the brake shall only be used for the purpose of maintaining such drum stationary. Lowering from an unclutched drum is not allowed.

(5) **Interlocking device.**—Every winding plant used for the raising and lowering of persons shall have a suitable interlocking device fitted so that it is impossible to unclutch any drum unless the brakes of such drum are on and that it is impossible to release the brakes until the clutch is fully engaged and securely locked.

(6) Lowering or raising of persons in an unclutched cage or skip is prohibited.

65. Ropes—Quality strength.—Ropes used for winding must be in good condition and of good quality and manufacture. The wires used in the construction of the ropes shall be of sizes suitable for use with the sheaves and drums fitted.

66. Ropes—Attachment to drums.—The rope shall be securely fastened to the drum and there shall be at least three turns of rope on the drum when the cage, skip or bucket is at its lowest point in the shaft.

67. (1) No rope, bar, link, chain or other connection shall be used for winding purposes unless it is of good quality and manufacture and free from any patent defect and of adequate calculated strength.

(2) Strength of bar, etc.—Every rope used for winding purposes in shafts or winzes over one hundred feet in depth, measured on an incline or vertical as the case may be, shall be made of steel wire and the gauge of the wires used in the construction of such rope shall be suited to the diameter of the sheaves and drums fitted.

(3) At the request of the Inspector an adequate sample from the end of any winding rope shall be supplied to him.

68. Winding during repairs, examination, etc., of shaft.—**(1)** No person shall effect repairs, conduct any examination, or do any work in a compartment of a shaft or of a headgear whilst winding operations are being carried on in such compartment and no winding shall be carried on or permitted in any compartment of a shaft whilst persons are engaged in effecting repairs in or in examining such shaft or compartment of a headgear or performing any other work therein, except—

(a) where persons are so engaged below the lowest point from which it is required that winding shall take place during such repairs, examination or work;

(b) where persons are so engaged in a compartment other than that in which it is required that winding shall take place:

Provided that in either of such cases persons are securely protected from any skip, cage or other winding apparatus, as well as from falling stones and falling materials; or

(c) where winding is necessary for the purpose of such repairs, examination, or work; or

(d) where such person is engaged in filling skips at ore chutes, if such person is securely protected in a refuge place of adequate dimensions fitted with a signalling device to the authorised persons so arranged that no signal can be given on such device unless the operator is completely inside such refuge place.

(2) The person or persons in immediate charge of any repairs, examination, or work in a shaft shall warn the engine driver or drivers who may be on duty at the time at such shaft that such repairs, examination, or work are about to be undertaken, and shall, where practicable, forthwith enter such warning in the driver's log book provided and such entry shall be countersigned by the driver on duty at the time at such shaft and by the driver relieving him. Where it is not practicable for the person or persons in charge of such repairs, examination or work to enter such warning, the entry shall be made by the engine driver on duty. The entry shall be cancelled by the person or persons in immediate charge of such repairs, examination or work, on completion thereof.

69. Provision of 'dogs' to runners.—Whether detaching hooks for releasing the rope and hanging up the cage, or skip in case of an overwind are provided or not, the runners shall be sprung or provided with 'dogs' or other device for holding up the cage or skip in all vertical shafts.

70. Examination of brakes.—The brakes, shackle and all other parts of the winding gear shall be carefully examined once in every twenty-four hours by a competent person specially appointed for the purpose and a report of every such examination shall be entered forthwith in a book provided for the purpose. The Inspector shall have power to exempt in writing small winding gears and hoists from the provisions of this regulation.

71. Rope Records Book.—**(a)** A register shall be kept at every mine in which the following particulars (obtained from the makers) of all new winding ropes shall be entered in ink and certified to be true by the Superintendent. Each rope, as soon as received, shall be given a serial number in the Register.

Particulars—

Name and address of manufacturer

Date of manufacture

Date of receipt at mine

Length of rope in feet

Diameter and circumference of rope in inches or in the case of flat ropes width and thickness of rope in inches.

Weight per foot in lbs.

Construction of rope—

Number of stands

Class of core

Character of 'lay', etc.

Construction of strands—

Number of wires in strand

Diameter of wires (decimals of an inch)

Class of core

Class of steel of which wire is made

Breaking stress of steel of which wire is made (tons of 2,000 lbs. per square inch).

Breaking stress of rope (tons of 2,000 lbs.).

(b) A rope Record Book shall be kept at every mine in which the following particulars of all ropes in use on winding gears, which have not been exempted from the provisions of regulation 70 shall be entered in ink, each entry being signed by the person responsible for the examination of the rope:—

Particulars—

Name of shaft at which rope is in use.

Compartment in which rope is in use

Serial number of rope in Register

Whether rope is new or if not reference to previous record

Date on which rope is put on

Dates of shortening and number of feet removed

Date of recapping

Dates of turning end for end

Dates of tests after shortening (if any)

Breaking stress of wires at these tests

Dates when rope taken off

CHAPTER IX—RAISING AND LOWERING OF PERSONS

72. Inspection of winding plant before being put into commission.—No winding plant shall be used for raising and lowering persons unless permission in writing has been obtained from an Inspector. Before giving his permission, the Inspector shall satisfy himself that the provisions of the regulations have been duly and reasonably complied with not only in regard to the winding plant proper but also in regard to the headgear, shaft, runners, cages or other conveyances, landing arrangements and signals; and that the condition of the same is satisfactory.

73. Winding Plant-Condition.—The winding engine shall be such that—

(a) When running at various speeds with light and heavy loads it can be readily slowed and stopped and after stopping can be immediately started again in either direction by the engine driver;

(b) it can lift from bottom to top of shaft or winze the maximum unbalanced load on one drum;

This provision shall not apply in cases where other means exist enabling persons employed below to reach the top of such shaft or winze.

(c) Each winding drum when unclutched from the engine can be maintained in a position of rest by means of its own brake or brakes with no more slipping than 1 ft. when the conveyance is loaded to double the maximum permitted weight of persons or mineral whichever is the greater.

In estimating the total weight of persons for the purposes of this regulation and of regulation 85 (6) (b) one hundred and twenty pounds shall be allotted for each person.

(d) There shall be on the drum of the winding engine such flanges or horns and also, if the drum is conical or spiral such other appliances as may be sufficient to prevent the rope from slipping off or coiling unevenly.

74. Depth Indicator.—Every winding engine shall, in addition to any marks on the rope, be provided with reliable depth indicators conveniently situated which will clearly and accurately show to the engine driver at his driving seat at all times—

(a) the position of the cage, skip or other means of conveyance; and

(b) at what place in the shaft changes of gradient necessitate reduction in speed;

(c) in the case of shafts exceeding three hundred feet in depth the indicator shall ring a bell in the engine room when the ascending conveyance is 60 feet below the collar of the shaft.

75. Headgear clearance.—The headgear shall except in such cases as may be exempted in writing by the Chief Inspector from the requirements of this section be carried without obstruction to the cage or skip-way to such height as to allow a clearance of at least 25 feet in which the cage, skip or other means of conveyance can travel freely above the highest passenger stopping place in case of an overwind.

76. Overrun space below the lowest landing place.—The lowest passenger landing place in any shaft exceeding, 1,000 feet in depth other than a sinking shaft shall have at least 25 feet of un-obstructed overrun space below it in which the conveyance can freely travel:

Provided that the Chief Inspector may grant exemption in writing from this regulation under such conditions as he may prescribe.

77. Construction of cage.—Every cage or other conveyance used in a vertical or steeply inclined shaft shall be provided with a roof or top cover and with proper safety catches where practicable. Cage entrances shall be provided with doors designed to prevent any portion of the body of any person travelling therein from coming in contact with the sides of the shaft. The doors shall be constructed so that they cannot open outwards, and shall be provided with a latch or other fastening to prevent them opening of themselves.

78. Exemptions.—Regulations 72, 73 and 74 shall not apply to sinking or prospecting shafts not exceeding 2[400 feet] in depth.

79. Number of persons to be carried.—The maximum number of persons allowed to travel in a cage or other conveyance shall be fixed by the Inspector of Mines and shall be kept posted up at each landing place.

80. Travelling outside conveyance.—Every person who travels in a cage or other conveyance shall ride in it and not outside or on the edge. This does not apply to a person who is slowly lowered or raised for the purpose of examining the shaft.

81. Winding speed.—At any shaft where the winding plant is not provided with a suitable device for preventing overwinding, the cage or other conveyance shall not be hoisted at a speed exceeding 250 feet per minute when it is within 60 feet of the collar of the shaft.

82. Travelling in cage with heavy articles exceptions.—(1) No person shall travel in any cage, skip or bucket with any heavy articles specially drill rods or tools, unless such drill rods or tools are carried in suitable slings or containers. This regulation shall not apply—

- (i) to persons especially authorised to travel with and distribute such articles;
- (ii) to persons in charge of underground works;
- (iii) to sinkers in a sinking shaft; and
- (iv) to workmen employed in repairing a shaft.

(2) No person shall ride in a shaft on a cage, skip or bucket loaded with mineral or material;

Provided that in the case of cages having more than one deck, an Inspector may by order in writing permit persons to ride in the upper compartment when minerals or materials are hoisted.

83. Permission for conveyance of persons in certain cases.—In the case of cages or other conveyances which do not conform to the regulations regarding the winding of persons the Superintendent may obtain the special sanctions of the Inspector to permit mining officers and officials, certificated mestris and blasters and sinkers and workmen engaged in repairing the shaft to ride down therein provided all available precautions are taken.

84. Trial run after stoppage of winding.—After any stoppage of winding for repairs, or for any other purpose, exceeding two hours duration the cage or other conveyance must be run a complete trip up and down the working portion of the shaft before any person is allowed to ride therein.

85. Examination of winding plant.—Where winding of person in accordance with the foregoing regulations is permitted, the following provisions shall have effect, namely:—

(a) One, or more than one, competent person, specially deputed by the Superintendent for the purpose, and whose name or names must be registered by him in a record book termed the Machinery Record Book, shall carefully examine.

² The figures and word were substituted for the figures and word "200" by the Ministry of Labour Notification No. S.R.O. 525 dated the 28th February, 1955.

- (1) *Ropes, cages, etc.*—At least once in each day the winding ropes and the attachments thereof to the drums and to the cages, skips or other means of conveyance, the brakes and depth indicators, the cages, skips or other means of conveyances and any safety catches attached thereto and the pulley wheel and all and every external part of the winding arrangements upon the proper working of which the safety of persons depends;
- (2) *Guides, compartments, etc.*—At least once in each week, the guides and the winding compartments generally, the signalling arrangements and the external parts of the winding engine;
- (3) *Engine.*—At least once in each year, the winding engine as to the working condition of the internal parts;
- (4) At least once in each calendar month at intervals not exceeding 45 days, the structure of the winding rope with a view to ascertaining the amount of deterioration thereof. For the purpose of this examination, the rope must be thoroughly cleansed at places to be selected by an engineer who shall note any reduction in the circumference of the rope, the superficial condition of the wires as to where corrosion, fractures and brittleness and all other data necessary for ascertaining the amount, extent and distribution of the rope;
- (5) At least once in each calendar month at intervals not exceeding 45 days, an engineer or competent person, shall examine the connection between the rope and the cage, skip, or other means of conveyance.

A true report of the result of every examination abovementioned shall be recorded without delay in the Machinery Record Book, which must be kept at the mine specially for the purpose and shall be signed by the person who made the inspection. Should, as the result of such examination, any weakness or defect be discovered by which life or limb may be endangered, the defect shall immediately be reported to the Superintendent and remedied; and no person shall be lowered or raised until the defect is made good.

- (6) *Rope test.*—When a new winding rope is not accompanied by a test certificate from the country of manufacture showing the amount of its breaking load and that such amount has been ascertained by actual test, such rope shall not be used unless a portion thereof not less than 10 feet in length has been cut off and tested. The test shall be at the expense of the owner.

(b) *Ratio of breaking load to maximum working load.*—Unless exemption has been obtained from the Chief Inspector in consideration of the great depth of the shaft or of the low winding speed, no winding rope shall be used for the raising and lowering of persons or material when the breaking load at any one point therein has become reduced to less than six times the maximum working load.

The maximum working load shall include the weight of the rope in the shaft when the cage, skip or other means of conveyance is at the lowest working point and the weight of such conveyance and its attachments with the authorised load of persons or material.

(c) *Defective rope not to be used.*—So soon as a rope becomes defective, it shall no longer be used for the transport of persons, unless the damaged part be at the end and be cut off.

(d) *Spliced rope, use of.*—A rope, out of which any defective portion has been cut and the ends again spliced, and ropes which have been previously in use in places beyond the Superintendent's control, shall not be used to raise or lower persons.

(e) *Spare ropes.*—At every mine, at least one spare rope, suitable for use in any shaft in which persons are raised and lowered, shall be kept in reserve.

(f) *Single-linked chain-use of subject to sanction.*—A single linked chain shall not be used for raising or lowering persons or for attaching the rope to the skip or cage, except with the sanction in writing of the Inspector.

(g) *Open hook not to be used for attaching rope to cage.*—No open hook shall be used for attaching the rope to skip, cage or bucket used for raising or lowering persons.

86. Re-capping of rope.—At least once in six months the winding rope shall be re-capped, a portion thereof not less than 6 feet in length being at the same time cut off the lower end.

87. Testing of winding rope.—At least once in six months or at a shorter interval if the Chief Inspector so decides, the Superintendent of the Mine shall have every winding rope tested for its breaking at a recognised mechanical laboratory and a copy of the certificate showing the result of such test shall be furnished to the Inspector.

88. Annealing.—At least once in six months the connection between the rope and the cage, skip or other means of conveyance shall be annealed or replaced.

89. New Rope particulars.—When a new winding rope is put on, the particulars thereof specified in regulations 71(a) and (b) and 85(a) and (b) shall be forwarded in writing to the Inspector.

CHAPTER X—SIGNALS

90. Signals provision for.—At all winding shafts exceeding one hundred feet in depth, arrangements must be provided for transmitting distinct and definite signals from the various levels in use and the shaft top, and between the shaft top, and the engine driver. Where persons are raised and lowered, arrangements shall also be made for return signals.

91. Every vertical shaft which is in the process of being sunk shall be provided with two separate means in respect of each engine whereby persons employed in such process can signal effectively from any depth in the shaft to the engine driver.

92. When driver may start engine.—The engine driver shall not set the engine in motion without having received a definite signal to do so. Neither the engine driver nor banksman nor signalman shall act on any signal of the correctness of which he has any doubt, unless he believes it may possibly be the signal to stop.

93. The signalman, the banksman or bellman shall not permit the cage, skip or bucket to be moved from any landing or filling place in the shaft unless he has received a signal from that place and, if persons are to be raised or lowered, has returned the same.

94. Who may give signals.—Only persons specially authorised by the Superintendent for the purpose are allowed to give signals.

95. Code.—The following signals must be uniformly adopted in all mines:—

“One”—meaning to stop.

“Two”—meaning to lower.

“Three”—meaning to raise.

Additional signals shall be sanctioned by the Superintendent and must not interfere with the above code.

96. Notice of signals to be put up.—Notices explaining the meaning of all permanent signals must be kept posted up in the engine room, at the shaft top and at all signal stations below ground.

97. Duties of Banksmen, etc.—(1) Before giving any signal to raise or lower a cage or skip for the conveyance of persons, it shall be the duty of the banksman, signalman, bellman or lander, as the case may be, to ensure that the door or doors, gate or gates of such cage and the door or doors, gate or gates or barriers at the stations or landing platforms are properly shut or where possible the cover of such skip is properly fixed, as the case may be, and the passengers properly placed in the conveyance or all out of the conveyance and clear of it.

(2) The banksman, signalman, bellman or lander shall, save as provided in Regulation 82,

(a) not allow any person to travel in a cage or the same deck of a cage or skip or other means of conveyance which is simultaneously used for the winding of mineral or material;

(b) not allow any person to travel in a cage, skip or other means of conveyance with explosive other than those carried by a blaster or with any drills, tools or other heavy articles:

Provided that the Superintendent may, by an authorisation in writing, permit a person who distributes drills, tools, or other heavy articles to travel in a cage, skip or other conveyance with such drills, tools or other heavy articles.

(c) not allow any person to ascend or descend a shaft or winze on the top of a cage or on the side, bow or rim of any skip, bucket, kibble or any truck or other means of conveyance except as provided in Regulation 80;

(d) acquaint himself with the number of persons authorized by the Inspector to travel at any one time in any cage, compartment of a cage, skip, bucket or other means of conveyance and shall not allow a greater number of persons than is authorised by the Inspector;

(e) not allow any other person to give signals.

CHAPTER XI—TRAVELLING AND LADDER WAYS

98. Construction of ladders.—(a) Every ladder used shall be of strong construction, shall be securely placed in any shaft, winze, rise or stope and shall be maintained in good repair.

(b) The spacing of rungs shall be standard.

(c) In order to give a proper foothold the rungs shall be at a safe distance from the wall of a shaft, winze, rise or any timber underneath the ladder.

(d) Every permanent ladder shall project at least three feet above its platform, except where strong hand rails are provided.

99. Provision of sollars.—In shafts having an inclination of more than 65° with the horizontal, platforms or sollars must be provided at intervals not exceeding 35 feet in addition to the protections at the level or plat. The manhole in any sollar shall be placed behind the ladder leading up from such sollar whenever the inclination of the shaft exceeds 70° with the horizontal.

Sinking shafts should be provided with ladderways from the bottom of the shaft to the nearest landing stations.

100. Height of main drive.—Every main drive shall be maintained at a height of at least 6 feet unless exempted by the Inspector.

101. Refuge places provision of, on haulage road.—Every haulage road on which the haulage is worked by mechanical power shall be provided with—

(1) at least 3 feet clear walking space between the track one side of the level; or

(2) refuge places at intervals of not more than 100 feet.

102. Sollars in shaft ladderways.—(1) In shafts having an inclination exceeding 45° but not exceeding 65° with the horizontal, the sollars shall be placed at intervals of not more than 55 feet measured along the underlie of the shaft.

(2) In a shaft or winze in the course of sinking having an inclination of 35° or more from the horizontal a ladderway shall be provided to within such a distance from the bottom of such shaft or winze as to secure it from damage during blasting, and below this point a chain or rope ladder shall be provided to the bottom of the shaft or winze.

103. Inclination of ladders.—No ladder shall have a steeper inclination than 80° with the horizontal except under special circumstances and with the consent in writing of the Inspector. This consent shall not be necessary for the lowest 30 feet of a sinking shaft.

104. Construction.—Ladders must be securely fixed to the timbering of the shaft and maintained in proper repair. Except at sollars or resting places, ladders must be made continuous or without perceptible overlapping or break.

105. Ladders must project at least three feet above the shaft top and above every sollar or landing place in shafts and other travelling ways, or strong holdfasts must be provided at all such places in convenient positions.

106. Travelling on foot in shafts, exceptions.—Travelling on foot in any shafts or shaft compartments except those specially provided and equipped for this purpose, is strictly prohibited except for purposes of inspection or repair.

107. Railing off ladderways.—In all shafts the ladderway shall be fenced off sufficiently to prevent any person from inadvertently entering the winding compartment.

108. Carrying tools, etc., on ladderways.—Carrying tools or other loose materials up or down a ladderway having an inclination steeper than 45° is prohibited except when absolutely necessary. When tools are carried in a ladderway they must be secured in a sling to the person carrying them.

CHAPTER XII—VENTILATION, LIGHTING, ETC.

109. Provision of ventilation.—Sufficient ventilation must be provided to render all working places and travelling roads in a mine under ordinary circumstances fit for working in and as far as possible free from fumes, smoke, dust or noxious gases.

110. Collar of shaft to be kept clear.—The vicinity of the collars of downcast shafts shall as far as practicable, be kept clear of cinder heaps, sand, mortar, cement, etc., and no dust shall be created by carelessly handling the above or other material.

111. When a working place considered unfit, for working.—A working place shall not be deemed to be fit for working in if a candle will not burn erect when shielded from a draught.

112. Mechanical aid.—In all portions of a mine or workings where the natural ventilating current is insufficient suitable mechanical appliances for ventilation shall be provided and operated.

113. Self-closing doors.—All doors which are required to be kept shut for purposes of ventilation shall be made self-closing or be operated by an attendant.

114. Wet drilling.—All holes drilled in dry ground must, as far as practicable, be kept moist to prevent the atmosphere being charged with dust.

115. Prohibition of entrance into disused workings.—Unauthorised entrance into abandoned or disused workings is prohibited and should as far as possible be prevented by boarding or otherwise. Underground works (especially shafts, sumps, winzes and rises) which have been unused for sometime shall before work is started be examined with a light and if the air is foul no work shall be permitted there until the foulness has been removed.

116. Stationary lights where.—Stationary lights shall be provided at all stations and other places in shafts which are in regular use; also in all places where pumps or other machinery or appliances are in motion, unless the same are fenced off so as to render it impossible for any one to come in contact with them inadvertently; and at night at all working places on surface.

117. Lights to be carried.—Every person in any unilluminated part of a mine, shall carry a light.

118. Fire prevention.—In a mine no person shall place or throw or cause or permit to be placed or thrown any naked light such as candle, unenclosed lamp or lighting torch (cheesa stick or a 'kai-piece') on or near any timber, wooden structure or other combustible material where such naked light may cause danger from fire.

In case of blasting with explosives any timber in chutes, in blackrock boxes, stulls, sets, etc., sufficient water shall be applied to the timber before and after blasting so that no fire thereby may be caused.

CHAPTER XIII—EXPLOSIVES

119. Storage of explosives.—No explosives shall be stored in or about a mine except in accordance with the provisions of rules made under the Indian Explosives Act, 1884.

120. Explosives must be in their ordinary manufactured form and of good quality and as far as can be practically known in good condition when distributed for use. Only one kind of detonator shall, except with the permission of the Inspector be used in the same mine. It shall be of sufficient power for every kind of explosive used.

121. No fuse or explosives are allowed to be taken into the mine other than the brands specially authorised by the Superintendent.

122. Explosives shall not be taken into or kept in a dwelling house; but only in a properly constructed magazine.

123. Underground magazine.—Explosives shall not be stored underground in a mine except with the approval in writing of the Chief Inspector and in a magazine or magazines duly licenced in accordance with the provisions of rules made under the Indian Explosives Act, 1884, and in accordance with any provisions additional thereto as may be prescribed by the Chief Inspector of Explosives.

124. Every magazine shall be in charge of a competent person acquainted with the nature of explosives whose name shall be entered in a book called "Explosives Storage Book" and who shall be responsible for the proper receipt, storing and distribution of the explosives and shall keep a record of all receipts and deliveries in the said book, which shall be kept in the magazine.

125. Distribution of explosives.—All explosive material must be distributed whether above or below ground only by the person or persons appointed for that purpose by the Superintendent.

126. To whom issued.—Explosives shall be issued in such a manner as to ensure a good turn over and only to competent persons appointed by an officer of the mine and no unauthorised person shall have explosives in his possession. The names of such competent persons shall be registered in a book to be kept for the purpose.

127. Record of issue and return.—The person in charge of a magazine shall keep a correct record of the number of cartridges of explosives and of detonators issued from the magazine to each authorised person and a similar record of explosives returned to the magazine.

128. Explosive carriers shall give requisitions signed by an officer of the mine giving the number of detonators, length of fuse and the quantity of other explosives required and the working place where they are to be used. Such requisitions shall be preserved by the person in charge of a magazine.

129. Explosives issued from the magazine shall be taken directly to the working place and any unused explosives must be returned to the magazine without any delay. Any one finding any explosive must take it at once to the nearest magazine.

130. **Carrying in suitable cases and the permissible quantity.**—Explosives including fuse when issued from the magazine shall be carried at all times in secure *locked* cases or canisters and no case or canister shall contain more than twenty pounds of explosives, and no single blaster shall be issued with more than thirty pounds.

131. **Quantity restricted to a working place.**—No working place shall be supplied with a greater quantity of explosive material than will probably suffice for the requirements of the shift.

132. **Detonators to be carried separately.**—(1) Detonators must not be carried in the same case or canister with other explosives, but shall be carried in only special cases provided for the purpose.

(2) **Storage for emergency purposes.**—A small quantity of explosives, not exceeding the quantity permitted under Regulation 130 may be kept in special receptacles, securely made of non-inflammable material, which shall be kept locked. In such receptacles detonators shall be kept separate from other explosives by a strong partition. Every such receptacle shall be located in a safe position.

(3) **Person to take charge of unused cartridges.**—When all the holes drilled are not fired at the same time, the explosives for the uncharged holes may be kept in the meantime at a safe distance. They must be placed, in charge of some person responsible for them, where there is no risk of their being exploded or ignited.

133. **Transport of explosives in shifts, etc.**—Explosives shall not be sent down in a bucket, skip or cage, unless there is a distinguishing mark attached to the bucket, skip or cage or they are accompanied by some one who is responsible for them. If taken down by a ladder, each case or canister must be securely fastened to the person carrying it.

134. Before any mine is abandoned or the workings thereof has been discontinued, the owner, agent or Superintendent shall see that all un-used explosives are either disposed of or removed to the surface from every underground magazine.

135. **Protection against fire.**—Adequate means of extinguishing fire and ready for immediate use shall be provided close to the entrance of every underground magazine.

136. No naked light shall be taken into an underground magazine.

137. No person shall smoke in a magazine nor shall he carry anything which might cause ignition.

138. No scrap or broken portions of cartridges shall be placed in or left lying on the floor of the magazine.

139. No person shall either sell, purchase or otherwise attempt to take away any explosive from a mine without the written permission of the Superintendent.

140. **Possession.**—No person shall secrete or be in possession of explosives in or about a mine except as provided for in these regulations.

141. **Tools for opening.**—No person shall use anything except implements of wood, brass or copper in opening cases containing explosives except where cases are screwed down when an iron screw driver may be used to withdraw the screws but for no other purpose.

142. **Transport in shaft notice.**—Immediately before any person conveys explosives in a shaft by means of machinery he shall give notice to the engine driver, banksman or signalman.

143. **Lowering.**—The engine driver shall gently lower or raise the cage or other conveyance containing explosives.

CHAPTER XIV—BLASTING

144. **Who may blast.**—All blasting operations shall be conducted by a blaster holding a blaster's certificate. In cases of emergency, a person who does not hold a blaster's certificate may be authorised to conduct blasting operations by the Superintendent or an underground Agent who shall be responsible that such person is competent.

145. Preparation of Charges.—The blaster himself shall prepare the fuse, detonator and primer for use and shall charge every hole but he may be assisted otherwise in the preparation of charges and in firing the shots by one or more competent assistants.

146. Precautions during preparation of charge.—During the preparation of charges and the charging of holes, all lights must be kept at a safe distance and smoking shall be strictly prohibited while explosives are being handled.

147. Fuse capping.—Every blaster must carry a knife in order to be able to cut a burning fuse, if necessary, and also a pair of pliers for crimping the detonator on to the fuse except when detonators are crimped to the fuse on surface.

148. Primer cartridge.—The fuse with its attached detonator shall after being inserted in the primer cartridge, be securely fastened thereto by string or other suitable material so that it cannot be easily withdrawn from the cartridge. The fuse and detonator shall not be inserted in the primer until it is required for immediate use.

149. Tools.—In charging or stemming holes the use of any iron or steel tool, scraper or rod is prohibited and no explosive shall be forcibly pressed into a hole of insufficient size.

150. Tamping.—A wad of paper or some other suitable material about one inch thick, approved by the Inspector shall be inserted between the charge and the tamping which shall be at least six inches deep. Only sand loosely filled in or soft clay lightly pressed home or water shall be used as tamping for any explosive requiring the use of a detonator.

151. Number of holes to be fired in a round.—Not more than eight holes unless the fuses are ignited by more than one person in which case the number may be increased to 12 holes shall be fired in one round in any drive, stope or shaft or unless the charges are fired electrically or unless the special permission of the Inspector has been obtained. No holes shall be charged except those which are to be fired in that round and all those which have been charged shall be fired in one round.

152. Lighting fuses.—Blasting gelatine or other high explosives shall not be lighted in order to set fire to fuses, but specially prepared "Kai-pieces" of such explosives may be used for this purpose.

153. Warning before firing.—Before any shots are fired, due warning shall be given in every direction by shouting the fire signal and all approaches to the place where the shots are being fired shall be guarded. The blaster shall be responsible that no person is allowed to remain in or to come into dangerous proximity to the shots.

154. Precautions to be observed in the case of working places approaching each other.—Whenever any working place approaches another so closely that any further blasting will reduce the intervening rock to a thickness of six feet or less, such further blasting must be conducted from one working place only at any one time. The Underground Agent in charge shall be responsible that the working parties are duly warned of the near approach of the two places and the blaster in charge of the operations in the one place shall take steps to ensure that no person remains in the other place while shots are being fired.

155. Counting of shots.—The number of shots which explode must be counted ³[except in the electric blasting] by at least two persons one of whom shall be the blaster. Unless both are certain that all charges have exploded, the working place must not be re-entered for at least 30 minutes after the first explosion.

156. No re-entry until fumes are cleared.—If all the charges have exploded properly or if they have been fired electrically the working place may be re-entered as soon as it is sufficiently clear of fumes; provided that in the case of electric firing the source of electricity shall have first been disconnected.

157. Who should enter first.—After blasting has taken place, the blaster or person in charge of the working place shall be first to re-enter the place and until he has pronounced it to be safe and sufficiently free from fumes, he shall not permit any other person to enter except for the purpose of making it safe.

158. Search for unexploded explosives after blast.—In clearing the stuff broken by the blast, loose unexploded cartridges, detonators, etc., must be carefully looked for and, if found, removed at once by the blaster or mestri in charge to a safe place.

159. Plugging of sockets.—Before drilling is commenced, all loose rock must be removed from the working faces and if any sockets or portions of holes which have not broken are found they shall be securely plugged by the person in charge of the working place with wooden plugs of which a supply shall be provided.

³ These words were inserted by the Ministry of Labour Notification No. S.R.O. 525 dated the 28th February, 1955.

160. Examination of misfired holes.—In the event of misfire being detected the blaster shall be the first to enter the working place, failing which he shall place a barricade at the entrance or entrances to the said working place and warn either verbally or in writing an Underground Agent, Foreman, Assistant Foreman, Head Mestri or Blaster, in charge of the next shift, who will then be considered to be in charge of the working place.

161. Misfire to be reblasted.—As soon as the misfire has been found the Blaster shall refire it without delay, for which purpose he shall insert a fresh primer with detonator and fuse in the hole. If necessary, the tamping may be gently removed with a wooden or copper scraper, or other suitable appliance approved by the Inspector but not the wad of paper or other material referred to in Regulation 150.

162. Reporting of misfire.—If a misfire cannot be found or reblasted during the shift, the Blaster shall have the entrance or entrances to the working place barricaded and before leaving the mine shall inform the underground Agent, Foreman, Assistant Foreman, Head Mestri or Blaster in charge of the next shift who shall then be considered to be in charge of the working place. The Blaster shall before leaving the mine, cause a report of every misfire to be entered in a book kept for the purpose at the shaft top or at some other suitable place. It shall be the responsibility of the Underground Agent, Foreman, Assistant Foreman, Head Mestri or Blaster, who has been informed of the misfire or suspected misfire either verbally or in writing to sign this book and later to report in it the action taken.

163. Drilling not to be permitted until misfire reblasted, etc.—The Blaster in charge of the next shift shall have the place cleaned up and made secure, but no drilling shall be permitted until the misfire has been located and reblasted, provided that the Blaster, after a thorough examination of the place may permit drilling when he is satisfied that no misfire had occurred.

164. Deepening old holes.—(a) No person shall deepen or cause or permit to be deepened a hole in which explosives had once been charged. No person shall withdraw the charge from a hole either before or after blasting.

(b) No person shall extract or attempt to extract explosives from a hole which had been charged.

The mestri in charge of the working place shall be held responsible for the due observance of the provisions of this regulation.

165. Drilling in the vicinity of sockets precautions.—The person in charge of the working place shall point out the position and direction of every new hole to be drilled, and shall be responsible that the drillers do not deviate therefrom. The greatest care shall be taken that no new hole shall be bored in such a direction that it can come in dangerous proximity to any old hole or socket in which explosives have previously been charged.

166. Who may handle explosives.—Only persons authorised by the Superintendent or holding a blaster's certificate shall open or interfere in any manner with a box containing explosives.

167. Blaster's responsibilities.—The holder of a blaster's certificate shall not permit any person working under him to retain any explosive in his possession or to remove it from the mine to the surface and shall be responsible that all reasonable precautions are taken.

168. Precautions in using electrical firing cables.—(a) When electrical firing cables or wires are used in the vicinity of power or lighting cables or wires, sufficient precautions shall be taken to prevent the firing cables or wires from coming in contact with the lighting or power cables or wires.

(b) The firing cables or wires shall not be connected to the firing device until immediately before they are required for the firing of charges, and shall be disconnected therefrom immediately after the charges are fired.

(c) The firing cables or wires used for firing charges in one working place shall not be used for firing charges in another working place until all proper precautions have been taken to ensure that the firing cables or wires have not any electrical connection with the leads from the first working place.

(d) A Blaster shall not enter or allow any other person to enter any place where charges have been fired until he has disconnected the firing cables from the blasting battery, or has pulled out and locked the switches of the blasting circuit.

CHAPTER XV—MACHINERY

169. Air receivers, etc.,—charge of.—All compressed air-receivers and driving-gear must be in the personal charge of competent men appointed by the Chief Engineer. Every air-receiver shall have attached to it a proper safety-valve and an air-gauge and shall be inspected by an Assistant Engineer once a week at least.

170. Hydraulic testing-record of test.—(a) Before an air-receiver is cased in or put in commission it shall be subjected to hydraulic test by the Chief Engineer or a competent person appointed by him. The test shall be repeated after any important renewals or repairs and also at least once in three years. A record of every such test shall be entered in books kept for the purpose.

(b) In the test, the hydraulic pressure shall be at least $1\frac{1}{2}$ times the maximum working pressure permitted.

(c) The working pressure shall be measured as the pressure in excess of that due to the atmosphere.

171. Safety valves.—The weight of every safety-valve shall be fixed on the lever so that it cannot be inadvertently shifted so as to increase the pressure.

172. Fencing of machinery, etc.—(1) All exposed parts of machinery which are dangerous when in motion must be railed or partitioned off in such a manner that no accident can occur except through carelessness.

(2) Dangerous places, such as elevated platforms, pits, trapholes, etc., shall be fenced off so as effectively to safeguard those persons authorised to work there or be in the vicinity.

173. Person in charge of machinery.—(1) Every person in charge of any engine or other appliance, apparatus or machine shall see that it is in proper condition before commencing work and if there is any defect shall remedy the same or report it to a Chief or Assistant Engineer; he must see that no extra weight is added to the safety valves of an air-receiver and that the allowed pressure of air is not exceeded.

(2) During his shift an engine driver shall not allow any other person to handle the engine except in an emergency or with the sanction of the Chief or Assistant Engineer. He shall not leave his post except when absolutely necessary or relieved by a duly appointed substitute.

174. Repairing and oiling machinery in motion prohibited.—The repairing, adjusting, cleaning or lubricating of machinery in motion shall not be permitted when there is a risk of personal injury.

175. Shifting of driving belts.—Shifting of driving belts while the machinery is in motion is prohibited unless a satisfactory mechanical appliance is provided for the purpose. This shall not apply to the customary shifting of light belts on the coned pulleys of machine tools.

CHAPTER XVI—ACCIDENTS, ETC.

176. Report of Accidents, etc.—(1) When any accident occurs in or about a mine causing loss of life or serious bodily injury, or when an accidental explosion, ignition, spontaneous heating, outbreak of fire, irruption of water, unexpected or premature collapse of workings, breakage of ropes, chains, or other gear by which men are lowered or raised or accidental overwinding of cages while men are being lowered or raised occurs in or about a mine, the owner, agent or superintendent of the mine shall forthwith inform the nearest Inspector by telephone or telegraph or by special messenger and shall also, within twenty-four hours of the occurrence of such accident, explosion, ignition, outbreak, irruption, collapse of workings, breakage or overwinding send notice thereof in the Form given in the Schedule to the Chief Inspector and to the District Magistrate or to the Sub-Divisional Magistrate. One copy of the notice shall be posted simultaneously on a special Notice Board at a conspicuous place in the office at the mine where it may be inspected by Trade Union officials. The notice shall be kept on the Board for not less than two months from the date of such posting.

(2) When an accident occurs due to electricity the Electric Inspector of Mines shall also be informed forthwith in the aforesaid manner.

177. When death results from serious injury.—If death results from any injury already reported as serious under regulation 176, the owner, agent or superintendent shall forthwith inform the inspector by telephone, telegraph or special messenger and shall within twenty-four hours of his being informed of the death, send notice thereof to the Chief Inspector and the District Magistrate or the Sub-Divisional Magistrate.

178. Place of accident to be left untouched.—The place where an accident involving the death of, or serious injury to, any person has occurred shall be left untouched after removal of the injured person or persons until it has been examined by an Inspector or until the expiry of forty-eight hours, unless the stoppage of work at that place would seriously impede the work of the rest of the mine, or unless the consent of the Inspector to the resumption of work has been obtained.

179. Reporting of non-casualty accidents.—Whether personal injury is caused or not, every accident occurring under the following classification shall be reported without delay to the Inspector:—

- (1) Engine running out of control.
- (2) Fracture of any essential part of winding engine, crank shaft, couplings, bearings, gearing, clutch, drums or drum shaft.
- (3) Fracture of winding rope or of its attachment to skip, cage or drum.
- (4) Fracture of pit-head sheave or axle or bearings of same.
- (5) Failure of emergency brake.
- (6) Failure of safety catch to act when required.
- (7) Failure of device for prevention of overwinding or of detaching hook to act when required.
- (8) Overwinding of cage or skip.
- (9) Bursting of anything containing steam, compressed air or other substance at high pressure.
- (10) Jamming of skip or cage in shaft.
- (11) Derailement of skip or cage by which the winding rope is likely to have been overstrained.
- (12) Skip or cage leaving guides in vertical shafts.
- (13) Failure of depth indicator.
- (14) Extensive caving or subsidence in the ground workings.
- (15) Accidental ignition of explosives.
- (16) Flooding of any considerable portion of the workings or failure of any dam or reservoir used for conserving water or slimes.
- (17) Any fire or any indication or recrudescence of fire or of spontaneous combustion in the mine or of explosion of gas or dust.
- (18) Fracture or failure of any essential part of any machines whereby the safety of person may be endangered.

180. Report of personal injury.—Every workman receiving any personal injury any mining operations shall before leaving the mine report the same to one of the mining officers or the banksman at the top of the shaft or to his immediate superior; and any person to whom such report is made shall as soon as possible communicate the same to the Superintendent or Head of the Department.

CHAPTER XVII—MINE PLANS

181. General plan of Mining Rights.—A general plan, made by a competent surveyor of the land which is in the possession of the owner for mining purposes or over which he holds any mining rights to a distance of 600 feet from any point where mining operations are or have been carried on but not beyond the limits of such land must be kept at the mine and be made up at least every six months.

182. Surface Plan.—The general plan must show the Government survey marks (if any), the boundaries of the land, the outcrops as well as the actual strike and dip of the reefs or other mineral deposits so far as known, all open surface workings, shaft openings, bore-holes, water-furrows, reservoirs, tailings-sites, public roads and railways and the principal buildings and sites of mining and metallurgical plant. It must also show the geographical meridian.

183. Underground Plans and Sections.—Besides the general plan referred to above, the Superintendent must keep in the office of the mine an underground working plan and section or sections showing clearly all the workings surveyed upto within four months from date.

184. Sections of workings.—The underground plans and sections must in particular show clearly all shafts, bore-holes, drives, crosscuts, winzes, rises, excavations (stopped ground) and any tunnels and passages connected therewith and the position of all permanent winding gear, pumps, ventilating fans, brattices and doors for regulating ventilation and all underground bench marks and stations of the underground survey and in addition thereto the vertical depth of bore-holes, the depth at which the mineral deposits have been intersected, the general strike of the reefs or mineral deposits with their dips at different points and the dislocations of the strata and other geological features.

185. Scale of plans.—All underground plans must be on the scale of 30 or 60 feet to one inch.

186. Bench marks.—All bench marks or stations of the underground surveys must be properly marked with holes and plugs and care must be taken to preserve them in view of subsequent surveys.

187. Plotting of surveys.—The plottings of every survey must be made from a line or lines representing on the plan the true geographical meridian.

188. Plans and Sections to be sent to Chief Inspector before abandonment of mine.—In case of a mine or any considerable part of it being intentionally abandoned, the general and underground plans and underground sections must first be completed up-to-date and the same or exact copies thereof must be sent to the Chief Inspector within two months of such abandonment.

189. Survey of underground workings.—All underground workings must, when it is possible, first be surveyed before being allowed to become inaccessible.

190. Withholding plans or concealing workings an offence.—Any owner, agent or Superintendent or other person engaged in mining operations who wilfully withhold any portion of a mine plan or conceals any part of the workings or knowingly allows the mine plans to be incorrect, shall be guilty of a breach of these regulations.

191. Copies of plans to be deposited with Chief Inspector.—A true copy on mounted paper or tracing cloth of the general plan and of every underground plan or section referred to in Regulations 181 and 183 shall be deposited with the Inspector and the said copies shall be brought up-to-date *every six months* by the Superintendent.

For this purpose the said copies may be obtained by the Superintendent from the Inspector any time subsequent to the *30th June and 31st December* and shall be returned to the Inspector *in the following month*.

CHAPTER XVIII—GOVERNMENT RETURNS AND NOTICES

192. Monthly returns.—The Superintendent of a mine shall furnish monthly to the Inspector a statement showing the quantities of ore obtained and treated and the quantity of metal or other finished products obtained and other returns and statistics in such form and at such time as may be asked for.

193. Annual returns.—The owner or Superintendent of a mine or works shall furnish annually returns to the Chief Inspector in such form as may be asked for respecting such data as may be reasonably required.

194. Notice of commencement or discontinuance of mining.—Where any working is commenced for the purpose of opening a mine or where the working of a mine is temporarily or permanently discontinued or abandoned or where the working of a mine is recommenced after any such discontinuance or abandonment, the owner or his Agent or Superintendent shall immediately give written notice thereof to the Chief Inspector.

195. Particulars of owner, etc., to be supplied to Chief Inspector.—The owner or his Agent or Superintendent shall, without delay, furnish the Chief Inspector with the following information:

- (1) Name of mine,
- (2) Name and address of Proprietor,
- (3) Name and address of Agent or Superintendent and shall likewise give notice of any change in their names or addresses within three days of such change.

196. Responsibility of owner on abandonment for surface protection, etc.—In case of the abandonment of a mine, the owner at the time of such abandonment shall continue to be responsible for the carrying out of the provisions regarding the protection of the surface under Chapter II, the furnishing of plans under Chapter XVII and the sending in of returns under Chapter XVIII until such Regulations have been complied with.

197. Underground workings approaching railway.—Notice shall be given to the Chief Inspector, if any working approaches to within 500 feet of a railway in any direction.

198. Inspector to take samples.—An Inspector is entitled to take or cause to be taken such samples of ore, quartz or other minerals from any reefs, beds or deposits or from any intermediate or final products extracted, obtained or produced in the course of any mining operations, as he in the execution of his duty may think fit but if they be of more than two pounds weight, or contain more than five grains of gold, or be taken more than once in three months, the Government shall pay for the same at a fair valuation.

CHAPTER XIX—MISCELLANEOUS

199. Interference with or obstruction of persons in the discharge of their duties under the Rules be reported to a Mining Officer.—No person shall offer or render any service or use any threat to any other person with a view to preventing him from complying with these regulations or from performing his duties faithfully. If any person who receives any such offer or threat, fails to inform at once an officer of the mine, he shall be guilty of a breach of these regulations.

200. Periodical examination of working places, etc.—(1) The Superintendent or other Mining Officer ⁴[or Senior Foreman] acting under his instructions, shall at least once in three days while the men are at work, visit and examine every working place in the mine and all machinery and other mining operations of every description below ground or on the surface, and shall see that safety in every respect is ensured.

(2) He shall as soon as practicable report the occurrence of the breach of any provision of these regulations to the Inspector or take such other disciplinary steps as the Inspector may have directed or approved of. Particulars of every such breach and the disciplinary steps taken shall be entered in a register which shall be open for inspection at all reasonable times to an Inspector.

201. No admittance to a mine without previous consent.—Except under the provisions of these regulations, no person shall enter a mine who has not previously obtained the consent of the Superintendent or his representative.

202. Sleeping underground prohibited.—No person shall sleep or be permitted to sleep underground.

203. Unauthorised entry into shaft, etc., prohibited.—(1) No unauthorised person shall enter any shaft, building, shed or enclosure in which machinery or receivers are erected or mining operations are carried on, and notices to this effect shall be posted at all entrances to such places.

(2) No unauthorised person shall interfere with any machinery or apparatus provided for or used in the working of the mine.

204. Workmen prohibited from wandering about.—No workman shall, except in cases of emergency, go to any part of the mine except where it is necessary for him to go in the course of or when coming to or from his work.

205. Instruction of workmen in regulations.—Where any workman is unable to read the regulations, the person in charge shall see that such workman is made acquainted with the regulations concerning him or appropriate to his particular occupation and duties.

206. Attestation of reports.—In all cases where any person is required by these regulations to make any report he shall sign his name to it. If he is unable to write, he shall be present when his report is written and shall have it read over to him and shall attach his mark to such report in token of this having been done. The name of the person writing the report shall also be entered at the end of the report together with a statement of its having been read over to the person on whose behalf it is written.

207. Observance of Regulations pertaining to posts.—Where the duties of more than one post are entrusted to the same person that person shall be bound by and observe the regulations attached to each such post.

208. Deputing of work.—No person shall depute any one to do his work without the sanction of his immediate superior.

209. Removal of Protective barriers, etc.—No person shall wilfully damage or without proper authority remove or render useless any fence, manhole, place of refuge, casing, guide, signal or means of signalling, brake, indicator or other appliance or thing which has been provided for the purpose of carrying out these regulations or for the safety of workmen or otherwise for the purpose of properly carrying on mining operations and no person shall alter, remove or in any way render useless any arrangement in the mine provided for the above purposes without the consent of the Superintendent.

210. Causing destruction, theft, etc., offence.—Any person employed in or about the mine who shall by any act or omission wilfully or negligently do anything likely to endanger life or shall wilfully or in a careless or thoughtless manner expose himself to danger shall be deemed to be guilty of a breach of these regulations.

211. Safety regulations, etc., to be complied with.—No person shall refuse or neglect to obey any orders issued with a view to the safety or the convenience or proper discipline of the mine not being inconsistent with these regulations by any person under whose orders he is placed nor shall interfere with, impede or obstruct any person in the discharge of his duties or interfere with or obstruct the working of the mine.

212. Workmen to strictly adhere to Regulations.—All workmen shall strictly adhere to these regulations and to any directions issued by the Superintendent with a view to their safety or convenience or the proper discipline of the mine not being inconsistent with these regulations contained in the notices posted in or about the mine for the guidance of the workmen.

⁴ These words were inserted by the Ministry of Labour Notification No. S.R.O. 525 dated the 28th February, 1955.

213. Report of infringement of regulations.—Any person who may observe or be aware of any neglect or infringement of these regulations shall report the case to his immediate superior or to the Superintendent or an Underground Agent or other Mining Officer or (if the person reporting the same is a workman) to an Underground Foreman or Assistant Foreman so that immediate means may be taken to rectify it and to prosecute the offender.

214. Abetment of breaches of regulations or failure to report them an offence.—Any one who shall knowingly permit any person over whom he exercises authority to commit or shall otherwise abet a breach of these regulations or shall observe or be aware of a breach thereof without reporting the same as aforesaid shall himself be deemed to commit a breach thereof.

215. Persons guilty of wilful or negligent commission or omissions deemed to commit breach of regulations.—Every person employed in mining operations (other than the owner, Agent or Superintendent) who is wilfully or negligently guilty of any act or omission which in the case of an owner, Agent or Superintendent would be a breach of these regulations, shall be deemed to commit a breach of these regulations.

216. Suspension or discharge of workmen for breach of Regulations.—All workmen who neglect to observe any of the provisions of these Regulations may be suspended, and ordered out of the mine by the Superintendent or other Mining Officer.

217. Competent persons only to be employed.—No person shall be selected or allowed to perform or shall perform any duty in connection with any mining operations unless he is fully competent and qualified to carry out the work allotted to him.

218. Safety and discipline of workmen.—The owner, Agent or Superintendent shall provide for the safety and proper discipline of the men employed above and below ground and appoint such persons as may be necessary for carrying out the provisions of these regulations.

⁵[**219. Power to postpone application or operation of Regulations.**—Whenever the circumstances in any mine or part of a mine are such as to render improper the application or as the case may be, the continued operation of any provision of these regulations in such mine or part, the Chief Inspector may, under conditions to be specified by him in writing in this behalf, postpone such application or continued operation in such mine or part.]

SCHEDULE—(See Regulation 176)

NOTICE OF ACCIDENT

FROM
TO

THE CHIEF INSPECTOR OF MINES, DHANBAD P. O., MANBHUM DISTRICT

Through the District Magistrate of
Sub-Divisional

Dated

SIR

I have to furnish the following particulars of

a fatal accident
a serious accident
an accidental explosion or ignition
an outbreak of fire
an irruption of water
a premature of collapse of workings
breakages of ropes chains or other
gear by which men are lowered or
raised
an overwinding of cages while men
are being lowered or raised.

which has occurred at the

Mine.

1. Situation of the mine (Village, Station, District, Province).
2. Mineral worked.
3. Name and postal address of owner.

⁵ This Regulation was substituted by the Ministry of Labour Notification No. S.R.O. 525 dated the 28th February, 1955.

- | | | |
|-----------------------------|---------|-------------|
| 4. Name and sex of persons. | Age. | Occupation. |
| Killed | Injured | |
5. Date and hour of the occurrence.
 6. Place of occurrence.
 7. Cause and description.
 8. Classification of accident [see (5) below].
 9. Nature of injury and, if fatal, cause of death.

Yours faithfully,
Owner/Agent/Superintendent.

NOTES AND INSTRUCTIONS

(1) *How to submit the Notice.*—When any accident occurs in or about a mine, causing loss of life or serious bodily injury, or when an accidental explosion, ignition, outbreak of fire or irruption of water occurs in or about a mine, the owner, agent or Superintendent of the mine shall forthwith inform the Inspector of the Circle in which the mine is situated by telephone or telegraph and shall also give notice of the occurrence of such accident, explosion, ignition, outbreak or irruption by despatching this form, duly filled in within 24 hours of the occurrence, through the Magistrate of the District to the Chief Inspector of Mines.

(2) Under Section 33 of the Indian Electricity Act⁶ notices of accidents resulting or likely to have resulted in loss of life or personal injury are required to be submitted.

(3) *Explanation of serious injury.*—Means any injury which involves, or in all probability will involve, the permanent loss of the use of, or permanent injury to, any limb or the permanent loss or injury to the sight or hearing, or the fracture of any limb or the enforced absence of the injured person from work for a period exceeding twenty days.

(4) *Notice of subsequent death of injured person.*—When any person dies from the result of an injury already reported as serious, the owner, agent or Superintendent of the mine shall send notice within 24 hours of his being informed of the death to the Chief Inspector of Mines through the District Magistrate.

(5) The following terms are to be used at 8 (above) "Classification of accident":—

1. Explosion, ignition and outbreak of fire.
2. Falls of roof.
3. Falls of side.
4. Premature collapse of workings.
5. In shaft (overwinding).
6. In shafts (ropes and chains breaking).
7. In shafts (whilst ascending or descending by machinery).
8. In shafts (falling down shaft).
9. In shafts (things falling down shaft).
10. In shafts (miscellaneous).
11. Suffocation by gases.
12. By explosives.
13. Irruptions of water.
14. Haulage.
15. By underground machinery.
16. Sundries underground.
17. By surface machinery.
18. Boilers or pipes bursting.
19. On surface railways and tramways belonging to the mine.
20. By electricity.
21. Miscellaneous on surface.
22. Miscellaneous belowground (Rock bursts).

⁶ For Section 33 of the Indian Electricity Act, see page 131 ante.

INDIAN COAL MINES REGULATIONS, 1926

Arrangement of Paragraphs

PREAMBLE AND DEFINITIONS

Chapter I—Returns, Notices and Records.

Chapter II—Plans.

Chapter III—Mine Officials.

Chapter IV—Certificates of Competency, Permits and Authorisations.

Chapter V—Shafts and Outlets.

Chapter VI—Raising and Lowering Persons or Materials.

Chapter VII.—Roads and Working Places.

Chapter VII-A—Special Precautions against spontaneous combustion and underground fires.

Chapter VIII—Haulage.

Chapter IX—Explosives.

Chapter X—Ventilation and Lighting.

Chapter XI—Fencings and Gates.

Chapter XII—Miscellaneous.

Schedule—Forms.

INDIAN COAL MINES REGULATIONS, 1926¹

Regulations for Coal Mines

1. (1) These Regulations may be called the Indian Coal Mines Regulations, 1926.
- (2) They extend to the whole of India except the State of Jammu and Kashmir.
- (3) They shall apply only in respect of coal mines.
2. In these Regulations, unless there is anything repugnant in the subject or context—
 - (a) "the Act" means the Indian Mines Act, 1923;
 - (b) "approved safety lamp", "approved flame safety lamp" and "approved electric torch" mean, respectively, a safety lamp, a flame safety lamp or an electric torch manufactured by such firm and of such type as the Chief Inspector may from time to time specify by notification in the *Gazette of India*, and includes any other safety lamp or electric torch approved by the Chief Inspector by an order in writing;
 - (c) "the District Magistrate", in relation to any mine, means the District Magistrate of the district in which the mine is situated:

Provided that in the case of a mine which is situated partly in one district and partly in another, the District Magistrate for the purposes of these regulations shall be the District Magistrate authorised in this behalf by the Central Government;

 - (d) "Form" means a Form as set out in Schedule I;
 - (e) "permitted explosive" means an explosive permitted by the Chief Inspector under such definition and subject to such conditions as he may from time to time lay down by notification in the *Gazette of India*;
 - (f) "ventilating district" means such part of a mine as has an independent intake airway commencing from a main intake airway, and an independent return airway terminating at a main return airway.

CHAPTER I—RETURNS, NOTICES AND RECORDS

3. (1) On or before the tenth day of every month, the owner, agent or manager of every mine shall send to the Chief Inspector correct returns in Forms I, I-A and I-B relating to the preceding calendar month.

(2) On or before the twenty-first day of January in each year the owner, agent or manager of every mine shall forward to the District Magistrate and to the Chief Inspector annual returns in respect of the preceding year in Forms II, III, IV, V, VI, VII and VIII.

(3) If any mine is abandoned or the working of any mine has been discontinued over a period exceeding three months or if a change occurs in the ownership of any mine, the

¹ These Regulations were published under Government of India, Department of Labour Notification No. M-1055(1) dated the 7th September, 1926.

returns required by sub-regulation (2) shall be submitted within one month from the date of abandonment or change of ownership or within four months from the date of discontinuance:

Provided that the Chief Inspector may by order in writing extend the period for the submission of such returns up to any date not later than the twenty-first day of January in the year following that to which they relate:

Provided further that nothing in this sub-regulation shall be deemed to authorise the submission of any return later than the twenty-first day of January in the year following that to which it relates.

(4) On or before the first day of March in each year the owner, agent or manager of every mine shall forward to the Chief Inspector in duplicate a return in Form II-A, duly filled in. The figures given in the return shall relate to that day on which the number of persons attending work was highest during such week in February of that year as is selected in advance by the Chief Inspector.

4. The notice required by section 14 of the Act shall be furnished in duplicate, and shall specify the name and situation of the mine, the names and addresses of the owner and the manager, and, in the case of a new mine, the date on which it was opened. The District Magistrate shall on receipt of the notice forward one copy thereof to the Chief Inspector.

5. When a mine or seam has been abandoned, or the working thereof has been discontinued over a period exceeding two months, the owner of the mine shall, within one month after the abandonment or within seven days after the expiry of the said period, as the case may be, send to the Chief Inspector notice in writing specifying the name and situation of the mine, the name and address of the owner, and the date and cause of the abandonment or discontinuance.

6. When a mine or seam is re-opened after abandonment or discontinuance, the owner, agent or manager shall, within one month after the date of the re-opening, send to the District Magistrate notice in writing in duplicate specifying the name and situation of the mine, the names and addresses of the owner and the manager, and the date of the re-opening. The District Magistrate shall on receipt of the notice forward one copy thereof to the Chief Inspector.

7. When a change occurs in the name of, or in the ownership of, a mine, notice in writing of the change and of the date thereof shall be sent by the owner, agent or manager to the Chief Inspector within one month from the date of the change.

8. When any new appointment is made of an agent or manager of a mine or any change of address of any agent or manager occurs, notice of the appointment or change and of the date thereof shall be sent by the owner, agent or manager to the Chief Inspector within one month from the date of the appointment or change.

9. When the ownership of a mine is transferred, the previous owner or his agent or manager shall make over to the new owner all plans, books and other records required to be kept under the Act, and all correspondence relevant to the working of the mine with the Department of Mines and other Government departments.

10. If the owner, agent or manager of any mine intends to conduct or extend any mining operations under his control at or to any point within fifty yards of any railways subject to the provisions of the Indian Railways Act, 1890, or of any public work in respect of which this regulation is applicable by reason of any general or special order of the Central Government under clause (u) of section 29 of the Act, he shall not less than sixty days before commencing such operations, give notice of his intention to the Chief Inspector and also, in the case of a railway, to the Railway Administration concerned, or, in the case of any such public work as aforesaid, to such authority as the Central Government may by general or special order direct.

10-A. *If in any mine it is intended to conduct or extend the extraction or reduction of pillars at or to any point within fifty yards of any railway subject to the provisions of the Indian Railways Act, 1890, the owner, agent or manager of the mine shall, not less than sixty days before commencing such operations, give notice of such intention to the Chief Inspector and also to the Railway Administration concerned.*

11. If the operations in respect of which notice is given under Regulation 10 or 10-A are not commenced within twelve months from the expiry of the period of sixty days therein referred to, the notice shall be held to have lapsed and the provisions of that regulation shall apply as if no such notice had been given.

12. The notice to be given under regulation 10 or 10-A shall specify the position of the workings of the mine in relation to the railway or public work in question, the manner in which it is proposed to carry out the intended new operations and the limits to which

it is proposed to carry the said operations, and shall include a plan showing the existing and the intended mining operations in so far as they affect the railway or public work in question.

²[13 (1). When there occurs in or about a mine an accident causing loss of life or serious bodily injury, or an accidental explosion, ignition, spontaneous heating, outbreak of fire or irruption of water or an accidental breakage of ropes, chains or other gear by which men are lowered or raised, or an accidental overwinding of cages, while men are being lowered or raised, or a premature collapse of any part of the workings, the owner, agent or manager of the mine shall forthwith inform the nearest Inspector about the occurrence by telephone, express telegram or special messenger and shall also, within 24 hours of any such occurrence, send notice thereof in Form IX to the District Magistrate/*Collector or the Sub-Divisional Magistrate/*Revenue Divisional Officer, as the case may be and to the Chief Inspector and shall simultaneously post one copy of the notice on a special notice board at a conspicuous place in the office at the mine and shall ensure that the notice is kept on the board in a legible condition for not less than two months from the date of such posting.

(2) When an accident causing loss of life or serious bodily injury occurs in or about a mine in connection with the generation, transmission, supply or use of electrical energy, the owner, agent or manager of the mine shall also forthwith inform the nearest Electric Inspector by telephone, express telegram or special messenger.

(3) When an accident occurring in or about a mine results in loss of life or serious bodily injury, the owner, agent or manager of the mine shall also give notice of the occurrence in Form IX to the Coal Mines Labour Welfare Commissioner, Dhanbad.

13A. When any accident causing loss of life occurs in a mine, the place of accident shall not be disturbed or altered before the arrival or without the consent of an Inspector unless such disturbance or alteration is unavoidable to prevent further accidents, to remove bodies, or to rescue persons from danger, or unless discontinuance of work at the place would seriously impede the working of the mine.

Provided that if from any cause an Inspector fails to make an inspection within three full days of the date of submission of the notice, work may be resumed at the place of accident.

14. If death results from any injury already reported as serious under Regulation 13, the owner, agent or manager shall forthwith inform the Inspector about the death by telephone, express telegram or special messenger and shall also, within twenty-four hours of such death, give notice thereof to the District Magistrate/*Collector or the Sub-Divisional Magistrate/*Revenue Divisional Officer, as the case may be, the Chief Inspector, and to the Coal Mines Labour Welfare Commissioner, Dhanbad.

14A. Where any person employed in a mine contracts any disease notified by the Central Government in the Official Gazette under section 25 of the Act, the owner, agent or manager of the mine shall, within 14 days of his being informed of the disease, send notice thereof in Form X to the District Magistrate/*Collector or the Sub-Divisional Magistrate/*Revenue Divisional Officer, as the case may be, and to the Chief Inspector.]

CHAPTER 11—PLANS

15. (1) All plans prepared in accordance with the provisions of this Chapter shall—

- (a) bear the name of the mine and of the owner;
- (b) show the scale together with the magnetic meridian and the date of the latter;
- (c) be properly inked on durable paper, or on tracing cloth; and
- (d) be on a scale of 100 feet to the inch:

Provided that where plans have been prepared on any other scale before the passing of these regulations, the Chief Inspector may on application by the owner, agent or manager permit such plans to be maintained on that scale.

(2) The owner, agent or manager of every mine shall keep a plan of the workings of the mine. The position of the workings at the time of the last survey shall be shown by a dotted line drawn through the ends of the workings; such dotted line shall be marked with the date of the last survey. The plan shall also show all shaft and incline openings, all goaves, the boundaries of the underground leasehold, where possible, and all important

² Old Regulations 13 and 14 were omitted and Regulations 13, 13A, 14 and 14A were inserted by the Ministry of Labour Notification No. S.R.O. 1858 dated the 23rd August, 1955.

* In the State of Madras only.

features within the boundaries, such as railways, roads, rivers, streams, *tanks, buildings* and reservoirs which overlie any part of the workings or any point within 600 feet of any part of the workings measured on the horizontal plane; also the general direction and rate of dip of the strata, the depth of every shaft, a section of the seam being worked and the position of all faults and dykes with the amount and direction of their throw. There shall be a separate plan of the workings of each seam, and of each separate section of each seam.

(3) The owner, agent or manager of every mine shall also keep a separate tracing of a surface plan showing all surface features referred to in sub-regulation (2), and in addition all buildings and erections on the surface and within the boundaries which overlie the workings of the mine or any point within 600 feet of the workings measured on the horizontal plane.

(3-A) (i) The owner, agent or manager of every mine shall also keep a separate plan showing the system of ventilation in the mine, and, in particular, the general direction of the air-currents, the points where the quantity of air is measured and the principal devices for the regulation and distribution of the air. So far as practicable the intake airways shall be coloured blue and the return airways red.

(ii) The positions of any underground ambulance stations and telephones shall be indicated on the plan.

(iii) The code of signs set out in Schedule II shall be utilised in plans made under this sub-regulation.

(4) The plans required by this regulation shall be kept in the office at the mine. They shall be accurate and shall be maintained up to a date within six months; provided that where any mine or seam is abandoned or the working thereof has been discontinued the plan shall, before such abandonment or immediately after such discontinuance, be brought up to date to the time of abandonment or discontinuance, as the case may be, unless such abandonment or discontinuance has been caused by circumstances beyond the control of the owner, agent or manager, in which case the fact that the plan is not up to date shall be recorded on it.

(5) Nothing in this regulation shall be deemed to apply to any mine in which the workings do not extend under the superjacent ground or to any mine in which excavation is being made for prospecting purposes only:

Provided that the Chief Inspector may direct that the regulation shall apply to any such mine to such extent as he may think fit.

16. The owner, agent or manager of every mine shall at any time on the request of the Chief Inspector or of any Inspector produce to him at the office at the mine such plans and sections, and also, on the like request, mark on such plans and sections the then state of the workings of the mine; and the Chief Inspector or Inspector shall be entitled to examine the plans and the sections and for official purposes to make or have a copy made of any part thereof respectively.

17. Where any mine or seam is abandoned, or the working thereof has been discontinued over a period exceeding one year, the person who was the owner of the mine at the time of the abandonment or discontinuance, shall, within three months after the abandonment or within fifteen months after the discontinuance of working, as the case may be, send to the Chief Inspector accurate plans and sections of the workings of the mine or seam up to the time of the abandonment or discontinuance, showing the pillars of coal remaining unworked and all other features required in compliance with these regulations, or a true and accurate copy of the same:

Provided that if a change of ownership occurs after the abandonment or discontinuance and before the expiry of the three months or the fifteen months aforesaid, as the case may be, such plans and sections shall be sent forthwith.

18. After the expiry of ten years from the date of abandonment or discontinuance of working in any mine or seam or, where the consent of the owner of the mine for the time being has been obtained, prior to the expiry of the said period, the Chief Inspector may, on such conditions as he thinks fit to impose, permit any person having an interest in the said mine or seam to inspect the plan or section of such mine or seam sent to him in accordance with the provisions of regulation 17; and he may further, on such condition as he thinks fit to impose, supply to any such person copies of the like plan or section.

19. The Central Government may direct that after such date and in such areas as he may appoint in this behalf the plans required to be kept under regulation 15 or to be sent under regulation 17 shall be prepared by or under the supervision of a surveyor who has been granted a surveyor's certificate under these regulations.

CHAPTER III—MINE OFFICIALS

20. For the purposes of this chapter every system of underground workings interconnected in such a manner that communication is practicable from any one part of the system to any other part by means of underground channels shall be deemed to constitute one mine. If access from one system of underground workings to another such system is not so practicable each such system shall be deemed to constitute a separate mine.

21. A duly qualified manager may be permitted by order in writing of the Chief Inspector to manage more than one mine, if the Chief Inspector is of opinion that the mines supervised by him are sufficiently near to one another to permit of effective supervision being exercised, and that an adequate subordinate supervising staff is maintained at each mine. The Chief Inspector may at any time, by order in writing, revoke any such permission and such order shall be final.

22. Save as provided by Regulation 21 no person shall act as manager of more than one mine.

22-A. *No person shall be employed in a mine as manager unless he is paid by, and is directly answerable to, the owner of the mine.*

23. Save as hereinafter provided in Regulation 24—

(a) no person shall act as manager of a mine, the average monthly output of which exceeds 2,500 tons, unless he holds a first class manager's certificate granted under these regulations;

(b) no person shall act as manager of a mine, the average monthly output of which exceeds 600 tons, unless he holds a first or second class manager's certificate granted under these regulations; and

(c) no person shall act as the manager of a mine, the average monthly output of which does not exceed 600 tons, unless he holds a first or second class manager's certificate or a manager's permit granted under these regulations;

Provided that the Chief Inspector may, by order in writing, direct that in the case of any such mine as is referred to in clause (b) the manager thereof shall be the holder of a first class manager's certificate granted under these regulations, and that in the case of any such mine as is referred to in clause (c) the manager thereof shall be the holder of a first or second class manager's certificate granted under these regulations;

Provided further that an appeal from any order passed by the Chief Inspector under the foregoing proviso shall lie to the Mining Board constituted under section 10 of the Act or, if no Mining Board has been so constituted for the part of British India in which the mine or part of the mine is situated, to the Central Government and the order of the Mining Board or of the Central Government thereon shall be final.

24. (1) The Chief Inspector may, by order in writing, authorise any person, whom he may consider competent, to act as manager of any mine or mines for a specified period, notwithstanding that such person does not possess the qualifications prescribed in that behalf by regulation 23 and may by a like order revoke any such authority at any time and such order shall be final.

(2) In every mine personal supervision shall be exercised by the manager.

(3) Where by reason of absence or for any other reason the manager is unable to exercise personal supervision the owner, agent or manager shall authorise in writing a person whom he considers competent to act as manager of the mine:

Provided that:—

(a) such person holds a manager's certificate or a sirdar's certificate;

(b) no such authorisation shall have effect for a period in excess of one month except with the previous consent of the Chief Inspector nor without the like consent shall a second authorisation be made to take effect upon the expiry of the first;

(c) the owner, agent or manager, as the case may be, shall send to the Chief Inspector with the least possible delay, a written notice intimating that such an authorisation has been made, and stating the reason for the authorisation, the qualifications and experience of the person authorised and the dates of the commencement and ending of the authorisation; and

(d) the Chief Inspector may by order in writing revoke any authority so granted, and such order shall be final.

24-A. (1) *The manager of every mine shall ensure that a sufficient supply of proper materials and appliances for the purpose of carrying out the provisions of the Act and of*

the regulations, rules and bye-laws made thereunder and ensuring the safety of the mine and the persons employed therein, is always provided at the mine, and, if he be not the owner or agent of the mine he shall report in writing to the owner or agent of the mine when anything is required for the aforesaid purposes that is not within the scope of his authority to order.

(2) A copy of every report made under sub-regulation (1) shall be kept in the office at the mine.

25. (1) The manager of every mine shall appoint in writing such number of competent persons as will be sufficient to secure a thorough supervision of all the operations in the mine and the enforcement of the requirements of the Act and of the regulations, rules and bye-laws made thereunder. He shall assign to every such person his particular duties, shall on his appointment make over to him a copy of the regulations, rules and bye-laws which affect him and shall take all possible steps to ensure that every such person understands, carries out and enforces the provisions therein contained. No person shall be appointed under this regulation unless he is paid by the owner of the mine and is directly answerable to the owner or the manager of the mine.

(2) Copies of all appointments made under sub-regulation (1) and all authorisations made under these regulations shall be entered in a bound paged book kept in the office at the mine.

(3) Every manager shall on appointment satisfy himself that all persons already appointed under sub-regulation (1) or authorised under these regulations to discharge any functions are competent to perform the duties assigned to them.

26. Every person employed underground in a mine as an official subordinate to the manager and superior to the underground sirdar shall hold either a manager's certificate or sirdar's certificate granted under these regulations.

27. With effect from such date and in such areas as the Central Government may notify in the *Gazette of India* no person shall be employed as a surveyor in a mine unless he holds a surveyor's certificate granted under these regulations.

28. No person shall be employed as a winding engine man unless he has attained the age of 21 years; and the manager or some competent person appointed by the manager for the purpose shall, before appointing any such person, satisfy himself that such person is competent to perform the duties assigned to him.

CHAPTER IV—CERTIFICATES OF COMPETENCY, PERMITS AND AUTHORISATIONS

29. (1) There shall be constituted a Board of Examiners for the purposes of these regulations, which shall consist of the Chief Inspector, who shall be the Chairman of the Board, and of three Members possessing technical qualifications fitting them to serve on the Board, who shall be appointed by the Central Government for a term of three years:

Provided that on the expiry of any term for which he has been appointed, any Member shall be eligible for re-appointment.

(2) A Member of the Board of Examiners (other than the Chairman) shall receive such remuneration as the Central Government may fix.

30. (1) Certificates under these regulations shall be granted by the Board of Examiners, and all decisions of the Board regarding the grant of such certificates shall be final.

(2) Certificates granted by the Board shall be valid throughout India, and shall be of the following kinds:—

(a) first and second class certificates of competency to manage a mine (in these regulations referred to as managers' certificates);

(b) certificates of competency to survey the workings of a mine (in these regulations referred to as surveyors' certificates);

(c) certificates of competency to make the inspection hereinafter required by regulation 70 (in these regulations referred to as sirdars' certificates);

(d) certificates of competency to fire shots in a mine (in these regulations referred to as shot-firers' certificates).

31. (1) Certificates shall be granted to candidates after such examination and in such form as the Board of Examiners may prescribe.

(2) The examinations shall be held at such times and at such centres as may be fixed by the Board and shall be conducted by local examiners who shall be appointed by the Board.

(3) The local examiners so appointed shall be subject to the orders of the Board in respect of all matters relative to the conduct of the examinations, and shall receive such remuneration as the Board, with the sanction of the Central Government, may fix.

(4) The Board may make rules as to the conduct of the examinations; and shall, so far as may be practicable, provide that the standard of knowledge requisite for the grant of certificates of any particular class shall be uniform throughout India.

(5) Every rule made by the Board under this regulation shall be published in the *Gazette of India* and no such rule shall have effect until six months from the date on which it was first so published.

32. Full information regarding the date and place of each examination for managers' and surveyors' certificates shall be published under the orders of the Board of Examiners in such publications and at such intervals as the Board may direct, during a period of not less than three months prior to the date fixed by the Board for receiving applications.

33. No person shall be admitted as a candidate at any examination for a manager's certificate unless he has gained a First Aid Certificate of the St. John Ambulance Association or other Society or Body approved by the Central Government.

Provided that if any candidate satisfies the Board of Examiners that he has not had sufficient opportunity to obtain such a certificate, the Board may admit him to the examination on such conditions, if any, as it thinks fit to impose.

34. No person shall be admitted as a candidate at any examination for a first class manager's certificate unless he has attained the age of 23 years, and has satisfied the Board of Examiners that he has had practical experience in a coal mine for a period of not less than five years.

Provided that this period shall be reduced to three years in the case of a candidate who has received a diploma or certificate in scientific and mining training after a course of study of at least two years at an educational institution approved in this behalf by the Central Government, or who has taken a degree in scientific and mining subjects at a University approved in this behalf by the Central Government.

35. No person shall be admitted as a candidate at any examination for a second class manager's certificate unless he has attained the age of 21 years, and has satisfied the Board of Examiners that he has had practical experience in a coal mine for a period of not less than three years:

Provided that this period shall be reduced to two years in the case of a candidate who has received a diploma or certificate in scientific and mining training after a course of study of at least two years at an educational institution approved in this behalf by the Central Government or who has taken a degree in scientific and mining subjects at a University approved in this behalf by the Central Government.

36. The periods of practical experience in a coal mine prescribed in regulations 34 and 35 may, subject to such conditions as the Board of Examiners thinks fit, be reduced at the discretion of the Board in the case of a candidate part of whose experience has been obtained in mines other than coal mines.

37. The nature of the practical experience required of a candidate under regulations 34 and 35 shall be experience gained in one or other of the following capacities in a coal mine, namely:—

- (a) as an underground workman having direct practical experience in the work of getting coal, and of stone work, timbering and repairing;
- (b) as a sirdar, deputy, overman, foreman, assistant or under-manager or other underground official;
- (c) as a mining apprentice, mine surveyor or colliery engineer, whose practical experience has included—
 - (i) actual practical work (other than the work of mine surveying or colliery engineering) of not less than two years in the case of candidates for first class certificates and of not less than one year in the case of candidates for second class certificates, in any part of the underground workings of a coal mine, or
 - (ii) direct supervision of such work during a like period.

38. No person shall be admitted as a candidate at any examination for a surveyor's certificate unless he has attained the age of 21 years and has satisfied the Board of Examiners that he has had two years' practical experience of surveying, of which at least six months shall have been practical experience of surveying the underground workings of a mine.

Explanations.—For the purposes of this regulation approved attendance at classes in theoretical and practical surveying at a technical institution approved in this behalf by the Board of Examiners shall be considered to be practical experience of surveying other than practical experience of surveying the underground workings of a mine.

39. No person shall be admitted as a candidate at any examination for a sirdar's certificate unless he has attained the age of 21 years, and has satisfied the Board of Examiners that he has had practical experience in a coal mine for a period of not less than three years.

Provided that this period shall be reduced to one year in the case of a candidate who has received a diploma or certificate in scientific and mining training after a course of study of at least two years at an educational institution approved in this behalf by the Central Government, or who has taken a degree in scientific and mining subjects at a university approved in this behalf by the Central Government.

39-A. No person shall be admitted as a candidate at any examination for a shot-firer's certificate unless he has attained the age of 21 years and has satisfied the Board of Examiners that he has had two years' practical experience of underground work in a coal mine of which at least six months shall have been practical experience in connection with shot-firing.

40. Examinations for sirdars' certificates shall be conducted orally in English or in the vernacular language of the district in which the examination is held and shall be designed to test the candidate's knowledge of the following subjects, namely:—

- (a) timbering,
- (b) methods of examination of the roof and sides of working places and travelling roads.
- (c) shot-firing as detailed in clause (a) of Regulation 40-A,
- (d) mine gases and ventilation,
- (e) the provisions of the regulations, rules and bye-laws under the Act relating to the safety of persons employed in mines,
- (f) in the case of candidates for the endorsement referred to in the proviso to sub-regulation (1) of regulation 71, the methods of testing for and detecting the presence of inflammable gas.

40-A. Examinations for shot-firers' certificates shall be conducted orally in English or in the vernacular language of the district in which the examination is held and shall be designed to test the candidate's knowledge of the following subjects, namely:—

- (a) the charging and firing of shots of gunpowder and high explosives;
- (b) the provisions of the regulations, rules and bye-laws under the Act relating to the handling and use of explosives; and
- (c) the examination of a working place after shot-firing.

41. Applications for admission to an examination for first or second class managers' or surveyors' certificates shall be made to the Chief Inspector not less than one month prior to the date fixed for the examination. Every such application shall be submitted on a form which shall be supplied free of charge by the Chief Inspector on application made in this behalf.

42. (1) Applications for admission to an examination shall be chargeable with fees which shall be paid in the manner prescribed in Regulation 153 according to the following scale, namely:—

	Rs.
(a) in the case of an examination for a first class manager's certificate	25
(b) in the case of an examination for a second class manager's certificate	15
(c) in the case of an examination for a surveyor's certificate	15
(d) in the case of an examination for a sirdar's certificate	5
(e) in the case of an examination for a shot-firer's certificate	1

(2) The amount of any fee referred to in sub-regulation (1) less the following amounts shall be returnable to the person by whom it has been paid if the application of such person for admission to the examination is rejected:—

- (a) annas eight in the case of the fee paid for admission to an examination for a shot-firer's certificate;
- (b) Re. 1 in the case of the fee paid for admission to an examination for sirdar's certificate;
- (c) Rs. 5 in any other case.

(3) The Chief Inspector may permit the refund—

- (a) of the amount of any fee paid under sub-regulation (1) where the candidate has died before the examination or where the fee has been erroneously paid, and
- (b) of any amount paid in excess of that specified in sub-regulation (1).

43. (1) The Board of Examiners may grant to any person holding a manager's certificate, or a surveyor's certificate, granted under any Act for the regulation of mines for the time being in force in any other country, a certificate of a similar class under these regulations, provided that the person satisfies the Board of Examiners with documentary evidence that he possesses the requisite experience, and produces a certificate of good character from his previous employer, if any, and provided further that he has undergone for a period of not less than six months a course of practical training in Indian Mines in the mine approved by the Chief Inspector for the purpose, and in the case of an applicant for a manager's certificate, has also passed such examination in Mining Legislation and Mine Management as the Board of Examiners may prescribe.

(1A) If a person from any other country intends to apply for a certificate referred to in sub-regulation (1), he shall, before commencement of his practical training in India, submit an application in the form set out in Schedule III to these regulations to the Chief Inspector, who may, before according approval, impose such conditions as he may consider necessary.

(2) Applications for a certificate under this regulation shall be chargeable with fees which shall be paid in the manner prescribed in regulation 153 according to the following scale, namely:—

			Rs.
(a) in the case of a first class manager's certificate	25
(b) in the case of a second class manager's certificate	15
(c) in the case of a surveyor's certificate	15

44. If any person proves to the satisfaction of the Board of Examiners that he has without any fault on his part lost or been deprived of a certificate granted to him under these regulations, the Board may, upon such terms and conditions as it thinks fit, cause a copy of the certificate to be delivered to him. The word "Duplicate" shall be stamped across every such copy, and the following fees shall be payable in the manner prescribed in regulation 153:—

			Rs.	A.	P.
(a) in the case of a manager's or surveyor's certificate	2	0	0
(b) in the case of a sirdar's certificate	1	0	0
(c) in the case of a shot-firer's certificate	0	8	0

45. The Chief Inspector shall issue to every person to whom the Board of Examiners grants a sirdar's certificate or shot-firer's certificate a metal check marked with the registered number of the certificate.

46. (1) The person to whom such metal check is issued shall, so long as the corresponding certificate remains in force, retain such check in his immediate possession, and shall not transfer it or dispose of it in any way. In the event of the corresponding certificate being cancelled, the check shall be returned to the Chief Inspector.

(2) No person employed in a mine other than the holder of the corresponding certificate for the time being in force shall be in possession of a metal check issued under Regulation 45.

(3) If any person proves to the satisfaction of the Chief Inspector that he has without any fault on his part lost or been deprived of the metal check issued to him under regulation 45, the Chief Inspector may, upon such terms and conditions as he may determine, cause a second metal check bearing the registered number of his certificate to be delivered to him. The letter "D" shall be stamped on the reverse of every such check and a fee of four annas shall be payable in advance to the Chief Inspector in respect thereof.

47. The holder of a sirdar's certificate or shot-firer's certificate shall deliver such certificate to the owner, agent or manager of any mine in which he is for the time being employed; and such owner, agent or manager shall in exchange for the certificate deliver a receipt for the same to the holder, and shall retain the certificate so long as the holder thereof is employed in such mine, and shall return it to the holder on his ceasing to be so employed.

48. Where it appears to the Central Government that any person holding a manager's certificate or a surveyor's certificate has been guilty of misconduct or incompetency in the discharge of his duties, or has been convicted of any offence made punishable by the Act with fine which may extend to Rs. 500 or more, or with imprisonment, the Central

Government may cause an inquiry into the conduct of such person to be made; and with respect to such enquiry the following provisions shall have effect, namely:—

- (a) The inquiry shall be public, and shall be held at such place as the Central Government may appoint, and by such person or uneven number of persons as it may direct (hereinafter in this regulation referred to as the Court), either alone or with the assistance of any assessor or assessors appointed by the Central Government. Such assessors shall be practical mining engineers or persons with a knowledge of the practical working of mines. The functions of the assessors shall be purely advisory and they shall not be regarded as members of the Court.
- (b) The Central Government shall, before the commencement of the inquiry, furnish the person whose conduct is under inquiry with a statement of the case on which the inquiry is instituted.
- (c) The Central Government may appoint any person to undertake the management of the case.
- (d) The person whose conduct is under inquiry may attend the inquiry, and may either conduct his case personally or be represented by any other person approved by the Court.
- (e) If a majority of the persons constituting the Court thinks fit, the person whose conduct is under inquiry may be required to deliver up his certificate at any time before or during the inquiry, and such person shall be bound to comply with such requisition, unless he shows sufficient cause to the contrary.
- (f) The Court shall, on the conclusion of the inquiry, send to the Central Government a report containing a full statement of the case together with its opinion thereon and such account of or extracts from the evidence as it may think fit, and if it considers that the certificate in question should be cancelled or suspended it shall add a recommendation to that effect. In the event of disagreement between the members composing any Court, the dissentient or dissentients from the opinion of the majority may forward a separate report to the Central Government with a statement of their recommendations.
- (g) After considering the report or reports and the recommendations (if any) submitted under clause (f) the Central Government may cancel or suspend the certificate, and, if it does so, the fact of such cancellation or suspension shall, if the certificate is produced be endorsed upon it and, if it is not produced or if at any time a duplicate has been granted under regulation 44, be notified in the *Gazette of India*.

49. If, in the opinion of an Inspector, a person to whom a sirdar's certificate or shot-firer's certificate has been granted is guilty of misconduct or incompetence in the discharge of his duties, the Inspector may suspend the certificate. Every such suspension shall be reported forthwith to the Board of Examiners and the Board shall thereupon, after such inquiry as it thinks fit, either remove or extend the suspension or cancel the certificate, and the decision of the Board shall be final.

50. (1) A permit (in these regulations referred to as a manager's permit) may be granted by the Chief Inspector at his discretion to any person authorising such person to act as the manager of any specified mine the average monthly output of which does not exceed 600 tons.

(2) All such permits shall be signed by the Chief Inspector and shall be valid for such period not exceeding one year as he may specify therein.

(3) A fee of five rupees shall be payable in the manner prescribed in regulation 153 in respect of an application for the grant of a manager's permit.

(4) The Chief Inspector may at any time renew any manager's permit for a further period not exceeding one year, notwithstanding that such permit has already been so renewed. No fee shall be chargeable in respect of any such renewal.

(5) A manager's permit may be cancelled at any time by the Chief Inspector by order in writing without assigning any reason for such cancellation and such order shall be final.

(6) Notwithstanding anything hereinbefore contained no manager's permit shall be granted or renewed to any person who is not the holder of a sirdar's certificate.

51. A register showing the names and addresses of all holders of certificates or permits granted under these regulations and all cancellations of such certificates or permits shall be maintained in the office of the Chief Inspector.

52. Any certificate, permit or authorisation specified in the first column of the table below which has been issued under the Indian Mines Act, 1901, or under any rule made thereunder and is valid at the commencement of these regulations shall for the purposes of the Act and these regulations be deemed respectively to be the equivalent of the certi-

ficate, permit or authorisation specified in the corresponding entry in the second column of the table and to have been issued under these regulations.

Manager's certificate of competency, First class	}	Manager's certificate, First Class
Manager's service certificate of competency, First class		
Manager's certificate of competency, Second class	}	Manager's certificate, Second Class
Manager's service certificate of competency, Second class		
Sirdar's certificate of competency		Sirdar's certificate.
Permit to manage a mine		Manager's permit
Authorisation to act as Manager of a mine		Authorisation to act as Manager of a mine

CHAPTER V—SHAFTS AND OUTLETS

53. (1) No person shall be employed, or be permitted to enter or remain for purposes of employment, in any mine, unless the mine is provided with at least two shafts or outlets—

- (a) with which every seam for the time being at work has a communication so as to afford separate means of ingress and egress to the persons employed in seam; and
- (b) which are under the sole control of the manager of the mine.

(2) Proper arrangements shall be made for persons to descend to, and ascend from, the mine at each of such shafts or outlets. If apparatus is necessary, it shall be kept on the works belonging to the mine, and shall be constantly available for use.

(3) Such shafts or outlets shall be not less than 45 feet distant from one another at any point, and each shall be connected with the other by means of a communication not less than 4 feet high and 4 feet wide.

(4) Whenever communication between the two outlets which are required to be maintained under sub-regulation (1) has been blocked or fenced off under regulation 140 (1), only such persons as are necessary to clear the obstruction, or to repair the dangerous part of the communication or to make a new second outlet, shall be employed in the mine until such time as communication has been re-established or a new second outlet has been provided.

(5) The foregoing provisions of this regulation with respect to shafts and outlets shall not apply—

- (i) while a shaft is being sunk or an outlet is being made,
- (ii) to any working for the purpose of making communication between two or more shafts or outlets,
- (iii) to any working for the sole purpose of searching for or proving minerals, so long as not more than 40 persons are employed underground at any one time in the whole of the different seams in connection with a single shaft or outlet:

Provided that nothing in this sub-regulation shall be deemed to authorise the driving of ordinary galleries for development before a second outlet has been made in accordance with the said provisions.

(6) The Chief Inspector may exempt from the operation of this regulation, subject to such conditions as he may impose, any mine in the case of which special difficulties exist which in his opinion make compliance with the provisions of this regulation not reasonably practicable.

(7) So much of this regulation as requires two shafts or outlets to be separated by a distance of not less than 45 feet shall not apply to any shafts the sinking of which was commenced before the 10th day of March, 1904.

54. Where the natural strata are not safe, every working or pumping shaft and every shaft in course of being sunk, shall be securely cased, lined or otherwise made secure.

55. Every part of a mine shall, where practicable, be provided with at least two ways affording means of egress to the surface.

56. Where it is necessary for persons to pass from one side of a winding shaft to the other, proper provision shall be made enabling them to do so without crossing the shaft.

57. A competent person or persons, of not less than 21 years of age, appointed by the manager for the purpose shall, once at least in every week, examine the state of the shafts by which persons ascend or descend, and shall without delay write or cause to be written a full and accurate report of the result of such examination. Every such report

shall be recorded in a paged book to be kept at the mine for the purpose, and shall be signed and dated by the person who made the examination.

CHAPTER VI—RAISING AND LOWERING PERSONS OR MATERIALS

58. At every shaft or incline where persons or materials are lowered or raised by means of machinery the following provisions shall have effect, namely:—

- (a) A single linked chain shall not be used for lowering or raising persons, except for the short coupling chain attached to a cage, skip, bucket or tub.
- (b) Where the apparatus ordinarily used for raising and lowering persons to or from the surface is worked by mechanical power, it shall, if the shaft is vertical and exceeds 150 feet in depth, be provided with a detaching hook. The space between the detaching hook and the detaching plate when the cage is at the normal position at the top of the shaft shall not be less than 6 feet where a geared winding engine is used, and not less than 12 feet where a direct acting engine is used.
- (c) There shall be attached to every machine worked by mechanical power, and used for raising and lowering persons, one or more brakes of sufficient power by themselves to hold the cage, skip, bucket or tub, when loaded, at any point in the shaft, and a proper indicator (in addition to any mark on the rope) showing to the person who works the machine the position of the cage, skip, bucket or tub in the shaft; and, if the drum is not on the crank shaft, there shall be an adequate brake on the drum shaft:

Provided that in the case of a shaft not exceeding 100 feet in depth so much of this clause as requires an indicator shall not apply.

- (d) Every apparatus on or in which persons ride in a working shaft, shall be provided with a sufficient cover overhead, except—
 - (i) in a shaft not exceeding 150 feet in depth where buckets or other appliances are used for winding, or
 - (ii) in a shaft in course of sinking, or
 - (iii) where persons are employed at work in a shaft.
- (e) Every working shaft used for the purpose of drawing mineral or for lowering or raising persons shall, if exceeding 150 feet in depth, be provided with proper means of communicating distinct and definite signals from the bottom of the shaft, and from every entrance for the time being in use between the surface and the bottom of the shaft, to the surface, and from the surface to the bottom of the shaft and to every entrance for the time being in use between the surface and the bottom of the shaft. There shall also be proper means of transmitting distinct and definite signals from the top of every winding shaft to the winding engine. All signals shall be transmitted by mechanical or electrical means.
- (f) (i) The first three or principal signals shall be—

One rap	RAISE when engine at rest.
One rap	STOP when engine in motion.
Two raps	LOWER.
Three raps	MEN ready to ascend or descend.
Three raps	IN REPLY. Men may enter the cage or other conveyance.

 - (ii) Any other signals shall be in addition to, and shall not interfere with, the foregoing.
 - (iii) A printed copy of the code of shaft signals shall be posted at the shaft top, and at every inset, and also at the winding engine.
 - (iv) No person other than the banksman or onsetter shall give any signal unless he is an official of the mine or is authorised in writing by the manager to give signals.
- (g) Every working shaft (except a shaft in course of sinking) used for lowering or raising persons shall, if it exceeds 150 feet in depth, be provided with guides.
- (h) At the bottom of every working shaft in which a cage is used, protective roofing shall be provided sufficient to prevent danger from anything falling in the shaft.
- (i) Adequate stationary lights shall be provided and used during working hours—
 - (1) at all places where persons have to work underground in the immediate vicinity of shafts, and

(2) after dark at the tops of all working shafts and at all winding engines used for raising and lowering persons and in particular at all such engines, where electric lighting is used, an additional light having no connection with the electric supply shall be kept burning at night.

(j) There shall be on the drum of every machine used for lowering or raising persons such flanges, horns or other appliances as may be sufficient to prevent the rope from slipping. The rope shall be securely fastened round an arm or the shaft of the drum, and there shall be at least two turns of the rope on the drum when the case, skip, bucket or tub is at the bottom of the shaft. After any stoppage of winding for more than two hours, the case, skip, bucket or tub shall, before any person is allowed to ride therein, be run a complete trip up and down the working portion of the shaft at least once, to ensure that everything is in good working order.

(k) Every cage shall be provided with catches, or some other suitable contrivance to prevent tubs from falling out, and shall, if used for lowering or raising persons, be covered in completely at the top and closed in at the two sides in a manner sufficient to prevent persons or things from projecting beyond the sides and shall be provided with suitable gates or other rigid fences and with a rigid hand bar fixed in a position where it can be easily reached by all persons in the case.

(l) A competent person or persons, of not less than 21 years of age, appointed by the manager for the purpose shall, once at least in every 24 hours, examine the state of the external parts of the machinery and of the head-gear, ropes, chains, cages, guides, and conductors in the shafts and other similar appliances of the mine which are in actual use, both underground and above ground, and shall without delay write or cause to be written a full and accurate report of the result of such examination. Every such report shall be recorded in a paged book to be kept at the mine for the purpose, and shall be signed and dated by the person who made the examination.

39. No person shall get on or off a cage, skip, tub or bucket used for lowering or raising persons after the same has been set in motion, or leave it until it has reached the appointed stopping place; nor shall any person ride on the top or edge of any case, skip, tub or bucket except when engaged upon special work in the shaft.

60. No person, when ascending or descending a shaft, shall take with him any tools or other bulky materials, save when engaged in repairing the shaft or when otherwise specially authorised by the manager:

Provided that, in the case of tools only, the manager may, by general order permit the same to be carried.

61. No person shall ride in a shaft on, or against, a loaded cage, skip, tub or bucket.

62. Every person, when at or about the top or the bottom of a shaft, shall obey the orders and directions of the shaft attendants on duty at the time.

63. Not more than such number of persons as may be authorised by the manager shall be allowed to ride in the same cage, tub, skip or bucket at one time, and a notice specifying the authorised number shall be posted at the top of every shaft and at every inset in a shaft.

64. No person under 18 years of age and no woman shall descend or ascend a shaft in a cage, tub, skip or bucket unless accompanied by at least one person over 18 years of age.

65. When the winding apparatus is not provided with some automatic contrivance to prevent overwinding, a point shall be fixed and marked on the indicator in such a way as to show when the cage or other conveyance is within a distance of twice the circumference of the drum from the completion of the wind; and when such cage or conveyance has reached such distance it shall not, if either it or the descending cage contains persons, be raised for the remaining distance at a speed exceeding three miles per hour.

66. (1) All cage chains in general use shall be annealed and all detaching hooks shall be cleaned and refitted, and all winding ropes shall be re-capped, once at least in every six months, or, if necessary, at shorter intervals.

(2) The date of each such operation shall be recorded in a book kept at the mine for the purpose.

CHAPTER VII—ROADS AND WORKING PLACES

67. The roofs and sides of all working places and travelling roads, including airways and travelling roads to second outlets, shall be made and kept secure.

68. (1) In any mine or part of a mine where the roof is of such a nature as to require artificial support, an Inspector, after consultation with the manager, may require such support to be systematic, and may give notice to that effect to the manager, who shall, by notices posted in conspicuous places at the mine, specify the manner in which supports are to be set and advanced and the maximum intervals—

- (a) between each row of props,
- (b) between adjacent props in the same row,
- (c) between the front row of props and the face, and
- (d) between chocks or cogs.

(2) The manager and his subordinate staff shall be responsible for securing effective compliance with the terms of the notices and no such mine or part of a mine shall be worked in contravention of these terms.

69. (1) In open workings the overburden and all loose ground and material shall be removed sufficiently far from the edge, or otherwise made secure, in such a manner as to prevent danger to persons employed in the mine.

(2) The sides of open workings shall be sloped, stepped or secured in such a manner as to prevent danger from falls of material.

(3) When an open working is worked in steps, the steps shall be of sufficient breadth in comparison with their height to secure safety.

69-A. Every footpath along which loads are carried in open workings by human agency shall comply with the following requirements—

- (a) its breadth shall not be less than three feet;
- (b) its slope shall not be greater than 1 vertical to 2 horizontal;
- (c) at every place where its slope exceeds 1 vertical to 4 horizontal reasonably level steps shall be provided such that the vertical height of every step does not exceed seven inches and the dimension of every step measured horizontally from the edge to the back is not less than fourteen inches.

Explanation.—Gang-planks used for loading wagons shall not be deemed to be part of a footpath for the purposes of this regulation; provided that every gang-plank shall be so inclined or constructed as to give a secure foot-hold.

69-B. Where women are employed in carrying loads, the weight of the loads and the height and distance to which they have to be carried shall not be such as to involve risk of injury to the health of the women. If any dispute arises as to whether risk of injury to health is involved, the decision of the Chief Inspector shall be final.

70. (1) For the purposes of inspections before the commencement of a period of work constituting a shift at a mine, one or more stations shall be fixed by the manager at the entrance to the mine or to different parts of the mine, as the case may require, and no workman shall pass beyond any such station until the part of the mine beyond that station has been examined and reported to be safe in the manner hereinafter provided.

(2) A competent person or persons, having the prescribed qualifications and appointed by the manager, shall within such time, not exceeding two hours before the commencement of work in a shift, as may be fixed by the bye-laws of the mine inspect every part of the mine situated beyond the station or each of the stations fixed by the manager, in which work-persons are to work or pass during the shift, and all working places in which work is temporarily stopped and the edges of all goaves within any ventilating district in which persons have to work, and shall ascertain the condition thereof so far as the presence of gas, ventilation, roof and sides and general safety are concerned. The result of every such inspection shall be recorded in a book kept at the mine for the purpose.

(3) A like inspection shall be made at least twice in the course of each shift, and at least once in every five hours during which the shift continues, of all parts of the mine which are situated beyond the station or each of the stations aforesaid and in which work-persons have to work or which they have to traverse during that shift, but it shall not be necessary to record the result of such inspections in a book unless the last inspection in a shift is the inspection required to be made under sub-regulation (2).

(4) The inspection shall be made with an approved locked flame safety lamp and no additional light shall be used other than an approved electric torch or lamp.

Provided that in the case of a mine in which inflammable gas has never been found and is unlikely to be found, the inspection, except in the region of an underground fire or of any stoppings made to control a fire, may be made with an electric torch or lamp if it is used in conjunction with an open light or an approved locked flame safety lamp.

(4-A) In any inspection in the region of an underground fire, or of any stoppings made to control a fire, a cage containing small birds or other means of detecting carbon monoxide gas approved by the Chief Inspector shall be carried.

(5) Every report referred to in sub-regulation (2) shall be made by the person inspecting, either when underground or immediately on his return to the surface, and shall be a full and accurate report of the inspection, specifying whether or not, and where, if anywhere, noxious or inflammable gas was found, and whether or not any and, if any, what defects in roof or sides and other sources of danger were observed. The report shall be signed by the person who made the inspection and shall state the date and time of the inspection and the date and time when the report was written.

(6) The part of a mine or mines assigned to a competent person under this regulation shall not be of such a size, nor shall any duties which may be assigned to him other than his duties under this regulation be such, as to be likely to prevent him from carrying out such last-mentioned duties in a thorough manner. If any question arises whether the part of a mine or mines assigned to any such person is too large or whether the additional duties assigned to him are too great, the decision of the Chief Inspector shall be final.

(7) A competent person or persons appointed by the manager shall inspect all airways and travelling roads leading to second outlets at least once a fortnight, and shall record the result of his inspection in a book kept at the mine for the purpose.

70-A. (1) The first inspection of a mine or part of a mine which is re-opened after a discontinuance of mining for a period exceeding seven days and of any part of a mine after being dewatered, shall be made by a person possessing the qualifications prescribed in sub-regulation (1) of Regulation 71 with an approved locked flame safety lamp.

(2) No additional light shall be used in any such inspection other than an approved electric torch or lamp.

(3) The result of every such inspection shall be reported by the person making it in the manner required by sub-regulation (5) of regulation 70 and shall be recorded in the book maintained in accordance with sub-regulation (2) of regulation 70.

70-B. (1) In any mine in which inflammable gas has been found during the previous twelve months, all unused workings in which inflammable gas may accumulate and which are not permanently sealed off, shall, at least once in every week, be inspected for the presence of inflammable gas, by the competent person appointed under regulation 70.

(2) The inspection shall be made with an approved locked flame safety lamp, and no additional light shall be used, other than an approved electric torch or lamp.

(3) The result of every such inspection shall be reported by the person making it in the manner required by sub-regulation (5) of regulation 70 and shall be recorded in the book maintained in accordance with sub-regulation (2) of that regulation.

(4) Nothing in this regulation shall be construed to affect the provisions of Regulation 70.

70-C. *At every sealed off fire area in any mine and at every goaf or area of old workings isolated by stoppings in any mine in which safety lamps are required to be used in compliance with regulation 123, arrangements shall be made to ascertain from time to time atmospheric conditions behind the stoppings:*

Provided that this regulation shall not apply—

- (a) *to an area in a mine which is isolated by stoppings capable of resisting the force of an explosion, or*
- (b) *to any mine or part of a mine where in the opinion of the Chief Inspector special difficulties exist which make compliance with the provisions of this regulation not reasonably practicable.*

71. (1) No person shall, save as hereinafter provided, be appointed to make any inspection required by regulation 70 unless he—

- (i) has within the preceding five years obtained a certificate from an authority and in a form to be prescribed by the Board of Examiners constituted under these regulations to the effect that his powers of eye-sight and hearing are such as to enable him to make the inspection efficiently, and
- (ii) holds a manager's or a sirdar's certificate or a manager's permit or is for the time being authorised under sub-regulation (1) or regulation 24 to act as manager of the mine in which the inspection is to be made:

Provided that the holder of a sirdar's certificate shall not be appointed to make any such inspection in a mine in which safety lamps are used or in which inflammable gas is likely to occur, unless his certificate bears an endorsement to the effect that he is competent to test for and detect the presence of inflammable gas.

(2) A fee of one rupee payable in the manner prescribed in regulation 153 shall be chargeable from every person whose eyesight and hearing are examined for the purpose of enabling the grant to him of a certificate of adequate eye-sight and hearing referred to in

clause (i) of sub-regulation (1), unless such examination is made in the course of an examination held under regulation 40.

(3) Where an emergency exists, the manager of a mine may appoint to make the inspection required by regulation 70 any person who, in his opinion, is competent to make such inspection, notwithstanding the fact that such person does not possess the qualifications prescribed in sub-regulation (1):

Provided that such appointment shall not extend over a period exceeding one month:

Provided further that every such appointment and the reasons therefor shall forthwith be reported to the Chief Inspector. The Chief Inspector may cancel any appointment so made, and such cancellation shall be final.

72. (1) If at any time it is found by the person for the time being in charge of a mine or any part thereof that, by reason of any cause whatever, the mine or part is dangerous, every workman shall be withdrawn from the mine or part, and a competent person appointed by the manager for the purpose shall inspect the mine or part.

(2) The person so appointed shall make a full and accurate report of the condition of the mine or part and no workman shall, except in so far as is necessary for enquiring into the cause of the danger or for the removal thereof or for exploration be re-admitted into the mine or part, until the mine or part is reported by the person so appointed not to be dangerous.

(3) Every report made under sub-regulation (2) shall be recorded without delay in a paged book, which shall be kept at the mine for the purpose, and shall be dated and signed by the person who made the inspection:

Provided that—

(i) where the danger arises from the presence of inflammable or noxious gas, the provisions of regulation 72-A shall be followed;

(ii) where the appearance in any part of a mine of smoke or other sign indicates that a fire has or may have broken out, the provisions of regulation 87-F shall be followed.

72-A. (1) When inflammable gas or any noxious gas is detected in any working place or any part of a mine, all persons shall be withdrawn from the place or part, and the place or part shall be immediately fenced off so as to prevent persons inadvertently entering the same. The official in charge of the district in which the gas has been detected shall take steps, without delay, to remove the gas by improving the ventilation and shall also send a report of the occurrence to the manager.

(2) During the removal of such gas no naked light shall be used in the ventilating district in which the gas is detected and all persons, except those necessary for such removal, shall be withdrawn from the return side of the ventilating district unless the quantity of gas is, in the opinion of the manager or other responsible official in charge of the mine in the manager's absence, so small that such withdrawal of persons is unnecessary.

(3) No workman shall be re-admitted into the place or part referred to in sub-regulation (1) until a competent person appointed by the manager for the purpose has inspected the place or part and has reported that the place or part is free from gas. Every such report shall be in writing and shall be dated and signed by the person who made the report.

(4) The inspection required by sub-regulation (3) shall be made with an approved locked flame safety lamp and, in the case of noxious gas, also with a cage containing small birds or other means of detecting carbon monoxide gas approved by the Chief Inspector.

(5) Particulars of every occurrence referred to in sub-regulation (1) and every report submitted under sub-regulation (3) shall be recorded in a paged book, which shall be kept at the mine for the purpose, and it shall be stated in the book where and when the gas was found and when it was removed.

72-B. (1) No coal shall be extracted from any spot which lies vertically below—

(a) any part of the bed of any river, tank or reservoir, or

(b) any spot lying within a horizontal distance of 50 feet from either bank of a river or the boundary of a tank or reservoir,

except with the written permission of the Chief Inspector and subject to such conditions as he may specify.

(2) For the purposes of this regulation, where sand or alluvium are lying in the course of a river, or in a tank or reservoir, the bed of the river, tank or reservoir at that point shall be deemed to coincide with the surface of the hard strata underlying such sand or alluvium.

73. Where any part of a mine is so situated that there is any danger of irruption of surface water into the mine adequate protection against such an irruption shall be provided and maintained.

74. Where any working has approached within 100 feet of any place containing or likely to contain an accumulation of water or other liquid matter, or within 100 feet of disused working (not being workings which have been examined and found to be free from accumulation of water or other liquid matter) the working shall not exceed 8 feet in width or height, and there shall be maintained at least one bore-hole near the centre of the working face, and sufficient flank bore-holes on each side, and where necessary, bore-holes above and below the working, at intervals of not more than 15 feet. All such bore-holes shall be and shall be constantly maintained at sufficient distance in advance of the working and such distance shall in no case be less than 10 feet.

75. Where work is being done in any seam or part of seam below another seam or part of a seam which contains or may contain an accumulation of water, or where work is being done in an upper seam or part of an upper seam which is at a lower level than any part of a lower seam which contains or may contain an accumulation of water, adequate precautions shall be taken against such an irruption of water into the seam where work is being done as would be likely to endanger the lives of the workmen in the mine.

75-A. When the owner, agent or manager of a mine intends or proposes by introducing water from the surface, or from any other part of the mine or from an adjacent mine, to flood any part of the workings of his mine he shall give in writing not less than seven days' notice of his intention to commence such operations to the Chief Inspector and to the management of all adjacent mines and such other mines as might be affected by such flooding:

Provided that the Chief Inspector may by order in writing—

- (a) permit such operations to be commenced on any day prior to the expiry of seven days from the receipt of notice; or
- (b) require that such operations shall not be commenced until after the expiry of such time, not exceeding twenty days, from the receipt of notice as he may specify in this behalf.

75-B. If the operations in respect of which notice is given under regulation 75-A are not commenced within sixty days from the expiry of the period of notice of seven days therein referred to, the notice shall be deemed to have lapsed and the provisions of that regulation shall apply as if no such notice had been given.

76. (1) No working shall be made within a distance of 25 feet of the boundary of any mine property, or, in the case of a disputed boundary, within a distance of 25 feet of the boundary claimed by the owner of an adjacent mine until such time as a binding agreement has been reached as to the correct boundary or the question has been finally determined by a court of law.

(2) Notwithstanding anything contained in sub-regulation (1) the Chief Inspector may, by order in writing, permit the working of any mine or part of a mine to extend to within any shorter distance than 25 feet of the boundary of the mine, or may require that the working of any mine or part of a mine shall not extend further than any specified distance, not exceeding 100 feet, of such boundary.

(3) The owner of any mine affected or likely to be affected by any order passed by the Chief Inspector under sub-regulation (2) may prefer an appeal to the Mining Board constituted under section 10 of the Act, or, if no Mining Board has been so constituted for the part of British India in which the mine or part of a mine is situated to the Local Government, and the order of the Mining Board or of the Central Government thereon shall be final.

(4) Where the workings of two adjacent mines have each approached to within a distance of 100 feet of the respective boundary or boundaries of each mine property, or, in the case of a disputed boundary, within a distance of 100 feet of the boundary claimed by the owner of the adjacent mine, the owners of the two mines shall make a joint survey of the workings on either side of the common barrier and a copy of the plan showing the workings up to a date within six months shall be kept in the office at each of the mines.

77. (1) The dimensions of pillars and galleries and the shape of pillars formed in any seam shall be such as to ensure stability during the formation of pillars, during the extraction of pillars, and during the period between such formation and extraction.

(2) Save with the previous permission in writing of an Inspector, no gallery in a seam shall exceed 10 feet in height or 16 feet in width.

(3) Where the "pillar and stall" system of working is adopted the pillars formed in any seam shall normally be rectangular in shape.

(4) The distance between the centres of any two adjacent pillars left in a seam shall not be less than that specified in the appended table as corresponding to the depth of the seam from the surface and the average width of the galleries in the workings in question.

Depth of seam from surface.	Where the average width of the galleries does not exceed 10 feet, the distance between centres of adjacent pillars shall not be less than—	Where the average width of the galleries does not exceed 12 feet, the distance between centres of adjacent pillars shall not be less than—	Where the average width of the galleries does not exceed 14 feet, the distance between centres of adjacent pillars shall not be less than—	Where the average width of the galleries does not exceed 16 feet, the distance between centres of adjacent pillars shall not be less than—
	Feet	Feet	Feet	Feet
Not exceeding 200 feet.	40	50	60	65
Exceeding 200, but not exceeding 300 feet.	45	55	65	70
Exceeding 300, but not exceeding 500 feet.	55	65	75	85
Exceeding 500, but not exceeding 800 feet.	75	85	100	115
Exceeding 800 feet.	95	115	130	150

Provided that the Chief Inspector may, in the case of any particular seam or mine, by order in writing and subject to such conditions as he may specify, vary the distances specified in the said table.

(5) Nothing in sub-regulations (2), (3) and (4) shall apply to workings in a mine made before the coming into force of this regulation. In such workings the following provisions shall apply, except in depillaring operations:—

- (a) if the distances between the centres of adjacent pillars are smaller than those specified in the table appended to sub-regulation (4), the pillars shall not be further reduced;
- (b) if the distances between the centres of adjacent pillars are not smaller than those specified in the table appended to sub-regulation (4), the pillar shall not be so reduced as to render those distances smaller than—
 - (i) the distances so specified, or
 - (ii) any distance required in this behalf by the Chief Inspector;
- (c) if the height or width of a gallery exceeds the figure specified in sub-regulation (2), the dimensions of the gallery shall not be further increased without the permission in writing of an Inspector; and
- (d) if the height or width of a gallery is less than the figure specified in sub-regulation (2), it may be increased only to the extent so specified or to such extent as may be permitted by an Inspector in writing.

(6) In the case of all workings, where in the opinion of an Inspector the dimensions of pillars or galleries are such as to render it likely that crushing of pillars or the premature collapse of any part of the workings will occur either before or during the extraction of pillars, he may, by order in writing, require such modification of those dimensions in respect of any future working as he shall specify.

78. (1) The extraction of pillars shall be conducted in such a way as to prevent as far as possible the extension of a collapse or subsidence of the goaf over pillars which have not been extracted. Adequate timber or other supports shall be used where necessary.

(2) Save as provided by sub-regulation (3), no pillars shall be reduced or split in such a manner as to reduce the dimensions of the resultant pillars below those required by regulation 77 or by any order passed thereunder, nor shall any gallery be so heightened as to exceed the height required by or under that regulation.

(3) During the systematic extraction of pillars no 'splitting' or reduction of pillars or the heightening of galleries shall be effected for a greater distance than the length of two pillars ahead of the pillar that is being extracted or from the point at which pillar extraction is about to begin.

(4) An Inspector may by order in writing relax the provisions of sub-regulations (2) and (3) in respect of any specified workings to such extent and on such conditions as he may specify in the order.

78-A. Nothing in regulation 77 or regulation 78 shall prevent the driving of any gallery through any pillar or the enlargement of any gallery beyond the limits prescribed by or under these regulations when in the opinion of the manager such work is necessary for haulage, ventilation, drainage or any other purpose necessary for the proper working of the mine, if a week's previous notice of the intention to undertake such work has been sent to the Inspector.

78-B. Whenever "crush" of pillars or any symptoms of impending collapse other than that ordinarily caused by pillar extraction is detected, the owner, agent or manager of the mine shall inform the Chief Inspector forthwith.

79. Where the method of extraction is to remove all the coal, or as much of the coal as is practicable and allow the roof to fall in, operations shall be conducted in such a way as to leave as small an area of uncollapsed roof and, where practicable, means shall be taken to bring down the roof at regular intervals.

80. (1) In any mine in which two or more seams or sections of a seam are close to each other, the pillars in the one seam or section shall, where the strata are not highly inclined, be, as far as practicable, vertically above or below the pillars in the other seam or section.

(2) No work in a higher seam or section shall be done over an area in a lower seam or section which may collapse unexpectedly.

(3) No seam in a mine shall be worked in more than one section without the permission in writing of the Chief Inspector and under such conditions for ensuring the stability and safety of the workings as he may specify.

(4) Every application for permission under sub-regulation (3) shall be accompanied by a plan showing the proposed layout of the workings, the thickness of the seam, the depth of the seam from the surface, the rate and direction of dip, the dimensions of pillars and galleries in each section and the thickness of the parting between the sections.

(5) Where a seam in a mine is worked in two or more sections every such section shall be deemed to form a separate seam and the parting left between any two such sections or between the workings made in any two seams in a mine which are close to each other, shall not be less than 10 feet in thickness:

Provided that an Inspector may by order in writing—

- (a) permit a smaller thickness of parting, if he is of opinion that the stability of the workings will not be affected thereby, or
- (b) require a greater thickness of parting, if he is of opinion that such greater thickness is necessary for the safety of the workings.

80-A. If in any mine it appears to an Inspector authorised in this behalf in writing by the Chief Inspector that the provisions of regulation 77, regulation 78 or regulation 80 or of any order issued under any of those regulations have not been complied with, he may give notice in writing to the owner, agent or manager of the mine requiring him to take such protective measures, within such reasonable time, as he may specify in the notice; and in case of non-compliance, the Inspector may, by order in writing addressed to the person to whom the notice was given, prohibit the extraction of coal in the part or parts of the mine in which protective measures are required to be taken until the requirements, specified in the notice are complied with to his satisfaction.

81. (1) Proper provision shall be made in every mine to prevent—

- (a) an outbreak of fire in the mine or the spread of fire to the mine from any mine adjacent to it,
 - (b) inundation by water from a neighbouring mine, and
 - (c) the premature collapse of workings,
- and adequate steps shall be taken to isolate, control or remedy, as the case may require, any such outbreak, inundation or collapse which may occur.

(2) Where, in the opinion of an Inspector, the provision made or steps taken for the purposes specified in sub-regulations (1) are inadequate, he may require such additional provision or steps as he shall specify to be made or taken.

82. (1) An appeal against any order passed by an Inspector under any of the following regulations, namely, regulations 68, 77, 78, 80, 80A and 81, may be preferred to the Chief Inspector and the order of the Chief Inspector thereon shall, save as otherwise provided in sub-regulation (2), be final.

(2) An appeal against any order passed by the Chief Inspector—

(a) under sub-regulations (4) and (5) of regulation 77 or sub-regulation (3) of regulation 80; or

(b) on appeal under sub-regulation (1) of this regulation against any order of an Inspector passed under regulations 77, 78, 80 and 80A,

may be preferred to the Central Government, which shall refer the same to a Committee constituted in the manner laid down in sub-sections (1) and (2) of section 11 of the Act.

(3) The procedure laid down in sub-sections (3), (4) and (5) of section 11 of the Act shall apply to a reference made to Committee under sub-regulation (2).

(4) Every order against which an appeal is preferred under sub-regulation (2) shall be complied with pending the receipt at the mine of the decision of the Committee:

Provided that the Committee may, on the application of the appellant, suspend the operation of the order appealed against pending the disposal of the appeal.

83. Every person shall examine his own working place before commencing work, and also at intervals during the shift. If any dangerous condition is observed by him he shall either remedy it or immediately leave the place and report the fact to an official of the mine, who shall deal with the matter without delay.

84. (1) No person shall work in any place in which he has not been ordered to work either by an official of the mine or by a person authorised in this behalf by an official of the mine.

(2) No person shall cut coal from any pillar, roof or floor unless specially so authorised by the manager, or other person qualified under the provisions of regulation 71 to make an inspection required by regulation 70.

85. After an explosion of fire-damp or coal dust in a mine only such persons as are authorised by the manager or an official appointed by the manager for the purpose or, in the absence of the manager or such official, by the principal official of the mine present at the surface, shall be allowed to enter the mine.

86. Where rescue or recovery work is being undertaken in a mine or part of a mine likely to contain an irrespirable atmosphere, no party of less than three shall be allowed to enter.

CHAPTER VII-A—SPECIAL PRECAUTIONS AGAINST SPONTANEOUS COMBUSTION AND UNDERGROUND FIRES

87. In any mine in which an underground fire exists, whether such fire has been sealed off by means of stoppings of non-inflammable material or not or in which an explosion of fire damp or coal dust is likely to occur, there shall be kept at the mine constantly available for use two or more small birds or *other means approved by the Chief Inspector of detecting carbon monoxide gas* and two or more *approved locked flame safety lamps* for the purpose of testing for inflammable and other gases:

Provided that the Chief Inspector or an Inspector may require compliance with this regulation in the case of any other mine if he thinks that the circumstances of the mine are such as to require it.

87-A. (1) All surface structures and supports within a horizontal distance of 25 feet from the perimeter of shafts and the covering of all shafts sealed off or covered for ventilation purposes, and all fan drifts, fan casings and parts of fans within such drifts or casings, shall be of non-inflammable material:

Provided that this sub-regulation shall not apply to—

(a) structures and supports and the covering of shafts, if they are so protected by non-inflammable material as to eliminate the risk of fire;

(b) the small lid or covering of a shaft covering operated by the rope cappel; and

(c) temporary structures, supports and coverings at the top of shafts which are in the course of being sunk:

Provided further that until 30th of April 1940 this sub-regulation shall not apply to wooden headgears which were in use on the date on which this sub-regulation came into force.

(2) All air-crossings in main intake or main return airways and all ventilation or separation doors in any fan house or fan drift and in the vicinity of shaft bottoms or air-crossings in main intake or main return airways shall be constructed of non-inflammable material and shall be designed, as far as practicable, to prevent leakage.

(3) No timber or other inflammable material shall be used in the construction of or in connection with any underground engine-house or electrical sub-station, switch house or motor room.

87-B. No oil grease, canvas, or other highly inflammable material shall be stored underground in any mine except in a fire-proof receptacle or chamber.

87-C. (1) Adequate means of extinguishing fire shall be provided at any part of a mine where timber, grease or other inflammable material is stored and at all insets where timber is used for the construction of the staging and at every pithead, pit-bottom, engine-room and electrical apparatus room.

(2) In every mine in which there are water mains or other pipes containing water under pressure, an adequate number of taps shall be provided on such mains or pipes. Hose pipe not less than 200 feet in length with the necessary fittings shall be kept readily available in the mine and the distance between two adjacent taps shall not exceed the length of the hose pipe.

(3) *In mines or parts of mines where in the opinion of the Chief Inspector arrangements for extinguishing a fire cannot reasonably be provided under sub-regulation (2), one or more of the following means shall be adopted—*

(a) portable fire extinguishers shall be provided and kept readily available and in good condition at suitable places underground; or

(b) portable water tank fitted with hand pressure pumps and an adequate length of hose piping shall be provided; or

(c) adequate supplies of sand or incombustible dust shall be kept available at suitable places underground.

(4) A competent person appointed in writing by the manager for the purpose shall examine each portable fire extinguisher provided under sub-regulation (3) at intervals not exceeding three months, and the result of each such examination shall be recorded in a book kept at the mine for the purpose.

(5) Water shall not be used for putting out electrical or oil fires.

87-D. (1) No person shall light a fire or deposit ashes or heated material in any coal quarry, or on any exposed outcrop of coal, or on any ground damaged by the extraction of coal in which open fissures or cavities exist.

(2) No person shall light a fire or permit a fire to be lighted in any underground part of a mine:

Provided that nothing in this sub-regulation shall apply to the use in a mine to which regulation 123 does not apply, of blow lamps or electric repairing apparatus if permitted by a special written order granted by the manager of the mine. The order shall specify the person who shall be in charge of the blow lamp or apparatus and shall require such person to bring it back to the surface when no longer required.

(3) No person shall light a fire or permit a fire to be lighted within a distance of 40 feet from the perimeter of any shaft except in accordance with a written order granted by the manager of the mine and only for a special purpose specified in such order:

Provided that this sub-regulation shall not apply to boilers other than vertical boilers.

(4) All such orders shall be recorded in a paged book kept in the office of the mine.

(5) No person shall ignite a 'feeder' or an accumulation of gas.

87-E. No excavation shall be done in any part of a seam lying under any part of another seam which is on fire or is believed to be on fire or which is connected by a goaf or by broken strata to any fire except by a method which will maintain the strata between the seams *in situ* and intact.

87-F. (1) On the appearance in any part of a mine of smoke or other sign indicating that a fire has or may have broken out all workmen other than those whose presence in the mine is deemed necessary for dealing with the emergency shall be immediately withdrawn from the mine. No workmen, other than the men required for dealing with or damming off the fire, shall be re-admitted until either the fire has been extinguished or the part in which it exists has been effectively dammed off and an examination has been made by the manager and the competent person appointed under regulation 72 and the mine has been reported to be safe. Every such report shall be recorded without delay

in a paged book, which shall be kept at the mine for the purpose and shall be dated and signed by the manager and the competent person who made the inspection:

Provided that in a mechanically ventilated mine in which the use of safety lamps is not required other than for inspection purposes, this regulation shall apply only to the ventilating district or districts, that may be affected.

(2) The examination required by sub-regulation (1) shall be made with an approved locked flame safety lamp and a cage containing small birds or other means of detecting carbon monoxide gas approved by the Chief Inspector. No additional light shall be used other than an approved electric torch or lamp.

87-G. (1) Approved locked safety lamps or electric torches shall be exclusively used in the work of dealing with or damming off an underground fire:

Provided that where, in the opinion of the manager, it is necessary to take immediate steps to deal with an outbreak of fire, the provisions of this sub-regulation shall be deemed to have been complied with if the workmen engaged in dealing with the fire are provided with approved safety lamps or electric torches as quickly as is reasonably practicable.

(2) During the work of dealing with or damming off an underground fire a cage or cages containing small birds or other means of detecting carbon monoxide gas approved by the Chief Inspector shall be kept at all places in which persons may be in danger from noxious gases.

87-H. Approved locked safety lamps or electric torches shall be exclusively used in any ventilating district of a mine in which there is an underground fire whether such fire is sealed off by stoppings or not:

Provided that the Chief Inspector may in the case of any mine, grant exemption from this regulation under such conditions as he may impose, if, in his opinion, the use of approved safety lamps or electric torches in such mine is not necessary.

87-I. (1) In any ventilating district of a mine which is not naturally wet throughout and—

- (i) in which there is underground fire, whether sealed off or not; or
- (ii) in which the extraction of pillars is in hand or is about to commence;

the following precautions with respect to danger from dry coal dust shall be taken:—

- (a) All haulage and tramming roads shall be systematically kept clear of accumulations of dry coal dust.
 - (b) All such roads shall be systematically treated with water or incombustible dust in such a manner as to prevent an explosion from being initiated or propagated by coal dust. If incombustible dust is used for the purpose, it shall be of a kind which is not likely to be injurious to the health of workmen.
- (2) The precaution laid down in sub-regulation (1) shall also be observed at all places within 400 feet of an area—
- (i) which has been or is being sealed off on account of fire; or
 - (ii) in which pillars are being extracted.

(3) The Chief Inspector may, by order in writing, grant, subject to such conditions as he may impose, exemption from the provisions of sub-regulation (1) or sub-regulation (2) to any mine or part of a mine on the ground that, on account of the special character of the mine or part, the observance of the precaution laid down therein is not necessary.

87-J. In any working mine in which a fire is known or is believed to exist—

- (a) adequate precautions shall be taken to prevent the passage of air from the mine through any goaf or through broken strata connected with the fire; and
- (b) no work, other than work required by clause (a) of this regulation, shall be done in any part of the mine which not effectively sealed off from any such goaf or broken strata.

CHAPTER VIII—HAULAGE

88. (1) Every haulage road on which the haulage is worked by gravity or mechanical power shall be provided with sufficient manholes for refuge, which shall in no case be placed at intervals of more than 60 feet and which shall not be less than 5 feet in height, 3 feet in width, and 4 feet in depth. Where the inclination is more than 1 in 6 the manholes shall be at intervals of not more than thirty feet:

Provided that in any case in which an Inspector considers that there are difficulties which make the provision of a manhole at the above specified intervals or of the above specified dimension not reasonably practicable, he may, by order in writing, specify a greater interval or reduced dimensions.

(2) Every manhole shall be kept clean and whitewashed both inside and for a distance of not less than one foot around the aperture and the entrance of such manhole shall be kept unobstructed.

89. Every haulage road exceeding 100 feet in length on which the haulage is worked by gravity or mechanical power, shall be provided with proper means of communicating distinct and definite signals from all regular stopping places to the place or places at which the persons who control the haulage machinery are stationed:

Provided that the Chief Inspector may, at his discretion and by order in writing, require that there shall be means of communicating signals in the reverse direction also.

The first four or principal signals shall be—

Three raps	START when at rest.
One rap	STOP when in motion.
Two raps	LOWER SLOWLY or HAUL IN SLOWLY.
Four raps	RAISE SLOWLY or HAUL OUT SLOWLY.

Any other signals shall be in addition to and shall not interfere with the foregoing:

Provided that the Chief Inspector, by order in writing, may, at his discretion, permit the use of a different code of haulage signals.

90. A printed copy of the code of haulage signals shall be kept posted at the brake-wheel or haulage engine, and at both ends of the haulage road and at every signalling station.

91. The signal handle or attachment at every stopping place on any haulage or self-acting incline shall be placed in such a position as will enable the person operating the signals to be safe in the case of a runaway tub or tubs on the incline.

92. At the top of every incline on which the haulage, not being endless rope or endless-chain haulage, is worked by mechanical power or gravity there shall be stop-blocks or other similar contrivances to prevent tubs from running away. Additional stop-blocks or runaway switches, or some other appliance for arresting the descent of tubs in the event of a runaway, shall be fixed below the first stop-blocks at a greater distance than the length of a train of tubs. There shall also be provided and attached behind the ascending tub or train of tubs a back-stay, drag or other suitable contrivance for preventing the tub or tubs from running back.

93. Where a main haulage road extends to a distance of more than 3,000 feet from the shaft or the entrance to the mine, efficient means of telephonic communication shall be provided and maintained between a suitable station near the end of every such main haulage road, the pit-bottom and the surface, or between a suitable station near the end of every main haulage road and the entrance to the mine:

Provided that the Chief Inspector may by order in writing require the provision of means of telephonic communication where in any mine the main haulage extends to a distance of less than 3,000 feet from the shaft or the entrance to the mine, where travelling is unduly arduous:

Provided further that the Chief Inspector may, by order in writing, permit the use of other suitable means of communication in cases in which the conditions in the mine are not suitable for telephones.

94. Where haulage is effected by means of an endless rope or chain, automatic catches shall be fixed at such points on the haulage road as may be necessary to prevent tubs from running away.

95. (1) No person shall permit a tub or tubs to run uncontrolled except with the consent of the manager:

Provided that the Chief Inspector may, by order in writing, prohibit the uncontrolled movement of tubs at any place where, in his opinion, there would be danger of injury to persons.

(2) No person shall ride on any tub, truck or wagon, either underground or above ground, except with the written permission of the manager.

96. Where the Chief Inspector so requires, travelling roads, separate from the haulage roads, shall be provided to and from the working places.

96-A. In every underground part of a mine—

- (1) main haulage and travelling roads shall, as far as practicable, be kept free from accumulations of fine coal dust;
- (2) all coal tubs shall be so constructed and maintained as to prevent, as far as practicable, coal dust escaping through their sides, ends or floors.

CHAPTER IX—EXPLOSIVES

97. No owner, agent or manager shall store, or knowingly allow any other person to store, within the premises of the mine any explosives otherwise than in accordance with the provisions of rules made under the Indian Explosives Act, 1884.

98. No explosive shall be stored in the workings of a mine or taken into or kept in a dwelling house.

99. No explosive shall be used in a mine except that provided by the manager.

100. The manager shall appoint in writing a competent person or persons to be in charge of every magazine for the storage of explosives, and no person shall be in charge of a magazine without such written authority.

101. Explosives shall be issued only to competent persons appointed in writing by the manager, and no unauthorised person shall have explosives in his possession.

101-A. No liquid oxygen explosive shall be used in any underground part of a mine.

102. *No gunpowder or any other kind of explosive, except fuses and detonators, shall be issued for use in blasting operations in a mine or used in a mine except in the form of cartridges.*

103. Explosive unused and left over at the end of a shift shall be returned to the magazine immediately after the end of the shift. Such returned explosives shall be re-issued before fresh stock is used.

104. The person in charge of a magazine shall keep a correct record of the quantity of gunpowder and of the numbers of cartridges of other kinds of explosives and of detonators issued from the magazine to each authorised person, and a similar record of explosives returned to the magazine.

105. The preparation of cartridges from loose gunpowder, the drying of gunpowder, and the re-constitution of damp cartridges shall be carried out only by a competent person or persons appointed in writing by the manager for the purpose, and only in accordance with the conditions laid down in rules made under the Indian Explosives Act, 1884, and in a place approved by the licensing authority.

106. No explosive shall be taken into a mine except in *securely locked cases* or canisters, containing not more than five pounds each, and no person shall have in use or keep for use, at one time in any one place, more than one such case or canister. The place, in the mine at which any such case or canister is in use, or is kept for use, shall, unless solid ground directly intervenes, not be less than 30 feet from a place at which any other such case or canister is in use or kept for use:

Provided that the Chief Inspector may, in special cases by order in writing, permit, subject to such limitations as he may prescribe, the use at one time in one place of more than one such case or canister.

107. The amount of every charge of explosive shall not be disproportionate to the work to be done. The charge shall be placed in a properly drilled and placed shot hole and shall have sufficient stemming. A sufficient supply of suitable non-inflammable stemming material shall be provided at places convenient to the shot-firers.

108. (1) No shot shall be stemmed or fired except by or under the personal supervision of a competent person appointed by the manager by order in writing to be a shot-firer.

(2) In any mine in which more than 50 persons are employed underground at any one time, no person shall be so appointed or shall perform the duties of a shot-firer who is responsible for making inspections under sub-regulation (2) of regulation 70.

(3) With effect from the 1st day of April 1940, no person shall be appointed as a shot-firer under sub-regulation (1) unless he holds either a shot-firer's certificate or a sirdar's certificate or a manager's certificate granted under these regulations.

109. Every shot-firer shall, before a shot is fired by him or under his supervision, see that all persons in the vicinity have taken proper shelter at a safe distance; he shall also take suitable steps to prevent any person approaching the shot and shall himself take proper shelter.

110. When two working places have approached to within 10 feet of one another, no blasting shall be done in any one of such workings unless the workmen have been withdrawn from the other working, and the same has been fenced.

Explanation.—For the purposes of this regulation, any place to which workmen have lawful access shall be deemed to be a working place.

111. In the process of charging or stemming for blasting, no person shall use or have in his possession any iron or steel pricker, scraper, tamping rod, or stemmer, and only suitable non-inflammable substance shall be used for tamping or stemming.

112. (1) *When a hole has been charged, the explosive shall not be unrammed.*

(2) *No hole shall be bored at a distance of less than 12 inches from any hole where a charge has misfired nor shall a second charge be placed in any such hole.*

113. Detonators shall be kept in a securely locked box separate from any other explosive and no detonator shall be inserted into the priming cartridge until immediately before it is to be used.

Provided that in the case of a wet working, priming cartridges may be prepared at the nearest convenient dry place adjacent to the working.

114. No explosives shall be forcibly pressed into a hole of insufficient size.

115. (1) In any place in a mine in which the use of a locked safety lamp is for the time being required by or in pursuance of these regulations—

(a) no shot shall be stemmed or fired by any person who does not hold a sirdar's certificate endorsed for gas testing;

(b) no shot shall be fired until the shot-firer has examined both the place where the shot is to be fired and all accessible places within a radius of 60 feet for the presence of inflammable gas and has found such places free from gas.

(c) no shot of a Permitted Explosive shall be fired except by means of a shot-firing apparatus of a type approved by the Chief Inspector and subject to such conditions as he may from time to time lay down by notification in the *Gazette of India*:

Provided that the Chief Inspector may, in special cases, by order in writing, permit, subject to such conditions as he may specify, the use of any other shot-firing apparatus.

(2) (i) Every approved shot-firing apparatus in use in a mine shall, once at least in every three months, be cleaned and thoroughly overhauled by a competent person appointed in writing by the manager.

(ii) No person shall use or allow to be used any approved apparatus which has become unsafe or defective.

(3) No shot shall be fired at any place underground in a mine unless the place itself and all accessible places within a distance of 60 feet—

(a) are naturally wet, or

(b) have been drenched with water to such an extent that there will be no danger of dry coal-dust being raised into the air by the shot, or

(c) have been thoroughly treated with incombustible dust.

116. No explosive other than a Permitted Explosive shall be used—

(a) in any mine in which inflammable gas has within the previous twelve months been reported to be present or in which safety lamps are required, by or in pursuance of these regulations, to be used for any purpose other than inspections; and

(b) in any other mine in any main haulage road or main intake or main return airway or any place immediately contiguous to such road, intake, airway or place, unless such road, intake, airway or place is naturally wet throughout:

Provided that in the case of any mine or any part of a mine an exemption may be given by the Chief Inspector, subject to such conditions as he may impose, on the ground that, on account of the special character of the mine, the prohibition of the use of explosives other than Permitted Explosives is not necessary.

116-A. In any mine in which the use of Permitted Explosives is required by these regulations or by any bye-law or order made under the Act:—

(a) where more shots than one are charged for firing, the shots shall be fired simultaneously;

(b) the aggregate charge in any number of shots fired simultaneously in coal shall not exceed the permissible maximum charge laid down by the Chief Inspector for the kind of "Permitted Explosive" used;

(c) no shot shall be fired in coal in any gallery unless—

(1) the coal has been undercut, overcut or sidecut; and

(2) the length of the shot hole is at least six inches less than the length of the cut.

116-B. In any underground part of a mine two or more shots shall not be charged or fired in the same place simultaneously, if the explosive used is not a Permitted Explosive:

Provided that this regulation shall not apply to—

(a) working places in which the roof, floor and sides within a radius of 100 feet of the place where shots are to be fired are naturally wet; or

(b) a cross-measure drift in stone if such drift does not contain dry coal-dust; or

(c) shafts which are in the process of being sunk through or across the strata.

116-C. *Where shots are fired electrically, the shot-firer shall—*

(i) *for the purpose of firing, use a cable which is not less than 60 feet in length;*

(ii) *before coupling the cable to the firing apparatus couple up the cable himself to the fuse or detonator wires;*

(iii) *take care to prevent the cable coming into contact with any power or lighting cable; and*

(iv) *himself couple the cable to the firing apparatus, and before doing so, see that all persons in the vicinity have taken proper shelter at a safe distance.*

117. After a shot has been fired the shot-firer appointed under regulation 108 or other competent person appointed in writing by the manager of the mine shall, before any other person enters the place, make a careful examination and with his assistants make the place safe. No other person shall enter the place until the examination has been made and the place has been declared to be safe in all respects.

118. When a shot has misfired, the entrance to the firing place shall be fenced, and no person shall go beyond the fence until the expiration of one hour from the time of misfiring; but when an electrical apparatus has been used for firing, this interval may be reduced to such time, not being less than ten minutes after the cable has been disconnected from the firing battery, as the manager of the mine may in each case direct.

119. When a shot has misfired, the official or other competent person in charge of the explosive at the time of the misfire shall report the failure to the manager or under-manager, who shall record the fact in a book to be kept for the purpose; and such official or other competent person shall give information of the failure to such person as may relieve or take over charge from him.

120. When a misfired charge of explosive has been blasted out, a careful search for cartridges and detonators, if any, shall be made amongst the debris, and, if not located underground, the tubs into which the debris is loaded shall be marked and a further search made on the surface.

CHAPTER X—VENTILATION AND LIGHTING

121. (1) An adequate amount of ventilation shall be constantly produced in every mine to clear away smoke and to dilute and render harmless inflammable and noxious gases to such an extent that the working places of the shafts, levels and workings of the mine, and the travelling roads to and from these working places, shall be in a safe state for persons working or passing therein.

(2) *Where the Chief Inspector is of the opinion that it is necessary for the adequate ventilation of a mine or for the prevention of danger from inflammable or noxious gases, he may require that a mechanical ventilator shall be installed.*

121-A. (1) The Chief Inspector may require the manager of any mine in which, or in any part of which, a mechanical ventilator is in use, to submit within one month Standing Orders specifying the action that shall be taken with respect to the withdrawal of workmen from such mine or parts of such mine in the event of stoppage of the mechanical ventilator.

(2) The Chief Inspector may approve of such Standing Orders either in the form submitted to him or with such additions or alterations as he may think fit and shall give notice in writing to the manager that the Standing Orders in the form approved by him shall be enforced at the mine.

(3) On receipt of the notice from the Chief Inspector, the manager shall post the Standing Orders in conspicuous places at the mine both above and below ground and shall be responsible for securing effective compliance with them.

122. (1) *In every mine in which inflammable gas has been found within the previous twelve months or where workings have been walled off on account of fire, the quantity of air shall at least once in every month be measured—*

- (i) *in the main intake airways of every seam as near as practicable to the down-cast shafts;*
- (ii) *in every split, as near as practicable to the point at which the split commences; and*
- (iii) *in each ventilating district, as near as practicable to a point where the air is sub-divided at the end of a main split or where it enters the first working place.*

(2) *The measurements referred to in sub-regulation (1) shall be entered in a book kept at the mine for the purpose.*

123. (1) No artificial light other than an approved locked safety lamp shall be allowed or used—

- (a) in any seam in a mine in which an explosion or ignition of inflammable gas has occurred during the previous twelve months:

Provided that the Chief Inspector may, subject to such conditions as he may impose, exempt any mine from the operation of this clause, on the ground that on account of the special character of the mine the use of safety lamps is not necessary;

- (b) in any place in a mine in which there is or is likely to be any such quantity of inflammable gas as to render the use of naked lights dangerous;
- (c) in any working near a place in which there is likely to be an accumulation of inflammable gas; or
- (d) in any ventilating district of a mine in which inflammable gas has been found during the previous twelve months.

(2) If any difference of opinion arises between an Inspector and a manager on the question whether the conditions specified in clauses (b) and (c) of sub-regulation (1) exist in any mine, the question shall be referred to the Chief Inspector whose decision thereon shall be final.

(3) In the case of any mine to which clause (d) of sub-regulation (1) applies the Chief Inspector may, if safety lamps are not immediately available, grant a temporary exemption from the operation of that clause, subject to such conditions as he may specify, until such time as safety lamps can be obtained.

(4) In any mine or part of a mine in which safety lamps have been in use in compliance with the provisions of sub-regulation (1), no artificial light other than an approved locked safety lamp shall subsequently be allowed or used, except with the written consent of the Chief Inspector.

Explanation.—Where the ventilation in a mine is not mechanically controlled, the ventilating district shall be deemed to include the whole mine. Where the ventilation in part only of a mine is not mechanically controlled, the whole of the part in which ventilation is not mechanically controlled shall be deemed to be a single ventilating district.

124. Notwithstanding anything contained in regulation 123, fixed electric lights from power mains may be used in any part of a mine which is not within 600 feet of any working face, provided such installation complies with the rules made under the Indian Electricity Act, 1910, relating to the use of electric energy in parts of mines in which inflammable gas is likely to occur in quantity sufficient to be indicative of danger.

125. In any mine in which inflammable gas has been found during the previous twelve months, no advance gallery shall be driven more than ten feet ahead of the widened gallery and in every such gallery the ventilating current shall be conducted as near to the working face as is practicable.

126. All safety lamps in ordinary use shall be numbered and such record shall be kept of the persons to whom the lamps are issued that the user of any particular lamp can at any time be identified from the record.

127. In every mine or part of a mine in which the use of safety lamps is for the time being required by or in pursuance of these regulations, the following provisions shall have effect, namely:—

- (a) A competent person shall be appointed in writing by the manager to clean, trim, examine, and lock securely all such lamps before they are taken into the workings for use, and such lamps shall not be issued for use until they have been so examined and found to be in safe working order and securely locked.
- (b) A competent person appointed in writing by the manager for the purpose shall examine every safety lamp at the surface immediately before it is taken

underground for use and shall assure himself as far as practicable from external observation that each lamp is in safe working order and securely locked. The person so appointed shall not be the banksman except in a mine where the number of persons employed underground is not more than fifty at any one time.

- (c) No safety lamp shall be unlocked except at the appointed lamp station.
- (d) A competent person appointed in writing by the manager for the purpose shall examine every safety lamp on its being returned, after use underground. If on such examination any lamp is found to be damaged or misused, he shall record the nature of the damage or misuse in a book to be kept at the mine for the purpose. Every new entry in the book shall be shown to the manager without delay.
- (e) The manager or a competent official appointed in writing by the manager for the purpose, other than the persons referred to in clauses (a) and (b) of this regulation, shall examine thoroughly all safety lamps in use at a mine at least once in every week, and shall record the result of his examination in a book kept at the mine for the purpose. If any lamp is found to be defective, it shall not be re-issued for use until the defect has been remedied.
- (f) No person, unless he has been authorised in writing by the manager either for the purpose of examining or relighting safety lamps, shall have in his possession any contrivance for opening the lock of a safety lamp.
- (g) No person shall have in his possession any unlocked safety lamp or naked light, and if it appears to any person that any safety lamp in his possession is defective or insecure he shall at once carefully extinguish the flame and report the fact to the sirdar, overman or manager.
- (h) No glass of an approved flame safety lamp shall be replaced except by a flame lamp glass manufactured by such firm and of such type and satisfying such conditions as the Chief Inspector may from time to time specify by notification in the *Gazette of India*.
- (i) No bulb of an approved electric safety lamp shall be replaced except by an electric lamp bulb manufactured by such firm and of such type and satisfying such conditions as the Chief Inspector may from time to time specify by notification in the *Gazette of India*.

Explanation.—For the purposes of this regulation the term “manager” includes an under-manager and any person for the time being carrying on the duties of the manager.

128. Where the use of safety lamps is for the time being required by or in pursuance of these regulations, one or more lamp stations for lighting or relighting the lamps shall be fixed by the manager at the entrance to the mine or part of the mine, as the case may require. No such lamp station shall be in a return airway. Every such lamp station shall be in charge of a person authorised in writing by the manager.

129. No person other than a person authorised by the manager to examine and lock safety lamps shall either himself take or give out for use any safety lamp.

130. No person shall wilfully damage, or improperly use, or by improper means extinguish, any safety lamp, and no one except a person duly authorised by the manager in that behalf shall unlock or open or attempt to unlock or open any safety lamp.

131. Any person discovering the presence of inflammable gas in his working place shall immediately withdraw therefrom and inform the sirdar, overman or manager.

132. In any underground part of a mine where adequate stationary lights are not in use, every person shall carry a light.

133. No person shall leave a light in any underground part of a mine unless and until he has placed it in charge of some person remaining therein.

134. Every person after passing through a door or brattice cloth shall at once close it.

135. (1) In every mine or part of a mine in which the use of safety lamps is for the time being required by or in pursuance of these regulations no person shall have in his possession any match, smoking apparatus or any apparatus of any kind for striking a light except such apparatus for the purpose of shot-firing or relighting lamps as the Chief Inspector may by general or special order in writing authorise in this behalf.

(2) A competent person appointed in writing by the manager for the purpose shall search all persons employed below ground immediately before they enter such mine or

part of a mine for the purpose of ascertaining whether they have in their possession any article of the nature described in sub-regulation (1).

(3) The person conducting the search shall—

(a) search or turn out all pockets;

(b) pass his hand over all clothing; and

(c) examine any article in the possession of the person searched.

(4) If the person conducting the search suspects that the person searched is concealing any article of the nature described in sub-regulation (1) he shall detain him and as soon as possible refer the matter to the manager or other official authorised by the manager for the purpose who shall not allow such person to enter the mine until he is satisfied that the person has no such article in his possession.

136. After such date as the Chief Inspector may fix for any mine in view of the special circumstances thereof, there shall, in every mine in which a mechanical contrivance for ventilation is used, be provided and maintained in a condition to be put into immediate operation, adequate means for reversing the air current.

CHAPTER XI—FENCINGS AND GATES

137. (1) Every entrance to a mine from the surface, and the top and all entrances between the top and the bottom, including the sump (if any), of every working, ventilating, or pumping shaft, and the top of every open excavation, shall be kept properly fenced:

Provided that any fence may be temporarily removed for the purpose of repairs or other operations if proper precautions are used.

(2) Shafts and quarries temporarily or permanently out of use and any place in or about an excavation which is dangerous shall be kept properly fenced.

138. (1) Every entrance to a mine from the surface, by which the mine can be entered on foot, if it is regularly used as a travelling or haulage road, shall be provided with a gate, which shall be kept closed and locked when there are no persons underground in the mine and shall be so constructed as to prevent effectually, when closed, the entrance of persons into the mine.

(2) Every entrance to a mine from the surface, by which the mine can be entered on foot, if it is not regularly used as a travelling or haulage road, shall be permanently closed or kept properly fenced, across the whole width of the entrance.

(3) Gates and fences at entrances to mines shall be so constructed as not to prevent egress in case of emergency.

139. Every entrance to any place in a mine which is not in actual use or course of working or extension, shall be kept properly fenced across the whole width of the entrance, and every such fence shall be so constructed as effectually to prevent persons from entering such place inadvertently.

140. (1) Where any place in a mine is found to be dangerous, all approaches to the place shall be kept securely fenced off so that it cannot be entered inadvertently.

(2) Where it is necessary to prevent danger to the public, every tank or reservoir shall be securely fenced.

141. Every fly-wheel and all exposed and dangerous parts of the machinery of whatever kind used in or about a mine shall be kept securely fenced, guarded or cased in such a manner as may be necessary to prevent accident.

CHAPTER XII—MISCELLANEOUS

142. If any person in charge of any machinery, apparatus or appliance used in or about a mine, observes any defect or dangerous flaw therein, he shall immediately report the fact to the manager, under-manager or enginewright, or other responsible official.

143. Every person shall strictly comply with all lawful orders issued by the manager or such other official as may be empowered by the manager to issue the same.

144. No person who has been appointed by the manager in writing for a specific duty shall depute another person to do his work without the sanction of the official to whom he is subordinate; and no such person shall absent himself without having previously obtained permission from such official for the term of his absence or without having been relieved by another person appointed as aforesaid.

145. No person who has been appointed in writing by the manager for a specific duty shall sleep whilst on duty.

146. No person shall negligently or wilfully do anything likely to endanger life or limb in the mine, or negligently or wilfully omit to do anything necessary for the safety of the mine or the persons employed therein.

147. No person shall damage, destroy or improperly interfere with anything provided for or used in the working of the mine.

148. No person shall remove or pass through any fence, or remove or pass any danger-signal, unless specially so authorised by the manager or an officer empowered by the manager in that behalf.

149. A competent person or persons appointed by the manager for the purpose shall keep a correct record of the number of persons going underground daily and returning from underground daily and, if required by the manager, every person shall immediately before going underground and after returning from underground record his presence in accordance with any system approved for the mine by the Chief Inspector or an Inspector.

Provided that this regulation shall not apply in the case of any person appointed to carry out duties of superintendence, management or control.

150. When wagons are about to be moved, persons likely to be endangered shall be warned by the persons in charge of the work.

151. The movement of railway wagons by gravity or manual power shall only be carried on under the direct supervision of a responsible male person who shall either himself control the brake or depute a competent person to do so. Where more wagons than one are being moved at the same time the wagons shall be coupled together. Persons employed in moving wagons shall do so only by pushing from behind the last wagon.

152. If any person required by these regulations or by any rule or bye-law to make any report is unable to write, he shall be present when his report is written for him, and shall have it read over to him, and shall attach his thumb mark to it. The person writing the report shall also sign his name at the end together with a statement that it has been read over to the person for whom it was written.

153. The fees payable under regulations 42 (1), 43 (2), 44 and 71 (2), shall be paid directly into the Treasury or a branch of the Imperial Bank of India, and the receipt of the Treasury or Bank shall be sent to the Chief Inspector along with the application to which the fee relates. An application unaccompanied by such receipt shall be rejected. The fees payable under regulation 50 (3) shall be paid direct into the Treasury or a branch of the Imperial Bank of India, but such payment need not be made until the application to which the fee relates has been accepted.

N.B.—Draft of the Indian Coal Mines Regulations have been prepared by the Government of India in September 1955 and have been forwarded to the different interests concerned for their comments. The draft will be revised afterwards and will be published in the Gazette of India. The draft contains 199 Regulations.

FORM I—[See Regulation 3 (1)]*All entries to be made in English*

Return of Raisings, Despatches and Stock of Coal and Machines in use for the month of 19

(1) Raisings, Despatches and Stocks

1. Name of Colliery.....
2. Name of Owner.....
3. Name of Colliery loading point.....

Actuals for Month.

	Stock at beginning of month	Raisings		Colliery Consumption Boilers Domestic etc.	Coal used in Coke making in colliery	Coke Produced	Despatches			Stock at the end of month
		Open Workings	Under Ground				Rail	Road	Tramway	
1	2	3	4	5	6	7	8	9	10	11
Coal—Steam										
Rubble										
Slack										
Total Coal										
Hard Coke										
Soft Coke										

(2) Machines

Coal-cutting Machines				Mechanical Loaders			Conveyors		
No.	Type	Square feet cut	Coal cut Tons	No.	Type	Coal loaded Tons	Type	Length feet	Coal conveyed Tons

Signature.....

Designation.....

Date.....

NOTES

1. This form shall be made in duplicate and before the 10th of each month in respect of the month immediately preceding submit one to Chief Inspector of Mines in India, DHANBAD, and the other to Coal Commissioner, 1, Council House Street, CALCUTTA.

2. Figures relating to despatches of coal should be in respect of each loading point from which coal of different grades was despatched during the month immediately preceding.

3. All figures will be shown to the nearest ton.

4. Columns 3 and 4 should include all coal brought to the surface or removed from a quarry, no matter to what purpose the coal may be put and they should be separately shown clearly in those sub-heads.

5. In column 5 should be included all coal consumed at or about the colliery in connection with colliery operation including domestic use.

6. In column 6 should be entered all coal used by the colliery owner for the purpose of making coke, no matter what the method of burning may be.

FORM I A—[See Regulation 3 (1)]

COAL MINES.

All entries to be made in English

Monthly Return of Employment and attendance for.....19 .

1. Name of the Mines.....Name of owner.....
2. Address: Place..... District.....
Province.....
3. Number of working days during the month.....

	Underground		Open Working			Surface	
	Miners and Loaders	Others	Men		Women	Men	Women
			Miners and Loaders	Others			
(a) Number of workers on books on the 1st working day of the month.							
(b) Aggregate number of man-days worked in the month.							
(c) Aggregate number of man-days lost in the month by absence.							

Remarks.

Certified that the information given above is correct.

Signature.....

Designation.....

Date.....

INSTRUCTIONS

(a) Worker means a person "employed" in the mine as defined in clause (d) of Section 3 of the Indian Mines Act, 1923.

(b) Total number of man-days worked is obtained by adding the number of workers working on each relay on each day.

(c) Total number of man-days lost by absence is obtained by adding the number of workers absent on each relay in each working day.

(d) Absence does not include absence due to a strike or maternity leave.

(e) If there be any marked increase or decrease in employment or attendance, please account for it in the Remarks column.

FORM I B—[See Regulation 3 (i)].

COAL MINES

Women

5. Total loss incurred during the week for concessions in foodstuffs and clothing Rs.....(e).

	Underground	Open Working
	Miners and Loaders	Miners and Loaders

6. Normal Hours of work
1st relay
2nd relay
3rd relay

7. Remarks. (f)

Certified that the information given above is correct.

Signature.....

Designation.....

Date.....

INSTRUCTIONS

(a) Average daily attendance is obtained by dividing the aggregate number of attendances in all the relays on all days during the period by the number of working days. Absence in hours only need not be considered. Days on which, the undertaking was closed for whatever cause, should not be treated as working days.

(b) Aggregate number of man-hours worked during the week is obtained by adding up the number of man-hours worked in all relays on all days.

(c) Include all cash payments, deductions and taxes payable and deducted, if any.

(d) This should include Bonuses and other cash payments if any earned and paid more or less regularly during the week. Annual and as other Bonuses, not related to the week should be excluded even if they are paid during the week.

(e) Please furnish separately the quantity of and price at which the various items are supplied.

(f) If there is any marked increase or decrease in earnings or hours of work as compared to the previous quarters please account for it in the Remarks column.

SCHEDULE I.

FORM II—[See Regulation 3 (2).]

Annual return for the year ending on the 31st December, 19

1. Name of mine.
2. Postal address of mine.
3. Date of opening.
4. Date of closing (if closed).
5. Situation of mine. { District.
{ Province.
6. { Name of owner.
{ Postal address of owner.
7. { Name of Managing Agents (if any).
{ Postal address of Managing Agents (if any).
8. { Name of Agent (if any), as defined in Section 3(a) of the Indian Mines Act.
{ Postal address of Agent.
9. { Name of Manager.
{ Postal address of Manager.
10. Means by which coal is raised from the mines, i.e., hand labour, mechanical or electrical power.

FORM II-A—[See Regulation 3 (4).]

Week selected by the Chief Inspector—February.....to.....19

Day to which this return relates—February.....19

PART I.

Total number of persons attending work on the day shown above.

Classification.

No. of persons.

A.—Underground (i.e., places lying beneath the superjacent ground).

Males.

B.—Open working [i.e., in workings of the mine (including quarries) which are not situated beneath the superjacent ground].

I. Males.

II. Females.

C.—Surface (i.e., not in the workings of the mine, including all subordinate officials and persons employed on sidings, loading wharves, private railways and surface tramways and also in carting).

I. Males.

II. Females.

PART II.

Total number of persons who ordinarily work in the mine but were prevented by sickness or other cause from attending work on the day shown above.

Classification.

No. of persons.

A.—Underground (i.e., in the places lying beneath the superjacent ground).

Males.

B.—Open workings [i.e., in workings of the mine (including quarries) which are not situated beneath the superjacent ground].

I. Males.

II. Females.

C.—Surface (i.e., not in the workings of the mine, including all subordinate officials and persons employed on sidings, loading wharves, private railways and surface tramways and also in carting).

I. Males.

II. Females.

I certify that the total number of persons attending work was not higher on any other day of the week selected by the Chief Inspector.

Owner, Agent or Manager.

Dated the.....19

NOTE.—Where males are employed in both underground and open workings, the figures relating to them should be included under Section A.

Name of Mine.

Name of Owner.

Postal address of Owner.

Signature of Owner, Agent or Manager.

Date.

FORM III—[See Regulation 3 (2).]
*Persons employed during the year ending on 31st December 19 , and wages paid
 for work done in December 19 :*

Classification	Aggregate number of daily attendances during the year of persons permanently and temporarily employed	Number of days worked during the year	Daily average number of persons employed as calculated by dividing the aggregate number of attendances by the number of days worked during the year	Average hours worked per week during the year	Aggregate number of daily attendances in December	Total amount paid in wages for work done in December	Average daily earnings in December as calculated by dividing the amount in column 7 by the number of attendances in column 6
1	2	3	4	5	6	7	8
A.—Underground (i.e., in places lying beneath the superjacent ground).							
Males—							
Overman and/or sirdars							
Coal Cutters							
Loaders							
Skilled labour not included above							
Unskilled labour not included above							
Total (Males)							
B.—Open workings [i.e., in workings of the mine (including quarries) which are not situated beneath the superjacent ground].							

FORM III—continued.

Classification	Aggregate number of daily attendances during the year of persons permanently and temporarily employed	Number of days worked during the year	Daily average number of persons employed as calculated by dividing the aggregate number of attendances by the number of days worked during the year	Average hours worked per week during the year	Aggregate number of daily attendances in December	Total amount paid in wages for work done in December	Average daily earnings in December as calculated by dividing the amount in column 7 by the number of attendances in column 6
I. Males—	2	3	4	5	6	7	8
Overmen and/or sirdars

C.—Surface (i.e., not in the working of the mine, including all subordinate officials and persons employed on sidings, loading wharves, private railways and surface tramways and also in carting).							
I.—Males—							
Clerical and supervising staff (excluding the superior supervising staff).							
Skilled labour							
Unskilled labour							
Total (Males)							
II. Females							

NOTE (1).—Where males are employed in both underground and open workings, the figures relating to them should be included under section A.

NOTE (2).—Where workmen are paid through contractors, the sums entered in column 7 should be the sums paid by the contractors to the workmen, so far as these can be ascertained.

FORM IV—[See Regulation 3 (2).]

Accidents and Prosecutions

Number of separate accidents* reported during the year.			Number of persons		Number of prosecutions instituted by the management, with the sections and rules under which the prosecutions were instituted.	Number of persons convicted with the sections and rules under which the convictions were obtained.
Fatal	Serious	Total	Killed	Seriously injured		
1	2	3	4	5	6	7

* Accidents, which were reported as serious accidents but resulted fatally, should be entered as fatal accidents.

FORM V—[See Regulation 3 (2).]

Epidemic Diseases.

Name of disease †	Date of appearance	Date of disappearance	Number of cases	Number of deaths
Cholera
Plague
Small-Pox
Influenza

† Figures for any other specified disease which has been epidemic at the mine should be entered in this form.

FORM VI—[See Regulation 3 (2).]

Type and aggregate horse-power of electrical apparatus.

1.—System of supply (whether continuous current or alternating current)—

Voltage or supply
Periodicity
Source of supply

2.—Voltage at which current is used for—

Lighting
Power

3.—Aggregate horse-power of motors installed on surface for—

Winding
Ventilation
Haulage
Coal washing or screening
Miscellaneous

Total horse-power ...

4.—Aggregate horse-power of motors installed underground for—

Haulage
Pumping
Portable machinery
Miscellaneous

Total horse-power ...

5.—Total horse-power (addition of 3 and 4)

FORM VII—[See Regulation 3 (2).]

Explosives, safety lamps, mechanical ventilators and coal-cutting

Explosives.	Name of explosives	Quantity used in lb.	Number of detonators used	Name of safety lamps.	Safety lamps			Mechanical ventilators	Coal cutting machines.		Tonnage of coal cut
					No. of safety lamps and method of locking.		Name and number of each type separately.	Power used, i.e., electricity or compressed air			
						Screw					
						Lead rivet	Name of mechanical ventilator	Average total quantity of air produced per minute	Water gauge obtained

NOTICE OF OCCURRENCE

From

Dated.....19.....

To

1. The Chief Inspector of Mines, Dhanbad, P.O., District Manbhum.
2. The District Magistrate/*District Collector
The Sub-Divisional Magistrate/*Revenue Divisional Officer
3. The Coal Mines Labour Welfare Commissioner, Dhanbad, P.O., District Manbhum.

Sir,

I have to furnish the following particulars of a fatal accident/a serious accident/a dangerous occurrence which occurred at the.....mine.

1.	Situation of mine (Village, thana, District & State)	Mineral worked	Name and postal address of owner	
2.	Date and hour of occurrence	Place and location in mine		Number of persons Killed Seriously injured
3.	Classification of occurrence †		Cause and description	
4.	(a) Names of persons killed	Nature of employment	Age	Sex
Nature of injury and if fatal, cause of death				
(b) Names of persons injured				

Yours faithfully,
Owner/Agent/Manager

† Under one or other of the following heads, namely:—

- (1) Explosions and ignitions of inflammable gas and/or coal dust;
- (2) Falls of ground, (a) Falls of roof; (b) Falls of side, walls or face;
- (3) Haulage, (a) above ground; (b) below ground;
- (4) In shafts, (a) overwinding of cages or other means of conveyance;
(b) breakage of ropes, chains or drawgear;
(c) while ascending or descending by machinery;
(d) by falling;
(e) by falling objects (excluding falls of ground);
(f) miscellaneous;

³ This Form was substituted by the Ministry of Labour Notification No. S.R.O. 1859 dated the 23rd August, 1955.

*In the State of Madras only.

- (5) Explosives;
- (6) Machinery, (a) above ground; (b) below ground;
- (7) Suffocation by gases;
- (8) Irruption of water;
- (9) Premature collapse of workings;
- (10) Outbreak of fire, or spontaneous heating;
- (11) At railway sidings belonging to the mine;
- (12) Electricity; and
- (13) Miscellaneous, (a) above ground; (b) below ground.]

FORM OF APPLICATION FOR REGISTRATION

1. Name, nationality and address of the applicant.
2. Age.
3. Full details of qualifications and previous mining experience.
4. Name of the mine or mines in the Indian Dominion in which the training is desired.
5. The capacity or capacities in which it is proposed to obtain the training.
6. Whether the owner, agent or manager of the mine has agreed to the training.
7. Date on which it is proposed to commence training.
8. Any other relevant information which the applicant may like to mention.

Date

Signature of applicant

COAL MINES (TEMPORARY) REGULATIONS, 1955¹

Whereas the Central Government is satisfied that for the prevention of apprehended danger and the speedy remedy of conditions likely to cause danger it is necessary, in making regulations under clause (i) and clauses (k) to (s) excluding clause (1) of section 57 of the Mines Act, 1952 (XXXV of 1952), to dispense with the delay that would result from previous publication and previous reference to Mining Boards under sub-sections (1), (2) and (3) of section 59 of the said Act;

Now, therefore, in exercise of the powers conferred by section 60, read with the aforesaid provisions of section 57 of the said Act, the Central Government hereby makes the following Regulations, namely:—

1. (1) These Regulations may be called the Coal Mines (Temporary) Regulations, 1955.
- (2) They extend to the whole of India except the State of Jammu and Kashmir.
- (3) They apply only in respect of coal mines.

2. In these Regulations, unless the context otherwise requires—

- (a) "additional precautions", in relation to any matter, means the precautions required to be observed under these regulations in addition to those, if any, required to be observed under the principal regulations in relation to that matter;
- (b) "principal regulations" means the Indian Coal Mines Regulations, 1926.

3. In opencast workings, the following additional precautions shall be observed, namely:—

(1) In alluvial soil, morum, gravel, clay, debris or other similar ground—

- (a) the sides shall be kept sloped at an angle of safety not exceeding 45 degrees from the horizontal;
- (b) the sides shall be kept stepped and the height of every step shall not exceed 5 feet and the breadth shall be not less than the height; and
- (c) where any pillar is left *in situ* for the purpose of measurement, its height shall not exceed 8 feet, and if the height of any such pillar exceeds 4 feet, its base shall be not less than 5 feet in diameter.

(2) In coal, the sides shall either be kept sloped at an angle of safety not exceeding 45 degrees from the horizontal, or the sides shall be kept stepped and the height of any step shall not exceed 10 feet and the breadth shall be not less than the height;

Provided that the Chief Inspector may, by an order in writing and subject to such conditions as he may specify, exempt from the operation of clause (1) or clause (2) any working where in his opinion, special difficulties exist and they make compliance with these precautions not reasonably practicable.

(3) No person shall undercut any face or side so as to cause any overhanging, or cause or permit such undercutting.

(4) No person shall work or travel over any side or face having an inclination exceeding 45 degrees from the horizontal, or on any ledge or footpath less than 5 feet wide from which he is likely to fall more than 10 feet, unless he is protected by guard rails or ropes suitably fixed and sufficiently strong to prevent him from falling.

4. For the purpose of ensuring safety while raising or lowering persons or materials in shafts in a mine by means of machinery, the following additional precautions shall be observed, namely:—

(1) (a) Every winding rope in a shaft exceeding 100 feet in length when measured along the plane of the shaft shall be made of cold-drawn steel wires, and the diameters of the sheaves or drums of the winding apparatus and of the other pulleys and sheaves used in connection with winding shall, unless otherwise permitted by an order in writing of the Chief Inspector, be not less than 100 times the diameter of the rope. The grooves of such sheaves or pulleys shall be suited to the diameter of such rope.

(b) No rope other than a rope of a non-spinning type shall be used in any shaft, including a shaft in the course of sinking, where persons are lowered or raised and where guides are not provided.

(c) No rope in use for winding shall subtend, in any position, an angle more than one and a half degrees on either direction with the plane of a sheave or pulley used in connection with the rope.

¹ These Regulations were published under the Ministry of Labour Notification No. S.R.O. 3422 dated the 25th October, 1955 in the *Gazette of India*, Part II—Section 3 dated the 5th November, 1955, p. 2169.

(d) Every sheave or pulley used in connection with winding shall rotate, while in motion, in a true vertical plane.

(2) (a) For every rope in use or intended for use for winding purposes, a record showing its quality, construction, size, breaking load, the names of the manufacturer and supplier, and the diameters of the drums, sheaves and pulleys used in connection with the rope, shall be maintained in a bound book kept for the purpose, pages of which shall be serially numbered. All entries therein shall be made and signed by a competent person authorised in writing by the manager for the purpose and shall be countersigned and dated by manager.

(b) A new rope for which a test certificate as to the amount of its breaking load is not available, shall not be used unless a portion thereof, not less than 10 feet in length has been cut off and tested in a laboratory, institution or test house recognised by the Central Government for the purpose: Provided that notwithstanding anything contained in this sub-clause, the Chief Inspector may, by an order in writing, prohibit the use of any rope or type of rope for winding purposes.

(c) No rope, the breaking load of which at any one point therein is less than 10 times the maximum static load on it when the cage or other means of conveyance attached to the end of the rope is at the lowest working point, shall be used or continued to be used, unless an exemption in writing has been obtained from the Chief Inspector. The cappel shall not be attached to the winding rope by rivets passing through the rope.

(3) No rope which has been spliced shall be used in a shaft for winding purposes.

(4) No winding rope in which any of the wires is found cracked or broken shall be used in a shaft in which persons are raised or lowered.

(5) No winding rope which has been in use for more than three and a half years shall be used in a shaft in which persons are raised or lowered except with the written permission of an Inspector:

Provided that where an Inspector is of opinion that any winding rope has become unsafe for use in a shaft for lowering or raising persons before the expiry of such period, he may, by an order in writing, require the installation of a new rope in the place of such rope in the shaft:

Provided further that where an Inspector is satisfied that, due to sparing use, any such rope is in good condition even after the expiry of the said period, he may, by an order in writing and subject to such conditions as he may specify, allow the use of such rope for a longer period. An appeal against the order of the Inspector under the first provision may be preferred to the Chief Inspector whose decision thereon shall be final.

(6) (a) Once at least in every six months, all detaching hooks in general use shall be annealed or given other proper heat-treatment, and shall be thoroughly examined by a competent person appointed in writing by the manager for the purpose: Provided that the Chief Inspector may, by an order in writing and subject to such conditions as he may specify, exempt from the foregoing requirements such detaching hooks as are made of a steel which does not require heat-treatment.

(b) Notwithstanding anything contained in regulation 66 of the principal regulations—

(i) all detaching hooks in general use shall be dismantled, cleaned and refitted once at least in every three months; and

(ii) all detaching plates and bells in general use shall be tested monthly by callipers or gauges.

(c) The result of each such annealing, heat-treatment, examination, or test shall forthwith be recorded by the competent person in the book maintained in pursuance of regulation 66 of the principal regulations.

5. For the purpose of ensuring against danger due to irruption or inrush of water or other liquid matter into the workings of a mine or part thereof, the following additional precautions shall be observed, namely:—

(1) Every application for permission under regulation 72B of the principal regulations shall be accompanied by two copies of plans, and sections showing the existing positions of the workings of the mine, the proposed layout of workings, the depth of the workings from the surface, all faults, dykes and other geological disturbances and such other particulars as may affect the safety of the mine or of the persons employed therein.

(2) Notwithstanding anything contained in regulation 74 of the principal regulations, no working which has approached within a distance of 150 feet of any disused or abandoned workings (not being workings which have been examined and found to be free from accumulation of water or other liquid matter), whether in the same mine or in an adjoining mine, shall be extended further except with the prior permission in writing of the Chief Inspector and subject to such conditions as he may specify.

(3) Notwithstanding anything contained in regulation 74 of the principal regulations, if any seepage of water is noticed in any working approaching but not within a distance of 150 feet of any disused or abandoned workings (not being workings which have been examined and found to be free from accumulation of water or other liquid matter), whether in the same mine or in an adjoining mine, such working shall immediately be stopped and the Chief Inspector and the Inspector of the Circle shall forthwith be informed about the occurrence. Such working shall not be extended further except with the prior permission in writing of the Chief Inspector and subject to such conditions as he may specify.

Explanation.—For the purpose of clauses (2) and (3), the distance between the said workings shall mean the minimum distance measured in any direction whether horizontal, vertical or inclined.

(4) Every application for permission under clause (2) shall be accompanied by two copies of plans and sections showing the outline of such disused or abandoned workings in relation to the workings which are approaching the said workings and such other information as may be available in respect of the said workings.

(5) The precautions laid down in regulation 74 of the principal regulations, shall be carried out under the direct supervision of a competent person authorised in writing by the manager for the purpose.

(6) Where in any mine it is proposed to construct a reservoir, dam or any other structure to withstand the pressure of water or other material which will flow when wet, or to control the inrush of water, the owner, agent or manager of the mine shall submit to the Inspector a notice in writing (accompanied by plans and sections showing the proposed design and other details of construction) at least 10 days before the work of construction is commenced: Provided that where the safety of the mine or of the persons employed therein is seriously threatened, it would be sufficient if in lieu of such notice, due information and plans and sections are sent to the Inspector as soon as the work is commenced.

(7) At every mine to which sub-regulations (1), (2), (3) and (4) of regulation 15 of the principal regulations apply:—

(a) there shall be a permanent bench mark established on the surface; and all levels taken above and below ground shall be referred to a plane in relation to the bench mark. The position of the bench mark together with its height above Mean Sea Level shall be shown on the plan of the workings of the mine;

(b) there shall also be shown on such plan the reduced levels, in relation to the bench mark, at a sufficient number of points situated in the workings of the mine, together with a sufficient number of surface contour lines drawn at vertical intervals not exceeding 10 feet, so as to enable the approximate depth of the workings of the mine at any point within the leasehold to be determined; and

(c) Where a river or stream flows within the boundaries of or in the vicinity of a mine, there shall also be shown on such plan the highest known flood level in relation to that river or stream; and the plan shall carry a certificate by the manager to the effect that the level so shown is correct.

Explanation.—For the purposes of sub-clause (c), a 'river' means any stream of water with its banks extending upto the highest known flood level.

6. For the purpose of ensuring the stability of surface and safeguarding against premature collapse, the following additional precautions shall be observed, namely:—

(1) No working either during the development or depillaring shall be made in a mine within 150 feet of any public road, building or other works not belonging to the owner of the mine, except with the permission in writing of the Chief Inspector and in accordance with such restrictions as he may impose.

(2) For the purpose of regulation 80(3) of the principal regulations, two or more seams lying within 30 feet of each other shall be considered as one and the same seam.

(3) In any mine or part thereof, no extraction or reduction of pillars shall be commenced except with the permission in writing of the Chief Inspector, and no such extraction or reduction shall be carried out except in accordance with such conditions as he may specify.

(4) Every application for permission under clause (1) shall be accompanied by two copies of plans and sections specifying the positions of the workings of the mine in relation to the public road, buildings or other works not belonging to the owner of the mine, the manner in which it is proposed to carry out the intended new operations and the limits to which it is proposed to carry the said operations.

Explanation.—For the purposes of clauses (1) and (4), "Public Road" means a road maintained for public use by Government or any local authority.

7. For the purpose of ensuring against an outbreak of fire or a spread of fire in a mine, the following additional precautions shall be observed, namely—

(1) Before the commencement of extraction or reduction of pillars in any mine or part thereof there shall be provided such number of fire dams or stoppings as may be necessary to ensure the speedy isolation and control of fire in the event of spontaneous heating or outbreak of fire taking place in the mine or part thereof: Provided that the Chief Inspector may, by an order in writing and to such extent and subject to such conditions as he may specify, relax the provisions of clause (1) in any case where other adequate measures have been taken to achieve the object in view.

(2) Every fire dam or stopping referred to in (1) shall be constructed of suitable incombustible materials; and in the case of a mine where safety lamps are required to be used in pursuance of regulation 123(1) of the principal regulations, it shall also be of such sufficient strength as to be capable of withstanding the force of an explosion.

(3) If any dispute arises as to whether the fire dams or stoppings provided in a mine or part thereof are adequate in number or of sufficient strength or suitably constructed, it shall be referred to the Chief Inspector whose decision thereon shall be final.

(4) In every mine, all wild growths of vegetation, whether green or dry, shall be constantly kept clear of all broken ground and opencast workings connected with any underground workings or goaves (not being goaves which have been kept fully packed with incombustible material) in order to prevent any accidental fire in the wild growths travelling underground: Provided that the Chief Inspector may, by an order in writing and to such extent and subject to such conditions as he may specify, relax the provisions of this clause in any case where in his opinion special circumstances exist and they make compliance with the said precautions not necessary.

8. For the purpose of ensuring safety in the use of explosives in a mine, the following additional precautions shall be observed, namely:—

(1) Before a shot is fired at any place in an opencast working, the shot-firer shall give sufficient warning, by an efficient system of signals or by other means approved by the manager of the mine, over the entire area of the danger-zone, that is to say, an area of ground falling within a radius of 800 feet from the place of firing.

(2) The shot-firer shall also see that all persons within the danger-zone have taken proper shelter; and he shall himself take adequate shelter.

(3) Where in any mine, an Inspector is of opinion that, owing to the special nature of the workings of the mine or part thereof, the use of explosives other than 'permitted explosives' as defined in clause (e) of regulation 2 of the principal regulation is likely to endanger the safety of persons employed in the mine, he may, by an order in writing, direct the use of 'permitted explosives' in the mine or part.

(4) The manager of every mine where explosives are used, shall fix from time to time the maximum number of shots which each shot-firer may fire in any one shift; and such number shall be based upon—

- (a) the time normally required to prepare and fire a shot in accordance with the provisions laid down in the principal regulations;
- (b) the time required for that shot-firer to move between places where shots are fired;
- (c) the assistance, if any, available to him in the performance of his said duties; and
- (d) any other duties assigned to him, whether statutory or otherwise:

Provided that where an Inspector is of opinion that it is necessary for the safety of the persons employed in or about the mine that the number of shots so fired shall be reduced, he may, by an order in writing, require the manager to fix a lower maximum number of shots which may be fired in any one shift. In the event of any dispute regarding the lower maximum so fixed, it shall be referred to the Chief Inspector whose decision thereon shall be final.

(5) (a) No person whose wages depend on the amount of minerals obtained by firing shots shall be appointed to perform the duties of a shot-firer in any mine.

(b) Notwithstanding anything contained in regulation 108(1) of the principal regulations, no shot shall be stemmed or fired in any mine except by a person qualified to fire shots in pursuance of regulation 108(3) of the principal regulations.

(6) Every shot-firer shall, immediately after the end of his shift record in a bound book kept for the purpose the pages of which shall be serially numbered, the quantity of explosives taken, used and returned, the places where shots were fired and the number of

shots fired by him including misfires, if any; and he shall sign every such report and date his signature.

9. For the purpose of securing adequate ventilation in the workings of a mine or part thereof, the following additional precautions shall be observed, namely:—

(1) For the purpose of regulation 121 of the principal regulations, a place shall not be deemed to be in a safe state for persons working or passing therein, if the air contains either less than 19 per cent of oxygen or more than 0.5 per cent of carbon dioxide or any noxious gas present in quantity likely to affect the health of any person; and such place shall not be deemed to be normally kept free from inflammable gas if the percentage of inflammable gas at any point in that place exceeds one and a quarter.

(2) The ventilation required to be constantly produced in any mine in pursuance of regulation 121 of the principal regulations shall also be adequate to prevent such excessive rise of temperature of humidity as may be harmful to the health of persons employed in the mine. If any dispute arises whether the ventilation in a mine or part thereof is adequate or not, it shall be referred to the Chief Inspector whose decision thereon shall be final.

(3) If any alteration is made in the arrangements for the ventilation of any mine in which the quantity of air is required to be measured in pursuance of regulation 122 of the principal regulations, which substantially affects or is likely to affect the ventilation of the mine, the quantity of air passing through each ventilating district shall be measured as soon as practicable after the making of such alteration. Every such alteration shall be reported to the Inspector within seven days.

(4) Particulars of air measurements taken under clause (3) shall be recorded forthwith in the book required to be maintained in pursuance of regulation 122 of the principal regulations.

(5) In any mine where a mechanical ventilator is in use—

(a) every gallery which is a connection between a main intake airway and a main return airway shall, unless it is kept effectively walled off, be provided with two doors so spaced that whenever one door is opened, the other door serving the same purpose can be kept shut;

(b) every ventilation door shall be self-closing and whenever opened, it shall be closed as soon as possible; it shall not be proposed or fixed so as to remain open, and if the door is required to be frequently kept open for the passage of men or materials there shall be a door attendant throughout the shift. Every such door, if not in use, shall be taken off its hinges and placed in a position in which it will not cause any obstruction to the air current; and

(c) every ventilation door, sheet or brattice shall be maintained in efficient working order and good repair.

(6) In a mine in which the use of safety lamps is for the time being required by or in pursuance of regulation 123 of the principal regulation and where a mechanical ventilator is installed on the surface, no mechanical ventilator shall be installed below ground unless and until the manager of the mine is satisfied as a result of a survey of the ventilation of every part of the mine liable to be affected, that such installation is necessary or expedient for the proper ventilation of the mine and that it should be installed.

Explanation.—The shifting of a mechanical ventilating district to another shall be deemed to be an installation of a fan for the purpose of this clause.

(7) Notice of every such installation together with particulars of the survey aforesaid, shall be sent forthwith to the Inspector.

(8) The installation and maintenance of every mechanical ventilator installed below ground shall be supervised and controlled by a competent person appointed by the manager for the purpose; and no such ventilator shall be started, stopped, removed or in any way altered, repaired or interfered with except by or on the authority of the official in charge of the mine. Particulars of every stoppage of a mechanical ventilator below ground shall be recorded with the least possible delay in a bound book kept for the purpose the pages of which shall be serially numbered.

(9) An Inspector may, at any time, by an order in writing and for reasons which he may specify therein prohibit the use of any fan installed below ground. An appeal against any such order may be preferred to the Chief Inspector whose decision thereon shall be final.

(10) Whenever there is any interruption of ventilation by the stoppage of any mechanical ventilator installed below ground, the official in charge of the mine or part thereof shall immediately take precautionary measures (including withdrawal of men, if necessary) against dangers that may arise out of non-compliance with the provisions of regulation 121

of the principal regulations read with clause (1) of this regulation, until the ventilation in the mine or part thereof is restored.

10. For ensuring proper lighting in mines, the following additional precautions shall be observed, namely:—

(1) Whenever electricity is available in a mine, efficient and suitable general lighting shall be maintained at all times—

- (a) at the top and bottom of every self-acting incline;
- (b) at every place at which tubs are regularly attached and detached from a haulage rope;
- (c) at every room or place made to house any engine, motor or other apparatus;
- (d) at every place where any pillar is under extraction; and
- (e) in every travelling road:

Provided that nothing in this sub-regulation shall be deemed to authorise any contravention of the provisions of regulation 124 of the principal regulations and any of the provisions of the rules of the Indian Electricity Rules, 1937.

(2) In every mine where 20 or more persons are employed below ground at any one time, the roof and sides of the places specified in sub-clauses (a), (b), (c) and (e) of clause (1) shall be kept completely and effectively whitewashed.

(3) Every official in charge of a mine or part thereof, and every competent person appointed under regulation 25(1) of the principal regulations, shall, during the time when he is so employed below ground, have in addition to any flame safety lamp which he is required to use in pursuance of the principal regulations, a portable lamp or light of adequate lighting performance so as to enable him to perform his duties in a proper and thorough manner. Every such lamp or light shall be provided by the owner of the mine. If any dispute arises as to whether any such lamp or light is of adequate lighting performance or not, it shall be referred to the Chief Inspector whose decision thereon shall be final.

11. For ensuring safety against dangers from dry coal dust in the workings of a mine or part thereof below ground the following additional precautions shall be observed, namely:—

(1) In every part of a mine which is not naturally wet throughout, the floor, roof and sides of the workings shall, as far as practicable, be kept clear of any accumulation of coal dust.

(2) All airways, haulage, tramming, conveyor and travelling roads, which are not naturally wet throughout, shall be treated in one of the following ways, namely:—

- (a) they shall be treated with fine incombustible dust in such manner and at such intervals as will ensure that the dust on the floor, roof and sides throughout shall always consist of a mixture containing not less than 70 per cent of incombustible matter; or
- (b) they shall be treated with water in such manner and at such intervals as will ensure that the dust on the floor, roof and sides throughout is always combined with 30 per cent by weight of water in intimate mixture; or
- (c) they shall be treated in such manner as the Inspector may approve.

(3) The Inspector may, by an order in writing, also require the observance of the precautions laid down in clause (2) in all accessible parts of the mine if in his opinion they are necessary for ensuring the safety of the persons employed in the mine. An appeal against any such order may be preferred to the Chief Inspector whose decision thereon shall be final.

(4) The incombustible dust used for the purpose of this regulation shall be—

- (a) free from any material containing injurious free silica; and
- (b) of such fineness and character that it is readily dispersable into the air, and that when in use in places which are not directly wetted by water from the strata, it does not cake but is dispersed into the air when blown upon with the mouth or by a suitable appliance.

No such incombustible dust shall continue to be used if it is found by tests, which shall be carried out regularly, not to comply with the foregoing requirements.

(5) For the purpose of ensuring adequate treatment of coal dust in places specified in clause (2) samples of the dust shall be systematically collected in a manner approved by the Chief Inspector from all such airways and roads, and tested and analysed once at least in every calendar month. The result of every such test and analysis shall be recorded in a bound book kept for the purpose the pages of which shall be serially numbered.

12. The following provisions shall have effect with respect to every travelling road in a mine or part thereof which is provided in pursuance of regulation 96 of the principal regulations, namely:—

(1) Except with the permission in writing of the Chief Inspector, no travelling road shall be less than 6 feet high and 4 feet wide.

(2) The travelling road shall be clearly indicated, either on the roof or on any side, by a continuous band of whitewash at least 12 inches wide.

(3) Except for the purpose of making an inspection or effecting repairs, no person shall travel to or from his working place except by means of the travelling road so provided.

13. (1) A competent person appointed in writing by the manager for the purpose shall, once at least in every week, examine thoroughly the state of all machinery, gear and other appliances of the mine, which are actually in use, whether above ground, below ground or in open-cast workings.

(2) The result of every such examination shall be recorded without delay in a bound book kept at the mine for the purpose, the pages of which shall be serially numbered and shall be signed and dated by the person who made the examination.

14. If any dispute arises whether any fencing or gate provided in a mine or part thereof in pursuance of any of the principal regulations is adequate or not, it shall be referred to the Chief Inspector whose decision thereon shall be final.

INDIAN METALLIFEROUS MINES REGULATIONS, 1926

Arrangement of Paragraphs

PREAMBLE AND DEFINITIONS.

CHAPTER I.—Returns, Notices and Records.

CHAPTER II.—Plans.

CHAPTER III.—Management.

CHAPTER IV.—Shafts and Outlets.

CHAPTER V.—Raising and Lowering Persons or Materials.

CHAPTER VI.—Mine Workings.

CHAPTER VII.—Ladderways.

CHAPTER VIII.—Explosives.

CHAPTER IX.—Miscellaneous.

SCHEDULE.—Forms.

INDIAN METALLIFEROUS MINES REGULATIONS, 1926¹

In exercise of the powers conferred by section 29 of the Indian Mines Act, 1923 (IV of 1923), and in supersession of the rules published with the notifications by the Government of India in the Department of Commerce and Industry, No. 11793-103, dated the 30th December 1908, and No. 6436-152, dated the 2nd September 1911—and of all notifications amending those rules, the Central Government is pleased to make the following regulations, the same having been previously published as required by sub-section (1) of section 31 of the said Act, namely:—

Regulations for All Mines except Coal Mines

1. (1) These Regulations may be called the Indian Metalliferous Mines Regulations, 1926.
(2) They extend to the whole of India, except the State of Jammu and Kashmir but do not apply to the gold mines in the State of Mysore.

(3) They shall apply to every mine of whatever description other than a coal or oil mine

2. In these regulations, unless there is anything repugnant in the subject or context—

(a) “the Act” means the Indian Mines Act, 1923;

¹ These Regulations were published under the Government of India, Department of Industries and Labour Notification No. M-1055(2) dated the 8th September, 1926. New Draft containing 190 Regulations is being published for obtaining comments.

- (b) "the District Magistrate" in relation to any mine, means the District Magistrate of the district in which the mine is situated:

Provided that in the case of a mine which is situated partly in one district and partly in another, the District Magistrate for the purposes of these regulations shall be the District Magistrate authorised in this behalf by the Central Government.

- (c) "Form" means a Form as set out in the Schedule:

- (d) "Schedule" means the Schedule to these regulations.

CHAPTER I—RETURNS, NOTICES AND RECORDS

3. (i) On or before the 21st day of January in each year the owner, agent or manager of every mine shall forward to the District Magistrate and to the Chief Inspector annual returns in respect of the preceding year in the following Forms:—

Mica Mines	... In Forms I, II, III, IV, VI and VII.
Mines other than Mica Mines	... In Forms I, II, III, IV, V, VI and VIII.

(2) If any mine is abandoned or the working of any mine has been discontinued over a period exceeding three months or if a change occurs in the ownership of any mine the returns required by sub-regulation (1) shall be submitted, within one month from the date of abandonment or change of ownership or within four months from the date of discontinuance:

Provided that the Chief Inspector may by order in writing extend the period for the submission of such returns up to any date not later than the twenty-first day of January in the year following that to which they relate:

Provided further that nothing in this sub-regulation shall be deemed to authorise the submission of any return later than the twenty-first day of January in the year following that to which it relates.

4. The notice required by section 14 of the Act shall be furnished in duplicate, and shall specify the name and situation of the mine, the names and addresses of the owner and the manager, and in the case of a new mine, the date on which it was opened. The District Magistrate shall on receipt of the notice forward one copy thereof to the Chief Inspector.

5. When a mine has been abandoned, or the working thereof has been discontinued over a period exceeding two months, the owner of the mine shall, within one month after the abandonment or within seven days after the expiry of the said period, as the case may be, send to the Chief Inspector notice in writing specifying the name and situation of the mine, the name and address of the owner, and the date and cause of the abandonment or discontinuance.

6. When a mine is re-opened after abandonment or discontinuance, the owner, agent or manager shall, within one month after the date of the re-opening, send to the District Magistrate notice in writing in duplicate, specifying the name and situation of the mine, the names and addresses of the owner and the manager, and the date of the re-opening. The District Magistrate shall on receipt of the notice forward one copy thereof to the Chief Inspector.

7. When a change occurs in the name of, or in the ownership of, a mine, notice in writing of the change and of the date thereof shall be sent by the owner, agent or manager to the Chief Inspector within one month from the date of the change.

8. When any new appointment is made of an agent or manager of a mine, or any change of address of any agent or manager occurs, notice of the appointment or change and of the date thereof shall be sent by the owner, agent or manager to the Chief Inspector within one month from the date of the appointment or change.

9. When the ownership of a mine is transferred, the previous owner or his agent or manager shall make over to the new owner all plans, books and other records required to be kept under the Act, and all correspondence relevant to the working of the mine with the Department of Mines and other Government departments.

10. If the owner, agent or manager of any mine intends to conduct or extend any mining operations under his control at or to any point within fifty yards of any railway subject to the provisions of the Indian Railway Act, 1890, or of any public work in respect of which this regulation is applicable by reason of any general or special order of the Central Government under clause (u) of section 29 of the Act, he shall, not less than sixty days before commencing such operations give notice of his intention to the Chief Inspector and also, in the case of a railway, to the Railway Administration concerned or, in the case of any such public work as aforesaid, to such authority as the Central Government may by general or special order direct.

11. If the operations in respect of which notice is given under regulation 10 are not commenced within twelve months from the expiry of the period of sixty days therein referred to, the notice shall be held to have lapsed and the provisions of that regulation shall apply as if no such notice had been given.

12. The notice to be given under regulation 10 shall specify the position of the workings of the mine in relation to the railway or public work in question, the manner in which it is proposed to carry out the intended new operations, and the limits to which it is proposed to carry the said operations, and shall include a plan showing the existing and the intended mining operations in so far as they affect the railway or public work in question.

²[13(1) When there occurs in or about a mine an accident causing loss of life or serious bodily injury, or an accidental explosion, ignition, spontaneous heating, outbreak of fire or irruption of water or an accidental breakage of ropes, chains or other gear by which men are lowered or raised or an accidental overwinding of cages, while men are being lowered or raised, or a premature collapse of any part of the workings, the owner, agent or manager of the mine shall forthwith inform the nearest Inspector about the occurrence by telephone, express telegram or special messenger and shall also, within 24 hours of any such occurrence, send notice thereof in Form IX to the District Magistrate/*Collector or the Sub-Divisional Magistrate/*Revenue Divisional Officer, as the case may be, and to the Chief Inspector and shall simultaneously post one copy of the notice on a special notice board at a conspicuous place in the office at the mine and shall ensure that the notice is kept on the board in a legible condition for not less than two months from the date of such posting.

(2) When an accident causing loss of life or serious bodily injury occurs in or about a mine in connection with the generation, transmission, supply or use of electrical energy, the owner, agent or manager of the mine shall also forthwith inform the nearest Electric Inspector by telephone, express telegram or special messenger.

13A. When any accident causing loss of life occurs in a mine, the place of accident shall not be disturbed or altered before the arrival or without the consent of an Inspector unless such disturbance or alteration is unavoidable to prevent further accidents, to remove bodies, or to rescue persons from danger, or unless discontinuance of work at the place would seriously impede the working of the mine:

Provided that if from any cause an Inspector fails to make an inspections within three full days of the date of submission of the notice, work may be resumed at the place of accident.

14. If death results from any injury already reported as serious under regulation 13, the owner, agent or manager shall forthwith inform the Inspector about the death by telephone, express telegram or special messenger and shall also, within twenty-four hours of such death, give notice thereof to the District Magistrate/*Collector or the Sub-Divisional Magistrate/*Revenue Divisional Officer, as the case may be and to the Chief Inspector.

14A. Where any person employed in a mine contracts any disease notified by the Central Government in the Official Gazette under section 25 of the Act, the owner, agent or manager of the mine shall, within 14 days of his being informed of the disease, send notice thereof in Form X to the District Magistrate.]

CHAPTER II—PLANS

15. (1) The following provisions in respect of plans shall apply to all mines for gold, manganese, copper, lead, tin, and wolfram and to such other mines or parts of mines or classes thereof as the Central Government may, by notification in the *Gazette of India*, specify.

(2) Nothing in this regulation shall be deemed to apply to any mine in which the workings do not extend under the super-jacent ground, or to any mine in which excavation is being made for prospecting purposes only:

Provided that the Chief Inspector may direct that this regulation shall apply to any such mine to such extent as he may think fit.

16. The owner, agent or manager of every mine shall keep in the office at the mine an accurate plan and section or sections, properly inked in on durable paper, of the workings of the mine on a scale of not less than 100 feet to 1 inch, showing the workings up to a date not more than six months previously. The name of the mine and of its owner and the scale shall be shown on the plan and sections, and the magnetic meridian with date shall be shown on the plan. The plans and sections shall also show all shafts,

² Regulations 13 and 14 omitted and Regulations 13, 13A, 14 and 14A inserted by the Ministry of Labour Notification No. S.R.O. 1857 dated the 23rd August, 1955.

* In the State of Madras only.

drives, crosscuts, winzes, rises, excavations (stoped ground), and any tunnels and passages connected therewith. They shall also show the boundaries of the underground leasehold, where possible, and all important surface features within the boundaries such as railways, roads, rivers, streams and reservoirs which overlie any part of the workings or any point within 600 feet of any part of the mine workings; also the general strike of the veins or mineral deposits, with their dips at different points, and the dislocations of the strata.

17. The owner, agent or manager of every mine shall, at any time on the request of the Chief Inspector or of any Inspector, produce to him at the office at the mine such plans and sections, and also, on the like request, mark on such plans and sections the then state of the workings of the mine; and the Chief Inspector or Inspector shall be entitled to examine the plans and the sections, and for official purposes to make or have a copy made of any part thereof respectively.

18. Where any mine or any considerable part of a mine is abandoned, or the working thereof has been discontinued over a period exceeding one year, the person who was the owner of the mine at the time of the abandonment or discontinuance shall, within three months after the abandonment or within fifteen months after the discontinuance of workings, as the case may be, send to the Chief Inspector accurate plans and sections of the workings of the mine up to time of the abandonment or discontinuance, or a true and accurate copy of the same:

Provided that if a change of ownership occurs after the abandonment or discontinuance and before the expiry of the three months or the fifteen months aforesaid, as the case may be, such plans and sections shall be sent forthwith.

19. After the expiry of ten years from the date of abandonment or discontinuance of working in any mine or in any considerable part of a mine, or, where the consent of the owner of the mine for the time being has been obtained, prior to the expiry of the said period, the Chief Inspector may, on such conditions as he thinks fit to impose, permit any person having interest in the said mine or part of a mine to inspect the plan or section of such mine or part of a mine sent to him in accordance with the provisions of regulation 18 and he may further, on such conditions as he thinks fit to impose, supply to any such person copies of the like plan or section.

CHAPTER III—MANAGEMENT

20. For every mine a book, to be called the Inspection Book, shall be kept in which Inspectors may record their observations. The owner, agent or manager shall write or cause to be written at the commencement of the book:—

- (a) the name of the mine,
- (b) the name and address of the owner of the mine and of the agent if any,
- (c) the name and address of the manager of the mine.

21. (1) The owner or agent of a mine shall appoint a competent person of not less than 21 years of age to be manager of the mine. If any question arises whether any person so appointed is competent to perform the duties of manager, the decision of the Chief Inspector shall be final.

(2) One person may be appointed manager of more mines than one, provided that the size of such mines and the distance between them is not so great as to preclude the proper and thorough performance by such manager of his duties in respect of each such mine. The decision of the Chief Inspector shall be final on any question arising out of this regulation.

(3) Where by reason of absence or for any other reason the manager is unable to perform the duties required of him by the Act, regulations, rules and bye-laws, the owner, agent or manager shall authorise in writing a person, whom he considers competent, to act as manager of the mine:

Provided that—

- (a) no such authority shall have effect for a period in excess of one month;
- (b) the owner, agent or manager, as the case may be, shall send to the Chief Inspector with the least possible delay, a written notice intimating that such an authorisation has been made, and stating the reason for the authorisation, the qualifications and experience of the person authorised and the dates of the commencement and ending of the authorisation; and
- (c) the Chief Inspector may by order in writing revoke any authority so granted, and such order shall be final.

(4) No person shall be appointed to carry out the inspection required by regulation 43 unless he has attained the age of 21 years and has had sufficient practical experience of the working of mines. If any question arises whether the person so appointed is competent to carry out the duties required of him, the decision of the Chief Inspector shall be final.

CHAPTER IV—SHAFTS AND OUTLETS

22. Where any part of a mine is so situated that there is any danger whatever of an irruption of surface water into the mine adequate protection against such an irruption shall be provided and maintained.

23. (1) At every mine where more than 20 persons are employed under ground, or where in the opinion of the Chief Inspector it is necessary, there shall be at least two shafts or outlets, not nearer to one another than 20 feet, affording separate means of ingress and egress available to all the persons employed in the mine.

(2) Proper arrangements shall be made for persons to descend to, and ascend from, the mine at each of such shafts, or outlets. If apparatus is necessary, it shall be kept on the works belonging to the mine and shall be constantly available for use.

(3) The foregoing provisions of this regulation with respect to shafts and outlets shall not apply—

(i) while a shaft is being sunk or an outlet is being made;

(ii) to any working for the purpose of making a communication between two or more shafts or outlets.

(4) The Chief Inspector may exempt from the operation of this regulation, subject to such conditions as he may think fit to impose, any mine in the case of which special difficulties exist which in his opinion make compliance with the provisions of this regulation not reasonably practicable.

CHAPTER V—RAISING AND LOWERING PERSONS OR MATERIALS

24. At every shaft or incline where persons or materials are lowered or raised by means of machinery the following provisions shall have effect, namely:—

(a) A single linked chain shall not be used for lowering or raising persons in any working shaft or plane, except for the short coupling chain attached to a cage, skip, wagon or bucket.

(b) Ropes used in raising and lowering persons and all cappings or sockets and shackles shall be of the best materials and kept in good condition. The working load shall at no time be more than one-sixth of the breaking load of the rope. A similar spare rope shall always be kept in reserve at mines where there is only one hoisting shaft.

(c) There shall be attached to every machine worked by mechanical power, and used for raising and lowering persons, one or more brakes of sufficient power by themselves to hold the cage, skip, wagon or bucket, when loaded, at any point in the shaft, and a proper indicator (in addition to any mark on the rope) showing to the person who works the machine the position of the cage, skip, wagon or bucket in the shaft; and if the drum is not on the crank shaft, there shall be an adequate brake on the drum shaft:

Provided that in the case of a shaft or winze not exceeding 100 feet in depth or a shaft or winze in course of sinking so much of this clause as requires an indicator shall not apply.

(d) Every apparatus on or in which persons ride in a working shaft shall be provided with a sufficient cover overhead, except—

(i) in that portion of a shaft which is being extended by sinking, or

(ii) where persons are employed at work in a shaft.

(e) Every working shaft used for the purpose of drawing mineral or for lowering or raising persons shall, if exceeding 150 feet in depth, be provided with proper means of communicating distinct and definite signals from the bottom of the shaft, and from every entrance for the time being in use between the surface and the bottom of the shaft, to the surface, and from the surface to the bottom of the shaft and to every entrance for the time being in use between the surface and the bottom of the shaft. There shall also be proper means of transmitting distinct and definite signals from the top of every winding shaft to the winding engine. All signals shall be transmitted by mechanical or electrical means.

(f) The first three or principal signals shall be—

One rap or bell	...	RAISE when engine at rest.
One rap or bell	...	STOP when engine in motion.
Two raps or bells	...	LOWER.
Three raps or bells	...	MEN ready to ascend or descend.
Three raps or bells	...	IN REPLY. Men may enter the cage or other conveyance:

Provided that an alternative code may be used where the written permission of the Chief Inspector has been obtained.

- (ii) Any other signals shall be in addition to, and shall not interfere with, the foregoing.
 - (iii) A printed copy of the code of shaft signals shall be posted at the shaft top and at every inset, and also at the winding engine.
 - (g) Every working shaft used for lowering or raising persons by machinery, other than machinery operated by hand labour, shall, if it exceeds 150 feet in depth, be provided with guides to within not less than 100 feet from the bottom of the shaft.
 - (h) Adequate stationary lights shall be provided and used during working hours:—
 - (1) at all places where persons have to work under ground in the immediate vicinity of shafts.
 - (2) after dark at the tops of all working shafts and at all winding engines used for raising and lowering persons.
 - (i) There shall be on the drum of every machine used for lowering or raising persons such flanges, horns or other appliances as may be sufficient to prevent the rope from slipping. The rope shall be securely fastened to the drum, and there shall be at least two turns of the rope on the drum when the cage, skip, bucket or box is at the bottom of the shaft.
 - (j) Every cage shall be provided with catches or some other suitable contrivance to prevent tubs from falling out, and shall, if used for lowering or raising persons, be covered incompletely at the top and closed in at the two sides in a manner sufficient to prevent persons or things from projecting beyond the sides, and shall be provided with suitable gates or other rigid fences and with a rigid hand bar fixed in a position where it can be easily reached by all persons in the cage.
 - (k) The manager, or a competent person or persons appointed by the manager for the purpose shall, once at least in every 24 hours, examine the state of the external parts of the machinery and of the head-gear, ropes, chains, cages, guides, and conductors in the shafts and other similar appliances of the mine which are in actual use, both under ground and above ground, and, if more than 20 persons are employed in the mine simultaneously, shall without delay write or cause to be written a full and accurate report of the result of such examination. Every such report shall be recorded in a paged book to be kept at the mine for the purpose, and shall be signed and dated by the person who made the examination.
25. No person shall get on or off a cage, skip, tub or bucket used for lowering or raising persons after the same has been set in motion, or leave it until it has reached the appointed stopping place; nor shall any person ride on the top or edge of any cage, skip, bucket or box except when engaged upon work in the shaft.
26. No person, when ascending or descending a shaft, shall take with him any tools or other bulky materials, save when engaged in repairing the shaft or when otherwise specially authorised by the manager:
- Provided that, in the case of tools only, the manager may, by general order, permit the same to be carried.
27. No person shall ride in a shaft on, or against, a loaded cage, skip, bucket or box.
28. Every person, when at or about the top or the bottom of a shaft, shall obey the orders and directions of the shaft attendants on duty at the time.
29. Every windlass, whim or whip in use at a shaft or winze shall be provided with a stopper, lynch peg, or other reliable holder.
30. The bucket, skip or any wagon in the cage shall not be filled up to such a height that any of the contents can fall out, and the bottom of the cage shall be kept clean.
31. When tools, wood, etc., with ends projecting over the top of the cage, skip or bucket are being lowered or hoisted, the projecting ends shall be securely fastened to the rope or bow.
32. Not more than such number of persons as may be authorised by the manager shall be allowed to ride in the same cage, tub, skip or bucket at one time, and a notice specifying the authorised number shall be posted at the top of every shaft and at every inset in a shaft.

33. When the winding apparatus is not provided with some automatic contrivance to prevent overwinding, a point shall be fixed and marked on the indicator in such a way as to show when the cage or other conveyance is within a distance of twice the circumference of the drum from the completion of the wind; and when such cage or conveyance has reached such distance it shall not, if either it or the descending cage contains persons, be raised for the remaining distance at a speed exceeding three miles per hour.

34. In shafts exceeding 300 feet in depth, where persons are raised or lowered by machinery, suitable devices shall be fitted if, in the opinion of the Chief Inspector, such are required to provide against the overwinding of cages, skips or other conveyances or to safeguard persons liable to be injured in the case of an overwind.

35. At the top of every incline on which the haulage, not being endless rope or endless chain haulage, is worked by mechanical power or gravity there shall be stop-blocks or other similar contrivances to prevent wagons from running away. Additional stop-blocks or runaway switches, or some other appliance for arresting or diverting the descent of wagons in the event of a runaway, shall be fixed below the first stop-blocks at a greater distance than the length of a train of wagons. There shall also be provided and attached behind the ascending wagon or train of wagons a backstay, drag or other suitable contrivance for preventing the wagon or wagons from running back.

36. Where wagons are moved by hand no person shall permit a wagon to run uncontrolled, and, if sprags are necessary, a sufficient number shall be provided by the manager.

37. No person shall ride upon any tub, truck or wagon either under ground or above ground without the permission of the manager.

CHAPTER VI—MINE WORKINGS

38. The sides of open workings shall be sloped, stepped or secured in such a manner as to prevent danger from falls of material.

39. When an open working is worked in steps, steps shall be of sufficient breadth in comparison with their height to secure safety.

40. In open workings, trees liable to fall, the overburden, and all loose ground and material, shall be removed sufficiently far from the edge, or otherwise made secure, in order to prevent danger to persons employed in the mine.

41. The roofs and sides of all travelling roads and working places shall be made and kept secure.

41A. Every footpath along which loads are carried in open workings by human agency shall comply with the following requirements—

(a) its breadth shall not be less than three feet;

(b) its slope shall not be greater than 1 vertical to 2 horizontal;

(c) at every place where its slope exceeds 1 vertical to 4 horizontal reasonably level steps shall be provided such that the vertical height of every step does not exceed seven inches and the dimension of every step measured horizontally from the edge to the back is not less than fourteen inches.

Explanation.—Gang-planks used for loading wagons shall not be deemed to be part of a footpath for the purposes of this regulation; provided that every gang-plank shall be so inclined or constructed as to give a secure foot-hold.

41B. Where women are employed in carrying loads, the weight of the loads and the height and distance to which they have to be carried shall not be such as to involve risk of injury to the health of the women. If any dispute arises as to whether risk of injury to health is involved, the decision of the Chief Inspector shall be final.

42. Where the ground is not safe, all shafts in use shall be made secure with suitable timber-work or other means of support.

43. (1) A competent person or persons appointed for the purpose by the manager or underground manager shall inspect, at least once in every shift, every part of the mine in or through which any person has to work or pass, for the purpose of ascertaining the condition thereof as far as ventilation, roof, sides and general safety are concerned, and, if more than 20 persons are employed in the mine simultaneously, shall without delay write or cause to be written a full and accurate report of the result of such inspection in a book to be kept at the mine for the purpose, and shall sign and date his report.

(2) A competent person appointed by the manager for the purpose, shall, once at least in every week, examine the state of the shafts by which persons ascend or descend, and, if more than 20 persons are employed in the mine simultaneously, shall without delay write or cause to be written a full and accurate report of the result of the examination.

Every such report shall be recorded in a paged book to be kept at the mine for the purpose, and shall be signed and dated by the person who made the examination.

44. Every place where work is carried on or where men are stationed or pass shall be placed under the charge of a competent person appointed by the manager or underground manager.

45. If a working place or travelling road is found to be unsafe, all persons shall be withdrawn immediately from the dangerous area and all access to such working place or travelling road, except for the purpose of removing the danger or saving life, shall be prevented by securely fencing the full width of all entrances to the place.

46. The top and all entrances between the top and bottom of shafts, winzes, shoots or sliding holes and any openings into a stope more than 10 feet deep below a drive and other dangerous openings, shall be provided with a permanent or removable barrier in order to prevent persons or things from falling into them. When a shaft, winze, rise or stope leads directly into a travelling road or place where persons are stationed at work, the traffic at such points shall be protected against danger from anything falling from above.

47. At every shaft station where it is necessary for persons to pass from one side of the shaft to the other, provision shall be made enabling them to do so without entering or crossing a winding compartment.

48. All ladders, ladderways, platforms, doors, fences and other appliances and things in use underground shall be maintained in proper repair. Temporary ladders, platforms or other means of climbing or keeping a footing while at work shall be provided in sinks, winzes, rises, stopes and other places where they are needed.

49. Where any working is approaching any place containing or likely to contain a dangerous accumulation of water, the working shall not exceed 6 feet in width or height, and bore-holes shall be constantly kept at such a distance in advance of the face and at such angles from the working as is necessary to obviate the danger of a sudden breaking through of such water.

50. An adequate amount of ventilation shall be constantly produced in every mine to clear away smoke and to dilute and render harmless inflammable and noxious gases to such an extent that the working places of the shafts, levels, and workings of the mine, and the travelling roads to and from these working places shall be in a safe state for persons working or passing therein.

51. Underground workings and shafts, sumps and winzes which have been in disuse for some time shall be examined before again being used in order to ascertain whether foul air or other dangerous gases have accumulated therein, and also to ascertain the condition of the roof and sides; and only such workmen as may be necessary to make such examination shall be allowed to proceed to such places until such places are certified to be in a safe state to work and travel in.

52. In any underground part of a mine where adequate stationary lights are not in use, every person shall carry a light.

53. No person shall work in any place other than a place in which he has been ordered to work by an official of the mine or by any person in whose charge he has been placed by an official of the mine.

CHAPTER VII—LADDERWAYS

54. In ladder-shafts making an angle of 25 degrees or less with the vertical, platforms shall be provided at intervals not exceeding 35 feet. Ladders shall be placed so as to cover the openings in the platforms; provided that in cases where timber and supplies are handled, a portion of this opening may be to one side of the ladder and in the opposite corner of the platform. Except in respect of the lowest 30 feet of a sinking shaft, ladders shall be fixed at an inclination of not less than one foot horizontal for every 10 feet vertical; provided that where exceptional circumstances require they may, with the consent of an Inspector, be fixed at a steeper inclination.

55. In ladder-shafts where the slope is less than 65 degrees and more than 30 degrees with the horizontal, platforms shall be placed at intervals of not more than 55 feet along the underlie or slope of the shaft.

56. All platforms shall be securely fenced.

57. All ladders shall be securely fastened to the sides of timbering of the shaft.

58. All ladders shall project at least three feet above the shaft-top and above every platform, or strong holdfasts shall be provided at these places in convenient positions.

59. A ladderway, which is a compartment of a shaft used also for other purposes, shall be closed off from the other compartments to such an extent as to prevent injury to workmen passing up and down the ladderway.

60. Every ladderway-opening in any travelling road or place where men are stationed or pass shall be provided with a door or with a substantial fence.

61. No person shall carry or be permitted to carry any drill, tool or any loose material on a ladderway in a vertical or steeply inclined shaft or winze, except so far as may be necessary in executing repairs:

Provided that nothing in this regulation shall prevent a person from carrying tools on a ladderway to a stope.

CHAPTER VIII—EXPLOSIVES

62. The explosives provided for use in the mine shall be of good quality and, as far as can be practically known, in good condition, and only detonators of one strength and of sufficient power for every class of explosive used shall be kept for use in the same mine.

63. Explosives shall not be taken into or kept in a dwelling house, but only in a properly constructed magazine.

64. (1) Explosives shall not be stored under ground in a mine except with the approval of an Inspector in writing, and in a magazine or magazines duly licensed in accordance with the provisions of rules made under the Indian Explosives Act, 1884.

(2) The Manager shall appoint in writing a competent person or competent persons to be in charge of every magazine for the storage of explosives and no person shall be in charge of a magazine without such written authority.

(3) Explosives shall be issued only to competent persons appointed by the manager or underground manager or foreman, and no unauthorised person shall have explosives in his possession. The names of such competent persons shall be registered in a book to be kept for the purpose.

(4) The person in charge of a magazine shall keep a correct record of the quantity of gunpowder and of the numbers of cartridges of other kinds of explosives and of detonators issued from the magazine to each authorised person, and a similar record of explosives returned to the magazine.

65. Underground magazines shall be placed at a sufficient distance from one another and from any portion of the mine in which work is going on or which is used as a travelling road, to prevent the risk of injury to any person in the event of the explosion of the maximum amount of explosive stored.

66. The quantity of explosive which may be stored in an underground magazine shall not exceed the supply required for two working days in the mine in which the magazine is situated.

67. Detonators shall be kept in a securely locked box separate from any other explosive and no detonator shall be inserted into a priming cartridge until immediately before it is to be used:

Provided that, in the case of a wet working, priming cartridges may be prepared at the nearest convenient dry place adjacent to the working.

68. Every precaution shall be adopted to prevent the explosion or ignition of explosives stored in an underground magazine. The Chief Inspector may prescribe precautions to be adopted in addition to those required by the terms of the explosives licence.

69. No naked light shall be taken into an underground magazine or store.

70. Explosives shall not be sent down in the cage, skip or bucket unless there is a distinguishing mark attached to the cage, skip or bucket, or they are accompanied by a shot-firer or responsible person.

71. All blasting operations shall be conducted by or under the personal direction of duly competent persons, not less than 18 years of age, appointed by the manager, underground manager or foreman. The names of these persons shall be registered in a book to be kept for the purpose.

72. The number of shots fired, the quantity of explosives used and the number of shots (if any) which have misfired shall be recorded daily in a book to be kept for the purpose.

73. All unused explosives shall be returned to the magazine without delay. Such returned explosives shall be re-issued before fresh stock is used.

74. No explosives shall be taken into a mine except in a secure case, canister or bag containing not more than five pounds each and a person shall not have in use or keep for use, at one time in any one place within the mine, more than one such case, canister or bag. The place in the mine at which any such case, canister or bag is in use, or is kept for use, shall, unless solid ground directly intervenes, not be less than thirty feet from a place at which any other such case, canister or bag is in use or kept for use:

Provided that the Chief Inspector may, in special cases and by order in writing, permit, subject to such limitations as he may prescribe, the use at one time in one place of more than one of such cases, canisters or bags:

Provided further that nothing in this regulation shall prohibit the conveyance of larger quantities of explosives for supplying an underground magazine.

75. When explosives are being carried on a ladder, each case, canister or bag shall be securely fastened to the person carrying it.

76. In the process of charging or stemming a hole no person shall use an iron or steel tool, scraper or tamping rod, nor shall he use undue force in pressing the explosive into the hole or strike it when at the bottom of the hole.

77. In any underground working place only those holes which are to be fired in the next round shall be charged, and the fuses in all holes which have been charged shall be ignited or detonated together.

78. Before a shot is fired in an underground working place due warning shall be given to persons in the vicinity, and every entrance to the place where a shot is about to be fired shall be guarded so as to prevent any person, not having received warning, from placing himself in dangerous proximity to the shot.

79. (1) When two underground working places have approached to within 10 feet of one another, no blasting shall be done in anyone of such workings unless the workmen have been withdrawn from the other working, and the same has been fenced.

Explanation.—For the purpose of this sub-regulation any place to which workmen have lawful access shall be deemed to be a working place.

(2) In open workings blasting shall not be commenced until such warning as will prevent danger to the persons working in the mine and its vicinity has been given by an efficient system of signals or by other means arranged by the manager. Notice shall similarly be given as soon as blasting is finished.

80. When shots are fired, the number of reports shall be counted by at least two persons. The lowest count shall be taken to be correct. Unless it is certain that all the shots have exploded, no person shall re-enter such working place until 30 minutes after blasting, unless the shot has been fired by electrical means when this interval may be reduced to not less than ten minutes after the source of the electricity has been disconnected from the cable, and the place becomes clear of fumes. If the charge is known to have burnt away without exploding no person shall re-enter the working place for an hour.

81. After a shot has been fired in an underground working place the person who fired the shot or a competent person appointed in writing by the manager of the mine shall before any other person enters the place, make a careful examination and with his assistants make the place safe. No other person shall enter the place until the examination has been made and the place has been declared to be safe in all respects.

82. No person shall bore out a hole that has once been charged or attempt to withdraw a charge either before firing or after a misfire or deepen or tamper with empty holes or sockets left after blasting.

83. When a misfire occurs, a portion of the tamping may be sludged out with compressed air or water under pressure, but no kind of tool shall be used for this purpose. The hole shall thereafter be reprimed and fired.

84. No person shall drill or cause or permit to be drilled any hole within 12 inches of a misfired hole, and care shall be taken to drill the new hole in such a direction that there is no danger of touching the unexploded charge. The new hole shall be bored in the presence of an authorised shot-firer, and he shall be present during operations undertaken for the removal of debris lying within six feet of the misfired hole. A careful search amongst the debris shall be made for cartridges and detonators, if any.

85. If a place where a misfire has occurred is temporarily vacated a man shall be posted to warn all persons in the neighbourhood of the fact, or the place shall be fenced so as to prevent access. In open workings it will be sufficient to mark the place of misfire with a red flag.

CHAPTER IX—MISCELLANEOUS

86. (1) Every flywheel and all exposed and dangerous parts of the machinery used in and about a mine shall be kept securely fenced.

(2) Where it is necessary to prevent danger to the public every tank or reservoir shall be securely fenced.

87. Efficient guards shall be provided for such parts of any machinery and any electrical conductors as may be a source of danger.

88. If any person, when in charge of any machinery, apparatus or appliance used in or about a mine, observes any defect or dangerous flaw therein, he shall immediately report the fact to the manager, under-manager or engine-wright.

89. Every person shall strictly comply with all lawful orders issued by the manager or such other official as may be empowered by the manager to issue the same.

90. No person occupying any position of trust in or about a mine shall depute another person to do his work without the sanction of the official to whom he is subordinate; and no such person shall absent himself without having previously obtained permission from such official for the term of his absence or without having been relieved by a competent person.

91. No person shall negligently or wilfully do anything likely to endanger life or limb in the mine, or negligently or wilfully omit to do anything necessary for the safety of the mine or the persons employed therein.

92. No person shall damage, destroy or improperly interfere with anything provided for or used in the working of the mine.

93. No person shall remove or pass through any fence, or remove or pass any danger-signal unless so specially authorised by the manager or an official empowered by the manager in that behalf.

94. No person occupying any position of trust in or about a mine shall sleep whilst on duty.

95. If any person required by these regulations or by any rule or bye-law made under the Act to make any report is unable to write, he shall be present when his report is written for him, and shall have it read over to him, and shall attach his thumb mark to it. The person writing the report shall also sign his name at the end together with a statement that it has been read over to the person for whom it was written.

96. Whenever the circumstances at any mine or part of a mine are such as to render any provision of these regulations not reasonably applicable to such mine or part of such mine, the Chief Inspector may, at his discretion, grant exemption, from such provision under such conditions as he may think fit.

SCHEDULE

FORM I—(See Regulation 3)

Annual return for the year ending on the 31st December 19 .

1. Name of mine.
2. Postal address of mine.
3. Date of opening.
4. Date of closing (if closed).
5. Situation of mine

District.
Province.
6.

Name of owner.
Postal address of owner.
7.

Name of Managing Agents (if any).
Postal address of Managing Agents (if any).
8.

Name of Agent (if any), as defined in Section 3 (a) of the Indian Mines Act, 1923.
Postal address of Agent.
Name of Manager.
9.

Postal address of Manager.

10. Name of mineral worked.
11. Means by which the mineral is raised from the mine, *i.e.*, hand labour, mechanical or electrical power.

FORM II—[See Regulation 3]

Persons employed during the year ending on 31st December 19 , and wages paid for work done in December 19

Classification	Aggregate number of daily attendances during the year of persons permanently and temporarily employed	Number of days worked during the year	Daily average number of persons employed as calculated by dividing the aggregate number of attendances by the number of days worked during the year	Average hours worked per week during the year	Aggregate number of daily attendances in December	Total amount paid in wages for work done in December	Average daily earnings in December as calculated by dividing the amount in column 7 by the number of attendances in column 6
I	2	3	4	5	6	7	8
A.—Underground (i.e., in places lying beneath the superjacent ground)							
Males—							
Foremen and mates							
Miners							
Skilled labour not included above							
Unskilled labour not included above							
Total (Males)							
B.—Open workings [i.e., in workings of the mine (including quarries) which are not situated beneath the superjacent ground].							

FORM III—[See Regulation 3]

Accidents and Prosecutions

Number of separate accidents* reported during the year			Number of persons		Number of prosecutions instituted by the management with the sections and rules under which the prosecutions were instituted	Number of persons convicted with the sections and rules under which the convictions were obtained
Fatal	Serious	Total	Killed	Seriously injured		
1	2	3	4	5	6	7

* Accidents, which were reported as serious accidents but resulted fatally, should be entered as fatal accidents.

FORM IV—[See Regulation 3]

Epidemic Diseases

Disease*	Date of appearance	Date of disappearance	Number of cases	Number of deaths
Cholera
Plague
Small-pox
Influenza

* Figures for any other specified disease which has been epidemic at the mine should be entered in this form.

FORM V—(See Regulation 3)

(For mines other than mica mines)

Type and aggregate horse-power of electrical apparatus

1.—System of supply (whether continuous current or alternating current)

Voltage of supply
Periodicity
Source of supply

2.—Voltage at which current is used for—

Lighting
Power

3. Aggregate horse-power of motors installed on surface for—

Winding
Ventilation
Haulage
Ore dressing
Miscellaneous
					Total horse-power

4.—Aggregate horse-power of motors installed under ground for—

Haulage
Pumping
Portable machinery
Miscellaneous
					Total horse-power

5. Total horse-power (addition of 3 and 4).

FORM VI—[See Regulation 3]

Particulars of Explosives

Explosives		Number of detonators used
Name of explosive	Quantity used in lbs.	

FORM VII—[See Regulation 3]

(For Mica Mines only)

Output for year ending on the 31st December 19

1	2		3
	Total amount of dressed mica raised	Total amount of dressed mica consigned	
Cwts.			Total value at the mine of mica consigned ("Value" means and should be calculated upon actual or estimated selling price at the mine. Any charges incurred in transporting the mica outside the mine should not be included).
Lbs.			

Signature of Owner, Agent or Manager.
Date of Signature.

(If the form is signed by Managing Agents the words "for owner" should be added.)

FORM VIII.—[See Regulation 3].

(For all mines except mica mines)

Output for year ending on the 31st December 19 .

Total amount of mineral raised. The figures should be stated— (a) in the case of gem-stones, in carats; (b) in the case of alum, amber, asbestos, graphite, jade-stone, steatite, tin-ore, tungsten-ore, in cwt., or where the circumstances require greater particularisation in order to give an accurate estimate of small outputs, in cwt., and lbs. (c) in the case of clay, limestone, magnesite, marble, phosphatic rock, salt, slate, and other stone, and all metalliferous ores except those referred to in (b), in tons	Total value at the mine of mineral raised. ("Value" means and should be calculated upon actual or estimated selling price at the mine.) Any charges incurred in transporting the mineral outside the mine property should not be included	Quantity of metal or metals extracted at the mine. Each metal should be shown separately— (a) in the case of gold, silver and other precious metals, in Troy ounces; (b) in the case of tin in cwt., and fractions of cwt.; (c) in the case of other metals, in tons and fractions of tons	Value of metal or metals extracted at the mine. The value of each metal should be shown separately
Name of mineral raised and metal (if any) extracted	3	4	5
Total			

(If the form is signed by a Managing Agent the words "for owner" should be added).

Signature of Owner, Agent or Manager.
Date of signature.

³[FORM IX—(See Regulation 13).

Notice of Occurrence

Dated _____ 19____

From _____

To
 1. The Chief Inspector of Mines, Dhanbad P. O., District Manbhum.
 2. The District Magistrate/District Collector
 The Sub-Divisional Magistrate/*Revenue Divisional Officer.

SIR,
 I have to furnish the following particulars of a fatal accident/a serious accident/a dangerous occurrence which occurred at the _____ mine.

1.	Situation of mine (Village, Thana, District & State)	Mineral worked	Name and Postal address of owner
2.	Date and hour of occurrence	Place and location in mine	Number of persons Killed Seriously injured
3.	Classification of occurrence†		Cause and description
4.	(a) Name of persons killed	Nature of employment	Age Sex Nature of injury and if fatal, cause of death
	(b) Name of persons injured		

Yours faithfully,
 Owner/Agent/Manager

†Under one or other of the following heads, namely:—

- (1) Explosions and ignitions of inflammable gas and/or coal dust;
- (2) Falls of ground, (a) Falls of roof; (b) Falls of side, wall or face;
- (3) Haulage, (a) above ground; (b) below ground;
- (4) In shafts, (a) overwinding of cages or other means of conveyance; (b) breakage of ropes, chains or drawgear; (c) while ascending or descending by machinery; (d) by falling objects (excluding falls of ground; (f) miscellaneous;
- (5) Explosives;
- (6) Machinery, (a) above ground; (b) below ground;
- (7) Suffocation by gases;
- (8) Irruption of water;
- (9) Premature collapse of workings;
- (10) Outbreak of fire, or spontaneous heating;
- (11) At railway sidings belonging to the mine;
- (12) Electricity; and
- (13) Miscellaneous, (a) above ground; (b) below ground.]

³ Substituted by the Ministry of Labour Notification No. S.R.O. 1857 dated the 23rd August, 1955.

* In the State of Madras only.

COAL MINES RESCUE RULES, 1939¹

In exercise of the powers conferred by section 30-A of the Indian Mines Act, 1923 (IV of 1923), the Central Government is pleased to make the following rules, the same having been previously published as required by sub-section (i) of section 31 of the said Act, namely:—

COAL MINES RESCUE RULES

CHAPTER I.—PRELIMINARY

1. **Short title and commencement.**—(i) These rules may be called the Coal Mines Rescue Rules, 1939.

(2) Rules 1 to 27 shall come into force at once. The remaining rules shall come into force on such date as the Central Government may by notification in the *Gazette of India* appoint.

2. **Extent.**—These rules shall apply to—

- (i) the area known as the Jharia coalfield in the State of Bihar
- (ii) the area known as the Raniganj coalfield in the States of Bengal and Bihar.

3. **Definitions.**—In these rules, unless there is anything repugnant in the subject or context,—

- (a) "The Act" means the Indian Mines Act, 1923;
- (b) "Chief Inspector" means the Chief Inspector of Mines;
- (c) "Committee" means the Rescue Stations Committee constituted under rule 4;
- (d) "Member" means a member of the Committee; and
- (e) "President" means the President of the Committee.

CHAPTER II.—CONSTITUTION AND PROCEDURE OF COMMITTEE

4. **Constitution of Rescue Stations Committee.**—(i) The Central Government shall constitute a Committee consisting of the following members for the establishment, maintenance and management of Rescue Station in the areas to which these rules apply, namely:—

- (i) an Inspector of Mines, nominated by the Chief Inspector;
- (ii) one person nominated by the Indian Mining Association;
- (iii) one person nominated by the Indian Mining Federation;
- (iiia) one person nominated by the Indian Colliery Owners' Association;
- (iv) one person nominated by the National Association of Colliery Managers, Indian Branch;
- (v) one person nominated by the Indian Mine Managers Association; and
- (vi) three persons to represent the interests of persons employed in the mines in the areas to which these rules apply of whom two shall be nominated in the manner prescribed in clause (e) of section 10 of the Act and the third by the Central Government:

Provided that, if any authority or body entitled to nominate any member fails to make any nomination within a period of thirty days from the date it is called upon by the Central Government to make the nomination, the Central Government may nominate a member to fill the vacancy.

(2) The members shall elect one of their member as President.

(3) No act done by a Committee shall be questioned on the ground merely of existence of any vacancy in, or any defects in the constitution of the Committee.

5. **Term of office.**—(i) Save as otherwise provided in these rules, a member shall hold office for three years from the date of his appointment and shall be eligible for re-nomination: Provided that an outgoing member may continue in office until the appointment of his successor is notified.

(2) A member nominated to fill a casual vacancy or a member appointed by the Central Government on the failure of any authority or body entitled to make a nomination, shall hold office so long as the member whose place he fills would have been entitled to hold office if the vacancy had not occurred or the nomination had been made, as the case may be.

(3) Inspectors of Mines shall hold office as directed by the Chief Inspector.

¹ These Rules were published under Government of India, Department of Labour, Notification No. M-955, dated the 9th February, 1939.

(4) Save as otherwise provided in these rules, the President shall hold the office of President for a period of three years from the date of his election and shall be eligible for re-election:

Provided that on ceasing to be a member, the President shall be deemed to have vacated the office of President and shall not, so long as he is not a member, be eligible for re-election.

6. Resignation.—(1) A member other than the President may resign his office by letter addressed to the President.

(2) The President may resign his office by letter addressed to the Central Government.

7. Absence from India.—(1) Before a member leaves India—

(a) he shall intimate to the President the date of his departure from and the date of his expected return to India; and

(b) if he intends to be absent from India for a longer period than six months, he shall tender his resignation.

(2) If any member leaves India without taking the action required by sub-rule (1), he shall be deemed to have resigned with effect from the date of his departure from India.

(3) If the President leaves India without resigning his office as President, he shall be deemed to have resigned from the date of his departure from India.

8. Vacation of office.—(1) A member shall be deemed to have vacated his seat on the Committee—

(a) if he becomes bankrupt or insolvent or suspends payment of compounds with his creditors; or

(b) if he is convicted of any offence which is punishable under the Indian Penal Code and is under the provisions of the Criminal Procedure Code non-bailable; or

(c) if he is absent from meetings of the Committee during a period of three consecutive months without leave of absence from the Committee; or

(d) if, in the opinion of the Central Government, it is undesirable that he should continue to be a member of the Committee.

(2) The Central Government may after such inquiry as it deems necessary declare that the President has vacated his office and the Committee shall thereupon elect another member as President.

9. Time and place of meetings.—(1) The President may at any time call a meeting of the Committee and shall do so if a requisition for that purpose is presented to him by four other members.

(2) The meetings of the Committee shall, unless the President in any case otherwise directs, be held at Dhanbad.

10. Notice of meetings.—Not less than seven clear days before any meeting of the Committee notices of the time and place of the intended meeting, signed by the President, shall be left at or posted to the usual place of residence of every other member:

Provided that in cases of urgency an emergency meeting may be summoned at any time by the President who shall inform the other members of the subject-matter for discussion and the reasons for which he considers it urgent. Business not arising out of the subject-matter shall not be introduced or transacted at an emergent meeting.

11. Presiding at meetings.—The President shall preside at every meeting of the Committee at which he is present. If the President is absent from any meeting the members present shall elect one of their member to preside over the meeting and the member so elected shall at that meeting exercise all the powers of the President.

12. Quorum.—No business shall be transacted at a meeting of the Committee unless at least four members are present:

Provided that if at any meeting less than four members attend the President may adjourn the meeting to a date not less than seven days later and inform the members present and notify other members that he proposes to dispose of the business at the adjourned meeting irrespective of a quorum, and it shall thereupon be lawful to dispose of the business at such adjourned meeting irrespective of the number attending.

13. Powers and duties of the President.—The President shall be the Principal Executive Officer of the Committee and, in addition to the other powers and duties conferred upon him by these rules, shall—

(a) present all important papers and matters to the Committee as early as practicable;

(b) issue orders as to the method of carrying out the decisions of the Committee;

(c) sign or, subject to a resolution by the Committee, authorise some other person to sign cheques issued on behalf of the Committee;

- (d) grant or, subject to a resolution by the Committee, authorise some other person to grant, receipts on behalf of the Committee for all moneys received under these rules;
- (e) maintain or cause to be maintained an account of the receipts and expenditure of the Committee; and
- (f) present an annual draft report on the working of the Committee to the Committee for approval and submit the report in the form approved by the Committee to the Central Government.

14. Disposal of business.—(1) All questions which the Committee is required to take into consideration shall be considered either at its meetings or by circulation of the papers as the President may direct.

(2) When a question is referred by circulation of papers any member may request that the question be considered at a meeting of the Committee. If three or more members make such a request, the President shall direct that it be so considered; and if any member makes such a request, he may direct that it be so considered.

15. List of Business.—(1) The President shall circulate to the other members at least three days before a meeting of the Committee a list of business to be disposed of at that meeting.

(2) No business not on the list shall be considered without the permission of the President.

16. Decision by majority.—(1) Every question at a meeting of the Committee shall be decided by a majority of votes of the members present and voting on that question.

(2) Every question circulated to the members shall, unless the President in pursuance of sub-rule (2) of rule 14 reserves it for consideration at a meeting, be decided in accordance with the opinions of the majority recording opinions.

(3) In the case of an equal division of votes or opinions, the President shall exercise an additional vote or opinion.

17. Committee's establishment.—(1) The Committee shall, from time to time, fix the scale of establishment and the salaries and allowances of all officers and servants to be employed by it and require security in such instances and to such amount as it thinks fit.

(2) Subject to the scale of establishment fixed under sub-rule (1), the President shall have power to appoint, dismiss, grant leave to, suspend or reduce any person in the service of the Committee;

Provided that—

- (a) no person shall be appointed to, or dismissed from, an office the salary of which is one hundred and fifty rupees or upwards without the sanction of the Committee at a meeting;
- (b) the grant of leave, pay and allowances to officers and servants of the Committee, who are not Government servants, shall be regulated by rules made by the Committee.

18. Remuneration of members.—(1) Each member shall be paid Rs. 16 for each meeting attended by him, subject to a maximum of Rs. 32 for any one calendar month.

(2) A member performing a journey to attend a meeting or with the approval of the Committee, on other business of the Committee shall be paid—

- (a) if a non-official, the actual travelling expenses incurred by him in performing the journey not exceeding the travelling allowance admissible to a Government servant of the first grade for a journey on tour;
- (b) if a Government servant, such travelling allowances as would be admissible to him under the appropriate rules if the journey had been performed on Government duty.

CHAPTER III.—FUNDS AND ACCOUNTS

19. Imposition of excise duty.—There shall be levied and collected on all coal and coke despatched by rail from collieries or coke plants situated in the areas to which these rules apply a duty of excise at the rate of 1½ pies per ton for one year from the 1st day of May 1939, and thereafter at such rates as the Central Government may, after consulting the Committee by Notification in the *Gazette of India*, fix:

Provided that, when it is proved to the satisfaction of the Committee or any person authorised in this behalf by the Committee, that any coal, on which the duty of excise had previously been collected, has been used in the manufacture of any coke, on which also

the duty has been collected, the Committee or the person authorised in this behalf by the Committee may order refund of an amount equal to the duty collected on such coal to the person from whom such duty was collected.

20. Recovery of excise duty.—(1) The excise duty imposed under rule 10 shall, when the coal or coke is despatched by rail from collieries to any station in the Indian Dominion, be collected by the Railway Administration concerned by means of a surcharge on freight and such duty of excise shall be recovered—

- (a) from the consignor, if the freight charges are being pre-paid at the forwarding station;
- (b) from the consignee, if the freight charges are collected at the destination of the consignment; or
- (c) from the party paying the freight if the consignment is booked on the "weight only" system.

(2) Where the coal or coke is despatched by rail from collieries to stations outside the Indian Dominion, the duty of excise shall be recovered from the consignor at the forwarding station, in all cases.

(3) In collecting the amount of excise duty payable on any one consignment, a fraction of an anna shall be rounded off to the nearest anna.

21. Weight for charge.—For the purposes of the levy of the excise duty, the actual weight of a consignment, rounded off to the nearest ton, shall be taken into account.

22. Remittance of excise duty to the Committee.—The total amount of excise duty collected by each Railway Administration in respect of despatches from the areas to which these rules apply, less—

- (a) refunds and write-offs, authorised by Railway Administration under rule 23;
- (b) a deduction of such percentage² not exceeding ten as the Central Government may, by notification in the *Gazette of India*, fix, towards the cost of collection shall be remitted quarterly to the Government treasury at Dhanbad for the credit of the Committee.

23. Refunds and recoveries.³—Where the amount of the excise duty due under these rules has not been collected or where the amount collected is in excess of the amount due, the Railway Administration shall deal with the undercharge or overcharge as the case may be, on the same principles as apply to undercharges and overcharges in regard to railway freight charges.

24. Deposit of moneys.—All excise duty and other moneys received on behalf of the Committee shall be deposited in the Government treasury at Dhanbad to the credit of the Committee:

Provided that the Committee may from time to time authorise the retention in the charge of the President or any other person of such sum as it thinks fit as petty cash to meet contingent expenditure.

25. Application of excise duty and other moneys received.—The proceeds of the excise duty and any other moneys received by the Committee shall be applied to meeting the expenses of the Committee and the maintenance and upkeep of the Rescue Stations.

26. Keeping, auditing and publication of accounts.—(1) The Committee shall keep accounts of all moneys received and expended during each financial year.

(2) Such accounts shall be examined and audited annually by auditors appointed in this behalf by the Central Government.

(3) The auditors may disallow any item which has, in their opinion, been expended out of any moneys so received otherwise than as directed by or under these rules.

(4) If any item is disallowed, an appeal may be made to the Central Government whose decision shall be final.

² In pursuance of clause (b) of rule 22, the Central Government is pleased to fix, with effect from 1st April 1947, two as the percentage which each Railway Administration shall be entitled to deduct, towards the cost of collection, from the total amount of excise duty collected by it under the said rules.

³ The rate of duty of excise referred to in rule 19 was fixed at 1½ pies per ton with effect from 1st May 1940 (*vide* Department of Labour, Notification No. M.-1278, dated the 16th April 1940) at 2 pies per ton from the 1st October 1942 (*vide* Department of Labour, Notification No. M.-955, dated the 17th September 1942), and at 2½ pies per ton from the 15th May 1943 (*vide* Department of Labour, Notification No. M.-955, dated the 14th April 1943).

(5) The audited statement of receipts and expenditure together with the annual report referred to in clause (f) of rule 13 shall be submitted to the Central Government not later than July in each year.

(6) An abstract statement of the receipts and expenditure shall be published annually in the *Gazette of India*.

CHAPTER IV.—RESCUE STATIONS

27. Maintenance and location of Rescue Stations.—(1) The Committee shall establish as early as practicable and maintain one Rescue Station in the Jharia coalfield and one Rescue Station in the Raniganj coalfield.

(2) The Station shall be located—

(a) for the Jharia coalfield within a radius of four miles from the Dhanbad Railway Station;

(b) for the Raniganj coalfield within a radius of five miles from the Asansol Railway Station.

28. Appointment of Superintendents.—Each Rescue Station shall be placed under the control of a competent Superintendent who—

(i) has been for two years a Superintendent or Instructor at a rescue station or a member of a permanent rescue corps, or

(ii) has been fully trained in rescue work, and has had five years' practical experience of underground work in a mine.

29. Appointment of Instructors.—(1) Not less than three competent instructors shall be employed at each Rescue Station to train rescue workers.

(2) No person shall be appointed as an instructor unless he has had at least three years' practical experience of underground work in a mine.

(3) The superintendent of the station may be included as an instructor for the purpose of sub-rule (1).

(4) At least one instructor shall always be in attendance at the Station and one instructor shall be appointed to take charge of the Station in the absence of the Superintendent.

30. Permanent Rescue Corps.—(1) A permanent rescue corps shall be maintained at each Rescue Station. Exclusive of the Superintendent and of the person appointed to take charge of the Station in his absence, the corps shall consist of not less than six fully trained men. One or more members shall be trained to act as leaders.

(2) It shall be the duty of the corps—

(a) to conduct rescue work and take all practicable steps to minimize danger in mines after any explosion or outbreak of fire or dangerous irruption of noxious or inflammable gas;

(b) generally to fulfil any other obligations imposed upon them by these rules.

(3) A permanent rescue corps of a Rescue Station shall not be employed for reopening or recovering mines or parts thereof, which has been closed or sealed on account of explosion, outbreak of fire or irruption of noxious or inflammable gas, except at the discretion of the Committee.

31. Attendance of Corps at Station.—The members of the rescue corps maintained at a Rescue Station shall be continuously employed at the Station, and in constant residence there.

32. Rescue apparatus and equipment.—(1) At every Rescue Station there shall be provided and maintained, in good order and ready for immediate use, apparatus and equipment suitable and sufficient to enable the requirements of these rules to be carried out. Such apparatus and equipment shall include that specified in Schedule I to these rules.

(2) The following apparatus and equipment to be provided in pursuance of sub-rule (1) shall be of a type or standard approved by the Chief Inspector:—

(a) breathing apparatus;

(b) smoke helmets and other apparatus serving the same purpose;

(c) gas masks;

(d) reviving apparatus;

(e) electric safety lamps and flame safety lamps;

(f) first-aid boxes;

(g) fire extinguishers.

Any apparatus or equipment approved by the Chief Inspector in pursuance of this rule may be approved either absolutely or subject to conditions.

(3) No apparatus or equipment specified in heads (a) to (g) in sub-rule (2) shall be provided or used at any Rescue Station or mine if it is not of a type or standard approved by the Chief Inspector.

(4) Breathing apparatus for use at a mine in rescue work or training shall be obtained as required from the Rescue Station serving the mine.

(5) All breathing apparatus and every flow-meter shall be adjusted and tested periodically, and the purity of oxygen for use in breathing apparatus shall be tested. The tests shall be made in the manner prescribed in Schedule II to these rules.

33. Accidents caused by equipment or apparatus.—(1) A report in writing giving particulars of every accident or dangerous occurrence arising out of the use of any breathing apparatus or smoke helmets or other apparatus serving the same purpose at any mine, shall be sent within 24 hours of the accident or occurrence to the Inspector of the Circle by the manager of the mine.

(2) If any such accident or dangerous occurrence takes place at any Rescue Station, a similar report shall be sent by the Superintendent of the Station.

CHAPTER V.—ORGANISATION AND EQUIPMENT AT MINES

34. Appointment of men from mines to act with permanent rescue corps.—The manager of every mine situated in the areas to which these rules apply employing 100 or more persons underground on any one day of the preceding twelve months shall appoint on the following scale fully trained men to co-operate with the Rescue Station in rescue work and practice:—

Where the total number of persons employed underground is not more than 500	...	not less than one trained man.
Where the total number of persons employed underground is more than 500 but not more than 1,000	not less than two trained men.
Where the total number of persons employed underground is more than 1,000 but not more than 1,500	not less than three trained men
Where the total number of persons employed underground is more than 1,500	not less than four trained men.

35. Disposition of rescue workers.—(1) So far as practicable it shall be arranged that trained men for rescue work at a mine, where there is more than one, shall not all be employed underground at the same time.

(2) Effective arrangements shall be made at every mine for summoning rescue workers immediately their services are required.

36. Telephonic communication.—Every mine situated in the areas to which these rules apply shall be in telephonic communication with the Rescue Station serving the mine:

Provided that if the number of persons employed underground in a mine does not exceed one hundred, the requirements of this rule shall be deemed to have been complied with if the office of the mine is situated within a distance of two miles from a telephone connected to the Rescue Station:

Provided further that the Chief Inspector may exempt any mine, where there is no public telephone system, from the provisions of this rule subject to such conditions as he may impose to ensure other prompt means of communication with the Rescue Station.

37. Tracings showing ventilation, etc.—There shall be kept at every mine, other than an open mine, in which the number of persons employed exceeds one hundred, situated in the areas to which these rules apply, in a form suitable for use by rescue workers, a sufficient number of clear and legible tracings, not being less than three, of the workings of the mine up to a date not more than six months previously, showing the ventilation and all principal doors, stoppings and air-crossings, regulators and telephone stations, and distinguishing the intake airways by a different colour from the return airways. The signs used in these tracings shall be those specified in Schedule III to these rules.

38. Selection of rescue workers.—(1) The persons to be trained in rescue work shall be carefully selected on the grounds of their coolness, powers of endurance and general suitability for the work, and, in the case of men from mines to be trained to co-operate with permanent rescue corps also on the ground of their knowledge of the mine.

(2) No person shall be trained as a rescue worker unless—

- (i) he is certified by a qualified medical practitioner after examination in accordance with Schedule IV to these rules to be free from any organic disease or weakness, and to be fit for undertaking rescue work in a mine;
- (ii) he is considered by the Superintendent of the Rescue Station to be suitable for rescue work with breathing apparatus;
- (iii) the manager of the mine at which the person is employed certifies in writing that he has had sufficient underground experience for the purpose of rescue work; and
- (iv) he is the holder of a certificate of proficiency in first-aid from an organization approved by the Chief Inspector.

39. Medical examination of rescue workers.—Every rescue worker so long as he continues to practise shall be re-examined every 12 months by a qualified medical practitioner in accordance with Schedule IV to these rules, and no person shall continue to practise after re-examination unless he is certified to be fit.

40. Instruction and Practice.—(1) Every person selected for training in rescue work shall undergo the course of instruction and practices set out in Part I of Schedule V to these rules, until he has been certified as efficient by the Superintendent.

(2) Rescue workers who have been so certified shall undergo practices and receive instruction as set out in Part II of Schedule V to these rules.

(3) All practices required by Schedule V shall last at least two hours except on occasion when, in the opinion of the instructor, it is desirable in the interests of safety to curtail the practice. At some of the practices the breathing apparatus shall be worn continuously for two hours.

(4) A record shall be kept at every Rescue Station of all persons undergoing practices or receiving instruction in rescue work at the station. This record shall contain such particulars as the Chief Inspector may specify from time to time, including the date and character of each practice and the condition of each man after the practice, and if anything abnormal is observed in his condition, whether it is due to a defect of the apparatus or to the man himself.

41. Code of Signals in training.—The code of signals used in training shall be that set out in Schedule VI to these rules.

CHAPTER VI.—CONDUCT OF RESCUE WORK

42. Duties of Manager or principal official present at surface in emergencies.—On receiving information of any emergency likely to require the services of a rescue corps or brigade, the manager, or, in his absence, the principal official present at the surface shall immediately—

- (a) telephone to the Rescue Station; inform the responsible officer on duty at the Station of the character of the occurrence; state whether assistance will be needed from rescue brigades other than the permanent rescue corps, or the brigades attached to the mine;
- (b) summon the trained men attached to the mine;
- (c) summon medical assistance;
- (d) telephone to the Chief Inspector or Inspector;
- (e) if necessary, communicate with the Police Station:

Provided that if the mine is not in telephonic communication with the Rescue Station a message shall be sent by a reliable person to the nearest telephone for immediate communication to the Rescue Station and the Chief Inspector or Inspector.

43. Entry into mines for rescue operations.—(1) No person shall be allowed to enter a mine or part of mine which is unsafe for the purpose of engaging in rescue operations unless authorised by the manager, or, in his absence, by the principal official of the mine present at the surface. Only men trained in the use of breathing apparatus shall be permitted to enter the mine for the purpose of using such apparatus.

(2) During the progress of such operations, a person or persons shall be stationed at the entrance of the mine and required to keep a written record of all persons entering and leaving the mine.

44. Leader.—(1) Every corps or brigade engaged in work with breathing apparatus in a mine shall be under a leader appointed by the Superintendent of a Rescue Station.

(2) The leader shall not engage in manual work. He shall give his attention solely to directing the brigade and to maintaining its safety. He shall examine the roof and

supports during the journey in and, if there is any likelihood of a fall, shall not proceed until the brigade has made the place secure.

45. Numbers employed.—The number of persons in any corps or brigade using breathing apparatus in a mine shall not be less than five or more than six including the leader.

46. Supply of Oxygen.—If the type of apparatus admits of it, at least one person in every corps or brigade shall wear an apparatus with an extension for the supply of oxygen to another person in case of necessity.

47. Instructions to brigade regarding rescue operations.—(1) Prior to sending a brigade underground clear instructions shall be given by the principal official of the mine for the time being on the surface, or by a responsible person deputed by the agent or manager, to the leader of the brigade as to where it shall go and what it shall attempt.

(2) If the Superintendent of the Rescue Station serving the mine is present, the manager or the principal official in charge of the mine shall consult him before issuing such instructions.

(3) Unless the leader is personally thoroughly familiar with the roadways in question, the route to be followed shall be marked on a tracing which the leader shall take with him into the mine.

(4) The leader shall not permit the brigade to go underground until he has received such instructions and if, necessary, such tracing.

(5) The leader shall not deviate from the instructions received by him except when such deviation is necessary for the purpose of saving human life.

48. Fresh air bases.—(1) As soon as possible a base or bases shall be established in fresh air, as near to the irrespirable zone or zones as safety permits. Each such base shall, if possible, be connected by telephone if the base is underground to the surface or if the base is on the surface to the shaft bottom.

(2) Except in cases where the delay involved may result in danger to life, no brigade shall proceed beyond any place where a base is to be established until there have been stationed at such base the following:—

- (a) two men, of whom at least one should understand rescue appliances and first-aid;
- (b) a spare brigade with rescue apparatus and ready for immediate service;
- (c) one or more reviving apparatus, oxygen-revivers, stretchers, and birds.

(3) Whenever men are already at work beyond the base, there shall be stationed at the base as soon as possible the persons, spare brigade, apparatus and equipment specified in clauses (a), (b) and (c) of sub-rule (2).

49. Supply of gas-masks and arrangements at surface.—If the manager considers it necessary for safety, persons engaged in dealing with a fire shall be equipped with gas-masks and a rescue brigade equipped with apparatus shall be maintained on the surface in case of necessity.

50. Test of apparatus.—Before proceeding underground the leader shall test, or witness the testing of, all rescue apparatus of the brigade. He shall check the equipment of his party, and, immediately before entering irrespirable air, shall make sure that all apparatus is working properly:

Provided that if the leader and the manager of the mine consider that in order to save life the brigade should proceed at once into the mine, this test may be dispensed with if the apparatus has previously been tested at a Rescue Station.

51. Duties of leader underground.—(1) If the atmosphere is clear, the leader, shall, when passing the junction of two or more roads, clearly indicate the route by means of arrow-marks in chalk. If the atmosphere is obscure the leader shall see that a life-line is led in from fresh air, and shall not allow any member of the brigade to move out of reach of that line; or, if that course is impracticable, he shall not proceed until every road branching from the route is fenced across the opening.

(2) The leader shall keep the team together and shall not allow any member of the team to stray.

(3) When using rescue apparatus the leader shall carry a watch, shall read the pressure of the compressed oxygen every 20 minutes or thereabouts, and shall commence the return journey in ample time. In travelling he shall adapt the rate to that of the slowest member. If any member of the corps or brigade is in distress, he shall immediately return to the fresh air base with the whole brigade.

(4) The leader shall not permit any corps or brigade using breathing apparatus in a mine to remain at work for longer than $1\frac{1}{2}$ hours at any one time.

52. Duties of members of rescue brigades.—Every member of a rescue corps or brigade engaged in work with breathing apparatus in a mine shall obey the orders of the leader of the team.

53. Travelling with rescue apparatus.—In travelling with rescue apparatus, each member of the brigade shall keep the place given him when numbering off. If the pace is too quick, or if distress is felt, the member shall at once call attention to the fact.

54. Restriction on second spell of work.—No person shall commence a second or subsequent spell of work in noxious air without being examined and passed by a qualified medical practitioner, if present, or by the Rescue Station Superintendent or other competent person if a qualified practitioner be not present.

55. Code of signals.—Member of rescue corps or brigades shall, in general, use the signals prescribed in Schedule VI to these rules, in communicating to one another.

SCHEDULE I—[See Rule 32 (1)]

APPARATUS AND EQUIPMENT

Minimum to be kept at each Rescue Station.—(i) Twenty-four complete suits of breathing apparatus, with means of supplying sufficient oxygen or liquid air to enable such apparatus to be constantly used for two days, and of charging such apparatus.

If the type of apparatus admits of it, one set of apparatus in every four shall be provided with an attachment for supplying oxygen or air to any person found overcome by noxious gases in a mine.

(ii) Four smoke helmets or other apparatus serving the same purpose with not less than 120 feet of tubing for each.

(iii) Twenty electric safety lamps or electric torches of a type approved by the Chief Inspector; and 100 approved flame safety lamps.

(iv) Four oxygen reviving apparatus (not of the forced breathing type) each with a cylinder or cylinders capable of supplying at least 20 cubic feet of oxygen.

(v) Thirty gas-masks of a type approved by the Chief Inspector with two refills for each.

(vi) A first-aid box or boxes.

(vii) Fresh drinking water.

(viii) Cages of small birds for testing for carbon monoxide.

(ix) A motor ambulance or car of adequate capacity and power in constant readiness.

(x) Two portable signalling devices.

SCHEDULE II—[See Rule 32 (5)]

BREATHING APPARATUS: ADJUSTMENT AND TESTS

1. In every breathing apparatus which is arranged so as to give a uniform oxygen delivery, the reducing valve shall be so adjusted as to supply not less than two litres of oxygen per minute.

2. Every breathing apparatus shall be thoroughly tested at least once a month in the following manner, and the results of the test giving such particulars as the Chief Inspector by order in writing may specify in this behalf shall be recorded:—

(i) The apparatus shall be carefully examined in respect of its general condition and particular attention shall be given to any delicate and perishable parts.

(ii) The apparatus shall be tested for leakage by completely immersing it in water. For the purposes of this test the apparatus shall be fully distended and if it is a compressed oxygen apparatus the oxygen supply shall be turned on. The apparatus, immersed in water, shall be well shaken and closely examined in every part for leakage by the Superintendent or one of the instructors of the Rescue Station, or by the captain of the rescue brigade. If any leakage is observed the apparatus shall be deemed unsafe for use.

This test may be omitted in respect of the pack of a liquid air apparatus in so far as it would be damaged by immersion.

(iii) The pressure at which any automatic relief valve discharges shall be measured.

3. The following additional tests shall be applied to compressed oxygen apparatus:—

(i) The pressure in the oxygen cylinder shall be measured.

(ii) The rate of delivery of oxygen shall be measured by a flow-meter and if that rate is capable of being adjusted by the water of the apparatus, it shall be measured over the whole range of adjustment.

4. No breathing apparatus shall be used underground unless immediately before use it has been tested and found safe in the manner prescribed by paragraph (ii) of clause 2 of this Schedule:

Provided that as a matter of urgency to save life, this test may be omitted and a test for leakage by mouth suction applied instead.

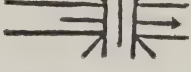

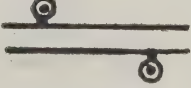

5. The oxygen in every cylinder supplied for use in connection with breathing apparatus shall be analysed before being used in a breathing apparatus, and no oxygen which is found to contain more than two per cent. of impurities shall be used. The results of every analysis giving such particulars as the Chief Inspector may require shall be recorded.

6. Flow-meters shall be tested for accuracy at least once in every six months, and the results of every test giving such particulars as the Chief Inspector may require shall be recorded.

7. Where by this Schedule any particulars are required to be recorded, they shall be recorded forthwith in a book to be kept at the station or mine as the case may be.

SCHEDULE III—[See Rule 37]

CODE OF SIGNS

BRICK STONE OR CONCRETE VENTILATION STOPPINGS	
FIRE DAMS OR SEALS	
WATER DAMS	
DOORS	
REGULATORS	
AIR CROSSINGS	
TELEPHONES	
UNDERGROUND AMBULANCE STATION IN RED	
DIRECTION OF AIR CURRENT	
INTAKE AIRWAYS—BLUE	
RETURN AIRWAYS—RED	

SCHEDULE IV—[See Rules 38 (2) (i) and 39]

MEDICAL EXAMINATION

The medical practitioner shall make a thorough examination of each person to be trained or kept in training and shall devote particular attention to the following requirements:—

- I. The person must be free from—
 - (i) any tendency to fainting or vertigo;
 - (ii) any chronic obstruction in the air passages;
 - (iii) dyspnoea on light exertion;
 - (iv) nystagmus; any marked degree of myopia or any other serious optical defect or disease;
 - (v) deafness.
- II. The person must be of good physical development and mental alertness, and capable of undergoing hard physical exertion for not less than 15 minutes without being unduly distressed or fatigued.

SCHEDULE V—(See Rule 40)

PART I—PRELIMINARY COURSE

The course of instruction and practices shall be as follows:—

A. Instruction in:—

- (i) the general methods of dealing with underground fires and the recovery of mines after fires and explosions;
- (ii) the construction, use, repair, maintenance and testing of the type or types provided of breathing apparatus and of smoke helmets or other apparatus serving the same purpose;
- (iii) the use of methods and apparatus for reviving men;
- (iv) the properties and detection of the noxious and inflammable gases which may be found in mines;
- (v) the taking of gas samples in irrespirable atmospheres;
- (vi) the reading of mine plans;
- (vii) the requirements contained in Chapter VI and Schedule VI to these rules.

B. Practices—not less than 12 for each man with breathing apparatus and in addition not less than two for each man with smoke helmets or other apparatus serving the same purpose, in each case under conditions devised to resemble those likely to be encountered in underground operations requiring the use of such apparatus.

(a) The practices shall be carried out as follows:—

- (i) For Permanent Rescue Corps.—By at least five members jointly.
- (ii) For Men from Mines to act with Rescue Corps.—Not more than eight nor less than five men shall take part in any practice. If five men from the mine do not attend on any occasion the number may be made up by members of the permanent rescue corps. So far as practicable the same five men shall practise together as one brigade.

(b) The practices with breathing apparatus shall take place in ordinary air and shall progress gradually until practices can be carried out in a hot and irrespirable atmosphere.

(c) The practices with breathing apparatus shall comprise the following operations:—

- (i) repeatedly raising and lowering of a weight of 55 lb. to and from a height of six feet by means of a rope and pulley;
- (ii) walking continuously at a fair pace for half an hour;
- (iii) building and removing temporary stoppings of stone, brick, sandbags, brattice cloth, or other materials, and carrying the materials required for such operations over a distance of at least ten yards;
- (iv) removing debris in confined spaces as representing the clearing of a fall of roof;
- (v) setting timber or other roof supports;
- (vi) carrying, pushing or pulling on a stretcher a live person or dummy body weighing 150 lb. along the length of the gallery;
- (vii) the rapid establishment of communication.

PART II—PRACTICE AND INSTRUCTION AFTER BECOMING EFFICIENT

A. *Practices.*—

Permanent Rescue Corps.—In addition to regular practices at the Rescue Station, practices with breathing apparatus underground in a mine at least twice in each quarter and at least twelve times in each year.

Men from Mines to act with Permanent Rescue Corps.—Practices with breathing apparatus at least once in each quarter and at least 6 times in each year, of which at least two shall take place in mines, and the remainder in a hot and irrespirable atmosphere.

B. *Instruction.*—Revision of all subjects included in Part I.

SCHEDULE VI—(See Rules 41 and 55)

CODE OF SIGNALS

Electric Signalling	Signals	Signalling between Members of a brigade	Signals.
"Distress" or "Help Wanted"	One ring	"Distress" or "Help Wanted"	One hoot
	(IF NO ANSWER IS GIVEN to a call "Distress" is to be understood).		
"Not understood" or "Repeat the Message"	Two rings	Halt	Two hoots
"No"	Three rings	Retire	Three hoots
"Yes" or "All right" or "All's well"	Four rings	Advance	Four hoots
To "ring up" To "ring off"	Five rings	To call attention	Five hoots

COAL MINES (CONSERVATION AND SAFETY) ACT, 1952

(XII OF 1952)

Statement of Objects and Reasons¹

India's reserves of metallurgical coal (*i.e.*, coal suitable for making hard coke required for the reduction of iron ore to pig-iron in a blast furnace) are limited. A Committee set up by the Government of India in 1949, has estimated the reserves at 2,000 million tons, but has observed that this figure may well be halved unless precautionary steps (notably compulsory stowing) are taken in mining and unless steps are adopted for the use of blends containing weakly coking coal and to wash the inferior grades of coal. Although at the present rate of consumption, these reserves may last for many years, the position will be different if steel production in the country is stepped up. The Metallurgical Conservation Committee has estimated that if metallurgical coal requirements are increased ten-fold—and such an increase may well be called for in the interests of the industrial development of the country—the life of the metallurgical coal reserves becomes no more than 55 years. Even this period may be halved unless stowing, washing and blending are adopted forthwith. It is, therefore, necessary that scientific working and conservation should be the keynote of future policy regarding metallurgical coal.

2. The Planning Commission which examined the report of the Committee referred to, recommended that powers should be assumed by the Government by legislation for conservation of the country's resources of metallurgical coal, and the present administrative machinery should also be rationalised. The Commission accordingly suggested the establishment of a Coal Board for the purpose.

¹ Gazette of India, 1952, Part II, Section 2, p. 46.

3. The introduction of measures for conservation of metallurgical coal is urgent. Without such measures, the limited resources are being utilised for non-essential purposes. An Ordinance entitled the Coal Mines (Conservation and Safety) Ordinance, 1952, was accordingly promulgated, on 8th January, 1952, taking powers to introduce stowing which till then could be enforced only for safety in coal mines for conservation of coal also. To rationalise the administration a Coal Board was simultaneously established and the Coal Mines Safety (Stowing) Act, 1939, was also repealed as the relevant provisions of that statute which had to be continued had been embodied in the Ordinance.

It is now necessary that the powers assumed by the Central Government for the control and regulation of coal mines to the extent specified in the Ordinance should be continued and hence this Bill.

COAL MINES (CONSERVATION AND SAFETY) ACT, 1952 (XII OF 1952)

Arrangement of Sections

1. Short title and extent.
2. Declaration as to expediency of control by Central Government.
3. Definitions.
4. Establishment of the Board.
5. Functions of the Board.
6. Powers of the Board in executing operations.
7. Powers of Central Government in respect of safety in coal mines and conservation of coal.
8. Imposition of excise duties.
9. Imposition of customs duty.
10. Collection of excise duties.
11. Payment to the Coal Board.
12. Money received by the Board to be credited to the Fund.
13. Powers of Inspectors.
14. Application of Act IV of 1923.
15. Advisory Committees.
16. Protection of action taken in good faith.
17. Power to make rules.
18. Act to apply to Government coal mines.
19. Repeals and savings.

COAL MINES (CONSERVATION AND SAFETY) ACT, 1952 (XII OF 1952)¹

[4th March, 1952]

An Act to provide for the conservation of coal and make further provision for safety in coal mines.

Be it enacted by Parliament as follows:—

1. Short title and extent.—(1) This Act may be called the Coal Mines (Conservation and Safety) Act, 1952.

(2) It extends to the whole of India except the State of Jammu and Kashmir.

2. Declaration as to expediency of control by Central Government.—It is hereby declared that it is expedient in the public interest that the Central Government should take under its control the regulation of coal mines to the extent hereinafter provided.

3. Definitions.—In this Act, unless the context otherwise requires,—

(a) "Board" means the Coal Board established under section 4;

¹ For Statement of Objects and Reasons, see Gazette of India, 1952. Part II, Section 2, page 46; see also page 395 ante.

- (b) "blending" means the process of intimately mixing different varieties of coal so as to provide a mixture which on carbonisation results in coke, which, in the opinion of the Board, is suitable for being used in metallurgical industries, particularly in iron and steel industries;
- (c) "coal" includes coke in all its forms;
- (d) "coking coal" means such type of coal from which on carbonisation coke suitable, in the opinion of the Board, for being used in metallurgical industries, particularly in iron and steel industries, can be prepared;
- (e) "Chief Inspector" and "Inspector" mean the persons respectively appointed as the Chief Inspector of Mines and Inspector of Mines under sub-section (1) of section 4 of the Indian Mines Act, 1923 (IV of 1923) and the provisions of that Act shall apply to the Chief Inspector and to all Inspectors while exercising their powers under this Act or the rules made thereunder;
- (f) "Fund" means the Coal Mines Safety and Conservation Fund constituted under section 12;
- (g) "India" means the territory of India excluding the State of Jammu and Kashmir.
- (h) "prescribed" means prescribed by rules made under this Act;
- (i) "soft coke" means all coke which is unsuitable for being used in metallurgical industries, and "hard coke" means all coke which is not soft coke;
- (j) "stowing" means the operation of filling with sand or any other material or with both spaces left under-ground in a coal mine by the extraction of coal;
- (k) "washing" means such a process or a combination of processes as may be approved in this behalf by the Board by which the whole or any part of the shaley and mineral matter found in the coal is removed therefrom;
- (l) "agent", "mine" and "owner" have the meanings respectively assigned to them in section 3 of the Indian Mines Act, 1923 (IV of 1923).

4. Establishment of the Board.—(1) There shall be established a Board, to be called the Coal Board, and such Board shall be a body corporate having perpetual succession and a common seal and shall by the said name sue and be sued.

(2) The Board shall consist of a Chairman and such number of other members, not exceeding six, as the Central Government may think fit to appoint and the members (including the Chairman) shall hold office during the pleasure of the Central Government for any period not exceeding five years and shall be eligible for re-appointment:

Provided that the Chairman or any other member of the Board may resign his office by giving notice in writing to the Central Government and shall, on such resignation being accepted by that Government, be deemed to have vacated his office.

(3) No act or proceeding of the Board shall be invalid by reason only of the existence of any vacancy amongst its members (including the Chairman) or any defect in the constitution thereof.

5. Functions of the Board.—(1) The Board may, for the purpose of maintenance of safety in coal mines or for conservation of coal, exercise such powers and discharge such duties as may be assigned to it by or under this Act.

(2) The Central Government may, by general or special order, delegate to the Board, subject to such conditions and limitations (if any) as may be specified in the order, such of its powers and duties under this Act or under any other law for the time being in force as it may deem necessary for effectively dealing with problems relating to safety in coal mines or conservation of coal and matters connected therewith or incidental thereto.

6. Powers of the Board in executing operations.—(1) If in the opinion of the Board, it is necessary or desirable that any measures, including stowing, required in furtherance of the objects of this Act should be undertaken directly by the Board, the Board may execute or cause to be executed such measures under its own supervision.

(2) For the purposes of this section, the Board shall have the right for itself and all persons employed in the execution of any work undertaken under this section to enter upon any property in which the work has to be done, and to do therein all things necessary for the execution of the work.

(3) No person shall obstruct or interfere with the execution of any work undertaken under this section and no person shall remove or tamper with any plant or machinery or any stowing or other materials used in the execution of such work.

(4) Whoever contravenes the provisions of sub-section (3) shall be punishable with imprisonment for a term which may extend to six months, or with fine, or with both.

7. Powers of Central Government in respect of safety in coal mines and conservation of coal.—(1) The Central Government may, for the purpose of maintenance of safety in coal mines or for conservation of coal, exercise such powers and take or cause to be taken all such measures as it may deem necessary or proper or as may be prescribed.

(2) Without prejudice to the generality of the foregoing power, the Central Government may, by order in writing addressed to the owner, agent or manager of a coal mine, require him to take such measures as it may think necessary for the purpose of maintenance of safety in coal mines or for conservation of coal, including—

(a) in any coal mine, stowing for safety; or

(b) without prejudice to any order under clause (a), in the case of any coal mine producing coking coal or producing coal which on beneficiation is likely to yield coking coal or producing coal suitable for blending, stowing for conservation; or

(c) washing of coal with a view to beneficiating and reducing the ash contents of coal and improving its coking qualities.

8. Imposition of excise duties.—(1) With effect from such date as the Central Government may, by notification in the Official Gazette, appoint, there shall be levied and collected—

(a) on all coal raised and despatched, and on all coke manufactured and despatched, from the collieries in India, such duty of excise not exceeding one rupee per ton as may be fixed from time to time by the Central Government by notification in the Official Gazette, and different rates of duty may be levied on different grades or descriptions of coal or coke:

Provided that the Central Government may, by general or special order, exempt any special grade or grades or description of coal or coke from the levy of such duty of excise;

- (b) on all coking coal raised and despatched from the collieries in India, such additional duty of excise not exceeding five rupees per ton in the case of coal of Selected Grade A or Selected Grade B, and not exceeding two rupees per ton in the case of coal of Grade I, as may be fixed from time to time by the Central Government by notification in the Official Gazette.

Explanation.—Coal of Selected Grade A, Selected Grade B and Grade I means coal graded as such under the Colliery Control Order, 1945.

(2) Where coking coal, in respect of which an additional duty of excise has been levied and collected under clause (b) of sub-section (1), is despatched to any person for use in India and—

- (a) the use of coking coal is, in the opinion of the Central Government, essential for carrying on any industrial or other process in which such person is engaged; or
- (b) the despatch of the coking coal is made under the orders of the Board, although it was not specifically indented for by such person;
- then, the Central Government shall cause to be paid to that person a sum equivalent to the additional duty of excise so collected on the coking coal received and used by that person.

(3) All notifications issued under this section shall be laid, as soon as may be, before Parliament.

9. Imposition of customs duty.—During the period in which any duty of excise is being levied under section 8, the Central Government may, by notification in the Official Gazette, impose on all coal (including soft and hard coke) imported or brought into India from any place outside India, a duty of customs (which shall be in addition to any duty of customs for the time being leviable under any other law), at rates equivalent to the rates of duties of excise levied under section 8.

10. Collection of excise duties.—The duties of excise levied under section 8 shall be collected by such agencies and in such manner as may be prescribed.

11. Payment to the Coal Board.—The Central Government may, in each financial year, pay to the Board a sum not exceeding the net proceeds (determined in such manner as may be prescribed) of the duties of excise collected under section 8 during the preceding financial year.

12. Money received by the Board to be credited to the Fund.—(1) The sum referred to in section 11 and any other money received by the Board shall be credited to a Fund to be called the Coal Mines Safety and Conservation Fund which shall be applied by the Board, in such manner and subject to such conditions as may be prescribed, to—

- (a) meeting the expenses in connection with the administration of the Board and the furtherance of the objects of this Act;
- (b) the grant of stowing materials and other assistance for stowing operations to the owners, agents or managers of coal mines;
- (c) the execution of stowing and other operations in furtherance of the objects of this Act;
- (d) the prosecution of research work connected with safety in coal mines or conservation and utilisation of coal;
- (e) meeting the cost of administering the Fund and the expenses in connection with Advisory Committees;
- (f) the grant to State Governments, research organisations, local authorities and owners, agents or managers of coal mines of money in aid of

any scheme approved by the Central Government in furtherance of the objects of this Act;

- (g) any other expenditure which the Central Government directs to be defrayed out of the Fund.

(2) The Board shall keep accounts of the Fund, and such accounts shall be examined and audited by the Comptroller and Auditor-General of India at such times and in such manner as he deems fit and the report of the Comptroller and Auditor-General of India shall be laid, as soon as may be, before Parliament.

13. Powers of Inspectors.—(1) The Chief Inspector or any Inspector may make such examination and inquiries as he thinks fit in order to ascertain whether the provisions of this Act or of any rules and orders made thereunder are being complied with.

(2) The Chief Inspector or any Inspector may, with such assistants, if any, as he thinks fit, enter, inspect and examine at any time by day or night any coal mine in respect of which assistance is being, or has been, given under this Act, in order to ascertain the amount of sand or other materials used in stowing in the mine or to ensure that stowing or any other operation towards which assistance may be granted under this Act, has been, or is being, done effectively:

Provided that the power conferred by this sub-section shall not be exercised in such a manner as unreasonably to impede or obstruct the working of the mine.

(3) Without prejudice to the provisions of section 19 of the Indian Mines Act, 1923 (IV of 1923), the Chief Inspector or any Inspector may, by order in writing addressed to the owner, agent or manager of a coal mine, require him to take such protective measures, including stowing, in the mine as the Chief Inspector or the Inspector may think necessary, if in the opinion of the Chief Inspector or Inspector—

- (a) the extraction or reduction of pillars in any part of the mine is likely to cause the crushing of pillars or the premature collapse of any part of the workings or otherwise endanger human life or the mine, or
- (b) adequate provision against the outbreak of fire or flooding has not been made by providing for the sealing off and isolation of any part of the mine or for restricting the area that might be affected by fire or flooding, as the case may be.

(4) The powers conferred on the Inspector under sub-sections (1), (2) and (3) may also be exercised by such officers of the Board suitably qualified in this behalf as the Central Government may, by notification in the Official Gazette, specify in this behalf.

14. Application of Act IV of 1923.—The provisions of sub-sections (3) to (6) (both inclusive) of section 19 of the Indian Mines Act, 1923 (IV of 1923), shall apply to an order made under sub-section (3) of section 13 of this Act as they apply to an order made under sub-section (2) of section 19 of that Act, and all the provisions of the Indian Mines Act, 1923 except sub-section (1) of section 11 thereof, affecting committees appointed for the purposes of that Act or relating to the disposal of references made to such committees, shall apply, so far as may be, to a committee appointed to inquire into a reference under this Act and to the disposal of such reference:

Provided that the power conferred by the proviso to sub-section (6) of the said section 19 to suspend the operation of a requisition under sub-section (1) of that section shall include a power similarly to suspend the operation of an order made under sub-section (3) of section 13 of this Act.

15. Advisory Committees.—(1) The Central Government may, by notification in the Official Gazette, constitute one or more Advisory Committees consisting of such number of persons and on such terms and conditions as may be prescribed.

(2) It shall be the duty of the Advisory Committees to advise the Central Government or the Board in regard to any matter connected with the administration of the Act in respect of which their advice is sought by the Central Government, or, as the case may be, by the Board.

16. Protection of action taken in good faith.—No suit, prosecution or other legal proceedings shall lie against the Chairman or any other member of the Board or any officer thereof or any other person in respect of anything which is in good faith done or intended to be done in pursuance of this Act or of any rules or orders made thereunder.

17. Power to make rules.—(1) The Central Government may, by notification in the Official Gazette and subject to the condition of previous publication, make rules to carry out the purposes of this Act.

(2) Without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—

- (a) the measures to be taken for the purpose of maintenance of safety in coal mines or for the conservation of coal;
- (b) the levy, collection and payment of the duties of excise and the imposition, collection and payment of the duty of customs;
- (c) the appointment and terms and conditions of service of the Chairman and other members of the Board;
- (d) the powers and functions of, and the conduct of business by, the Board;
- (e) the determination of the net proceeds of the duties of excise for the purposes of section 11;
- (f) the manner in which, and the conditions subject to which, sums at the credit of the Coal Mines Safety and Conservation Fund may be applied;
- (g) the form in which the accounts of the Fund shall be kept;
- (h) the composition of any committee of inquiry which may be appointed to inquire into a reference arising out of an order passed under subsection (3) of section 13, the technical qualifications to be possessed by persons nominated thereto, and the powers and duties of such committee;
- (i) the composition of Advisory Committees, their functions, and the terms and conditions of service of members thereof;
- (j) recruitment of officers and staff to be appointed by the Board;
- (k) any other matter which has to be, or may be, prescribed.

(3) Any rule made under the provisions of this Act may provide that the contravention thereof shall be punishable with imprisonment for a term which may extend to three months, or with fine, or with both.

(4) All rules made under the provisions of this Act shall be laid, as soon as may be, before Parliament.

18. Act to apply to Government coal mines.—This Act applies also to coal mines belonging to the Government.

19. Repeals and savings.—(1) The Coal Mines Safety (Stowing) Act, 1939 (XIX of 1939) and the Coal Mines (Conservation and Safety) Ordinance, 1952 (I of 1952) are hereby repealed.

(2) Notwithstanding such repeal, anything done or any action taken (including any rules, notifications or orders made or issued) in the exercise of any power

conferred by or under the said Act or Ordinance shall be deemed to have been done or taken in the exercise of the powers conferred by or under this Act, as if this Act were in force on the day on which such thing was done or action was taken.

(3) As from the 8th day of January, 1952, all the moneys lying to the credit of the Coal Mines Stowing Fund under the Act hereby repealed shall be deemed to have been transferred to, and to vest in the Board and to form part of the Coal Mines Safety and Conservation Fund.

COAL MINES CONSERVATION AND SAFETY RULES, 1954

Arrangement of Paragraphs

CHAPTER I—PRELIMINARY

1. Short title and extent.
2. Definitions.

CHAPTER II—THE BOARD AND ITS PROCEDURE

3. Time and place of meetings.
4. Notice of meetings.
5. Presiding at meetings.
6. Quorum.
7. Disposal of business.
8. List of business.
9. Decision by majority.
10. Record of business.
11. Revision.
12. Salary and allowances of the Chairman.
13. Powers and duties of the Chairman.
14. Secretary to the Board.
15. Board's establishment.
16. Allowances of members.

CHAPTER III—COMMITTEES OF ENQUIRY

17. Committee of Enquiry.
18. Report of the Committee.
19. Remuneration of the members.

CHAPTER IV—ADVISORY COMMITTEES

20. Technical Advisory Committee (Mining).
21. Advisory Committee on Stowing.
22. Research Advisory Committee.
23. General.

CHAPTER V—LEVY AND COLLECTION OF EXCISE DUTY

24. Recovery of excise duty.
25. Declaration by consignor.
26. Weight for charge.
27. Remittance of excise duty.
28. Refunds and Recoveries.
29. Collection and assessment of excise duty on coal/or coke despatched by means other than rail, namely, road, river and tramway, etc.
30. Recovery of unpaid excise duty.
31. Review of assessment of excise duty.
32. Determination of the net proceeds of the duty of excise.

CHAPTER VI—POWERS OF THE BOARD: PENALTIES TO BE IMPOSED, ETC.

33. Coal samples for analysis.
34. Duties regarding information and inspection.
35. Orders for stowing for safety.
36. Stowing for conservation.

37. Washing for conservation.
38. Other measures for conservation.
39. Opening and reopening of Coal mines.
40. Closing of Coal mines producing coking coal.
41. Acquisition of lands and surface rights.
42. Construction of ropeways and other structures.
43. Appeal to the Central Government.
44. Power of the Central Government to recover cost.
45. Supply of copies of orders.
46. Secrecy of information obtained.
47. Penalty for contraventions of the rules.
48. Execution of protective measures directly by the Board.

CHAPTER VII—PROCEDURE FOR THE GRANT OF ASSISTANCE

49. Purposes for which assistance may be granted.
50. Application for assistance.
51. Priority among applications for assistance.
52. Form of assistance.
53. Quantum of assistance.
54. Conditions attaching to the grant of assistance.
55. Conditions attaching to the grant of loans.
56. Research.

CHAPTER VIII—ACCOUNTS AND AUDIT

57. Deposit of money.
58. Keeping of accounts in banks.
59. Budget.
60. Keeping auditing and publication of accounts.
61. Receipts and expenditure.

COAL MINES CONSERVATION AND SAFETY RULES, 1954¹

In exercise of the powers conferred by section 17 of the Coal Mines (Conservation and Safety) Act, 1952 (XII of 1952), the Central Government hereby makes the following rules, the same having been previously published as required by sub-section (1) of the said section, namely:—

COAL MINES CONSERVATION AND SAFETY RULES

CHAPTER I—PRELIMINARY

1. **Short title and extent.**—(1) These rules may be called the Coal Mines (Conservation and Safety) Rules, 1954.
- (2) They extend to the whole of India except the State of Jammu and Kashmir.
2. **Definitions.**—In these Rules, unless the context requires otherwise,—
 - (a) "Act" means the Coal Mines (Conservation and Safety) Act, 1952 (XII of 1952);
 - (b) "Central Government" includes in relation to functions delegated under sub-section (2) of section 5 of the Act to the Board, the Board acting within the scope of the authority given to it under that sub-section;
 - (c) "Chairman" means the Chairman of the Board;
 - (d) "Member" means a member of the Board appointed under Section 4 of the Act;
 - (e) "Month" means a month reckoned according to the British Calendar;
 - (f) "Section" means a section of the Act;
 - (g) "Treasury" means any Government Treasury or sub-treasury.

CHAPTER II—THE BOARD AND ITS PROCEDURE

3. **Time and place of meetings.**—(1) The Chairman may at any time call a meeting of the Board and shall do so if a requisition for that purpose is presented to him by three or more members.
- (2) The meetings of the Board shall, unless the Chairman in any case otherwise directs, be held in Calcutta.

¹ These Rules were published under the Ministry of Production Notification No. S.R.O., 3146, dated the 25th September, 1954.

4. Notice of meetings.—As far as possible notices of the time and place of any intended meeting of the Board signed by the Chairman or the Secretary shall be delivered at or posted to the usual place of residence of every member present in India not less than seven clear days before the date of the meeting. Provided that an emergent meeting may be called by the Chairman at any time.

5. Presiding at meetings.—The Chairman shall preside at every meeting of the Board at which he is present. If the Chairman is absent from a meeting and it is not expedient to adjourn the meeting the members present shall elect one of their member to preside over the meeting and the member so elected shall at that meeting exercise all the powers of the Chairman.

6. Quorum.—No business shall be transacted at a meeting of the Board unless at least three members including the Chairman are present:

Provided that if at any meeting less than three members including the Chairman are present, the Chairman may adjourn the meeting to a date not less than seven days later and inform the members present and notify other members that he proposes to dispose of the business at the adjourned meeting irrespective of there being a quorum, and it shall thereupon be lawful to dispose of the business at such adjourned meeting irrespective of the number attending.

7. Disposal of business.—(1) Every question upon which the Board is required to deliberate shall be considered either at its meetings or, if the Chairman so directs, by sending the necessary papers to members for opinion:

Provided that the papers need not be sent to any member who is absent from India.

(2) When a question is referred for opinion, any member may request that the question be considered at a meeting of the Board, and thereupon the Chairman may, and if the request is made by three or more members shall direct that it be so considered.

8. List of business.—(1) The Chairman shall send or cause to be sent to each member present in India, along with the notice of the meeting or as soon as possible thereafter, a list of business to be disposed of at that meeting.

(2) No business which is not on the list shall be considered at a meeting without the permission of the Chairman.

9. Decision by majority.—(1) Every question at a meeting of the Board shall be decided by a majority of votes of the members present and voting on that question.

(2) Every question referred to the members for opinion shall, unless the Chairman reserves it for consideration at a meeting be decided in accordance with the opinion of the majority recording opinions.

(3) In the case of an equal division of votes the Chairman shall exercise an additional vote and in the case of an equal division of opinion, the opinion of the Chairman shall prevail.

10. Record of business.—A record shall be maintained of all business transacted by the Board, copies of which shall be submitted to the Central Government.

11. Revision.—(1) The Central Government may for reasons to be recorded in writing review any decision of the Board and pass such orders in the matter as it thinks fit.

(2) The Board shall give effect to all orders passed by the Central Government under sub-rule (1).

12. Salary and allowances of the Chairman.—(1) The Chairman shall be paid such salary and allowances from the Fund as the Central Government may from time to time fix.

(2) The Chairman shall also be paid from the Fund travelling allowances for journeys performed by him in his official capacity, at the same rates and on the same conditions as are prescribed by rules in the case of officers in the employ of the Central Government drawing the same salary as the Chairman.

(3) When the Chairman is in the permanent service of the Government contributions on account of the Chairman's pension, Provident Fund, leave salary and passages shall be paid from the Fund at such rates as may be fixed by the Central Government.

(4) Save and except as permitted by the Central Government the Chairman shall not engage in any trade or profession or undertake any employment or duties other than his duties under the Board.

(5) In any case not provided for in sub-rule (3), the Central Government may grant to the Chairman leave on like terms and conditions as are prescribed by the Central Government. Leave salary payable in respect of such leave may be paid from the Fund.

13. Powers and duties of the Chairman.—(1) The Chairman shall be responsible for the proper functioning of the Board and the implementation of its decisions and the dis-

charge of its duties under the Act and he may in his discretion refer any matter to the Central Government for orders.

(2) Subject to the control of the Chairman the Secretary or such other officer as may be appointed for the purpose of this rule, shall be the Principal Executive Officer of the Board and, as such, he shall—

- (a) present all important papers and matters to the Board as early as practicable;
- (b) issue directions as to the method of carrying out the decisions of the Board;
- (c) grant or subject to a resolution by the Board authorise some other person to grant, receipts on behalf of the Board for all moneys received under the Act;
- (d) maintain or cause to be maintained an account of the receipts and expenditure of the Board; and
- (e) present an annual draft report on the working of the Board to the Board for approval and submit the report in the form approved by the Board to the Central Government.

(3) The Chairman may sanction expenditure on contingencies supplies and services and purchase of articles required for the working of the office of the Board and required for the execution of measures in furtherance of the objects of the Act subject to budget provisions to the condition that the expenditure on any single object or item of work does not exceed Rs. 1,000:

Provided that the Chairman may in writing delegate such of his powers under this sub-rule to the Secretary or other officer of the Board as he considers appropriate.

14. Secretary to the Board.—(1) The Secretary to the Board shall be a person appointed by the Central Government in consultation with the Board and his remuneration and terms of service shall be as laid down by the Central Government.

(2) The Secretary shall perform such duties as are imposed upon him by these rules and such other duties as may be assigned to him by the Board or by the Chairman.

15. Board's establishment.—(1) (a) The Board shall, from time to time appoint such other establishment and fix the salaries and allowances of all officers and servants to be employed by it, and may require security to be taken from such of them and to such amount as it thinks fit; the scales of pay allowed by the Board for the staff shall, as far as possible, correspond to the scales applicable to similar posts under the Government of India:

Provided that no post the maximum salary of which exceeds rupees five hundred per mensem shall be created without the previous sanction of the Central Government.

(b) The posts of officers of the Board shall be divided into two classes corresponding to class I and II posts of Gazetted officers of the Central Government.

(2) (a) All vacancies for direct recruitment of officers and staff of the Board shall be advertised in the principal newspapers in India and simultaneously notified to the Regional Employment Exchange at Calcutta.

(b) A statement of all applications received from candidates and recommendations from the Employment Exchange shall be placed before a Selection Committee appointed by the Board. The Selection Committee shall recommend to the Chairman candidates suitable for the appointment in order of merit after examining the applications and interviewing or testing the candidates:

Provided that the Board shall act as the Selection Committee in respect of appointments to the posts of officers.

(c) If a vacancy in the Board's establishment is to be filled up by promotion, the cases of all the candidates for promotion shall be examined by a Promotion Committee set up by the Board and the recommendations of the Committee shall be placed before the authority competent to make the appointment.

Provided that for appointments to the posts of officers the Board shall perform the functions of the Promotion Committee.

(3) Subject to the scale of establishment fixed under sub-rule (1) and subject to the provisions of sub-rule (2) the Chairman shall have power to appoint, dismiss, suspend, reduce or grant leave to any person in the service of the Board:

Provided that—

- (i) no person shall be appointed to, or dismissed from, an office the maximum salary of which exceeds rupees five hundred without the sanction of the Central Government;
- (ii) no person shall be appointed to, or dismissed from, an office the maximum salary of which exceeds rupees two hundred and fifty but does not exceed rupees five hundred without the sanction of the Board at a meeting;

- (iii) the grant of leave, pay and allowances to officers and servants of the Board, who are not Government servants, shall be regulated by rules made by the Board; and
- (iv) the grant of leave, pay and allowances to a Government servant, whose services have been lent or transferred to the Board shall be regulated according to the appropriate rules framed by the Central Government and applicable to such Government servant.

(4) In exercising the powers conferred by clause (c) of sub-rule (2) the Board shall apply the principles of the rules, framed by the Central Government for the corresponding classes of Government servants.

(5) Save with the previous sanction of the Central Government, no travelling allowance shall be paid to any officer or servant of the Board in excess of the amount which would be admissible under the Supplementary Rules framed by the Central Government to a Government servant of the corresponding grade.

16. Allowances of members.—(1) A Government servant appointed as a member shall be paid for attending a meeting of the Board such travelling allowance from the Fund as would be admissible to him under the appropriate rules if the journey had been performed on Government duty.

(2) A member performing a journey on the business of the Board with the approval of the Chairman shall be paid from the Fund, such travelling allowance as would be admissible to him under the appropriate rules if the journey had been performed on Government duty.

CHAPTER III—COMMITTEES OF ENQUIRY

17. (1) The Central Government may appoint a Committee of Enquiry to inquire into a reference arising out of an order under sub-section (3) of section 13 and such Committee shall consist of—

- (a) the Chairman or a member of the Board as Chairman;
- (b) (i) a person holding a first class colliery manager's certificate of competency nominated by the Chairman and qualified by experience to dispose of the question referred to the Committee;
- (ii) a person who shall be appointed to represent the interest of persons employed in the mine.

(2) No person shall be appointed to the Committee who is an officer of the Board or of the Department of Mines.

18. (1) The Committee shall hear and record such information as the Board or the owner, agent or manager of the coal mine concerned may place before it; and may also obtain the opinion of such other person as it may deem appropriate.

(2) The Committee shall report its findings to the Central Government.

(3) On receiving such report the Central Government may pass such orders as it deems appropriate.

(4) The decision of the Central Government shall be binding on the Board and the owner, agent or manager of the coal mine.

19. The Members of a Committee of Enquiry shall be paid from the fund such remuneration, in addition to their actual travelling expenses in connection with the work of the Committees, as the Central Government may fix.

CHAPTER IV—ADVISORY COMMITTEES

[Constituted by the Central Government under Section 15(1) of the Act]

20. Technical Advisory Committee (Mining).—(1) The Technical Advisory Committee (Mining) shall be composed of the following members:—

- (a) a technically qualified member of the Board or a person nominated by the Board—Chairman;
- (b) the Chief Inspector of Mines or an Inspector nominated by him;
- (c) the Mining Adviser, Government Railways or a person, in the service of Government having suitable mining qualifications nominated by the Board;
- (d) Director of Geological Survey of India or his nominee;
- (e) such representatives of the mining or labour interests concerned as the Committee or the Board may deem necessary and appropriate to co-opt for its deliberations;

An Inspecting Officer of the Board will act as Secretary to the Committee.

(2) The Committee will advise the Board in matter arising out of conservation of coking coal and certain aspects of stowing and the terms of reference to the Committee shall be as follows:—

- (a) to recommend raising quotas in each colliery working Selected 'A', Selected 'B' Grade I and Grade II coking coal and such other coal, as may be specified by the Board from time to time, consistent with safety and future extraction without undue loss of coal and undue increase in cost;
- (b) to examine the economics of restrictions of output of coking coal and the effect of such restriction on the cost of production of the colliery.
- (c) to examine or assess the necessity of and to advise on mining in the colliery, in which restriction of output is recommended, of other seams having coking coal or coal which on beneficiation is likely to yield coking coal or coal suitable for blending or coal of any other variety, including non-coking coal;
- (d) to advise on the necessity and extent of stowing for safety or conservation of coal;
- (e) to examine or assess the necessity of installation of beneficiation plant at collieries where such beneficiation is likely to yield economically coking coal or coal suitable for blending;
- (f) to advise on other allied or incidental matters which may be specifically referred to the Committee by the Board.

(3) The Committee may consult or obtain information from such persons as it deems appropriate.

21. Advisory Committee on Stowing.—(1) The Advisory Committee on stowing shall be constituted as follows:—

- (a) a member of the Board nominated by the Board—Chairman;
- (b) the Chief Inspector of Mines in India or his nominee;
- (c) the Director, Fuel Research Institute or his nominee;
- (d) two representatives to be nominated by the Indian Mining Association and one representative each by the Indian Mining Federation and Indian Colliery Owners' Association.

An officer of the Coal Board shall be nominated as Secretary of the Committee by the Chairman.

(2) Each nominated member may be assisted by one adviser to be nominated by the respective associations, who shall possess a first class colliery manager's certificate of competency and have knowledge of stowing.

(3) A nominated member shall hold office for a period of one year and shall be eligible for re-nomination.

(4) A nominated member may resign his office by letter addressed to the Chairman of the Board.

(5) Not later than 15 days after the occurrence of a vacancy in the case of a nominated member or at any time within one month of the date when a vacancy will occur in the ordinary course of events the body concerned shall on receipt of advice from the Board communicate to the Chairman a nomination to fill the vacancy and the nomination shall be effective when accepted by the Central Government.

(6) The Committee shall advise the Board on such matters, relating to stowing for safety and conservation in coal mines and the grant of assistance for stowing in coal mines, as may be referred to it by the Board.

22. The Research Advisory Committee.—(1) The Research Advisory Committee shall be composed of the following members:—

- (a) a member of the Board nominated by the Board—Chairman.
- (b) the Chief Inspector of Mines in India;
- (c) the Director, Fuel Research Institute;
- (d) the Principal, Indian School of Mines and Applied Geology;
- (e) the Principal, College of Mining and Metallurgy, Benares Hindu University;
- (f) two Mining Engineers having special knowledge of stowing and research connected therewith to be nominated by the Board.

An officer of the Board shall be nominated as Secretary to the Committee.

(2) The members of the Committee except the Chairman, the Chief Inspector of Mines in India, the Director, Fuel Research Institute and the Principal, Indian School of Mines and Applied Geology shall hold office for a period of 3 years but shall be eligible for re-appointment.

(3) The Committee shall advise the Board regarding the nature and extent of research to be undertaken by the Board, the problems to be investigated, the schemes of research to be assisted by the Board and also examine periodically the reports submitted by the Investigating Officer.

(4) The Committee shall publish half-yearly reports showing the research work done by it and the use to which such research work has been put by the collieries.

23. General.—(1) Each non-official member including a co-opted member of an Advisory Committee shall be paid for attending a meeting of the Committee such remuneration as may be fixed by the Central Government and the actual travelling expenses incurred by him in attending a meeting or for any other purpose in connection with the business of the Committee.

(2) Each Government servant appointed or co-opted as a member of a Committee shall be paid for journeys connected with the business of the Committee such travelling allowance from the funds of the Board as may be admissible to him under the appropriate rules if the journey had been performed on Government duty.

(3) Travelling allowance and remuneration at such scales as may be fixed by the Board with the approval of the Central Government may also be paid to such other persons as with the approval of the Board are required to assist or advise the Board or any of the Advisory Committees.

(4) The Chairman of the Board may issue instructions regarding the conduct of the business of the Committees, maintaining records of the proceedings of the Committees and such other matters as he may deem appropriate.

(5) All proceedings of meetings of the Advisory Committees and all recommendations of the Committees shall be placed before the Board.

CHAPTER V—LEVY AND COLLECTION OF EXCISE DUTY

24. Recovery of excise duty.—(1) The duties of excise imposed under section 8 on on coal and coke shall be recovered:—

(i) When such coal or coke is despatched by rail from collieries by the Railway administrations concerned, by means of surcharge on freight:—

(a) from the consignor, if the freight charges are being prepaid at the forwarding station,

(b) from the consignee, if the freight charges are collected at the destination of the consignment,

(c) from the party paying the freight, if the consignment is booked on the "weight only" system:

Provided that in all cases where coal or coke is despatched by rail from collieries to any station outside India, the duty of excise shall be recovered from the consignor at the forwarding station.

(ii) When such coal or coke is despatched from collieries by means other than rail, namely, by road, river and tramway from the owner of the colliery concerned and collected in the manner provided in rules 29 to 31.

(2) In calculating the amount of duty of excise payable on any one consignment any fractions of an anna shall be rounded off to the nearest anna.

25. Declaration by consignor.—All consignments of coke from collieries tendered for despatch by rail, shall be accompanied by a declaration advice note in which the consignor or his agent shall describe the consignment as either "soft coke" or "hard coke", according to the nature of the consignment.

26. Weight for charge.—For the purpose of the levy of the excise duties, the actual weight of a consignment rounded off to the nearest ton shall be taken into account.

27. Remittance of excise duty.—The total amount of excise duty collected by each Railway administration less—

(a) refunds and the amounts written off authorised by the Railway administration under sub-rule (1) of rule 28,

(b) a deduction of such percentage, as the Central Government may, by notification in the official Gazette, fix towards the cost of collection,

shall under advice to the Accountant-General, West Bengal and the Chairman, Coal Board be remitted quarterly to the Reserve Bank of India at Calcutta for the credit of the Central Government in a special account.

28. Refunds and Recoveries.—(1) Where the amount of the excise duty due under these rules has not been collected either wholly or in part or where the amount collected is in excess of the amount due, the Railway administration shall deal with the undercharge or overcharge, as the case may be, on the same principles as apply to undercharges or overcharges in regard to Railway freight charges.

(2) When it is proved to the satisfaction of the Board or any person authorised in this behalf by the Board, that any coal, on which the duty of excise under clause (a) sub-section (1) of section 8 had previously been collected, has been used in the manufacture of any coke on which also the duty has been collected, the Board or the person authorised in this behalf by the Board may order refund of an amount equal to the duty collected on such coal to the person from whom such duty was collected.

(3) A similar refund on the conditions mentioned in sub-rule (2) may be allowed in respect of the duty of excise collected on raw coal during its transport to a washery in cases where duty of excise is again collected on the washed coal despatched from the washery to the consuming centres:

Provided that—

(i) no claim for such refund shall be entertained unless it is preferred within one year from the end of the quarter to which the claim relates; and

(ii) refunds under this sub-rule shall be allowed after deductions of such percentage as the Central Government may by general or special order fix as the cost of calculation of such duty.

(4) When it is proved to the satisfaction of the Board or any person authorised in this behalf by the Board that coking coal in respect of which an additional duty of excise has been levied and collected under clause (b) of sub-section (1) of section 8 is despatched to any person for use in India and—

(a) the use of coking coal is, in the opinion of the Central Government or if the power is delegated to the Board in the opinion of the Board essential for carrying on any industrial or other process in which such person is engaged; or

(b) the despatch of the coking coal is made under orders of the Board, although it was not specifically indented for by such persons:

the Board may order the payment to that person of a sum equivalent to the additional duty of excise collected on the coking coal received and used.

(5) The Board may determine the procedure for submission of claims for refund of excise duty under sub-rules (2), (3) and (4).

29. Collection and assessment of excise duty on coal/or coke despatched by means other than rail, namely, road, river and tramway, etc.—(1) Every owner, agent or manager of a colliery shall maintain a register in such form as may be determined by the Board showing quantities of coal, soft coke or hard coke despatched during a month by means other than rail. The amount of excise duty payable during a month at the rates prescribed under section 8 shall be calculated and recorded by the owner in the register itself.

(2) Every owner shall be deemed to have been provisionally assessed to an amount calculated and recorded under sub-rule (1) as payable during a month and he shall pay the same into the treasury, the remittance being creditable to the Central Government in a special account. The payment shall be made on or before the last day of the month following the month for which payment is due.

(3) The payment under sub-rule (2) shall be made by means of a challan. The treasury shall return two copies of the challan to the depositor who shall keep one copy for himself and transmit the other copy under sub-rule (4) to the Chairman.

(4) Every owner of a colliery shall submit to the Chairman such monthly return as may be prescribed by the Board showing quantities of coal, soft coke or hard coke despatched during a month by means other than rail, the amount paid under sub-rule (2) and other particulars. The return shall be supported by a copy of the challan returned under sub-rule (3) by the treasury. The Board may determine the manner in which such monthly return shall be submitted.

(5) The return under sub-rule (4) shall be submitted so as to reach the Chairman on or before the last day of the month following the month for which it is due.

(6) (a) The final assessment of the excise duty due from a colliery under clause (ii) of sub-rule (1) rule 24 shall be made by the Chairman after examination of the said return and/or other relevant documents if any, as may be available. For the purpose of final assessment under this sub-rule the Chairman may depute a duly authorised officer to inspect and examine the account books and other records maintained at the premises of

the colliery or may require by notice in the form and manner prescribed by the Board, the owner to produce either personally or by his authorised representative the said records before the authorised officer at the time and place (with the District in which the colliery is situated) specified in the notice. The officer deputed by the Chairman shall be afforded all the necessary facilities at the premises of the colliery for the purpose of inspection and examination under this sub-rule.

(b) if the owner has paid under sub-rule (2) and has submitted return under sub-rule (4) the Chairman shall either confirm that the amount of duty provisionally assessed under sub-rule (2) is final and send an intimation to that effect to the owner concerned or where necessary shall assess the additional amount and issue a notice in the form prescribed by the Board calling upon the owner to pay into the treasury by a specified date the further amount in the manner provided in sub-rule (3).

(c) If the owner has not made any payment under sub-rule (2) and has not submitted a return under sub-rule (4) the Chairman shall, after giving the owner a reasonable opportunity of being heard in the manner determined by the Board assess him to such an amount of excise duty as in his opinion is fit and proper and issue a notice in the form determined by the Board calling upon him to pay the full amount into the treasury by a specified date in the manner provided in sub-rule (3).

30. Recovery of unpaid excise duty.—(1) Any dues of excise duty remaining unpaid after the date specified by the Chairman shall be recovered from the owner as an arrear of land revenue and shall be credited to the Central Government.

(2) The Chairman shall apply to the Collector of the District in which the colliery is situated for the recovery of the amount of excise duty remaining unpaid.

(3) The Collector shall by the 10th of each month send monthly reports to the Chairman showing the amount recovered and deposited in the treasury.

31. Review of assessment of excise duty.—(1) Any owner may submit an application to the Chairman, for a review of an order of assessment under clause (b) and clause (c) of sub-rule (6) of rule 29 of excise duty within 30 days of receipt of notice of such assessment:

Provided that no such application shall be entertained unless the amount assessed has already been paid in the manner provided in sub-rule (3).

(2) If it is proved to the satisfaction of the Chairman that the excise duty assessed and paid by any owner is in excess of the amount due, he shall order the refund to the owner of such amount as may have been paid in excess.

(3) If, on the other hand, the Chairman is satisfied after examination of the records in his office and after hearing the owner that the assessment has been made correctly he shall confirm his order of assessment and the order of the Chairman shall be final.

32. Determination of the net proceeds of the duty of excise.—(1) For the purpose of section 11, the net proceeds of the duty of excise realised under section 8 in a financial year shall be determined separately in respect of each Railway administration collecting such duty and certified as soon as possible after the close of the financial year by such officers as the Central Government may appoint in this behalf.

(2) In determining the net proceeds under sub-rule (1) the officers shall take into account the total amount of the duty collected, the refunds granted and the amounts written off sanctioned by the Railway administration during the year, and the deduction towards the cost of collection fixed by the Central Government in accordance with these rules.

(3) The proceeds of excise duty collected in a financial year on coal, soft coke or hard coke despatched by means other than rail shall be determined and certified as soon as possible after the close of the financial year by such officer as may be appointed by the Central Government.

(4) The certificates under sub-rule (1) shall be sent to the Central Government and copies thereof to the Accountant General, West Bengal and the Coal Board and the certificate under sub-rule 3 shall be sent to the Central Government and copies thereof to the Accountant General concerned and the Coal Board by the officers concerned.

CHAPTER VI—POWERS OF THE BOARD: PENALTIES TO BE IMPOSED, ETC.

33. Coal samples for analysis.—(1) The Board may for determining the grade and type of coal in any coal mine authorise in writing any Technical Officer of the Board or of the Central Government suitably qualified in this behalf to draw samples of coal for analysis from any seam or section of a seam of the coal mine and the owner, agent or manager, of the coal mine shall afford reasonable facilities to the officer so authorised for the collection of such samples.

(2) Grading will be done in accordance with the specifications prescribed by the Central Government from time to time for the purposes of the Colliery Control Order, 1945.

34. Duties regarding information and inspection.—(1) Every owner, agent or manager of a coal mine shall on request promptly furnish to the Board such information and plans as may be required by the Board for any purpose in furtherance of the objects of the Act.

(2) Every owner, agent or manager of a mine shall afford the members of the Board or of any Advisory Committee constituted by the Central Government under section 15 of the Act or any person duly authorised by the Board all reasonable facilities as may be necessary for carrying out the objects of the Act.

35. Orders for stowing for safety.—(1) Any order issued by a competent authority under sub-section (3) of section 13 of the Act shall be complied with by the owner, agent or manager of a colliery within the period prescribed therein and failure to do so shall be deemed to be a contravention of this rule.

(2) Before an order is issued by the Board in exercise of the powers delegated to it by the Central Government for stowing for safety under clause (a) of sub-section (2) of section 7 or by an officer duly authorised under sub-section (4) of section 13, a duly qualified Inspecting Officer of the Board shall be deputed to inspect the mine and draw up plans of the areas to be stowed and to submit a report to the Board giving the details of the danger to the mine or neighbouring mines, the period within which stowing should be done, the areas to be stowed, the material to be used, the method of stowing to be adopted and the estimated cost of such stowing.

(3) The report may be referred by the Board to an Advisory Committee constituted under section 15 and the views of the Advisory Committee shall be considered by the Board.

(4) An order for stowing for safety shall detail the measures to be undertaken by the owner, agent or manager of the coal mine and the reasons therefor and the dates within which they should be commenced and completed and shall be accompanied by the plan of the area to be stowed.

36. Stowing for conservation.—(1) For the purpose of conservation of coal the Central Government may under sub-section (1) of section 7 issue or cause to be issued an order in writing requiring the owner, agent or manager of any coal mine to undertake stowing in such manner and within such period as may be prescribed in the order.

(2) The Central Government shall require an Inspecting Officer or Inspecting Officers to submit a report in regard to the colliery or collieries where, if stowing for conservation is not adopted, there will be a loss of coal which should be avoided in the public interest by the adoption of stowing.

(3) The Central Government may call for and consider the opinion of an Advisory Committee constituted under section 15 of the Act in regard to the necessity for stowing for conservation in any coal mine or mines.

(4) On consideration of the report of the Advisory Committee the Central Government shall from time to time determine the grade or grades, if any of coal other than coking coal or coal which on beneficiation is likely to yield coking coal or coal suitable for blending which are required to be conserved and the colliery or collieries which should carry out stowing operations to ensure the maximum percentage of extraction of coal.

(5) An order for stowing for conservation shall detail the measures to be undertaken by the owner, agent or manager and the reasons therefor and the dates within which they should be commenced and shall be accompanied by a plan of the area to be stowed.

37. Washing for conservation.—(1) Before the issue of an order requiring the owner, agent or manager of a colliery to take steps to beneficiate the coal produced from the colliery, the Central Government shall consider the washability characteristics of the coal, adequacy of transport facilities, the cost of washing, the disposal of middlings and such other matters as will make coal washing economically feasible.

(2) The views of an Advisory Committee constituted under section 15 of the Act may be called for and considered before the issue of an order specified in sub-rule (1).

(3) If the coal washery is to be installed by the owner, agent or manager of the mine specified in the order, the capacity of the washing plant to be installed, the grade or grades of coals that are required to be washed, the specified standard of the washed product and the nature and extent of the assistance that may be given by the Board shall be specified in the order.

(4) In such circumstances as may be considered expedient or appropriate, the owner, agent or manager of a colliery may by order in writing be required to get his coal washed at any central washery.

38. Other measures for conservation.—(1) The Central Government may by order in writing, served on the owner, agent or manager of a coal mine specify the maximum quantity of coal of any grade or grades that shall be produced during a specified period in accordance with any policy of coal conservation as may be determined by the Board.

(2) The Central Government may by order in writing, served on the owner, agent or manager of a coal mine require the method of working in any Coal mine or seams to be modified in such manner as it deems necessary for the purpose of ensuring the conservation of coal.

(3) The Central Government may by order in writing served on the owner, agent or manager of a colliery prohibit the carrying out of depillaring operations in the colliery or a seam without stowing or the splitting of pillars as a final mining operation in a colliery or a seam or any other operations connected with mining, which in the opinion of the Central Government may result in undue loss of coal, spread of fire or flooding.

(4) The owner, agent or manager of a coal mine shall give notice in writing to the Board of his intention to depillar in any coal seam or of his intention to split pillars in any seam as a final operation in mining and such notice shall be given at least one full month before the date of commencement of such mining operations provided that no notice need be given where the depillaring is carried out with the aid of stowing.

(5) The Central Government may issue such directions as it deems fit restricting the supply of coking coal of any grade or grades or qualities to specified consumers in accordance with any policy of coal conservation as may be determined by the Board.

(6) The Central Government may by order in writing require the owner of any steel works, blast furnace or coke oven, using coking coal to undertake blending for conservation of coal in accordance with such procedure as may be determined by it from time to time.

39. Opening and reopening of Coal mines.—(1) No coal mine or seam shall be opened and no coal mine or seam the working whereof has been discontinued for a period exceeding six months shall be reopened and no operation shall be commenced without the prior permission in writing of the Board and except in accordance with such directions as the Board may give.

(2) When the coal produced in any coal mine or seam has not been graded, the Board shall when granting permission under sub-rule (1) require the owner to apply for a certificate of the grade or grades of coal produced in each seam of the coal mine. The owner shall accordingly submit an application in the manner prescribed by the Board.

(3) The Board shall grant a provisional grade on the basis of the seam sample. When the coal is allowed to be despatched on the basis of the provisional grade the Board shall have power to draw wagon samples in the presence of a representative of the colliery to determine the quality of the coal pertaining to the seam or seams. On the basis of the wagon sample drawn on at least three different days the final grade of the seam or seams of the particular colliery will be fixed by the Board.

(4) No coal shall be despatched from a coal mine without getting certificate of grade under sub-rule (3) indicating the grade or grades of coal to be produced and despatched and no two grades of coal shall be mixed before despatch without the prior permission in writing of the Board.

(5) In the case of any coal mine producing more than one grade of coal, the owner agent or manager shall make such arrangements as may be required by the Board to ensure that different grades of coal are not mixed before despatch.

40. Closing of Coal mines producing coking coal.—Save where a coal mine is abandoned or closed owing to unforeseen or uncontrollable natural causes such as fire or flood, the owner of the coal mine shall give notice in writing of his intention to close the mine, or any seam containing coking coal, to the Chairman, Coal Board, not less than three months before the date on which it is proposed to close the mine or the seam stating briefly the reasons for the intended closure.

(2) Within 15 days of the receipt of the notice referred to in sub-rule (1), the Chairman, Coal Board, may intimate the owner of the colliery of the intention of the Board to examine the case in the interest of conservation of coking coal.

(3) A coal mine or seam in respect of which an intimation under sub-rule (2) is given to the owner, shall not be closed and mining operations shall not be stopped except with the written permission of the Board.

41. Acquisition of lands and surface rights.—For the due furtherance of the objects of the Act, the Board may acquire any lands or other surface rights or the right to remove sand from river beds and may dispose of surplus lands or surface rights or the rights to remove sand from river beds in its possession in accordance with rules to be

framed by the Board with the approval of the Central Government or subject to such directions as may be given by the Central Government.

42. Construction of ropeways and other structures.—(1) The Board may construct or cause to be constructed ropeways and such other works or structures as may from time to time be required.

(2) Before any owner, agent or manager of a coal mine constructs a ropeway or other works (or structures) for excavating, loading, unloading or conveying of sand or other material for stowing in coal mines and obtains lease of a site to take sand from a river, he shall seek the approval of the Board to the scheme for which the installation or the lease, as the case may be, is considered necessary and such approval shall not ordinarily be withheld unless the scheme is likely to interfere with arrangements for the supply of sand or other stowing material to other coal mines or for other reasons which are to be recorded in writing.

(3) Before any owner, agent or manager of a coal mine installs any stowing plant not referred to in sub-rule (2) or washing plant he shall seek the prior approval of the Board for such an installation.

43. Appeal to the Central Government.—If the owner, agent or manager of a coal mine has any objection to any order issued by the Board under rules 35, 36, 37, 38, sub-rule (3) of rule 39, 40, 41, or sub-rules (2) (3) of rule 42 or rule 44 may, within 30 days of receipt of the order appeal against the same to the Central Government which may confirm, modify or cancel the order, as it deems necessary. A copy of such appeal shall be forwarded by such owner, agent or manager to the Coal Board:

Provided that on receipt of notice of appeal from the owner, agent or manager of a coal mine the operation of orders under rules, 35, 36, 37 or 38 shall be suspended, pending the decision of the Central Government save and except in such case where compliance with such order is considered by the Board to be urgent.

44. Power of the Central Government to recover cost.—The Central Government or with the approval of the Central Government the Board may recover from the owner, agent or manager of a colliery either wholly or partially the cost of such measures or operations as are undertaken under section 6 if it is satisfied on consideration of all facts and circumstances that such recovery of cost is justified.

45. Supply of copies of Orders.—(1) A copy of every order issued by the Board under rules 35, 36, 37, 38 and 39 shall be forwarded to the Chief Inspector and the Coal Commissioner.

(2) A copy of every application received under sub-rule (1) of rule 39 shall be sent to the Chief Inspector and the Coal Commissioner.

(3) A copy of every order issued by the Chief Inspector or an Inspector under sub-section (3) of section 13 shall be forwarded forthwith by such Chief Inspector or Inspector to the Board.

46. Secrecy of information obtained.—(1) All copies of, and extracts from registers, plans and other records appertaining to any mine and all other information acquired by a member of any Advisory Committee constituted, under section 15 of the Act or by any person referred to in sub-rule (2) of Rule 34 shall be regarded as confidential and shall not be disclosed to any person or authority unless the Chairman of the Board considers disclosure necessary to ensure safety or the conservation of coal.

(2) Nothing in sub-rule (1) shall apply to disclosure of such information (if so required) to:—

(a) any Court;

(b) a Mining Board, Committee or Court of Enquiry constituted or appointed under section 12, section 13 or section 24 of the Mines Act, 1952, as the case may be.

(3) If any person referred to in sub-rule (1) discloses, contrary to the provisions of this rule any such information as aforesaid without the consent of the Central Government or the Chairman, Coal Board, he shall be punishable with imprisonment for a term which may extend to three months or with fine or with both.

(4) No court shall take cognizance of any offence under the rule except with the previous sanction of the Central Government.

47. Penalty for contraventions of the rules.—(1) Any contravention of these rules shall be punishable with imprisonment which may extend to three months or fine or both.

(2) No prosecution shall be instituted against any owner, agent or manager of a coal mine for any offence under these rules except with the sanction of the Board and at the instance of the Chairman of the Board.

48. Execution of protective measures directly by the Board.—(1) The Board may prescribe the procedure to be followed for the submission of reports by the Inspecting

Officer of the Board or the Chief Inspector of Mines and the examination of cases where it is necessary or expedient for the Board to undertake any protective measures under section 6.

(2) The Board may, for reasons to be recorded in writing, sanction the payment from the Fund of the full cost of any protective measures undertaken under section (6) provided that:

- (i) subject to the provisions of clause (ii) of this proviso the Board shall not undertake any such protective measures without the previous sanction of the Central Government, if the estimated cost of such measures exceeds rupees one lakh.
- (ii) in the case of protective works of an emergent nature which brook no delay and are estimated to cost more than Rs. 1 lakh but not more than Rs. 5 lakhs the Board may commence the work and simultaneously apply for sanction. The actual expenditure should not in any case exceed Rs. 1 lakh until Government sanction is obtained.

CHAPTER VII—PROCEDURE FOR THE GRANT OF ASSISTANCE

49. Purposes for which assistance may be granted.—(1) The Board may grant assistance from the Fund to any owner, agent or manager of coal mine—

(a) for stowing or other protective measures which are required to be undertaken by an order issued under sub-section (3) of section 13 or sub-rule (2) of rule 35;

(b) for any measures which in the opinion of the Board are essential for the effective prevention of the spread of fire to or the inundation by water of any coal mine from an area adjacent to it;

(c) for stowing for conservation of coal or washing coal which is required to be undertaken by an order under rule 36 or 37;

(d) for the following measures voluntarily undertaken by the owner, agent or manager of the coal mine:—

- (i) stowing operations in the interests of safety or conservation of coal,
- (ii) any process of washing or cleaning coal which reduces its ash content and also improves its qualities or,
- (iii) any other measures for safety in coal mines or for conservation of coal,

(e) for any other measures undertaken by the owner, agent or manager of a coal mine under the order of the Board to ensure conservation of coal.

(2) The Board may grant assistance to owner of any steel work, blast furnace or coke plant for blending of coal undertaken under the orders of the Board.

50. Application for assistance.—(1) The Board may determine the form in which applications for assistance are to be made, the documents and the particulars which are to accompany such applications and the dates by which the applications shall be submitted.

(2) Every owner, agent or manager who requires assistance from the Fund during any financial year shall apply for such assistance in conformity with the procedure determined by the Board under sub-rule (1).

51. Priority among applications for assistance.—(1) Priority among applications under rule 49 shall be determined by the Board according to the degree of urgency of the proposed operations from the point of view of safety and of conservation.

(2) (a) Before determining priority among applications for assistance for stowing operations voluntarily undertaken for safety, the Board shall call for and consider the opinion of the Chief Inspector or of an Advisory Committee as may be expedient.

(b) The Board may call for and consider the opinion of any Advisory Committee constituted under section 15 of the Act before determining priority under sub-rule (1).

52. Form of assistance.—The Board may grant assistance from the Fund, at its discretion in each case in one or more of the following ways:—

- (i) by the grant of stowing materials;
- (ii) by the loan of stowing plant or such other plant as the Board may decide;
- (iii) by making monetary grants towards the expenses involved in carrying out the measures for which assistance is granted;
- (iv) by the grant of loan for meeting either wholly or in part expenses on the purchase and installation of stowing plant in coal mines blending plant or washing plant or any other plant for the beneficiation of coal.

53. Quantum of assistance.—(1) Assistance from the Fund shall be granted by the Board with due regard to the circumstances of each case and the Board may fix from

time to time with the approval of the Central Government the maximum rate or amount of assistance to be granted for any measure or measures for safety or conservation of coal provided that quantum of assistance for stowing for conservation undertaken under clauses (c) and (d) of sub-rule (1) of rule 49 shall not exceed the assistance granted for stowing undertaken voluntarily in the interests of safety in coal mines.

(2) Where assistance is granted in the form of a monetary grant it shall be based on the expenditure involved (including the cost of depreciation of any plant in use) as assessed by the Board for the execution of the measures for which the assistance is granted.

(3) A loan for the purchase and installation of plant shall take the form of direct payment or guarantee of payment, unto the limit of the loan sanctioned of the bills as the Board may consider necessary.

54. Conditions attaching to the grant of assistance.—Before granting assistance under these Rules, the Board shall require the owner, agent or manager of the mine to whom assistance is proposed to be granted to execute a bond with or without surety for the fulfilment of such conditions as may be imposed by the Board.

55. Conditions attaching to the grant of loans.—(1) The Central Government shall from time to time fix the rates of interest to be charged on loans granted by the Board for the purchase and installation of stowing plant, blending plant, washing plant, or any other beneficiation plant.

(2) Every such loan shall—

(a) bear interest until repayment at the rate fixed under sub-rule (1) and in force at the time of granting the loans, and

(b) shall be repayable within such time as the Board may in each case determine.

(3) The Board shall, before granting any loan, take proper security for its repayment.

56. Research.—(1) The Board may grant assistance from the Fund for the prosecution by any agency of such types of research work connected with safety in coal mines or conservation and utilisation of coal as may be authorised by the Central Government.

(2) The Board may also arrange for the prosecution of research work under its own supervision.

CHAPTER VIII—ACCOUNTS AND AUDIT

57. Deposit of money.—The sum of money received under section 11 and any other moneys received by or on behalf of the Board shall be deposited to the credit of the Coal Mines Safety and Conservation Fund in the manner provided in rule 58.

58. Keeping of accounts in banks.—(1) The current account or accounts of the Board shall be kept in such Banks as may be approved by the Central Government and all moneys at the disposal of the Board with the exception of petty cash and of moneys placed in fixed deposit or invested in accordance with the provisions hereinafter contained shall be paid into those accounts.

(2) Any funds not required for current expenditure may be placed in fixed deposit with any Bank approved in this behalf by the Central Government or invested in the name of the Board in any security in which trust property may lawfully be invested under the Indian Trusts Act, 1882 (II of 1882).

(3) The placing of money in fixed deposit and the investment thereof and disposal of moneys so placed or invested shall be subject to the sanction of the Board.

(4) Payments by or on behalf of the Board shall be made in cash or by cheques drawn against a current account of the Board.

(5) The cheque referred to in sub-rule (4) and all orders for the making of deposits or investments or for the withdrawal of such deposits or the realisation of such investments or for the disposal in any other manner of the funds of the Board shall be signed by the Secretary to the Board or an officer duly authorised in this behalf by the Board and countersigned by the Chairman or by a member authorised by the Board in this behalf.

59. Budget.—(1) The Board shall in each year prepare a budget for the ensuing financial year and shall submit it for the sanction of the Central Government on or before the 1st November.

(2) The Budget shall include statements of—

(i) the estimated opening balance;

(ii) the estimated receipts under section 11 and from other sources; and

(iii) the proposed expenditure classified under the heads specified in sub-rule (3) of rule 61 and such other heads as may be settled at a meeting of the Board.

60. Keeping auditing and publication of accounts.—(1) The Board shall keep accounts of all moneys received in and expended out of the Fund during each financial year.

(2) Such accounts shall be examined and audited as prescribed in sub-section (2) of Section 12 of the Act.

(3) The Comptroller and Auditor General may disallow any item which has in his opinion been expended out of the Fund otherwise than as directed by or under the Act or these rules.

(4) If an item of expenditure is disallowed by the Comptroller and Auditor General the Central Government may—

- (a) either remit the disallowance made by the Auditors; or
- (b) sanction the expenditure; or
- (c) direct that the amount be recovered from the person or persons responsible for the expenditure and credited to the fund, provided that no recovery under the sub-clause shall be permissible if the expenditure has been incurred in good faith; or
- (d) direct that the item disallowed shall be dealt with in such other way as the Central Government may think fit.

(5) The audited statement of receipts and expenditure together with the annual report referred to in clause (3) of sub-rule (2) of rule 13 shall be submitted to the Central Government not later than the 31st day of July in each year.

(6) An abstract statement of the accounts together with the Auditor's report thereon shall be published annually in the official Gazette.

61. Receipts and Expenditure.—(1) The accounts of receipts shall be shown under the following heads:—

- (a) a sum received under section 11;
- (b) any other moneys received;
- (c) any interest that may have accrued from the investment of such sum or moneys as aforesaid.

2. Total receipts only shall be shown under each of the heads specified in sub-rule (1) and the opening balance, if any, shall also be stated.

(3) Accounts of expenditure shall be shown under the following heads:—

- (a) administration of the Board;
- (b) other expenditure connected with the administration of the Act;
- (c) grant of stowing materials or other assistance for stowing operations to owners, agents or managers of coal mines;
- (d) other measures taken in connection with furtherance of the objects of the Act;
- (e) miscellaneous.

(4) The closing balance of the year shall be shown at the foot of the accounts on the expenditure side.

(5) In addition to the particulars required by sub-rule (3) separate statements under heads (c) and (d) referred to in that sub-rule shall be drawn up, which shall show the sums paid to each owner, agent or manager of a coal mine independently or spent otherwise

COAL GRADING BOARD ACT, 1925 (XXXI OF 1925)

Statement of Objects and Reasons¹

The object of this Bill is to carry out the most important recommendations of the Indian Coal Committee in Chapter IX of its Report. Since the war, the market for Indian coal both in India and in foreign ports has been greatly decreased, and the first finding of the Committee is that the problem of the recovery of these markets can be summed up in the two words "quality" and "price". As regards quality, the Committee summarised its recommendations as below:—

"It would be very difficult for individual exports of coal to re-establish themselves in overseas markets owing to the bad repute into which Indian coal has fallen and a Grading Board should, therefore, be immediately established which would grade collieries which produce coal for export and would arrange the issue of a Certificate for each consignment of coal exported (Paragraphs 101 and 102 of the Report).

¹ Gazette of India 1925, Part V, pages 184-85.

Any system of grading and certificates should be such as to command the confidence of buyers overseas and not to relieve the exporter of any responsibility as to quality. (Paragraph 103).

It would take too long and it would be too expensive to establish immediately a new organisation for the grading of Indian coal. (Paragraph 104).

The Organisation of the Chief Mining Engineer to the Railway Board should be utilised for the purpose of grading coal. (Paragraph 104).

The most suitable constitution for the Grading Board would be the Chief Mining Engineer as Chairman, a representative of the Indian Mining Association, a representative of the Indian Mining Federation, a nominee of the Bengal Chamber of Commerce and a nominee of the Bengal National Chamber of Commerce. The last two members would represent the consumers interest on the Board. (Paragraph 104).

The general outline is given of a scheme for classifying all Indian coals and it is suggested that a grading list should be published by the Grading Board as soon as possible, classifying the different collieries on this system and giving the analysis of their coal. (Paragraph 105).

The names of collieries should not be included in the grading list without their consent. (Paragraph 105).

* * * * *

The decision of the Grading Board as to the classification of any Colliery or seam in the grading list should be final. (Paragraph 105).

Any coal should be eligible for inclusion in the grading list. (Paragraph 105).''

2. The question of price is largely one for the collieries themselves, but the Committee has recommended that certain concessions should be given by the Railways concerned and by the Port Commissioners of Calcutta. These concessions take the form of an additional rebate of railway freight and a reduction of river duties on coal certified for export.

3. These recommendations have been agreed to by the Government of India, the Railway Administrations concerned and the Port Commissioners of Calcutta. The Committee suggested that they should be given effect to in the manner suggested at the end of paragraph 105 of its Report. But the Government of India have been unable to accept this proposal and have decided that the recommendations can be properly given effect to only by means of legislation. Hence they have embodied the recommendations of the Committee in this Bill.

COAL GRADING BOARD ACT, 1925 (XXXI OF 1925)

Arrangement of Sections

1. Short title and extent.
2. Definitions.
3. Constitution of Coal Grading Board.
4. Power to grade collieries, to revise grading and to grant certificates.
5. Maintenance and publication of grade list.
6. Grant of export certificate.
7. Powers of inspection.
8. Grant of rebate and preferences.
9. Application of fees.
10. Validity of acts of Board.
11. Protection of acts done under the Act.
12. Power of Central Government to make rules.

COAL GRADING BOARD ACT, 1925 (XXXI OF 1925)¹

[23rd September, 1925]

An Act to provide for the grading of coal and for the grant of certificates for coal intended for export.

Whereas it is expedient to provide for the grading of coal and for the grant of certificates for coal intended for export; it is hereby enacted as follows:—

1. Short title and extent.—(1) This Act may be called the Coal Grading Board Act, 1925.

(2) It extends to ²[the whole of India except Part B States].

2. Definitions.—In this Act, unless there is anything repugnant in the subject or context,—

(a) “Board” means the Coal Grading Board constituted under section 3;

(b) “export” means the shipment of coal as cargo from a port in ³[a Part A State or Part C State]

(c) “graded colliery” means a colliery the grade of all or any of the seams or of a part of any seam of which has been determined under the provisions of section 4 and is entered in the grade list maintained in accordance with the provisions of section 5;

(d) “prescribed” means prescribed by rules made under this Act; and

(e) “secretary” means the secretary of the Board appointed under sub-section (4) of section 3.

3. Constitution of Coal Grading Board.—(1) As soon as may be after the commencement of this Act, the ⁴[Central Government] shall cause to be constituted ⁵a Board consisting of the following members, namely:—

(a) The Chief Mining Engineer to the Railway Board ⁶*** and

(b) four persons nominated respectively by the Indian Mining Association, the Indian Mining Federation, the Bengal Chamber of Commerce and the Bengal National Chamber of Commerce:

Provided that, if within the period prescribed in this behalf any such body fails to make any nomination which it is entitled to make under this sub-section, the ⁴[Central Government] and ⁷[itself] appoint a member or members, as the case may be, to fill the vacancy or vacancies.

(2) The Board so constituted shall be a body incorporated by the name of the Coal Grading Board, having perpetual succession and a common seal with power to acquire and hold property, both moveable and immoveable, and to contract and shall by the said name sue and be sued.

(3) The Chief Mining Engineer to the Railway Board⁸ *** shall be ex-officio President of the Board.

(4) The Secretary of the Board shall be a person, not being a member of the Board appointed by the Board.

¹ For Statement of Objects and Reasons, see *Gazette of India*, 1925, Pt. V, p. 184; see also page 416 ante and for Report of Select Committee, see *ibid*, p. 210.

² Subs. by the A. O. 1950 for “all the Provinces of India”.

³ Subs. for “a Province of India” by Act III of 1951.

⁴ Subs. by the A. O. 1937, for “G. G. in C.”

⁵ For Constitution of the Board, see Notification No. 47 T. (57), dated 20th January, 1926, *Gazette of India*, 1926, Pt. I, p. 148.

⁶ Repealed by A. O. 1948.

⁷ Subs. by the A. O. 1937, for “himself”.

⁸ The words “or, after the establishment of the Federal Railway Authority, to that Authority” which had been ins. by the A. O. 1937 were rep. by the A. O. 1948.

4. Power to grade collieries, to revise grading and to grant certificates.—

(1) On the application of any colliery and on payment of the prescribed fee, the Board shall, in such manner as may be prescribed, determine the grade of coal of all or any of the seams or of a part of a seam of such colliery, and shall by notice in writing inform the colliery of the grade so determined.

(2) The colliery may, within thirty days from the receipt of the said notice, lodge with the Board an objection to the order passed under sub-section (1) determining the grade of any coal, and the Board shall, on payment of the prescribed fee and after further inspection and analysis, decide such objection; the decision of the Board shall be final and shall not be questioned in any Court.

(3) Where the grade of any coal has been determined under the provisions of this section, the Board shall, on the request of the colliery, furnish a certificate in the prescribed form, specifying the grade of such coal.

5. Maintenance and publication of grade list.—(1) The Board shall maintain a grade list, in such form and containing such particulars as may be prescribed, of coal the grade of which has been determined in accordance with the provisions of section 4, but shall not enter in such list any coal in respect of which the colliery has, after the determination or decision of the Board under sub-section (2) of section 4, given notice in writing that such coal should not be entered in the grade list.

(2) The grade list shall be published in such manner as may be prescribed.

6. Grant of export certificate.—(1) On the application of any graded colliery desiring to export coal and on payment of the prescribed fee, the Board shall, if it is satisfied after such inspection as it may deem necessary with the quality and condition of the coal, grant a certificate of shipment in the prescribed form.

(2) Such fee shall not exceed one anna per-ton of coal.

7. Powers of inspection.—Any member of the Board and any person authorised in this behalf by the Board may, for the purposes of this Act, enter at any time in and upon any colliery, storage bin, truck, vehicle, vessel or other place where there is coal and inspect, test and take sample of such coal.

8. Grant of rebate and preferences.—Notwithstanding anything to the contrary in any law for the time being in force, a rebate of any charges, including freight, fees, tolls, dues or rates, may be granted in respect of coal of which a certificate of shipment has been granted under the provisions of section 6, and, subject to such restrictions as may be prescribed, preference may be given in the supply of wagons for forwarding coal for export from a graded colliery.

9. Application of fees.—Subject to such conditions as may be prescribed the proceeds of fees received by the Board shall be applied to meeting the expenses of the Board.

10. Validity of acts of Board.—No act done or proceeding taken under this Act shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of, the Board.

11. Protection for acts done under Act.—No suit or other legal proceeding shall be instituted against any person in respect of anything which is in good faith done or intended to be done under this Act.

12. Power of the ⁹[Central Government] to make rules.—(1) The ⁹[Central Government] may after previous publication, by notification in the ¹⁰[Official Gazette], make rules for the purpose of carrying into effect all or any of the purposes of this Act.

⁹ Subs. by the A. O. 1937 for "G. G. in C."

¹⁰ Subs. by the A. O. 1937, for "Gazette of India".

(2) In particular and without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—

- (a) for prescribing the time within which nominations shall be made under section 3, whether in the first instance or on the occurrence of vacancies;
- (b) for prescribing the term of office of members of the Board;
- (c) for prescribing the circumstances in which and the authority by which any member may be removed from the Board;
- (d) for regulating the appointment of officers of, and the keeping and publication of accounts by, the Board;
- (e) for prescribing the procedure on application under section 4 and the principles for grading coal;
- (f) for prescribing the form of and particulars to be entered in and manner of publication of the grade list;
- (g) for prescribing the procedure of the Board in deciding any objection lodged against any order passed under section 4 determining the grade of any coal;
- (h) for prescribing the form of certificate to be granted under section 6 and the procedure on application under that section;
- (i) for prescribing the restrictions subject to which preference may be given under section 8;
- (j) for prescribing the fees for any inspection or analysis required for the purposes of this Act or payable under any of the provisions of this Act; and
- (k) for prescribing the remuneration of members and regulating the expenditure of the Board.

MINES AND MINERALS (REGULATION AND DEVELOPMENT) ACT, 1948 (LIII OF 1948)

Statement of Objects and Reasons¹

The question of Central regulation of mines and oilfields and mineral development has been engaging the attention of Government for some time. The need for Central regulation was amply illustrated in the last war when certain key minerals had to be controlled under the Defence of India Act. It is now well recognised that a planned and uniform policy of mineral development is essential to economic and industrial progress. The Industrial Policy Resolution of the 6th April, 1948 included minerals amongst the industries whose location must be governed by economic factors of all-India import or which require considerable investment or a high degree of technical skill and must consequently be the subject of Central regulation and control.

2. This Bill has accordingly been drafted under item 36 of the Federal Legislative List of the Seventh Schedule to the Government of India Act, 1935, to regulate mines and oilfields and mineral development on the lines contemplated in the Industrial Policy Resolution of the 6th April 1948. It seeks to give powers to the Central Government to frame rules for the regulation of the terms and conditions of mining leases, as also for the conservation and development of minerals. It also provides for modifications of existing leases on payment of compensation. Clause 8 provides for delegation of powers to Provincial Governments or any officers or authority as may be specified in this behalf, e.g., a Coal Commission. Clause 11 confers powers of entry and inspection on any officer authorised by the Central Government in this behalf. Finally, there is a clause prescribing penalties for contravention of any of the provisions of the Act or the rules made thereunder. The rules made under the Act will be laid before the Legislature as soon as may be after they are made, while rules relating to compensation to be paid for modification of existing leases will not be operative unless and until they are approved by the Legislature.

¹ Gazette of India, 1948, Part V, p. 601.

**MINES AND MINERALS (REGULATION AND DEVELOPMENT)
ACT, 1948 (LIII OF 1948)**

Arrangement of Sections

1. Short title, extent and commencement.
2. Declaration as to expediency of control by Central Government.
3. Definitions.
4. No mining lease to be valid unless it is in accordance with this Act.
5. Power to make rules as respects mining lease.
6. Power to make rules as respects mineral development.
7. Power to make rules for modification of existing leases.
8. Delegation.
9. Penalties.
10. Rules to be laid before the Legislature.
11. Power of inspection.
12. Relaxation of rules in special cases.
13. Act to be binding on the Government.
14. Protection of action taken in good faith.

**MINES AND MINERALS (REGULATION AND DEVELOPMENT)
ACT, 1948 (LIII OF 1948)¹**

[8th September, 1948]

*An Act to provide for the regulation of mines and oilfields and for the
development of minerals.*

Whereas it is expedient in the public interest to provide for the regulation of mines and oilfields and for the development of the minerals to the extent hereinafter specified;

It is hereby enacted as follows:—

1. Short title, extent and commencement.—(1) This Act may be called the Mines and Minerals (Regulation and Development) Act, 1948.

²[(2) It extends to the whole of India ³[except the State of Jammu and Kashmir].]

(3) It shall come into force on such date⁴ as the Central Government may, by notification in the official Gazette, appoint in this behalf.

2. Declaration as to expediency of control by Central Government.—It is hereby declared that it is expedient in the public interest that the Central Government should take under its control the regulation of mines and oilfields and the development of minerals to the extent hereinafter provided.

3. Definitions.—In this Act, unless there is anything repugnant in the subject or context,—

- (a) the expression “lessor” and “lessee” respectively include a licensor and licensee;
- (b) “mine” means any excavation for the purpose of searching for or obtaining minerals and includes an oil-well;
- (c) “minerals” include natural gas and petroleum;

¹ For Statement of Objects and Reasons, see Gazette of India, 1948, Pt. V, p. 601, see also p. 420, *ante* and for the Report of Select Committee, see *ibid.*, p. 641-642.

² Substituted by the Adaptation of Laws Order, 1950 for the former sub-section (2).

³ Substituted by the Part B States (Laws) Act, 1951 (3 of 1951) for “except the States of Hyderabad, Jammu and Kashmir, Mysore and Travancore-Cochin”.

⁴ 25th October, 1948, *vide* Notification No. M.II-155(24)-1, dated the 18th October, 1949, see Gazette of India, Extraordinary, 1949, p. 2075.

- (d) "mining lease" means a lease granted for the purpose of searching for, winning, working, getting, making merchantable, carrying away or disposing of minerals or for purposes connected therewith, and includes an exploring or a prospecting license;
- (e) "oilfield" means any area where any operation for the purpose of obtaining natural gas and petroleum, crude oil, refined oil, partially refined oil and any of the products of petroleum in a liquid or solid state, is to be or is being carried on.

4. No mining lease to be valid unless it is in accordance with this Act.—

(1) No mining lease shall be granted after the commencement of this Act otherwise than in accordance with the rules made under this Act.

(2) Any mining lease granted contrary to the provisions of sub-section (1) shall be void and of no effect.

5. Power to make rules⁶ as respects mining leases.—(1) The Central Government may, by notification in the official Gazette, make rules for regulating the grant of mining leases or for prohibiting the grant of such leases in respect of any mineral or in any area.

(2) In particular, and without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—

- (a) the manner in which, the minerals or areas in respect of which and the persons by whom, applications for mining leases may be made and the fees to be paid on any such applications;
- (b) the authority by which, the terms on which, and the conditions subject to which, mining leases may be granted;
- (c) the maximum or minimum area and the period for which any mining lease may be granted, and the terms on which leases in respect of contiguous areas may be amalgamated;
- (d) the fixing of the maximum and minimum rent payable by a lessee, whether the mine is worked or not.

6. Power to make rules⁷ as respects mineral development.—(1) The Central Government may, by notification in the official Gazette, make rules for the conservation and development of minerals.

(2) In particular, and without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—

- (a) the regulation or prohibition of the mining, quarrying or digging for or the excavating or collecting of minerals from any mine or in any area;
- (b) the manner in which and the persons by whom any mineral or any area as respects which the grant of mining leases is prohibited may be developed or worked;
- (c) the development of any mineral resources in any area by prescribing or regulating the use of any engines, machinery or other equipment;
- (d) the regulation of the drilling, re-drilling, deepening, shutting down, plugging and abandoning of oilwells in an oilfield and for the limitation or prohibition of such operations and for the taking of remedial measures to prevent waste of or damage to oil;

⁶ See the Mineral Concession Rules, 1949 published under the Ministry of Natural Resources and Scientific Research Notification No. M-II-155(24)-2 dated the 18th Oct., 1949.

⁷ See the Mineral Conservation and Development Rules, 1955 published under the Ministry of Natural Resources and Scientific Research Notification No. S.R.O. 608 dated the 15th March, 1955.

- (e) the regulation of the methods of producing oil in any oilfield, and the limitation or prohibition of such methods;
- (f) the compulsory notification of all new borings and shaft sinkings, and the preservation of boring records and specimens of cores of all new bore-holes;
- (g) the taking of samples from mines and new bore-holes;
- (h) the regulation of the arrangements for the storage of minerals and the stocks thereof that may be kept by any person;
- (i) the levy and collection of royalties, fees or taxes in respect of minerals mined, quarried, excavated or collected;
- (j) the submission by the owners or lessees of mines of special or periodical returns and reports, and the forms in which and the authorities to whom such returns and reports shall be submitted.

7. Power to make rules for modification of existing leases.—(1) The Central Government may, by notification in the official Gazette, make rules for the purpose of modifying or altering the terms and conditions of any mining lease granted prior to the commencement of this Act so as to bring such lease into conformity with the rules made under sections 5 and 6:

Provided that any rules so made which provide for the matters mentioned in clause (c) of sub-section (2) shall not come into force until they have been approved, either with or without modifications, by ⁸[the House of the People].

(2) The rules made under sub-section (1) shall provide—

- (a) for giving previous notice of the modification or alteration proposed to be made thereunder to the lessee, and where the lessor is not the Central Government, also to the lessor, and for affording them an opportunity of showing cause against the proposal;
- (b) for the payment of compensation by the party who would be benefited by the proposed modification or alteration to the party whose rights under the existing lease would thereby be adversely affected; and
- (c) for the principles on which, the manner in which and the authority by which the said compensation shall be determined.

8. Delegation.—The Central Government may, by notification in the official Gazette, direct that any power exercisable under this Act shall be exercised, subject to such conditions, if any, as may be specified therein by such officer or authority as may be specified in the direction.

9. Penalties.—(1) Any rule made under any of the provisions of this Act may provide that any contravention thereof shall be punishable with imprisonment which may extend to six months or with fine which may extend to one thousand rupees or with both.

(2) Whoever, after having been convicted of any offence referred to in sub-section (1), continues to commit such offence shall be punishable for each day after the date of the first conviction during which he continues so to offend, with fine which may extend to one hundred rupees.

10. Rules to be laid before the Legislature.—All rules made under any of the provisions of this Act shall be laid before ⁸[the House of the People] as soon as may be after they are made.

11. Power of inspection.—(1) For the purpose of ascertaining the position of the working, actual or prospective, of any mine or abandoned mine or for any

⁸ Substituted by the Adaptation of Laws Order, 1950 for "The Central Legislature."

other purpose mentioned in this Act or the rules made thereunder; any officer authorised by the Central Government in this behalf shall have the right to—

- (a) enter and inspect any mine;
- (b) order the production of any document, book, register or record in the possession or power of any person having the control of or connected with, any mine;
- (c) examine any person having the control of, or connected with, any mine.

(2) Any officer authorised by the Central Government under sub-section (1) shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code (XLV of 1860).

12. Relaxation of rules in special cases.—The Central Government may, if satisfied that it is in the public interest so to do, authorise in any case the granting of any mining lease or the working of any mine on terms and conditions different from those laid down in the rules made under sections 5 and 6.

⁹[**13. Act to be binding on the Government.**—The provision of this Act shall be binding on the Government.]

14. Protection of action taken in good faith.—No suit, prosecution or other legal proceeding whatever shall lie against any person for anything which is in good faith done or intended to be done under this Act.

MINERAL CONCESSION RULES, 1949

Arrangement of Paragraphs

CHAPTER I—GENERAL

1. Short title and commencement.
2. Saving of Act XXIX of 1948.
3. Definitions.
4. Exemption.

CHAPTER II—CERTIFICATE OF APPROVAL

5. Grant of certificate of approval.
6. Persons to whom certificate may be granted.
7. Application for certificate of approval.
8. Restricted certificate.
9. Period of certificate of approval.
10. Renewal of certificate of approval.
11. Notification of grant of certificate of approval.
12. Holder of a concession need not renew his certificate.

CHAPTER III—GRANT OF PROSPECTING LICENSE IN RESPECT OF LAND IN WHICH THE MINERALS BELONG TO GOVERNMENT

13. Restrictions on grant of prospecting licenses.
14. Application for prospecting license.
15. Application fee.
16. Acknowledgment of application.
17. State Government may grant or refuse a license.
- 17A. License to be executed within three months.
18. Priority.
19. Security deposit.
20. Register of prospecting licenses.
21. Inspection.
22. Period of grant or renewal of a prospecting license.
23. Conditions of a prospecting license.
24. Right to mining lease.
25. Report of information obtained by licensee.

⁹ Substituted for former section 13 by the Adaptation of Laws Order, 1950.

CHAPTER IV—GRANT OF MINING LEASE IN RESPECT OF LAND IN WHICH MINERALS
BELONG TO GOVERNMENT

26. Restrictions of grant of mining leases.
27. Application for mining lease.
28. Application fee.
- 28A. Lease to be executed within six months.
29. Deposit for preliminary expenses.
30. Survey of the area leased.
31. Acknowledgment of application.
32. Priority.
33. Register of mining leases.
34. Inspection of register.
35. Area of mining lease.
36. Security deposit.
37. Transfer of lease.
38. Length and breadth of the area leased.
39. Boundaries below the surface.
40. Period of lease.
41. Conditions.
42. Right of lessee.
43. Right to determine lease.

CHAPTER V—GRANT OF MINERAL CONCESSIONS BY PRIVATE PERSONS

44. Applicability of this Chapter.
45. Certificate of approval essential.
46. Conditions of prospecting license.
47. Conditions in a mining lease.
48. Transfer or assignment.
49. Submission of copy of license or lease.
50. Communication of transfer or assignment.
51. Prohibition of premium.
- 51A. Prohibition of working of mines.
52. Annual returns and statements.
53. Penalty for granting prospecting licenses and mining leases in contravention of rules.
54. Penalty for failure to furnish returns, etc.
55. Offence cognisable upon written complaint.
56. Status of Court.

CHAPTER VI—REVISION

57. Application for review.
58. Application fee.
59. Review.
60. Finality of order.

CHAPTER VII—MISCELLANEOUS

61. Direct application for mining lease.
62. Application of these rules to all renewals.
- 62A. Power to rectify apparent mistake.
63. Forwarding of copies of licenses and leases and annual return of licenses and leases.
64. Forwarding of copies or reports.
65. Saving.
66. Reference as between applications for prospecting license and mining lease.
67. Availability of areas for regrant to be signified by entry in Standard Register.
68. Premature application.
69. Partnership firm, company to intimate change in partnership firm, company, etc.

Schedules I to IV.

Annexure (1) Model Forms for the grant of mineral concessions (including certificates of approval) under the Mineral Concession Rules, 1949.

(2) Model Forms of applications for the grant of mineral concessions (including certificate of approval) under the Mineral Concession Rules, 1949.

(3) Model Form of application for review under Rule 57 of the Mineral Concession Rules, 1949.

MINERAL CONCESSION RULES, 1949¹

In exercise of the powers conferred by section 5 of the Mines and Minerals (Regulation and Development) Act, 1948, the Central Government is pleased to make the following rules for regulating the grant of prospecting licenses and mining leases for minerals other than petroleum and natural gas, namely:—

MINERAL CONCESSION RULES, 1949

CHAPTER I—GENERAL

1. **Short title and commencement.**—(i) These rules may be called the Mineral Concession Rules, 1949.

²[(i-A) These rules extend to the whole of India except the State of Jammu and Kashmir].

(ii) These rules shall come into force on the twenty-fifth day of October, 1949.

2. **Saving of Act XXIX of 1948.**—Nothing in these rules shall affect the provisions of the Atomic Energy Act, 1948.

3. **Definitions.**—In these rules, unless there is anything repugnant in the subject or context—

(i) "mining lease" means a lease to mine, quarry, bore, dig and search for, win, work and carry away any mineral specified therein;

(ii) "minor mineral" means building stone, boulder, shingle, gravel, ^{3a}[Chalcedony pebbles], ⁴[⁵[limeshell], kankar, and limestone used for lime burning], murrum, brick-earth, ⁶[Fuller's earth], ⁷[Bentonite], ordinary clay, ordinary sand, ⁸[road metal, reh-matti, slate and shale when used for building material].

(iii) "private person" means a person other than Government;

(iv) "prospecting license" means a license to search for any mineral specified therein, by quarrying, boring and digging or otherwise;

(v) "railway" and "Railway Administration" have the meanings respectively assigned to them in the Indian Railways Act, 1890.

4. **Exemption.**—These rules shall not apply to minor minerals, the extraction of which shall be regulated by such rules as the ⁹[State] Government may prescribe.

CHAPTER II—CERTIFICATE OF APPROVAL

5. **Grant of certificate of approval.**—A certificate of approval shall be granted only by a State Government.

6. **Persons to whom certificate may be granted.**—A certificate of approval may be granted to any person who, in the opinion of the State Government, is in a position to employ an efficient prospecting agency, or possesses special knowledge of geology or mining;

¹⁰[Provided that—

(a) where such person is an individual and is not a citizen of India, or

(b) where the person is a partnership firm which consists of one or more partners who are not citizens of India,

the State Government shall not grant any certificate of approval to such persons except with the previous approval of the Central Government.

Provided further that where such person is a company, it shall be incorporated under the Indian Companies Act, 1913 (VII of 1913)^{10a}, and if a partnership firm, it shall be registered under the Indian Partnership Act, 1932 (IX of 1932).

¹ These Rules were published under the Ministry of Natural Resources and Scientific Research Notification No. M-II-155(24)-2 dated the 18th October, 1949.

² Inserted by Notification No. M-II-155 (92), dated 29th October, 1951.

³ Clauses (i) and (vi) of rule 3 were omitted by Notification No. M-II-155 (92), dated 29th October, 1951.

^{3a} Inserted by Notification No. S.R.O. 244 dated the 25th January, 1956.

⁴ As amended by Corrigendum No. M-II-152(2)/54, dated 18th May, 1954.

⁵ Inserted by Notification No. M-II-159 (6), dated 31st July, 1951.

⁶ Added by Notification No. M-II-152 (271)/53, dated 9th March, 1954.

⁷ Added by Notification No. M-II-152(38)/54, dated 4th August, 1954.

⁸ Inserted by Notification No. M-II-152(202), dated 22nd October, 1953.

⁹ Words "Province" or "Provincial" substituted wherever they occurred by Notification No. M-II-155 (92), dated 29th October, 1951.

¹⁰ Substituted by Notification No. S.R.O. 3517 dated the 24th November, 1954.

^{10a} See now the Companies Act, 1956 (I of 1956).

Provided further that when it is so expedient in the public interest, the State Government may by order, with the previous approval of the Central Government, grant exemption from this rule].

7. ¹¹[(1)]. **Application for certificate of approval.**—An application for the grant or renewal of a certificate of approval shall be submitted to the State Government ¹²[through such officer or authority as it may appoint in this behalf], and ¹³[every application for the grant of a certificate] shall contain the following particulars:—

(a) (i) If the applicant is an individual, his name, nationality, profession and residence, and

¹¹[(ii) If the applicant is a partnership firm, a company or an association or body of individuals, whether incorporated or not, its name, nature and place of business, place of registration or incorporation and except in the case of a company which is not a private company as defined in the Indian Companies Act, 1913 (VII of 1913), the names and addresses of the individuals constituting such partnership firm, company, association or body.]

¹³[(b) A statement showing the technical qualifications and mining experience of the applicant, and his manager, if any, and such other particulars as may be necessary to satisfy the State Government of the competence of the applicant to hold the certificate.]

¹¹[(2) If there is any omission or misdescription of the ¹⁴[profession or residence or nationality] in the case of an individual or of the place of business in the case of a partnership firm, a company or an association or body of individuals, whether incorporated or not, such omission or misdescription shall be corrected within a period specified by the State Government or an officer appointed by that Government in this behalf.]

8. **Restricted certificate.**—A certificate of approval shall be valid for the whole of the State and shall cover all minerals except petroleum and natural gas, unless the State Government, with the prior approval of the Central Government, restricts it to any specified mineral or minerals.

9. **Period of certificate of approval.**—(1) A certificate of approval shall have effect from the date on which it is granted and shall expire at midnight on the 31st December next following:

Provided that a certificate issued in the last quarter of the year shall be valid until the 31st December of the year next following.

(2) Only one person shall be named in the certificate and the fee payable for the grant thereof shall be Rs. 100.

10. **Renewal of certificate of approval.**—A certificate of approval may be renewed on payment of a fee of Rs. 50 if the application for renewal is received within 3 months from the date of expiry of the certificate. ¹⁵[No application for renewal received after the expiry of three months shall be entertained] but an application for a fresh certificate may be made.

11. **Notification of grant of certificate of approval.**—The name and address of the person to whom a certificate of approval has been granted or renewed shall be published by the State Government in the official Gazette.

12. **Holder of a concession need not renew his certificate.**—The expiry of a certificate of approval shall not affect the validity of a license or lease already granted to the holder of such certificate, or the right of the holder of a prospecting license to apply for or obtain a mining lease under these rules.

CHAPTER III—GRANT OF PROSPECTING LICENSE IN RESPECT OF LAND IN WHICH THE MINERALS BELONG TO GOVERNMENT

13. **Restrictions on grant of prospecting licenses.**—(1) No prospecting license shall be granted to any person unless he holds a certificate of approval from the State Government concerned.¹⁶ * * * * ¹⁷[No prospecting license shall be granted to any person unless he

¹¹ Renumbered and substituted by Notification No. M.II-152(268)/53, dated 11th May, 1954.

¹² Inserted by Notification No. M.II-155(56), dated 9th December, 1949.

¹³ Inserted by Notification No. M.II-152(235)/53, dated the 11th December, 1954.

¹⁴ Substituted by Notification No. S.R.O. 1401 dated the 22nd/23rd June, 1955.

¹⁵ Substituted by Notification No. M.II-152(152), dated the 10th July, 1953.

¹⁶ The words "and if he is an individual other than a citizen of India unless the prior approval of the Central Government has been obtained" deleted by the Notification No. S.R.O. 369, dated the 4th February, 1955.

¹⁷ Inserted by Notification No. M.II-152(73), dated 29th February, 1952.

produces before the State Government an income tax clearance certificate from the Income-tax Officer of the District where he resides and carries on business].

(2) No prospecting license shall be granted in respect of any such mineral or class of minerals as the Central Government may, by order communicated to the State Government concerned, specify, either throughout, or in such part of the State as may be specified in the order.

(3) No prospecting license for any mineral specified in Schedule IV shall be granted except with the approval of the Central Government.

¹⁸[(1-A) (a) Where such person is a company, it shall be incorporated under the Indian Companies Act, 1913 (VII of 1913); and where such person is a partnership firm, it shall be registered under the Indian Partnership Act, 1932 (IX of 1932).

(b) Where such person is an individual and is not a citizen of India or where such person is a partnership firm which consists of one or more partners who are not citizens of India, the State Government shall not grant any prospecting licence to such person without the previous approval of the Central Government.]

14. Application for prospecting license.—An application for a prospecting license shall, in case of land in which the minerals belong to Government, be made to the State Government concerned ¹⁹[through such officer or authority as it may appoint in this behalf] and shall contain the following particulars—

(a) (i) If the applicant is an individual, his name, nationality, profession and residence, and

²⁰[(ii) If the applicant is a partnership firm, a company or an association or body of individuals, whether incorporated or not, its name, nature and place of business, place of registration or incorporation, and except in the case of a company which is not a private company as defined in the Indian Companies Act, 1913 (VII of 1913), the names and addresses of the individuals constituting such partnership firm, company, association or body.]

(b) The number and date of the notification of the grant or renewal of the certificate of approval of the applicant;

(c) A description, illustrated by a map or plan showing as accurately as possible the situation, boundaries and area of the land in respect of which the license is required;

(d) The period for which the prospecting license is required; and

(e) The mineral or minerals for which the applicant intends to prospect.

²¹[A copy of all the returns shall also be sent simultaneously to the State Government concerned.]

²²[*Explanation*:—The map or plan referred to in item (c) should give sufficient information for the purpose of identification of the area of the land in respect of which the license is required.]

15. Application fee.—The application shall be accompanied by a fee of Rs. 50 for the first square mile and Rs. 10 for each additional square mile or part thereof.

16. Acknowledgment of application.—On receipt of the application the receiving officer shall note thereon the date and time of its receipt and shall give to the applicant an acknowledgment stating the date and time of receipt.

17. State Government may grant or refuse a license.—(1) Subject to the provisions of Rule 13, the State Government may grant or refuse the license.

(2) In case of refusal, intimation of the same shall be given to the applicant in writing and the fee paid under rule 15 shall be refunded.

²³[(3) In the event of death of an applicant before grant of a prospecting license, the fee paid under rule 15 shall be refunded to his legal representative.]

²⁴[**17A. License to be executed within three months.**—Where a license has been granted under rule 17, the formal license shall be executed within three months of the date of the

order granting the license and if no such formal license is executed within the aforesaid period the order granting the license shall be deemed to have been revoked;

Provided that where ²⁵[the State Government or any officer or authority of the State Government authorised by it in this behalf] is satisfied that the applicant for the license is not responsible for the delay in the execution of the formal license, ²⁵[that Government or as the case may be, that officer or authority] may permit the execution of the formal license after the expiry of the aforesaid period of three months.]

18. Priority.—(1) If more than one application regarding the same land is received, preference shall be given to the application received first, unless the State Government, for any special reason, and with the prior approval of the Central Government decides to the contrary.

²⁶[Provided that where more than one application in respect of the same land is received on the same day the State Government, after taking into consideration the matters specified in sub-rule (2) and after obtaining the prior approval of the Central Government may grant the prospecting license to such one of the applicants whom it considers to be the most suitable.]

²⁷[Provided further that no application shall be deemed to be incomplete for the purposes of this rule, on account of the omission or misdescription of the ²⁸[profession or residence or nationality] in the case of an individual or of the place of business in the case of a partnership firm, a company, or an association or body of individuals, whether incorporated or not, if such omission or misdescription is corrected within a period specified by the State Government or an officer appointed by that Government in this behalf.]

²⁹(2) The matters referred to in the proviso to sub-rule (1) shall be the following namely:—

- (i) experience of the applicants in prospecting;
- (ii) financial soundness and stability of the applicants;
- (iii) special knowledge of geology or mining and the technical staff already employed or to be employed for the work.]

19. Security deposit.—The applicant shall, before the license is issued to him, deposit as security a sum of Rs. 100 for each square mile or part thereof covered by the license, for due observance of the terms and conditions of the license.

20. Register of prospecting licenses.—A register of prospecting licenses shall be maintained by the State Government, specifying:—

- (1) Serial Number;
- (2) Name of the applicant;
- (3) Residence of the applicant;
- (4) Date and number of certificate of approval granted to the applicant;
- (5) Date of application;
- (6) Situation and boundaries of the land;
- (7) Estimated total area;
- (8) The mineral or minerals which the applicant desires to prospect for;
- (9) Date of grant of the license;
- (10) Period for which granted, renewed or extended;
- (11) Application fee paid;
- (12) Prospecting fee and royalty if payable;
- (13) Amount of security deposit;
- (14) Particulars of disposal or refund of security deposit;
- (15) Date of assignment or transfer of the license, if any, and fees paid therefor and the names of the parties thereto;
- (16) Date of application for mining lease (if any);
- ³⁰[(17) Date of expiry or relinquishment or cancellation;
- (18) Date from which the area is available for regrants.]

21. Inspection of register.—The register shall be open to inspection by any holder of a valid certificate of approval or his duly authorised agent on payment of such fee as the State Government may fix ³¹[in consultation with the State Governments concerned.]

²⁵ Substituted by Notification No. M.II-152(15)/54, dated 24th April, 1954.

²⁷ Inserted by Notification No. M.II-152(268), dated 11th May, 1954.

²⁸ Substituted by Notification No. S.R.O. 1401 dated 22nd/23rd June, 1955.

²⁹ Inserted by Notification No. M.II-152(103), dated 29th July, 1953.

³⁰ Added, *ibid*.

³¹ Added by Notification No. S.R.O. 1743 dated 4th August, 1955.

³²[*Explanation*:—The expression 'holder of a valid certificate of approval' includes a person whose certificate has expired but who is eligible to apply for its renewal.]

22. **Period of grant or renewal of a prospecting license.**—(i) Except for mica, the period for which a prospecting license may be granted shall not exceed two years. If at the end of this period the State Government is satisfied that a longer period is required to enable the licensee to complete the prospecting, it may renew the license for one or more further periods not exceeding one year each, but subject to a total period of four years from the date of commencement of the original license. In the case of mica, the term for which a prospecting license may be granted shall not exceed one year, but the State Government may renew it for a further period not exceeding one year.

(2) If the licensee, before the termination of the period of his license, applies for the grant of a mining lease, the period shall be further extended till the mining lease is granted.

23. **Conditions of a prospecting license.**—(i) Every prospecting license shall include the following conditions:—

(i) The licensee shall pay such prospecting fee as may be fixed by the State Government, not less than two annas and not more than one rupee per acre of the land covered by the license, for each year or portion of a year of the period for which the license is granted or renewed.

(ii) In the case of minerals other than gold, silver, precious stones or mica, the license shall not confer upon the licensee a right to win or carry away the minerals for commercial purposes:

Provided that he may carry away—

(a) any quantity within the limits specified in the Second Schedule without any payment; and

(b) any quantity exceeding such limits ³³[but not exceeding twice such limits], which is incidental to prospecting, on payment of ^{33a}[royalty in accordance with Schedule I.]

(iii) In case of gold, silver, precious stones or mica the licensee may carry away any quantity won during the course of prospecting on payment of ^{33a}[royalty in accordance with Schedule I.]

(iv) The licensee may, with the previous sanction of the State Government, transfer his license or any right ³⁴[title] or interest therein to a person holding certificate of approval on payment to the State Government of a fee of Rs. 100.

³⁵[Provided that no prospecting license or any right, title or interest therein in respect of any mineral specified in Schedule IV shall be so transferred except with the previous approval of the Central Government.]

(v) Save in the case of land over which the licensee is granted a mining lease, he shall, within six months next after the determination of the license or the date of abandonment of the undertaking whichever is earlier, securely plug all bores and fill up or fence all excavations in the land covered by the license.

(vi) In case of breach by the licensee or his transferee or assignee of any of the conditions of his license, the State Government may cancel the license, or forfeit, in whole or part, the deposit made by the licensee under rule 19.

(2) A prospecting license may contain such other conditions, as the State Government may deem fit, including the following:—

(i) Time and place of payment of the fee;

(ii) Compensation for damage to land in respect of which license has been granted;

(iii) Indemnity to Government against the claim of a third party for any damage, injury or disturbance caused to him by the licensee;

(iv) Restrictions regarding felling of trees on unoccupied and unreserved Government land;

(v) Restrictions on prospecting operations in an area prohibited by any competent authority;

(vi) Operations in a reserved or protected forest;

(vii) Conditions regarding entry on occupied land;

(viii) Forfeiture of property left after determination of license;

(ix) Power to take possession of plant, machinery and premises in the event of war or emergency

³² Added by Notification No. M.II-152(105), dated 22nd June, 1953.

³⁵ Inserted by Notification No. 25 dated 21st December, 1954.

24. Right to mining lease.—On or before the determination of his license, the licensee shall have a right to a mining lease or leases over the whole or part of the area covered by the license, in accordance with the rules in force governing such leases at the time of the grant of the license:

³⁶[Provided that the State Government may for reasons to be recorded in writing and communicated to the licensee, refuse to grant a mining lease to any such licensee].

25. Report of information obtained by licensee.—The licensee shall, before the deposit made under rule 19 is returned to him, submit confidentially to the State Government a full report of the work done by him, and disclose all information acquired in the course of the operations carried on under the license, regarding the geology and mineral resources of the area covered by the license. ³⁷[If the licensee applies for and is granted a mining lease over the whole or part of the area covered by the prospecting license, the report shall be submitted to the State Government within one year of the date of the lease].

CHAPTER IV—GRANT OF MINING LEASE IN RESPECT OF LAND IN WHICH THE MINERALS BELONG TO GOVERNMENT

26. Restrictions of grant of mining leases.—(1) No mining lease shall be granted to any person unless he holds a certificate of approval from the State Government concerned or is covered by Rule 12; ³⁸ * * * * ³⁹[No mining lease shall be granted to a person who applies under rule 61, unless he produces before the State Government an income-tax clearance certificate from the Income-tax Officer of the District where he resides and carries on business].

⁴⁰[(1-A) (a) Where such person is a company, it shall be incorporated under the Indian Companies Act, 1913 (VII of 1913); and where such person is a partnership firm, it shall be registered under the Indian Partnership Act, 1932 (IX of 1932).

(b) Where such person is an individual and is not a citizen of India or where such person is a partnership firm which consists of one or more partners who are not citizens of India, the State Government shall not grant any mining lease to such person without the previous approval of the Central Government.]

(2) No mining lease shall be granted in respect of any such mineral or class of minerals as the Central Government may, by order communicated to the State Government concerned, specify either throughout, or in such part of the State as may be specified in the order.

(3) No mining lease for any mineral specified in Schedule IV shall be granted except with the prior approval of the Central Government.

⁴¹(4) * * * * *

27. Application for mining lease.—An application for a mining lease shall, in case of land in which the minerals belong to Government, be made to the State Government concerned ⁴²[through such officer or authority as it may appoint in this behalf] and shall contain the following particulars:—

(a) (i) If the applicant is an individual, his name, nationality, profession and residence, and

⁴³[(ii) If the applicant is a partnership firm, a company or an association or body of individuals, whether incorporated or not, its name, nature and place of business, place of registration or incorporation and except in the case of a company which is not a private company as defined in the Indian Companies Act, 1913 (VII of 1913) the names and addresses of the individuals constituting such partnership firm, company, association or body.]

(b) The nature and date of the notification of the grant or renewal of certificate of approval of the applicant;

³⁶ Added by Notification No. M.II-159(10), dated 7th November, 1951.

³⁷ Inserted by Notification No. M.II-159(6), dated 31st July, 1951.

³⁸ The words "and if he is an individual other than a citizen of India, unless the prior approval of the Central Government has also been obtained" deleted by the Notification No. S.R.O. 369 dated 4th February, 1955.

³⁹ Inserted by Notification No. M.II-152(73), dated 29th February, 1952.

⁴⁰ This sub-rule was inserted by Notification No. S.R.O. 369 dated 4th February, 1955.

⁴¹ Sub-rule (4) was omitted by Notification No. M.II-159(5), dated 23rd February, 1953.

⁴² Inserted by Notification No. M.II-155(56), dated 9th December, 1949.

⁴³ Substituted by Notification No. M.II-152(268)/53, dated 11th May, 1954.

- (c) A description, illustrated by a map or plan, showing as accurately as possible the situation, boundaries and area of the land in respect of which the lease is required;
- (d) The mineral or minerals which the applicant intends to mine;
- (e) The areas and minerals within the jurisdiction of the State Government for which the applicant or any person joint in interest with him already holds a mining lease;
- (f) If the applicant holds a prospecting license for the area applied for, the number and date of such license;
- (g) The period for which the lease is required; and
- (h) The industry, if any, which the applicant proposes to develop, and the location of such industry.

⁴⁴[Explanation:—The map or plan referred to in item (c) should give sufficient information to enable identification of the area in respect of which the lease is required.]

28. Application fee.—(1) The application shall be accompanied by a fee of Rs. 200. If the State Government refuses to grant the lease applied for or if the applicant refuses to accept the lease on account of any special condition imposed therein under sub-rule (3) of rule 41, the fee shall be refunded.

⁴⁵[(2) When an application for a mining lease is refused by the State Government, intimation of the refusal shall be given to the applicant in writing.]

⁴⁶[(3) In the event of death of an applicant before grant of a mining lease, the fee paid under sub-rule (1) shall be refunded to his legal representative].

⁴⁷[**28A. Lease to be executed within six months.**—When a mining lease is granted, the formal lease shall be executed within six months of the order sanctioning the lease and if no such lease is executed within the aforesaid period the order sanctioning the lease shall be deemed to have been revoked:

Provided that where ⁴⁸[the State Government or any officer or authority of the State Government authorised by it in this behalf] is satisfied that the applicant for the lease is not responsible for the delay in the execution of the formal lease, ⁴⁸[that Government or as the case may be, that officer or authority] may permit the execution of the formal lease after the expiry of the aforesaid period of six months.]

29. Deposit for preliminary expenses.—With the application, applicant shall deposit for meeting the preliminary expenses such sum, not exceeding Rs. 500, as the State Government may determine.

30. Survey of the area leased.—When a mining lease is granted by the State Government, arrangements shall be made at the expense of the lessee for the survey and demarcation of the area granted under the lease.

31. Acknowledgment of application.—On receipt of the application, the receiving officer shall note thereon the date and time of its receipt, and shall give to the applicant an acknowledgment stating the date and time of receipt.

32. Priority.—(1) If more than one application regarding the same land is received, preference shall be given to the application received first, unless the State Government, for any special reason, and with the prior approval of the Central Government decides to the contrary.

⁴⁹[Provided that where more than one application in respect of the same land is received on the same day, the State Government, after taking into consideration the matters specified in sub-rule (2) and after obtaining the prior approval of the Central Government, may grant the mining lease to such one of the applicants whom it considers to be the most suitable.]

⁵⁰[Provided further that no application shall be deemed to be incomplete for the purposes of this rule on account of the omission or misdescription of the number and date of the prospecting licence and of the ⁵¹[profession or residence or nationality] in the case of an individual or of the place of business in the case of a partnership firm, a company or an association or body of individuals, whether incorporated or not, if such

⁴⁴ Added by Notification No. M.II-125(103), dated 29th July, 1953.

⁴⁵ Inserted by Notification No. M.II-159(6), dated 31st July, 1951.

⁴⁶ Inserted by Notification No. M.II-152(239), dated 28th December, 1953.

⁴⁷ Inserted by Notification No. M.II-159(20), dated 27th February, 1953.

⁴⁸ Substituted by Notification No. M.II-152(15)/54, dated 24th April, 1954.

⁴⁹ Inserted by Notification No. M.II-152(103), dated 29th July, 1953.

⁵⁰ Inserted by Notification No. M.II-152(268)/53, dated 11th May, 1954.

⁵¹ Substituted by Notification No. S.R.O. 1401 dated the 22nd/23rd June, 1955.

omission or misdescription is corrected within a period specified by the State Government or an officer appointed by that Government in this behalf.]

⁵²[(2) The matters referred to in the proviso to sub-rule (i) shall be the following namely:—

- (i) experience of the applicants in mining.
- (ii) financial soundness and stability of the applicants.
- (iii) special knowledge of geology or mining and the technical staff already employed or to be employed for the work.]

33. Register of mining leases.—A register of mining leases shall be maintained by the State Government specifying, as far as may be, the particulars specified in rule 20.

34. Inspection of register.—The register shall be open to inspection by any holder of a certificate of approval or a prospecting license or a mining lease or his duly authorised agent, on payment of such fee as the State Government may fix.

⁵³[*Explanation*:—The expression 'holder of a certificate of approval' includes a person whose certificate has expired but who is eligible to apply for its renewal].

35. Area of mining lease.—Where the applicant applies direct for a mining lease under rule 61, it may be granted for such area as the State Government deems fit. Where the applicant has a right to a mining lease under rule 24, the lease shall cover the whole or such part of the land covered by the prospecting license as the applicant may desire but the State Government may, for any special reason, and with the prior approval of the Central Government, reduce the area, or exclude a portion therefrom:

Provided that no lessee, by himself or with any person joint in interest with him, shall hold, in the aggregate, more than 10 square miles under lease in respect of one mineral or related group of minerals within the State:

Provided further that at the time of renewal of the lease, the lessee shall be entitled to surrender any part of the leased area.

⁵⁴[*Explanation*.—In the first proviso to this rule, the ten miles area is inclusive of lands taken on lease from private persons and situated within the State.]

36. Security deposit.—The applicant shall, before the lease is issued, deposit as security a sum of Rs. 1,000 in case of metalliferous minerals and Rs. 500 in case of other minerals, for due observance of the terms and conditions of the lease.

37. Transfer of lease.—The lessee may, with the previous sanction of the State Government and subject to the conditions specified in the first proviso to rule 35 and in rule 38, transfer his lease or any right ⁵⁵[title] or interest therein, to a person holding a certificate of approval on payment of a fee of Rs. 100 to the State Government.

⁵⁶[Provided that no mining lease or any right, title or interest therein in respect of any mineral specified in Schedule IV shall be so transferred except with the previous approval of the Central Government];

38. Length and breadth of area leased.—The length of an area held under a mining lease shall not exceed four times its breadth:

Provided that, in the case of coal, the length shall not exceed twice the breadth and the area leased or sub-leased shall not be less than 100 acres:

Provided further that the State Government may in any particular case relax the provisions of this rule.

39. Boundaries below the surface.—The boundaries of the area covered by a mining lease shall run vertically downwards below the surface towards the centre of the earth.

40. Period of lease.—(1) The period for which a mining lease may be granted shall be 30 years in the case of ⁵⁷[coal], iron-ore and bauxite for manufacture of aluminium, and 20 years in the case of any other minerals, unless the applicant himself asks for a shorter period. The lease shall be renewable at the option of the lessee, for one or two periods, each not exceeding the duration of the original lease, in the case of iron-ore and bauxite for manufacture of aluminium, and one period not exceeding the duration of the original lease in the case of other minerals.

⁵² Inserted by Notification No. M.II-152(103), dated 29th July, 1953.

⁵³ Added by Notification No. M.II-152(105), dated 22nd June, 1953.

⁵⁴ Inserted by Notification No. M.II-159(6), dated 31st July, 1951.

⁵⁵ Inserted by Notification No. M.II-159(8), dated 21st March, 1951.

⁵⁶ The proviso was inserted by the Notification No. S.R.O. 25 dated 21st Dec., 1954.

⁵⁷ Inserted by Notification No. M.II-159(7), dated 15th December, 1951.

(2) When renewal is granted—

- (i) royalty and surface rent shall be charged at the rates in force at the time of the renewal; and
- (ii) dead rent shall be charged at such rate as the State Government may fix within the limits specified in the Third Schedule in force at the time of the renewals.

41. Conditions.—(1) Every mining lease shall include the following conditions:—

- (i) The lessee shall pay royalty on minerals despatched from the leased area ^{57a}[in accordance with Schedule I] to these Rules:

⁵⁸[Provided that such rates shall be liable to be revised with effect from the beginning of the year 1955 and thereafter once in every 10 years:

Provided further that, in the case of a lease executed after the coming into force of these Rules, the lessee shall not be required to pay, during the currency of his lease, a rate of royalty exceeding $1\frac{1}{2}$ times the original rate specified in his lease.]

- (ii) If any mineral not specified in the lease is discovered in the leased area he shall not win and dispose of such mineral without obtaining a lease therefor. If he fails to apply for such lease within twelve months from the discovery of the mineral the State Government may give a lease in respect of such mineral to any other person.
- (iii) The lessee shall also pay, for every year, except the first year of the lease, such yearly dead rent within the limits specified in the Third Schedule to these Rules, as may be fixed by the State Government in the lease; and if the lease permits the working of more than one mineral in the same area, the State Government may charge separate dead rent in respect of each mineral:

Provided that the lessee shall be liable to pay the dead-rent or royalty in respect of each mineral, whichever be higher in amount, but not both.

- (iv) The lessee shall also pay, for the surface area used by him for the purposes of the mine, surface rent at such rate, not exceeding the land revenue and cesses assessable on the land, as may be specified by the State Government in the lease.
- (v) Unless the State Government for good cause permits otherwise, the lessee shall commence operations within one year from the date of execution of the lease and shall thereafter carry them on in a proper, skilful and workmanlike manner.

Explanation.—For the purposes of this clause, operations shall include the erection of machinery, laying of a tramway or construction of a road in connection with the mine.

- (vi) The lessee shall, at his own expense, erect and at all times maintain and keep in good repairs boundary marks and pillars necessary to indicate the demarcation shown in the plan annexed to his lease.
- (vii) The lessee shall not carry on, or allow to be carried on, any mining operations at any point within a distance of 50 yards from any railway line, except with the written permission of the Railway Administration concerned, or from any reservoir, canal or other public works, or buildings, except with the previous permission of the State Government. The Railway Administration or the State Government may, in granting such permission, impose such conditions as it may deem fit.
- (viii) The lessee shall keep correct accounts showing the quantity and other particulars of all minerals obtained and despatched from the mine, the number of persons employed therein, and complete plans of the mine, and shall allow any officer authorised by the Central or the State Government in that behalf to examine at any time any accounts, plans and records maintained by him and shall furnish the Central or State Government with such information and returns as it may prescribe.
- (ix) The lessee shall keep accurate records of all trenches, pits and drillings made by him in the course of operations carried on by him under the lease, and

^{57a} Substituted by Notification No. S.R.O. 349 dated the 10th February, 1956.

⁵⁸ Added by Notification No. M.II-159(4), dated 19th May, 1951.

shall allow any officer authorized by the State or the Central Government to inspect the same. Such records shall contain the following particulars:—

- (a) The subsoil and strata through which such trenches, pits or drillings pass;
 - (b) Any mineral encountered;
 - (c) Such other matter as the Central or the State Government may from time to time require.
- (x) The lessee shall strengthen and support, to the satisfaction of the Railway Administration concerned, or the State Government, as the case may be, any part of the mine which in its opinion require such strengthening or support for the safety of any Railway, reservoir, canal road or any other public works or structures.
 - (xi) The lessee shall allow any officer authorised by the Central or the State Government to enter upon any building, excavation or land comprised in the lease for the purpose of inspecting the same.
 - (xii) The lessee shall, without delay, report to the State Government the discovery, in the area comprised in his lease, of any mineral not specified in the lease.
 - (xiii) The State Government shall at all times have the right of pre-emption of the minerals won from the land in respect of which the lease has been granted: Provided that the fair market price prevailing at the time of pre-emption, shall be paid to the lessee for all such minerals.
 - (xiv) If the lessee, or his transferee or assignee does not allow entry or inspection under clauses (viii), (ix) or (xi), the State Government may cancel the lease and forfeit in whole or part of the deposit made by the lessee under rule 36.
 - (xv) In case of breach by the lessee or his transferee or assignee of any of the conditions specified in clauses (i), (ii), (iii), (iv), (v), (vi), (vii), (viii), (ix) and (x) of this rule the State Government shall give notice in writing to the lessee asking him to remedy the breach within ⁵⁹[sixty] days from the date of the notice, and if the breach is not remedied within such period, the State Government may determine the lease.
 - (xvi) In case of breach by the lessee or his transferee or assignee of any other condition of this lease, the State Government may require the lessee to pay a penalty not exceeding an amount equivalent to twice the amount of the annual dead rent.

(2) A mining lease may contain such other conditions, as the State Government may deem necessary, in regard to the following:—

- (i) Time limit, mode and place of payment of rents and royalties;
- (ii) Compensation for damage to the land covered by the lease;
- (iii) Felling of trees;
- (iv) Restriction of surface operations in any area prohibited by any authority;
- (v) Notice by lessee for surface occupation;
- (vi) Providing of proper weighing machines;
- (vii) Facilities to be given by the lessee for working other minerals in the leased area or adjacent areas;
- (viii) Entering and working in a reserved or protected forest;
- (ix) Securing pits and shafts;
- (x) Reporting of accidents;
- (xi) Indemnity to Government against claims of third parties;
- (xii) Delivery of possession over lands and mines on the surrender, expiration or determination of the lease;
- (xiii) Forfeiture of property left after determination of lease;
- (xiv) Power to take possession of plant, machinery, premises and mines in the event of war or emergency.

(3) A mining lease may contain any other special condition, subject to the prior approval of the Central Government.

42. Rights of lessee.—Subject to the conditions mentioned in rule 41, the lessee shall have the right, for the purpose of his mining operations, to—

- (1) work mines;
- (2) sink pits and shafts and construct buildings and roads;
- (3) erect plant and machinery;
- (4) quarry and obtain building and road materials and make bricks;
- (5) use water and take timber;

⁵⁹ Substituted by Notification No. M.II-159(6), dated 31st July, 1951

- (6) use land for stacking purposes;
- (7) do any other thing specified in the lease.

43. Right to determine lease.—The lessee may determine the lease at any time by giving not less than twelve months' notice in writing to the State Government.

CHAPTER V—GRANT OF MINERAL CONCESSIONS BY PRIVATE PERSONS

44. Applicability of this Chapter.—The provisions of this Chapter shall apply to mineral concessions granted by private persons.

45. Certificate of approval essential.—No prospecting license or mining lease shall be granted except to a person holding a certificate of approval from the State Government having jurisdiction over the land in respect of which the concession is required:

Provided that, in the case of an individual who is not a citizen of India, the prior approval of the Central Government shall also be required:

Provided further that, no prospecting license or mining lease for any mineral specified in Schedule IV shall be granted except with the prior approval of the Central Government.

60 * * * * *

⁶¹[Provided further that the application for prior approval of the Central Government under this rule shall be made through the State Government concerned by the lessor.]

46. Conditions of prospecting license.—A prospecting license granted by a private person shall be subject to the following conditions:—

- (i) The period shall not exceed 2 years.
- (ii) The licensee shall pay for each year or portion of a year such fee, between two annas and one rupee per acre, as may be agreed upon between the parties.
- (iii) In the case of minerals other than gold, silver, precious stones or mica, the license shall not confer upon the licensee a right to win or carry away the minerals for commercial purposes:

Provided that he may carry away—

- (a) any quantity within the limit specified in the Second Schedule without any payment; and
- (b) any quantity exceeding such limits, which is incidental to prospecting, on payment of ^{61a}[royalty in accordance with Schedule I.]
- (iv) In the case of gold, silver, precious stones or mica the licensee may carry away any quantity won during the course of prospecting on payment of ^{61a}[royalty in accordance with Schedule I.]

(v) Such other conditions as may be agreed upon between the parties.

47. Conditions in a mining lease.—A mining lease granted by a private person shall be subject to the following conditions:—

⁶²[(i) Except leases in respect of coal, iron ore and bauxite for the manufacture of aluminium, for which the period of lease shall be 30 years, all other leases shall be for a period not exceeding 20 years. All leases shall be renewable at the option of the lessee for one term not exceeding the duration of the original lease.]

⁶³[(ii) No lessee, by himself or with any person joint in interest with him, shall hold, in the aggregate, more than 10 square miles under lease in respect of one mineral or related group of minerals within the State, including areas taken on lease from any private person or persons.]

⁶⁴[(iii) The length of an area leased shall not exceed four times its breadth.

(iv) The provisions of clauses (i), (ii), (iii), (iv), (v), (vii), (viii), (ix), (x), (xi) and (xv) of sub-rule (1) of rule 41 shall apply to such lease with the modification that in clauses (ii), (iii), (iv) and (xv) for the words "State Government" the word "lessor" shall be substituted.

⁶⁰ The words from "and no mining operation for any mineral specified in that Schedule shall start except with the prior approval of the Central Government" were omitted by Notification No. M.II-159(5), dated 23rd February, 1953.

⁶¹ Inserted by Notification No. M.II-159(2), dated 2nd November, 1950.

^{61a} Substituted by Notification No. S.R.O. 349 dated the 10th February, 1956.

⁶² Substituted by Notification No. M.II-159(7), dated 15th December, 1951.

⁶³ Substituted by Notification No. M.II-159(6), dated 31st July, 1951.

⁶⁴ Clause (iii) was omitted and Clauses (iv) and (v) were renumbered as clauses (iii) and (iv) by Notification No. M.II-159(6), dated 31st July, 1951.

⁶⁵[(v) The lessee may determine the lease at any time by giving not less than 12 months' notice in writing to the lessor.]

⁶⁵[(vi) The lease may contain such other conditions as may be agreed upon between the parties.]

48. Transfer or assignment.—No prospecting license or mining lease to which the provisions of this Chapter shall apply ⁶⁶[or any right, title or interest in such license or lease] shall be transferred except to a person holding a certificate of approval from the State Government having jurisdiction over the land in respect of which such concession is granted.

⁶⁷[Provided that no prospecting license or mining lease or any right, title or interest in such license or lease in respect of any mineral specified in Schedule IV shall be transferred except with the previous approval of the Central Government.]

⁶⁸**[49. Submission of copy of license or lease.**—Every person obtaining a prospecting license or a mining lease from a private person, shall, within three months of the grant of such license or execution of such lease, submit to the State Government, in whose jurisdiction the area or areas covered by such concession is or are situated, a certified copy of the license or the lease.]

⁶⁸**[50. Communication of transfer or assignment.**—Every transferee or assignee of a prospecting license or a mining lease, or of any right, title or interest therein, shall, within one month of such transfer or assignment, inform the State Government within whose jurisdiction the area or areas covered by such concession is or are situated, of the transfer or assignment and of the terms and conditions of such transfer or assignment.]

⁶⁹**[51. Prohibition of premium.**—No person in granting or transferring or obtaining a prospecting license or a mining lease or any right, title or interest in any such license or lease shall charge or pay any premium in addition to or in lieu of the prospecting fee, surface rent, dead rent or royalty specified in such license or lease or such proportionate part of such fee, rent or royalty as is payable in respect of such right, title or interest.]

⁷⁰**[51A. Prohibition of working of mines.**—If the State Government has reason to believe that the grant or transfer of a prospecting license or a mining lease or of any right, title or interest in such license or lease is in contravention of any of the provisions of this Chapter, the State Government may, with the approval of the Central Government, direct the party or parties concerned to comply with such directions, and within such time, as may be considered necessary or desirable in the circumstances of the case; and in the event of non-compliance, the parties concerned shall not mine, quarry or dig for or excavate or collect any minerals from the mine or area to which the licence or lease relates.]

⁷¹**52. Annual returns and statements.**—Every private person granting a prospecting license or a mining lease shall furnish annually to the State Government such returns and statements, within such period, as may be specified in it.

⁷²**[53. Penalty for granting prospecting licenses and mining leases in contravention of rules.**—If any person grants or transfers or obtains a prospecting licence or a mining lease or any right, title or interest therein in contravention of any of the provisions of this Chapter or acts in contravention of the provisions of rule 51A, he shall be punishable with imprisonment which may extend to six months, or with fine which may extend to one thousand rupees, or with both.]

⁷³**[54. Penalty for failure to furnish returns, etc.**—Should any licensee or lessee or his transferee or assignee fail to furnish the documents or information or returns as prescribed in rules 49 or 50 or in clause (viii) of sub-rule (i) of rule 41 or refuse entry or inspection by an officer authorised by the Central Government or the State Government under clause (viii), (ix) or (xi) of sub-rule (i) of rule 41, he shall be punished with imprisonment for a term which may extend to three months, or with fine which may extend to Rs. 500 or with both.]

⁶⁵ Added by Notification No. M.II-159(6), dated 31st July, 1951.

⁶⁶ Inserted by Notification No. M.II-159(8), dated 21st March, 1951.

⁶⁷ The Proviso was added by Notification No. 25 dated 21st December, 1954.

⁶⁸ Added by Notification No. M.II-159(11), dated 26th October, 1951.

⁶⁹ Rule 49 was renumbered as 51 by Notification No. M.II-159(11), dated 26th October, 1951 and substituted by Notification No. S.R.O. 931 dated 26th April, 1955.

⁷⁰ Inserted by Notification No. S.R.O. 931 dated 26th April, 1955.

⁷¹ Rules 50, 51, 52, 53, 54, 55, 56, 57, 58, 59 and 60 were renumbered as 52, 53, 57, 59, 60, 61, 62, 63, 64 and 65 respectively by Notification No. M.II-159(11), dated 26th October, 1951.

⁷² Substituted by Notification No. S.R.O. 931 dated 26th April, 1955.

⁷³ Added by Notification No. M.II-159(11), dated 26th October, 1951.

⁷⁴[55. **Offence cognisable upon written complaint.**—No court shall take cognisance of any offence punishable under these Rules, unless upon complaint made in writing by an officer empowered by the State Government in this behalf, within six months of the date on which the said offence is alleged to have been committed.]

⁷⁴[56. **Status of Court.**—No court inferior to that of a Presidency Magistrate or a Magistrate of the first class try any offence punishable under these Rules.]

CHAPTER VI—REVISION

57. **Application for review.**—(1) Any person aggrieved by an order of a State Government—

- (i) refusing to grant a certificate of approval, prospecting license or mining lease;
- ⁷⁵[(i-A), refusing to renew a certificate of approval;]
- ⁷⁶[(i-B) refusing to renew a prospecting license or mining lease;]
- (ii) cancelling a prospecting license or mining lease;
- (iii) refusing to permit transfer of a prospecting license under rule 23(iv) or a mining lease under rule 37;

may, within two months of the date of such order, apply to the Central Government for reviewing the same.

⁷⁷[(2) An application for review under sub-rule (1) may be admitted after the period of limitation prescribed therein when the applicant satisfies the Central Government that he had sufficient cause for not making the application within the said period.]

58. **Application fee.**—⁷⁸[An application for revision under rule ⁷⁹[57] shall be accompanied by a Treasury receipt showing that a fee of Rs. ⁸⁰[100] has been paid into a Government Treasury or in any branch of the ^{80a}[State Bank of India] doing the treasury business to the credit of the Head ⁸¹[XXXVI-Miscellaneous Departments—Miscellaneous—Central—Mineral Concession fees].

59. **Review.**—Upon receipt of such application, the Central Government may, if it thinks fit, call for the relevant records and other information from the State Government, and after considering any explanation that may be offered by the State Government, cancel the order of State Government or revise it in such manner as the Central Government may deem just and proper.

60. **Finality of order.**—The order of the Central Government under rule ⁸²[59] and subject only to such order, any order of a State Government under these rules, shall be final.

CHAPTER VII—MISCELLANEOUS

61. **Direct application for mining lease.**—Any person holding a certificate of approval may, without obtaining a prospecting license, apply for a mining lease.

62. **Application of these rules to all renewals.**—Where a prospecting license or a mining lease granted before the commencement of these rules is renewed after such commencement, these rules shall apply in relation to such renewal as they apply in relation to the renewal of a prospecting license or mining lease granted after such commencement.

⁸³[62A. **Power to rectify apparent mistake.**—The State Government or the Central Government, as the case may be, may, at any time within six months from the date of an order passed by it under these Rules, on its own motion rectify any mistake or error apparent on the face of the record, and shall, within the like period, rectify any such mistake or error which has been brought to its notice by an applicant for the grant of a mineral concession:

Provided that, no such rectification having or purporting to have a prejudicial effect on another applicant for the grant of the same mineral concession shall be made unless the State Government or the Central Government, as the case may be, has given such applicant notice of its intention so to do, and has allowed him a reasonable opportunity of being heard].

⁷⁴ Added by Notification No. M.II-159(11), dated 26th October, 1951.

⁷⁵ Inserted by Notification No. M.II-159(12), dated 1st February, 1952.

⁷⁶ Inserted by Notification No. S.R.O. 1186 dated 27th May, 1955.

⁷⁷ Inserted by Notification No. M.II-159(14), dated 12th February, 1952.

⁷⁸ Substituted by Notification No. M.II-155(92), dated 3rd May, 1950.

⁷⁹ Substituted by Notification No. M.II-159(11), dated 26th October, 1951.

⁸⁰ Substituted by Notification No. M.II-159(16), dated 10th July, 1952.

^{80a} Substituted by Notification No. S.R.O. 302, dated the 1st February, 1956.

⁸¹ Substituted by Notification No. M.II-155(92)-1, dated 1st June, 1950.

⁸² Substituted by Notification No. M.II-159(11), dated 26th October, 1951.

⁸³ Added by Notification No. M.II-159(1)/54, dated 9th April, 1954.

⁸⁴[63. **Forwarding of copies of licences and leases and annual return of licences and leases.**—A copy each of all the prospecting licences and mining leases granted in a State shall be supplied by the State Government to the Director, Indian Bureau of Mines, as soon as these are granted.]

In addition, a consolidated annual return of all the prospecting licences and mining leases granted in a State shall be supplied by the State Government to the Director, Indian Bureau of Mines in such form as may be specified by him, not later than the month of June following the year to which the return relates.]

64. **Forwarding of copies of reports.**—The State Government shall send copies of all reports received by it under rule 25 and clause (xii) of sub-rule (1) of rule 41 to the Director, Indian Bureau of Mines.

⁸⁵[65. **Saving.**—Nothing in these rules shall apply to search for minerals at the surface, not involving any substantial disturbance of the soil by the digging of pits, trenches or otherwise.]

Explanation.—The chipping of outcrops with a geological hammer for purpose of taking samples shall not be deemed to be a substantial disturbance of the soil.]

⁸⁶[66. **Preference as between applications for prospecting license and mining lease.**—Where applications for both a prospecting license and a mining lease, in respect of the same area are received on the same date or different dates within a period of thirty days, the application for a mining lease shall receive preference over the application for a prospecting license if the area was previously held and worked under a mining lease:

Provided that no such preference shall be given to the application for a mining lease if the application for a prospecting license was made earlier than the application for a mining lease by more than thirty days notwithstanding that the area is one which was previously held and worked under a mining lease.]

⁸⁷[67. **Availability of areas for regrant to be signified by entry in Standard Register.**—No area which was previously held under a prospecting license or a mining lease shall be treated as available for regrant, unless an entry to that effect has been made in standard register. The date from which the area shall be treated as available for regrant, shall be notified in the official Gazette of the State at least 30 days in advance.

Explanation.—For the purpose of this rule, the registers required to be maintained under rules 20 and 33 shall be deemed to be Standard Registers.]

⁸⁷[68. **Premature applications.**—Applications for grant of a prospecting licence or a mining lease in respect of areas which have been previously held under a prospecting licence or a mining lease but in respect of which there is no entry in the Standard Register as provided in rule 67 shall be deemed to be premature and shall be disposed of by the State Government accordingly. The fee paid shall be refunded.]

⁸⁸[69. A partnership firm, a company which is a private company as defined in the Indian Companies Act, 1913 (VII of 1913) or an association or body of individuals, whether incorporated or not, shall intimate promptly to the State Government any change that may take place in the individuals constituting such partnership firm, company, association or body].

SCHEDULE I—ROYALTY—(See rules 23, 41, 46 and 47)

1. Coal—	Five per cent. of f.o.r. statutory price subject to a minimum of As. 8 per ton.
2. ⁸⁹ [Mica—	<i>Either</i>
(a) Crude mica	Re. 1 per md.
(b) Trimmed mica, all qualities other than heavy stained, dense stained and spotted	Rs. 3 per md.
(c) Trimmed mica, other than (b)	Rs. 1-8-0 per md.
(d) Waste and scrap mica	As. 2 per md.
<i>Or</i>	
5 per cent. of the sale value of mica at the pit's mouth, at the option of the lessor.]	

⁸⁴ Substituted by Notification No. S.R.O. 519 dated 28th February, 1955.

⁸⁵ Added by Notification No. M.II-155(108), dated 29th May, 1951.

⁸⁶ Substituted by Notification No. S.R.O. 98 dated 31st December, 1954.

⁸⁷ Inserted by Notification No. M.II-152(103), dated 29th July, 1953.

⁸⁸ Added by Notification No. M.II-152(268)/53, dated 11th May, 1954.

⁸⁹ Substituted by Notification No. M.II-159(6), dated 31st July, 1951.

- ⁸⁹[3. Gold, silver, platinum and other precious metals and their ores; To be fixed by the Central Government in copper, lead and zinc ores. each case.]
4. *Iron*—
 (a) Used for extraction of iron As. 8 per ton.
 (b) Used for other purposes ... Re. 1 per ton.
5. *Precious Stones* ... 20 per cent. of the value.
6. *Manganese ore*—
 (a) High grade (45 per cent. Mn. and over) ... Five per cent. of the sale value at the pit's mouth, subject to a minimum of Re. 1 per ton.
 (b) Low grade (below 45 per cent. Mn.) ... Five per cent. of the sale value at the pit's mouth, subject to a minimum of As. 8 per ton.
7. *Chromite*—
 (a) 45 per cent. Cr_2O_3 and above ... Five per cent. of the sale value at the pit's mouth, subject to a minimum of Rs. 1-8-0 per ton.
 (b) Less than 45 per cent. Cr_2O_3 ... Five per cent. of the sale value at the pit's mouth, subject to a minimum of As. 12 per ton.
- ⁹⁰7A * * *
8. *Limestone or Dolomite* ... Five per cent. of the sale value at the pit's per ton, subject to a minimum of As. 4 per ton.
- ^{90a}[9. *Oil Shale* ... To be fixed by negotiation between the licensee/lessee and the State Government.]
10. *All other minerals not specified above* Five per cent. of the sale value at the pit's mouth.

SCHEDULE II—MAXIMUM QUANTITIES OF ORES AND MINERALS REMOVEABLE FREE OF ROYALTY—(See rules 23 and 46)

Class 1.	Auriferous rock and gravel containing no visible gold	... 2 tons.
Class 2.	Metalliferous ores meant for extracting aluminium, iron and manganese	... 10 tons.
Class 3.	Metalliferous ores meant for extracting antimony, arsenic, bismuth, chromium, copper, lead, nickel, tin, titanium, tungsten and zinc	5 tons.
Class 4.	Metalliferous ores meant for extracting cadmium, cobalt, mercury, molybdenum, silver, hallium and vanadium	... 2 tons.
Class 5.	Compound ores containing the metals of class 4 in smaller quantities than those of class 3	... 5 tons.
Class 6.	Concentrates of the ores enumerated in classes 3 to 5	... 2 cwts.
Class 7.	Minerals of the "rare-earths" group	... 5 cwts.
Class 8.	Gypsum, iron pyrites, pyritous shales, and bauxite used for purposes other than aluminium making	... 5 tons.
Class 9.	Barytes, bitumen, borax, corundum, emery, ⁹¹ [grossularite], ⁹² [felspar flourspar and calcite]	... ½ ton.
Class 10.	Asbestos, graphite, mica and native sulphur	... 1 cwt.
Class 11.	Sillimanite, kyanite, magnesite, serpentine, steatite, vermiculite, fire-clay, kaolin and other refractory materials	... 5 tons.
⁹³ [Class 12.	Beryl	... 20 lbs.]
^{93a} [Class 13.	Coal, lignite and oil shale	... 50 tons.

⁹⁰ Item 7A was omitted by Notification No. M.II/159(6), dated 31st July, 1951.

^{90a} Inserted by Notification No. S.R.O. 349 dated the 10th February, 1956.

⁹¹ Inserted by Notification No. S.R.O. 1742 dated 4th August, 1955.

⁹² Substituted by Notification No. M.II-152(12)/54, dated 10th May, 1954.

⁹³ Inserted by Notification No. M.II-159(17), dated 12th June, 1952.

^{93a} Inserted by Notification No. S.R.O. 349 dated the 10th February, 1956.

SCHEDULE III—DEAD-RENT (See rules 40 and 41)

						Per acre	
						Minimum	Maximum
						Rs.	Rs.
1.	Coal	1	5
⁹⁴ 2.	Iron ore	1	5
3.	Bauxite for extraction of aluminium	1	5
4.	Mica	2	8
5.	Gold, silver, platinum and other precious metals and precious stones	To be determined according to the circumstances of each case.	
1.	All other minerals	5	10

SCHEDULE IV—SPECIFIED MINERALS (See rules 13, 26 and 45)

Coal; gypsum; ⁹⁵[apatite and phosphatic ores, sulphur and its ores]; vanadium ores; ⁹⁶[tungsten ores]; beryl; ilmenite and other titanium ores; monazite and other thorium minerals; pitchblende and other uranium ores; columbite, samarskite and other minerals of the "rare earths" group; ⁹⁷[zircon; lead, zinc, copper ⁹⁸[and nickel] ores]; ⁹⁹[gold, silver, platinum and other precious metals and their ores; and precious stone].

ANNEXURE

1. Model forms for the grant of mineral concessions (including certificates of approval) under the Mineral Concession Rules, 1949.
2. Model forms of applications for the grant of mineral concessions (including certificate of approval) under the Mineral Concession Rules, 1949.
3. Model form of application for review under Rule 57 of the Mineral Concession Rules, 1949.

CERTIFICATE OF APPROVAL GRANTED UNDER THE
MINERAL CONCESSION RULES, 1949.

GOVERNMENT OF

No. Dated 19 .

This is to certify that.....

(Name of individual or Company)

(Address and occupation)

is approved as a person who is qualified to acquire Prospecting Licences and Mining Leases in respect of.....
all minerals except.....

(mineral or minerals in case of restricted certificates)

Petroleum and Natural gas

in the State of.....under the rules
contained in the Mineral Concession Rules, 1949, published under the Government
of India, Ministry of Works, Mines and Power Notification No. M.II-155(24)-2, dated
the 18th October 1949, as amended from time to time.

The certificate shall be valid up to the mid-night of 31st December 19 .

Signature of Issuing Authority.

⁹⁴ The words "for extraction of iron" were omitted by Notification No. M.II-152(151), dated 11th April, 1953.

⁹⁵ Inserted by Notification No. M.II-159(18), dated 25th October, 1952.

⁹⁶ Inserted by Notification No. M.II-159(15), dated 31st March, 1952.

⁹⁷ Substituted by Notification No. M.II-155(89), dated 30th March, 1950.

⁹⁸ Inserted by Notification No. M.II-159(18), dated 25th October, 1952.

⁹⁹ Substituted by Notification No. M.II-159(6), dated 31st July, 1951.

This certificate is renewed upto:

31st December 19 .
 31st December 19 .
 31st December 19 .
 31st December 19 .
 31st December 19 .
 31st December 19 .

Signature of Renewing Authority.

MODEL FORM OF PROSPECTING LICENSE

This Indenture made this.....
 day of 19 between the Governor/Rajpramukh of.....
 (hereinafter referred to as "the State Government" which expression shall where
 the context so admits be deemed to include his successors and assigns) of the one
 part and

(1)¹ (name of person)

of
 (address and occupation)

(hereinafter referred to as "the licensee" which expression shall where the context
 so admits be deemed to include his heirs, executors, administrators, representatives
 and permitted assigns.

(1) and (2)²
 (name of person)
 of (address and occupation)
 and (name of person)
 of (address and occupation)
 and (name of person)
 of (address and occupation)

hereinafter referred to as the licensees which expression shall where the context so
 admits be deemed to include their respective heirs, executors, administrators, repre-
 sentatives and their permitted assigns

(2) and (3)³
 (name of person)
 of (address)
 and (name of person)
 of (address)
 and (name of person)
 of (address)

all carrying on business in partnership at
 (address of the firm or syndicate) under the name and style
 of (name of the firm or syndicate) registered under
 (Act under which registered) (hereinafter referred to as the licensee which expression
 shall when the context so admits be deemed to include all the partners of the said
 firm, their representatives, heirs, executors, administrators and permitted assigns).

(3) and (4)⁴
 (name of the company) a
 registered under (company Act under which
 incorporated)
 and having its registered office at
 (address) (hereinafter referred to
 as the licensee which expression shall where the context so admits be deemed to
 include its successors and permitted assigns) (4)
 of the other part

¹ When the licensee is an individual.

² When the licensees are more than one individual.

³ When the licensee is a registered firm or syndicate.

⁴ When the licensee is a Registered Company.

WHEREAS the licensee/licensees has/have applied to the State Government in accordance with the Mineral Concession Rules, 1949 (hereinafter referred to as the said Rules) for a licence to prospect for _____ in the lands specified in Schedule 'A' hereunder written and delineated in the plan herewith annexed (hereinafter referred to as the said lands) and has/have deposited with the State Government Rs. _____ as the prescribed security in respect of such license and has/have paid to the State Government the sum of Rs. _____ as the prescribed prospecting fee for _____ months/years in advance in respect of such license and WHEREAS the State Government has found that the licensee is in possession of a valid Certificate of Approval and that there is no objection to the grant of such license (and WHEREAS the Central Government has approved the grant of this license).* NOW THESE PRESENTS WITNESS as follows:—

PART I

In consideration of the fee, royalties, covenants, and agreements hereinafter reserved and contained and on the part of the licensee/licensees to be paid observed and performed the State Government hereby grants and demises unto the licensee/licensees the sole right and license—

(1) **To enter upon the lands and to search for, etc.**—To enter upon the said lands and to search for by quarrying, boring and digging or otherwise all or any..... lying or being within under or throughout the said lands.

(2) (i) **To win or carry away and dispose of minerals won.**—To win and carry away not more than..... tons for experimental purposes and any additional quantity which is incidentally won during the course of prospecting on payment of royalty at the rates specified in Schedule C hereunder written. The licensee shall not win or carry away any such minerals for any commercial purpose.

(ii) To win and carry away any quantity of such minerals won during the course of prospecting on payment of royalty at the rates specified in Schedule C hereunder written. (For gold, silver, precious stones and mica).

(3) **To clear under-growth and brushwood, etc.**— Subject to the provisions of clauses 5 and 6 of Part II of these presents for the purpose aforesaid to clear undergrowth and brushwood and trees and with the sanction of the Deputy Commissioner/Collector previously obtained in writing to make and use any drains or water courses on the said lands, for purposes as may be necessary for effectually carrying on the prospecting operations and for the workmen employed therein and with the like sanction to use any water provided always that such use shall not diminish or interfere with the supply of water to which any cultivated land, village, building or watering place for livestock has heretofore been accustomed and that no streams, springs or wells shall be fouled or polluted by any such use or the prospecting operations hereby licensed.

(4) **To bring upon and erect machinery, etc. on the said lands.**—To erect and bring upon the said lands all such temporary huts, sheds and structures steam, and other engines, machinery and conveniences, chatties and effects as shall be proper and necessary for effectually carrying on the prospecting operations hereby licensed or for the workmen employed therein.

RESERVED NEVERTHELESS to the State Government full power and liberty at all times to enter into and upon and to grant or demand to any person or persons whomsoever liberty to enter into and upon the said lands for all or any purposes other than those for which sole right and license are hereby expressly conferred upon the licensee/licensees and particularly (and without hereby in any way qualifying such general power and liberty) to make on over or through the said lands such roads tramways and Railways as shall be considered necessary or expedient for any purposes and to obtain from and out of the said lands such stone, earth or other materials as may be necessary or requisite for making, repairing or maintaining, such roads, tramways and railways and to pass and repass at all times over and along such roads, tramways and railways for all purposes and as occasion shall require.

To HOLD the said right and license unto the licensee/licensees from the date of these presents for the term of _____ (hereinafter referred to as the said term).

PAYING therefor annually in advance a sum of Rs. _____ being the prospecting fee for each year or portion of a year and immediately on the expiration or sooner determination of the said term clear of all fees, rates, taxes, charges, deductions and royalty at the rates specified in Schedules B and C hereunder written on the minerals won and carried away by the licensee/licensees during the said term.

*In case of "Specified" minerals only.

PART II—COVENANTS BY LICENSEE/LICENSEES

The licensee/licensees hereby covenants/covenant with the State Government as follows:—

(1) **Payment and rates of royalty.**—To pay royalty to the State Government at such rates and such time as are specified in schedule C hereunder written, provided that the licensee/licensees shall be entitled to carry away free of royalty not more than..... for experimental purposes.

(2) **Payment of prospecting fee.**—To pay annually in advance a prospecting fee in respect of ensuing year at such rates and time as are specified in Schedule B hereunder written.

(3) **To carry on work in workmen-like manner.**—To work and carry on the operations hereby licensed in a fair orderly skilful and workmanlike manner and with as little damage as may be to the surface of the lands and to trees, crops, buildings, structures and other property thereon.

(4) **No working within 50 yards of public work, etc. without previous permission.**—Not to work or carry on any operations hereby licensed in or under the said lands at or to any point within a distance of 50 yards from any railway line except with the previous written permission of the Railway Administration concerned or from any reservoir, canal or other public work or any building or inhabited site except with the previous written permission of the Deputy Commissioner/Collector or any other officer authorised by the State Government in this behalf. The Railway Administration or the State Government or the Deputy Commissioner/Collector or other Officer authorised in this behalf in granting such permission may impose such conditions as it may deem fit. The said distance of 50 yards shall be measured in the case of a railway reservoir or canal horizontally from the outer toe of the bank or the outer edge of the cutting as the case may be and in the case of a building horizontally from the plinth thereof.

(5) **Not to cut or injure trees in reserved forest, etc. without previous permission.**—Not to cut or injure any timber or tree or any unoccupied or unreserved land without the written permission of the Deputy Commissioner/Collector nor without such permission disturb the surface of any road or enter upon any public pleasure ground burning or burial ground or any place held sacred by any class of persons or interfere with any right of way, well or tank.

(6) **Not to enter upon any land in the occupation of any person without the consent of the occupier nor to cut or in any way injure any trees, standing crops, buildings, huts, structures or other property of any kind of the occupier of any land or any other person without the written consent of such owner, occupier or person.**

(7) **Not to commence work in reserved forest without previous permission.**—Not to enter upon or commence prospecting in any protected or reserved forest situated upon the said lands without obtaining the written sanction of the District Forest Officer, nor otherwise than in accordance with such conditions as may be prescribed in such sanction.

(8) **Indemnify Govt. against all claims.**—To make reasonable satisfaction and pay such compensation as may be assessed by lawful authority in accordance with the law in force on the subject for all damage, injury, or disturbance which may be done by him in exercising of the powers granted by this license and to indemnify and keep indemnified fully and completely the State Government against all claims which may be made by any person or persons in respect of any such damage, injury or disturbance and all costs and expenses in connection therewith.

(9) **Forfeiture of security deposits, etc.**—Whenever the security deposit of Rs. or any part thereof or any further sum hereafter deposited with the State Government in replenishment thereof shall be forfeited or applied by the State Government pursuant to the power hereinafter declared in that behalf forthwith to deposit with the State Government such further sum as may be sufficient with the unappropriated part thereof to bring the amount in deposit with the State Government upto the sum of Rs.

(10) **Licensee not to be controlled by trust, Syndicate, etc.**—The licensee/licensees shall not be controlled or permit himself/themselves to be controlled by any trust, syndicate, corporation, firm or person except with the written consent of the State Government, which will obtain the sanction of the Central Government.

(11) **Report of accident.**—The licensee/licensees shall without delay send to the Deputy Commissioner/Collector a report of any accident causing death or serious bodily injury or serious injury to property or seriously affecting or endangering life or property which may occur in the course of the operations under this license.

* This clause should be suitably modified if it be not in accordance with the provisions of local law.

(12) The licensee/licensees shall be bound by such rules as may be issued by the Government of India under section 6 of the Mines and Minerals (Regulation and Development) Act, 1948 (LIII of 1948) and shall not carry on prospecting or other operations under the said license in any way other than as prescribed under those rules.

(13) **To provide for weighing or measurement of material won.**—At such times and occasions as may be required the licensee/licensees shall well and truly measure or weigh or cause to be measured or weighed upon some part of the said lands all minerals from time to time won from the said lands by the licensee/licensees and such all minerals as may be required to be measured or weighed for the purpose of ascertaining the royalty payable under these presents shall be so measured or weighed. The licensee/licensees agrees/agree not to take away from the said lands any mineral so won until the same shall have been measured or weighed as the case may be. The licensee/licensees further agrees/agree to give.....days previous notice in writing to the Deputy Commissioner/Collector of every such measuring or weighing in order that he or some person on his behalf may be present thereat.

(14) **Plugging of bore, holes, fencing, etc., and restoring the surface of land after determination or abandonment.**—Save in the case of land over which the licensee/licensees shall have been granted a mining lease on or before the expiration or sooner determination of the license, he shall within six months next after the expiration or sooner determination of the license or the date of abandonment of the undertaking, whichever shall first occur, securely plug any bore or hole and fill up or fence any holes or excavations that he may have made in the lands to such an extent as may be required by the Deputy Commissioner/Collector concerned and shall to a like extent restore the surface of the land and all buildings thereon which may have been damaged or destroyed in the course of prospecting, provided that the licensee/licensees shall not be required to restore the surface of the land, or any building in respect of which full and proper compensation has already been paid.

(15) **Removal of machinery etc. after expiration, determination or abandonment.**—Upon the expiration or sooner determination of this license or the abandonment of the operations hereby licensed whichever shall first occur to remove expeditiously at the licensee's/licensees' own cost all buildings, structures, plant, engines, machinery, implements, utensils and other property and effects theretofore erected or brought by the licensee/licensees and then standing or being upon the said lands and also all minerals theretofore won by the licensee/licensees under the authority of these presents and then being upon the said lands PROVIDED that this covenant shall not apply to any part of the said lands which may be comprised in any mining lease granted to the licensee/licensees during the subsistence of this license.

(16) **Report of work done before the refund of security deposit.**—At any time before the said security deposit is returned to him or transferred to any other account or within six months after the expiration or sooner determination of the license or abandonment of the operations whichever is earlier the licensee/licensees shall submit to the State Government confidentially a full report of the work done by him/them and disclose all information acquired by him/them in the course of the operations carried on under this license regarding the geology and mineral resources of the area covered by the license. If the licensee/licensees applies/apply for and is/are granted a mining lease over the whole or part of the area covered by the prospecting license, the report shall be submitted to the State Government within one year of the date of the lease.

PART III—POWERS OF THE GOVERNMENT

It is hereby agreed as follows:—

(1) **Cancellation of the license and forfeiture of the deposit in case of breach of conditions.**—In the case of any breach of any conditions of the license by the licensee/licensees or his transferees or assignees the State Government may, where it is satisfied that the breach is such as cannot be remedied, on giving thirty days notice to the licensee/licensees or his transferees or assignees, to determine the license or the whole or any part of the said deposit of Rs. deposited under the covenants in that behalf, as the State Government may deem fit. In case the State Government considers the breach to be of a remediable nature, it shall give notice to the licensee/licensees or his transferees or assignees as the case may be requiring him/them to remedy the breach within thirty days from the date of receipt of the notice informing him of the penalty proposed to be inflicted if such remedy is not made within such period.

(2) **Application of security to payment of compensation.**—The State Government may from time to time appropriate and apply the said deposit of Rs. or any part thereof or any further sum deposited under any covenants in that behalf hereinbefore contained in or towards payment or satisfaction of any claims to compensation which the Government has or may have against the licensee/licensees and/or which may be made

by any person or persons against the licensee/licensees and or the State Government in respect of any damage or injury done by the licensee/licensees in exercise of any of the powers conferred by this license and in or towards payment of any damages, costs or expenses which may become payable as the result of or in connection with any suits or proceedings which may be instituted against the State Government in respects of any such damage or injury and also in or towards payment of the expenses of the carrying out or performance of any works or matters which the licensee/licensees shall fail to carry out or perform after the expiry or sooner determination of this license or the abandonment of the operations hereby licensed in accordance with the covenant in that behalf hereinbefore contained or in payment or satisfaction of any such claims, damages, costs and expenses.

(3) **When the properties of licensee are not removed from the lands in time.**—If any buildings, structures, plant, engines, machinery implements, utensils or other property or effects or any minerals which ought to be removed by the licensee/licensees from the said lands in accordance with the covenant in that behalf hereinbefore contained be not so removed within one calendar month after notice in writing requiring their removal shall have been given to the licensee/licensees by the State Government the same shall be deemed to become the property of the State Government and may be sold or disposed of for the benefit of the State Government in such manner as the State Government shall deem fit without any liability to pay any compensation or to account to the licensee/licensees in respect thereof.

(4) **Licensee to pay for work done on his behalf.**—If any of the works or matters which in accordance with the covenant in that behalf hereinbefore contained are to be carried or performed by the licensee be not so carried out or performed within the time specified in that behalf, the State Government may cause the same to be carried out or performed and the licensee shall pay the State Government on demand all expenses which shall be incurred in such carrying out or performance of the same.

(5) **Right of pre-emption.**—(a) The State Government shall from time to time and at all times during the said term have the right (to be exercised by notice in writing to the licensee/licensees) of pre-emption of the said minerals (and all products thereof) lying in or upon the said lands hereby demised or elsewhere under the control of the licensee/licensees and the licensee/licensees shall with all possible expedition deliver all minerals or products or minerals purchased by the State Government under the power conferred by this provision in the quantities at the times in the manner and at the place specified in the notice exercising the said right.

(b) Should the right of pre-emption conferred by this present provision be exercised and a vessel chartered to carry the minerals or products thereof procured on behalf of the State Government or the Central Government be detained on demurrage at the port of loading the licensee/licensees shall pay the amount due for demurrage according to the terms of the charter party of such vessel unless the State Government shall be satisfied that the delay is due to causes beyond the control of the licensee/licensees.

(c) The price to be paid for all minerals or products of minerals taken in pre-emption by the State Government in exercise of the right hereby conferred shall be the fair market price prevailing at the time of pre-emption PROVIDED THAT in order to assist in arriving at the said fair market price the licensee/licensees shall if so required furnish to the State Government for the confidential information of the Government particulars of the quantities descriptions and prices of the said mineral or products thereof sold to other customers and of charters entered into for freight for carriage of the same and shall produce to such officer or officers as may be directed by the State Government original or authenticated copies of contracts and charter parties entered into for the sale or freightage of such minerals or products.

(d) In the event of the existence of a state of war or emergency (of which existence the President of India shall be the sole judge and a notification to this effect in the Gazette of India shall be conclusive proof) the State Government with the consent of the Central Government shall from time to time and all times during the said term have the right (to be exercised by a notice in writing to the licensee/licensees) forthwith take possession and control of the works plant machinery and premises of the licensee/licensees on or in connection with the said lands or the operations under this license and during such possession or control the licensee/licensees shall conform and obey all directions given by or on behalf of the Central or State Government regarding the use or employment of such works plants premises and minerals PROVIDED THAT fair compensation which shall be determined in default of agreement by the State Government shall be paid to the licensee/licensees for all loss or damage sustained by him/them by reason or in consequence of the exercise of the powers conferred by this clause and PROVIDED ALSO that the exercise of such powers shall not determine the said term hereby granted or affect the

terms and provisions of these presents further than may be necessary to give effect to the provisions of this clause.

PART IV—RIGHTS OF LICENSEE/LICENSEES

It is hereby further agreed as follows:—

(1) **Transfer of license and fee payable.**—During the subsistence of this licence or of any renewal thereof the licensee/licensees may, with the previous sanction of the State Government transfer his license or any right title or interest therein to a person holding a Certificate of Approval on payment to the State Government of a fee of rupees one hundred.

(2) Subject to compliance with the covenants of this license during the period hereby granted and subject to the satisfaction of the State Government that a longer period is necessary to enable the licensee/licensees to complete the prospecting the licensee/licensees may be granted a renewal or renewals for (i) one or more further periods not exceeding one year each but subject to a total period of four years from the date of the commencement of the original license (i).

(ii) one further period not exceeding one year (ii),

(3) **Right for mining lease.**—On or before the determination of the license or any renewal thereof the licensee/licensees shall have a right subject to the compliance with the said rules to a mining lease in respect of over the whole or part of the area covered by this license as the licensee/licensees may desire, in accordance with the rules in force governing the grant of mining leases at the time of the grant of this licence PROVIDED THAT the State Government may for reasons to be recorded in writing and communicated to the licensee, refuse to grant a mining lease to any such licensee.

(4) **Extension of period of prospecting license.**—If the licensee/licensees before the determination of this license or of any renewal thereof applies for the grant of a mining lease over the whole or any part of the said lands, the period of this license shall be further extended over that part of the said lands until the mining lease is granted.

(5) **Refund of Deposit.**—On such date within six calendar months after the determination of this license or of any renewal thereof, as the State Government shall elect, the amount then remaining in deposit with the State Government and not required to be applied to any of the purposes in Part III of these presents mentioned, shall be refunded to the licensee/licensees or if the licensee/licensees shall have obtained a mining lease over the said lands or any portion thereof, be retained at the credit of the licensee/licensees on account of the fees rents and royalties to become payable under such lease. The amount shall in no case carry any interest whatsoever.

PART V—GENERAL PROVISIONS

It is lastly agreed as follows:—

(1) **Acquisition of land compensation thereof.**—If after the receipt of an offer of compensation for any damage which is likely to arise from the proposed operations of the licensee/licensees in occupier of the surface of any part of the said lands shall refuse his consent to the exercise of the rights and powers reserved to the State Government and demised by this license, the licensee/licensees shall report the matter to the State Government and shall deposit with it the amount offered as compensation and if the State Government is satisfied that the amount of compensation is reasonable or if it is not so satisfied and the licensee/licensees shall have deposited with it such further amount as the State Government may consider reasonable, the State Government shall order the occupier to allow the licensee/licensees to enter upon the said land and carry out such operations as may be necessary for the purpose of the license. In assessing the amount of such compensation the State Government shall be guided by the principles of the Land Acquisition Act.

(2) **Delay in fulfilment of the terms of license due to 'force majeure'.**—Failure on the part of the licensee/licensees to fulfil any of the terms and conditions of this license shall not give the State Government any claim against him/them or be deemed a breach of the license in so far as such failure is considered by the State Government to arise from *force majeure*. If the fulfilment of the licensee/licensees of any of the terms and conditions of this license be delayed from *force majeure*, the period of such delay shall be added to the period fixed by this license.

The expression *force majeure* means Act of God, war, insurrection, riot, civil commotion, strike, tide, tidalwave, storm, flood, lightning, explosion, fire, earthquake and any other happening which the licensee/licensees could not reasonably prevent or control.

(i) for all minerals except mica.

(ii) Mica.

(3) **Service of notices.**—Every notice required to be given to the licensee/licensees shall be given in writing to such person as the licensee/licensees may appoint for the purpose of receiving such notices or if no such appointment is made then the notice shall be sent to the licensee/licensees by registered post addressed to him/them at the address shown in his/their application for the license or at such other address in India as he/they may designate from time to time, and every such service shall be deemed to be proper and valid service upon the licensee/licensees and shall not be questioned or challenged by him.

IN WITNESS WHEREOF these presents have been executed in the manner hereunder appearing the day and year first above written.

SCHEDULE A—THE LAND COVERED BY THE LICENSE

Here insert the description of lands with area, boundaries, names of District, Sub-Division, Thana, etc. and cadastral survey numbers if any. In case a map is attached, refer the map in the description to be inserted.

SCHEDULE B—PROSPECTING FEE

(Here specify the amount of the prospecting fee, and the manner and time of payment).

SCHEDULE C—ROYALTY

(Here insert the rates of royalty, manner and time of payment).

- On the East by and
- On the West by

hereinafter referred to as "the said lands"

PART II—LIBERTIES, POWERS AND PRIVILEGES TO BE EXERCISED AND ENJOYED BY THE LESSEE/LESSEES SUBJECT TO THE RESTRICTION AND CONDITIONS IN PART III

1. **To enter upon land and search for win, work, etc.**—Liberty and power at all times during the term hereby demised to enter upon the said lands and to search for mine bore dig drill for win work dress process convert carry away and dispose of the said mineral/ minerals.

2. **To sink drive and make pits shafts and inclines, etc.**—Liberty and power for or in connection with any of the purposes mentioned in this part to sink drive make maintain and use in the said lands any pits shafts inclines drifts levels waterways airways and other works (and to use maintain deepen or extend any existing works of the like nature in the said lands).

3. **To bring and use machinery equipment, etc.**—Liberty and power for or in connection with any of the purposes mentioned in this part to erect construct maintain and use on or under the said lands any engines machinery plant dressing floors furnaces coke ovens brick-kilns workshops store-houses bungalows godowns sheds and other buildings and other works and conveniences of the like nature on or under the said lands.

4. **To make roads and ways, etc. and use existing roads and ways.**—Liberty and power for or in connection with any of the purposes mentioned in this part to make any tram-

*In case of "Specified" minerals only.

ways railways roads aircraft landing grounds and other ways in or over the said lands and to use maintain and go and repass with or without horses cattle wagons aircrafts locomotives or other vehicles over the same (or any existing tramways railways roads and other ways in or over the said lands) on such conditions as may be agreed to.

5. To get building and road materials, etc.—Liberty and power for or in connection with any of the purposes mentioned in this Part to quarry and get stone gravel and other building and road materials and clay and to use and employ the same and to manufacture such clay into bricks or tiles and to use such bricks or tiles but not to sell any such material bricks or tiles.

6. To use water from streams, etc.—Liberty and power for or in connection with any of the purposes mentioned in this Part but subject to the rights of any existing or future lessees and with the written permission of Deputy Commissioner/Collector to appropriate and use water from any streams water-courses springs or other sources in or upon the said lands and to divert step up or dam any such stream or water course and collect or impound any such water and to make construct and maintain any water-course culverts drains or reservoirs but not as so to deprive any cultivated lands villages buildings or watering places for livestock of a reasonable supply of water as before accustomed nor in any way to foul or pollute any streams or springs. Provided that the lessee/lessees shall not interfere with the navigation in any navigable stream nor shall divest such stream without the previous written permission of the State Government.

7. To use land for stacking heaping or depositing purposes.—Liberty and power to enter upon and use a sufficient part of the surface of the said lands for the purpose of stacking heaping storing or depositing thereon any produce of the mines or works carried on and any tools equipment earth and materials and substances dug or raised under the liberties and powers mentioned in this part.

8. Beneficiation and conveying away of production.—(a) Liberty and power to enter upon and use a sufficient part of the said lands to beneficiate any ore produced from the said lands and to carry away such beneficiated ore.

(b) **To make coke. (To be used in case of coal only).**—Liberty and power upon the said lands to convert into coke any produced from the said lands and to carry away such coke.

9. To clear brush-wood and to fell and utilise trees, etc.—Liberty and power for or in connection with any of the purposes mentioned in this Part and subject to the existing rights of others and save as provided in clause 3 of Part III of this Schedule to clear under-growth and brushwood and to fell and utilise any trees or timber standing or found on the said lands provided that the State Government may ask the lessee/lessees to pay for any trees or timber felled and utilised by him/them at the rates specified by the Deputy Commissioner/Collector or the State Government.

PART III—RESTRICTIONS AND CONDITIONS AS TO THE EXERCISE OF THE LIBERTIES POWERS AND PRIVILEGES IN PART II

1. No building, etc. upon certain places.—No building or thing shall be erected set up or placed and no surface operations shall be carried on in or upon any public pleasure ground burning or burial ground or place held sacred by any class of persons or any house or village site public road or other place which the State Government may determine as public ground nor in such a manner as to injure or prejudicially affect any buildings works property or rights of other persons and no land shall be used for surface operations which is already occupied by persons other than the State Government for works or purposes not included in this lease. The lessee shall not also interfere with any right of way, well or tank.

2. Permission for surface operations in a land not already in use.—Before using for surface operations any land which has not already been used for such operations the lessee/lessees shall give to Deputy Commissioner/Collector of the District two calendar months previous notice in writing specifying the name or other designation of the situation and the extent of the land proposed to be so used and the purpose for which the same is required and the said land shall not be so used if objection is issued by the Deputy Commissioner/Collector within two months after the receipt by him of such notice unless the objections so stated shall on reference to the State Government be annulled or waived.

3. To cut trees in unreserved lands.—The lessee/lessees shall not without the express sanction of the Deputy Commissioner/Collector cut down or injure any timber or trees on the said lands but may without such sanction clear away any brushwood or under-growth which interferes with any operations authorised by these presents. The Deputy Commissioner/Collector or the State Government may require the lessee/lessees to pay

for any trees or timber felled and utilised by him/them at the rates specified by the Deputy Commissioner/Collector or the State Government.

4. To enter upon reserved forests.—Notwithstanding anything in this Schedule contained the lessee/lessees shall not enter upon any reserved forest included in the said lands without previous sanction in writing of the District Forest Officer nor fell cut and use any timber or trees without obtaining the sanction in writing of that Officer nor otherwise than in accordance with such conditions as the State Government may prescribe.

5. No mining operations within 50 yards of public works, etc.—The lessee/lessees shall not work or carry on or allow to be worked or carried on any mining operations at or to any point within a distance of 50 yards from any railway line except with the previous written permission of the Railway Administration concerned or from any reservoir, canal or other public works or buildings or inhabited site except with the previous permission of the Deputy Commissioner/Collector or any other Officer authorised by the State Government in this behalf and otherwise than in accordance with such instructions restrictions and conditions either general or special which may be attached to such permission. The said distance of 50 yards shall be measured in the case of railway reservoir or canal horizontally from the outer toe of the bank or the outer edge of the cutting as the case may be and in case of a building horizontally from the plinth thereof.

Explanation.—For the purposes of this clause the expression 'Railway Administration' shall have the same meaning as it is defined to have in the Indian Railway Act 1890, by Section 3 sub-section (4) of that Act. 'Public Road' shall mean a road which has been constructed by artificially surfaced as distinct from a tract resulting from repeated use.

6. Facilities for adjoining Govt. licences and leases.—The lessee/lessees shall allow existing and future holders of Government licences or leases over any land which is comprised in or adjoins or is reached by the land held by the lessee/lessees reasonable facilities of access thereto.

PROVIDED THAT no substantial hindrance or interference shall be caused by such holders of licences or leases to the operations of the lessee/lessees under these presents and fair compensation shall be made to the lessee/lessees for all loss or damage sustained by the lessee/lessees by reason of the exercise of this liberty.

PART IV—LIBERTIES POWERS AND PRIVILEGES RESERVED TO THE STATE GOVERNMENT

1. To work other minerals.—Liberty and power for the State Government or any lessee or persons authorised by it in that behalf to enter into and upon the said lands and to search for win work dig get raise dress process convert and carry away minerals other than the said minerals and any other substances and for those purposes to sink drive make erect construct maintain and use such pits shafts inclines drifts levels and other lines waterways airways water courses drains reservoirs engines machinery plant buildings canals tramways railways roadways and other works and conveniences as may be deemed necessary or convenient.

PROVIDED THAT in the exercise of such liberty and power no substantial hindrance or interference shall be caused to or with the liberties powers and privileges of the lessee/lessees under these presents and that fair compensation shall be made to the lessee/lessees for all loss or damage sustained by the lessee/lessees by reason or in consequence of the exercise of such liberty and power.

2. To make railways and roads.—Liberty and power for the State Government or any lessee or person authorised by it in that behalf to enter into and upon the said lands and to make upon over or through the same any railways tramways roadways or pipelines for any purpose other than those mentioned in Part II of these presents and to get from the said lands stones gravel earth and other materials for making maintaining and repairing such railways tramways and roads or any existing railways and roads and to go and repass at all times with or without horses cattle or other animals carts wagons carriages locomotives or other vehicles over or along any such railways tramways roads lines and other ways for all purposes and as occasions may require, provided that in the exercise of such liberty and power by such other lessee or person no substantial hindrance or interference shall be caused to or with the liberties powers and privileges of the lessee/lessees under these presents and that fair compensation shall be made to the lessee/lessees for all loss or damage sustained by the lessee/lessees by reason or in consequence of the exercise by such lessee or person of such liberty and power.

PART V—RENTS AND ROYALTIES RESERVED BY THIS LEASE

1. To pay dead rent or royalty whichever is greater.—The lessee/lessees shall not pay in respect of any half yearly period both the dead rent reserved by clause 2 of this

Part and also the sum of the royalties reserved by Clause 3 of this Part but only which-
ever of them is of the greater amount.

2. Rate and mode of payment of dead rent.—Subject to the provision of Clause I of this Part, as from the day of 19 , during the subsistence of this lease the lessee/lessees shall pay to the State Government (in two equal half yearly instalments on the day of and the day of in each year)* certain annual dead rent at the following rates per acre of the lands described in Part I of this Schedule. (Here insert the amount payable under Rule 41(1) (iii) of the Mineral Concession Rules, 1949.)

3. Rate and mode of payment of royalty.—Subject to the provision of Clause I of this Part; the lessee/lessees shall during the subsistence of this lease pay to the State Government at such times and in such manner as the State Government may prescribe royalty as follows. Provided that this rate is subject to such alteration as may be prescribed by the Central Government under the proviso to rule 41(1) (i) of the Mineral Concession Rules, 1949.

(here insert the rate of royalty)

4. Payment of surface rent.—The lessee/lessees shall pay rent to the State Government in respect of all parts of the surface of the said lands which shall from time to time be occupied or used by the lessee/lessees under the authority of these presents at the rate of Rs.....per annum per acre of the area so occupied or used and so in proportion for any area less than an acre during the period from the commencement of such occupation or use until the area shall cease to be so occupied or used and shall so far as possible be restored to its original condition (which rent shall be paid upon each of the half-yearly dates hereinbefore appointed for the payment of the instalments of the certain annual dead rent)* PROVIDED THAT NO such rent shall be payable in respect of the occupation and use of the area comprised in any roads or ways to which the public have full right to access.

PART VI.—PROVISIONS RELATING TO THE RENTS AND ROYALTIES

1. Rent and Royalties to be free from deductions etc.—The rent and royalties mentioned in Part V of this Schedule shall be paid free from any deductions to the State Government at.....and in such manner as the State Government may prescribe PROVIDED ALWAYS and it is hereby agreed that Rs.....the balance standing to the credit of the lessee/lessees on account of the deposit made by him/them as a licensee/licencees over an area which included the said lands shall be retained and accepted by the State Government in satisfaction of the rents and royalties mentioned in Part V until they reach that amount.

2. Mode of computation of royalty.—For the purposes of computing the said royalties the lessee/lessees shall keep a correct account of the mineral/minerals produced and despatched. The accounts as well as the weight of the mineral/minerals in stock or in the process of export may be checked by any officer authorised by the Central or State Government.

(Specify the mode of arriving at pit-head value the rate of royalty chargeable and in case of lump-sum royalty per ton this sum may only be indicated.)

3. Course of action if rents and royalties are not paid in time.—Should the royalty and/or rent reserved and made payable by the lease be not paid within.....next after the date fixed in the lease for the payment of the same, the State Government may enter upon the premises and distrain all or any of the mineral or beneficiated products or moveable property therein and may order the sale of the property so distrained or of so much of it as will suffice for the satisfaction of the rent and/or royalties due, and all costs and expenses occasioned by the non-payment thereof.

PART VII.—THE COVENANTS OF THE LESSEE/LESSEES

1. Lessees to pay rents, royalties, taxes, etc.—The lessee/lessees shall pay the rents and royalties reserved by this lease at such times and in the manner provided in PART V & VI of these presents and shall also pay and discharge all taxes rates assessments and impositions whatsoever being in the nature of public demands which shall from time to time be charged assessed or imposed by the authority of the Central and State Governments upon or in respect of the premises and works of the lessee/lessees in common with other premises and works of a like nature except demands for land revenues.

*Or as the State Government would deem suitable.

2. To maintain and keep boundary marks in good order.—The lessee/lessees shall at his own expense erect and at all times maintain and keep in repair boundary marks and pillars according to the demarcation to be shown in the plan annexed to this lease. Such marks and pillars shall be sufficiently clear of the shrubs and other obstructions as to allow easy identification.

3. To commence operations within a year and work in a workmanlike manner.—Unless the State Government for good cause permits otherwise, the lessee/lessees shall commence operations within one year from the date of execution of the lease and shall thereafter at all times during the continuance of this lease search for win work and develop the said minerals without voluntary intermission in a skilful and workman-like manner and as prescribed under clause 12 hereinafter without doing or permitting to be done any unnecessary or avoidable damage to the surface of the said lands or the crops buildings structures or other property thereon. For the purposes of this clause operations shall include the erection of machinery laying of a tramway or construction of a road in connection with the mine.

4. To indemnify Government against all claims.—The lessee/lessees shall make and pay such reasonable satisfaction and compensation as may be assessed by lawful authority in accordance with the law in force on the subject for all damage injury or disturbance which may be done by him in exercise of the powers granted by this lease and shall indemnify and keep indemnified fully and completely the State Government against all claims which may be made by any person or persons in respect of any such damage injury or disturbance and all costs and expenses in connection therewith.

5. To secure and keep in good condition pits, shafts, etc.—The lessee/lessees shall during the subsistence of this lease well and sufficiently secure and keep open with timber or other durable means all pits shafts and workings that may be made or used in the said lands and make and maintain sufficient fences to the satisfaction of the State Government round every such pit shaft or working whether the same is abandoned or not and shall during the same period keep all workings in the said lands except such as may be abandoned accessible free from water and foul air as far as possible.

6. To strengthen and support the mines to necessary extent.—The lessee/lessees shall strengthen and support to the satisfaction of the Railway Administration concerned or the State Government, as the case may be any part of the mine which in its opinion requires such strengthening or support for the safety of any railway reservoir canal road and any other public works or structures.

7. To allow inspection of workings.—The lessee/lessees shall allow any officer authorised by the Central Government or the State Government in that behalf to enter upon the premises including any building excavation or land comprised in the lease for the purpose of inspecting examining surveying and making plans thereof sampling and collecting any data and the lessee/lessees shall with proper person employed by the lessee/lessees and acquainted with the mines and work effectually assist such officers agents servants and workmen in conducting every such inspection and shall afford them all facilities information connected with the working of the mines which they may reasonably require and also shall and will conform to and observe all orders and regulations which the Central and State Governments as the result of such inspection or otherwise may from time to time see fit to impose.

8. To report accidents.—The lessee/lessees shall without delay send to the Deputy Commissioner/Collector a report of any accident causing death or serious bodily injury or serious injury to property or seriously affecting or endangering life or property which may occur in the course of the operations under this lease.

9. To report discovery of other minerals.—Whenever the lessee/lessees shall find in the said lands any mineral other than the said mineral/minerals the lessee/lessees shall immediately report such discovery in writing to the State Government with full particulars of the nature and position of each such find.

10. To keep records and accounts regarding production and employees etc.—The lessee/lessees shall at all times during the said term keep or cause to be kept at an office to be situated upon or near the said lands correct and intelligible books of accounts which shall contain accurate entries showing from time to time:—

- (1) Quantity and quality of the said mineral/minerals realised from the said lands.
- (2) Quantity of the various qualities of ores beneficiated or converted (for example coal converted into coke).
- (3) Quantities of the various quantities of the said mineral/minerals sold and exported separately.
- (4) Quantities of the various qualities of the said mineral/minerals otherwise disposed of and the manner and purpose of such disposal.

- (5) The prices and all other particulars of all sales of said mineral/minerals.
- (6) The number of persons employed in the mines or works or upon the said lands specifying nationality, qualifications and pay of the technical personnel.
- (7) Such other facts, particulars and circumstances as the Central or the State Governments may from time to time require and shall also furnish free of charge to such officers and at such times as the Central and State Governments may appoint true and correct abstracts of all or any such books of accounts and such information and returns to all or any of the matters aforesaid as the State Government may prescribe and shall at all reasonable times allow such officers as the Central Government or State Government shall in that behalf appoint to enter into and have free access to the said officer for the purpose of examining and inspecting the said books of accounts and to make copies thereof and make extracts therefrom.

11. To maintain plans, etc.—The lessee/lessees shall at all times during the said term maintain at the mine office correct intelligible up-to-date and complete plans and sections of the mines in the said lands. They shall show all the operations and workings and all the trenches, pits and drillings made by him/them in the course of operations carried on by him/them under the lease, faults and other disturbances encountered and geological data and all such plans and sections shall be amended and filled up by and from actual surveys to be made for that purpose at the end of twelve months or any period specified from time to time and the lessee/lessees shall furnish free of charge to the Central and State Governments true and correct copies of such plans and sections whenever these unto required. Accurate records of all trenches, pits and drillings shall show:—

- (a) The subsoil and strata through which they pass.
- (b) Any mineral encountered.
- (c) Any other matter of interest and all data required by the Central and State Governments from time to time.

The lessee/lessees shall also allow any officer authorised by the Central or the State Government to inspect the same at all reasonable times.

12. Act LIII of 1948.—The lessee/lessees shall be bound by such rules as may be issued by the Government of India under Section 6 of the Mines and Minerals (Regulation and Development) Act, 1948 (Act LIII of 1948) and shall not carry on mining or other operations under the said lease in any way other than as prescribed under these rules.

13. To provide weighing machine.—The lessee/lessees shall provide and at all times keep at or near the pit head or each of the pit heads at which the said minerals shall be brought to bank a properly constructed and efficient weighing machine and shall weigh or or cause to be weighed thereon all the said minerals from time to time brought to bank sold exported and converted and also the converted products shall at the close of each day cause the total weights, ascertained by such means of the said minerals ores products raised sold exported and converted during the previous twenty-four hours to be entered in the aforesaid books of accounts. The lessee/lessees shall permit the State Government at all times during the said term to employ any person or persons to be present at the weighing of the said minerals as aforesaid and to keep accounts thereof and to check the accounts kept by the lessee/lessees. The lessee/lessees shall give.....days previous notice in writing to the Deputy Commissioner/Collector of every such measuring or weighing in order that he or some officer on his behalf may be present thereat.

14. To allow test of weighing machine.—The lessee/lessees shall allow any person or persons appointed in that behalf by the State Government at any time or times during the said term to examine and test every weighing machine to be provided and kept as aforesaid and the weights used therewith in order to ascertain whether the same respectively are correct and in good repair and order and if upon any such examination or testing any such weighing machine or weights shall be found incorrect or out of repair or order the State Government may require that the same be adjusted, repaired and put in order by and at the expense of the lessee/lessees and if such requisition be not complied with within fourteen days after the same shall have been made, the State Government may cause such weighing machine or weights to be adjusted, repaired and put in order and the expense of so doing shall be paid by the lessee/lessees to the State Government on demand and if upon any such examination or testing as aforesaid any error shall be discovered in any weighing machine or weights to the prejudice of the State Government such error shall be regarded as having existed for three calendar months previous to the discovery thereof or from the last occasion of so examining and testing the same weighing machine and weights in case such occasion shall be within such period of three months and the said rent and royalty shall be paid and accounted for accordingly.

15. To pay compensation for injury to third parties.—The lessee/lessees shall make and pay reasonable satisfaction and compensation for all damage injury or disturbance of person or property which may be done by or on the part of lessee/lessees in exercise of the liberties and power granted by these presents and shall at all times have harmless and keep indemnified the State Government from and against all suits claims and demands which may be brought or made by any person or persons in respect of any such damage injury or disturbance.

16. Not to obstruct working of other minerals.—The lessee/lessees will exercise the liberties and powers hereby granted in such a manner as to offer no unnecessary or reasonably avoidable obstruction or interruption to the development and working within the said lands of any minerals not included in this lease and shall at all times afford to the Central and State Governments and to the holders of prospecting licenses or mining leases in respect of any such minerals or any minerals within any land adjacent to the said lands as the case may be reasonable means of access and safe and convenient passage upon and across the said lands to such minerals for the purpose of getting working developing and carrying away the same provided that the lessee/lessees shall receive reasonable compensation for any damage or injury which he may sustain by reason or in consequence of the use of such passage by such lessees or holders of prospecting licenses.

17. Liberty to assign or transfer his rights.—The lessee/lessees may assign this lease or transfer any right title or interest hereunder to a person holding a certificate of approval with the previous written sanction of the State Government on payment of a fee of Rs. 100. The lessee/lessees shall not allow this lease or any right title or interest hereunder to be attached or sold in compliance with any decree or order of a Court or Revenue Officer. Provided also the assignment or transfer as aforesaid the instrument thereof shall be registered within three calendar months from the date of its completion.

***18. Not to be financed or controlled by a Trust Corporation firm or person.**—The lease shall not be controlled and the lessee/lessees shall not allow themselves to be controlled by any Trust Syndicate Corporation Firm or person except with the written consent of the Central Government. The lessee/lessees shall not enter into or make any arrangement compact or understanding whereby the lessee/lessees will or may be directly or indirectly financed by or under which the lessee's/lessees' operations or undertakings will or may be carried on directly or indirectly by or for the benefit of or subject to the control of any Trust Syndicate Corporation Firm or person unless with the written sanction given prior to such arrangement compact or understanding being entered into or made of the Central Government and any or every such arrangement compact or understanding as aforesaid (entered into or made with such sanction as aforesaid) shall only be entered into or made and shall always be subject to an express condition binding upon the other party or parties thereto that on the occasion of a state of emergency of which the President of India in his discretion shall be the sole judge it shall be terminable if so required in writing by the State Government and shall in the event of any such requisition being made by forthwith thereafter determined by the lessee/lessees accordingly.

19. Lessee shall deposit any additional amount necessary other than security deposits.—Whenever the security deposit of Rs. 1,000/500 or any part thereof or any further sum hereafter deposited with the State Government in replenishment thereof shall be forfeited or applied by the Central or State Governments pursuant to the power hereinafter declared in that behalf the lessee/lessees shall deposit with the State Government such further sum as may be sufficient with the unappropriated part thereof to bring the amount in deposit with the State Government up to the sum of Rs. 1,000/500.

20. Delivery of workings in good order to State Government after determination of lease.—The lessee/lessees shall at the expiration or sooner determination of the said term or any renewal thereof deliver up to the State Government all mines pits shafts inclines drifts levels waterways airways and other works now existing or hereafter to be sunk or made on or under the said lands except such as have been abandoned with the sanction of the State Government and in an ordinary and fair course of working all engines machinery plant buildings structures other works and conveniences which at the commencement of the said term were upon or under the said lands and all such machinery set up by the lessee/lessees below ground which cannot be removed without causing injury to the mines or works under the said lands (except such of the same as may with the sanction of the State Government have become disused) and all buildings and structures of bricks or stone erected by the lessee/lessees above ground level in good repair order and condition and fit in all respects for further working of the said mines and the said minerals.

*This clause can be inserted only with the approval of the Central Government.

21. Right of pre-emption.—(a) The State Government shall from time to time and at all times during the said term have the right (to be exercised by notice in writing to the lessee/lessees) of pre-emption of the said minerals (and all products thereof) lying in or upon the said lands hereby demised or elsewhere under the control of the lessee/lessees and the lessee/lessees shall with all possible expedition deliver all minerals or products of minerals purchased by the State Government under the power conferred by this provision in the quantities at the times in the manner and at the place specified in the notice exercising the said right.

(b) Should the right to pre-emption conferred by this present provision be exercised and a vessel chartered to carry the minerals or products thereof procured on behalf of the State Government or the Central Government be detained on demurrage at the port of loading the lessee/lessees shall pay the amount due for demurrage according to the terms of the charter party of such vessel unless the State Government shall be satisfied that the delay is due to causes beyond the control of the lessee/lessees.

(c) The price to be paid for all minerals or products of minerals taken in pre-emption by the State Government in exercise of the right hereby conferred shall be the fair market price prevailing at the time of pre-emption PROVIDED THAT in order to assist in arriving at the said fair market price the lessee/lessees shall if so required furnish to the State Government for the confidential information of the Government particulars of the quantities descriptions and prices of the said minerals or products thereof sold to other customers and of charters entered into for freight for carriage of the same and shall produce to such officer or officers as may be directed by the State Government original or authenticated copies of contracts and charter parties entered into for the sale or freightage of such minerals or products.

(d) In the event of the existence of a state of war or emergency (of which existence the President of India shall be the sole judge and a notification to this effect in the Gazette of India shall be conclusive proof) the State Government with the consent of the Central Government shall from time to time and at all times during the said term have the right (to be exercised by a notice in writing to the lessee/lessees) forthwith take possession and control of the works plant machinery and premises of the lessee/lessees on or in connection with the said lands or operations under this lease and during such possession or control the lessee/lessees shall conform and obey all directions given by or on behalf of the Central or State Government regarding the use or employment of such works plants premises and minerals PROVIDED THAT fair compensation which shall be determined in default of agreement by the State Government shall be paid to the lessee/lessees for all loss or damage sustained by him/them by reason or in consequence of the exercise of the powers conferred by this clause and PROVIDED ALSO that the exercise of such powers shall not determine the said term hereby granted or affect the terms and provisions of these presents further than may be necessary to give effect to the provisions of this clause.

PART VIII—THE COVENANTS OF THE STATE GOVERNMENT

1. Lessee may hold and enjoy rights quietly.—The lessee/lessees paying the rents and royalties hereby reserved and observing and performing all the covenants and agreements herein contained and on the part of the lessee/lessees to be observed and performed shall and may quietly hold and enjoy the rights and premises hereby demised for and during the term hereby granted without any unlawful interruption from or by the State Government, or any person rightfully claiming under it.

2. Acquisition of lands of third parties and compensation thereof.—If in accordance with the provision of Clause 4 of Part VII of this Schedule the lessee/lessees shall offer to pay to an occupier of the surface of any part of the said lands compensation for any damage or injury which may arise from the proposed operations of the lessee/lessees and the said occupier shall refuse his consent to the exercise of the right and powers reserved to the State Government and demised to the lessee/lessees by these presents and the lessee/lessees shall report the matter to the State Government and shall deposit with it the amount offered as compensation and if the Central and State Governments are satisfied that the amount of compensation offered is fair and reasonable or if it is not so satisfied and the lessee shall have deposited with it such further amount as the State and Central Governments shall consider fair and reasonable the State Government shall order the occupier to allow the lessee/lessees to enter the land and to carry out such operations as may be necessary for the purpose of this lease. In assessing the amount of such compensation the State Government shall be guided by the principles of the Land Acquisition Act.

3. To renew.—If the lessee/lessees be desirous of taking a renewed lease of the premises hereby demised or of any part or parts of them for a further term of..... years from the expiration of the term hereby granted and of such desire shall prior to the

expiration of the last mentioned term give to the State Government six calendar months previous notice in writing and shall pay the rents and royalties hereby reserved and shall observe and perform the several covenants and agreements herein contained and on the part of the lessee/lessees to be observed and performed upto the expiration of the term hereby granted the State Government will upon the request and at the expense of the lessee/lessees and upon his executing and delivering to the State Government if required a counterpart thereof execute and deliver to the lessee/lessees a renewed lease of the said premises for the further term of.....years at such rates and royalties and on such terms and subject to such covenants and agreements, including this present covenant to renew as shall be in accordance with the Mineral Concession Rules, 1949, applicable to(name of minerals) on the day next following the expiration of the term hereby granted.

4. Liberty to determine, surrender or relinquish any part of the leased area.—The lessee/lessees may at any time determine this lease by giving not less than 12 calendar months notice in writing to the State Government and upon the expiration of such notice provided that the lessee/lessees shall upon such expiration render and pay all rents royalties compensation for damages and other moneys which may then be due and payable under these presents to the lessor or any other person or persons and shall deliver up these presents to the State Government then this present lease and the said term and the liberties powers and privileges hereby granted shall absolutely cease and determine but without prejudice to any right or remedy of the lessor in respect of any breach of any of the covenants or agreements contained in these presents.

5. Refund of security deposit.—On such date as the State Government may elect within 12 calendar months after the determination of this lease or of any renewal thereof, the amount of the security deposit paid in respect of this lease and then remaining in deposit with the State Government and not required to be applied to any of the purposes mentioned in this lease shall be refunded to the lessee/lessees. No interest shall run on the security deposit.

PART IX—GENERAL PROVISIONS

1. In case of breach of any of the conditions of the lease other than mentioned in clauses 2 and 3 of this Part then the State Government may require the lessee/lessees or his/their transferees or assignees to pay penalty not exceeding an amount equivalent to twice the amount of the annual dead rent specified under clause 2 of Part V.

2. Obstruction to inspection.—In case the lessee/lessees or his/their transferees or assignees does/do not allow or obstruct entry or inspection, by the officers authorised by the Central or State Government, the State Government may cancel the lease and forfeit the whole or part of the deposit made under rule 36 of the Mineral Concession Rules, 1949.

3. In case the lessee/lessees or his/their transferees or assignees commit any breach of any of the conditions specified in clauses (i), (ii), (iii), (iv), (v), (vi), (vii), (viii), (ix) and (x) of rule 41(1) of the Mineral Concession Rules, 1949, then and in any such case the State Government shall give notice in writing to the lessee/lessees or his/their transferees or assignees as the case may be asking him/them to remedy the breach within 60 days from the date of the notice and if the breach is not remedied within such period the State Government may determine the lease provided that nothing herein contained shall debar the State Government from enforcing any other right or remedy that the State Government may have against the lessee/lessees or his/their transferees or assignees under any other provisions herein contained.

4. To lay penalty in case of breach.—In case of breaches of the covenants and agreements by the lessee/lessees on which the aforesaid notice has been given the State Government in lieu of giving notice may impose such penalty not exceeding twice the amount of annual dead rent specified in clause 2 of Part V.

5. Failure to fulfil the terms of lease due to "Force Majeure."—Failure on the part of the lessee/lessees to fulfil any of the terms and conditions of this lease shall not give the Central or State Government any claim against the lessee/lessees or be deemed a breach of this lease, in so far as such failure is considered by the said Government to arise from *force majeure*, and if through *force majeure* the fulfilment by the lessee/lessees of any of the terms and conditions of this lease be delayed, the period of such delay shall be added to the period fixed by this lease. In this clause the expression "Force Majeure" means act of God, war, insurrection, riot, civil commotion, strike, earthquake, tide, storm, tidal wave, flood, lightning, explosion, fire, earthquake and any other happening which the lessee/lessees could not reasonably prevent or control.

6. Lessee to remove his properties on the expiry of lease.—The lessee/lessees having first paid and discharged the rents and royalties payable by virtue of these presents may

at the expiration or sooner determination of the said term or within six calendar months thereafter (unless the lease shall be determined under clauses 1 and 2 of this Part and in that case at any time not less than three calendar months nor more than six calendar months after such determination) take down and remove for his own benefit all or any engines machinery plant buildings structures tramways railways and other works erections and conveniences which may have been erected set up or placed by the lessee/lessees in or upon the said lands and which the lessee/lessees is/are not bound to deliver to the State Government under clause 14 of Part VII of this Schedule and which the State Government shall not desire to purchase.

7. Forfeiture of property left more than six months after determination of lease.—If at the end of six calendar months after the expiration or sooner determination of the said term or after the date from which any surrender by the lessee/lessees of a part or parts of the said lands under the provision contained in Clause 4 of Part VIII of this Schedule become effective there shall remain in or upon the said land or the surrendered part or parts thereof as the case may be any engines machinery plant buildings structures tramways railways and other work erections and conveniences or other property which are not required by the lessee/lessees in connection with his/their operations in those parts of the said lands which he/they has/have not surrendered or in any other lands held by him/them under prospecting licence or mining lease the same shall if not removed by the lessee/lessees within one calendar month after notice in writing requiring their removal has been given to the lessee/lessees by the State Government be deemed to become the property of the State Government and may be sold or disposed of in such manner as the State Government shall deem fit without liability to pay any compensation or to account to the lessee/lessees in respect thereof.

8. Notices.—Every notice by these presents required to be given to the lessee/lessees shall be given in writing to such person resident on the said lands as the lessee/lessees may appoint for the purpose of receiving such notices and if there shall have been no such appointment then every such notice shall be sent to the lessee/lessees by registered post addressed to the lessee/lessees at the address recorded in this lease or at such other address in India as the lessee/lessees may from time to time in writing to the State Government designate for the receipt of notices and every such service shall be deemed to be proper and valid service upon the lessee/lessees and shall not be questioned or challenged by him.

IN WITNESS WHEREOF these presents have been executed in the manner hereunder appearing the day and year first above written.

MODEL FORM

GOVERNMENT OF.....

Application for Certificate of Approval

Dated day of 19 .

To

Through

Sir,

I,..... (for and on behalf of.....) have the honour
(Name of Co. Syndicate or Firm)

to request that a Certificate of Approval under the Mineral Concession Rules, 1949, published under the Government of India, Ministry of Works, Mines and Power Notification No. M-II-155-(24)-2 dated 18-10-1949 be granted to enable me to acquire Prospecting Licenses and Mining Leases under the said Rules.

2. The fee of Rs. 100/- payable for the grant of the Certificate has been paid in the manner prescribed by the State Government in their Notification No.....dated the

(To be completed by the State Government)

3. The required particulars are given below.

Particulars

1. Name of the individual, firm or company.
2. Nationality of the individual or place of registration or incorporation of the firm or company.
3. Profession of the individual, or nature of business of the firm or company.
4. Address of the individual, firm or company.
5. Nature of Certificate of Approval required (Mention here general or restricted and if restricted for what minerals).
6. Details of technical qualifications and mining experience of the individual, firm or company, if any.
7. (i) The amount of capital that the individual, firm or company can command to carry on a well planned mining operations.
(ii) Bank reference, if any.
8. The amount of income-tax or land revenue paid annually, if any.
9. Does the applicant hold a Certificate of Approval, Prospecting License or Mining Lease in any other State? If so, give number and date of such certificates, licenses or leases held and when they are due to expire.
10. Special reasons if any as to why the applicant wants to undertake mining industry in the State.
11. Any other particulars which the applicant wishes to furnish.
12. Manner and details of payment of the fee prescribed in Rule 9(2) of the Mineral Concession Rules, 1949.

Yours faithfully,

Place.....
Date.....

Signature and designation of the applicant.

GOVERNMENT OF.....

Application for Prospecting License

Dated day of 19 .

To
Through
Sir,

I/We have the honour to request that a Prospecting License under the Mineral Concession Rules, 1949, published under the Government of India, Ministry of Works, Mines and Power Notification No. M-II-155(24)-2 dated 18th October 1949, be granted to me/us.

2. A sum of Rs.....being the fee in respect of this application at the rate of Rs. 50/- for the first sq. mile and Rs. 10/- for each additional sq. mile or part thereof payable under rule 15 of the said Rules, has been deposited in the manner prescribed by the State Government in their Notification No.....dated the.....
(To be completed by the State Government).

Received at.....(time) on.....(date).

3. The required particulars are given below.

Particulars

1. Name of individual/s, firm or company applying.
2. Nationality of individual/s or place of registration or incorporation of firm or company.
3. Profession of individual/s or nature of business of firm or company.
4. Address of the individuals, firm or company.
5. Whether the application is for a fresh concession or for renewal of a concession previously granted.
6. No. and date of the notification of the grant or renewal of the Certificate of Approval (copy attached).
7. Mineral or minerals which the applicant intends to prospect.
8. Period for which the Prospecting License is required.
9. Extent of the area the applicant wants to prospect.
10. Details of area, Khasra Nos. of the fields and their areas.
Village/villages/range or sub range/Taluq/District.
11. Particulars of map or plan of the area attached.

12. No. and date of Income-tax Clearance Certificate from the Income-tax Officer (copy attached).
13. Any other particulars which the applicant wishes to furnish.
14. If the applicant intends to supervise the works, his previous experience of prospecting should be explained; if he intends to appoint a manager, the name of such manager, his qualification, nature and extent of his previous experience should be specified.
15. Manner and details of payment of the fee prescribed in rule 15 of the Mineral Concession Rules, 1949.

I/We do hereby declare that particulars furnished above are correct and am/are ready to furnish any other details that may be required and the security deposit before the grant of license.

Signature and designation of the applicant.

MODEL FORM

GOVERNMENT OF.....

Application for Mining Lease

Dated *day of* 19 .

To
Through
Sir,

I/We have the honour to apply for the grant of Mining Lease under the Mineral Concession Rules, 1949, published by the Government of India, Ministry of Works, Mines and Power Notification No. M-II-155(24)-2 dated 18th October 1949.

2. A sum of Rs.....and Rs.....respectively being the fees in respect of this application and the preliminary expenses payable under rules 28 and 29 of the said rules have been deposited in the manner prescribed by the State Government in their Notification No.....dated the.....(To be completed by the State Government).

Received at.....(time) on.....(date).

3. The required particulars are given below.

Particulars

1. Name of the applicant individual/s, firm or company.
2. Nationality of the individual/s or place of registration or incorporation of firm or company.
3. Profession of individual/s or nature of business of firm or company and place of business.
4. Address of the individual/s, firm or company.
5. Whether the application is for a fresh concession or for renewal of a concession previously granted.
6. No. and date of the notification of the grant or renewal of the Certificate of Approval (copy attached).
7. Mineral or minerals which the applicant intends to mine.
8. Period for which the Mining Lease is required.
9. Details of area in respect of which lease is required.

Details of area in respect of which lease is required.				Area
District	Taluq.	Village	Khasra No. Areas	<hr/> Guntas
				<hr/> Total

10. Particulars of map or plan covering the area mentioned at (9) above attached
11. Brief description of the area.
12. Do you hold a Prospecting License over the area mentioned as (9) above? If so give its No. and date of grant and the date when it is due to expire.
13. Area and minerals within the jurisdiction of the State Government for which the applicant or any person joint in interest with him

Mineral. Area. Taluk. District.

- (a) Already holds under Mining Lease(s)
- (b) has already applied for but not granted; or
- (c) being applied for simultaneously.
- 14. Nature of joint interest, if any under (13) above.
- 15. Approximate quantity of mineral expected to be raised during the first year.
- 16. Means by which the mineral is to be raised, *i.e.*, by hand labour or mechanical or electrical power.
- 17. Manner in which the mineral raised is to be utilised:—
 - (a) for manufacture in India.
 - (b) for exports to foreign countries.
 In the former case the industries in connection with which it is required, should be specified. In the latter case, the countries to which the mineral will be exported and whether the mineral is to be exported after processing or in raw form should be stated.
- 18. If the applicant intends to supervise the works his previous experience of mining should be explained; if he intends to appoint a manager, the name of such manager, his qualifications, and the nature and extent of his previous experience should be specified.
- 19. Any other particulars which the applicant wishes to furnish.
- 20. Manner and details of payment of the fee prescribed in rule 28 of the Mineral Concession Rules, 1949.
- *21. Manner and details of payment of the deposit prescribed in rule 29 of the Mineral Concession Rules, 1949.
- 22. No. and date of Income-tax Clearance Certificate from the Income-tax Officer (copy attached).

I/We do hereby declare that particulars furnished above are correct and am/are ready to furnish any other details, including accurate plans and security deposit, etc., as required by you before the grant of the lease.

Yours faithfully,

Place: _____
 Date: _____ *Signature and designation of the applicant.*

MODEL FORM OF APPLICATION FOR REVIEW UNDER RULE 57 OF THE MINERAL CONCESSION RULES, 1949

- 1. Name and address of individual/s, firm or company applying.
- 2. Profession of individual/s or nature of business.
- 3. Whether the review application is against the order of the State Government—
 - (i) Refusing to grant a certificate of approval, prospecting license or mining lease.
 - (i-A) refusing to renew a certificate of approval.
 - (ii) cancelling a prospecting license or mining lease.
 - (iii) refusing to permit transfer of a prospecting license under rule 23 (iv) or a mining lease under rule 37.
- 4. No. and date of the order of the State Govt. against which the review application is filed (copy attached).
- 5. No. and date of the Notification of the grant of renewal of the certificate of approval (copy attached).
- 6. Mineral or minerals for which the review application is filed.
- 7. Details of the area in respect of which the revision application is filed. District, Taluk, Village, Khasra No.
- Total area claimed. (A map or plan of the area(s) to be attached).
- 8. Whether application fee of Rs. 100/- has been deposited in the manner prescribed in Rule 58 of the Mineral Concession Rules, 1949. If so, a copy of the treasury receipt should be attached.
- 9. Whether the review application has been filed within two months of the date of the order passed by the State Government.
- 10. If not, the reasons for not presenting it within the prescribed limit as provided in Rule 57(2) of the Mineral Concession Rules, 1949.
- 11. Grounds of review.

Yours faithfully,

Place.....
 Date..... *Signature and designation of the applicant.*

*Where the State Governments have not generally determined the amount to be paid under rule 29 of the Mineral Concession Rules, the maximum amount is to be paid.

MINERALS CONSERVATION AND DEVELOPMENT RULES, 1955

Arrangement of Paragraphs

CHAPTER I—PRELIMINARY

CHAPTER II—NOTICES AND RETURNS

CHAPTER III—SINKING SHAFTS AND NEW BORE-HOLES

CHAPTER IV—ISSUING DIRECTIONS AND EXAMINATION OF MINERALS

CHAPTER V—POWER OF REVISION

CHAPTER VI—OFFENCES AND PENALTIES

SCHEDULE AND FORMS

MINERALS CONSERVATION AND DEVELOPMENT RULES, 1955¹

In exercise of the powers conferred by section 6 of the Mines and Minerals (Regulation and Development) Act, 1948 (LIII of 1948), the Central Government is pleased to make the following rules for the conservation and development of minerals, namely:

THE MINERALS CONSERVATION AND DEVELOPMENT RULES, 1955

CHAPTER I—PRELIMINARY

1. (a) The rules may be called the Minerals Conservation and Development Rules, 1955.
(b) They shall come into force on the first day of April, 1955.
2. In these rules, unless the context otherwise requires—
 - (a) “the Act” means the Mines and Minerals (Regulation and Development) Act, 1948 (LIII of 1948);
 - (b) “agent”, when used in relation to a mine, means any person, whether appointed as such or not, who acts as the representative of the owner in respect of the management of the mine or any part thereof;
 - (c) “boring” or “drilling” means the penetration of alluvial material, rocks or formations by holes of relatively small diameter for studying the structure of mineral bearing formation and for drawing samples therefrom;
 - (d) “development” means the driving of an opening to or in a proved ore body or seam, or removing over-burden of unproductive or waste materials as preparatory, to mining or stoping;
 - (e) “Director” means the Director of the Indian Bureau of Mines;
 - (f) “Form” means a form set out in the Schedule to these rules;
 - (g) “manager”, when used in relation to a mine, means any person appointed by the owner or agent for the purposes of controlling, managing and directing the operations of the mine or of any part thereof, and includes the owner or the agent if he appoints himself to be such manager under section 17 of the Mines Act, 1952 (XXXV of 1952);
 - (h) “mining” means the process of extracting ores or minerals from mineral deposits by opencast or underground methods or boring; and includes ore-dressing, concentration, beneficiation and processing operations;
 - (i) “owner”, when used in relation to a mine means any person who is the immediate proprietor or lessee or occupier of the mine or of any part thereof and in the case of a mine the business whereof is being carried by a liquidator or receiver, such liquidator or receiver, but does not include a person who merely receives a royalty, rent or fine from the mine, or is merely the proprietor of the mine subject to any lease, grant or license for the working thereof, or is merely the owner of the soil and not interested in the minerals of the mine but any contractor for the working of a mine or any part thereof shall be subject to these rules in like manner as if he were an owner, but not so as to exempt the owner from any liability;

¹ These Rules were published under the Ministry of Natural Resources and Scientific Research Notification No. S.R.O. 608 dated the 15th March 1955 as amended by the Corrigendum Notification No. S.R.O. 2018 dated the 8th September, 1955.

- (j) "prospecting" means operations to gain knowledge of the shape, size, extent and quality of a mineral deposit;
 - (k) "section" means a section of the Act;
 - (l) "shaft" means a vertical or inclined opening giving access to and serving various levels below ground of a mine; and
 - (m) "stope" means any underground excavation, other than development working made for the purpose of winning ores or minerals.
3. Nothing in these rules shall apply to:
- (i) petroleum and natural gas,
 - (ii) coal,
 - (iii) minor minerals, and
 - (iv) minerals declared as prescribed substances for the purposes of the Atomic Energy Act, 1948 (XXIX of 1948).

Explanation.—The expression "minor mineral" has the meaning assigned to it in the Mineral Concession Rules, 1949.

CHAPTER II—NOTICES AND RETURNS

4. Every holder of a prospecting licence shall send to the Director a notice in Form A of the commencement of prospecting operations within thirty days from the date of such commencement.

5. Every holder of a prospecting license shall submit to the Director returns in triplicate in Form B, so as to reach him not later than the 31st day of January of every year, following the year to which the returns relate:

Provided that where prospecting operations are abandoned, such returns shall be submitted to the Director in the Form aforesaid within a period of thirty days from the date of such abandonment.

6. Every owner, agent or manager of a mine shall send to the Director a notice in Form C of the opening of the mine within thirty days from the date of the commencement of mining operation in such mine.

7. Every owner, agent or manager of a mine shall send a notice to the Director of any change in the name of the mine within thirty days of such change.

8. Every holder of a prospecting licence or a mining lease who transfers or assigns his license or lease or any right, title or interest thereunder to another person shall, within thirty days of the date of such transfer or assignment send a notice in Form D to the Director.

9. Every owner, agent or manager of a mine who intends to abandon the mine shall send to the Director a notice at least thirty days prior to the intended date of such abandonment:

Provided that when such abandonment takes place on the occurrence of a natural phenomenon beyond the control of such owner, agent or manager, the notice required under this rule shall be submitted to the Director within a period of fifteen days of such occurrence.

10. Every owner, agent or manager of a mine, when the mine is abandoned or work thereon is discontinued for more than sixty days shall send to the Director a notice in triplicate in Form E, so as to reach him within fifteen days from the date of such abandonment, or ninety days from the date of such discontinuance.

11. Where any mine or part of a mine is abandoned, or work thereon is discontinued for a period exceeding one year, the owner, agent or manager of the mine shall, within three months of the date of such abandonment or within fifteen months of the date of such discontinuance of the mining operations, send to the Director one copy each of the plans and sections setting forth as accurately as possible the work done on the mine upto the time of such abandonment or discontinuance, as the case may be:

Provided that if a change of ownership takes place at any time before the expiry of three months after the date of such abandonment or before the expiry of fifteen months after the date of such discontinuance, one copy each of the said plans and sections shall be submitted to the Director by the owner, agent or manager showing as accurately as possible the work done on the mine at the time of abandonment or discontinuance, as the case may be, within thirty days of the date of such change of ownership.

12. Every owner, agent or manager of a mine shall, when a mine is reopened after abandonment or discontinuance, send to the Director a notice in triplicate in Form F within thirty days from the date of such re-opening.

13. Every owner, agent or manager of a mine shall send to the Director a notice in Form G intimating his intention to commence the stoping of any vein, load, reef or mineral deposit, so as to reach the Director at least thirty days prior to the date of the commencement of such operations.

14. Every owner, agent or manager of a mine shall submit to the Director the under-mentioned returns in triplicate in the Forms and within the time specified in respect of every such return in the following clauses namely:—

(a) an annual return in Form 'H' in respect of all minerals, other than manganese, chromite, mica, iron ore, ilmenite, copper ore, lead and zinc ores, gold and precious metals, precious and semi-precious stones, not later than the first day of March of every year following the year to which the return relates;

(b) a quarterly return:—

(i) in Form I. in respect of manganese ore,

(ii) in Form J in respect of chromite,

(iii) in Form K in respect of mica,

(iv) in Form L in respect of iron ore,

(v) in Form M in respect of ilmenite,

(vi) in Form N in respect of copper ore,

(vii) in Form O in respect of lead and zinc ores,

(viii) in Form P in respect of gold and precious metals,

(ix) in Form Q in respect of precious and semi-precious stones, and within thirty days of the expiry of every quarter to which the return relates.

²[A copy of all the returns shall also be sent simultaneously to the State Government concerned.]

15. Every owner of a mine shall, when any appointment is made of an agent or manager, or when any change occurs in the address of such agent or manager, send a notice of such appointment or change of address, and the date thereof, to the Director within thirty days of the date of such appointment or change of address.

CHAPTER III—SINKING SHAFTS AND NEW BORE-HOLES *

16. Every owner, agent or manager of a mine shall send a notice in triplicate in Form R to the Director, within fifteen days after the commencement of the following mining operations, that is to say when it is intended,—

(a) to sink a trial shaft or bore-hole to a depth exceeding 50 feet from the surface; or

(b) to extend an existing shaft or bore-hole to a depth exceeding 50 feet; or

(c) to sink a new shaft or bore-hole commencing from underground working.

17. Every owner, agent or manager of a mine shall keep a record in Form S of all shafts or bore-holes exceeding 50 feet in depth and shall retain all records and samples of the strata passed through for a period of not less than six months after the completion of the work or abandonment thereof.

18. Every owner, agent or manager of a mine shall preserve intact all cores and specimens of different types of rocks and minerals obtained during drilling or sinking operations, and arrange them to be laid out in serial order with identification marks, showing the progressive depths at which they were obtained. Such specimens shall not be broken except for the purpose of analysis, in which case, representative samples of the specimens so broken will be preserved.

19. When the ownership of a prospecting license or a mining lease is transferred at any time during the period when the operation of sinking a shaft or bore-hole is in progress or within six months after the completion of sinking, drilling or boring operations, all records, specimens, cores and fragment of rocks, obtained during sinking, shall be transferred by the transferor to the transferee and thereupon it shall be the duty of the transferee, his agent or manager to comply with all the requirements of rules 16, 17 and 18.

20. For the purpose of carrying out of prospecting and mining operations in accordance with the approved practice, every holder of a prospecting license or a mining lease shall employ a whole-time or a part-time geologist or mining engineers possessing such qualifications as the Central Government may, by general or a special order, specify.

² Inserted by the Ministry of National Resources and Scientific Research Notification No. S.R.O. 1742 dated the 4th August, 1955.

CHAPTER IV—ISSUING DIRECTIONS AND EXAMINATION OF MINERALS

21. Every owner, agent or manager of a mine shall comply with such directions, being directions for the purposes of providing for the conservation and systematic development of minerals, as the Director may, from time to time, by general or special order make with the prior approval of the Central Government ³[in consultation with the State Governments concerned.]

22. Every owner, agent or manager of a mine shall, on a requisition made in this behalf by the Director, furnish to him within such time as may be specified in the requisition, a statement showing the broad features of the scheme of development of the mine, together with the requisite plan and sections.

23. The Director, or any person authorised by him in this behalf, may examine any mineral at any mine or new bore-holes from which such minerals are extracted and draw samples therefrom for the purpose of these rules.

24. Where an order has been passed by the Central Government prohibiting the grant of a prospecting licence or a mining lease in respect of any mineral or any area under rules made under section 5, the Central Government may, by order, determine the manner in which, and the agency by which, such mineral or area, as the case may be, shall be developed and worked, and thereupon the State Government shall act accordingly.

CHAPTER V—POWERS OF REVISION

25. (1) Any person aggrieved by any direction made by the Director under rule 21 may, within thirty days of the date of issue of such direction, make an application to the Central Government for revision of such direction and the Central Government on receipt of every such application shall refer it for a report to a Board consisting of not more than two officials and an equal number of persons representing the owners, agents or managers of mines and one chairman, all to be appointed by the Central Government. Provided that the Central Government may entertain an application for revision after the expiry of the said period of thirty days, if it is satisfied that the applicant was prevented by sufficient cause from making the application in time.

(2) The Central Government may, on receiving the report from the Board, confirm, vary or reverse the direction made by the Director or may pass such other order as it deems fit, and thereafter the direction made by the Director under rule 21 shall, where necessary, be deemed to have been amended accordingly.

CHAPTER VI—OFFENCES AND PENALTIES

26. If any owner, agent or manager refuses or without lawful excuse (the burden of proving which shall lie upon such owner, agent or manager, as the case may be), neglects:

(a) to furnish in due time any of the notices or returns mentioned in rules 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 19, or where he furnishes particulars in such notices or returns which are false and which he either knows or believes to be false or does not believe to be true, or

(b) to furnish in due time a scheme of development as required by rule 22, or

(c) to maintain records and preserve cores and samples as required by rules 17, 18 and 19, or

(d) to comply with any directions issued by the Director under rule 21, or

(e) to allow the Director or any person authorised by him in this behalf to examine any mineral, or to draw samples therefrom as provided in rule 23; he shall

be punishable with the imprisonment which may extend to six months or with fine which may extend to one thousand rupees or with both.

27. No Court shall take cognizance of any offence punishable under these rules otherwise than on a complaint in writing made by an officer authorised in this behalf by the Central Government.

³ Inserted by Notification No. S.R.O. No. 1742 dated the 4th August, 1955.

SCHEDULE—[See Rule 2 (f).]**FORM A—(See Rule 4)**

Notice of the commencement of Prospecting Operations in respect of.....
(name of mineral or minerals).

IMPORTANT

Notice in this Form shall be sent within 30 days
of commencement of prospecting operations.

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

Sir,

I have to furnish the following particulars:—

1. Name of the Licensee.
2. Address of the Licensee.
3. Area under licence.
4. Location of the area:—
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or steamer ghat and the distance therefrom.
 - (vii) Means of conveyance from the Railway Station or steamer ghat to the prospect.
 - (viii) Nearest Dak Bungalow or rest house.
5. Date of grant of license.
6. Period of License.
7. Nature of Prospecting Operations conducted or proposed to be conducted.
 - (a) Nature of Drilling.
 - (b) No. and sizes of trial pits or trenches.

(A brief description of the mineral outcrops may be furnished, if any.)
8. Name and qualifications of the Geologist or Mining Engineer in charge of operations.

Signature.....
(Full name of the signatory)

Designation.....

Address.....

Date of Despatch.....

FORM B—(See Rule 5)

Progress report of prospecting work in respect of.....
(the name of the mineral/s) for the calendar year.....

IMPORTANT

This Form must be returned duly filled in
within 31st January each year or within
30 days after the abandonment of prospecting
operations.

FILED

Submitted to:—

The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

1. Name of the Licensee.
2. Nature of the firm (*).
3. Address of the firm.
4. Area under license.....(sq. miles).
5. Location:
 - (i) Village.
 - (ii) Taluq.

* (1) Under item 2 state clearly whether the firm is private limited or public limited, giving the place of registration or incorporation.

- (iii) District.
- (iv) State.
- 6. Date of grant of license.
- 7. Period of license.
- 8. Prospecting work done:
 - (a) Pitting.....feet.
 - (b) Trenching.....feet.
 - (c) Drilling.....feet.
- 9. Nature and structure (*) of the ore body.
- 10. Quantity of mineral extracted.
- 11. Analysis of the ore or minerals.
- 12. If abandoned:
 - (i) Date of abandonment.
 - (ii) Reasons for abandonment.

Signature.....
(Full name of the signatory)

FORM C—(See Rule 6)

Notice of opening of a mine in respect of.....(mine or minerals).

IMPORTANT

Notice in this Form shall be sent within 30 days of the commencement of mining operation.

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

Sir,

I have to furnish the following particulars:—

1. Name of mine and date of opening/reopening.
2. Situation of mine:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or Steamer ghat and distance therefrom.
 - (vii) Means of conveyance from Railway Station or Steamer ghat to mine.
 - (viii) Nearest Dak Bungalow or rest house.
3. Name and address of the Lessee.
4. Date of grant and period of lease (state if the lease is granted under rule 61 of the Mineral Concession Rules, 1949).
5. Area of the lease.
6. Name and address of previous owner if any and the date of abandonment.
7. Name and address of the Agent and date of appointment.
8. Name and qualifications of the Geologist or Mining Engineer—in charge of operations.
9. Name, address and qualifications of the Manager and the date of appointment.
10. (a) No. and sizes of existing workings and their extent.
(b) Total footage of bore-holes if any.
11. Nature of the mineral deposit worked.

Signature.....
(Full name of the signatory)

Designation.....

Address.....

Date of Despatch.....

*(2) Under item 9 give a brief description of the geological formations and describe the behaviour of the ore body.

FORM D—(See Rule 8)

Notice of Transfer or Assignment.

IMPORTANT

Notice in this Form shall be sent within 30 days of the transfer or assignment.

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

Sir,

I have to furnish the following particulars:—

1. Name of mine, concession or lease.
2. Situation:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or Steamer ghat and distance therefrom.
 - (vii) Means of conveyance from Railway Station or Steamer ghat to mine.
 - (viii) Nearest Dak Bungalow or rest house.
3. Name and address of the Lessee.
4. Date of grant and period of lease.
5. Area of the lease.
6. Nature of Transfer or Assignment.
7. Name and address of the Transferee or Assignee.

Date of Despatch.....

FORM E—(See Rule 10)

Notice of the abandonment or discontinuance of mining operation in respect of
..... (Name of minerals) for..... of mine.

IMPORTANT

Notice in this Form shall be sent within fifteen days after the date of the abandonment or within ninety days after the date of discontinuance of mining operations.

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

Sir,

I have to furnish the following particulars:—

1. Name of mine and the date of opening or re-opening.
2. Situation of mine:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or Steamer ghat and distance therefrom.
3. Name and address of the Lessee.
4. Date of grant and period of lease.
5. Area of the lease.
6. Name and address of the Agent.
7. Name, address and qualifications of the Manager.

8. If abandoned:

- (a) Date of abandonment.
- (b) Full description of the existing workshops accompanied by plans and sections showing all the underground and/or surface workings.
- (c) Nature and disposition of the ore-body/mineral deposit in relation to existing workings.
- (d) Reasons for abandonment (give the fullest details).

9. If discontinued,

- (a) Date of discontinuance.
- (b) Reasons for discontinuance.
- (c) Probable date of re-opening.

Signature.....
 (Full name of the signatory)
 Designation.....
 Address.....
 Date of Despatch.....

FORM F—(See Rule 12)

Notice of re-opening of a mine in respect of.....
 (Name of mine)
 for..... (Name of mineral).

IMPORTANT

Notice in this Form shall be sent within 30 days from the date of re-opening of a mine.

To

The Director,
 Indian Bureau of Mines,
 Ministry of Natural Resources and
 Scientific Research, New Delhi.

Sir,

I have to furnish the following particulars:—

1. Name of mine and date of first opening.
2. Situation of mine:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or Steamer ghat and distance therefrom.
3. Name and address of the Lessee.
4. Date of grant of the lease.
5. Area of the lease.
6. Name and address of the previous owner if any and the date on which he abandoned.
7. Name and address of the Agent.
8. Name, address and qualifications of the Manager.
9. Date on which it was abandoned or discontinued prior to re-opening.
10. Date of re-opening.
11. No. and sizes of existing workings and their extent.

FORM G—(See Rule 13)

Notice of commencement of stoping in respect of.....
(mineral or minerals).

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

IMPORTANT

Notice in this Form shall be sent 30 days before
the commencement of stoping operations.

Sir,

I have to furnish the following particulars:—

1. Name of mine.
2. Situation of mine:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest Railway Station or Steamer ghat and distance therefrom.
 - (vii) Means of conveyance from Railway Station or Steamer ghat to mine.
 - (viii) Nearest Dak Bungalow or rest house.
3. Name and address of the owner.
4. Name and address of agent.
5. Name, address and qualifications of manager.
6. Name and qualifications of the geologist or mining engineer in charge of operations.
7. Date of grant and period of lease.
8. Area of the lease.
9. No. of shafts and their depth.
10. No. of levels and their extent.
11. Total footage of underground development.
12. Thickness of mineral vein or ore body developed.
13. No. and sizes of blocks of ore body ready for stoping and their levels.
14. Approximate tonnage of ore blocked out.
15. Level or levels at which stoping is contemplated.
16. Method of stoping contemplated.
17. The rate of progress in stoping contemplated.
18. Date on which it is proposed to commence stoping.

FORM R—(See Rule 16)

Notice of sinking shafts and new bore holes in respect of.....
(mineral or minerals)

IMPORTANT

Notice in this Form shall be sent within 15 days after the commencement of sinking shaft or boreholes.

To
The Director,
Indian Bureau of Mines,
Ministry of Natural Resources and
Scientific Research, New Delhi.

Sir,
I have to furnish the following particulars:—

1. Name and address of licensee/lessee.
2. Situation of the area:
 - (i) Village.
 - (ii) Post Office.
 - (iii) Police Station.
 - (iv) District.
 - (v) State.
 - (vi) Nearest railway station or steamer ghat and distance therefrom.
 - (vii) Means of conveyance from railway station or steamer ghat to mine.
 - (viii) Nearest dak bungalow or rest house.
3. Area of the licence/lease.
4. Date of grant and period of licence/lease. (State if the lease is granted under Rule 61 of the Mineral Concession Rules, 1949).
5. Name of mine if any.
6. Depth and dimensions of the existing shaft or bore hole, if any, giving reference to plan.
7. Whether any notice in respect of any of the shafts or bore holes was already given; give reference to plan.
8. Attach plan on a scale 1" to 330' indicating the precise location of the shafts or bore holes existing and intended to be sunk or extended.
9. Purpose for which each of the shafts or bore holes is intended to be put or extended.
10. Type of new shaft and its/their dimensions contemplated.
11. Type of drill used and size of core to be obtained.
12. Mineral or minerals encountered.
13. If the shaft or bore hole commences from underground, the depth of the level at which the shaft or bore hole is put.
14. Name and address of agent.
15. Name and address of manager.
16. Name and address of the driller, in charge of boring operation.
17. Name and qualifications of the geologist or mining engineer in charge of operations.
18. Date on which it is proposed to start sinking operations.

Signature.....

(Full name of the Signatory)

Designation.....

Address.....

Date of Despatch.....

FORM S—(See Rule 17)

Particulars to be furnished in the Journals.

- (i) Full description of the site where a shaft or bore hole is sunk:
 - Thana, Taluk.
 - Post Office.
 - Nearest Railway Station.
 - State and District.
- (ii) Full details including the shape and dimensions of shaft or borehole.
- (iii) Daily progress of work, detailing feet drilled or sunk and the length of core recovered and serial number of samples of core or fragments of rock preserved.

- (iv) Description of the soil or rock encountered in sinking the shaft or borehole.
- (v) Depths at which any mineral is struck and the thickness and disposition of such vein, mineral zone or seam.
- (vi) Results of analyses of samples, if carried out.
- (vii) Special features, if any, which were met during the operation (*e.g.* joints, faults, seepage of water, etc.)
- (viii) Date of commencement of the operations.
- (ix) Date of completion or abandonment of the work.
- (x) If abandoned, the reasons for such abandonment.
- (xi) The total depth sunk.
- (xii) Cost per foot of sinking the bore-hole or shaft.

CHAPTER VIII—MISCELLANEOUS

MANUAL OF INSTRUCTIONS¹

CHAPTER I

Introduction

It will be observed that the rules framed under section 6 of the Mines and Minerals (Regulation and Development) Act, 1948, are confined mainly to the enunciation of principles, policies and procedures and do not include the details as regards processes and techniques which have to be followed. It was considered that the details as regards processes and techniques could best be dealt with in a Manual of Instructions.

The object of this Manual is to provide not a text book on mining and conservation practices and techniques but certain information and directions of an elementary character without which the purpose of the rules under Section 6 cannot be fulfilled. Most of the units in the mineral industry will not need to refer to this Manual of Instructions for any new information. Experience has shown that some of the smaller units have not yet settled down to the rational methods of mineral exploitation based upon scientific and up-to-date methods. This has been fully borne out by the various committees appointed by Government for enquiring into the affairs of the mineral industry during the last three decades. The need for scientific methods of mineral exploitation, leading to systematic mining, conservation and fuller utilisation of minerals, which are a national asset, has been proved beyond doubt.

The Manual of Instructions which is set forth in the following pages is by no means a comprehensive treatise on the subject. It is merely an illustrative proposition. Rule 21 of the Conservation and Development Rules give the Director, Indian Bureau of Mines power to issue any instruction concerning the provisions of the Act. These instructions would be, more or less, within the framework of the Manual of Instructions which will be added to or subtracted from as time goes on and more experience is gathered as regards the best methods of exploitation of minerals to be employed. Notwithstanding the flexible nature of these arrangements, the object in view, namely that of ensuring the exploitation of the country's mineral wealth to the maximum national advantage and without waste will not be achieved without the willing co-operation of those who are engaged in this vital industry.

CHAPTER II—PROSPECTING

Instructions

1. All prospecting operations should be carried out under the guidance of a qualified Geologist or a Mining Engineer.
2. The holder of a prospecting licence should prepare a geological map of his area on a scale not less than 4" to a mile, showing various geological formations, dips of strata, outcrops of ore-bodies or seams, dykes, faults etc. occurring in his area.

¹ The Manual of Instructions was published by the Ministry of Natural Resources & Scientific Research, Government of India as Supplementary to the Minerals Conservation and Development Rules, 1955.

3. The holder of a prospecting licence for any mineral should, during the tenure of his licence, investigate systematically by trenching, pitting, drilling and such other operations as may be deemed necessary, to ascertain the underground disposition, shape, size and the grade of the ore-body or seam constituting the mineral deposit.

4. The size of trenches, pits and other excavations should be just adequate for proving the deposit.

5. The holder of a prospecting licence should prepare a plan of the area under licence on a scale not less than one inch to 330 ft. showing accurately the disposition of the ore-body in the area in relation to the country rock and the position of each of the bore-holes, pits, shafts, trenches, and other excavations made during the course of prospecting.

6. All exposures in exploratory headings should be measured and sampled. Width of the ore-bodies and assay values should be entered in the assay plan together with any additional geological data observed in them.

Exposition

Prospecting is a scientifically planned search, based on the knowledge of geology, for proving incidence, extent, quality and reserves of an economic mineral for the purpose of its exploitation and thereafter utilisation in industry. Prospecting therefore, is the first necessary step in any programme of mineral exploitation.

It is suggested that a geological map of the area under licence should first be prepared, say on a scale of 4": 1 mile, from a study of which it should be possible to lay out smaller sections for a scheme of intensive exploration. The areas so selected may be remapped in greater detail on a scale, say 16": 1 mile and this second geological map will be of immense use for selection of sites for bore-holes, pits, shafts, trenches and other exploratory operations.

Methods of Prospecting

Broad features of lithology and structures of area delineated during mapping will be the guiding factors in laying out a plan of prospecting.

On strict scientific basis geophysical methods of prospecting should succeed the geological mapping mentioned above. However, the specialised scope of these methods do not render them suitable in the case of simple occurrences of economic minerals which are fairly obvious on surface examination and are negotiable within shallow depths. Geophysical methods are widely known and described in text books on the subject and are not elaborated here.

Search for minerals or ore-bodies, which crop out may be undertaken by (i) tracing float, (ii) panning, (iii) trenching, (iv) pitting, (v) drilling, (vi) location of bore-holes, and (vii) underground development or by a combination of the above mentioned methods.

(i) **Tracing float.**—Pieces of ore dislodged from the parent mass by processes of disintegration are drifted downhill and forms subsidiary mass constituting a 'float ore'. By the study of float ore, the parent ore body can be located.

(ii) **Panning.**—Panning is a process of separation of finely comminuted particles of a mineral of high specific gravity effected by the use of a shallow oval disc with sloping sides defined as a pan. The separating medium is generally water.

(iii) **Trenching.**—Trench is an elongated excavation with definite alignment. Cross-section of a trench depends on the depth and the purpose. It should be as small as practicable. The trench is usually dug out at right angles to the formations and the indicated strike of the ore-body.

(iv) **Pitting.**—Trial pits are dug in places where the over burden is too thick for trenching, and normally in areas free from boulders and excessive seepage of water.

Trial pits for systematic exploration are laid down at the corners of squares whose sides are determined by the anticipated nature of the ore-body and the thickness of the soilcover.

(v) **Drilling.**—In cases where the soil-cover or over burden exceeds 30/40 feet of loose ground or is in heavily water-bearing strata, drilling is suggested.

(vi) **Location of bore-holes.**—Location of bore-holes is done at the corners of squares after determining the probable trend of the ore-body as indicated under pitting. Spacing of bore-holes is determined by the nature of the ore-body.

Besides the regularly spaced bore-holes conditions may warrant location of a few additional ones to secure greater details regarding the structural features of the rocks.

(vii) **Underground development.**—Discussed under Chapter 'Development'.

CHAPTER III—QUARRYING AND OPENCAST MINING

Instructions

1. Mineral deposits out-cropping or occurring near the surface which are suitable for open cast mining should be worked systematically by benching.
2. The width of the benches should not ordinarily be less than $\frac{2}{3}$ rd of the height of the bank so as to facilitate simultaneous working of all benches by manual or mechanical means.
3. If the overburden is earth, clay or murrum, and if the working is carried out by benches, the height of each bench should not exceed 4 ft. and if the sides are sloped, the angle of the slope with the horizontal should not be less than 45° .
4. There must be suitable arrangements for efficient drainage of monsoon or seepage water, and where necessary, sumps should be provided to collect the drainage water for pumping it out by suitable appliances such as syphon or pumps.
5. Debris, waste rock and mine spoils should not be mixed up or dumped on the dip side of the ore body or seam, which may have to be worked by open cast methods. They should be separately stocked on proved barren grounds.

Exposition

Minerals are usually won from the outcrops by open pits and workings which are open to the sky.

This system of extraction of minerals can be adopted in case of massive deposits or even irregular deposits at or near the surface so long as the removal of soil cover or rock to be excavated for winning the ore does not become uneconomical.

In opening up a quarry attention should be focussed on the following points:—

1. The face or faces opened ensure at least a minimum marketable output within a certain period and for certain length of period to cover the interest of the capital invested and the required annual contribution to the sinking fund, and to meet reasonable increase in the demand.
2. The faces are opened in such directions as to allow the drilling of blast holes across or inclined to the planes of bedding or laminations or joints.
3. The procedure for disposal of waste is made easy and that such wastes are dumped away preventing the burying up of any extension of the ore body worked or any other economic mineral.
4. Accumulation of water during rains in the quarry may be avoided and suitable appliances such as pumps, syphons etc. may be provided.

A quarry may be worked by benches or slopes.

In preparing the benches note should be taken that there is no possibility of land slides and that over-hangings or under-cuttings are avoided.

The width of a bench should be such that handling of broken ore can be done with safety and ease; and where machines are used for excavation, benches should be sufficiently wide for accommodating the loading track, shovels and excavators.

The height and width of benches should be such that the general slope (a line drawn through the outer edge of the top and bottom benches) should not exceed 40° to the horizontal. Steeper angles can be kept only in case of strong and massive deposits. Lower angles are necessary for loose-bedded deposits or soft materials and weak country rock.

In laying out a pit, it is a good practice to have the initial cuts in the orebody along the longer axis of the ore mass so that loading tracks are kept straight as far as practicable and the connecting curves from other approach tracks are not too sharp.

Quarrying with hand-loading of ore

Quarrying with hand-loading of ore is done (a) in small pits where the scale of operations does not permit economic use of mechanical excavators, (b) in large scale work where ore body is patchy and labour is cheap.

Open cut mining by power shovels

The excavation by power shovels is done in large quarries with good reserves of fairly uniform grade of ore with or without any overburden.

Slopes which will stand well at ordinary depths may not be safe for great depths. Presence of faults, joints etc. particularly when associated with moisture and clay bands will necessitate gentler slope. In all cases, the bench should have the minimum economic width and the maximum economic height.

The width of a bench is largely determined by the angle of repose of the broken material. The width required to accommodate the broken ore plus space required for shovels, etc. is the width recommended to be followed.

The angles of repose of certain type of rocks are given below:

Kind of Earth	Slope	Angle of Repose	
Sand, clean (loose) ...	1.5 : 1	34°	Data collected from Peel's Mining Engineers Handbook Table 3 page 3—30
Sand & clay (loose) ...	1.33 : 1	37°	
Sand (wet) ...	2.5 : 1	22°	
Gravel clean, loose ...	1.33 : 1	37°	
Gravel & clay (loose) ...	1.33 : 1	37°	
Clay (dry & loose) ...	1.33 : 1	37°	
Clay, dry (natural) ...	1 : 1	45°	
Clay wet ...	3.5 : 1	16°	
Rock hard ...	1 : 1	45°	

When blasting is resorted to, gentler slopes than the above may be adopted.

Glory Hole Mining

This method of mining is applicable to massive or thick orebodies with overburden which can be economically stoped, but the scale of operations is too small to warrant large capital investment for power shovels and locomotive haulage. The overburden may be completely stripped before mining or it may be stripped in sections along with the mining of the ore.

Preliminary development required consists of an underground haulage proceeding to a shaft, and winzes from the surface connecting with the haulage. The ore around each raise is 'milled' into it forming a funnel shaped pit and the broken rock gravitates to the haulage. The ore should slide on moderate slopes and not pack in the raises. Bad weather seriously hinders the work. Wet ore and water give trouble and render the work on steep slopes doubly dangerous. Surface water must be kept out by ditching. This method has the advantage of providing cheap handling and loading.

Hydraulic Mining

Hydraulicking is essentially a process of loosening gravel or alluvial deposit containing values with high pressure hydraulic nozzle known as 'giant' or 'monitor'. It is suitable only where the loosened material can move downgrade by gravity and the flow of water.

Water from a reservoir or from streams at a higher level than the places to be worked is conducted through pipes to the 'monitors' or 'giants' which control the direction of the jet. Gravel is broken down partly by the direct impact of water jets under pressure and partly by undercutting the bed and forcing the bank to cave. Water carrying dislodged gravel or alluvium flows away from the face and is conducted through a sluice into a dump. The heavy mineral portions are caught in the riffles in the sluice. The total length of sluice needs to be such that the values are disintegrated from the clays or gravels. The chief problems connected with hydraulicking are water supply sluice grades and tailing disposals and attention to these points are essential.

Sufficient pressure is necessary to allow the giants to do effective work from a safe distance from the working face.

A contour plan of the area to be hydraulicked always proves to be of immense value as from such a plan the layout of the sluice boxes and the disposal of dumps can be judiciously planned.

The common loaders used in quarry work are (a) power shovels, (b) draglines, (c) scrapers or shovels and (d) elevating graders.

Blasting in quarries

Some of the few special methods practised in quarry blastings are described below:—

Deep hole blasting

The explosive is spread out in several charges, separated by stemming, each charge having its own primer and all charges being connected by a fuse. Informations consisting of hard and soft rocks, charges are placed in the hard rock. Black powder used for long hole blasting is exploded by a dynamite primer.

The holes are drilled in a line, the holes in the different rows being staggered with those of the adjoining rows.

The depth of the row of holes nearest to the free face may be equal to or less than that of the holes in the other rows. Holes may be vertical or inclined and may be drilled in conjunction with inclined holes.

Springing deep holes

Deep holes are sometimes sprung at the bottom to blast a chamber to accommodate a large concentration of explosives.

1. Springing is best done by gelatin dynamite.
2. First springing charge occupies about 0.05 of the total depth of the hole.
3. Several springings may be necessary before the final charging.
4. Considerable time should elapse between one springing and charging for the next springing. It is recommended that 1, 2, 4 hrs. etc. should elapse after the 1st, 2nd, 3rd, 4th springing before recharging. The final charge should be loaded only 24 hrs. after the last springing charge.

Coyoto Blasting

A tunnel of about 3 ft. x 4 ft. is driven into the face, its length being $\frac{2}{3}$ of the height of the face above the tunnel. At the end of the tunnel, crosscut drives are driven either side in the form of a 'T', the length of the crosscut being approximately equal to the length of the tunnel. Powder pits are sunk in the cross-cut to accommodate the estimated charge.

Coarse grained black powder primed with 60 per cent. straight dynamite may be used.

Coarse-grain black powder, primed with 5—10 per cent. of its wt. of 40 or 60 per cent. straight dynamite, gives best results. To find required charges, first compute the cu. yd. of material above the tunnel ('yardage in the square of the shot') = (length of tunnel x blast often breaks twice the yardage in square of shot, but the above length cross-cut x average height of face, ft.) \div 27. A well designed is conservative.

Quarrying of dimension stone

Quarrying of stones required in fixed sizes are done where cleavage and joint planes are pronounced.

Blocks are dislodged by blasting or 'plug and feathering' or by 'broaching'.

CHAPTER IV—DEVELOPMENT

Instructions

1. All Mining operations must be carried out under the guidance and supervision of a qualified Mining Engineer and/or Geologist.

2. A mineral deposit should be developed and opened up systematically to its full extent both laterally and in depth. The drifts, galleries, winzes or raises should be well planned and regular to develop the entire thickness of a deposit and must not be crooked, narrow or irregular so as to connect only the richer sections of the ore-body. However, small isolated pockets which cannot be opened up systematically may be developed in any convenient manner.

3. During development, samples should be taken at regular intervals and analysed. A register should be maintained in which complete details of the locations from where the samples were taken, the width of the lode at the spot, method of sampling, date of sampling, results of analyses and the name of the sampler and analyst should be entered.

4. During development operations (unmineralised) waste rock should be dumped separately from the poor grade ore or mineralised waste. No debris, waste rock, or mine spoils should be dumped on the dip side of the ore body or in such a manner as will hinder complete economical extraction of the ore subsequently.

5. All mine workings should be kept clean and dry. No ore or debris should be piled up in the levels or galleries. If necessary, suitable pumps should be installed to provide efficient drainage of the mine. Water should not be allowed to accumulate in workings except in sumps especially provided for the purpose from which water will be eventually either hauled or pumped out.

6. When a mine attains such magnitude as to need the use of mechanical appliances, such as mechanical haulage, winder, pump, pneumatic drills and mechanical ventilation,

machinery (including air conditioning units etc.) the owner should install such machinery in the interest of efficient working of the mineral deposit.

7. If a deposit contains large blocks of ore or seams of sub-marginal grades which cannot be economically exploited and suitably blended or beneficiated, they may be left unworked in a manner to render them workable at some future date.

Exposition

Development consists of driving openings to and in an ore body to prepare it for mining and transporting of ore and to obtain further and more detailed information as to the character and size of the orebody. The latter is more important in ore bodies of irregular shape and tenor.

Problems to be decided to start with are (a) the mode of entry, which involves a decision between vertical or inclined shafts, drifts or cross-cut tunnels or combination of these and (b) the lateral or subsidiary development within the orebody. As development work is often more costly than stoping operations, a judicious decision of the ratio of tonnage proved to footage of development, consistent with the exploratory value and scientific mining is of paramount importance. The relative cost of driving the development workings, the period of maintaining them will influence any decision as to their size, mode of support and location.

Mode of Entry.—Location of main entries to an orebody is governed by the depth, dip of the vein or seam, surface topography, the character of the orebody and the walls, and the relative costs of driving and maintaining them.

Position and number of shafts.—The position of a shaft is determined by the number of shafts proposed to be sunk. One of the chief consideration is to equalize the lateral development underground so that the average tramming distance is not excessive. The following points may be considered for selection of sites for shafts.

- (a) The shafts should be located far from possible sources of surface water.
- (b) Faulted ground, or proximity to dykes and other geological disturbances which tend to structurally weaken rock masses should be avoided.
- (c) Heavily fissured or loose formations should be avoided as far as possible.
- (d) A certain elevation of the shaft collar over the site selected for installation of milling plant is considered desirable.

The number of shafts is also governed by—

- (a) Capacity of shafts and the daily output envisaged and the number of men likely to be employed in the mine.
- (b) The average tramming distance.
- (c) Requirements of ventilation and the transport of material other than ore.
- (d) Regulations.

The size of the shaft is governed mostly by its required capacity which depends on depth, speed of winding and number of underground loading stations.

Adits.—In mountainous regions, entries to the ore-body may be made by adits, or cross-cut tunnels. This will constitute an advantage only when a considerable tonnage of ore can be worked by the adits.

Lateral Development

Drives.—(a) Drives are driven as far as possible, within the lode and parallel to the average strike of the lode. They provide means of ingress and egress to the persons working in a mine, develop the ore-body, and serve purposes of exploration.

The interval between levels is governed by—

- (a) cost of drifting,
- (b) the dip of the ore-body,
- (c) method and speed of stoping,
- (d) nature of the ore-body, whether regular or not.

According to Peele, interval, largely the result of custom, is 100—150 ft. but practice tends towards greater distances where feasible. Large intervals in mica mines in India have not proved economical, because overhand drill stoping and filling back system warrants 25 feet to 30 ft. interval, otherwise rock in excess of that which is required to fill the stopes has to be hauled out.

Where large tonnages are handled, it is preferable to locate the haulage drive in the country rock some 20 ft. to 30 ft. below the footwall because such drives can be driven straight irrespective of trend of the orebody and may therefore be designed for mechanical

haulage and are cheaper to maintain. In planning for deep mining, it may be advisable to locate the haulage drives some 40 ft. below the footwall of the load.

Size of the drives.—Exploratory drives are usually 6 ft. high \times 5 ft. wide. Larger sections will be unduly costly while smaller sections will greatly reduce efficiency of work as a result of lack of space. The cross section of the drifts would be judged by the following:

1. Purpose of the drift.
2. Size of cars used.
3. Method of loading.
4. Nature of drainage ditches.
5. Ventilation requirements.
6. Head room required.

(b) Raises and winzes

Raises and winzes are driven usually in the lode for developing the ore body, to connect drives for purposes of ventilation, to provide a face for starting stoping operations and to enable sections to be sampled for computation of ore reserves. Of the two, raising is always preferred to winzing as the costs of mucking and drainage are much less than those of winzing.

Wherever practicable, a determination of these ratios will be of help:

Vol. of ore developed per unit of dead work	}	Vol. of ore developed (c.ft.)
		Whole Vol. of dead work development.
Vol. of ore developed per unit of productive development	}	Vol. of ore developed (c.ft.)
		Whole vol. of productive development (c.ft.)
Vol. of ore per unit of development	}	Vol. of ore developed (c.ft.)
		Combined vol. of dead work plus productive development (c.ft.)

CHAPTER V—STOPING AND DEPILLARING

Instructions

1. The actual stoping or depillaring should not be commenced till the ore body or the seam or a district of a mine has been completely developed.
2. In case the development and stoping are being carried out simultaneously, the relative proportion of development work to stoping or depillaring in a mine should follow the general principle of ensuring at least two years output.
3. The lessee should work all workable beds, seams or ore bodies occurring in his area and should not confine his operations to easily accessible or marketable grade of mineral.
4. Submarginal grades of ore may be blended with higher grades of ore to produce a marketable grade ore.
5. When two or more beds or seams are worked in a mine, the methods of stoping or depillaring should be such as to avoid premature collapse of workings in any of the beds or seams or loss of or damage to the mineral deposit.
6. If two or more levels are worked in a bedded deposit the plan of working should be such as to avoid loss of minerals.
7. Proper record of total proved, probable and possible reserves of ore and reserves of ore proved during the course of each year should be maintained.
8. Unmineralised waste rock should be dumped separately from the poor grade ore or mineralised waste. No debris, waste rock, or mine spoils should be dumped on the lip side of the ore body or in such a manner as will hinder complete economical extraction of the ore subsequently.

Exposition

Stoping is the process of actual mining or extraction of the orebody other than by development.

The standard methods of stoping may broadly be classified as under:—

1. Open stopes without support as in small and narrow ore bodies.
2. Open stopes with casual pillars.

3. Open stopes with regular pillars.
4. Sub-level stoping.
5. Shrinkage stopes:
 - (a) with pillars
 - (b) without pillars
 - (c) with waste filling done subsequently.
6. Cut and fill stoping.
7. Stull stopes in narrow veins.
8. Square set stoping.
9. Block caving.
10. Sub-level caving.
11. Top slicing.
12. Resuing.

Selection of method of stoping.—The method of stoping selected must be safe, efficient and economical. The guiding factors are:—

1. The dip.
2. The width of the ore-body.
3. The character of the walls.
4. The strength of the ore.
5. The cost of the materials used for support.
6. The value of the ore.
7. The distribution of values.
8. The depth below the surface.

Mining of Bedded Deposits.—There are two principal systems of mining bedded deposits (a) Board and Pillar (b) Longwall. These methods with slight modifications are widely employed in salt mines, coal mines and other flatly dipping bedded deposits.

Board and pillar method of mining is suitable under the following conditions:—

1. Working under water.
2. If there is difficulty of obtaining packing or stowing material for filling the goaf.
3. If a number of important buildings on the surface are required to be protected.
4. If the area is disturbed geologically.
5. When the roof or strata immediately overlying the seam or bed is weak, and jointed.

The conditions favourable for longwall method of mining are:—

- (a) A seam free from faults and other geological disturbances.
- (b) A thin seam.
- (c) Where dirt packings exist in the seam and where bed of thin shale overlies the seam.

Depending on the direction of advance of working face, this system has been classed into two categories:

1. Retreating longwall system.
2. Advancing longwall system.

Depillaring.—Pillars may be extracted either after developing the entire property or a district of the property if development has been carried in a pannel system.

In all cases, a diagonal line of face is always maintained. Reduction or robbing of pillars result in premature collapse and loss of mineral.

Horizon Mining System.—In steeply dipping seams, and in seams which are folded or otherwise geologically disturbend horizon mining as practised in some countries, may be adopted. The advantages claimed for this method of development are:—

1. Efficient transport in the cross-measure drifts by locomotives and through the main shafts by the Koepe system of winding.
2. Low maintenance costs on haulage roads.
3. Better ventilation.
4. Most suitable method for highly inclined seams.

CHAPTER VI—MINE—PLANS, MAPS AND SECTIONS

Instructions

1. The owner, agent or manager of every mine shall keep in the office at the mine an accurate plan and section or sections properly inked on durable paper, of the workings of the mine on a scale of not less than 100 feet to 1 inch, showing the workings up to a date not more than six months prior to the preparation of such plan and sections. The name of the mine, its owner and the scale should be shown on the plan and sections

The magnetic meridian, with date must also be shown on the plan. The plans and sections should also show all shafts, drives, cross-cuts, winzes, raises, excavations (stoped ground), and any tunnels and passages connected therewith. They should also show the boundaries of the underground leasehold where possible, and all important surface features within the boundaries such as railways, roads, rivers, streams and reservoirs which overlie any part of the workings or any point within 600 feet of any part of the mine workings; also the general strike of the veins or mineral deposits, with their dips at different points, and the dislocations of the strata.

2. The owner, agent or manager of every mine should keep on the mine premises, a geological map of the property showing the rock formations and disposition of the deposit on a scale not smaller than 1 inch to 330 feet.

3. The owner, agent or manager of a mine must produce on demand to the Director or any officer authorised by him at the office of the mine, plans and sections of the mine and also mark on such plans and sections, the then state of the workings of the mine, and the Director or the officer may examine and make or have a copy made of such plans and the sections.

4. Where any mine or any part of the mine is abandoned, or the working thereof has been discontinued for a period exceeding one year, the person who was the owner of the mine at the time of the abandonment or discontinuance should within three months after the abandonment or within fifteen months after the discontinuance of working, as the case may be, send to the Director copies of accurate plans and sections of the workings of the mine up to the time of the abandonment or discontinuance as the case may be.

However if a change of ownership occurs after the abandonment or discontinuance and before the expiry of the three months or the fifteen months period aforesaid, as the case may be, such plans and sections may be sent to the Director within thirty days of the change.

5. An inspection book should be kept at the mine premises and the inspecting officer should enter his observations in that book.

Exposition

Maintenance of proper plans, maps and sections is essential for working of the mine. Some of the useful information that can be obtained from a study of the maps, plans and sections is given below:—

- (i) **Geological Maps.**—Geological maps and sections prepared from study of the development headings and mine plans will indicate the attitude of the probable line of intersection of the lode with a fault or dyke or axial plane of a fold. Such information will assist in development of the new levels in a manner that unnecessary development is minimised or levels replanned so as to maintain their direction and grade.
- (ii) **Mine Plans.**—(a) Direction and grade of connecting drifts between known points in underground workings can be calculated from a study of the plans.
- (b) Approach of working to heavy ground, faulted ground, water bearing ground, running ground, old workings etc. can be ascertained well before actual intersection and precautionary measures taken.
- (c) While working a vein under roads railways, bridges, buildings, etc., a study of the plans and sections will indicate the exact underground locations where supports will have to be provided.
- (d) A correct plan indicates at a glance the exact position of the mine workings, the worked out and unworked areas in the mine, the correlation of workings with respect to surface boundaries. It helps in planning suitable haulage, ventilation, production programme and estimation of proved reserves.
- (e) Stope plans prepared in the average plane of the lode will be useful for calculating by measurement the approximate tonnage of ore removed.
- (iii) **Assay Plans.**—(a) Assay plans maintained in the mine are useful to compute the reserves and in laying out payable blocks for mining purposes. Drive samples also assist in locating raises, winzes and cross-cuts.
- (b) Assay contours projected on the geological maps should give a clear picture of the ore concentration.

CHAPTER VII—ORE DRESSING

Instructions

- (1) The owner of a mine which contains low grade ores should make an accurate estimate of the reserves of such ores in his mines.
- (2) He should keep an up-to-date record of the mineralogy of his deposits.
- (3) He should maintain a record of the chemical analysis of different grades of ores occurring in his mines.
- (4) The low grade ores of different compositions should be stacked separately.
- (5) In order to determine the ore dressing processes suitable for his ores the mine owner should arrange for systematic testing of his ores.
- (6) If upgrading is economically feasible, the mine owner should install a suitable beneficiation plant.
- (7) In no case the low grade ore should be used for filling stopes or other excavations, making roads, parapet walls, etc.

Exposition

Ore dressing is a process of mechanically separating the valuable minerals from the valueless associated materials of an ore, thereby resulting in the concentration of the valuable minerals. The valueless material of an ore is known as "gangue". Ore dressing techniques will result in the production of "concentrate" containing most of the valuable minerals and "tailing" containing most of the worthless material. The advantages gained by ore-dressing are:

- (1) Saving of freight by removal of the gangue material.
- (2) Reducing more expensive smelting costs on ores by elimination of the worthless burden.
- (3) Removal of the harmful ingredients of an ore such as sulphur, phosphorus, arsenic, etc.
- (4) Facilitate the smelting operations by removal of certain impurities interfering with the process adopted.
- (5) Higher price and greater market demand for the upgraded ore.
- (6) Reduction of the loss of metal at the smelter.

While economic considerations and market demands will decide whether the run-of-mine ore be marketed as such or should be dressed before marketing, there are cases where dressing is an obvious necessity. Considerations which demand dressing of the run-of-mine ore before marketing or utilisation, include the following:—

- (a) Where the ore is required to be transported to a place far away from the mine.
- (b) Where the ore contains deleterious ingredients such as sulphur and phosphorus in the iron-ore, arsenic and zinc in pyritic ore, etc.
- (c) If the difference in the metal content between the crude ore and the ore suitable for smelting is high.
- (d) Where complex smelting problems arise on account of the crude ore being associated with more than one recoverable valuable mineral.
- (e) In the case of a complex ore containing more than one economic mineral constituent, it is observed that only one economic mineral is taken out and the others lost in rejects.

Scope of Ore Dressing.—The scope of ore dressing is divided in two parts (i) elimination of unwanted chemical species or (ii) elimination of mineral particles of unsuitable size or structure. The principal steps involved in the ore dressing procedure are (a) Liberation or freeing of valuable minerals from gangue minerals and (b) Actual separation of the liberated minerals into various final concentrates and waste products.

As has already been stated earlier, processes of ore-dressing are essentially mechanical in nature and processes suitable to a particular ore under consideration will have to be evolved by experiments and then standardised. The following physical properties of ore are useful in determining an effective ore dressing process.

- (i) Specific gravity.
- (ii) Lustre.
- (iii) Colour.
- (iv) Surface energy.
- (v) Magnetic susceptibility.
- (vi) Electrical conductivity.
- (vii) Decrepitation.
- (viii) Friability.
- (ix) Co-efficient of friction.
- (x) Particle size.
- (xi) Solubility.

Of these, specific gravity magnetic susceptibility, electrical conductivity and surface energy are more valuable.

Specific gravity, lustre and colour are useful properties for hand sorting and hand dressing.

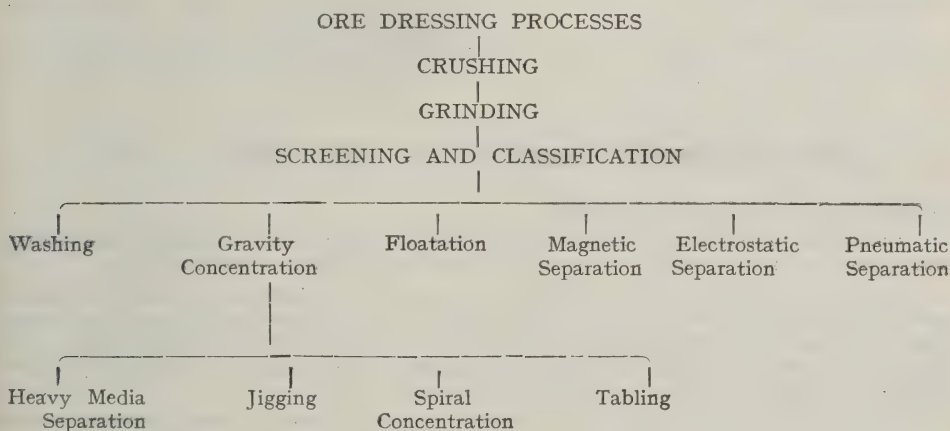

In ore dressing procedure there are four principal types of operations:—

- (i) **Comminution.**—This means reduction to smaller size. Depending on the size of the material this operation is called either crushing or grinding. Crushing means reduction of big lumps to particles of about $1/8$ " size. Grinding involves reduction of size below $1/8$ ". Crushing is always conducted on dry ore while grinding may be wet or dry.
- (ii) **Sizing.**—This is the separation of material into various fractions having different sizes. This is achieved by screening or classifying. Classification depends on the relationship between the size of mineral particles and their settling velocity in a fluid medium.
- (iii) **Concentration.**—This is carried out by means of washers, sluice boxes, jigs, spirals, shaking tables, flotation cells, magnetic separators, electrostatic separators or other specific concentrating devices. Sometimes this can also be done by ordinary screens, classifiers, etc.
- (iv) **Dewatering.**—This is done in two stages:
 - (a) Thickener, which removes most of the water, and
 - (b) Filter, which removes the remaining water from the thickened pulp and produces a mineral cake.

The performance of any ore dressing procedure could be defined mathematically by the following two entities:—

1. **Recovery.**—This is defined as the ratio of the weight of the desired component in concentrate to the weight of the same component in the feed.
2. **Ratio of Concentration.**—This is defined as the number of units of weight of feed from which one unit weight of concentrate is produced.

Principal Ore Dressing Processes.—The following table shows the principal ore dressing operations which are used in commercial practice:—

CHAPTER VIII—MISCELLANEOUS

i. Every owner, agent or manager of a mine should permit students of mining and geological institutions in the country to study and acquire practice in the mines and plants operated by them and provide such students with facilities required for their training.

RATES OF ROYALTY UNDER THE MINERAL CONCESSION RULES¹

S. R. O. 100 dated the 9th January 1956.—In pursuance of the first proviso to clause (i) of sub-rule (1) of rule 41 of the Mineral, Concession Rules, 1949 and of all other powers enabling it in this behalf, the Central Government hereby revises, with effect from the

¹ Published in the Gazette of India, 1956, Part II, Sec. 3, p. 34.

1st January 1955, the rates of royalty as in column 2 of the table below in respect of the minerals specified in column 1 thereof.

TABLE

Minerals 1	Revised rates 2
"Iron—	
(a) Used for extraction of iron within the country.	Five per cent of the sale value at the pit's mouth subject to a minimum of annas 8 per ton.
(b) Used for other purposes	Five per cent of the sale value at the pit's mouth subject to a minimum of Re. 1/- per ton."
"Manganese ore—	
(a) High grade (45 per cent Mn. and over)	Seven and a half per cent of the sale value at the pit's mouth, subject to a minimum of Rs. 1-8-0 per ton.
(b) Low grade (below 45 per cent Mn.)	Seven and a half per cent of the sale value at the pit's mouth, subject to a minimum of As. 12 per ton."
"Chromite—	
(a) 45 per cent Cr. ₂ O ₃ and above	Seven and a half per cent of the sale value at the pit's mouth, subject to a minimum of Rs. 2-4-0 per ton.
(b) Less than 45 per cent Cr. ₂ O ₃	Seven and a half per cent of the sale value at the pit's mouth, subject to a minimum of Rs. 1-2-0 per ton.
"Limestone—	Five per cent of the sale value at the pit's mouth, subject to a minimum of As. 6."
"Dolomite—	Five per cent of the sale value at the pit's mouth, subject to a minimum of As. 4 per ton."
"Graphite—	Seven and a half per cent of the sale value mouth.
"China Clay—	Seven and a half per cent of the sale value at the pit's mouth."
"Kyanite—	Seven per cent of the sale value at the pit's at the pit's mouth."

LAND ACQUISITION (MINES) ACT, 1885 (XVIII OF 1885)

Statement of Objects and Reasons¹

The object of this Bill is to provide for cases in which mines or minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870.

Act XXII of 1863, which was replaced by the Land Acquisition Act, 1870, contained specific provisions (sections 51 and 52) for cases in which mines and minerals lay under land taken up under that Act. These provisions were not, however, re-enacted in the Act of 1870, which, as the Government is advised, contemplates the acquisition of the underlying minerals as well as the surface of the land.

Hitherto this state of the law has caused no inconvenience. Now, however, owing to its being proposed to extend railways across districts where there is a certain amount of coal to be found, notice has been drawn to the inconvenience of the existing law which practically compels the Government either to purchase all the mines and minerals under the land over which it is proposed to construct a line or to abandon the undertaking altogether.

Under these circumstances, the present Bill has been prepared. It does not, however, simply re-enact the provisions which Act XXII of 1863 formerly contained, inasmuch as they do not appear to be adopted to the circumstances of the case. It follows rather the rules contained in the English Railway Clauses Consolidation Act, 1845 (8 and 9 Vic., C. 20 Section 77) which it extends to the acquisition of land, for all purposes and not merely for the construction of Railways.

¹ Gazette of India, 1885, Part V, p. 145.

LAND ACQUISITION (MINES) ACT, 1885 (XVIII OF 1885)

Arrangement of Sections

1. Short title, commencement and local extent.
2. Saving for mineral rights of the Government.
3. Declaration that mines are not needed.
4. Notice to be given before working mines lying under land.
5. Power to prevent or restrict working.
6. Mode of determining persons interested and amount of compensation.
7. If appropriate Government does not offer to pay compensation, mines may be worked in a proper manner.
8. Mining communications.
9. Appropriate Government to pay compensation for injury done to mines;
10. and also for injury arising from any airway or other work.
11. Power to officer of appropriate Government to enter and inspect the working of mines.
12. Penalty for refusal to allow inspection.
13. If mines worked contrary to provisions of this Act, appropriate Government may require means to be adopted for safety of land acquired.
14. Construction of Act when land acquired has been transferred to a local authority or Company.
15. [*Repealed.*]
16. Definition of local authority and Company.
17. This Act to be read with Land Acquisition Act, 1870.

LAND ACQUISITION (MINES) ACT, 1885 (XVIII OF 1885)¹

[16th October, 1885.]

*An Act to provide for cases in which Mines or Minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870.*²

Whereas it is expedient to provide for cases in which mines or minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870²; it is hereby enacted as follows:—

1. Short title, commencement and local extent.—(1) This Act may be called the Land Acquisition (Mines) Act, 1885; and

(2) It shall come into force at once.

(3) It extends in the first instance to the ³[States of ⁴[Madras, Andhra], West Bengal, Bihar, Assam and Orissa]; but ⁵[the Government of any other Part A State or of a Part C State] may, from time to time, by notification in the

¹ For the Statement of Objects and Reasons, see Gazette of India, 1885, Pt. V, p. 145, see also p. 494 ante; for Report of the Select Committee, see *ibid.*, Pt. IV, p. 264; and for Proceedings in Council, see *ibid.*, Supplement, pp. 336 and 1520, and *ibid.*, Extra Supplement, dated 14th March, 1885, p. 41.

This Act has been declared to be in force in the Sonthal Parganas by the Sonthal Parganas Settlement Regulation (3 of 1872), s. 3; in the Khondmals District by the Khondmals Laws Regulation, 1936 (4 of 1936), s. 3 and Sch.; and in the Angul District by the Angul Laws Regulation, 1936 (5 of 1936), s. 3 and Sch.

² See now the Land Acquisition Act, 1894 (1 of 1894).

³ Subs. by the A. O. 1948, for the original words and A. O., 1950.

⁴ Subs. by the Andhra (Adaptation of Laws on Union Subjects) Order, 1954 (w.e.f. 1st October, 1953).

⁵ Subs. by A. O., 1950 for "any other Provincial Government."

official Gazette, extend this Act to the whole or any specified part of the territories under its administration.

2. Saving for mineral rights of the Government.—Except as expressly provided by this Act, nothing in this Act shall affect the right of the Government to any mines or minerals.

3. Declaration that mines are not needed.—(1) When the ⁶[appropriate Government] makes a declaration under section 6 of the Land Acquisition Act, 1870,⁷ that land is needed for a public purpose or for a Company, it may, if it thinks fit, insert in the declaration a statement that the mines of coal, iron-stone, slate or other minerals lying under the land or any particular portion of the land, except only such parts of the mines or minerals as it may be necessary to dig or carry away or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

(2) When a statement as aforesaid has not been inserted in the declaration made in respect of any land under section 6 of the Land Acquisition Act, 1870⁷ and the Collector is of opinion that the provisions of this Act ought to be applied to the land, he may abstain from tending compensation under section 11 of the said Land Acquisition Act in respect of the mines, and may—

- (a) when he makes an award under section 14⁸ of that Act, insert such a statement in his award;
- (b) when he makes a reference to the Court under section 15⁹ of that Act, insert such a statement in his reference; or
- (c) when he takes possession of the land under section 17¹⁰ of that Act, publish such a statement in such manner as the ⁶[appropriate Government] may, from time to time, prescribe.

(3) If any such statement is inserted in the declaration, award or reference, or published as aforesaid, the mines of coal, iron-stone, slate or other minerals under the land or portion of the land specified in the statement, except as aforesaid, shall not vest in the Government when the land so vests under the said Act.

4. Notice to be given before working mines lying under land.—If the person for the time being immediately entitled to work or get any mines or minerals lying under any land so acquired is desirous of working or getting the same, he shall give the ⁶[appropriate Government] notice in writing of his intention so to do sixty days before the commencement of working.

5. Power to prevent or restrict working.—(1) At any time or times after the receipt of a notice under the last foregoing section and whether before or after the expiration of the said period of sixty days, the ⁶[appropriate Government] may cause the mines or minerals to be inspected by a person appointed by it for the purpose; and

(2) If it appears to the ⁶[appropriate Government] that the working or getting of the mines or minerals, or any part thereof, is likely to cause damage to the surface of the land or any works thereon, the ⁶[appropriate Government] may publish¹¹ * * * a declaration of its willingness, either—

⁶ Subs. by A. O. 1950 for "Provincial Government."

⁷ See now Section 11 of the Land Acquisition Act, 1894 (I of 1894).

⁸ See now Section 11, *ibid.*

⁹ See now Section 19, *ibid.*

¹⁰ See now Section 17, *ibid.*

¹¹ The words "in such manner as the G. G. in C. may, from time to time, direct" rep. by s. 2 and Sch. I of the Devolution Act, 1920 (XXXVIII of 1920).

- (a) to pay compensation for the mines or minerals still unworked or un-gotten, or that part thereof, to all persons having an interest in the same; or
- (b) to pay compensation to all such persons in consideration of those mines or minerals, or that part thereof, being worked or gotten in such manner and subject to such restrictions as the ¹²[appropriate Government] may in its declaration specify.
- (3) If the declaration mentioned in case (a) is made, then those mines or minerals, or that part thereof, shall not thereafter be worked or gotten by any person.
- (4) If the declaration mentioned in case (b) is made, then those mines or minerals, or that part thereof, shall not thereafter be worked or gotten by any person save in the manner and subject to the restrictions specified by the ¹²[appropriate Government].
- ¹³[(5) Every declaration made under this section shall be published in such manner as the ¹²[appropriate Government] may direct.]

6. Mode of determining persons interested and amount of compensation.—When the working or getting of any mines or minerals has been prevented or restricted under section 5, the persons interested in those mines or minerals and the amounts of compensation payable to them respectively shall, subject to all necessary modifications, be ascertained in the manner provided by the Land Acquisition Act, 1870, for ascertaining the persons interested in the land to be acquired under that Act, and the amounts of compensation payable to them, respectively.

7. If appropriate Government does not offer to pay compensation, mines may be worked in a proper manner.—(1) If before the expiration of the said sixty days, the ¹²[appropriate Government] does not publish a declaration as provided in section 5, the owner, lessee or occupier of the mines may, unless and until such a declaration is subsequently made, work the mines or any part thereof in a manner proper and necessary for the beneficial working thereof, and according to the usual manner of working such mines in the local area where the same are situate.

(2) If any damage or obstruction is caused to the surface of the land or any works thereon by improper working of the mines, the owner, lessee or occupier of the mines shall at once, at his own expense, repair the damage or remove the obstruction, as the case may require.

(3) If the repair or removal is not at once effected, or if the ¹²[appropriate Government] so thinks fit, without waiting for the same to be effected by the owner, lessee or occupier, the ¹²[appropriate Government] may execute the same and recover from the owner, lessee or occupier the expense occasioned thereby.

8. Mining communications.—If the working of any mines is prevented or restricted under section 5, the respective owners, lessees and occupiers of the mines, if their mines extend so as to lie on both sides of the mines the working of which is prevented or restricted, may cut and make such and so many airways, headways, gateways or water-levels through the mines, measures or strata, the working whereof is prevented or restricted, as may be requisite to enable them to ventilate, drain and work their said mines; but no such airway, headway, gateway or water-level shall be of greater dimensions or section than may be prescribed by the ¹²[appropriate Government] in this behalf, and, where no dimensions are so prescribed, not greater than eight feet wide and eight feet high, nor shall the

¹² Subs. by A. O. 1950.

¹³ Ins. by S. 2 and Sch. I of the Devolution Act, 1920 (XXXVIII of 1920).

same be cut or made upon any part of the surface or works, or so as to injure the same, or to interfere with the use thereof.

9. Appropriate Government to pay compensation for injury done to mines.

—The ¹⁴[appropriate Government] shall, from time to time, pay to the owner, lessee or occupier of any such mines extending so as to lie on both sides of the mines; the working of which is prevented or restricted, all such additional expenses and losses as may be incurred by him by reason of the severance of the lands lying over those mines or of the continuous working of those mines being interrupted as aforesaid, or by reason of the same being worked in such manner and under such restrictions as not to prejudice or injure the surface or works, and for any minerals not acquired by the ¹⁴[appropriate Government] which cannot be obtained by reason of the action taken under the foregoing sections; and if any dispute or question arises between the ¹⁴[appropriate Government] and the owner, lessee or occupier as aforesaid, touching the amount of those losses or expenses, the same shall be settled as nearly as may be in the manner provided for the settlement of questions touching the amount of compensation payable under the Land Acquisition Act, 1870.

10. and also for injury arising from any airway or other work.—If any loss or damage is sustained by the owner or occupier of the lands lying over any such mines, the working whereof has been so prevented or restricted as aforesaid (and not being the owner, lessee or occupier of those mines), by reason of the making of any such airway or other works as aforesaid, which or any like work it would not have been necessary to make but for the working of the mines having been so prevented or restricted as aforesaid, the ¹⁴[appropriate Government] shall pay full compensation to that owner or occupier of the surface lands for the loss or damage so sustained by him.

11. Power to officer of appropriate Government to enter and inspect the working of mines.—For better ascertaining whether any mines lying under land acquired in accordance with the provisions of this Act are being worked, or have been worked, or are likely to be worked so as to damage the land or the works thereon, an officer appointed for this purpose by the ¹⁴[appropriate Government] may, after giving twenty-four hours' notice in writing, enter into and return from any such mines or the works connected therewith; and for that purpose the officer so appointed may make use of any apparatus or machinery belonging to the owner, lessee or occupier of the mines, and use all necessary means for discovering the distance from any part of the land acquired to the parts of the mines which have been, are being or are about to be worked.

12. Penalty for refusal to allow inspection.—If any owner, lessee or occupier of any such mines or works refuses to allow any officer appointed by the ¹⁴[appropriate Government] for that purpose to enter into and inspect any such mines or works in manner aforesaid, he shall be punished with fine which may extend to two hundred rupees.

13. If mines worked contrary to provisions of this Act, appropriate Government may require means to be adopted for safety of land acquired.—If it appears that any such mines have been worked contrary to the provisions of this Act, the ¹⁴[appropriate Government] may, if it thinks fit give notice to the owner, lessee or occupier thereof to construct such works and to adopt such means as may be necessary or proper for making safe the land acquired, and the works thereon, and preventing injury thereto; and if, after such notice, any such owner, lessee or occupier does not forthwith proceed to construct the works necessary for making safe the land acquired and the works thereon, the ¹⁴[appropriate Govern-

¹⁴ Subs. by A. O. 1950.

ment] may itself construct the works and recover the expense thereof from the owner, lessee or occupier.

14. Construction of Act when land acquired has been transferred to a local authority or Company.—When a statement under section 3 has been made regarding any land, and the land has been acquired by the Government, and has been transferred to, or has vested, by operation of law, in a local authority or Company, then sections 4 to 13, both inclusive, shall be read as if for the words “the appropriate Government”, wherever they occur in those sections ¹⁵[except in section 5, sub-section (5), and section 8], the words “the local authority or Company, as the case may be, which has acquired the land,” were substituted.

15. [Pending cases.]—*Rep. by the Repealing and Amending Act, 1937 (XX of 1937), s. 3 and Sch. II.*

16. Definition of local authority or Company.—In this Act—

(a) “local authority” means any municipal committee, district board, body of port commissioners or other authority legally entitled to or entrusted by the Government with, the control or management of any municipal or local fund; and

(b) “Company” means a company registered under any of the enactments relating to Companies from time to time in force in ¹⁶[Part A States and Part C States] or formed in pursuance of an Act of Parliament ¹⁷[of the United Kingdom] or by Royal Charter or Letters Patent.

¹⁸[(c) “appropriate Government” means, in relation to acquisition of land for the purpose of the Union, the Central Government, and, in relation to acquisition of land for any other purpose, the State Government.]

17. This Act to be read with Land Acquisition Act, 1870.—This Act shall, for the purposes of all enactments for the time being in force, be read with and taken as part of the Land Acquisition Act, 1870.¹⁹

MINING LABOUR WELFARE LEGISLATION

General Labour Welfare

The Factories Act, 1948, the Plantation Labour Act, 1951 and the Mines Act, 1952 contain provisions for canteens, creches, rest shelters, washing facilities, medical aid and also for appointment of Welfare Officers in industrial establishments employing prescribed numbers of workers.

Mining Labour Welfare¹

Considerable attention has been paid during the last several years to the provision of adequate welfare measures for the workers engaged in mining industry. As more than three-fourth of the total number of workers have been employed in coal mines, special attention was directed first to the welfare measures in coal mining industry by amending the Indian Mines Act, 1923 by an Amending Ordinance (XVII of 1945) and Amending Act of 1946 (II of 1946) for providing creches and pithead baths separately for men and women miners with shower

¹⁵ Ins. by S. 2 and Sch. 1 of the Devolution Act, 1920 (XXXVIII of 1920).

¹⁶ Subs. by A. O. 1950 for the words “the Provinces”.

¹⁷ The words “of the United Kingdom” was inserted by A. O. 1950.

¹⁸ This clause was added, *ibid.*

¹⁹ See now the Land Acquisition Act, 1894 (1 of 1894).

baths and locker rooms. The Coal Mines Labour Welfare Fund Ordinance (VII of 1944) was promulgated on the 31st January 1944, with the object of constituting a fund for financing of measures for promoting the welfare of labour employed in coal mining industry. The Ordinance was subsequently replaced by the Coal Mines Labour Welfare Fund Act on the 12th April, 1947. Next to coal mining, mica mining employs the largest number of workers and a beginning was also made by enacting the Mica Mines Labour Welfare Fund Act in 1946 (XXII of 1946) for the constitution of a similar fund for financing of activities to promote the welfare of labour employed in mica mining industry. These two Acts are concerned exclusively with the question of welfare of the workers in coal mining and mica mining industries and an integrated picture of their lives have been kept in view at the time of preparing schemes under these Acts. Their living conditions have been sought to be improved and they are taught to make best use of their leisure.

Coal Mines Pithead Bath Rules, 1946

The Indian Mines Act of 1923 was amended by the Indian Mines (Amendment) Act of 1946 (II of 1946) authorising the Central Government to frame rules requiring the mine owners to provide and maintain, at or near the pithead, bathing places equipped with shower-baths and locker-rooms, separately for male and female workers employed in the coal mines, and to prescribe the minimum standards and number of such baths. Under this Amending Act, the Central Government framed the Coal Mines Pithead Bath Rules, 1946 on the 23rd July, 1946 which came into force on the 1st July, 1947.

Mines Creches Rules, 1946

The Central Government promulgated the Indian Mines (Amendment) Ordinance in 1945 (XVII of 1945) amending the Indian Mines Act of 1923 empowering the Central Government to make rules regarding the maintenance in mines where women were ordinarily employed, of suitable rooms exclusively for use of their children under 6 years and to prescribe the standards and number of such rooms. Under this Amending Ordinance, the Central Government framed the Mines Creches Rules, 1946 on the 23rd July 1946 requiring the mine owners to provide for creches according to plans prepared in conformity with the Rules and constructed according to standards. The owner shall arrange for monthly medical examination of the children attending the creches and also of nursing mothers at prescribed intervals.

Coal Mines Labour Welfare

With the increased demand for coal for wartime industrial production, there was a great demand for labour for mines and the Government realised the necessity to adopt welfare measures in order to increase the worker's productive efficiency. The Central Government promulgated the Coal Mines Labour Welfare Fund Ordinance (VII of 1944) to provide amenities for the miners and to promote their welfare. The Ordinance marked a new stage in welfare legislation in India as it introduced, for the first time, the principle of levying a cess on the output of an industry to finance welfare measures for the workers engaged in the said industry. The Ordinance provided for establishment of a Fund to finance welfare activities and accordingly the Government instituted a Coal Mines Labour Welfare Fund to undertake activities conducive to the welfare of the labour employed in coal mining industry. The Fund which was made up of a levy of excise duty at a rate not exceeding four annas per ton of coal and coke despatched by rail from the collieries, was to be utilised to meet the cost of measures for the improvement of nutrition and for the provision for water supply, facilities for washing, medical, educational and recreational facilities and for the general amelioration of the social

conditions of these miners. In short, the Fund will be utilised to meet expenditure on measures necessary or expedient to promote the welfare of labour employed in coal mining industry. The Ordinance authorised the Central Government to set up an Advisory Committee with equal representatives of owners and workers and a woman member to advise the Government on matters relating to the working and administration of the Fund.

Coal Mines Labour Welfare Fund Act, 1947 (XXXII of 1947)

On the 11th March, 1947, the Government of India introduced Coal Mines Labour Welfare Fund Bill in the Legislative Assembly to make better provision for financing of measures for promoting the welfare of coal miners and to repeal the Coal Mines Labour Welfare Fund Ordinance, 1944. The Act was passed on 12th April, 1947 (XXXII of 1947) and came into force on 14th June, 1947. The Act has now been extended to the whole of India except the State of Jammu and Kashmir.

The Act provides for the levy of an excise duty at a rate not less than four annas and not more than eight annas per ton on all coal and coke despatched from collieries in India. It also provides, *inter alia*, for setting up of a Fund to be called Coal Mines Labour Housing and General Welfare Fund. The proceeds of the duty should be credited to Coal Mines Labour Housing and General Welfare Fund and apportioned under the two separate accounts to be called Housing Account and General Welfare Account. The Act specifies the measures which will be financed from each of these accounts. In pursuance of the provisions of the Act the Central Government imposed a cess at the rate of six annas per ton on all coal and coke despatched from collieries by rail and road during the year 1953-54 and the cess was apportioned between the General Welfare Account and the Housing Account in the ratio of 7:2.

Welfare Measures

The cess earmarked for General Welfare Account is wholly being spent in various welfare measures like establishment of hospitals, anti-malarial measures, public health, sanitation, adult education, propaganda, anti-tuberculosis, etc. The Act provides that the employers who provide dispensary services up to prescribed standards will be given grants-in-aid not exceeding an amount equivalent to a cess of eight pies per ton in respect of coal or coke despatched from the respective colliery or the amount actually spent by the employers, whichever is less. Where the employers have not provided adequate dispensary services, the Fund itself will assume this responsibility.

Housing Measures

The Act provides for constitution of a Coal Mines Housing Board to prepare and carry out approved schemes financed from the housing account of the Fund for provision of suitable housing accommodation for colliery labour. The Housing Board is to be a body corporate.

The Act lays down provisions regarding housing accommodation and payment of rent at the full prescribed rate or at a lesser rate as may be decided by the Housing Board. The rent is recoverable as an arrear of land revenue. Failure to vacate the accommodation within fifteen days of the service of notice to vacate, will make liable to eviction under the ordinary law.

Coal Mines Labour Welfare Fund (Amendment) Act, 1949 (XXXVIII of 1949)

The Act was amended in 1949 (XXVIII of 1949) with a view to enlarge the functions of the Housing Board. The Board is now vested with the power to prepare plans and estimates and construct the works of erection, maintenance and repairs financed from the General Welfare Account of the Fund.

Administration of the Fund

The Act provides for appointment of Coal Mines Welfare Commissioner, Inspectors and Welfare Officers for the purpose of the administration of the Act. The Commissioner shall be Chairman of Coal Mines Labour Housing Board. The Act also provides for constitution of an Advisory Committee by the Central Government consisting of equal numbers of coal mine owners and coal miners for consultation and advice on matters referred to it in connection with the administration of the Act. The Chairman of the Advisory Committee will be an officer of the Central Government.

The Coal Mines Labour Welfare Organisation was set up with a Coal Mines Labour Welfare Commissioner, one Chief Welfare Officer, four Welfare Inspectors and 26 Assistant and Junior Assistant Inspectors of Labour Welfare. The Advisory Committee for welfare measures in coal mines was set up with seven Government officials, seven representatives of mine owners' associations and seven persons to represent the interests of the workers, with the Secretary, Ministry of Labour, Government of India, as Chairman.

Welfare in Coal Mines²

The Central Hospital at Dhanbad was formally opened by the Central Labour Minister on the 6th December, 1951. Another Central Hospital at Asansol with 200 beds and well equipped with costly up-to-date equipments was opened by the West Bengal Chief Minister on the 9th April, 1955. Four Regional Hospitals and Maternity Centres in Jharia and Raniganj coal fields have been set up. Proposals for Regional Hospitals in the Bokaro coalfield in Bihar, Pench Valley and Korea coalfields in Madhya Pradesh are under consideration. Two T. B. clinics have been started at Katras and Searsole and quotas of beds for miners have been reserved in certain sanatoria.

There are a number of multi-purpose welfare centres in the coalfields which provide educational, recreational and other facilities. Several Miners' Institutes with Women's Welfare Centres, Children's Education Centres and Adult Education Centre have been set up. Apart from hospital and medical facilities, anti-malaria and sanitary measures, mobile cinema, canteens, fair price shops and radio sets are being provided.

Other schemes financed from the Fund include housing, the improvement of water supply and the establishment of a rehabilitation centre in the Dhanbad Hospital to assist disabled miners and to train them for alternate employment.

The Coal Mines Labour Welfare Fund has prescribed improved types of quarters for the workers engaged in coal mining industry and townships for the miners have been provided at Bhuli in Bihar and Bijoynagar in West Bengal. Provision has also been made for construction of miner's quarters in Dalta in Madhya Pradesh.

Coal Mines Lady Welfare Workers

The Government of India has organised a preliminary training course for Coal Mines Lady Welfare Workers (Kamin Kalyan Sevikas) and it was inaugurated by the Labour Member on 28th May, 1947. The scheme of welfare work now undertaken provides for the establishment of 40 demonstration centres spread

² For the report of the activities financed during the year 1953-54 from the General Welfare Account of the Fund and the estimate of receipts into and expenditure from the General Welfare Account of the Coal Mines Labour Housing and General Welfare Fund for the year 1954-55, see the Ministry of Labour Notification No. S.R.O. 368 dated the 9th February, 1956, published in the Gazette of India, Part II, Sec. 3 dated the 18th February, 1956, pp. 200-228.

out suitably over the coalfields of Bengal and Bihar. These centres will help women miners in gaining knowledge of special craft, e.g., spinning, knitting, domestic economy, etc., and also arrange for recreational and educational facilities.

Mica Mines Labour Welfare

There are over 60,000 miners working in mica mines and the working and living conditions there are most deplorable as per finding of the Labour Investigation Committee in 1946. An *ad hoc* survey was made by a member of the Labour Investigation Committee in Mica Mining and his Report made a number of recommendations including working out of a comprehensive welfare scheme designed to improve the standard of living of the workers and to secure for them the requisite housing, educational, medical and other facilities. After the publication of the Report, the Government of India thought the urgent necessity of initiating legislative scheme of welfare measures for amelioration of the living and working conditions of the labour employed in mica mining industry.

Mica Mines Labour Welfare Act, 1946 (XXII of 1946)

After consulting the matter with the mine owners, the Government of India introduced a Bill in the Legislative Assembly on 12th March, 1946 to constitute a fund for financing the activities for promoting the welfare of labour employed in mica mining industry and the Mica Mines Labour Welfare Fund Act was passed in 1946 (XXII of 1946). The Act has now been extended to the whole of India except the State of Jammu and Kashmir.

The Act provides for a levy of cess on all mica exported from India, at a rate not exceeding six and one quarter per cent *ad valorem* as may be fixed from time to time by the Central Government. During the year 1953-54 the rate is two and one half per cent *ad valorem*.

Mica Mines Labour Welfare Fund

The Act provides for constitution of the Mica Mines Labour Welfare Fund to which the cess collected as aforesaid will be credited to meet the expenditure incurred in connection with the measures for promoting the welfare of the labour employed in mica mining industry, such as, the provisions for public health, sanitation, medical facilities, water supplies, adequate nutrition, housing, transport to and from work, educational and recreational facilities and for general improvement of social conditions. The Fund will be administered by the Central Government which, in consultation with the Advisory Committees set up under the Act with an equal number of representatives of mica mine owners and workers employed there, may make grants to State Government, local authority or owner of mica mine in aid of any approved welfare scheme.

Rules under the Act

By a Notification dated the 2nd January 1948, the Central Government framed Rules for the administration of the Act and set up two Advisory Committees, including representatives of owners and workers, in Bihar and Madras to advise it on matters arising out of the administration of the Act or the Fund. Amendments to the Rules were made in January 1952 to provide for the constitution of Advisory Committees for the States of Rajasthan and Ajmer and Advisory Committees for these two States were set up.

Welfare in Mica Mines ³

The activities of the Mica Mines Labour Welfare Fund at present cover miners in the States of Bihar, Andhra, Rajasthan and Ajmer.

³ For the activities financed from the Mica Mines Labour Welfare Fund for the year 1954-55 and for the estimate for the year 1955-56, see the *Gazette of India*, Part II, Section 3, dated 26th November, 1955, page 2296, under Ministry of Labour Notification No. S.R.O. 3560 dated the 22nd November, 1955 and also Indian Labour Gazette, Volume XIII, (1955-56), December, 1955, page 420.

1. BIHAR.

As regards medical facilities, a 30-bed Central Hospital for mica miners has been constructed at Karma in Bihar and was declared open for the use of mica mine workers on the 27th November, 1954. Reservation of 10 beds at the Kodarma Hospital for the mica mine workers on payment of an annual grant of Rs. 13,000/- has been made and this arrangement is being continued. The Fund continued running 3 Static Dispensaries at Dhab, Dhorakola and Ganpathbaghi. Two Mobile Medical Units stationed at Karma and Dhorakola served workers and their families who could not take advantage of the dispensaries on account of distance and lack of proper communications. The Fund is arranging to construct its own dispensary with staff quarters and maternity and child welfare centres at Dhab, Dhorakola and Ganpathbaghi. The construction of the dispensary building at Dhab has been completed. The scheme of anti-malarial operations is being implemented. A supplementary scheme for insecticidal spraying in Dabour, Dhorakola and Dhab area has been implemented. Three wells have been constructed for supply of drinking water at Saphi, Dhorakola and Khalaktambi. The Assistant Geologist of the Geological Survey of India recommended 22 sites for construction of wells under the subsidiary scheme. The Mobile Cinema van is showing pictures as well as informative and educative films. An additional mobile cinema has been sanctioned. The Multipurpose Centre composed of an Adult Education Centre and the Women's Welfare Centre was opened at Dabour and is affording educational, recreational and other facilities to the mica mine workers and their families. Six primary schools were sanctioned for the mining area. A sum of Rs. 5,000 was sanctioned for organising competitive sports. An order for 16 radio sets for the workers' recreation have been placed with the Director-General of Supplies and Disposals.

2. ANDHRA.

Three dispensaries for mica miners have been started at Kalichedu, Talupur and Sydapuram and an in-patient ward with 8 beds was opened at the dispensary at Kalichedu. Two beds in the Government Headquarters Hospital at Nellore and one bed in the Government Hospital, Gudur, have been reserved for the exclusive use of mica mine workers. The Fund contributed Rs. 15,000 to the Tuberculosis Hospital, Nellore, for reservation of 8 beds for the exclusive use of mica mine workers. Four Maternity Centres have been opened at Talupur, Kalichedu, Utukur and Sydapuram. The Lady Health Visitor visits the houses of labourers and instructs women on health, sanitation, child welfare, post-natal and anti-natal precautions. Anti-malaria schemes have been in operation. Six Elementary Schools and five Adult Literary Schools have been functioning and midday meals are being supplied to the children in schools. Recreation Clubs and Radio Centres have been opened and Community Centres are being formed to educate women labourers on home science, child welfare, sanitation, hygiene and also to teach them handicrafts such as sewing, tape weaving, spinning, mat-making, etc.

3. RAJASTHAN

The Mica Mines Welfare Fund Advisory Committee for Rajasthan decided to open eight multi-purpose welfare centres providing medical, educational and recreational facilities to men, women and children. Four "B" class Centres consisting of a dispensary and a maternity and child-welfare centre were started at Bemali, Lawa-Sardargarh and Jamoli. Four "C" class Centres of Mobile Medical Units and one additional "B" class Centre and two "A" class Centres comprising of a Dispensary, Maternity and Child Welfare, Recreation, Elementary School and water supply and one Mobile Cinema Unit were sanctioned.

4. AJMER

A Mobile Medical Unit to provide medical aid to the miners is being established. A subsidy of Rs. 2,000/- was granted to the villagers for construction of a school building at village Dadola and the school building was completed. Establishment of two Multi-purpose Welfare Centres at Para and Sanod for providing medical, educational, maternity and child welfare facilities, were sanctioned. One centre at Para was established in November, 1954 and another in village Sanod is being constructed. A proposal for establishing an industrial centre at Beawar is under consideration.

COAL MINES PITHEAD BATH RULES, 1946

Arrangement of Paragraphs

1. Short title and commencement.
2. Definitions.
3. Provision of pithead baths.
4. Standards of construction for pithead baths.
5. Water for pithead baths.
6. Lighting.
7. Attendants.
8. Locker rooms.
9. Sanitary facilities.
10. Cleanliness.
11. Authority empowered to inspect.

COAL MINES PITHEAD BATH RULES, 1946¹

In exercise of the powers conferred by sub-section (bbb) of section 30 of the Indian Mines Act, 1923 (IV of 1923), the Central Government is pleased to make the following rules:—

1. Short title and commencement.—(1) These rules may be called the Coal Mines Pithead Bath Rules, 1946.

²[(2) They extend to the whole of India except the State of Jammu and Kashmir].

2. Definitions.—(a) "Prescribed" means prescribed in writing by the competent authority;

- (b) (i) "Category 'A' mine" means a coal mine, the average monthly output of which exceeds 500 tons but does not exceed 2,500 tons.
- (ii) "Category 'B' mine" means a coal mine, the average monthly output of which exceeds 2,500 tons but does not exceed 10,000 tons.
- (iii) "Category 'C' mine" means a coal mine, the average monthly output of which exceeds 10,000 tons but does not exceed 20,000 tons.
- (iv) "Category 'D' mine" means a coal mine, the average monthly output of which exceeds 20,000 tons.

Explanation.—The average monthly output of a mine shall be calculated on the basis of the figures of coal raisings for the previous calendar year.

(c) "competent authority" means the Coal Mines Welfare Commissioner or any person authorised in writing by him in this behalf.

¹ These Rules were published under the Government of India, Department of Labour Notification No. LMW. 5 (5)/46 dated the 23rd July 1946.

² This sub-rule was substituted by the Ministry of Labour Notification No. S.R.O. 1778 dated the 12th November, 1951.

- (d) "pithead bath" means a bathing place at or near a pithead for the use of miners equipped with shower baths, locker rooms and ancillary facilities, such as latrines, urinals and attendants' rooms.

3. Provision of pithead baths.—(1) The owner, agent or manager of every coal mine shall within such period as may be specified by the competent authority construct thereat a pithead bath in accordance with plans prepared in conformity with these rules and approved by the competent authority; provided that—

- (i) the competent authority may, in exceptional cases, with the concurrence of the Government of India, grant exemption from this requirement to mines the resources of which are not sufficient to enable them to make provision for adequate supply of water for pithead baths;
- (ii) the competent authority may grant exemption in respect of any mine, on production of a certificate from the Chief Inspector of Mines that its productive capacity will be exhausted within the next three years, subject to such conditions as may be prescribed requiring the provision of alternative bathing facilities of a temporary character;
- (iii) in a mine with a number of openings, the owner, agent or manager may instal more pithead baths than one, provided that the total number of shower baths installed and of latrines and urinals provided shall not be less than is required to conform with sub-rule (2) of this rule and with rule 9.
- (iv) if the competent authority is satisfied that no inconvenience will be caused to the miners concerned if a single pithead bath is provided to serve neighbouring mines of category 'A' or 'B', he may authorise the owners of such mines to provide a single pithead to serve such mines, which shall for the purposes of sub-rule (3) be deemed to be a single mine with an average monthly output equal to the combined average monthly output of the individual mines.

3(2) * * * *

4[(2)] Every pithead bath shall be provided with shower baths on the following scale:—

Category 'A' mine:	10 for men and 4 for women.
Category 'B' mine:	20 for men and 8 for women.
Category 'C' mine:	24 for men and 10 for women.
Category 'D' mine:	40 for men and 16 for women.

4. Standards of construction for pithead baths.—Every pithead bath shall conform to the following standards of construction:—

- (i) It shall be a well-designed and substantially constructed building with separate bath cubicles and ancillary facilities for men and women, so laid out as to provide proper segregation of the sexes.
- (ii) It shall be built in brick-in-cement mortar with a roof of cement concrete or corrugated asbestos cement sheets or tiles, or to conform to any other type of prescribed construction.
- (iii) The floors and any interior surface of the walls which are liable to become wet shall be cement plastered with special finish, or tiled, or finished in any other prescribed manner so as to provide an impervious and clean surface, provided that the walls need be so treated only up to a height of six feet from floor level.
- (iv) Each bath cubicle shall be designed for the use of one person at a time only and shall have a floor area of not less than twelve square feet and shall contain a shower bath with proper fittings for turning the water on and off.

Provided that in the case of a pithead bath which was in existence prior to the issue of these rules, the competent authority may permit the continued use of bath cubicles for the use of more than one person if the floor area provided in respect of each shower bath is not less than twelve square feet.

5. Water for pithead baths.—(1) Water shall be provided at a pressure equivalent to a head of not less than ten feet at the shower.

(2) When pit water is used, it shall be treated in the prescribed manner before use.

(3) Proper arrangements shall be made to the satisfaction of the competent authority for the drainage or disposal of used bath water.

³ Sub-rule (2) was omitted by the Ministry of Labour Notification No. S.R.O. 1204 dated the 28th May, 1955.

⁴ Sub-rule (3) re-numbered as sub-rule (2), *ibid.*

6. Lighting.—Every pithead bath shall remain open at all times of the day and night and the prescribed provision shall be made for lighting.

7. Attendants.—(1) At every pithead bath the owner, agent or manager shall appoint a male attendant and a female attendant to supervise the pithead baths intended for men and women respectively.

(2) Separate rooms shall be provided close to the bathing cubicles for the use of male and female attendants.

8. Locker rooms.—(1) Separate locker rooms for clean and pit clothes respectively shall be provided at each pithead bath with the prescribed type of locker installed for the use of each man and woman entitled to use the bath: Provided that until such time as the competent authority so directs in writing combined locker and waiting rooms of adequate size may be provided for men and women respectively in lieu of separate locker rooms for clean and pit clothes.

(2) The owner, agent or manager of the mine shall be responsible for the adequate maintenance of locker rooms and shall provide suitable washing arrangements for pit clothes.

(3) Each miner to whom a locker is allotted shall provide his own padlock and key therefor.

(4) The locker room shall be maintained at all times in a clean and sanitary condition.

9. Sanitary facilities.—(1) Every pithead bath shall be provided with sanitary latrines on the following scale:—

Category 'A' mine: 4 for men and 2 for women.

Category 'B' mine: 6 for men and 3 for women.

Category 'C' mine: 8 for men and 4 for women.

Category 'D' mine: 14 for men and 5 for women.

(2) Every pithead bath shall be provided with urinals on the scale of one for every fifty persons employed in the mine.

10. Cleanliness.—(1) All bath cubicles, locker rooms, latrines and urinals shall be maintained at all times in a clean and sanitary condition;

(2) The owner, agent or manager of the mine shall make arrangements for the sale at each pithead of soap and mustard oil at a price not exceeding what the owner has paid therefor.

11. Authority empowered to inspect.—The competent authority shall be responsible for the inspection of the pithead baths and for ensuring that the provisions of these rules are complied with.

MINES CRECHE RULES, 1946

Arrangement of Paragraphs

1. Short title.
2. Definitions.
3. Provision of creches.
4. Standards of creches.
5. Use of the creche.
6. Medical arrangements.
7. Provision of staff.
8. Maintenance of records.
9. Inspection of creches.

MINES CRECHE RULES, 1946¹

In exercise of the powers conferred by sub-section (bb) of section 30 of the Indian Mines Act, 1923 (IV of 1923), the Central Government is pleased to make the following rules:—

1. Short title.—(1) These rules may be called the Mines Creche Rules, 1946.

²[(2) They extend to the whole of India except the State of Jammu and Kashmir.]

¹ These Rules were published under the Government of India, Department of Labour Notification No. LMW. 5(7)/46 dated the 23rd July, 1946.

² Inserted by the Ministry of Labour Notification No. S.R.O. 1777 dated the 12th November, 1951.

2. **Definitions.**—In these rules, unless there is anything repugnant in the subject or context,—

(a) "Competent authority" means, in respect of coal mines, the Coal Mines Welfare Commissioner and in respect of other mines, the Chief Inspector of Mines, and includes any person authorised in writing by the said Commissioner or Inspector in this behalf;

(b) "Creche" means a room or rooms with ancillary accommodation reserved for the use of children, under six years of age, of women employed in a mine.

(c) "Medical Officer in charge" means a qualified medical practitioner employed whether on a whole time or part time basis, by the owner of a mine to perform the duties assigned to such officer by these rules.

3. **Provision of creches.**—(a) The owner of every mine shall construct thereat a creche in accordance with plans prepared in conformity with these rules and previously approved by the competent authority.

Provided that where the competent authority is of the opinion that the situation, nature and extent of the workings or other places where women are employed are such as to render compliance with the provisions of this Rule not reasonably practicable, the competent authority may by order in writing exempt any owner of a mine from the provisions of this rule for such period as may be specified in the order.

Provided further that where an exemption is granted under this Rule, the competent authority may require a suitable room or rooms with an attendant and other necessary equipments to be provided and maintained at or near any working place or part of the mine.

(b) Such creche shall be constructed within nine months of the date of publication of these rules, provided that where land has to be acquired for the purpose, the competent authority may extend the time limit to a period not exceeding twelve months from the said date.

(c) If in any case the competent authority is satisfied that by reason of a shortage of building material or of labour the owner of a mine is unable to provide within nine months a creche in accordance with the specifications in these rules, he may approve of the erection of a temporary structure to be replaced by a permanent structure within such time as he may prescribe.

(d) If in any case the competent authority is satisfied that no inconvenience will be caused to the employers concerned, if a single creche is provided to serve neighbouring mines, he may authorise the owners of such mines to provide jointly a single creche and on such conditions as he may prescribe.

³(e) On the production of a certificate from the Chief Inspector of Mines that the productive capacity of a mine will be exhausted within the next three years, the competent authority may on condition that the owner of the mine shall provide a creche and on such other conditions as the competent authority deems fit grant exemption from the construction of a creche in accordance with these rules].

4. **Standards of creches.**—Every creche shall conform to the following standards of construction:—

(i) It shall be contained in one building, built of brick and mortar, adequately lighted and properly ventilated and affording effective protection from all kinds of weather;

⁴[Provided that with the previous permission in writing of the competent authority, it may be built of any other material which the said authority may approve].

(ii) It shall be constructed on a suitable site selected by the colliery management with the previous approval of the competent authority;

(iii) The flooring shall be of cement or stone and the ceiling shall not be less than 12 feet high from the floor;

(iv) The interior walls shall be lime-washed once a year and the wood work shall be painted or varnished once every three years;

(v) It shall be maintained in a clean and sanitary condition to the satisfaction of the inspection staff;

(vi) Medicines for first aid, and a number of cradles or beds, bed-sheets, linen, bedding, feeding bottles, utensils and toys for the use of children shall be

³ Inserted by the Ministry of Labour Notification No. LW51(10)/48 dated the 16th November, 1949.

⁴ The provisio was added, *ibid*.

maintained for each creche, on a scale approved by the competent authority, provided that if the competent authority is satisfied that the owner of any mine is for good reasons unable to provide an adequate number of articles mentioned in the rule, he may condone the deficiencies;

- (vii) The latrines shall be maintained on a scale prescribed by the competent authority and in a sanitary condition to the satisfaction of the inspecting staff and the closed bath room shall be equipped with either a sink or masonry tubes with an adequate quantity of water on a scale approved by the competent authority;
- (viii) A supply of drinking water shall be maintained for each creche on a scale approved by the competent authority;
- (ix) The creche shall remain open at all times, both by day and by night when women employees are working at the mine and it shall be properly lighted at night.

5. Use of the creche.—The use of the creche shall be restricted to children, their attendants, the supervisory staff and the mothers of the children, and no male worker shall be permitted to enter a creche.

6. Medical arrangements.—(1) A medical examination of the children attending the creche shall be made every month by a qualified medical practitioner and a record of such examinations shall be maintained.

(2) At intervals prescribed by the competent authority, a medical examination of the nursing mothers attending the creche shall be made by a qualified medical practitioner, if possible a woman, and when the examination is conducted by a male doctor it shall be made in the presence of the creche nurse.

(3) The Medical Officer in charge of the mine shall be responsible for the general supervision of the creche.

5[7. Provision of staff.—At every creche the owner of the mine shall appoint

- (i) a Creche-in-charge who shall be a woman possessing such qualifications and training as may be approved of by the competent authority, and
- (ii) inferior staff on a scale approved by the said authority].

8. Maintenance of records.—(a) A register giving particulars of children attending a creche, including their dates of birth, shall be maintained in the form prescribed by the competent authority.

(b) A register of complaints shall be maintained for inspection by the Medical Officer in charge and by the management of the colliery.

9. Inspection of creches.—The competent authority shall be responsible for the inspection of creches at mines.

COAL MINES LABOUR WELFARE FUND ACT, 1947 (XXXII OF 1947)

Statement of Objects and Reasons¹

The Coal Mines Labour Welfare Fund Ordinance promulgated in 1944 provides for the levy of an excise duty at a rate not exceeding Re. -/4/- per ton of coal and coke despatched from collieries in British India. The proceeds making up the Fund are earmarked exclusively for promoting the welfare of labour employed in the coal-mining industry. The Government of India are now satisfied that for reasons explained below, the limit of this cess should be further increased, the maximum being raised to Re. -/8/- per ton on all despatches of coal and coke.

2. The present housing conditions in the coalfields are extremely unsatisfactory. No other scheme of welfare can be given higher 'priority'. Government do not consider that the housing problem can be tackled piecemeal. In their opinion a target figure of 50,000 houses for miners should be the aim of the housing scheme in the coalfields and that provision should be made for 15,000 houses to be completed before the end of the next financial year.

3. Careful calculations have been made in the light of prevalent costs and it is reckoned that by levy of a cess at Re. -/3/4 per ton of coal and coke and a subsidy of Rs. 400 per house from the general revenues, adequate funds will be forthcoming for financing a

⁵ Subs. by Notification No. LW 51(10)48 dated the 16th November, 1948.

¹ Gazette of India, 1947, Part V, pp. 317-318.

comprehensive housing scheme of 50,000 houses. There are various other welfare measures like establishment of hospitals, anti-malarial measures, public health and sanitation, adult education propaganda, anti-tuberculosis, etc., which will absorb, when all the schemes are in final form, practically the whole of the present limit of cess of Re. -/4/- per ton. Therefore, an increase in this limit is urgently required to provide funds for the housing scheme. The Bill provides that when the rate of cess reaches the maximum of Re. -/8/- per ton not less than Re. -/3/4 thereof will be earmarked to a separate housing fund.

4. Colliery owners have in many cases provided dispensary services for the benefit of the miners employed by them and the employers' responsibility in this direction is well recognized. But with the establishment of Central and Regional Hospitals by the Coal Mines Welfare Fund a tendency is likely to arise by which the responsibility for providing dispensary services will be shifted on to the Fund in the absence of any statutory provision requiring the employer to provide such facilities. A provision has, therefore, been made in the Bill by which employers who provide dispensary services up to standards prescribed will be given the grants-in-aid not exceeding the amount equivalent to a cess of 8 pies per ton in respect of coal or coke despatches from the respective colliery or the amount actually spent by the employer whichever is less. Where employers have not provided adequate dispensary services, the Fund will itself provide them and to meet this expenditure as well as the costs of grants-in-aid to the employers, a further levy of a cess equivalent to 8 pies per ton is necessary. This is estimated to yield approximately Rs. 9 lakhs a year which should ensure reasonably efficient dispensary services, it being noted that the existing cess will provide funds in addition for the larger hospital schemes.

5. The result of these measures is that the limit of the cess should be raised to Re. -/8/- per ton. It is not, however, intended to levy this maximum rate forthwith, and during the year 1947-48, it is not proposed to levy a total cess in excess of Re. -/6/- per ton. Thereafter, with the further progress in the housing scheme, rates will have to be increased gradually and up to the maximum of Re. -/8/-.

6. The cost of construction is expected to average Rs. 2,500 per house for which the economic rent may be as high as about Rs. 14 a month. Miners have, by tradition, occupied quarters, where provided, rent-free and it is not, at present, intended to levy a rent or at any rate more than a nominal rent from the occupants. Some provision is, therefore, necessary in order to ensure that the houses constructed by the Fund are occupied only by genuine and steady workers and that those who cease to be so, do not continue to occupy the houses rent-free or on nominal rent. The details regarding these will be discussed with representatives of employers and workers who will be associated with the administration of the Housing Fund. But as a precautionary measure a legal provision has been included for summary recovery of rent at full rates in addition to the liability under the ordinary law, for eviction.

COAL MINES LABOUR WELFARE FUND (AMENDMENT) ACT, 1949 (XXXVIII OF 1949)

Statement of Objects and Reasons²

The main function of the Housing Board constituted under the Coal Mines Labour Welfare Fund Act, 1947, is to prepare and carry out approved schemes financed from the housing account of the Fund for the provision of suitable housing accommodation for colliery labour. Various other building works, for example, central and regional hospitals and maternity and child-welfare centres, financed from the general welfare account of the Fund are also under construction, the control of which, it is considered, should be vested with the Housing Board. The Bill provide for this object.

COAL MINES LABOUR WELFARE FUND ACT, 1947 (XXXII OF 1947)¹

[18th April, 1947]

An Act to make better provision for financing measures for promoting the welfare of labour employed in the coal-mining industry

Whereas it is expedient to make better provision for financing measures for promoting the welfare of labour employed in the coal-mining industry, including housing and the provision of dispensary services; and for such purposes to impose a cess and constitute a fund;

It is hereby enacted as follows:—

1. Short title, extent and commencement.—(1) This Act may be called the Coal Mines Labour Welfare Fund Act, 1947.

(2) It extends to the whole of India ²[except the State of Jammu and Kashmir.]

(3) It shall come into force on such date³ as the Central Government may, by notification in the official Gazette, appoint.

2. Interpretation.—In this Act, unless there is anything repugnant in the subject or context,—

(a) “Advisory Committee” means the Advisory Committee constituted under section 8;

(b) “Commissioner” means the Coal Mines Labour Welfare Commissioner appointed under section 9, and includes any officer authorised in writing by the Commissioner to exercise any of his functions under this Act;

(c) “Housing Board” means the Coal Mines Labour Housing Board constituted under section 6;

(d) “Fund” means the Coal Mines Labour Housing and General Welfare Fund constituted under section 4;

(e) “prescribed” means prescribed by rules made under this Act.

3. Imposition and collection of duty.—(1) There shall be levied and collected as a cess for the purposes of this Act a duty of excise on all coal and coke despatched from collieries in ⁴[the territory to which this Act extends], at such rate not less than four annas and not more than eight annas per ton, as may from time to time be fixed by the Central Government by notification in the official Gazette:

Provided that the Central Government may, by notification in the official Gazette, exempt from liability to the duty any specified class or classes of coal or coke.

¹ For Statement of Objects and Reasons, see the Gazette of India, 1947, Part V, 317-318. see also page 509 ante.

² These words were substituted for the words “except Part B States” by the Part B States (Laws) Act, 1951 (III of 1951).

³ The Act has come into force from 14th June, 1947.

⁴ These words were substituted for the words “Part A States and Part B States” by the Part B States (Laws) Act, 1951 (II of 1951).

(2) The duty levied under sub-section (1) shall, subject to and in accordance with rules made in this behalf, be collected by such agencies and in such manner as may be prescribed.

4. Coal Mines Labour Housing and General Welfare Fund.—(1) The proceeds of the duty levied under section 3 shall be paid by the collecting agencies into Reserve Bank of India at Calcutta in the prescribed manner, and shall be credited to a fund to be called the Coal Mines Labour Housing and General Welfare Fund, and apportioned under two separate accounts, to be called the housing account of the Fund and the general welfare account of the Fund, in such manner as the Central Government from time to time may, by notification in the official Gazette, determine:

Provided that there shall at all times be credited—

- (a) to the housing account of the Fund, not less than one anna and four pies, and
- (b) to the general welfare account of the Fund, not more than four annas and eight pies,—

out of the duty collected under this Act on every ton of coal or coke.

(2) There shall also be credited to the housing account of the Fund—

- (a) any grants made thereto by the Central Government;
- (b) rents, if any, realised from housing accommodation constructed out of such account;
- (c) any other moneys received by the Housing Board.

5. Expenditure from the Fund.—(1) The cost of administering the Fund and the salaries and allowances, if any, of the Commissioner, Inspectors, Welfare Officers and other staff appointed to supervise or carry out measures financed from the Fund shall be defrayed out of the Fund, and shall be apportioned between and debited to the housing account and the general welfare account in such manner as may be prescribed.

(2) The Central Government may out of the general welfare account of the Fund pay annually grants-in-aid to such of the colliery owners as maintain to the satisfaction of the Commissioner dispensary services of the prescribed standard for the benefit of labour employed in their collieries, so however that the amount payable as grant-in-aid to the owner of a colliery shall not exceed—

- (i) the amount of the duty at the rate of eight pies per ton recovered in respect of coal or coke despatched from the colliery less the proportionate cost of recovery, or
- (ii) the amount spent by the owner of the colliery in the maintenance of the dispensary service, as determined by the Commissioner,

whichever is less:

Provided that no grant-in-aid shall be payable in respect of any dispensary service maintained by the owner of the colliery if the amount expended thereon, as determined by the Commissioner, is less than eighty rupees per mensem.

(3) The balance of the moneys in the general welfare account of the Fund shall be applied by the Central Government to meet expenditure incurred in connection with measures which are in the opinion of the Central Government necessary or expedient to promote the welfare of labour employed in the coal-mining industry.

(4) Without prejudice to the generality of sub-section (3) the moneys in the general welfare account of the Fund may be utilised to defray—

- (a) the cost of measures for the benefit of labour employed in the coal-mining industry directed towards—

- (i) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities, including the provision and maintenance of dispensary services in collieries the owners of which do not receive grants-in-aid under sub-section (2),
- (ii) the provision of water-supplies, and facilities for washing and the improvement of existing supplies and facilities,
- (iii) the provision and improvement of educational facilities,
- (iv) the improvement of standards of living, including nutrition, amelioration of social conditions, and the provision of recreational facilities,
- (v) the provision of transport to and from work;
- (b) the grant to a Provincial Government, a local authority or the owner, agent or manager of a coal mine of money in aid of any scheme approved by the Central Government for any purpose for which moneys in the general welfare account of the Fund may be utilised;
- (c) the allowances, if any, of the members of the Advisory Committee and the amounts debitable to the account under sub-section (1);
- (d) any other expenditure which the Central Government directs to be defrayed out of the moneys in the general welfare account of the Fund.

(5) The Central Government shall publish annually in the official Gazette an estimate of receipts into and expenditure from the general welfare account of the Fund together with a statement of the accounts and a report of the activities financed during the previous year from the general welfare account of the Fund, and shall forward copies of such statement and report to members of the Advisory Committee.

(6) The moneys in the housing account of the Fund shall be applied by the Housing Board to defray—

- (a) the cost of erecting, maintaining and repairing housing accommodation for labour employed in the coal-mining industry and of providing services and facilities connected therewith;
- (b) the cost of preparing schemes, and of acquiring any land required, for the purposes referred to in clause (a);
- (c) the grant, subject to the previous approval of the Central Government, to a State Government, a local authority or the owner, agent or manager of a coal mine of money in aid of any scheme approved by the Housing Board for the purposes referred to in clauses (a) and (b);
- (d) the allowances, if any, of members of the Housing Board and the amounts debitable to the account under sub-section (1);
- (e) any other expenditure which the Central Government directs to be defrayed out of the moneys in the housing account of the Fund.

(7) In February of each year the Housing Board shall submit to the Central Government a statement in the prescribed form of the estimated receipts into and expenditure from the housing account of the Fund for the ensuing financial year together with a report of the activities financed during the previous year from the housing account of the Fund, and may at any time during the ensuing financial year submit to the Central Government a supplementary statement and shall forward copies of such statements and report to members of the Advisory Committee.

(8) The Housing Board shall comply with such directions as the Central Government may from time to time think fit to give in respect of expenditure from the housing account of the Fund.

(9) The Housing Board may invest moneys in the housing account of the Fund in securities of the Government of India or, with the previous approval of the Central Government, in other securities.

(10) The Housing Board shall cause to be maintained such books of account as may be prescribed and shall prepare in the prescribed manner an annual statement of the accounts.

(11) The Housing Board shall cause the housing account of the Fund to be audited annually by a person qualified under the provisions of section 144 of the Indian Companies Act, 1913 (VII of 1913), to act as an auditor of companies, and as soon as the said account has been audited the Housing Board shall forward copies thereof together with copies of the report of the auditor thereon to the Central Government and to members of the Advisory Committee.

(12) The Central Government shall have power to decide whether any particular expenditure is or is not debitable to the housing account, or the general welfare account, of the Fund, and its decision shall be final.

(13) Before incurring any expenditure from the Fund other than expenditure of a routine or urgent nature the Central Government or, as the case may be the Housing Board, shall consult the Advisory Committee.

6. Coal Mines Labour Housing Board.—⁴[(1) The Central Government shall, by notification in the official Gazette, constitute a Coal Mines Labour Housing Board for the following purposes, namely:—

(a) to prepare and carry out, subject to the previous approval of the Central Government, schemes financed from the housing account of the Fund for the provision of suitable housing accommodation for labour employed in the coal mining industry;

(b) to prepare plans and estimates for, and construct or carry out, such works of erection, maintenance and repair financed from the general welfare account of the Fund as the Central Government may, by general or special order, specify; and

(c) to carry out any other functions assigned to the Housing Board by or under this Act.]

(2) The Commissioner shall be the Chairman of the Housing Board, and the other members thereof shall be appointed by the Central Government and shall be of such number and chosen in such manner as may be prescribed.

(3) The Housing Board shall be a body corporate by the name of the Coal Mines Labour Housing Board, having perpetual succession and a common seal, with power to acquire property both movable and immovable, and shall by the said name sue and be sued.

(4) No act done by the Housing Board shall be called in question on the ground merely of the existence of any vacancy in, or defect on the constitution of, the Housing Board.

7. Provisions regarding housing accommodation.—(1) The occupation by any person of any housing accommodation provided out of the housing account of the Fund shall be subject to compliance by that person at all times with such conditions relating to his occupation of such accommodation as may be prescribed.

(2) Before any person occupies any such accommodation he shall be furnished with a copy of the conditions referred to in sub-section (1), and if he so

⁴ This sub-section was substituted by Section 2 of Coal Mines Labour Welfare Fund (Amendment) Act, 1949 (XXVIII of 1949).

desires the said conditions shall be read over to him in a language which he understands; and the Housing Board shall cause to be published in such manner as it thinks best adapted for informing the persons concerned any changes which may from time to time be made in the said conditions.

(3) If, in the opinion of the Housing Board, any person in occupation of any such accommodation fails or ceases to comply with any of the conditions referred to in sub-section (1) it may, by notice in writing, require him to vacate the accommodation on or before such date, not being less than thirty days after the service of the notice, as may be specified in the notice; and the occupation of such accommodation by such person or any dependent of his after the date so specified shall be unlawful, and such person or dependent may be evicted accordingly by due process of law from such accommodation.

(4) There shall be payable in respect of the occupation of any such accommodation as aforesaid rent at such rate as may be prescribed:

Provided that the Housing Board may remit, subject to compliance at all times with the conditions referred to in sub-section (1), either the whole or any part of the prescribed rent:

Provided further that where, in the case of any person who is by virtue of a remission under the first proviso paying either no rent or a reduced rent, the Housing Board has reason to believe that such person has contravened any of the said conditions, it may by notice in writing require such person to pay, with effect on and after the expiry of seven days from the service of the notice, rent for the accommodation occupied by him at the full prescribed rate.

(5) All rent payable in respect of the occupation of such accommodation as aforesaid, whether at the full prescribed rate or at a lesser rate, shall be recoverable as an arrear of land revenue.

8. Advisory Committee.—(1) The Central Government shall, by notification in the official Gazette, constitute an Advisory Committee, to advise on matters on which the Central Government or the Housing Board is required by this Act to consult the Committee and on any other matters arising out of the administration of this Act which the Central Government may refer to it for advice.

(2) The members of the Advisory Committee shall be appointed by the Central Government and shall be of such number and chosen in such manner as may be prescribed:

Provided that the Advisory Committee shall include an equal number of members representing Government, the owners of coal mines and workmen employed in the coal-mining industry, and that at least one member of the Advisory Committee shall be a woman.

(3) The Chairman of the Advisory Committee shall be an officer of the Central Government appointed by the Central Government.

9. Appointment and powers of officers.—(1) The Central Government may appoint a Coal Mines Labour Welfare Commissioner and such number of Inspectors, Welfare Officers and other staff as it thinks fit to supervise and carry out measures financed from the Fund.

(2) Any person so appointed shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code (XLV of 1860).

(3) The Commissioner or any Inspector or Welfare Officer may, with such assistance, if any, as he thinks fit, enter at all reasonable times any place which he considers it necessary to enter for the purpose of supervising or carrying out the measures financed from the Fund, and may do therein anything necessary for the proper discharge of his duties.

10. Powers to make rules.—(1) The Central Government may, by notification in the official Gazette, and subject to the condition of previous publication, make rules to carry into effect the purposes of this Act.

(2) Without prejudice to the generality of the foregoing power, rules made under this section may provide for—

- (i) the manner in which the duty levied under sub-section (1) of section 3 shall be collected, the persons who shall be liable to make the payments, the making of refunds, remissions and recoveries, the deduction by collecting agencies of a percentage of the realisations to cover the cost of collection, and the procedure to be followed in remitting the proceeds to the Reserve Bank of India;
- (ii) the composition of the Housing Board, the manner in which its members shall be chosen, the term of office of its members, the allowances if any payable to them and the manner in which the Housing Board shall conduct its business, including the number of members necessary to form a quorum at a meeting thereof;
- (iii) the books of account to be maintained by the Housing Board, and the form of its financial estimates and statements of account;
- (iv) the composition of the Advisory Committee, the manner in which its members shall be chosen, the term of office of its members, the allowances if any payable to them and the manner in which the Advisory Committee shall conduct its business;
- (v) the apportionment between the housing account and general welfare account of the Fund of the expenditure on the administration of the Fund and on the salaries and allowances of the Commissioner, Inspectors, Welfare Officers and other staff employed for the purposes of this Act;
- (vi) the standard of dispensary service to be provided by owners of collieries for the purposes of sub-section (2) of section 5, and the inspection and supervision of the dispensaries and other places at which such services are provided;
- (vii) the application by owners of collieries for grants-in-aid, the authority to whom and the manner in which such applications shall be made and the particulars to be specified in such applications;
- (viii) the manner in which dispensary services may be provided by the Central Government;
- (ix) the conditions governing the grant of money from the general welfare account of the Fund to a Provincial Government, a local authority or the owner, agent or manager of a coal mine;
- (x) the rate of rent for housing accommodation provided out of the housing account of the Fund;
- (xi) the conditions of service and the duties of Inspectors, Welfare Officers and other officers appointed to supervise or carry out measures financed from the Fund;
- (xii) the duties and functions of the Commissioner;
- (xiii) the furnishing by owners, agents or managers of coal mines of statistical or other information, and the punishment by fine not exceeding two hundred rupees for failure to comply with the requirements of any rules made under this clause;
- (xiv) any other matter which under this Act is to be or may be prescribed.

11. Repeal of Ordinance VII of 1944.—(1) The Coal Mines Labour Welfare Fund Ordinance, 1944, is hereby repealed.

(2) For the avoidance of doubts it is hereby declared that the provisions of section 6 of the General Clauses Act, 1897 (X of 1897), shall apply to the repeal effected by this section.

(3) Any balance remaining in the Fund constituted under the aforesaid Ordinance shall be credited to the Fund constituted under this Act, and shall be apportioned between the housing account and the general welfare account of such Fund in such manner as the Central Government may determine.

COAL MINES LABOUR WELFARE FUND RULES, 1949

COAL MINES LABOUR WELFARE FUND RULES, 1949¹

CHAPTER I—GENERAL

1. **Short title.**—(1) These rules may be called the Coal Mines Labour Welfare Fund Rules, 1949.

(2) They extend to the whole of India except the State of Jammu and Kashmir.

2. **Definitions.**—In these rules unless the context otherwise requires—

- (a) 'the Act' means the Coal Mines Labour Welfare Fund Act, 1947 (XXXII of 1947);
- (b) 'Chairman' means the Chairman of the Advisory Committee constituted under section 8 of the Act;
- (c) 'Commissioner' means the Coal Mines Labour Welfare Commissioner appointed under section 9 of the Act;
- (d) 'form' means a form appended to these Rules;
- (e) 'member' means a member of the Advisory Committee or the Housing Board, as the case may be;
- (f) 'owner' in relation to a colliery includes a lessee, or mortgagee in possession of such colliery and any partner, managing director, agent, manager or any other person authorised to represent the colliery in its transactions;
- (g) 'month' means a complete month reckoned according to the English Calendar;
- (h) 'treasury' means any Government treasury or sub-treasury

CHAPTER II—ADVISORY COMMITTEE, SUB-COMMITTEES AND HOUSING BOARD

3. **Advisory Committee.**—(1) (a) The Advisory Committee shall consist of the following members, namely:—

- (i) the Secretary to the Government of India in the Ministry of Labour, who shall be the Chairman;
- (ii) the Coal Mines Labour Welfare Commissioner, who shall be the Vice-Chairman;
- (iii) the Chief Inspector of Mines;
- (iv) one official nominated by the Government of West Bengal;
- (v) one official nominated by the Government of Bihar;
- (vi) one official nominated by the Government of the Central Provinces and Berar;
- (vii) two persons nominated by the Indian Mining Association;
- (viii) one official nominated by the Central Government to represent the State Railway Collieries;
- (ix) one person nominated by the Indian Mining Federation;
- (x) one person nominated by the Indian Colliery Owners Association;
- (xi) one person nominated by the Central Provinces and Berar Mining Association;
- (xii) six persons nominated by the Central Government to represent the interests of the workmen employed in coal mines;
- (xiii) a woman nominated by the Central Government if no women has been nominated under clause (xii) above;
- (xiv) two mining engineers to be nominated by the Central Government, one on the recommendation of the Indian Mine Managers' Association and the other on that of the National Association of Colliery Managers.

¹ These Rules were published under the Ministry of Labour Notification No. LWI(1)/48 dated the 7th February, 1949.

(b) The Hon'ble Minister for Labour in the Central Government may attend any meeting of the Advisory Committee and when he does, he shall, notwithstanding anything contained in sub-rule (1) (a) (i), preside at the meeting.

(2) If the seat of a member nominated by a body other than the Central Government falls vacant, the Central Government shall within two months of the falling vacant of such seat, by notice in writing, call upon the body concerned to nominate a person to fill the vacancy, and the nomination shall be made within thirty days of the date of issue of such notice:

Provided that if the body fails to make the nomination within the period specified, the Central Government may nominate a person to fill the vacancy.

(3) If a nominated member is unable to attend a meeting of the Advisory Committee, the Central Government or the body which nominated him may, by notice in writing signed on its behalf and by the said member and addressed to the Chairman of the Committee, nominate a substitute in his place to attend that meeting. Such a substitute shall have all the rights of a member in respect of that meeting.

4. Executive Committee of the Advisory Committee.—(a) The Executive Committee of the Advisory Committee shall consist of the Chairman, the Vice-Chairman, and Secretary to be nominated by the Chairman.

(b) The office of the Committee shall be situated in or adjacent to the West Bengal or Bihar coalfields.

(c) The Secretary shall carry out routine duties and the Vice-Chairman shall exercise such other powers and discharge such other duties of the Chairman as may be delegated by him.

5. Sub-Committees.—(1) The Advisory Committee shall constitute the following Sub-Committees to carry out the functions assigned to each, namely:—

(a) Finance Sub-Committee consisting of five members to frame schemes involving expenditure and to advise generally regarding the budget, maintenance of accounts and all expenditure debitable to the Fund; and

(b) Coalfield Sub-Committees, each consisting of the members, one for each of the main coalfields in West Bengal, Bihar, Madhya Pradesh, Assam, Orissa and for any other coalfield for which the Advisory Committee considers such a Committee to be necessary, to consider and advise on all matters relating to expenditure from the Fund in their respective coalfields.

(2) Subject to sub-rule (4) of this rule, the Vice-Chairman of the Advisory Committee shall be the Chairman of the Finance Sub-Committee and a member of the Advisory Committee concerned with the particular coalfield shall be the Chairman of the particular Coalfield Sub-Committee. The Vice-Chairman of the Advisory Committee shall be entitled to attend meetings of the Coalfield Sub-Committees.

(3) All members of the Coalfield Sub-Committees, except one, and all members of the Finance Sub-Committee except the Coal Mines Welfare Commissioner, shall be non-officials and in each Sub-Committee there shall be equal representation of the colliery-owners and workmen employed in the coal mining industry:

Provided that nothing in this sub-rule shall apply to any Coalfield Sub-Committee formed in respect of a coalfield, owned or managed partly or wholly by Government.

(4) Notice of every meeting of a Sub-Committee shall be sent also to the Chairman of the Advisory Committee who may attend the meeting and, notwithstanding anything in sub-rules (2) and (3), preside at any meeting if he so desires, and when he does, he shall be entitled to vote.

(5) The members of the Finance Sub-Committee shall be chosen by the Advisory Committee from amongst members of the Committee.

(6) The members of each Coalfield Sub-Committee shall be nominated by the Advisory Committee as far as possible from amongst persons other than the members of the Advisory Committee.

(7) The meetings and proceedings of every Sub-Committee shall be governed by the provisions herein contained for regulating the meetings and proceedings of the Advisory Committee and the Housing Board in so far as the same are applicable thereto. The quorum for a meeting of a Sub-Committee shall be three members empowered to vote. Rules 8 to 12 shall apply in relation to Sub-Committee as they apply in relation to the Advisory Committee or the Housing Board and, in their application to a Sub-Committee, references in the said rules to the 'Advisory Committee' or the 'Housing Board' shall be construed as references to the Sub-Committee.

6. Housing Board.—(1) The Housing Board shall consist of:—

- (i) The Coal Mines Welfare Commissioner who shall be the Chairman of the Board;
- (ii) The Chief Inspector of Mines;
- (iii) The Superintending Engineer, Coal Mines Labour Welfare Fund; and
- (iv) Six persons nominated by the Central Government in consultation with the Advisory Committee.

(2) If a nominated member is unable to attend a meeting of the Housing Board, the Central Government may by notice in writing signed by an officer authorized in this behalf and by the said member and addressed to the Chairman of the Board, nominate a substitute in his place to attend that meeting. Such a substitute shall have all the rights of a member in respect of that meeting.

7. Power to co-opt members.—(1) The Advisory Committee may at any time and for such period as it thinks fit, co-opt any person or persons as members of the Advisory Committee or any Sub-Committee. The Housing Board may likewise at any time and for such period as it thinks fit co-opt any person or persons as members of the Housing Board.

(2) A member co-opted under sub-rule (1) shall exercise all the powers and functions of a member under these rules, except that he shall not be entitled to vote on any question coming before the Advisory Committee or the Housing Board.

8. Term of office of members.—(1) A nominated member shall, unless he resigns his office or dies, hold office for a period of three years from the date of the notification appointing him a member of the Advisory Committee or the Housing Board and shall be eligible for renomination:

Provided that an outgoing member shall continue in office until the appointment of his successor is notified.

(2) A member nominated to fill a casual vacancy or, in the case of the Advisory Committee, a member appointed by the Central Government under the proviso to rule 3(2) shall hold office for as long as the member whose place he fills would have been entitled to hold office if the vacancy had not occurred, or if the nomination, as required by the rule aforesaid, had been made.

9. Remuneration to members.—Every non-official member, including a non-official member co-opted under rule 7 shall be entitled to the following allowances for attending each meeting of the Coal Mines Labour Welfare Fund Advisory Committee or any of its Sub-Committees or the Housing Board or any of its Sub-Committees provided that the non-official member is not resident at the place where the meeting is held:—

Travelling Allowance

(a) In respect of journey by air ... Actual fares paid.

²[(b) In respect of journey by rail ... Single first class fare plus an allowance for incidental expenses at a flat rate of 12 pies per mile, where first class accommodation is available. Where first class accommodation is not available on the particular train or railway line by which he travels, the member will have the option to travel in air-conditioned accommodation, by paying from his own pocket, the difference between the fares for the air-conditioned and first class accommodation and where he does not exercise this option, he will be entitled to single fare for the highest class of accommodation, excluding air-conditioned accommodation, actually provided on the particular train or railway line plus an allowance for incidental expenses at such rate as may be fixed by the Central Government for their class I officers from time to time.]

² Substituted by the Ministry of Labour Notification No. S.R.O. 1252 dated the 7th June, 1955.

- (c) In respect of journey by road ... Where the journey is performed entirely by road, mileage at the rates admissible to Central Government servants of the first grade, subject to the condition that the member concerned furnishes a certificate to the effect that the journey was undertaken by road to avoid loss of time which journey by rail would have entailed, provided further that if the distance travelled by road exceeds 75 miles in a single journey, mileage allowance will be payable only for the first 75 miles for each journey.

Daily Allowance

Rs. 10-0-0 (ten) for each day of any meeting or meetings subject to a maximum of Rs. 30-0-0 (thirty) for any one calendar month.

Non-official members, who are resident at the places where the meetings are held, shall be entitled only to the actual cost of conveyance hire subject to a maximum of Rs. 10 (ten) per day.

The allowances referred to above shall be admissible on production of a certificate by the non-official members to the effect that they have not claimed or drawn travelling or daily allowance in respect of the journeys and halts from any other source.

NOTE 1.—For the purpose of this Rule the term “member” includes a member of the Sub-Committee who is not a member of the Advisory Committee or of the Housing Board.

³[NOTE 2—Members may in their discretion travel by air.]

10. **Resignation.**—A non-official nominated member may resign his office by letter addressed to the Chairman of the Advisory Committee or the Housing Board, as the case may be.

11. **Absence from India.**—(1) Before a non-official nominated member leaves India, he shall intimate to the Chairman of the Advisory Committee or the Housing Board, as the case may be, the date of his departure from, and the date of his expected return to, India and if he intends to be absent from India for a period longer than six months, he shall tender his resignation.

(2) If any such member leaves India without complying with sub-rule (1), he shall be deemed to have resigned with effect from the date of his departure from India.

12. **Vacation of office.**—A nominated member shall be declared by the Chairman of the Advisory Committee or the Housing Board to have vacated his office—

- (a) if he becomes insolvent; or
- (b) if he is convicted of any offence which, in the opinion of the Central Government, involves moral turpitude; or
- (c) if he is absent from three consecutive meetings of the Advisory Committee or the Housing Board without leave of absence from the Chairman; or
- (d) if, in the opinion of the Central Government it is undesirable that he should continue to be a member of the Advisory Committee or the Housing Board.

Procedure relating to Meetings

13. **Disposal of business.**—(1) Every question which the Advisory Committee or the Housing Board is required to take into consideration shall be considered either at its meetings or, if its Chairman so directs, by sending the necessary papers to all members for their opinion:

Provided that the papers need not be sent to a member who is absent from India.

(2) Where a question is referred for opinion under sub-rule (1) any member may request that the question be considered at a meeting of the Advisory Committee or the Housing Board and thereupon the Chairman may and, if the request is made by five or more members in the case of the Advisory Committee and three or more members in the case of the Housing Board, shall direct that it be so considered.

14. **Time and place of meetings.**—The Advisory Committee, or the Housing Board shall meet at such place and time as may be appointed by its Chairman.

³ Added by Ministry of Labour Notification No. S.R.O. 1252 dated the 7th June, 1955.

15. Notice of meetings.—(1) Notice shall be given to every member present in India of the time and place fixed for each ordinary meeting at least fifteen days before such meeting in the case of the Advisory Committee and at least seven days before such meeting in the case of the Housing Board, and each member shall be furnished with a list of business to be disposed of at that meeting:

Provided that when an emergent meeting is called by the Chairman of the Advisory Committee or the Housing Board, such notice shall not be necessary.

(2) No business which is not on the list shall be considered at a meeting without the permission of the Chairman of the Advisory Committee or the Housing Board as the case may be.

16. Presiding at meetings.—The Chairman of the Advisory Committee shall, save as provided in clause (b) of sub-rule (1) of Rule 3, preside at every meeting of the Committee at which he is present. If the Chairman is absent from any meeting, the Vice-Chairman shall preside at that meeting and if both the Chairman and the Vice-Chairman are absent, the members present shall elect one of their member to preside over the meeting and the member so elected shall at that meeting exercise all the powers of the Chairman of the Committee. In the case of the Housing Board, the Chairman of the Housing Board shall preside at every meeting of the Board at which he is present. If the Chairman is absent from any meeting, the members present shall elect one of their member to preside over the meeting and the member so elected shall at that meeting exercise all the powers of the Chairman of the Board.

17. Quorum.—No business shall be transacted at a meeting of the Advisory Committee or the Housing Board, whether ordinary or emergent, unless at least five members empowered to vote in the case of the Advisory Committee and three members empowered to vote in the case of the Housing Board are present:

Provided that if at any meeting less than this number of members attend, the Chairman of the Advisory Committee or the Housing Board as the case may be, may adjourn the meeting to a date not less than seven days later, informing the members present and sending notice to other members that he proposes to dispose of the business at the adjourned meeting, whether there is a quorum or not, and he may thereupon dispose of the business at such adjourned meeting.

18. Decision by majority.—(1) Every question at a meeting of the Advisory Committee or the Housing Board shall be decided by a majority of votes of the members present and voting on that question but the minority shall have the right of requiring their dissent to be noted.

(2) Every question referred to the members for opinion shall, unless the Chairman of the Advisory Committee or the Housing Board in pursuance of sub-rule (2) of Rule 13 reserves it for consideration at a meeting, be decided in accordance with the opinion of the majority of members who have submitted their opinions within the time allowed.

(3) In the case of an equal division of votes or opinions, the Chairman of the Advisory Committee or the Housing Board as the case may be, shall give an additional vote or opinion.

19. Minutes of meetings.—(1) The proceedings of each meeting of the Advisory Committee or the Housing Board shall be circulated to all members of the Advisory Committee or the Housing Board, as the case may be, present in India and thereafter recorded in a minute book which shall be kept for permanent record. In the case of the Housing Board, the proceedings shall also be circulated to all members of the Advisory Committee present in India.

(2) The record of the proceedings of each meeting shall be signed by the Chairman of the Advisory Committee or the Housing Board as the case may be.

POWERS OF THE CHAIRMAN OF THE ADVISORY COMMITTEE

20. Staff.—(1) Subject to financial provision in the sanctioned budget and to the provisions of rule 21, the Chairman of the Advisory Committee may create technical and other posts for carrying out the purposes of the Act, may fix the scale of establishment and the salaries and allowances of staff employed by him and may require security to be taken in such cases and for such amount as he thinks fit:

Provided that the creation of a post with a maximum salary exceeding Rs. 500 per month shall require the previous sanction of the Central Government.

(2) The Chairman of the Advisory Committee may authorise the staff to give assistance to any Sub-Committee of the Advisory Committee, to the Housing Board or to any other

authority exercising executive or advisory functions in connection with the Act or to any person getting a grant from the fund.

21. Schemes of expenditure.—(1) The Chairman of the Advisory Committee shall have power to incur expenditure on administrative staff and sanctioned welfare and housing schemes to the extent of the financial provision in the sanctioned budget:

Provided that—

(i) he shall have no power to sanction the creation of a post on a salary of more than Rs. 500 per month and shall have only such powers of reappropriation as may be approved by the Central Government after considering the advice of the Advisory Committee.

(ii) he shall have no power to incur expenditure on a scheme that has not been sanctioned by the Central Government if the cost of such a scheme exceeds Rs. 20,000 non-recurring and Rs. 2,500 per annum recurring.

(2) The Chairman of the Advisory Committee may, with the concurrence of the appropriate Sub-Committee approve any new scheme costing not more than Rs. 20,000 non-recurring and Rs. 2,500 per annum recurring. All other schemes shall require the sanction of the Central Government which shall be applied for by the Chairman of the Advisory Committee after consulting it.

Where the Central Government does not approve a new scheme forwarded by the Chairman of the Advisory Committee, he shall be so informed within three months, and the Chairman shall inform the Advisory Committee or if the matter concerns only a particular coalfield, the appropriate Sub-Committee.

(3) Subject to financial provision in the sanctioned budget, the Vice-Chairman of the Advisory Committee shall have power to incur any sanctioned expenditure and shall, with the concurrence of the appropriate Sub-Committee or Housing Board, also have power to sanction any new welfare and housing scheme, if the cost of such a scheme does not exceed Rs. 10,000 non-recurring and Rs. 1,000 per annum recurring.

22. Contingent expenditure.—The Chairman of the Advisory Committee may sanction, without reference to it, expenditure on contingencies, supplies and services and purchase of articles subject to financial provision in the sanctioned budget and to the condition that the expenditure on any single object shall not exceed Rs. 2,000 non-recurring and Rs. 400 per annum recurring.

POWERS OF ADVISORY COMMITTEE

23. (1) Budget.—The annual budget of the Fund prepared by the Executive Committee in consultation with the Finance Sub-Committee shall be considered by the Advisory Committee each year. Thereafter, the budget as finally approved by the Advisory Committee shall be forwarded not later than the 1st day of October each year for sanction to the Central Government which may make such alterations therein as it considers necessary before according its sanction.

(2) Other matters to be considered by Committee.—Besides its statutory duties, the Advisory Committee shall consider and report on the budget and on any matter referred to it by the Central Government or by the Chairman of the Advisory Committee for advice.

If not less than five members request the Chairman of the Advisory Committee to refer any matter to the Advisory Committee, he shall refer to it accordingly.

(3) Committee to be informed of expenditure.—A memorandum setting forth any grant made or expenditure incurred from the Fund since the last meeting shall be laid at each meeting of the Advisory Committee.

24. Powers of the Housing Board.—(1) The Housing Board shall, subject to the previous approval of the Central Government, frame bye-laws—

(i) specifying the conditions relating to occupation to be observed by the allottees;

(ii) providing for the manner in which allotment of housing accommodation shall be made;

(iii) fixing the rates at which rent is to be recovered and the manner of recovery; and

(iv) generally for carrying out the functions of the Board under the Act.

(2) The Housing Board shall submit to the Central Government a statement in Form A as required by sub-section (7) of section 5 of the Act.

(3) (a) The Housing Board shall prepare and submit in January each year to the Advisory Committee and the Central Government an annual statement of the accounts in Form B.

(b) The annual account shall be accompanied by a statement of investments in Form C made under sub-section (9) of section 5 of the Act.

(4) The Housing Board shall also maintain separate accounts for the following:—

- (a) progressive expenditure on every approved scheme;
- (b) loan repayment account;
- (c) cost of acquisition of land for buildings; and
- (d) depreciated value at the end of each financial year of buildings whose cost has been debited to the Housing Account.

(5) All agreements and instruments entered into by the Housing Board shall be signed by the Chairman on behalf of the Housing Board.

CHAPTER III—FINANCIAL PROVISIONS

25. Allocation of Expenditure from the Fund between the General Welfare Account and the Housing Account.—The cost of administering the Fund shall be apportioned between the housing account and the general welfare account in the proportion of two to seven.

26. Grants.—(1) In each case in which a grant is made by, or with the approval of the Central Government, from the general welfare account or the housing account of the Fund to a provincial government, a local authority, or the owner of a coal mine, in aid of any scheme approved by the Central Government for any purpose for which the monies in the general welfare account or the housing account may be utilised, the Central Government may impose conditions necessary for ensuring—

- (a) that the work for which the grant is made is duly and promptly executed and the money is actually utilized for the purpose for which it is granted;
- (b) that the data on which the grant is calculated are in accordance with facts;
- (c) that any particulars which the Central Government may from time to time require for the proper discharge of its responsibilities are promptly supplied;
- (d) that all necessary facilities for inspection are accorded to persons duly authorised by the Central Government for the purpose of clause (a) or for checking the correctness of any particulars supplied under clause (c) or for the collection of any such particulars; and
- (e) that proper accounts of the money granted are kept and are submitted for audit by such persons as the Central Government may authorise in this behalf.

(2) Before making a grant from the general welfare account or the housing account of the Fund to a local authority or to the owner of a coal mine, the Central Government shall require such local authority or owner to execute a bond for the fulfilment of conditions imposed by the Central Government under sub-rule (1).

(3) It shall be a condition of every bond executed under sub-rule (2) that in the event of the local authority or owner of the mine violating any condition imposed under sub-rule (1), such local authority or owner shall be liable to pay to the Central Government such sum by way of penalty as may be specified in the bond.

27. Recovery of Excise Duty.—(1) The duty of excise imposed under section 3 of the Act on coal and coke shall—

- (i) when such coal and coke is despatched by rail from any colliery in a state to any station in India be collected by the Railway Administration concerned by means of a surcharge on freight and such duty of excise shall be recovered—
 - (a) from the consignee, if the freight charges are collected at the destination of the consignment; or
 - (b) from the consignor, if the freight charges are prepaid at the forwarding station; or
 - (c) from the party paying the freight if the consignment is booked on the weight system;
- (ii) when such coal or coke is despatched from any colliery in a state otherwise than by rail, be recovered from the owner of the colliery concerned and collected in the manner provided in Chapter IV of these Rules.

(2) Where coal or coke is despatched by rail from collieries to any station outside India, the duty of excise shall be recovered from the consignor at the forwarding station.

(3) In calculating the amount of duty of excise payable on any one consignment a fraction of an anna shall be rounded off to the nearest anna.

28. Weight for charge.—For the purpose of the levy of the excise duty, the actual weight of a consignment rounded off to the nearest ton, shall be taken into account.

29. Remittance of Excise Duty.—(1) The total amount of excise duty collected by each Railway Administration less—

(a) refunds and write-offs authorised by the Railway Administration under Rule 30; and

(b) deduction of such percentage as the Central Government may, by notification in the Official Gazette, fix towards the cost of collection; shall, under advice to the Accountant General, Bihar, be remitted quarterly to the Reserve Bank of India at Calcutta to the credit of the Central Government.

(2) An amount equivalent to the amount of excise duty credited to the Central Revenue under sub-rule (1) shall be transferred to the Coal Mines Labour Housing and General Welfare Fund.

(3) The amount of the excise duty remitted during a financial year by a Railway Administration under sub-rule (1) shall be certified as soon as possible after the close of the financial year by such officer or officers as the Central Government may appoint in this behalf.

(4) The certificates under sub-rule (3) shall be sent to the Central Government and copies thereof to the Accountant General, Bihar, and to the Coal Mines Welfare Commissioner by the officers concerned.

30. Refunds and Recoveries.—(1) When the amount of the duty of excise due under these rules has not been collected either wholly or in part or where the amount collected is in excess of the amount due, the Railway Administration shall have the right to recover the under-charge and the liability to refund the over-charge on the same principles as apply to under-charge and over-charge in respect to railway freight charges.

(2) When it is proved to the satisfaction of the Central Government or of any person authorised in this behalf by the Central Government, that any coal on which the duty of excise under section 3 of the Act had been collected has been used in the manufacture of any coke on which the duty has also been collected, the Central Government or the person authorised in this behalf by the Central Government may order refund to the person from whom such duty was collected of an amount equal to the duty of excise on such coal less deduction of such percentage as the Central Government may, by general or special order, fix as the cost of collection of such duty:

Provided that no claim for any such refund shall be entertained unless it is preferred within one year from the end of the quarter to which the claim relates.

Provided further that no claim for any such refund relating to a period prior to the 15th May 1951 shall be entertained unless it is preferred by the 31st December, 1952.

(3) A refund of duty of excise of the nature specified in sub-rule (2) may, subject to the like conditions, be also allowed in respect of the duty of excise collected on raw coal during the course of its transport to the washery where the duty of excise is again collected on the washed coal sent from the washery to the consuming centres.

4[(4) A refund of duty of excise of the nature specified in sub-rule (2) may, subject to the like conditions, be also allowed in respect of the duty of excise collected on coal or coke during the course of its transport from colliery pitheads to railway heads where the duty of excise is again collected on the coal or coke sent from the rail heads to the consuming centres.]

31. Audit of Accounts.—The accounts of the General Welfare Account Fund shall be maintained and audited in the same manner as of any other Fund administered by the Central Government. The housing account of the Fund which shall be maintained by the Board shall be audited by a certified Auditor as soon after the close of the financial year as possible. The appointment of the Auditor shall be sanctioned and his remuneration fixed by the Central Government on the recommendation of the Advisory Committee.

CHAPTER IIIA—DISPENSARY SERVICES

31A. Standard of Dispensary Services.—(1) The standard of dispensary services to be provided by owners of collieries for the purposes of sub-section (2) of section 5 of the Act shall be as specified in the Schedule hereto annexed, hereinafter called the 'prescribed standard':

Provided that in the case of any dispensary which is in existence on.....November, 1950, the Coal Mines Welfare Commissioner may if he is satisfied that the dispensary is

⁴Inserted by the Ministry of Labour Notification No. S.R.O. 224 dated the 13th January, 1955.

being efficiently run and serves the purpose for which it is established, waive any of the requirements specified in the prescribed standard.

⁵[Provided further that in the case of any dispensary in respect of which the Commissioner is satisfied that it has been brought up to the prescribed standard in all respects except buildings and equipments, the grant-in-aid may be paid, if the owner or agent of the colliery undertakes to bring the buildings and equipments also to the prescribed standard within such period not exceeding five years as may be specified by the Commissioner in this behalf.

If after payment of the first year's grant-in-aid, it is found at the time of any subsequent inspection that the owner or agent has not in the opinion of the Commissioner made sufficient progress towards improvement in regard to the equipments and buildings, the payment of grant-in-aid for the subsequent years shall be withheld.]

⁶[(2) ⁷[There shall be maintained] an independent dispensary at each colliery according to the standard specified in the Schedule referred to in sub-rule (1):

Provided that ⁸[a common main dispensary may be maintained for several collieries] with branch dispensaries attached to each colliery subject to the following conditions, namely

- (i) the common main dispensary shall maintain the standards prescribed for the aggregate number of workers of all the collieries served by it or the standard maintained by it during the year 1951, whichever is higher,
- (ii) every branch dispensary shall have a qualified doctor and a qualified compounder,
- (iii) the common main dispensary shall be so situated that none of the collieries served by it is more than ten miles distant from it, and
- (iv) the common main dispensary shall maintain an ambulance van for taking serious cases of injury and sickness from the branch dispensaries to the common dispensary.]

31B. Inspection.—The dispensary services maintained by owners of collieries shall be inspected at intervals not exceeding one year by such medical officer as may be appointed by the Chairman for the purpose. The medical officer, shall if the dispensary conforms to the prescribed standard issue a certificate in Form CI which shall be valid for a period of one year from the date of issue.

31C. Submission of Periodic Returns.—Each colliery owner who maintains a dispensary service shall submit to the Coal Mines Welfare Commissioner—

- (i) in January and July of each year a statement showing the total amount of coal and coke despatched during the preceding six months from his colliery, and
- (ii) in January of each year a certified statement of the expenditure incurred on the dispensary during the preceding 12 months.

CHAPTER IV—PROCEDURE FOR RECOVERY OF EXCISE DUTY ON COAL AND COKE DESPATCHED OTHERWISE THAN BY RAIL

32. Maintenance of Register of Despatches and Submission of Returns.—(1) Every owner of a colliery shall maintain in Form D a Register of Despatches of all coal and coke despatched otherwise than by rail and shall record therein each despatch made during a month, separately and consecutively. At the close of each month, the entries made against each permit and date in the Register shall be totalled and the total tonnage despatched during the month shall be entered in the register. The amount of duty of excise payable on the total tonnage despatched at the prescribed rate shall be worked out and recorded in the register itself.

Explanation.—In calculating the total tonnage, a fraction of less than half shall be ignored; and a fraction of more than half shall be reckoned as one ton.

(2) Every owner of a colliery shall submit to the Commissioner in duplicate a Return in Form 'D' for each month in accordance with the entries made in the register maintained

⁵ This further proviso was inserted by the Ministry of Labour Notification No. S.R.O. 1475 dated the 2nd July, 1955 and the existing second proviso was omitted.

⁶ The sub-rule was inserted by the Ministry of Labour Notification No. S.R.O. 1277 dated the 20th June 1953.

⁷ These words were substituted for the words "the owner of each colliery shall maintain" by the Ministry of Labour Notification No. S.R.O. 2803 dated the 24th August, 1954.

⁸ These words were substituted for the words "where several collieries are owned by one owner, the owner may maintain a common main dispensary for all such collieries," *ibid.*

under sub-rule (1) duly signed by such owner or any person authorised by him in this behalf.

(3) A return so submitted shall reach the Commissioner not later than the last day of the following month.

(4) Where no coal or coke is despatched in any month, the owner of the colliery shall submit to the Commissioner within the time specified in sub-rule (3) a blank return in duplicate, for that month, accompanied by a certificate duly signed by such owner to the effect that no coal or coke was despatched during that month.

(5) Notwithstanding anything contained in this rule, if the Commissioner is satisfied with respect to the owner of any colliery that no coal or coke was despatched by him otherwise than by rail during the preceding twelve months he may by a permit in writing allow him to submit, in place of a monthly Return, a consolidated Return in Form D for such period not exceeding one year as may be specified in the permit. A consolidated Return so submitted shall reach the Commissioner not later than the last day of the month immediately following the period specified in the permit.

33. Provisional Assessment and Payment of Excise Duty.—The amount of duty of excise payable for any month and recorded in the register maintained under rule 32 shall be deemed to be provisional assessment of the duty and shall be subject to a final assessment under rule 37.

34. Manner of Payment of Duty.—(1) The owner of a colliery shall pay the duty of excise assessed under rule 32 into the nearest treasury, not later than the last day of the following month.

(2) The payment into the treasury shall be made by means of a challan, the remittance being shown as creditable to the Central Government.

(3) The challan shall be filled in triplicate, a copy of which shall be retained by the Treasury and the remaining two copies shall be returned to the depositor who will keep one for himself and transmit the other copy to the Commissioner as proof of payment along with the monthly return prescribed in sub-rule (2) of rule 32 after entering the number, date and amount shown in the treasury receipt in both the copies of the return.

(4) An amount equivalent to the amount of excise duty credited to the Central Revenues under sub-rule (2) shall be transferred to the Coal Mines Labour Housing and General Welfare Fund.

35. Delay in Submission of Returns.—If the return for any month does not reach the Commissioner within the time prescribed by rule 32, the owner of the colliery shall be punishable with fine which may extend to two hundred rupees.

36. Late Returns and Revision of Returns.—If the owner of any colliery has not furnished the return within the prescribed date or having furnished it, discovers any omission or wrong statement therein, he may furnish a return or a revised return, as the case may be, at any time before the order of final assessment is passed.

37. Final Assessment of Excise Duty.—(1) If the Commissioner is satisfied that the return submitted by any owner is correct and complete, he shall confirm the provisional assessment referred to in Rule 33 as final and send an intimation to that effect to the owner of the colliery concerned in Form E within three months from the date of receipt of the return.

(2) (a) If the Commissioner is not so satisfied, he may either depute an officer for the purpose of verification of the correctness and completeness of the return with reference to the books and accounts and other relevant records of the colliery at its premises, or issue a notice in Form F-1 on the owner of the colliery concerned requiring him to attend either personally or through a duly authorised representative on the date and at the time and place to be specified in the notice. The officer deputed by the Commissioner shall be afforded all necessary facilities at the premises of the colliery for the purpose of verification as aforesaid.

(b) After verification of the return or after hearing such evidence as the owner may produce in compliance with the notice issued under clause (a) and such evidence as the Commissioner may require on specified points, the Commissioner shall as soon as possible assess the amount of duty due from the owner and such assessment shall be final.

(c) If the Commissioner is satisfied that the return submitted by the owner is correct and complete he shall confirm the provisional assessment as final. If, on the other hand,

under the final assessment a further sum is due from the owner, the Commissioner shall issue on the owner a Demand Notice in Form H-1 requiring the payment of the balance due within the time specified therein.

(d) If any owner having furnished a return for a month, fails to comply with any of the terms of the notice that may be issued on him under clause (a) the Commissioner shall assess the amount of the duty due from him which in his judgment, is just and proper and such assessment shall be final.

(3) If any owner does not furnish a return in Form D for any month by the prescribed date in the manner laid down in rules 32 and 34, the Commissioner shall, after giving the owner a reasonable opportunity of being heard by the issue of a notice in Form F-2 assess the amount of duty due from him which in his opinion is just and proper. The owner shall further be punishable with fine which may extend to two hundred rupees as provided in rule 35.

(4) If upon information which has come into his possession the Commissioner is satisfied that an owner has actually despatched during a month coal or coke otherwise than by rail and has thereby become liable to pay duty under section 3 of the Act but has failed to furnish a return in respect of that month and to pay the amount of provisional assessment on that basis by the last day of the following month, the Commissioner shall after giving the owner a reasonable opportunity of explaining the reasons for the failure by the issue of a notice in Form F-3, assess the amount of duty due from him which in his opinion, is just and proper in respect of that month.

(5) The Commissioner shall fix a date ordinarily not earlier than 30 days from the date of issue of a notice in Form F-1, or F-3 for producing such accounts and documents as he may require and for considering any objection which the owner may wish to offer.

(6) After considering any objection made by the owner and any evidence produced in support thereof, the Commissioner shall assess the amount of the duty to be paid by the owner and shall briefly record his findings and pass his final assessment order in Form G.

(7) The amount of duty thus assessed, the date by which the amount so assessed is to be deposited (which shall not ordinarily be earlier than 30 days from the date of issue of Demand Notice) and any other particulars connected therewith shall be specified in the Demand Notice in Form H-1.

(8) The mode of payment into the Treasury of the amount specified in Demand Notice in Form H-1 shall be the same as laid down in rule 34 provided that the copy of the Treasury Challan intended for transmission to the Commissioner shall be forwarded to him with a covering letter quoting reference to the Demand Notice.

37A. Despatches of coal or coke which have escaped assessment.—If

- (a) the Commissioner has reason to believe that by reason of the concealment by the owner of the particulars of despatches of coal or coke from any colliery, such despatches have escaped excise duty; or
- (b) notwithstanding there has been no such concealment of particulars as is mentioned in clause (a) on the part of the owner, the Commissioner has, in consequence of information in his possession, reason to believe that any despatches of coal or coke from a colliery have escaped excise duty;

the Commissioner may, in cases falling under clause (a) at any time within four years, and in cases falling under clause (b) at any time within two years of the end of the month the return in respect of which should have included such despatches of coal or coke which have escaped assessment, assess the excise duty payable thereon and all the provisions of these rules shall apply to the excise duty so assessed as if assessment were included in the final assessment of excise duty under rule 37.

Provided that the Commissioner before exercising the powers conferred upon him under this rule shall give the owner a reasonable opportunity of being heard.

38. Recovery of Unpaid Excise Duty and Penalty.—(1) Any amount of duty, which remains unpaid after the date specified in the Demand Notice shall be recovered as an arrear of land revenues, and shall be credited to the Central Government and subsequently transferred to the Coal Mines Labour Housing and General Welfare Fund in the manner specified in sub-rules (2), (3) and (4) of rule 34.

(2) The Commissioner shall (in order to recover the unpaid amount of cess) apply to the Collector of the district in which the colliery is situated for the recovery of the amount remaining unpaid.

(3) The Collector shall send a report to the Commissioner by the 10th of each month showing the amount recovered by him during the preceding month.

39. Review.—(1) Within 30 days from the date of issue of a Demand Notice in Form H-1, any owner may submit a petition to the Commissioner asking for a review of such assessment, provided that no such petition shall be entertained unless the Commissioner is satisfied that the amount assessed has been paid by the owner into a treasury as required under rule 37.

(2) Every petition for review shall be accompanied by a memorandum setting forth clearly the principal grounds of objections against the assessment made together with a copy of the Treasury Challan showing that the amount assessed has been paid (to Government) and a certified copy of the assessment order.

(3) The Commissioner shall, after verifying the fact of assessment from the records of his office, satisfy himself as to the correctness of the grounds in the petition and if he finds that a *prima facie* error of judgment has been made shall issue an order either reducing or annulling the assessment.

(4) If, on the other hand, the records in his office reveal that assessment has been made correctly, the Commissioner shall after giving the petitioner an opportunity of being heard, issue an order confirming the assessment. The order of the Commissioner shall be final.

(5) The Commissioner shall record his decision in writing.

(6) The petitioner shall be entitled to a copy of the Commissioner's orders on the petition for review free of cost and it shall be furnished to him as soon as possible after the orders are passed.

(7) So much of the duty originally assessed upon and paid by the owner as is found not to be due from him as a result of review under sub-rule (1) shall be refunded to the owner concerned or adjusted in the account of the owner concerned, as the Commissioner may deem fit, on the basis of the orders on the petition for review.

(8) Any refund under sub-rule (7) shall be made in cash by drawing the amount from the Treasury on an ordinary contingent bill on which shall be specified the review case, number, date of review order and the number, date and amount of Treasury Challan concerned.

40. Records of Collection.—(1) For the proper accounting of the duty collected under these rules, the Commissioner shall maintain records to show the following particulars along with any other particulars required:—

- (a) Assessment and collection of duty.
- (b) Particulars of petitions and orders thereon.
- (c) Refunds.

(2) All the papers relating to the assessment of duty in respect of a colliery shall be kept together and shall form an assessment case record.

CHAPTER V—MISCELLANEOUS

41. Statistics and Other Information.—(1) The owner of a coal mine shall furnish such statistics or other information as the Central Government or any other person authorised by the Central Government in writing in this behalf may by written order require for the purposes of the Act in such form or manner and within such time as may be specified in the order.

(2) Any owner of a coal mine, who without reasonable excuse fails to furnish the statistics or other information required by the Central Government under sub-rule (1), or furnishes statistics or other information containing a statement, entry or detail which is not to the best of his knowledge or belief true, shall be punished with fine which may extend to *two hundred rupees*.

42. Employees of the Fund not Public Servants.—Persons paid from the Fund shall not be deemed to be Government servants, notwithstanding that the Central Government may direct that service rules, applicable to Government servants generally may apply, with or without modification, to such persons.

FORM C₁—*Inspection Report on Dispensary*—(See rule 31B)

Inspection report of the.....Dispensary at.....
by the.....for the year.....ending.....19 ..

1. Name of Colliery/Collieries served by the Dispensary
2. Number of workers for which it caters
3. Date and hour of inspection
4. Date of last inspection
5. Dispensary Buildings—
 - (a) Condition of Dispensary Building
 - (b) Does the accommodation provided conform to the prescribed standard?
6. Medicines—
 - (a) Is the supply sufficient and according to the prescribed scale?
 - (b) Are the poisons labelled and kept separately under lock and key?
7. Surgical instruments and equipment. Are they sufficient and in good order?
8. Staff Acquittance Rolls—Are they in order and up-to-date?
9. Registers and Returns—Are these properly kept and regularly submitted?
10. Establishment—
 - (a) Officer-in-charge—
 - (i) Part-time/whole-time
 - (ii) Name and qualifications
 - (b) Designation and pay of staff—
 - (i) Medical Graduate
 - (ii) Medical Licentiate
 - (iii) Lady Doctor
 - (iv) Nurse
 - (v) Compounder
 - (vi) Midwife
 - (vii) Male Dresser
 - (viii) Female Dresser
 - (ix) Sweeper
 - (x) Chowkidar
 - (xi) Peon
 - (c) Attendance Register—Do the staff attend regularly?
11. Annual expenditure on—
 - (a) Establishment
 - (b) Medicines
12. Out-patients—
 - (a) Number seen at the time of visit
 - (b) Total number of new patients treated in current year up-to-date.
 - (c) Total number of old patients treated in current year up-to-date
 - (d) Total treated during the last year
 - (e) Do the entries on tickets of patients present tally with the entries on the register?
 - (f) Are there any arrangements for treating females apart from males?
12. Are you satisfied with the working of the dispensary? If not, what suggestions can you make for its improvement?

I certify that I have inspected the dispensary noted above and that it conforms

does not conform in the following *respects
Labour Welfare Fund Rules, 1949.

to the standards laid down in the Coal Mines.

Signature of Inspecting Officer.
Date

Signature of Coal Mines Welfare Commissioner.

*Give details below.

THE SCHEDULE

Standard of Dispensary Services to be provided by Owners of Collieries for the purpose of sub-section 2 of section 5 of the Act. (Rule 31A).

I. Building

Dispensary catering for 1,000 workers or less—

Three rooms each being 14' x 12' to be used as follows:—

- (i) Consulting room.
- (ii) Dressing room.
- (iii) Dispensary and Store room.

Covered waiting accommodation—144 sq. ft.

Two latrines—(Flush type) each 5' x 8'.

Dispensary catering for 1,001 to 2,000 workers—

Four rooms each being 14' x 12' to be used as follows:—

- (i) Consulting room.
- (ii) Minor Operation room.
- (iii) Store room.
- (iv) Dispensary room.

Covered waiting accommodation—288 sq. ft.

Two latrines—(Flush type) each 5' x 8'.

Dispensary catering for over 2,000 workers—

Five rooms each being 14' x 12' to be used as follows:—

- (i) Consulting room.
- (ii) Minor Operation room.
- (iii) Dispensary room.
- (iv) Store room.
- (v) Laboratory and Office room.

Covered waiting accommodation—432 sq. ft.

Two latrines—(Flush type) each 5' x 8'.

Each dispensary should provide emergency beds for treatment of simple and emergency cases at the rate of one bed for every 250 workers subject to a minimum of two beds, one for males and one for females. For this purpose separate rooms shall be provided for males and females and each room shall be 14' x 12' and shall have air space of 1,200 cft. and door and window space not less than 1/3 of the floor space with verandah 7 ft. wide along the front of the rooms.

Collieries which have no provision of such emergency beds at their dispensaries will be allowed time up to three years from the date the standards are enforced. Those collieries which fail to provide emergency beds in three years' time shall not be entitled to any subsidy thereafter even if they otherwise be qualified for it.

II. Staff

1. For 500 workers or less—

(a) Below 250 workers—

Medical licentiate	1 (part-time).
Midwife	1 do.
Sweeper	1 do.
Compounder-cum-dresser	1 (whole-time).
Peon	1 do.

(b) For 251—500 workers—

*Medical graduate	1 (part-time).
*Medical licentiate	1 do.
Midwife	1 do.
Sweeper	1 (whole-time).
Compounder-cum-dresser	1 do.
Peon	1 do.

*The part-time graduate and licentiate should not be allowed to serve more than 4 and 2 collieries respectively.

2. For 501—1000 workers—

Medical graduate (male)	1 (whole-time).
Medical graduate or licentiate (lady doctor)	1 (part-time).
Midwife	1 (whole-time).
Sweepers	2 do.
Compounder-cum-dresser	1 do.
Peon	1 do.

For emergency beds—

Attendants	2
Cook	1
Sweeper	1

3. For 1001—2000 workers—

Medical graduate (male)	1 (whole-time).
Medical graduate or licentiate (lady doctor)	1 do.
Compounder	1 do.
Dressers	2 do.
Midwife	1 do.
Sweepers	2 do.
Peon	1 do.

For emergency beds—

Attendants	3
Nurse	1
Cook	1
Sweepers	2

4. For 2001—3000 workers—

Medical graduate	1	} whole-time.
Medical licentiate	1	
Lady Doctor	1	
Compounders	2	
Dressers	2	
Midwife	1	
Nurse	1	
Sweepers	3	

For emergency beds—

Attendants	3
Nurses	2
Cooks	2
Sweeper	1

5. 3000 labourers and above—

As in group 4 above, but with two midwives.

COAL MINES LABOUR WELFARE OFFICE ESTABLISHMENT (CONTRIBUTORY PROVIDENT FUND) RULES, 1951¹

In exercise of the powers conferred by section 10 of the Coal Mines Labour Welfare Fund Act, 1947 (XXXII of 1947), the Central Government hereby makes the following rules, namely:—

1. **Short title.**—(1) These rules may be called the Coal Mines Labour Welfare Office Establishment (Contributory Provident Fund) Rules, 1951.

(2) They shall be deemed to have come into force with effect from the 1st day of June 1947.

2. **Definitions.**—In these rules unless there is anything repugnant in the subject or context—

(i) 'Accounts Officer' means the Accountant-General, Bihar.

(ii) 'Commissioner' means the Coal Mines Labour Welfare Commissioner.

(iii) 'Emoluments' means pay, leave salary or subsistence grant, as defined in the Fundamental Rules and includes:—

(a) Any wages paid from the Welfare Fund to employees not remunerated by fixed monthly pay; and

(b) any remuneration of the nature of pay received in respect of foreign service (i.e. service rendered with any other employer with the permission of the Chairman, Coal Mines Labour Welfare Fund Advisory Committee).

(iv) 'Employee' means any person holding an appointment, the emoluments of which are paid from the Welfare Fund.

(v) 'Family' means:—

(a) in the case of male subscriber, the wife or wives and children of the subscriber and the widow or widows and children of a deceased son of the subscriber:

Provided that if a subscriber proves that his wife has been judicially separated from him or has ceased under the customary law of the community to which the parties belong to be entitled to maintenance she shall thenceforth be deemed to be no longer a member of the subscriber's family in matters to which these rules relate, unless the subscriber subsequently indicates by express notification in writing to the Accounts Officer through the Commissioner that she shall continue to be so regarded; and

(b) in the case of a female subscriber, the husband and children of the subscriber and the widow or widows and children of a deceased son of the subscriber:

Provided that if a subscriber by notification in writing to the Accounts Officer through the Commissioner expresses her desire to exclude her husband from her family, the husband shall thenceforth be deemed to be no longer a member of the subscriber's family in matters to which these rules relate, unless the subscriber subsequently cancels formally in writing her notification excluding him.

Note I.—'Children' means legitimate children.

Note II.—An adopted child shall be considered to be a child only when the Commissioner or when any doubt arises in the mind of the Commissioner, the Solicitor to the Government of India, is satisfied that under the personal law of the subscriber, adoption is legally recognised as conferring the status of a natural child.

(vi) 'Provident Fund' means the Coal Mines Labour Welfare Office Establishment Contributory Provident Fund.

(vii) 'Subscriber' means any employee of the Welfare Fund admitted to the Provident Fund.

(viii) 'Welfare Fund' means the Coal Mines Labour Welfare Fund constituted under the Coal Mines Labour Welfare Fund Act, 1947.

(ix) 'Year' means a financial year.

3. **Constitution and management of the Provident Fund.**—The Provident Fund shall be administered by the Commissioner and shall be maintained by the Accounts Officer in rupees in India.

4. These rules shall apply to all non-pensionable employees holding a substantive appointment:

Provided that employees in temporary service may also be admitted to the Provident Fund with the written consent of the Commissioner if they have been employed or in the opinion of the Commissioner are likely to be employed for at least three years:

Provided further that persons appointed on probation to substantive appointments or appointed to officiate in an office which is vacant or the permanent incumbent of which

¹ These Rules were published under the Ministry of Labour Notification No. S.R.O. 127 dated the 17th January, 1951 in the Gazette of India, 1951, Part II—Sec. 3, p. 110.

does not draw any part of the pay or count service may, if they are confirmed without interruption, be allowed to join the Provident Fund with retrospective effect from the date of their joining the service.

Provided further that those employees serving in the Malaria Institute of India in connection with the Anti-malaria operations in the Coal-fields who were brought under the administrative control of the Commissioner with effect from the 1st March 1951, may also be allowed to join the Provident Fund with retrospective effect from the date of their joining the Institute.

NOTE:—No employee who is in receipt of a pension from Government shall be admitted to the Provident Fund.

5. Nomination.—(1) A subscriber shall, as soon as may be after joining the Provident Fund, send to the Commissioner a nomination conferring on one or more persons the right to receive the amount that may stand to his credit in the Provident Fund in the event of his death before that amount has become payable, or having become payable has not been paid:

Provided that if, at the time of making the nomination, the subscriber has a family, the nomination shall not be in favour of any person or persons other than the members of his family.

(2) If a subscriber nominates more than one person under sub-rule (1) he shall specify in the nomination the amount or share payable to each of the nominees in such manner as to cover the whole of the amount that may stand to his credit in the Fund at any time.

(3) Every nomination shall be in such one of the Forms set forth in the First Schedule as is appropriate in the circumstances.

(4) A subscriber may at any time cancel a nomination by sending a notice in writing to the Accounts Officer.

Provided that the subscriber shall along with such notice send a fresh nomination made in accordance with the provisions of this rule.

(5) A subscriber may provide in a nomination—

(a) in respect of any specified nominee that in the event of his predeceasing the subscriber, the right conferred upon that nominee shall pass to such other person as may be specified in the nomination;

(b) that the nomination shall become invalid in the event of the happening of a contingency specified therein; provided that if at the time of making the nomination the subscriber has no family, he shall provide in the nomination that it shall become invalid in the event of his subsequently acquiring a family.

(6) Immediately on the death of a nominee in respect of whom no special provision has been made in the nomination under clause (a) of sub-rule (5) or on the occurrence of any event by reason of which the nomination becomes invalid in pursuance of clause (b) of sub-rule (5) of the proviso thereto, the subscriber shall send to the Accounts Officer a notice in writing cancelling the nominations together with a fresh nomination made in accordance with the proviso of this rule.

(7) Every nomination made, and every notice of cancellation given by a subscriber shall, to the extent that it is valid, take effect on the date on which it is received by the Accounts Officer.

6. Subscriber's account.—An account shall be prepared in the name of each subscriber and maintained by the Accounts Officer in the form set forth in the Second Schedule appended to these rules.

7. Conditions and rate of subscription.—(1) A subscriber shall subscribe monthly to the Provident Fund when on duty or foreign service.

(2) A subscriber may, at his election, not subscribe during leave.

(3) A subscriber shall intimate his election not to subscribe during leave by a written communication to the Accounts Officer through the Commissioner before he proceeds on leave.

(4) Failure to make due and timely intimation shall be deemed to constitute an election to subscribe.

(5) The election of a subscriber intimated under this sub-rule shall be final.

(6) A subscriber shall *not* subscribe to the Provident Fund when on extraordinary leave without pay or under suspension. He shall, however, on return from a period of such leave without pay or on re-instatement after a period passed under suspension, be allowed the option to subscribe for that period, at the discretion of the Commissioner.

The amount of subscription to be paid shall also be determined by the Commissioner the general principle to be observed being that the subscription should be calculated on half the emoluments drawn by the employee before he proceeded on leave without pay or was placed under suspension.

8. (1) The amount of subscription shall be fixed by the subscriber himself subject to the following conditions:—

(a) it shall be expressed in whole rupees:

Provided that if the emoluments of the subscriber do not exceed fifty rupees a month, the amount may be any multiple of a half rupee, and

(b) it may be any sum so expressed at a rate not less than $6\frac{1}{4}$ per cent. (*i.e.* one anna in the rupee) of his monthly emoluments.

Provided that in the case of an employee who under these Rules is allowed to join the Provident Fund with retrospective effect, such monthly subscription shall not be less than ten per cent of his pay until all arrears of such subscriptions are paid up in full.

(2) For the purpose of sub-rule (1) the emoluments of a subscriber shall be—

(a) in the case of a subscriber who was on duty on the 31st March of the preceding year, the emoluments to which he was entitled on that date;

(b) in the case of a subscriber admitted to the Provident Fund on a subsequent date, the emoluments to which he was entitled on such subsequent date;

(c) in the case of a subscriber who was on deputation out of India on the said date or was on leave on the said date and continues to be on leave and has elected to subscribe during such leave the emoluments to which he would have been entitled had he been on duty; and

(d) in the case of a subscriber who was on leave on the said date and elected not to subscribe during such leave or was under suspension on the said date the emoluments to which he was entitled on the first day after his return to duty.

(3) The subscriber shall intimate the fixation of the amount of his monthly subscription for each year on the basis of his emoluments and rate permissible.

(4) The subscriber shall be permitted to increase the amount of subscription once at any time during the course of the year; there shall, however, be no corresponding increase in the Welfare Fund's contribution:

Provided that if a subscriber is on duty for a part of a month and on leave for the remainder of that month and if he has elected not to subscribe during leave the amount of the subscription shall be proportionate to the number of days spent on duty in the month.

9. **Realisation of subscription.**—(1) When the emoluments are drawn on the establishment pay bills, recovery of subscription to and the principal and interest of advances granted from the Provident Fund shall be made by deduction from the pay bills.

(2) When the emoluments are drawn otherwise, the subscriber shall forward his dues monthly to the Accounts Officer.

10. **Contribution by the Welfare Fund.**—(1) The Commissioner shall make yearly a contribution to the account of each subscriber from the Welfare Fund:

Provided that if a subscriber quits service or dies during the course of a year, proportionate contribution shall be credited to his account for the period between the close of the preceding year and the date of his retirement or death as the case may be.

(2) The rate of contribution made by the Commissioner shall be $6\frac{1}{4}$ per cent. ($\frac{1}{16}$ th) of the subscriber's emoluments drawn on duty or if he has been on leave and elected to subscribe during such leave the emoluments to which he would have been entitled had he been on duty.

Provided that in case of employees who are allowed to join the Provident Fund with retrospective effect such contribution shall not be less than ten per cent. of the subscriber's emoluments until all arrears of such contributions are paid up in full.

(3) The amount of contribution shall be rounded off to the nearest whole rupee (eight annas counting as the next higher rupee).

11. **Interest.**—(1) The Commissioner shall pay to the credit of the account of a subscriber interest at such rate as the Central Government may from time to time prescribe for the payment of interest on a subscriber's accumulations in the Provident Fund.

(2) In addition to any amount to be paid under rule 17, interest thereon upto the end of the month preceding that in which payment is made, or upto the end of the sixth

month after the month in which such amount became payable, whichever of these periods be less, shall be payable to the persons to whom such amount is to be paid; provided that no interest shall be paid in respect of any period after the date which the Accounts Officer has intimated to that person (or his agent) as the date on which he is prepared to make payment in cash, or if he pays by cheque, after the date on which the cheque in that person's favour is put in the post.

12. Advances.—When the pecuniary circumstances of a subscriber are such that indulgence is absolutely necessary, a temporary recoverable advance may, at the discretion of the Commissioner, be granted to a subscriber out of the amount standing to his credit in the Provident Fund, on the conditions that—

(i) the advance is required to pay expenses on behalf of a subscriber or his family on any of the following:—

- (a) prolonged illness or medical attention,
- (b) overseas passage for reasons of health or education, and
- (c) marriage, funerals or ceremonies which by his religion it is incumbent upon the subscriber to perform.

(ii) the advance is expressed in whole rupees and shall not, except for special reasons, exceed three month's pay of the subscriber and shall in no case exceed the amount of subscriptions and interest thereon standing to his credit in the Provident Fund.

(iii) a written request is made to the Commissioner showing reasons for the request:

Provided that if the reason is of a confidential nature it may be communicated to the Commissioner personally or confidentially.

13. Any advance shall be recovered from the subscriber in such number of equal monthly instalments as the Commissioner may direct but the number shall not be less than 12 unless the subscriber so elects or in any case more than 24, the amount of advance being raised or reduced, if necessary, to admit of the fixation of such instalments. The instalments shall be expressed in whole rupee and recovered from the subscriber's salary in the manner indicated in rule 9. The first instalment shall commence from the first payment of a full month's salary after the grant of advance.

14. After the principal of the advance has been fully repaid, interest thereon shall be recovered in one instalment at the rate of 1/5 per cent. of the principal for each month or broken portion of a month during the period between the drawal and complete repayment of the principal:

Provided that when the advance is distributed to be recovered in more than 19 instalments, the interest may be recovered in two instalments.

15. Deductions.—Subject to the condition that no deduction may be made which reduces the credit by more than the amount of any contribution by the Commissioner with interest thereon credited under rules 10 and 11 before the amount standing to the credit of a subscriber in the Provident Fund is paid out of the Fund, the Commissioner may direct the deductions therefrom and payment to the Welfare Fund of—

(a) any amount, if a subscriber has been dismissed from the service for grave misconduct:

Provided that, if the order of dismissal is subsequently cancelled, the amount so deducted shall, on his reinstatement in the service, be replaced at his credit in the Provident Fund;

(b) any amount if a subscriber resigns his employment under the Welfare Fund within five years of commencement of service thereof otherwise than by reasons of superannuation or a declaration by competent medical authority that he is unfit for further service; and

(c) any amount due under a liability incurred by the subscriber to the Welfare Fund.

16. Final withdrawal of accumulations in the Provident Fund.—The amount standing to the credit of a subscriber shall become payable at the time of quitting service or the death of the subscriber in the manner provided by these rules.

17. The total accumulations in the account of a subscriber less the amount of unrecovered advance and interest thereon, if any, shall be paid as follows:—

(i) to the subscriber on his ceasing to be an employee;

(ii) in the event of the death of the subscriber having made a nomination in accordance with these rules, to the nominee or nominees and in the event of such nominee or nominees pre-deceasing the subscriber, to the alternate nominee or nominees, in the manner indicated in the declaration form; or

(iii) in the event of the death of the subscriber without having made a nomination in accordance with these rules or whose nominee or nominees or alternate nominee or nominees has/have not survived the subscriber, to the legal heir or heirs of the subscriber on the

production by him/them of probate or letters of administration evidencing the grant to him/them of the administration of the estate of the subscriber or a certificate granted under the Indian Succession Act, 1925, entitling the holder thereof to receive payment of such amount:

Provided that if the amount of such accumulations does not exceed rupees five thousand it may be paid to any person appearing to the Commissioner to be entitled to receive it.

FIRST SCHEDULE—[See rule 5(3)]

FORMS OF NOMINATION

I. When the subscriber has a family and wishes to nominate one member thereof.

I hereby nominate the person mentioned below, who is a member of my family as defined in rule 2 of the Coal Mines Labour Welfare Office Establishment (Contributory Provident Fund) Rules, 1951, to receive the amount that may stand to my credit in the Fund, in the event of my death before that amount has become payable or having become payable, has not been paid:—

Name and address of the nominee	Relationship with subscriber	Age	Contingencies on the happening of which the nomination shall become invalid.	Name, address and relationship of the person, if any, to whom the right of the nominee shall pass in the event of his predeceasing the subscriber.

MICA MINES LABOUR WELFARE FUND ACT, 1946 (XXII OF 1946)

Statement of Objects and Reasons¹

It is urgently necessary to improve the living and working conditions of the labour employed in Mica Mining Industry. Though the industry is one of great importance to the country labour conditions are most deplorable and Government are convinced that they must intervene by initiating a scheme of welfare measures. A member of the Labour Investigating Committee was deputed to study the labour conditions in the Mica Mining areas and he has submitted a report making a number of recommendations. These *inter alia* include the working out of a comprehensive welfare scheme designed to improve the standard of living of the workers and to secure for them the requisite medical, educational, housing, water supply and other facilities. The present proposals relate only to the welfare of labour employed in the mines as distinct from factory labour for which the responsibility lies with the Provincial Governments. The mining industry has been consulted and there is a general agreement that a cess should be imposed on all exports of mica to finance the welfare scheme. While it may not be possible to find out immediately large sums of money required for the purpose Government feel that a start in this direction must be made at once by the creation of a Fund by the imposition of an *ad valorem* duty on all exports of mica. The Bill is designed to give effect to these proposals.

MICA MINES LABOUR WELFARE FUND ACT, 1946 (XXII OF 1946)

Arrangement of Sections

1. Short title and extent.
2. Imposition and collection of a cess.
3. Mica Mines Labour Welfare Fund.
4. Advisory Committees.
5. Appointment and powers of officers.
6. Power to make rules.

MICA MINES LABOUR WELFARE FUND ACT, 1946 (XXII OF 1946)¹

[23rd April, 1946]

An Act to constitute a fund for the financing of activities to promote the welfare of labour employed in the mica mining industry.

Whereas it is expedient to constitute a fund for the financing of activities to promote the welfare of labour employed in the mica mining industry;

It is hereby enacted as follows:—

1. Short title and extent.—(1) This Act may be called the Mica Mines Labour Welfare Fund Act, 1946.

(2) It extends to the whole of India ²[except the State of Jammu and Kashmir.]

2. Imposition and collection of a cess.—(1) With effect from such date³ as the Central Government may, by notification in the official Gazette, appoint in this behalf, there shall be levied and collected, as a cess for the purposes of this Act, on all mica, in whatever state, exported from ⁴[the territories to which this Act extends] a duty of customs at such rate, not exceeding six and one-quarter *per centum ad valorem*, as may from time to time be fixed by the Central Government by notification in the official Gazette:

Provided that until the 1st day of April, 1947, the rate of duty so fixed shall not exceed two and one-half *per centum ad valorem*.

(2) On the last day of each month or as soon thereafter as may be convenient, there shall be paid to the credit of a fund to be called the Mica Mines Labour Welfare Fund (hereinafter referred to as the Fund) the proceeds of the duty of customs recovered during that month after deduction of the expenses, if any, for collection and recovery.

3. The Mica Mines Labour Welfare Fund.—(1) The Fund shall be applied by the Central Government to meet expenditure incurred in connection with measures in the opinion of the Central Government necessary or expedient to promote the welfare of labour employed in the mica mining industry.

(2) Without prejudice to the generality of sub-section (1), the Fund may be utilised to defray—

(a) the cost of measures for the benefit of labour employed in the mica mining industry directed towards—

(i) the improvement of public health and sanitation, the prevention of disease, and the provision and improvement of medical facilities,

(ii) the provision and improvement of water supplies and facilities for washing,

(iii) the provision and improvement of educational facilities,

(iv) the improvement of standards of living, including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities,

(v) the provision of transport to and from work;

¹ For Statement of Objects and Reasons, see Gazette of India, 1946, Part V, p. 151; see also page 552 ante and for Report of the Select Committee, see Gazette of India, 1946, Part V, page 185.

² These words were substituted for the words "except Part B States" by the Part B States (Laws) Act, 1951 (III of 1951).

³ 2½% *ad valorem* duty levied from 1st April, 1947.

⁴ These words were substituted for the words "Part A States and Part B States" by the Part B States (Laws) Act, 1951 (III of 1951).

(b) the grant to a ⁵[State] Government, a local authority or the owner, agent or manager of a mica mine, of money in aid of any scheme approved by the Central Government for any purpose for which the Fund may be utilised;

(c) the cost of administering the Fund, including the allowances, if any, of members of the Advisory Committees constituted under section 4, and the salaries and allowances, if any, of officers appointed under section 5;

(d) any other expenditure which the Central Government may direct to be defrayed from the Fund.

(3) The Central Government shall have power to decide whether any particular expenditure is or is not debitable to the Fund, and its decision shall be final.

(4) The Central Government shall publish annually in the official Gazette report of the activities financed from the Fund, together with an estimate of receipts and expenditure of the Fund and a statement of accounts.

4. Advisory Committees.—(1) The Central Government shall constitute ⁶[as many Advisory Committees as it thinks fit but not exceeding one in each State] to advise the Central Government on any matters arising out of the administration of this Act or the Fund.

(2) The members of the Advisory Committees shall be appointed by the Central Government, and shall be of such number and chosen in such manner as may be prescribed by rules made under this Act:

Provided that each Committee shall include an equal number of members representing mica mine owners and workmen employed in the mica mining industry, and that at least one member of each Committee shall be a woman, and at least one member of each Committee shall be a member of the Legislature of the ⁶[State] concerned.

(3) The Chairman of each Advisory Committee shall be appointed by the Central Government.

(4) The Central Government shall publish in the official Gazette the names of all members of the Advisory Committees.

5. Appointment and powers of officers.—(1) The Central Government may appoint Inspectors, Welfare Administrators and such other officers as it thinks necessary to administer the Fund or to supervise or carry out the activities financed from the Fund.

(2) Every officer so appointed shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code (XLV of 1860).

(3) Any Inspector or Welfare Administrator may—

(a) with such assistance, if any, as he thinks fit, enter at any reasonable time any place which he considers it necessary to enter for the purpose of supervising or carrying out the activities financed from the Fund, and

(b) do within such place anything necessary for the proper discharge of his duties.

6. Power to make rules.—(1) The Central Government may, by notification in the official Gazette, make rules to carry into effect the purposes of this Act.

⁵ Substituted for the word "Province" by A. O. 1950.

⁶ These words were substituted for the words "two Advisory Committees, one for the Province of Madras and one for the Province of Bihar," by Act III. of 1951.

(2) Without prejudice to the generality of the foregoing power, such rules may provide for—

- (a) the making of refunds, remissions and recoveries of the duty of customs imposed by sub-section (1) of section 2;
- (b) the composition of the Advisory Committees constituted under section 4, the manner in which the members thereof shall be chosen, the term of office of such members, the allowances, if any, payable to them, and the manner in which the Advisory Committees shall conduct their business;
- (c) the conditions governing the grant of money from the Fund under clause (b) of sub-section (2) of section 3;
- (d) the form of the estimate and statement referred to in sub-section (4) of section 3;
- (e) the conditions of service and the duties of all officers appointed under section 5;
- (f) the furnishing by owners or agents or managers of mica mines of statistical or other information, and the punishment by fine on failure to comply with the requirements of any rule made under this clause.

MICA MINES LABOUR WELFARE FUND RULES, 1948¹

In exercise of the powers conferred by section 6 of the Mica Mines Labour Welfare Fund Act, 1946 (XXII of 1946), the Central Government is pleased to make the following rules, namely:—

1. Short title and extent.—(1) These rules may be called the Mica Mines Labour Welfare Fund² * * Rules, 1948.

(2) They extend to ³[the whole of India except the State of Jammu and Kashmir.]

2. Definitions.—In these rules, unless there is anything repugnant in the subject or context,—

(1) “the Act” means the Mica Mines Labour Welfare Fund Act, 1946.

(2) “Advisory Committee” means the Advisory Committee constituted under section 4 of the Act,

(3) “Member” means a member of the Advisory Committee present in India.

3. Composition of Advisory Committees.—(1) (a) The Committee for the State of Bihar shall consist of the following members, namely:—

(i) An Officer to be appointed by the Central Government called the Welfare Commissioner;

(ii) The Mica Controller, Bihar;

(iii) The Commissioner of Labour, Bihar;

(iv) A Member of the Bihar Legislative Council or Assembly nominated by the Central Government on the recommendation of the Government of Bihar;

(v) Three persons nominated by the Central Government, in consultation with the association, if any, representing mica mine owners of Bihar;

(vi) Three persons nominated by the Central Government to represent the interests of workmen employed in the mica mining industry of Bihar;

(vii) A woman nominated by the Central Government on the recommendation of the Government of Bihar, if no woman has been nominated under clause (vi);

(b) The Welfare Commissioner shall be the Chairman of the Advisory Committee for the State of Bihar and the Vice-Chairman of the Committee shall be appointed by the Central Government from among the other members.

(2) (a) The Advisory Committee for the State of Andhra shall consist of the following members, namely:—

(i) The Collector of Nellore;

(ii) The President of the District Board, Nellore;

(iii) A Member of the Andhra Legislative Council or Assembly nominated by the Central Government on the recommendation of the Government of Andhra;

⁴[(iv) One representative of the Central Government;]

(v) Two persons nominated by the Central Government, in consultation with the associations, if any, representing mica mine owners of Andhra;

(vi) Two persons nominated by the Central Government to represent the interests of workmen employed in the mica mining industry of Andhra;

(vii) A woman nominated by the Central Government on the recommendation of the Government of Andhra, if no woman has been nominated under clause (vi).

(b) The Collector of Nellore shall be the Chairman of the Advisory Committee for the State of Andhra and the Vice-Chairman of the Committee shall be appointed by the Central Government from among the other members.

⁵[(3) (a) The Advisory Committee, for the State of Rajasthan shall consist of the following members, namely:—

(i) The Labour Commissioner, Rajasthan;

(ii) One representative of the Central Government;

¹ These Rules were published in the Gazette of India, Part I, dated the 10th January, 1948 under Ministry of Labour Notification No. LMW 5(8)/46, dated the 2nd January, 1948.

² The words and bracket “(Bihar and Madras)” were omitted by Ministry of Labour Notification No. S.R.O. 2054 dated the 13th December, 1951.

³ These words were substituted for the words “States of Bihar and Madras,” *ibid*.

⁴ Inserted by the Ministry of Labour Notification No. S.R.O. 812 dated the 15th October, 1950.

⁵ Sub-rule (3) was added by the Ministry of Labour Notification No. S.R.O. 2054 dated the 13th December, 1951.

- (iii) A member of the Rajasthan Legislative Assembly nominated by the Central Government on the recommendation of the Government of Rajasthan;
 - (iv) Two persons nominated by the Central Government, in consultation with the associations, if any, representing mica mine owners of Rajasthan;
 - (v) Two persons nominated by the Central Government, to represent the interests of workmen employed in the mica mining industry of Rajasthan;
 - (vi) A woman nominated by the Central Government on the recommendation of the Government of Rajasthan, if no woman has been nominated under clause (v).
- (b) The Labour Commissioner, Rajasthan, shall be the Chairman for the Advisory Committee for the State of Rajasthan and the Vice-Chairman of the Committee shall be appointed by the Central Government from among the other members.]

⁶[(4) (a) The Advisory Committee for the State of Ajmer shall consist of the following members, namely:—

- (i) the Deputy Commissioner, Ajmer;
- (ii) the Labour Officer, Ajmer;
- (iii) one representative of the Central Government;
- (iv) a member of the Ajmer Legislative Assembly (when it is constituted) nominated by the Central Government on the recommendation of the Government of Ajmer;
- (v) two persons nominated by the Central Government, in consultation with the associations, if any, representing mica mine owners of Ajmer;
- (vi) two persons nominated by the Central Government to represent the interests of workmen employed in the mica mining industry of Ajmer;
- (vii) a woman nominated by the Central Government, if no woman has been nominated under clause (vi).

(b) The Deputy Commissioner, Ajmer, shall be the Chairman of the Advisory Committee for the State of Ajmer and the Vice-Chairman of the Committee shall be appointed by the Central Government from among other members.]

4. Terms of office.—(1) A nominated member shall, unless, he resigns his office or dies at an earlier date, hold office for a period of 3 years from the date of the notification appointing him a member of the Advisory Committee and shall be eligible for renomination:

Provided that an outgoing member may continue in office until the appointment of his successor is notified in the *Gazette of India*.

(2) A member nominated to fill a casual vacancy shall hold office for as long as the member whose place he fills would have been entitled to hold office if the vacancy had not occurred.

5. Power to co-opt.—(1) The Advisory Committee may, at any time and for such period as it thinks fit, co-opt any person or persons to the Advisory Committee.

(2) A person co-opted under sub-rule (1) shall exercise all the powers and functions of a member under these rules but shall not be entitled to vote.

6. Resignation.—A non-official nominated member may resign his office by letter addressed to the Chairman.

7. Absence from India.—(1) Before a non-official nominated member leaves India,—

(a) he shall intimate to the Chairman the date of his departure from and the date of his expected return to India, or

(b) if he intends to be absent from India for a period longer than six months, he shall tender his resignation.

(2) If any nominated member leaves India without taking action as required by sub-rule (1), he shall be deemed to have resigned with effect from the date of his departure from India.

8. Vacation of office.—A nominated member shall be deemed to have vacated his office—

(a) if he becomes insolvent; or

(b) if he is convicted of any offence which in the opinion of the Central Government involves moral turpitude; or

⁶ Sub-rule (4) was added by Ministry of Labour Notification No. S.R.O. 246 dated the 29th January, 1952.

(c) if he is absent from meetings of the Advisory Committee for three consecutive meetings without leave of absence from the Chairman; or

(d) if, in the opinion of the Central Government, it is undesirable that he should continue to be a member of the Committee.

9. Disposal of business.—(1) Every question which the Advisory Committee is required to take into consideration shall be considered either at a meeting or, if the Chairman so directs, by sending the necessary papers to every member for opinion.

(2) When a question is referred to the Advisory Committee for opinion, any member may request that the question be considered at a meeting and thereupon the Chairman may, and if the request is made by five or more members shall, direct that it be so considered.

10. Time and place of meetings.—The Advisory Committee shall meet at such places and times as may be appointed by the Chairman.

11. Remuneration of members.—Each non-official member, including a non-official member co-opted under rule 5, shall be paid an allowance of Re. 10 for each meeting of the Advisory Committee or Finance Sub-Committee attended by him, subject to a maximum of Re. 30 for any one calendar month, and his travelling expenses subject to the condition that they shall not exceed the rates admissible to Central Government servants of the first grade for a journey on tour. Where the journey is performed entirely by road, mileage at the rates admissible to Central Government servants of the first grade shall be paid subject to the condition of furnishing a certificate to the effect that the journey was undertaken by road to avoid loss of time which the journey by rail would have entailed and subject also to the condition that the distance travelled did not exceed 75 miles in a single journey.

12. Notice of meetings and list of business.—(1) Notice of not less than 15 days from the date of posting shall be given to every member of the time and place fixed for each ordinary meeting, and every member shall be furnished with a list of business to be considered at the meeting:

Provided that when an emergency meeting is called by the Chairman such notice shall not be necessary.

(2) No business which is not on the list shall be considered at a meeting without the permission of the Chairman.

13. Advisory Committee to be informed of expenditure.—A memorandum detailing any grants made or expenditure incurred from the Fund since the last meeting shall be laid before each meeting of the Advisory Committee.

14. Other matters to be considered by Advisory Committee.—(1) The Advisory Committee shall, besides carrying out its statutory duties, consider and advise upon any matter concerning these Rules, referred to it by the Central or Provincial Government for advice.

(2) The Advisory Committee shall also consider the budget and any matter that may be laid before it by the Chairman. It shall be obligatory on the Chairman to place before the Advisory Committee any matter at the request of not less than five members.

15. Presiding at meetings.—The Chairman shall preside at every meeting at which he is present and in his absence the Vice-chairman shall preside.

16. Quorum.—No business shall be transacted at a meeting of the Advisory Committee whether an ordinary or emergency meeting unless at least three members having the right to vote are present of whom the Chairman or Vice-Chairman shall be one:

Provided that if at any meeting less than three such members attend, the Chairman may adjourn the meeting to a date not less than seven days later, informing the members present and notifying other members that he proposes to dispose of the business at the adjourned meeting whether there is a quorum or not and it shall thereupon be lawful to dispose of the business at the adjourned meeting irrespective of the number of members attending it.

17. Recommendation by majority.—(1) Every question at a meeting of the Advisory Committee shall be decided by a majority of votes of the members present and voting but the minority shall in all cases have the right of requiring their dissent to be noted.

(2) Every question referred to the members for opinion shall, unless the Chairman in pursuance of sub-rule (2) of rule 9 reserves it for consideration at a meeting, be decided in accordance with the opinion of the majority recording opinion within the time allowed.

(3) In the case of an equal division of votes or opinions the Chairman shall give an additional vote or opinion.

18. Minutes of meetings.—(1) The proceedings of each meeting of the Advisory Committee shall be circulated to all members and thereafter recorded in a minute book, which shall be kept for permanent record.

(2) The record of the proceedings of each meeting shall be signed by the Chairman or Vice-Chairman, as the case may be.

19. Headquarters of the Advisory Committees.—(1) The headquarters of the Advisory Committee for the State of Bihar shall be at such place as may be fixed by the Central Government and of ⁷[the Advisory Committee for any other State at such place as may be fixed by the State Government concerned.].

(2) The Chairman, Vice-Chairman and Secretary of the Advisory Committee shall be the executive of the Committee and exercise the executive functions of the Committee on behalf of the Committee.

20. Staff of the Advisory Committees.—(1) Subject to the budget provision, and the provisions of rule 24, the Chairman of each Advisory Committee may appoint technical and secretarial staff including a Secretary (who shall ordinarily be a whole-time officer paid from the Fund) to assist him in carrying out his duties, may fix the scale of establishment and the salaries and allowances and determine other conditions of service of officers and servants employed by him including the security to be taken from them:

Provided that the creation of a post carrying a salary exceeding Rs. 100 per month for more than six months and appointment thereto shall require the previous sanction of the Central Government:

Provided further that the scales of pay of servants appointed by the Chairman under this sub-rule shall be in accordance with the scales sanctioned by the Central Government for similar posts.

(2) Persons appointed by the Chairman and paid from the Fund shall not be deemed to be Government servants notwithstanding that the Central Government may direct any service rules applicable to Government servants may apply with or without modifications to such persons.

(3) The Chairman may authorize the technical and secretarial staff to give technical and secretarial assistance to the Finance Sub-Committee or to any other authority exercising advisory functions in connection with the Act or to any person or authority expending grants obtained from the Fund.

21. Finance Sub-Committee.—(1) The Advisory Committee shall elect from among its members four persons, of whom two shall be persons representing mica mine owners and two representing mica mine workers, to a Finance Sub-Committee of which the Vice-Chairman of the Advisory Committee who shall be an additional member shall be the President.

(2) The Advisory Committee may at any time co-opt persons to the Finance Sub-Committee and a person co-opted shall exercise all the powers and functions of a member of such Sub-Committee, but shall not be entitled to vote and shall not solely by reason of being so co-opted be a member of the Advisory Committee.

(3) Notice of every meeting of the Finance Sub-Committee shall be sent to the Chairman of the Advisory Committee who may attend such meeting if he so desires, and if he does so attend, he shall notwithstanding anything in sub-rule (1) preside and shall be entitled to vote.

(4) The meetings and proceedings of the Finance Sub-Committee shall be governed by the provisions herein contained for regulating the meetings and proceedings of the Advisory Committee in so far as the same are applicable thereto.

22. Duties of the Finance Sub-Committee.—The duties of the Finance Sub-Committee shall be to frame schemes of expenditure, to advise on the budget drawn up by the executive of the Advisory Committee and on the accounts of the Advisory Committee and also in regard to all expenditure debitable to the Fund, and to consider all schemes referred to in proviso (ii) to rule 24.

23. Budget.—(1) The annual budget of the Fund as prepared by the executive of the Committee shall be considered by the Advisory Committee⁸ * * * of each year. The budget as approved by the Advisory Committee shall be submitted ⁹[not later than the 1st day

⁷ Substituted by the Ministry of Labour Notification No. S.R.O. 2054 dated the 13th December 1951.

⁸ Omitted by the Ministry of Labour Notification No. S.R.O. 307 dated the 21st February, 1951.

⁹ Substituted, *ibid*.

of October each year] for sanction to the Central Government, which may make such alterations therein as it considers suitable:

Provided that the ¹⁰[Advisory Committee for a State other than the State of Bihar shall submit its budget to the Central Government through the State Government].

(2) The budget to be forwarded to the Central Government shall be accompanied by detailed self-contained notes explaining any new schemes included therein.

24. Schemes of expenditure.—(1) The sanction of the Central Government to the budget shall, if no specific mention is made to the contrary, be deemed to include sanction to expenditure on all the schemes included in the budget.

(2) The Chairman shall have power, subject to the provision in the sanctioned budget, to incur expenditure on administrative staff and welfare schemes:

Provided—

(i) that he shall have no power to sanction any scheme not included in the budget and involving a non-recurring expenditure exceeding Rs. 10,000 or a recurring cost exceeding Rs. 1,000 a year, and

(ii) that any new scheme within these limits shall require the approval of the Finance Sub-Committee before any expenditure on it is incurred.

25. Distribution of cess.—The proceeds of the cess available for distribution shall be distributed by the Central Government among mica producing areas in proportion to their production or in such manner as may be decided in consultation with the Governments of those areas.

¹¹[**26. Credit to the Fund.**—The amount of cess collected shall be credited to the Central Revenue, as soon as it is collected, and an equivalent amount, after deduction of such percentage as the Central Government may fix by notification in the official Gazette shall be transferred simultaneously to the Fund in a special account under the Central Government to be maintained by such officer as the Central Government may appoint in this behalf.]

¹²[**27. Refund and recovery of cess.**—(1) Refund of cess erroneously levied or paid and recovery of cess short-levied or erroneously refunded shall be made in accordance with the provisions of the Sea Customs Act, 1878 (VIII of 1878), and the rules made thereunder relating to refund, remission and recovery of customs duties under that Act so far as the same may be applicable.

(2) When it is proved to the satisfaction of the Central Government or of any person authorised in this behalf by the Central Government, that any consignment of mica, once exported out of India, on which cess under section 2 of the Act had been collected, has actually been reshipped back to India for whatever reasons, the Central Government or the person so authorised may order refund of an amount equal to the cess so collected on such mica less the expenses for collection and recovery to the party from whom the cess was previously collected provided that the party concerned puts in a claim for refund within three months from the date on which the particular consignment of mica, so reshipped back, reaches India.]

28. Conditions of grants to the Government of Andhra.—(1) The Central Government shall furnish the Government ¹³[of any State other than the State of Bihar] not later than the 1st day of July each year with an estimate of the proceeds of the cess likely to be made available for expenditure during the following financial year in the State. The Government of Andhra shall inform the Advisory Committee accordingly.

(2) The Government ¹⁴[of such State] shall forward to the Central Government the budget submitted by the Advisory Committee not later than the 1st day of October each year. The Central Government may sanction the budget with or without modifications.

(3) The Central Government may give general or specific directions to the Government of Andhra for ensuring co-ordination and uniformity in the preparation of welfare schemes and for proper administration thereof.

¹⁰ Substituted by the Ministry of Labour Notification No. S.R.O. 2054 dated the 13th December, 1951.

¹¹ This rule was substituted for the sub-rules (1) and (2) by the Ministry of Labour Notification No. LW 23(1)/48, dated 29th July, 1948.

¹² This rule was substituted for the previous rule by the Ministry of Labour Notification No. S.R.O. 860 dated the 4th November, 1950.

¹³ These words were substituted for the words "of Madras" by the Ministry of Labour Notification No. S.R.O. 2054 dated the 13th December, 1951.

¹⁴ Substituted, *ibid.*

29. Statement of Accounts.—The accounts of the Fund shall be maintained and audited in such manner and by such officers as may be approved by the Central Government.

30. Statistical and other information to be furnished.—(1) The owner, agent or manager of a mica mine shall furnish such statistics or other information, as the Central Government or any other person authorised by the Central Government in writing in this behalf may by written order require for the purpose of the Act, in such form or manner and within such time as may be specified in the order.

(2) Any owner, agent or manager of a mica mine who without reasonable excuse fails to furnish the statistical or other information as required under sub-rule (1) or furnishes statistical or other information containing a statement, entry or detail which is not to the best of his knowledge or belief true, shall be punishable with fine which may extend to five hundred rupees.

SCHEDULE.

MICA MINES LABOUR WELFARE OFFICE ESTABLISHMENT (CONTRIBUTORY PROVIDENT FUND) RULES, 1950¹

In exercise of the powers conferred by section 6 of the Mica Mines Labour Welfare Fund Act, 1946 (XXII of 1946), the Central Government is pleased to make the following rules, namely:—

1. Short title.—(1) These rules may be called the Mica Mines Labour Welfare Office Establishment (Contributory Provident Fund) Rules, 1950.

(2) They shall be deemed to have come into force with effect from the 1st April, 1950.

2. Definitions.—In these rules unless the context otherwise requires—

²[(i) 'Accounts Officer' means in relation to Ajmer, the Accountant General of Central Revenues and in relation to other States, the Accountant General of the respective States.

(ii) 'Controlling Officer' means in relation to Bihar, the Welfare Commissioner, Mica Mines Labour Welfare Fund, Dhanbad, and in relation to other States, the Chairman of the Mica Mines Labour Welfare Fund Advisory Committee for the respective States.]

(iii) 'Emoluments' means pay, leave salary or subsistence grant, as defined in the Fundamental Rules, and includes—

(a) any wages paid from the Welfare Fund to employees not remunerated by fixed monthly pay; and

¹ These Rules were published under the Ministry of Labour Notification No. S.R.O. 774 dated the 30th September, 1950, in the Gazette of India, 1950, Part II—Sec. 3, p. 753.

² Substituted by Ministry of Labour Notification No. S.R.O. 1532 dated the 4th May, 1954.

(b) any remuneration of the nature of pay received in respect of foreign service (*i.e.*, service rendered with any other employer with the permission of the Controlling Officer.)

(iv) 'Employees' means any person holding an appointment, the emoluments of which are paid from the Welfare Fund.

(v) 'Family' means—

(a) in the case of male subscriber, the wife, or wives and children of the subscriber, and the widow, or widows and children of a deceased son of the subscriber:

Provided that if a subscriber proves that his wife has been judicially separated from him or has ceased under the customary law of the community to which she belongs to be entitled to maintenance she shall henceforth be deemed to be no longer a member of the subscriber's family in matters to which these rules relate, unless the subscriber subsequently indicate by express notification in writing to the Accounts Officer through the Controlling Officer that she shall continue to be so regarded;

(b) in the case of a female subscriber, the husband and children of the subscriber, and the widow or widows and children of a deceased son of the subscriber;

Provided that if a subscriber by notification in writing to the Accounts Officer through the Controlling Officer, expresses her desire to exclude her husband from her family, the husband shall thenceforth be deemed to be no longer a member of the subscriber's family in matters to which these rules relate, unless the subscriber subsequently cancels formally in writing her notification excluding him.

NOTE 1.—'Children' means legitimate children.

NOTE 2.—An adopted child shall be considered to be a child when the Controlling Officer, or when any doubt arises in the mind of the Controlling Officer, the solicitor to the Government of India, is satisfied that under the personal law of the subscriber, adoption is legally recognised as conferring the status of a natural child, but in this case only.

(vi) 'Provident Fund' means the Mica Mines Labour Welfare Office Establishment Contributory Provident Fund.

(vii) 'Subscriber' means any employee of the Welfare Fund admitted to the Provident Fund.

(viii) 'Welfare Fund' means the Mica Mines Labour Welfare Fund constituted under the Mica Mines Labour Welfare Fund Act, 1946.

(ix) 'Year' means a financial year.

³[3. **Constitution and management of the Provident Fund.**—The Provident Fund shall be administered by the Controlling Officer and shall be maintained by the Accounts Officer in rupees in India.]

³[4. These rules shall apply to every employee holding a permanent and non-pensionable post in a substantive capacity: Provided that a person appointed on probation to a permanent post or appointed to officiate in a post which is vacant or the permanent incumbent of which does not draw any part of the pay or count service may, if he is confirmed without interruption, be allowed to join the Provident Fund with retrospective effect from the date of his joining the service. Provided further that an employee in temporary service may also be admitted to the Provident Fund, with the written consent of the Controlling Officer, with retrospective effect from the date he joined the service, if he has been employed in connection with the Fund for not less than a year and is in the opinion of the Controlling Officer likely to remain so employed for at least another two years.

NOTE.—No employee who is in receipt of a pension from Government shall be admitted to the Provident Fund.]

³[5. **Nomination.**—(1) A subscriber shall as soon as may be after joining the Provident Fund, send to the ⁴[Accounts Officer through the Controlling Officer] a nomination conferring on one or more persons the right to receive the amount that may stand to his credit in the Provident Fund in the event of his death before that amount has become payable, or having become payable has not been paid;

Provided that if, at the time of making the nomination, the subscriber has a family, the nomination shall not be in favour of any person or persons other than the members of his family.

³ Substituted by Ministry of Labour Notification No. S.R.O. 1532 dated the 4th May, 1954.

⁴ Substituted by Ministry of Labour Notification No. S.R.O. 719 dated 23rd March, 1955.

(2) If a subscriber nominates more than one person under sub-rule (i), he shall specify in the nomination the amount or share payable to each nominee in such manner as to cover the whole of the amount that may stand to his credit in the Fund at any time.

(3) Every nomination shall be in such one of the Forms set forth in the First Schedule as is appropriate in the circumstances.

(4) A subscriber may at any time cancel a nomination by sending a notice in writing to the Accounts Officer through the Controlling Officer:

Provided that the subscriber shall along with such notice send a fresh nomination made in accordance with the provisions of this rule.

(5) A subscriber may provide in a nomination—

(a) in respect of any specified nominee that in the event of his predeceasing the subscriber, the right conferred upon that nominee shall pass to such other person as may be specified, in the nomination;

(b) that the nomination shall become invalid in the event of the happening of a contingency specified therein:

Provided that if at the time of making the nomination the subscriber has no family, he shall provide in the nomination that it shall become invalid in the event of his subsequently acquiring a family.

(6) Immediately on the death of a nominee in respect of whom no special provision has been made in the nomination under clause (a) of sub-rule (5), or on the occurrence of any event by reason of which the nomination becomes invalid in pursuance of clause (b) of sub-rule (5) or the proviso thereto, the subscriber shall send to the Accounts Officer through the Controlling Officer a notice in writing cancelling the nominations together with a fresh nomination made in accordance with the provisions of this rule:

(7) Every nomination made, and every notice of cancellation given by a subscriber shall, to the extent that it is valid, take effect on the date on which it is received by the Accounts Officer through the Controlling Officer.]

6. Subscriber's Account.—An account shall be prepared in the name of each subscriber and maintained by the Accounts Officer in the form set forth in the Second Schedule appended to these rules.

⁵[The Accounts Officer shall issue to each subscriber an annual statement of account in the form set forth in the Third Schedule appended to these Rules.]

7. Conditions and rate of subscriptions.—(i) A subscriber shall subscribe monthly to the Provident Fund when on duty or foreign service.

(2) A subscriber may, at his election, not subscribe during leave.

(3) The subscriber shall intimate his election not to subscribe during leave by a written communication to the Accounts Officer through the Controlling Officer before he proceeds on leave.

(4) Failure to make due and timely intimation shall be deemed to constitute an election to subscribe.

(5) The election of a subscriber intimated under this ⁶[rule] shall be final.

(6) A subscriber shall not subscribe to the Provident Fund on extraordinary leave without pay or under suspension. He shall, however, on return from a period of such leave without pay or on re-instatement after a period passed under suspension be allowed the option to subscribe for that period, at the discretion of the Controlling Officer. The amount of subscription to be paid shall also be determined by the Controlling Officer, the general principle to be observed being that the subscription should be calculated on half the emoluments drawn by the employee before he proceeded on leave without pay or was placed under suspension.

8. (i) The amount of subscription shall be fixed by the subscriber himself subject to the following conditions—

(a) It shall be expressed in whole rupees: Provided that if the emoluments of the subscriber do not exceed fifty rupees a month, the amount may be any multiple of a half rupee;

(b) It may be any sum so expressed at a rate not exceeding $12\frac{1}{2}$ per cent. (i.e., two annas in the rupee) and not less than $6\frac{1}{4}$ per cent. (i.e., one anna in the rupee) of his monthly emoluments.

⁵ Added by Ministry of Labour Notification No. S.R.O. 1532 dated the 4th May, 1954.

⁶ Substituted for the word "sub-rule," *ibid*.

⁷[Provided that in the case of an employee who under the Rules is allowed to join the Provident Fund with retrospective effect, such monthly subscription shall not be less than ten per cent. of his pay until all arrears of such subscriptions are paid up in full.]

⁸[In the case of a person already subscribing at a rate higher than 10 per cent. of his pay the amount paid in excess of 6½ per cent. of his pay shall be adjusted against the recovery of his arrears.]

(2) For the purpose of sub-rule (1) the emoluments of a subscriber shall be—

- (a) in the case of a subscriber who was on duty on the 31st March of the preceding year, the emoluments to which he was entitled on that date;
- (b) in the case of a subscriber admitted to the Provident Fund on a subsequent date, the emoluments to which he was entitled on such subsequent date;
- (c) In the case of a subscriber who was on deputation out of India on the said date or was on leave on the said date and continues to be on leave and has elected to subscribe during such leave the emoluments to which he would have been entitled had he been on duty; and
- (d) in the case of a subscriber who was on leave on the said date and elected not to subscribe during such leave or was under suspension on the said date the emoluments to which he was entitled on the first day after his return to duty.

(3) The subscriber shall intimate the fixation of the amount of his monthly subscription for each year on the basis of his emoluments and rate permissible as provided in sub-rule (2). The amount so fixed shall remain unchanged throughout the year:

Provided that if a subscriber is on duty for a part of a month and on leave for the remainder of that month, and if he has elected not to subscribe during leave the amount of the subscription shall be proportionate to the number of days spent on duty in the month.

⁷[Provided further that if a subscriber is permitted to subscribe for the period of leave without pay or for the period spent under suspension, the amount of subscription shall be determined as provided in sub-rule (6) of rule 7.]

9. Realisation of subscription.—(1) When the emoluments are drawn on the establishment pay bills, recovery of subscription to and the principal and interest of advances granted from the Provident Fund shall be made by deduction from the pay bills.

(2) When the emoluments are drawn otherwise, the subscriber shall forward his dues monthly to the Accounts Officer.

10. Contribution by the Welfare Fund.—⁹[(1) The Controlling Officer shall make yearly a contribution to the account of each subscriber from the Welfare Fund.

Provided that if a subscriber quits service or dies during the course of a year, proportionate contribution shall be credited to his account for the period between the close of the preceding year and the date of his retirement or death, as the case may be.

(2) The rate of contribution made by the Controlling Officer shall be 6½ per cent. (1/16th) of the subscriber's emoluments drawn during the year during which he subscribed to the Fund:

Provided that in case of an employee who is allowed to join the Provident Fund with retrospective effect such contribution shall not be less than ten per cent. of the subscriber's emoluments until all arrears of such contribution are paid up in full;

Provided further that for the period of leave during which he elected to subscribe the emoluments would mean the emoluments to which he would have been entitled had he been on duty, and for the period of leave without pay and for the period spent under suspension for which he was permitted to subscribe under sub-rule (6) of rule 7, the emoluments would mean the emoluments as determined by the Controlling Officer under the said rule.]

(3) The amount of contribution shall be rounded off to the nearest whole rupee, (eight annas counting as the next higher rupee).

11. Interest.—¹⁰[(1) The Controlling Officer shall pay to the credit of the account of a subscriber interest, at such rate as the Central Government may from time to time prescribe for the payment of interest ¹¹[on a subscriber's accumulations in the Provident Fund.]

⁷ Added by Notification No. S.R.O. 1532 dated the 4th May, 1954.

⁸ Added by Notification No. S.R.O. 719 dated the 23rd March, 1955.

⁹ Substituted by Notification No. S.R.O. 1532 dated the 4th May, 1954.

¹⁰ Renumbered as sub-rule (1), *ibid.*

¹¹ Substituted, *ibid.*

¹²[(2) In addition to any amount to be paid under rule 17, interest thereon upto the end of the month preceding that in which payment is made, or upto the end of the sixth month after the month in which such amount became payable, whichever of these periods be less, shall be payable to the persons to whom such amount is to be paid; provided that no interest shall be paid in respect of any period after the date which the Accounts Officer has intimated to that person (or his agent) as the date on which he is prepared to make payment in cash, or if he pays by cheque, after the date on which the cheque in that person's favour is put in the post.

(3) Interest shall be credited with effect from the 31st March of each year in the following manner:—

- (i) on the amount at the credit of a subscriber on the 31st March of the preceding year, less any sums withdrawn during the current year—interest for twelve months;
- (ii) on sums withdrawn during the current year—interest from the 1st April of the current year up to the last day of the month preceding the month of withdrawal;
- (iii) on all sums credited to the subscriber's account after the 31st March of the preceding year—interest from the date of deposit up to the 31st March of the current year;
- (iv) the total amount of interest shall be rounded to the nearest rupee in the manner provided in sub-rule (3) of rule 10;

Provided that when the amount standing at the credit of a subscriber has become payable, interest shall thereupon be credited under this sub-rule in respect only of the period from the beginning of the current year or from the date of deposit, as the case may be, up to the date on which the amount standing at the credit of the subscriber became payable.]

12. Advances.—When the pecuniary circumstances of a subscriber are such that indulgence is absolutely necessary, a temporary recoverable advance may, at the discretion of the Controlling Officer, be granted to a subscriber out of the amount standing to his credit in the Provident Fund, on the conditions that—

- (i) the advance is required to pay expenses on behalf of a subscriber or his family on any of the following:

- (a) Prolonged illness or medical attention,
- (b) Overseas passage for reasons of health or education,
- (c) marriage, funerals or ceremonies which by his religion it is incumbent upon the subscriber to perform.

¹³[(d) education outside India, whether for an academic, technical, professional or vocational course,

(e) medical, engineering and other technical or specialised courses in India beyond the High School stage, provided that the course of study is not less than three years.]

- (ii) the advance is expressed in whole rupees and shall not, except for special reasons, exceed three months' pay of the subscriber and shall in no case exceed the amount of subscriptions and interest thereon standing to his credit in the Provident Fund.

- (iii) a written request is made to Controlling Officer showing reason for the request:

Provided that if the reason is of a confidential nature it may be communicated to the Controlling Officer personally or confidentially.

¹⁴[13. Any advance shall be recovered from the subscriber in such number of equal monthly instalments as the Controlling Officer may direct but the number shall not be less than 12 unless the subscriber so elects or in any case more than 24, the amount of advance being raised or reduced, if necessary, to admit of the fixation of such instalments. The instalments shall be expressed in whole rupee and recovered from the subscriber's salary in the manner indicated in rule 9. Recovery shall commence on the first occasion after the advance is made on which the subscriber draws emoluments, other than leave salary or subsistence grant, for a full month.]

¹² Inserted by Notification No. S.R.O. 1532 dated the 4th May, 1954.

¹³ Added, *ibid.*

¹⁴ Rules 13 and 14 substituted for Rule 13, *ibid.*

¹⁵[*Explanation*.—Salary means duty pay and leave salary.]

¹⁴[14. After the principal of the advance has been fully repaid, interest thereon shall be recovered in one instalment at the rate of 1/5 per cent. of the principal for each month or broken portion of a month during the period between the drawal and complete repayment of the principal:]

Provided that when the advance is distributed to be recovered in more than 19 instalments, the interest may be recovered in two instalments.]

¹⁶[15.] **Deductions.**—Subject to the conditions that no deductions may be made which reduce the credit by more than the amount of any contribution by the Controlling Officer with interest thereon credited under rules 10 and 11, before the amount standing to the credit of a subscriber in the Provident Fund is paid out of the Fund, the Controlling Officer may direct the deductions therefrom and payment to the Welfare Fund of—

(a) any amount, if a subscriber has been dismissed from the service for grave misconduct:

Provided that, if the order of dismissal is subsequently cancelled, the amount so deducted shall, on his reinstatement in the service, be replaced at his credit in the Provident Fund.

(b) any amount if a subscriber resigns his employment under the Welfare Fund within ¹⁷[five years] of commencement of service thereof otherwise than by reasons of superannuation or a declaration by competent medical authority that he is unfit for further service;

(c) any amount due under a liability incurred by the subscriber to the Welfare Fund.

¹⁸[16.] **Final withdrawal of accumulations in the Provident Fund.**—The amount standing to the credit of a subscriber shall become payable at the time of quitting service or the death of the subscriber in the manner provided by these rules.

¹⁸[17.] The total accumulations in the account of a subscriber ¹⁹[subject to any deductions under rule 15] shall be paid as follows:—

(i) to the subscriber on his ceasing to be an employee;

(ii) in the event of the death of the subscriber and to having made a nomination in accordance with these rules, to the nominee or nominees, and in the event of such nominee or nominees predeceasing the subscriber, to the alternate nominee or nominees, in the manner indicated in the declaration form; or

²⁰[(iii) in the event of the death of the subscriber without having made a nomination in accordance with these rules or whose nominee or nominees or alternate nominee or nominees has/have not survived the subscriber, to the members of his family in equal shares:

Provided that no share shall be payable to—

(a) sons who have attained legal majority;

(b) sons of a deceased son who have attained legal majority;

(c) married daughters whose husbands are alive;

(d) married daughters of a deceased son whose husbands are alive, if there is any member of the family other than those specified in clauses (a), (b), (c) and (d):

Provided also that the widow or widows and the child or children of a deceased son shall receive between them in equal parts only the share which that son would have received if he had survived the subscriber and had been exempted the provisions of clause (a) of the proviso.]

¹⁵ Explanation added by Notification No. S.R.O. 719 dated the 23rd March, 1955.

¹⁶ Rule 14 re-numbered as Rule 15 by S.R.O. 1532 dated the 4th May, 1954.

¹⁷ Substituted for "three years", *ibid*.

¹⁸ Rules 15 and 16 omitted and Rules 17 and 18 re-numbered as 16 and 17, *ibid*.

¹⁹ Substituted for the words "less the amount of unrecovered advance and interest thereon, if any", *ibid*.

²⁰ Substituted, *ibid*.

²¹[FIRST SCHEDULE—[See rule 5(3)].

FORMS OF NOMINATION

I. When the subscriber has a family and wishes to nominate one member thereof.
I hereby nominate the person mentioned below, who is a member of my family as defined in rule 2 of the Mica Mines Labour Welfare Office Establishment (Contributory Provident Fund) Rules, 1950, to receive the amount that may stand to my credit in the Fund, in the event of my death before that amount has become payable or having become payable, has not been paid:—

Name and address of the nominee	Relationship with subscriber	Age	Contingencies on the happening of which the nomination shall become invalid	Name, address and relationship of the person, if any, to whom the right of the nominee shall pass in the event of his pre-deceasing the subscriber

Dated this day of, 19
at
Signature of Subscriber
Two witnesses to signature.

23. The words "Third Schedule" was inserted by the Ministry of Labour Corrigendum Notification No. S.R.O. 2086 dated the 21st June 1954, vide Gazette of India, 1954, Part II—Sec. 3, p. 1667.

24. Substituted as part of Second Schedule by the Ministry of Labour Notification No. S.R.O. 1532 dated the 4th May, 1954, vide the Gazette of India, 1954, Part II—Sec. 3, p. 978.

TRANSPORT LEGISLATION

TRANSPORT LEGISLATION

There is no comprehensive legislation regulating the working conditions of transport workers. The Central legislation regulating the conditions of work in transport system and communications was limited to (1) railways, (2) mercantile marine, (3) docks and ports and (4) road transport only. The principle of statutory regulation of conditions of work has not yet been extended to other classes of transport workers, viz. tramways, motor buses and inland water transport which lie within the jurisdiction of State Governments. The Central Government has recently undertaken legislative measures for air transport workers and regulations regarding their service conditions have been framed in April, 1955. Among the laws already enacted by the Central Government there is no basis of uniformity in the working conditions of different categories of transport workers and therefore there is no set of laws which may properly be called Transport Legislation.

(1) Railway Labour

Until 1930 there was no statutory regulation of the conditions of work of railway servants except those employed in the railway workshops which are covered by the Indian Factories Act. The most important transport legislation was undertaken for the railway workers by the Central Government with a view to give effect to the I.L.O. Conventions of 1921 and 1923 regarding hours of work and weekly rest in industry by introducing a Bill in the Legislative Assembly in 1929 which after some amendments was passed as Indian Railways (Amendment) Act, 1930. The Amending Act of 1930 deals with hours of work and periods of rest of all railway employees except those covered under the Factories Act and Mines Act. Under the Amending Act, the Central Government framed Railway Servants Hours of Employment Rules, 1931 regulating the hours of employment and periods of rest of railway servants. Following the Rajadhyaksha Award of 1947, the Central Government superseded 1931 Rules by Railway Servants (Hours of Employment) Rules, 1951 incorporating the recommendations of the Adjudicator regarding hours of work and periods of rest. A Bill was introduced in the Council of State on the 31st July, 1953 for amendment of the Indian Railways Act, incorporating the changes in respect of hours of work and periods of rest, etc. and was passed on the 1st September, 1954 but the same has not yet been introduced in the Lok Sabha.

(2) Maritime Labour

The regulation of labour conditions of seafarers or all persons employed or engaged in any capacity on board any ship except masters, pilots and apprentices duly indentured and registered is an important branch of transport legislation. The conditions of employment of Indian seamen are regulated by the provisions contained in Part II of the Indian Merchant Shipping Act of 1923. The Act was passed with a view to amend and consolidate the various earliest transport legislations relating to merchant shipping. The Act was amended on several occasions, the important Amending Acts were passed in 1931, 1949 and 1951. The Amending Act of 1931 regulates the employment of young persons and children on board ships. The Amending Act of 1949 regulates the supply of maritime labour by providing for setting up of Seamen's Employment Offices. The Central Government has framed the Seamen's Employment Office Rules for Bombay and Calcutta in 1954 and has set up Seamen's Employment Boards at the ports of Bombay and Calcutta for a period of two years with effect from the 7th June, 1954 and 1st March, 1955 respectively. The Amending Act of 1951 provides for medical examination of seamen and prescribes their qualifications. The Central Government has framed the Indian Merchant Shipping (Medical Examination) Rules, 1951 providing for appointment of medical authorities at ports and prescribing the standard of physical fitness, the nature of medical examination, etc.

(3) Dock and Port Labour

Indian Dock Labourers Act, 1934

The Indian Dock Labourers Act, 1934 was undertaken by the Central Government to give effect to the provisions of the Protection against Accidents (Dockers) Convention (Revised), 1932 concerning the protection against accidents of workers employed in loading and unloading ships. The Act came into force on the 10th February, 1948 when the Central Government framed the Indian Dock Labourers Regulations, 1948 providing in details various safety measures to be adopted by (1) the authorities in charge of the management and control of a dock, wharf or quay, (2) the owner, master or agent of a ship, (3) persons engaged in loading and unloading of cargo and (4) the owner of the machinery or plant used in loading or unloading of cargo. The Act and the Regulations apply only to the major ports of Bombay, Calcutta, Madras, Visakhapatnam and Cochin.

Dock Workers (Regulation of Employment) Act and Schemes

With a view to eliminate the hardship caused to the dock workers on account of casual nature of their employment, the Dock Workers (Regulation of Employment) Act was enacted in March, 1948 following the general principles of U. K. Dock Workers (Regulation of Employment) Act of 1946. The Act authorises the Central Government in case of major ports and State Governments in respect of other ports, to frame schemes for registration of dock workers with a view to secure greater regularity of employment for them and to regulate the employment and conditions of work of all dock workers, registered or non-registered in ports. Under the Act, Dock Workers (Regulation of Employment) Scheme was framed by the Central Government for the ports of Bombay on the 27th January, 1951, Calcutta on the 5th October, 1951 and Madras on the 8th March, 1952. The objects of the Schemes are to ensure greater regularity of employment for dock workers and to regulate their conditions of work. For the purpose of administration of the Schemes, Dock Labour Boards consisting of representatives of Government, workers and employers, were constituted in Bombay in April, 1951, in Calcutta in September, 1952 and in Madras in July, 1953.

Dock Workers (Regulation of Employment) Enquiry Committee, 1955

After the implementation of the Schemes, complaints were lodged with the Central Government from different quarters regarding their operation in Bombay and Calcutta. On the recommendation of the Dock Workers Advisory Committee, the Central Government appointed the Dock Workers (Regulation of Employment) Enquiry Committee on the 14th January, 1955, under the chairmanship of Sri S. S. Vasist to enquire into the working of the Schemes in the major ports of Bombay, Calcutta and Madras and to suggest necessary modifications.

The Committee submitted its report to the Government on the 7th September, 1955. The Committee observed that the Dock Labour Boards did not function as effectively and efficiently as they should be and the Boards had failed to maintain a judicious balance between supply and demand. The Committee recommended that the wages paid to all workers must be linked with productivity and the existing system of time rate wages should be replaced by a system of "payment by result" with the provision for "incentive bonus." The Committee further recommended payment of minimum guaranteed monthly wages and gratuity and provident fund. The Committee recommended that the Dock Labour Boards should help in promoting settlement of disputes between the employers and employees and should submit reports of its endeavours to the Central Government. The Committee recommended that the Central Government should exercise effective supervision of the working of the Schemes at different ports and co-ordinate all important measures and should depute a high level officer to carry out these functions.

On the basis of the Committee's Recommendations, Drafts of Revised Schemes have been formulated by the Central Government. The most notable feature of the Revised Schemes is the importance attached to the system of payment by results. The Dock Labour Boards at the ports will prescribe forms of productivity in respect of cargoes of different kinds and the worker will be entitled to daily wages proportionate to the standard of output.

Indian Ports Act, 1908

The Indian Ports Act, 1908 as amended in 1922 and 1931, *inter alia*, prohibits the employment of children under 12 years of age in handling goods in ports to which the Act applies. With regard to the minimum age for admission of employment in transport, the Central Government has enacted the Employment of Children Act in 1938 prohibiting the employment of children below 15 in any occupation connected with the transport of passengers, goods or mails by railway or in any occupation involving the handling of goods within the limits of any port.

Marking of Heavy Packages Act & Rules

The Central Government enacted the Marking of Heavy Packages Act in 1951 in order to give effect to the International Labour Convention No. 27 concerning the marking of weight of heavy packages transported by vessels. Under the Act, every person consigning a heavy package of certain weight, should mark thereon plainly and durably the gross weight. Under the Rules which came into force on the 1st November, 1951, the gross weight of the heavy packages should be marked in English and also in the regional language with a kind of paint which cannot be easily effaced.

(4) Road Transport Labour

Motor transport workers form the majority of road transport labour in India. The principle of statutory regulation of conditions of work of motor transport workers came under the consideration of the Royal Commission on Labour in India but the Commission came to the conclusion that the regulation of hours of work of motor bus workers in the cities and in the country would be difficult. After consultation with the Provincial Governments and Transport Advisory Council, the Central Government introduced a Bill to consolidate and amend the law relating to motor vehicles on the 18th March, 1938. The Motor Vehicles Act, 1939 regulates the minimum age of employment, hours of work and rest periods for motor drivers. It limits the hours of work in case of transport vehicles to 9 in a day and 54 in a week and half an hour's rest for 5 hours of continuous work.

There is at present no comprehensive legislation regarding the conditions of motor transport workers. Two non-official Bills to regulate the conditions of motor transport workers were introduced in the Lok Sabha—Sri A. K. Gopalan's Motor Transport Labour Bill No. 41 of 1955 on the 2nd September, 1955 and Sri T. B. Vittal Rao's Motor Vehicles (Amendment) Bill No. 44 of 1955 on the 16th September, 1955, substituting section 65 of the Motor Vehicles Act, 1939. The main provisions of these two Bills relate to the hours of work and limitation of employment, welfare, leave with pay, recreational facilities, provident fund and gratuity. Another non-official Bill called the Motor Vehicles (Amendment) Bill exactly on the above lines was introduced in the Rajya Sabha on the 9th March, 1956.

(5) Air Transport Labour

Air transport services, both internal and international, were previously being run by private concerns in India. The Government of India introduced the Air Corporations Bill in the House of the People on the 21st March, 1953 with a view to establish two Air Corporations to provide safe, efficient, adequate, economical and properly co-ordinated air transport services by acquiring the undertakings

belonging to existing air companies. The Air Corporations Act (XXVII of 1953) received the assent of the President on 28th May, 1953.

Air Corporations Act, 1953 (XXVII of 1953)

Under the Act every officer and other employees of the existing air companies (excepting director, manager, managing agent or any other persons entitled to manage the whole or a substantial part of the business and affairs of the company) employed prior to 1st July, 1952 should become the employee of the newly formed Corporations without affecting his terms and conditions of service.

The Act provides that each of the Corporations shall constitute a Labour Relations Committee consisting of representatives of the Corporation and its employees and the Labour Relations Committee is to advise the Corporation on matters relating to the welfare of employees and also for promoting and securing amity and good relations between the employees and the Corporation.

The Act authorises the Central Government to make rules regarding terms and conditions of service of the general managers of the two Corporations and such other categories of officers as may be specified from time to time and also for training of the employees of either of the Corporations or other persons on the fees which may be charged from them. The Act authorises the Corporations to make regulations regarding terms and conditions of service of the officers and other employees of the Corporation other than the general manager and officers for whom the Central Government will make necessary rules.

Air Corporations Rules, 1954

The Rules framed by the Central Government on the 26th November, 1954 contain provisions for training of Operational Staff and constitution of the Labour Relations Committee. The duty of the Labour Relations Committee is to advise the Corporation on all matters relating to the welfare of the employees which are likely to promote and secure amity and good relations between the two.

Indian Airlines Corporation Services Committee, 1954

The Indian Airlines Corporation by a Resolution dated the 7th August, 1953 set up a Services Committee with Sri W. R. Puranik, Retired Judge, Nagpur High Court as Chairman, to make recommendations on (i) rationalisation of pay scales for different categories of personnel and formulation of a suitable wage structure; (ii) the procedure to be followed in bringing existing personnel on the approved new pay scales; (iii) the principles to be followed for determining seniority as between personnel of same category belonging to different companies doing more or less similar duties and (iv) formulation of common service conditions in the matter of leave, holidays, travelling allowance rules, insurance facilities, bonus, allowances, provident fund, gratuity, pension schemes, residential accommodation, etc. The Committee submitted the Report to the Chairman of the Corporation on the 16th July, 1954.

Indian Airlines Corporation Employees Service Regulations, 1955

The Indian Airlines Corporation has framed regulations on the 6th April, 1955 regarding conditions of service, recruitment, promotion, discipline, control and appeal, pay and allowances, leave and retirement benefits of (a) Flying Crew, (b) Aircraft Engineering Department and (iii) Employees other than Flying Crew and Aircraft Engineering Department, effective from the 1st January, 1955.

Airlines Corporation Employees Conduct & Discipline Regulations, 1955

The Corporation also by a notification dated the 16th April, 1955 has framed regulations regarding rules of conduct and disciplinary procedure. Under the Regulations, an employee is a wholetime servant of the Corporation and shall not directly or indirectly engage in any business or accept any fees, etc., from

any party nor he can take part in any way in any political or commercial organisations. The term "misconduct" has been clearly defined and different penalties may be imposed on the employees for good and sufficient reasons.

I will now deal with the above five categories of transport labour, more elaborately.

RAILWAY LABOUR LEGISLATION

Railway Labour Legislation

The most important transport legislation in India relates to the railways which come as the third largest group of employers of industrial labour. Until 1930, there was no statutory regulation of the conditions of work of railway servants except those employed in railway workshops covered by the Indian Factories Act. The International Labour Conventions—Hours of Work (Industry) 1919 and Weekly Rest (Industry) 1921 were ratified by the Government of India and given effect to in the Indian Railways (Amendment) Act, 1930 (XIV of 1930), adding a new Chapter (Chapter VI-A) to the Indian Railways Act, 1890, dealing with the hours of work and periods of rest of railway employees except those covered under the Factories Act and the Mines Act and those specifically excluded by the Central Government.

Main Provisions of the Amending Act of 1930 (XIV of 1930)

The important provisions of the Amending Act are as follows:—(1) Railway workers are classified into two categories—continuous workers and essentially intermittent workers; (2) the hours of work shall not exceed 60 hours a week on the average in any month in respect of all staff coming under the Act except those whose work is essentially intermittent and the hour of work in the latter case is limited to 84 a week; (3) a compulsory weekly holiday is provided for railway employees whose work is not intermittent; (4) temporary exemption may be made in case of accidents, emergency, urgent work and exceptional pressure of work and the hours worked in excess of the statutory maximum are to be paid at the rate of $1\frac{1}{2}$ times the ordinary rate of pay. The Central Government has been empowered to prescribe the railway servants to whom these provisions apply and the authorities who can declare any employment as essentially intermittent and to grant exemptions and also to appoint persons as Supervisors of Railway Labour.

Railway Servants (Hours of Employment) Rules, 1951

Rules were framed by the Central Government in 1931 under section 71E of the Act known as Railway Servants (Hours of Employment) Rules. These Rules and the Act are generally referred to as the Hours of Employment Regulations. The Rules provide for limitation of the hours of work and grant of periodical periods of rest to certain classes of railway servants excluding those who are engaged on the running staff or watch and ward duty or in a confidential capacity as supervisor or manager and persons covered under the Factories Act and the Mines Act.

The Rajadhyaksha Award of 1947 recommended the extension of the scope of the Hours of Employment Regulations so as to cover various other categories of workers who were then excluded and made certain recommendations regarding classification of railway servants, hours of work, periods of rest, leave with pay, etc. The Central Government accepted the Recommendations regarding hours of work, period of rest and leave reserves, and by an order dated the 5th June 1948 declared it binding for three years on railways who were parties to the dispute. The Ministry

of Railways (Railway Board) issued necessary instructions to implement the Award by three stages by 31st March, 1951 starting from 1st November, 1948.

In March 1951, the Central Government framed fresh Rules called the Railway Servants (Hours of Employment) Rules, 1951 in supersession of 1931 Rules incorporating the recommendations of the Rajadhyaksha Award regarding hours of work and periods of rest. The Rules apply to all classes of railway servants except those (1) who are subject to the Factories Act, 1948, the Mines Act, 1952 and the Indian Merchant Shipping Act, 1923, (2) supervisory staff, (3) persons employed in a confidential capacity, (4) certain staff belonging to the Medical Department, (5) armed guards and other police personnel, (6) class IV staff whose work is specially light, (7) railway schools staff and (8) casual labour. Under the Rules, railway servants are divided into four categories—(1) intensive, (2) essentially intermittent, (3) excluded and (4) continuous. Weekly hours of work for “intensive,” “continuous” and “essentially intermittent” workers have been fixed at 45, 54 and 75, respectively. “Intensive” and “continuous” workers shall be given a period of rest of 30 consecutive hours a week, “essentially intermittent” workers on weekly rest of 24 consecutive hours including a full night and “excluded” workers a rest period of 48 consecutive hours in a month or one period of 24 consecutive hours in each fortnight. The running staff will be given the periodic rest of four periods of at least 30 consecutive hours each or five periods of not less than 22 consecutive hours each a month.

Adjudication by Justice G. S. Rajadhyaksha

The All-India Railwaymen's Federation approached the Government of India in 1946 for appointment of an Adjudicator in respect of certain demands of the railway workers. The Government appointed Mr. Justice G. S. Rajadhyaksha in April 1946 to adjudicate on the dispute relating to hours of work, periodic rest, leave reserves, leave rules and holiday concessions for daily rated and inferior staff. The Adjudicator submitted his Award to the Government in May 1947.

The salient features of the Rajadhyaksha Award are the following:—(1) Railway workers shall be re-classified into four categories—“intensive,” “continuous,” “essentially intermittent” and “excluded”; (2) hours of work shall be restricted to 45 a week for “intensive” workers, 54 a week for “continuous” workers and 75 a week for “essentially intermittent” workers; (3) periodic rest of 30 consecutive hours every week shall be given to “intensive” and “continuous” workers, 24 consecutive hours every week to “essentially intermittent” workers, 48 consecutive hours in a month or one period of 24 consecutive hours in each fortnight to “excluded” staff who include certain specified categories of class IV staff whose employment is considered to be of an exceptionally light character, persons employed in a confidential capacity, supervisory staff, and some members of the health and medical staff; (4) running staff are brought within the scope of Hours of Employment Regulations. Their period of duty shall not ordinarily exceed 10 hours at a stretch and their rest periods shall consist of 4 periods of at least 30 consecutive hours each or 5 periods of not less than 22 consecutive hours each in a month, (5) provisions of leave reserves, leave with pay and holidays.

The Government of India accepted the Award in respect of hours of work, periods of rest and leave reserves and by an order dated the 15th June, 1948 declared it binding for a period of three years on the nine Indian Railway Administrations who were parties to the dispute. In July 1948, the Ministry of Railway (Railway Board) issued necessary instructions for the implementation of the Award in three stages by the 31st March, 1951. The recommendations of the Adjudicator was given effect to in the Railway Servants (Hours of Employment) Rules, 1951 by a notification dated the 26th March, 1951 superseding 1931 Rules.

Indian Railways (Amendment) Bill, 1953 (Bill No. XIX of 1953)¹

Although the recommendations of the Adjudicator were implemented by amending the Rules framed under section 71E of the Indian Railways Act, 1890, the Government considered it advisable to amend Chapter VIA of the Indian Railways Act, 1890 with a view to give statutory force to the Adjudicator's Recommendations regarding hours of work, periods of rest, etc. A Bill was introduced in the Council of States by the Railway Minister on the 31st July 1953 and was passed by that House on the 1st September, 1954. The Bill has not yet been introduced in the Lok Sabha.

Central Pay Commission

The Central Pay Commission in their report submitted in 1947 recommended improved and uniform basic scales of pay for the various categories of service on the Railways, with the provision that special cases, such as service in the comparatively costlier or unhealthy localities should be met by grant of house rent allowance in cities with a population of over one lakh or compensatory (city) allowance in Bombay and Calcutta. The scales of pay recommended by the Commission and accepted by the Government show considerable improvement for all Class IV and artisan staff as well as for Class III staff except some one on the upper grades of pre-1931 scales. The Commission also recommended basic scales of pay for the running staff and suggested payment of running allowances with a ceiling limit equal to the average running allowance earned by each employee in 1946. The Commission also made recommendations about leave rules involving a radical change in the rules hitherto in force. At the time of implementation of the recommendations regarding scales of pay, all daily-rated staff in the workshops was converted to monthly and brought to the Commission's scales with the result that for the first time, the system of daily rates was abolished.

Administration

The administration of the Hours of Employment Regulations is the responsibility of the Industrial Relations Machinery under the charge of the Chief Labour Commissioner (Central). Each of seven railway regions is in charge of a Regional Labour Commissioner (Central), who is responsible for the administration of the Regulations with the assistance of Conciliation Officers (Central) and Labour

¹**Statement of Objects and Reasons**—In 1946, an industrial dispute arose between the nine former Government Railway Administrations and their respective employees about the hours of work, periods of rest, etc. laid down in Chapter VIA of the Indian Railways Act, 1890. The matter was, by consent, made the subject of adjudication. The Adjudicator gave his award in 1947. The Government have accepted the award in respect of hours of work, periods of rest and leave reserves. The chief changes accepted in consequence of the Adjudicator's Award in respect of hours of work and periods of rest are—

- (a) an all round curtailment of hours of work;
- (b) the introduction of a new category of workers, namely, intensive workers;
- (c) a radical change in the definition of intermittent workers;
- (d) a general liberalisation of periodical rest and bringing more categories of workers within its purview;
- (e) the inclusion of running staff within the scope of the provisions.

2. Although the implementation of these changes could be, and is being, achieved by amending the rules framed under section 71E of the Indian Railways Act, 1890, it is considered advisable to incorporate the changes in respect of hours of work and periods of rest, etc. by an amendment of the Indian Railways Act itself. Such radical changes should be effected by an amendment of the Act. Moreover, it will be in line with international practice. The International Labour Organisation to which our country belongs attaches considerable importance to statutory protection to the workmen in respect of such matters. Legally, the Award applied only to the railways which were parties to the industrial dispute. It is, however, necessary to apply it to the staff of the other railways also and it is advisable to place them on the same footing by extending to them the protection which the legislation confers. (Gazette of India Extraordinary, 1953, Part II—Section 2, page 471.)

Inspectors (Central). The Conciliation Officers have been declared by the Government as Supervisors of Railway Labour.

The Report of the Chief Labour Commissioner (Central) on the working of the Hours of Employment Regulations in Railways for the year 1952-53, shows that the total number of workers covered by the Regulations was 6,86,056 as compared to 6,88,289 in 1951-52. The distribution of the workers in 1952-53 in the seven regions classified according to the nature of work were as follows—Intensive 1,627 (0·2%), Continuous, 5,58,224 (81·4%), Intermittent 88,286 (12·9%) and Excluded 37,919 (6·5%), totally 6,86,056 (100%). The officers of the Industrial Relations Machinery inspected 5,771 establishments during the year and detected 11,610 irregularities as compared to 4,756 inspections and 7,013 irregularities in 1951-52. Of 11,610 irregularities detected during the year, 3,455 related to non-display of rosters or display of defective rosters, 1,030 to non-display of Regulations, 958 to work beyond rostered hours, 1,522 to working on rest days, 208 to continuous employment on night duty and 434 to non-payment of overtime wages. Irregularities numbering 9,091 were rectified, 202 were objected to by the Railway Administrations and 2,317 were under their consideration. Of the total number of irregularities rectified 27 per cent were rectified within 3 months and 61 per cent within six months. In most of the cases the Railway Administrations offered their full co-operation in the quick disposal of the irregularities brought to their notice. The Inspectors helped to ensure satisfactory compliance with the Regulations.

INDIAN RAILWAYS ACT, 1890 (IX OF 1890) (EXTRACTS)

Arrangement of Sections

CHAPTER I—PRELIMINARY

1. Title, extent and commencement.
2. Definitions.

CHAPTER VIA—LIMITATION OF EMPLOYMENT OF RAILWAY SERVANTS

INDIAN RAILWAYS ACT, 1890 (IX OF 1890) (EXTRACTS)

[21st March, 1890.]

*An Act to consolidate, amend and add to the law relating to
Railways in India.*

Whereas it is expedient to consolidate, amend and add to the law relating to railways in India; It is hereby enacted as follows:—

CHAPTER I—PRELIMINARY.

1. **Title, extent and commencement.**—(1) This Act may be called the Indian Railways Act, 1890.

(2) It extends to the whole of India.

3. **Definitions.**—In this Act, unless there is something repugnant in the subject or context,—

* * * * *

(5) “railway company” includes any persons, whether incorporated or not, who are owners or lessees of a railway or parties to an agreement for working a railway;

(6) "railway administration" or "administration", in the case of a railway administered by the Government ¹ * * *, means the manager of the railway and includes the Government ² * * *, and in the case of a railway administered by a railway company means the railway company;

(7) "railway servant" means any person employed by a railway administration in connection with the service of a railway;

(8) "Inspector" means an Inspector of Railways appointed under this Act;

* * * * *

³[CHAPTER VIA⁴—LIMITATION OF EMPLOYMENT OF RAILWAY SERVANTS

71A. Definitions.—In this Chapter, unless there is anything repugnant in the subject or context,—

(a) the employment of a railway servant is said to be 'essentially intermittent' when it has been declared to be so by the authority empowered in this behalf, on the ground that it involves long periods of inaction; during which the railway servant is on duty but is not called upon to display either physical activity or sustained attention; and

(b) except in section 71B, a "railway servant" means a railway servant to whom this Chapter applies.

¹ The words "or a State" rep. by the A.O. 1950.

² The words "or the State" rep., *ibid*.

³ Chapter VIA was inserted by the Indian Railways (Amendment) Act, 1930 (XIV of 1930). The Indian Railways (Amendment) Bill No. XIX of 1953 substitutes Chapter VIA with sections 71A to 71H. For a comparative study, the provisions of the Amending Bill are reproduced under each section.

⁴ For power given to Central Govt. to suspend operation of Chapter VIA in certain cases, see the Railways (Hours of Employment) Ordinance, 1942 (45 of 1942).

71A. Definitions.—In this Chapter, unless the context otherwise requires,—

- (a) the employment of a railway servant is said to be "continuous" except when it is excluded or has been declared to be essentially intermittent or intensive;
- (b) the employment of a railway servant is said to be "essentially intermittent" when it has been declared to be so by the prescribed authority on the ground that the daily hours of duty of the railway servant normally include periods of inaction aggregating six hours or more (including at least one such period of not less than one hour or two such periods of not less than half an hour each) during which the railway servant may be on duty, but is not called upon to display either physical activity or sustained attention;
- (c) the employment of a railway servant is said to be "excluded", if he belongs to any one of the following categories, namely:—
 - (i) railway servants employed in a confidential capacity;
 - (ii) armed guards, or other personnel subject to discipline similar to that of the armed police forces;
 - (iii) staff of the railway schools imparting technical training or academic education;
 - (iv) such categories of class IV staff as may be specified by the Central Government by rules made under section 71E;
 - (v) such staff as may be specified as supervisory staff by the Central Government by rules made under section 71E;
 - (vi) such categories of staff of the Health and Medical department as may be specified by the Central Government by rules made under section 71E;
- (d) the employment of a railway servant is said to be "intensive" when it has been declared to be so by the prescribed authority on the ground that it is of a strenuous nature involving continued concentration or hard manual labour with little or no period of relaxation.

671B. Application of Chapter VIA.—This Chapter applies only to such railway servants or classes of railway servants as the ⁷[Central Government] may by rules made under section 71E, prescribe.

871C. Limitation of hours of work.—(1) A railway servant, other than a railway servant whose employment is essentially intermittent, shall not be employed for more than sixty hours a week on the average in any month.

(2) A railway servant whose employment is essentially intermittent shall not be employed for more than eighty-four hours in any week.

(3) Subject to rules made under section 71E, temporary exemptions of railway servants from the provisions of sub-section (1) and sub-section (2) may be made—

(a) when such temporary exemptions are necessary to avoid serious interference with the ordinary working of the railway, in cases of accident, actual or threatened, or when urgent work is required to be done to the railway or to rolling-stock, or in any emergency which could not have been foreseen or prevented; and

(b) in cases of exceptional pressure of work not falling within the scope of clause (a):

Provided that a railway servant exempted under clause (b) shall be paid for overtime at not less than one and a quarter times his ordinary rate of pay.

971D. Grant of periodical rest.—(1) A railway servant shall be granted each week commencing on Sunday, a rest of not less than twenty-four consecutive hours:

Provided that this sub-section shall not apply to a railway servant whose employment is essentially intermittent, or to a railway servant to whom sub-section (2) applies.

671B. Chapter VIA not to apply to certain railway servants.—This Chapter shall not apply to any railway servant to whom the Indian Merchant Shipping Act, 1923 (XXI of 1923) or the Factories Act, 1948 (LXIII of 1948) or the Mines Act, 1952 (XXXV of 1952), applies.

⁷ Substituted for the words "Governor General in Council" by the A. O. 1950.

871C. Limitation of hours of work.—(1) A railway servant whose employment is essentially intermittent shall not be employed for more than seventy-five hours in any week.
